|-----------------|-----------|------|---------------|---------|
|                 | 1870      | 1880 | 1870          | 1880    |
| Michigan . . .  | 65        | 86   | 90,000        | 280,000 |
| New York . . .  | 93        | 69   | 110,000       | 200,000 |
| Virginia . . .  | 29        | 11   | 100,000       | 70,000  |
| Ohio . . . . .  | 40        | 25   | 65,000        | 60,000  |
| Various . . . . | 55        | 73   | 35,000        | 60,000  |
| Total . . . .   | 282       | 264  | 400,000       | 670,000 |

## CANADA

The importation has been as follows:—

| Year           | Tons   | Value, £ |
|----------------|--------|----------|
| 1874 . . . . . | 60,000 | 90,000   |
| 1887 . . . . . | 50,000 | 65,000   |

Salt-springs were discovered at Goderich, Ontario, in 1865, and a bore of 960 feet was sunk in 1876. The production in 1886 was 55,000 tons, valued at £45,000. The consumption is, therefore, 105,000 tons, equal to 45 lbs. per inhabitant yearly.

## INDIA

About 500,000 tons are made yearly, besides which the importation has been as follows:—

| Year           | Tons    | Value, £ |
|----------------|---------|----------|
| 1873 . . . . . | 280,000 | 830,000  |
| 1880 . . . . . | 350,000 | 760,000  |
| 1888 . . . . . | 430,000 | 800,000  |

The salt-tax is enormous, and weighs heavily on the ryots. In 1876 it was six millions sterling, rising in 1890 to eight millions sterling. Consumption of salt barely averages 10 lbs. per inhabitant, which tends still further to debilitate the inhabitants.

## SANITATION

In 1880 the amount of outstanding loans in Great Britain for sanitary works, such as water-supply, drainage, &c., exceeded 56 millions sterling. In 1888 it was stated that the total outlay on these works in the last thirty years reached 100 millions sterling. The following table of sewage was published in 1882:—

|                  | Sewers, Cost per Mile | Tons of Sewage discharged Weekly |
|------------------|-----------------------|----------------------------------|
| Manchester . . . | £1,240                | 770,000                          |
| Preston . . . .  | 2,000                 | 140,000                          |
| London . . . . . | 5,550                 | 5,500,000                        |
| Blackburn . . .  | 4,700                 | 150,000                          |

The system of sewage-farms requires an acre for 500 inhabitants, say 1000 acres for a city like Manchester or Liverpool. Sewage is supposed to have a market value of 1d. per ton. In 1876 there were 65 towns in England with sewage-farms.

The length of drains or sewers in various cities in 1882 was as follows:—

|                  | Miles |                  | Miles |
|------------------|-------|------------------|-------|
| London . . . . . | 2300  | Bordeaux . . . . | 34    |
| Paris . . . . .  | 440   | Lille . . . . .  | 33    |
| New York . . . . | 200   | Rheims . . . . . | 14    |

The Romans understood the importance of sewers, and in the year 184 B.C. we find that the Senate spent 1000 talents, say £120,000 sterling, on enlarging the drains. Paris under Louis XIV. had nearly two miles of sewers, and under Bonaparte about sixteen miles. Dry refuse in English towns, which is thrown into dust-bins, is found to average 10 lbs. a week per inhabitant. The result of sanitation is shown in the reduced death-rate, by comparing the average for seven years before and seven years after the introduction of water-supply and drainage, viz.:—

|                   | Deaths per 10,000 Pop. |       | Deaths from Typhoid |       |
|-------------------|------------------------|-------|---------------------|-------|
|                   | Before                 | After | Before              | After |
| Cardiff . . . .   | 330                    | 230   | 17                  | 11    |
| Croydon . . . .   | 240                    | 190   | 15                  | 5     |
| Dover . . . . .   | 230                    | 210   | 14                  | 9     |
| Leicester . . . . | 260                    | 250   | 15                  | 8     |
| Merthyr . . . .   | 260                    | 180   | 21                  | 9     |
| Salisbury . . . . | 280                    | 220   | ..                  | ...   |
| Warwick . . . .   | 230                    | 210   | 19                  | 9     |

Deaths from typhoid in various towns showed a similar decline, both here and on the Continent, after the introduction of sanitary works:—

|                   | Per 100,000 Inhabitants |       |
|-------------------|-------------------------|-------|
|                   | Before                  | After |
| Brussels . . . .  | 22                      | 15    |
| Hamburg . . . .   | 48                      | 22    |
| Dantzic . . . . . | 99                      | 27    |
| Frankfort . . . . | 63                      | 24    |
| Bristol . . . . . | 100                     | 65    |
| Cheltenham . . .  | 80                      | 47    |

Buchanan shows that the annual death-rate for twenty-four towns in England fell from 24.7 per thousand inhabitants to 21.9 after the adoption of water-supply and sewers.

## SCIENCE

The learned societies of the United Kingdom in 1880 were 118 in number and counted 66,200 members; but as many of these were repetitions, it is not likely that the cultivators of science were more than 44,000. The aggregate of 15 principal societies at various dates was:—

| Year           | Members |
|----------------|---------|
| 1830 . . . . . | 2,201   |
| 1850 . . . . . | 15,769  |
| 1880 . . . . . | 29,061  |

In 1882 the principal societies showed as follows:—

|                         |       |                               |       |
|-------------------------|-------|-------------------------------|-------|
| Royal . . . . .         | 552   | Pharmaceutical . . . . .      | 3,250 |
| Statistical . . . . .   | 807   | Law . . . . .                 | 1,530 |
| Archæological . . . . . | 580   | Arts . . . . .                | 3,340 |
| Geological . . . . .    | 850   | Agricultural . . . . .        | 7,950 |
| Antiquaries . . . . .   | 640   | Zoological . . . . .          | 2,000 |
| Geographical . . . . .  | 3,430 | British Association . . . . . | 2,400 |
| Botanical . . . . .     | 1,660 | Social Science . . . . .      | 1,550 |

In 1881 the United Kingdom had 1355 schools of science, with 66,600 pupils; annual cost £295,000, or 89 shillings per pupil. In the same year the number of visitors to the different museums was as follows:—

|                            |           |                            |         |
|----------------------------|-----------|----------------------------|---------|
| British Museum . . . . .   | 790,000   | National Gallery . . . . . | 958,000 |
| South Kensington . . . . . | 1,017,000 | Kew Gardens . . . . .      | 612,000 |
| Bethnal Green . . . . .    | 451,000   | Edinburgh . . . . .        | 350,000 |
| Patent Office . . . . .    | 266,000   | Dublin . . . . .           | 192,000 |

## SEAMEN

The number of seafaring men in all countries was in 1882 as follows:—

|                               | Navy    | Merchant | Coast, Fishing | Total     | Ratio to Population, per Cent. |
|-------------------------------|---------|----------|----------------|-----------|--------------------------------|
| U. Kingdom . . . . .          | 45,000  | 193,000  | 167,000        | 405,000   | 1.11                           |
| France . . . . .              | 43,000  | 35,000   | 94,000         | 172,000   | 0.45                           |
| Germany . . . . .             | 8,000   | 40,000   | 27,000         | 75,000    | 0.16                           |
| Russia . . . . .              | 26,000  | 23,000   | 74,000         | 123,000   | 0.15                           |
| Austria . . . . .             | 10,000  | 7,000    | 9,000          | 26,000    | 0.07                           |
| Italy . . . . .               | 15,000  | 52,000   | 74,000         | 141,000   | 0.50                           |
| Spain . . . . .               | 7,000   | 23,000   | 44,000         | 74,000    | 0.45                           |
| Portugal . . . . .            | 4,000   | 5,000    | 4,000          | 13,000    | 0.30                           |
| Holland . . . . .             | 7,000   | 18,000   | 13,000         | 38,000    | 0.95                           |
| Denmark . . . . .             | 1,000   | 7,000    | 5,000          | 13,000    | 0.70                           |
| Sweden and Norway } . . . . . | 9,000   | 79,000   | 143,000        | 231,000   | 3.55                           |
| Greece . . . . .              | 1,000   | 11,000   | 15,000         | 27,000    | 1.52                           |
| Turkey . . . . .              | 4,000   | 10,000   | 3,000          | 17,000    | 0.22                           |
| Europe . . . . .              | 180,000 | 503,000  | 672,000        | 1,355,000 | 0.42                           |
| United States . . . . .       | 8,000   | 120,000  | 54,000         | 182,000   | 0.35                           |
| Canada . . . . .              | ...     | 50,000   | 65,000         | 115,000   | 2.54                           |
| Brazil . . . . .              | 2,000   | 6,000    | 8,000          | 16,000    | 0.18                           |
| Argentina } . . . . .         | 1,000   | 2,000    | 8,000          | 11,000    | 0.55                           |
| Republic                      |         |          |                |           |                                |
| Australia . . . . .           | ...     | 11,000   | 3,000          | 14,000    | 0.48                           |
| Total . . . . .               | 191,000 | 692,000  | 810,000        | 1,693,000 | 0.45                           |

The following is an approximate table of shipping at various dates, the British flag including colonial vessels:—

|                    | 1800      | 1820      | 1842      | 1860       | 1888       |
|--------------------|-----------|-----------|-----------|------------|------------|
| British . . . . .  | 1,856,000 | 2,654,000 | 3,311,000 | 5,713,000  | 9,050,000  |
| French . . . . .   | 250,000   | 350,000   | 634,000   | 930,000    | 960,000    |
| German . . . . .   | 150,000   | 250,000   | 550,000   | 700,000    | 1,230,000  |
| American . . . . . | 970,000   | 1,280,000 | 2,180,000 | 5,350,000  | 4,310,000  |
| Various . . . . .  | 800,000   | 1,300,000 | 2,705,000 | 3,777,000  | 6,100,000  |
| Total . . . . .    | 4,026,000 | 5,834,000 | 9,380,000 | 16,470,000 | 21,650,000 |

If marines and coastguards were added, the total would fall little short of two millions of men, or nearly 3 per cent. of the able-bodied men of the Christian world.

## SEASONS

For medical purposes the seasons are supposed to begin on the following dates:—

|                  | Northern Hemisphere | Southern Hemisphere |
|------------------|---------------------|---------------------|
| Spring . . . . . | March 1st           | September 1st       |
| Summer . . . . . | June 1st            | December 1st        |
| Autumn . . . . . | September 1st       | March 1st           |
| Winter . . . . . | December 1st        | June 1st            |

The mean temperature of the seasons in various countries is as follows, in degrees Fahrenheit:—

|                           | Spring | Summer | Autumn | Winter |
|---------------------------|--------|--------|--------|--------|
| England . . . . .         | 47     | 61     | 51     | 40     |
| France . . . . .          | 54     | 68     | 56     | 41     |
| Germany . . . . .         | 48     | 65     | 48     | 33     |
| Italy . . . . .           | 59     | 75     | 61     | 45     |
| Spain . . . . .           | 61     | 79     | 67     | 51     |
| Canada . . . . .          | 43     | 71     | 47     | 17     |
| Jamaica . . . . .         | 77     | 81     | 79     | 76     |
| New South Wales . . . . . | 63     | 70     | 64     | 54     |
| Cape Colony . . . . .     | 61     | 69     | 63     | 56     |
| Brazil . . . . .          | 73     | 79     | 75     | 69     |

## SERVANTS

Of 1000 families at Berlin there were 194 which kept servants in 1864, and only 173 in 1871. Professor Leone Levi in 1883 computed 1,951,000 domestic servants in the United Kingdom, earning £68,500,000 per annum, say £35 each.

## SHIPPING

The following is Mr. Kiaer's table of the shipping of the world, with a column added for carrying power, in which steamers are counted as four times the power of sailing-vessels:—

| Year           | Steam, Tons | Sail, Tons | Total, Tons | Carrying Power |
|----------------|-------------|------------|-------------|----------------|
| 1816 . . . . . | 1,500       | 3,420,000  | 3,421,500   | 3,426,000      |
| 1820 . . . . . | 6,200       | 3,160,000  | 3,166,200   | 3,185,000      |
| 1830 . . . . . | 30,200      | 3,020,000  | 3,050,200   | 3,140,000      |
| 1840 . . . . . | 97,000      | 4,560,000  | 4,657,000   | 4,950,000      |
| 1850 . . . . . | 217,000     | 6,380,000  | 6,597,000   | 7,850,000      |
| 1860 . . . . . | 764,000     | 10,710,000 | 11,474,000  | 13,770,000     |
| 1870 . . . . . | 1,710,000   | 12,350,000 | 14,060,000  | 19,190,000     |
| 1880 . . . . . | 4,650,000   | 13,270,000 | 17,920,000  | 31,870,000     |
| 1886 . . . . . | 7,400,000   | 12,000,000 | 19,400,000  | 41,600,000     |

Mr. Kiaer's figures doubtless apply only to vessels of "long cours," as they are less than the total shipping. For example, Lloyd's list in 1842 shows for Europe only, no fewer than 88,100 vessels of 6,547,000 tons.

The nominal tonnage of the various flags was approximately as follows (see *Lloyd's List for 1842*):—

|                          | 1842        | 1860        | 1888      |            |            |
|--------------------------|-------------|-------------|-----------|------------|------------|
|                          | All Vessels | All Vessels | Steam     | Sail       | Total      |

| China . . . . .      | 100,000              | 10,000     | 110,000    | 135               | 810                       |
| Various . . . . .    | 100,000              | 132,000    | 232,000    | 770               | 300                       |
| The World            | 36,160,000           | 12,642,000 | 48,802,000 | 107,137           | 453                       |

\* Exclusive of junks and canal-boats.

Mr. Kiaer's table of vessels over 100 tons, in 1881, was as follows:—

| Flag of                 | Number   |         |        | Total Tonnage |
|-------------------------|----------|---------|--------|---------------|
|                         | Steamers | Sailing | Total  |               |
| Great Britain . . . . . | 2,869    | 11,893  | 14,762 | 7,010,000     |
| France . . . . .        | 335      | 2,772   | 3,107  | 840,000       |
| Germany . . . . .       | 277      | 3,113   | 3,390  | 1,150,000     |
| United States . . . . . | 548      | 5,938   | 6,506  | 2,370,000     |
| Norway . . . . .        | 148      | 4,160   | 4,308  | 1,460,000     |
| Sweden . . . . .        | 258      | 1,979   | 2,237  | 470,000       |
| Denmark . . . . .       | 109      | 1,172   | 1,281  | 230,000       |
| Italy . . . . .         | 103      | 2,936   | 3,039  | 1,070,000     |
| Spain . . . . .         | 226      | 1,578   | 1,804  | 450,000       |
| Holland . . . . .       | 111      | 1,112   | 1,223  | 420,000       |
| Greece . . . . .        | 20       | 1,672   | 1,692  | 330,000       |
| Canada . . . . .        | 918      | 6,459   | 7,377  | 1,140,000     |
| Various . . . . .       | 470      | 3,780   | 4,250  | 1,385,000     |
| The World . . . . .     | 6,392    | 48,584  | 54,976 | 18,325,000    |

It would appear, therefore, that the whole shipping of the world may be summed up as follows, for 1888:—

|                           | Number  | Tons Register | Carrying Power | Carrying Power per Vessel |
|---------------------------|---------|---------------|----------------|---------------------------|
| Steamers . . . . .        | 19,740  | 9,040,000     | 36,160,000     | 1,820                     |
| Sailing-vessels . . . . . | 25,197  | 11,510,000    | 11,510,000     | 460                       |
| Small craft . . . . .     | 62,200  | 1,132,000     | 1,132,000      | 18                        |
| Total . . . . .           | 107,137 | 21,682,000    | 48,802,000     | 453                       |

Hence it may be said that, excluding 62,200 small craft, the commerce of the world is carried on by 45,000 vessels, of 20,500,000 tons register, with a carrying power of 48 million tons.

The relative amounts of carrying power that corresponded to steam and sail at various dates were as follows:—

| Year           | Nominal Tonnage |            |            | Carrying Power |            |            | Percentage |      |
|----------------|-----------------|------------|------------|----------------|------------|------------|------------|------|
|                | Steam           | Sail       | Total      | Steam          | Sail       | Total      | Steam      | Sail |
| 1820 . . . . . | 20,000          | 5,814,000  | 5,834,000  | 80,000         | 5,814,000  | 5,894,000  | 1.4        | 98.6 |
| 1840 . . . . . | 368,000         | 9,012,000  | 9,380,000  | 1,470,000      | 9,012,000  | 10,482,000 | 14.0       | 86.0 |
| 1860 . . . . . | 1,710,000       | 14,890,000 | 16,600,000 | 6,840,000      | 14,890,000 | 21,730,000 | 31.5       | 68.5 |
| 1870 . . . . . | 3,040,000       | 12,900,000 | 15,940,000 | 12,200,000     | 12,900,000 | 25,100,000 | 48.8       | 51.2 |
| 1880 . . . . . | 5,880,000       | 14,400,000 | 20,280,000 | 23,500,000     | 14,400,000 | 37,900,000 | 61.5       | 38.5 |
| 1888 . . . . . | 9,040,000       | 12,640,000 | 21,680,000 | 36,160,000     | 12,640,000 | 48,800,000 | 74.0       | 26.0 |

The following table shows approximately the merchant steam-navies of the world at various dates :—

|                        | Nominal Tonnage of Steamers |         |           |           |           |           |
|------------------------|-----------------------------|---------|-----------|-----------|-----------|-----------|
|                        | 1840                        | 1850    | 1860      | 1870      | 1880      | 1888      |
| British . . . . .      | 95,000                      | 188,000 | 502,000   | 1,203,000 | 3,105,000 | 4,355,000 |
| American . . . . .     | 198,000                     | 481,000 | 870,000   | 1,075,000 | 1,211,000 | 1,765,000 |
| French . . . . .       | 10,000                      | 27,000  | 84,000    | 170,000   | 278,000   | 510,000   |
| German . . . . .       | 10,000                      | 20,000  | 50,000    | 82,000    | 216,000   | 593,000   |
| Russian . . . . .      | 10,000                      | 20,000  | 40,000    | 70,000    | 100,000   | 142,000   |
| Austrian . . . . .     | 10,000                      | 20,000  | 30,000    | 50,000    | 60,000    | 90,000    |
| Italian . . . . .      | 10,000                      | 15,000  | 20,000    | 35,000    | 77,000    | 175,000   |
| Spanish . . . . .      | 5,000                       | 10,000  | 13,000    | 45,000    | 230,000   | 395,000   |
| Scandinavian . . . . . | 5,000                       | 10,000  | 25,000    | 88,000    | 190,000   | 355,000   |
| Dutch . . . . .        | 5,000                       | 10,000  | 20,000    | 30,000    | 65,000    | 105,000   |
| Various . . . . .      | 10,000                      | 20,000  | 60,000    | 190,000   | 350,000   | 645,000   |
| Total . . . . .        | 368,000                     | 821,000 | 1,714,000 | 3,038,000 | 5,882,000 | 9,040,000 |

The carrying power of the principal flags at various dates was approximately as follows :—

| Flag                     | Tons      |            |            |            |            |
|--------------------------|-----------|------------|------------|------------|------------|
|                          | 1820      | 1840       | 1860       | 1880       | 1888       |

| Dutch . . . . .     | 1,500                      | ...     | 6,000               | 5,600   |
| Various . . . . .   | 1,000                      | ...     | 14,500              | 94,400  |
| Total . . . . .     | 360,000                    | 179,000 | 562,000             | 968,000 |

The net increase of nominal tonnage from 1861 to 1888 was 179,000 per annum; but this is not the sum of the above column, as several countries showed a decline.

Great as has been the growth of carrying power in the last 30 years it is much less than the increase in the tonnage of port entries, which has been 3½-fold, while the carrying power has little more than doubled, viz. :—

| Year           | Nom. Tonnage | Carrying Power | Port Entries |
|----------------|--------------|----------------|--------------|
| 1860 . . . . . | 16,600,000   | 21,730,000     | 64,100,000   |
| 1870 . . . . . | 15,940,000   | 25,100,000     | 95,400,000   |
| 1880 . . . . . | 20,280,000   | 37,900,000     | 166,300,000  |
| 1888 . . . . . | 21,680,000   | 48,800,000     | 225,200,000  |

The tonnage of port entries of sea-going vessels at various dates was approximately as follows (the item marked "various" not being accurately known) :—

|                               | 1860       | 1870       | 1880        | 1888        |
|-------------------------------|------------|------------|-------------|-------------|
| U. Kingdom . . . . .          | 12,350,000 | 18,120,000 | 29,360,000  | 33,950,000  |
| France . . . . .              | 4,230,000  | 6,800,000  | 12,370,000  | 14,030,000  |
| Germany . . . . .             | 3,730,000  | 6,200,000  | 6,530,000   | 9,440,000   |
| Russia . . . . .              | 2,110,000  | 3,520,000  | 5,020,000   | 7,410,000   |
| Austria . . . . .             | 2,600,000  | 3,430,000  | 4,820,000   | 7,540,000   |
| Italy . . . . .               | 2,400,000  | 3,790,000  | 4,690,000   | 6,670,000   |
| Spain . . . . .               | 1,350,000  | 2,500,000  | 5,700,000   | 11,440,000  |
| Sweden and Norway } . . . . . | 2,100,000  | 3,790,000  | 5,400,000   | 7,320,000   |
| Denmark . . . . .             | 600,000    | 710,000    | 2,230,000   | 3,380,000   |
| Holland . . . . .             | 1,660,000  | 2,310,000  | 3,450,000   | 5,110,000   |
| Belgium . . . . .             | 670,000    | 1,580,000  | 3,570,000   | 4,910,000   |
| Greece . . . . .              | 930,000    | 1,270,000  | 1,790,000   | 2,370,000   |
| United States . . . . .       | 5,005,000  | 6,270,000  | 15,250,000  | 15,390,000  |
| British Colonies } . . . . .  | 10,880,000 | 15,200,000 | 28,260,000  | 41,300,000  |
| Suez Canal . . . . .          | ...        | 440,000    | 4,350,000   | 9,440,000   |
| Various . . . . .             | 13,500,000 | 19,500,000 | 33,500,000  | 45,500,000  |
| Total . . . . .               | 64,115,000 | 95,430,000 | 166,290,000 | 225,200,000 |

Entries in ballast, which are included in the above table, showed tonnage and ratio to total entries thus :—

|            | 1870      | 1880      | 1888      | 1870 | 1880 | 1888 |
|------------|-----------|-----------|-----------|------|------|------|
|            | Tons      | Tons      | Tons      | %    | %    | %    |
| U. Kingdom | 3,200,000 | 5,100,000 | 6,900,000 | 17   | 17   | 21   |
| France     | 200,000   | 400,000   | 460,000   | 3    | 3    | 3    |
| Germany    | 810,000   | 370,000   | 700,000   | 13   | 6    | 8    |
| Russia     | 1,820,000 | 1,860,000 | 4,800,000 | 52   | 36   | 64   |
| Austria    | 840,000   | 820,000   | 700,000   | 25   | 17   | 9    |
| Italy      | 380,000   | 450,000   | 570,000   | 10   | 10   | 8    |
| Spain      | 600,000   | 1,900,000 | 3,800,000 | 24   | 33   | 33   |
| Sweden     | 1,400,000 | 1,900,000 | 2,900,000 | 65   | 55   | 58   |
| Norway     | 1,040,000 | 980,000   | 850,000   | 66   | 50   | 35   |
| Denmark    | ...       | 920,000   | 1,480,000 | ...  | 45   | 44   |

| Belgium    | 40,000    | 110,000   | 700,000   | 2    | 3    | 14   |
| U. States  | ...       | 3,140,000 | ...       | ...  | 21   | ...  |

It would seem from the above that as regards European ports the aggregate of entries in ballast has not materially varied, in proportion, since 1870, the ratio being as 21 per cent. of all entries. The following table shows the ratio of entries in each country belonging to the flag of that country, and the ratio corresponding to other or foreign flags :—

|                | National |      |      | Foreign Flags |      |      |
|----------------|----------|------|------|---------------|------|------|
|                | 1870     | 1880 | 1887 | 1870          | 1880 | 1887 |
| United Kingdom | 68.4     | 70.4 | 73.6 | 31.6          | 29.6 | 26.4 |
| Russia         | 11.2     | 11.4 | 7.9  | 88.8          | 88.6 | 92.1 |
| Norway         | 70.0     | 68.2 | 65.5 | 30.0          | 31.8 | 34.5 |
| Sweden         | 31.8     | 37.2 | 35.8 | 68.2          | 62.8 | 64.2 |
| Germany        | 35.9     | 39.1 | 43.3 | 64.1          | 60.9 | 56.7 |
| Holland        | 28.3     | 30.9 | 30.9 | 71.7          | 69.1 | 69.1 |
| France         | 31.5     | 30.0 | 36.2 | 68.5          | 70.0 | 63.8 |
| Spain          | 36.9     | 26.6 | 39.0 | 63.1          | 73.4 | 61.0 |
| Italy          | 36.5     | 34.8 | 23.6 | 63.5          | 65.2 | 76.4 |
| United States  | 38.2     | 18.9 | 21.0 | 61.8          | 81.1 | 79.0 |

The principal commercial ports of the world showed the tonnage of sea-going entries in 1888 as follows :—

|            | Tons      |               | Tons      |
|------------|-----------|---------------|-----------|
| London     | 7,470,000 | Havre         | 1,810,000 |
| New York   | 5,470,000 | Buenos Ayres  | 1,590,000 |
| Liverpool  | 5,370,000 | Alexandria    | 1,590,000 |
| Hamburg    | 4,410,000 | Montevideo    | 1,620,000 |
| Antwerp    | 3,660,000 | Athens        | 1,550,000 |
| Marseilles | 3,360,000 | Genoa         | 1,480,000 |
| Hong-Kong  | 3,330,000 | Bremen        | 1,180,000 |
| Cardiff    | 2,930,000 | Boston        | 1,100,000 |
| Rotterdam  | 2,530,000 | San Francisco | 1,050,000 |
| Sydney     | 2,380,000 | Bordeaux      | 1,050,000 |
| Melbourne  | 2,150,000 | Stettin       | 1,040,000 |
| Newcastle  | 1,900,000 | Philadelphia  | 1,030,000 |
| Hull       | 1,900,000 | Glasgow       | 990,000   |

The above sums up a total of 64 million tons, which is nearly one-third of the commerce of the world, minor ports making up more than two-thirds.

If we compare the value of the imports of all nations with the tonnage of port entries (excluding ballast entries) at various dates, we find :—

| Year | Imports, Millions £ | Port Entries, Tons | Value, £ per Ton |
|------|---------------------|--------------------|------------------|
| 1860 | 707                 | 51,000,000         | 13.9             |
| 1870 | 1,040               | 76,000,000         | 13.8             |
| 1880 | 1,440               | 133,000,000        | 10.8             |
| 1888 | 1,502               | 180,000,000        | 8.3              |

This appears to show that coal, iron, and articles of less value, form every succeeding year a larger ratio of sea-borne merchandise.

The registered shipping belonging to the various ports in 1882 was as follows :—

|               | Sail       | Steam     | Total      | Carrying Power |
|---------------|------------|-----------|------------|----------------|
| Liverpool     | 1,080,000  | 520,000   | 1,600,000  | 3,160,000      |
| London        | 620,000    | 570,000   | 1,190,000  | 2,900,000      |
| Glasgow       | 350,000    | 380,000   | 730,000    | 1,870,000      |
| New York      | 530,000    | 210,000   | 740,000    | 1,370,000      |
| Marseilles    | 60,000     | 160,000   | 220,000    | 700,000        |
| Hull          | 40,000     | 150,000   | 190,000    | 640,000        |
| Newcastle     | 60,000     | 140,000   | 200,000    | 620,000        |
| Sunderland    | 110,000    | 110,000   | 220,000    | 550,000        |
| Hamburg       | 140,000    | 70,000    | 210,000    | 420,000        |
| Bremen        | 160,000    | 60,000    | 220,000    | 400,000        |
| Greenock      | 170,000    | 40,000    | 210,000    | 330,000        |
| San Francisco | 110,000    | 50,000    | 160,000    | 310,000        |
| Philadelphia  | 110,000    | 50,000    | 160,000    | 310,000        |
| Trieste       | 30,000     | 60,000    | 90,000     | 270,000        |
| Leith         | 20,000     | 60,000    | 80,000     | 260,000        |
| Havre         | 70,000     | 50,000    | 120,000    | 270,000        |
| New Brunswick | 270,000    | 10,000    | 280,000    | 310,000        |
| Barcelona     | 100,000    | 40,000    | 140,000    | 260,000        |
| Genoa         | 120,000    | 30,000    | 150,000    | 240,000        |
| Odessa        | 20,000     | 50,000    | 70,000     | 220,000        |
| Amsterdam     | 60,000     | 40,000    | 100,000    | 220,000        |
| Copenhagen    | 40,000     | 40,000    | 80,000     | 200,000        |
| Southampton   | 30,000     | 40,000    | 70,000     | 190,000        |
| Antwerp       | 10,000     | 40,000    | 50,000     | 170,000        |
| Aberdeen      | 100,000    | 20,000    | 120,000    | 180,000        |
| Bergen        | 60,000     | 20,000    | 80,000     | 140,000        |
| Yarmouth      | 160,000    | ...       | 160,000    | 160,000        |
| Other ports   | 10,372,000 | 2,634,000 | 13,006,000 | 20,910,000     |
| The world     | 15,002,000 | 5,644,000 | 20,646,000 | 37,580,000     |

Italian vessels seem to be worked cheaper than others. The following statement was published in 1881 as the monthly average expense of a vessel of 1000 tons with a crew of twenty men :—

|          |      |          |       |
|----------|------|----------|-------|
| Italian  | £ 95 | German   | £ 135 |
| Austrian | 125  | British  | 145   |
| French   | 135  | American | 200   |

The percentage of vessels lost yearly, and the average life of shipping of various flags, as shown by Mr. Kiaer, are :—

|              | Annual Loss |         | Years of a Ship's Life |
|--------------|-------------|---------|------------------------|
|              | Steamer     | Sailing |                        |
| American     | 4.06        | 5.45    | 18                     |
| French       | 2.47        | 4.04    | 20                     |
| Dutch        | 3.84        | 4.49    | 22                     |
| German       | 2.77        | 4.04    | 23                     |
| British      | 2.94        | 3.93    | 26                     |
| Italian      | 1.74        | 2.94    | 28                     |
| Scandinavian | 1.96        | 3.20    | 30                     |

The weight of anchors and chain-cables for vessels is as follows :—

| Vessel, Tons | Anchors, Tons | Heaviest in Cwts. | Cable, Inches | Cable, Length in Fathoms |
|--------------|---------------|-------------------|---------------|--------------------------|
| 200          | 3             | 13                | 1.0           | 180                      |
| 500          | 6             | 25                | 1.5           | 270                      |
| 1,000        | 9½            | 42                | 1.9           | 300                      |
| 2,000        | 18            | 77                | 2.1           | 300                      |

It is usual for vessels to carry seven anchors, four of the maximum weight prescribed above.

The value of shipping and cargoes lost yearly at sea cannot be ascertained precisely. The *Annual Register*

for 1881 published the following statement, but it seems very much exaggerated:—

|               | Vessels Lost |       | Value of Ships and Cargo, £ |            |
|---------------|--------------|-------|-----------------------------|------------|
|               | 1879         | 1880  | 1879                        | 1880       |
| British . . . | ...          | 913   | 19,230,000                  | 47,495,000 |
| Foreign . . . | ...          | 767   | 6,270,000                   | 20,832,000 |
| Total . . .   | 1,688        | 1,680 | 25,500,000                  | 68,327,000 |

*Lloyd's Register* gave the following summary of vessels lost in fifteen years, ending 1880:—

|                         | Number | Annual Average |
|-------------------------|--------|----------------|
| Missing . . .           | 1,403  | 94             |
| Sunk by collision . . . | 2,753  | 183            |
| Burnt . . .             | 2,903  | 194            |
| Stranded . . .          | 17,502 | 1,166          |
| Waterlogged, &c. . .    | 8,026  | 535            |
| Total . . .             | 32,587 | 2,172          |

At Mr. Kiaer's rate of loss of shipping, the total annual loss by shipwreck would be as follows:—

|                    | Shipping, Tons |         |         | Value of   |           |            |
|--------------------|----------------|---------|---------|------------|-----------|------------|
|                    | Steam          | Sail    | Total   | Vessels, £ | Cargo, £  | Total, £   |
| British . . .      | 135,000        | 175,000 | 310,000 | 5,600,000  | 3,000,000 | 8,600,000  |
| French . . .       | 12,000         | 18,000  | 30,000  | 500,000    | 300,000   | 800,000    |
| German . . .       | 14,000         | 29,000  | 43,000  | 650,000    | 400,000   | 1,050,000  |
| Italian . . .      | 3,000          | 20,000  | 23,000  | 300,000    | 200,000   | 500,000    |
| Dutch . . .        | 4,000          | 6,000   | 10,000  | 170,000    | 100,000   | 270,000    |
| American . . .     | 70,000         | 140,000 | 210,000 | 3,400,000  | 2,000,000 | 5,400,000  |
| Scandinavian . . . | 7,000          | 60,000  | 67,000  | 700,000    | 400,000   | 1,100,000  |
| Various . . .      | 25,000         | 62,000  | 87,000  | 1,300,000  | 800,000   | 2,100,000  |
| Total . . .        | 270,000        | 510,000 | 780,000 | 12,620,000 | 7,200,000 | 19,820,000 |

The loss of life among seamen is stated by Mr. Plim-soll, on various official returns, to average thus yearly:—

|               | Per 10,000 |               | Per 10,000 |
|---------------|------------|---------------|------------|
| Britain . . . | 152        | Norway . . .  | 36         |
| Germany . . . | 81         | Italy . . .   | 22         |
| Holland . . . | 43         | Average . . . | 66         |

The shipping of the United Kingdom, excluding colonial, has been as follows:—

| Year | Vessels | Tons      | Seamen  | Tons per |        |
|------|---------|-----------|---------|----------|--------|
|      |         |           |         | Vessel   | Seaman |
| 1810 | 20,253  | 2,211,000 | 145,000 | 105      | 15     |
| 1830 | 19,174  | 2,202,000 | 131,000 | 114      | 17     |
| 1850 | 25,984  | 3,565,000 | 148,000 | 138      | 24     |
| 1870 | 26,367  | 5,691,000 | 196,000 | 215      | 29     |
| 1881 | 24,830  | 6,490,000 | 193,000 | 260      | 33     |
| 1888 | 21,896  | 7,465,000 | 224,000 | 341      | 33     |

#### UNITED KINGDOM

British and Colonial shipping showed as follows:—

| Year | Vessels | Tons      | Sailors | Tons per |        | Reign       |
|------|---------|-----------|---------|----------|--------|-------------|
|      |         |           |         | Ship     | Sailor |             |
| 1588 | 470     | 37,400    | ...     | 80       | ...    | Elizabeth   |
| 1610 | 910     | 83,000    | ...     | 90       | ...    | James I.    |
| 1666 | 1,320   | 120,000   | ...     | 90       | ...    | Charles II. |
| 1688 | 2,620   | 210,000   | ...     | 80       | ...    | James II.   |
| 1702 | 3,260   | 261,000   | ...     | 80       | ...    | Anne        |
| 1760 | 5,730   | 487,000   | ...     | 85       | ...    | George III. |
| 1800 | 17,410  | 1,856,000 | 140,000 | 106      | 14     | George III. |
| 1810 | 23,703  | 2,426,000 | 162,000 | 102      | 15     | George III. |
| 1820 | 25,374  | 2,654,000 | 175,000 | 105      | 15     | George IV.  |
| 1830 | 23,721  | 2,533,000 | 155,000 | 107      | 16     | William IV. |
| 1840 | 28,962  | 3,311,000 | 201,000 | 114      | 17     | Victoria    |
| 1850 | 34,288  | 4,233,000 | 239,000 | 124      | 18     | Victoria    |
| 1860 | 29,469  | 5,713,000 | 230,000 | 193      | 25     | Victoria    |
| 1870 | 32,920  | 7,150,000 | 261,000 | 216      | 27     | Victoria    |
| 1881 | 30,531  | 8,535,000 | 270,000 | 280      | 31     | Victoria    |
| 1887 | 28,212  | 8,936,000 | 280,000 | 320      | 32     | Victoria    |

In 20 years succeeding the war with France our shipping declined in number and tonnage, and in number of men.

In 1808, at the outbreak of the Peninsular War, the merchant navy of the British Empire was composed thus:—

|                | Vessels | Tons      | Sailors |
|----------------|---------|-----------|---------|
| England . . .  | 15,705  | 1,822,000 | 123,400 |
| Scotland . . . | 2,615   | 217,000   | 15,700  |
| Ireland . . .  | 1,098   | 57,000    | 5,200   |
| Colonies . . . | 2,917   | 185,000   | 13,600  |
| Total . . .    | 22,335  | 2,281,000 | 157,900 |

If we discriminate steamers from sailing-vessels, allowing the former a carrying power of four to one, we find as follows:—

| Year       | United Kingdom  |           |                      | British Empire  |           |                      |
|------------|-----------------|-----------|----------------------|-----------------|-----------|----------------------|
|            | Nominal Tonnage |           | Total Carrying Power | Nominal Tonnage |           | Total Carrying Power |
|            | Sail            | Steam     |                      | Sail            | Steam     |                      |
| 1840 . . . | 2,480,000       | 90,000    | 2,840,000            | 3,216,000       | 95,000    | 3,596,000            |
| 1850 . . . | 2,990,000       | 110,000   | 3,430,000            | 4,045,000       | 188,000   | 4,797,000            |
| 1860 . . . | 4,205,000       | 455,000   | 6,025,000            | 5,211,000       | 502,000   | 7,219,000            |
| 1870 . . . | 4,580,000       | 1,110,000 | 9,020,000            | 5,947,000       | 1,203,000 | 10,759,000           |
| 1881 . . . | 3,690,000       | 3,005,000 | 15,710,000           | 5,430,000       | 3,105,000 | 17,890,000           |
| 1887 . . . | 3,250,000       | 4,090,000 | 19,610,000           | 4,581,000       | 4,355,000 | 22,005,000           |
| 1888 . . . | 3,115,000       | 4,350,000 | 20,515,000           | ...             | ...       | ...                  |

The Navigation Laws were repealed in 1849, and since that date our shipping traffic has increased seven times faster than population. The sea-going entries into ports of the United Kingdom were as follows :—

| Year | Tons       |           |            | British Percentage |
|------|------------|-----------|------------|--------------------|
|      | British    | Foreign   | Total      |                    |
| 1840 | 3,245,000  | 1,475,000 | 4,720,000  | 69                 |
| 1850 | 4,720,000  | 2,530,000 | 7,250,000  | 65                 |
| 1860 | 6,960,000  | 5,390,000 | 12,350,000 | 56                 |
| 1870 | 12,540,000 | 5,780,000 | 18,320,000 | 69                 |
| 1880 | 20,670,000 | 8,690,000 | 29,360,000 | 70                 |
| 1888 | 24,945,000 | 9,005,000 | 33,950,000 | 73                 |

Coasting entries with cargoes only were as follows :—

| Year | Tons       |         |            |
|------|------------|---------|------------|
|      | British    | Foreign | Total      |
| 1854 | 15,320,000 | 50,000  | 15,370,000 |
| 1860 | 16,900,000 | 100,000 | 17,000,000 |
| 1870 | 18,210,000 | 90,000  | 18,300,000 |
| 1880 | 25,920,000 | 100,000 | 26,020,000 |
| 1888 | 29,000,000 | 80,000  | 29,080,000 |

The flags of foreign vessels entering British ports in 1878 and 1888 showed as follows :—

| Flag      | Tons      |           |
|-----------|-----------|-----------|
|           | 1878      | 1888      |
| Norwegian | 1,830,000 | 2,050,000 |
| German    | 1,370,000 | 1,790,000 |
| Dutch     | 530,000   | 1,040,000 |
| French    | 740,000   | 990,000   |
| Danish    | 620,000   | 770,000   |
| Swedish   | 670,000   | 710,000   |
| Spanish   | 230,000   | 505,000   |
| Italian   | 630,000   | 280,000   |
| Various   | 1,350,000 | 870,000   |
| Total     | 7,970,000 | 9,005,000 |

The sea-going tonnage entered and cleared at the principal ports in the United Kingdom was as follows :—

|               | Entered    |            | Cleared    |            |
|---------------|------------|------------|------------|------------|
|               | 1878       | 1888       | 1878       | 1888       |
| London        | 5,340,000  | 7,470,000  | 4,390,000  | 5,470,000  |
| Liverpool     | 4,400,000  | 5,370,000  | 4,390,000  | 4,940,000  |
| Cardiff       | 1,480,000  | 2,930,000  | 2,800,000  | 5,150,000  |
| Newcastle     | 1,500,000  | 1,900,000  | 2,570,000  | 3,320,000  |
| Hull          | 1,470,000  | 1,900,000  | 1,310,000  | 1,500,000  |
| Newport       | 420,000    | 960,000    | 640,000    | 1,470,000  |
| Shields       | 480,000    | 920,000    | 450,000    | 1,070,000  |
| Southampton   | 905,000    | 870,000    | 750,000    | 790,000    |
| Sunderland    | 590,000    | 740,000    | 780,000    | 930,000    |
| Middlesbrough | 310,000    | 680,000    | 290,000    | 560,000    |
| Grimsby       | 400,000    | 590,000    | 410,000    | 590,000    |
| Bristol       | 440,000    | 580,000    | 230,000    | 180,000    |
| Glasgow       | 550,000    | 990,000    | 910,000    | 1,550,000  |
| Greenock      | 290,000    | 280,000    | 200,000    | 180,000    |
| Dublin        | 330,000    | 210,000    | 190,000    | 80,000     |
| Belfast       | 210,000    | 190,000    | 140,000    | 70,000     |
| Various       | 6,175,000  | 7,370,000  | 5,850,000  | 6,720,000  |
| Total         | 25,290,000 | 33,950,000 | 26,300,000 | 34,570,000 |

The tonnage of vessels entered at various dates was :—

| Year | Sea-going  | Coasting   | Total      |
|------|------------|------------|------------|
| 1801 | 1,720,000  | 6,000,000  | 7,720,000  |
| 1810 | 2,070,000  | 7,000,000  | 9,070,000  |
| 1820 | 2,110,000  | 8,000,000  | 10,110,000 |
| 1830 | 2,940,000  | 8,240,000  | 11,180,000 |
| 1840 | 4,720,000  | 12,600,000 | 17,320,000 |
| 1850 | 7,250,000  | 21,510,000 | 28,760,000 |
| 1860 | 12,340,000 | 24,400,000 | 36,740,000 |
| 1870 | 18,320,000 | 28,850,000 | 47,170,000 |
| 1880 | 29,070,000 | 36,140,000 | 65,210,000 |
| 1888 | 33,950,000 | 47,570,000 | 81,520,000 |

The service of pilot-boats in 1882 stood thus :—

|                | Boats | Pilots |
|----------------|-------|--------|
| England        | 692   | 2,066  |
| Scotland       | 226   | 432    |
| Ireland        | 132   | 395    |
| United Kingdom | 1,050 | 2,893  |

Some of the merchant steamboat companies are equal in importance to the navies of some European Powers. The Cunard Co., for example, employs 10,000 men. The vessels, moreover, of the first-class companies are unsurpassed. At a recent meeting of the Society of Engineers the chairman said, "The *Teutonic*, 582 feet long, with a gross tonnage of 9680, can carry 1200 passengers, and in time of war twelve five-inch guns, with a range of five miles. The *City of Paris* runs twenty-four miles an hour, is 10,500 tons burthen, and has 18,000 horse-power. The Pacific and Oriental Steamers now use pressure at 160 lbs. with greater safety than they did fifty lbs. thirty years ago." As regards speed, British vessels beat all others. The *City of Paris* has run from Queenstown to New York in 5 days 20 hours, and from New York to Queenstown in 5 days 23 hours: on one day her run of 24 hours reached 511 miles, the highest on record. The *Roslyn Castle* has run from Cape Town to London in 17 days 13 hours. The *Stirling Castle* from Hankow (China) to London in 29 days 22 hours. The fastest steamer in the world appears to be the *Prince of Wales*, which averages twenty-four knots, or twenty-seven statute miles per hour (being three miles faster than the *City of Paris*), plying between Liverpool and Isle of Man. The greatest speed of sailing ships was as follows :—*James Baines*, 420 miles, *Flying Cloud*, 412 miles in 24 hours, being over seventeen miles an hour. The *Red Jacket* ran 2280 miles in seven days, averaging 325 miles a day.

Shipbuilding is carried on more extensively in the United Kingdom than elsewhere; in fact, more than 80 per cent. of the world's shipping is built here. At a meeting in 1890 Mr. Palmer stated that "we were building in this country at the present time about a million tons of shipping, and the normal waste or loss was about 400,000 tons, leaving a surplus of 600,000 tons as an addition to mercantile marine."

The tonnage built in the United Kingdom was :—

| Period   | Sail       | Steam      | Total      | Carrying Power |
|----------|------------|------------|------------|----------------|
| 1801-10  | 520,000    | ...        | 520,000    | 520,000        |
| 1811-20  | 840,000    | 10,000     | 850,000    | 880,000        |
| 1821-30  | 800,000    | 40,000     | 840,000    | 960,000        |
| 1831-40  | 885,000    | 75,000     | 960,000    | 1,185,000      |
| 1841-50  | 990,000    | 160,000    | 1,150,000  | 1,630,000      |
| 1851-60  | 1,530,000  | 810,000    | 2,340,000  | 4,770,000      |
| 1861-70  | 2,100,000  | 1,490,000  | 3,590,000  | 8,100,000      |
| 1871-80  | 1,390,000  | 3,190,000  | 4,580,000  | 14,200,000     |
| 1881-89  | 1,265,000  | 4,555,000  | 5,820,000  | 19,500,000     |
| 89 years | 10,320,000 | 10,330,000 | 20,650,000 | 51,745,000     |

From 1855 the distinction of vessels built for British from those for foreign flags was as follows :—

|                    | Nominal Tonnage British |           |            | Nominal Tonnage Foreign |         |           |
|--------------------|-------------------------|-----------|------------|-------------------------|---------|-----------|
|                    | Steam                   | Sail      | Total      | Steam                   | Sail    | Total     |
| 1855-59 . . . . .  | 283,000                 | 930,000   | 1,213,000  | 144,000                 | 8,000   | 152,000   |
| 1860-69 . . . . .  | 1,080,000               | 2,060,000 | 3,140,000  | 243,000                 | 34,000  | 277,000   |
| 1870-79 . . . . .  | 2,590,000               | 1,390,000 | 3,980,000  | 474,000                 | 40,000  | 514,000   |
| 1880-88 . . . . .  | 3,210,000               | 1,130,000 | 4,340,000  | 670,000                 | 40,000  | 710,000   |
| 34 years . . . . . | 7,163,000               | 5,510,000 | 12,673,000 | 1,531,000               | 122,000 | 1,653,000 |

In ten years ending December 1889 there were built 5,932,000 tons of merchant shipping, of which 930,000 tons were for foreign flags, the rest for the British.

The Clyde is one of the principal seats of this industry :—

| Year           | Vessels Built, Tons |              |           |
|----------------|---------------------|--------------|-----------|
|                | Clyde               | Other Places | Total     |
| 1880 . . . . . | 237,000             | 469,000      | 706,000   |
| 1882 . . . . . | 389,000             | 391,000      | 780,000   |
| 1889 . . . . . | 335,000             | 875,000      | 1,210,000 |

Vessels on the stocks on December 31, 1889, were :—

|                 | Steam |         | Sail |        | Total |         |
|-----------------|-------|---------|------|--------|-------|---------|
|                 | No.   | Tons    | No.  | Tons   | No.   | Tons    |
| Steel . . . . . | 382   | 745,000 | 54   | 87,000 | 436   | 832,000 |
| Iron . . . . .  | 57    | 21,000  | 8    | 6,000  | 65    | 27,000  |
| Wood . . . . .  | 7     | 1,000   | 35   | 3,000  | 42    | 4,000   |
| Total . . . . . | 446   | 767,000 | 97   | 96,000 | 543   | 863,000 |

| Built for          |     |         |     |        |     |         |  |
|--------------------|-----|---------|-----|--------|-----|---------|--|

| U. Kingdom         | 309 | 560,000 | 53  | 58,000 | 362 | 618,000 |  |
| Colonies . . . . . | 16  | 32,000  | ... | ...    | 16  | 32,000  |  |
| Germany . . . . .  | 16  | 46,000  | 4   | 7,000  | 20  | 53,000  |  |
| Norway . . . . .   | 12  | 12,000  | ... | ...    | 12  | 12,000  |  |
| France . . . . .   | 8   | 13,000  | 2   | 7,000  | 10  | 20,000  |  |
| Various . . . . .  | 85  | 104,000 | 38  | 24,000 | 123 | 128,000 |  |
| Total . . . . .    | 446 | 767,000 | 97  | 96,000 | 543 | 863,000 |  |

The use of steel in shipbuilding was begun in 1879, when the tonnage of steamers built of it was 18,000: at present, as shown above, 95 per cent. of all vessels built are of steel. It is found that a steel vessel can carry 20 per cent. more than an iron one. Improvements in machinery cause a great saving in coal, the average consumption now being 1½ lbs. per indicated horse-power hourly, as compared with 6 lbs. in the year 1837.

Lloyd's estimate of shipping value in 1882 was £30 a ton for steamers, including fittings and furniture, and £10 a ton for sailing vessels. The cost of building has, however, since fallen, and at present a fair valuation of our merchant navy would be as follows :—

|                   | Tons      | Value, £    | £ per Ton |
|-------------------|-----------|-------------|-----------|
| Sailing . . . . . | 3,115,000 | 24,920,000  | 8         |
| Steam . . . . .   | 4,350,000 | 108,750,000 | 25        |
| Total . . . . .   | 7,465,000 | 133,670,000 | 18        |

The tonnage of British vessels lost or broken up in nine years (1880-88) was as follows :—

| Period            | Steam     | Sail      | Total     | Carrying Power |
|-------------------|-----------|-----------|-----------|----------------|
| 1880-84 . . . . . | 810,000   | 1,338,000 | 2,148,000 | 4,578,000      |
| 1885-88 . . . . . | 580,000   | 854,000   | 1,434,000 | 3,174,000      |
| 9 years . . . . . | 1,390,000 | 2,192,000 | 3,582,000 | 7,752,000      |

The death-rate of vessels (that is, the percentage lost or broken up in the same nine years) was :—

|                 |               |
|-----------------|---------------|
| Steam . . . . . | 4.2 per annum |
| Sail . . . . .  | 7.0 per annum |

According to Mr. Kiaer, the losses of British vessels on sea average 3 per cent. of steamers and 4 per cent. of sailing vessels: on this basis the decrease of shipping in 1880-89 would be made up thus :—

|                          | Steam     | Sail      | Total, Tons |
|--------------------------|-----------|-----------|-------------|
| Lost at sea . . . . .    | 990,000   | 1,224,000 | 2,214,000   |
| Broken up . . . . .      | 400,000   | 968,000   | 1,368,000   |
| Total decrease . . . . . | 1,390,000 | 2,192,000 | 3,582,000   |

The loss of life in British vessels was as follows :—

| Year              | Crews  | Passengers | Total  | Yearly Average |
|-------------------|--------|------------|--------|----------------|
| 1871-75 . . . . . | 9,715  | 2,037      | 11,752 | 2,350          |
| 1876-80 . . . . . | 7,965  | 772        | 8,737  | 1,747          |
| 1881-83 . . . . . | 7,376  | 382        | 7,758  | 2,586          |
| Total . . . . .   | 25,056 | 3,191      | 28,247 | 2,173          |

Lifeboats were established on the British coasts in 1824, which in sixty-three years down to 1887 were the means of saving 34,043 lives, an average of 550 yearly. There are at present 272, manned by 12,000 volunteer seamen, the coxswain alone being paid to mind the boat. They are supported by voluntary donations, which average £43,000 yearly.

#### FRANCE

In 1669 the merchant navy comprised 600 vessels, the number rising to 800 in 1720, of 150,000 tons aggregate, and to 1000 in 1788, with an aggregate of 250,000 tons.

| French Shipping in | Number |        |        | Tons    |         |           | Carrying Power |
|--------------------|--------|--------|--------|---------|---------|-----------|----------------|
|                    | Steam  | Sail   | Total  | Steam   | Sail    | Total     |                |
| 1840 . . . . .     | 94     | 14,354 | 14,448 | 10,000  | 624,000 | 634,000   | 664,000        |
| 1850 . . . . .     | 164    | 14,300 | 14,464 | 27,000  | 733,000 | 760,000   | 841,000        |
| 1860 . . . . .     | 346    | 14,823 | 15,169 | 84,000  | 929,000 | 1,013,000 | 1,265,000      |
| 1870 . . . . .     | 486    | 15,020 | 15,506 | 170,000 | 886,000 | 1,056,000 | 1,566,000      |
| 1880 . . . . .     | 652    | 14,406 | 15,058 | 278,000 | 641,000 | 919,000   | 1,753,000      |
| 1888 . . . . .     | 1,015  | 14,263 | 15,278 | 510,000 | 451,000 | 961,000   | 2,491,000      |

The total tonnage entered and cleared at French ports since 1837 showed the following averages :—

| Period            | Annual Average, Tons |           |            |            |           |            | Total Crew |
|-------------------|----------------------|-----------|------------|------------|-----------|------------|------------|
|                   | Steam                | Sail      | Total      | In Ballast | French    | Foreign    |            |
| 1837-46 . . . . . | 680,000              | 3,390,000 | 4,070,000  | 920,000    | 1,470,000 | 2,600,000  | 337,000    |
| 1847-56 . . . . . | 1,270,000            | 4,370,000 | 5,640,000  | 1,260,000  | 2,230,000 | 3,410,000  | 443,000    |
| 1857-66 . . . . . | 3,310,000            | 6,220,000 | 9,530,000  | 1,920,000  | 3,820,000 | 5,710,000  | 662,000    |
| 1867-76 . . . . . | 8,050,000            | 6,850,000 | 14,900,000 | 3,080,000  | 4,950,000 | 9,950,000  | 868,000    |
| 1877-86 . . . . . | 17,820,000           | 6,610,000 | 24,430,000 | 5,330,000  | 8,010,000 | 16,420,000 | 1,070,000  |
| 1886 . . . . .    | 22,480,000           | 4,270,000 | 26,750,000 | 5,030,000  | 9,600,000 | 17,150,000 | 1,096,000  |

Crew and tonnage are doubled in the above table, as it includes vessels both entered and cleared.

The following table shows the tonnage of entries only, that is, the annual average :—

| Period            | Vessels | Tons       | Tons per Ship | Per Seaman |
|-------------------|---------|------------|---------------|------------|
| 1837-46 . . . . . | 18,496  | 2,040,000  | 110           | 12         |
| 1847-56 . . . . . | 22,323  | 2,800,000  | 125           | 13         |
| 1857-66 . . . . . | 30,590  | 4,710,000  | 154           | 14         |
| 1867-76 . . . . . | 34,529  | 7,380,000  | 214           | 17         |
| 1877-86 . . . . . | 34,800  | 12,100,000 | 345           | 23         |
| 1886 . . . . .    | 30,463  | 13,100,000 | 430           | 24         |

The percentage of steam, sail, ballast, French and foreign vessels entered and cleared since 1837 was as follows :—

| Period            | In every 100 Tons of Shipping |         |       |      |         |
|-------------------|-------------------------------|---------|-------|------|---------|
|                   | French                        | Foreign | Steam | Sail | Ballast |
| 1837-46 . . . . . | 36                            | 64      | 17    | 83   | 23      |
| 1847-56 . . . . . | 40                            | 60      | 22    | 78   | 22      |
| 1857-66 . . . . . | 40                            | 60      | 35    | 65   | 20      |
| 1867-76 . . . . . | 33                            | 67      | 54    | 46   | 21      |
| 1877-86 . . . . . | 33                            | 67      | 73    | 27   | 21      |
| 1886 . . . . .    | 36                            | 64      | 84    | 16   | 19      |

The *cabotage* or coasting trade of France since 1837 was as follows :—

| Period            | Annual Average |           |         |            |
|-------------------|----------------|-----------|---------|------------|
|                   | Vessels        | Tonnage   | Men     | Tons Cargo |
| 1837-46 . . . . . | 77,300         | 2,480,000 | 310,000 | 2,010,000  |
| 1847-56 . . . . . | 73,400         | 2,680,000 | 312,000 | 2,250,000  |
| 1857-66 . . . . . | 75,700         | 3,060,000 | 291,000 | 2,340,000  |
| 1867-76 . . . . . | 60,100         | 2,930,000 | 237,000 | 2,030,000  |
| 1877-86 . . . . . | 57,600         | 3,730,000 | 271,000 | 2,035,000  |

In 1886 the coasting trade was made up thus :—

|                         | Vessels | Tonnage   | Men     | Tons Cargo |
|-------------------------|---------|-----------|---------|------------|
| Ocean . . . . .         | 47,030  | 2,460,000 | 181,500 | 1,530,000  |
| Mediterranean . . . . . | 8,870   | 1,980,000 | 112,800 | 700,000    |
| Total . . . . .         | 55,900  | 4,440,000 | 294,300 | 2,230,000  |

The following table shows the total sea-going and coasting tonnage entered and cleared at all ports in 1886 :—

|                      | Tonnage    | Tons Cargo |
|----------------------|------------|------------|
| Marseilles . . . . . | 8,300,000  | 1,190,000  |
| Havre . . . . .      | 4,030,000  | 2,350,000  |
| Bordeaux . . . . .   | 2,930,000  | 2,360,000  |
| Dunkirk . . . . .    | 1,550,000  | 1,760,000  |
| Various . . . . .    | 13,800,000 | 12,800,000 |
| Total . . . . .      | 30,610,000 | 20,460,000 |

The great difference between tonnage of vessels at Marseilles and weight of cargo handled probably arises from the fact that the passenger traffic forms the principal share. The shipping registered at the various ports in 1885 was as follows :—

| Port                 | Tonnage |         |         | Carrying Power |
|----------------------|---------|---------|---------|----------------|
|                      | Sail    | Steam   | Total   |                |
| Havre . . . . .      | 40,000  | 147,000 | 187,000 | 630,000        |
| Bordeaux . . . . .   | 58,000  | 25,000  | 83,000  | 158,000        |
| Marseilles . . . . . | 29,000  | 245,000 | 274,000 | 1,009,000      |
| Various . . . . .    | 365,000 | 84,000  | 449,000 | 701,000        |
| Total . . . . .      | 492,000 | 501,000 | 993,000 | 2,498,000      |

The *Empress Eugenie* introduced lifeboat stations in 1866, of which in 1882 there were 37, at exposed points of the coast. The French merchant navy in 1886 had 93,800 seamen, viz. :—

| Vessels of               | Tonnage | Crew   | Tons per Man |
|--------------------------|---------|--------|--------------|
| Under 100 tons . . . . . | 197,000 | 61,300 | 3            |
| 100-300 . . . . .        | 165,000 | 12,100 | 14           |
| 300-500 . . . . .        | 100,000 | 3,700  | 27           |
| Over 500 . . . . .       | 531,000 | 16,700 | 32           |
| Total . . . . .          | 993,000 | 93,800 | 11           |

The total tonnage entered and cleared at all ports in 1888 was as follows :—

|                   | Tons       |            |            |
|-------------------|------------|------------|------------|
|                   | Entered    | Cleared    | Total      |
| French . . . . .  | 10,980,000 | 11,260,000 | 22,240,000 |
| Foreign . . . . . | 7,150,000  | 9,300,000  | 16,450,000 |
| Total . . . . .   | 18,130,000 | 20,560,000 | 38,690,000 |
| Ballast . . . . . | 1,470,000  | 6,080,000  | 7,550,000  |
| Cargo . . . . .   | 16,660,000 | 14,480,000 | 31,140,000 |
| Total . . . . .   | 18,130,000 | 20,560,000 | 38,690,000 |

Most of the French merchant navy is of small tonnage, there being only 2475 vessels over 50 tons, and 12,803 below that standard.

#### GERMANY

The merchant navy in 1842 consisted of 8200 vessels, with an aggregate of 551,000 tons. Later statistics are as follow :—

| Year           | Vessels, Number |       |       | Tons    |         |           |
|----------------|-----------------|-------|-------|---------|---------|-----------|
|                | Steam           | Sail  | Total | Steam   | Sail    | Total     |
| 1871 . . . . . | 147             | 4,372 | 4,519 | 82,000  | 900,000 | 982,000   |
| 1880 . . . . . | 414             | 4,246 | 4,660 | 216,000 | 966,000 | 1,182,000 |
| 1888 . . . . . | 750             | 2,885 | 3,635 | 503,000 | 731,000 | 1,234,000 |

The size and carrying power of the vessels have grown as follows :—

|      | Vessels | Tons      | Carrying Power | Per Vessel |                |
|------|---------|-----------|----------------|------------|----------------|
|      |         |           |                | Tons       | Carrying Power |
| 1842 | 8,200   | 551,000   | 551,000        | 67         | 67             |
| 1871 | 4,519   | 982,000   | 1,228,000      | 218        | 270            |
| 1888 | 3,635   | 1,234,000 | 2,743,000      | 338        | 751            |

The carrying power compares with the number of seamen as follows :—

| Year | Seamen | Carrying Power | Tons per Man |
|------|--------|----------------|--------------|
| 1871 | 39,500 | 1,228,000      | 31           |
| 1877 | 53,400 | 1,830,000      | 35           |
| 1889 | 36,300 | 2,743,000      | 75           |

The ratio of carrying power per seaman has more than doubled in twelve years. It is now 75 tons per man, against 91 in the British merchant-navy. But in spite of the increased efficiency of German seamen, the carrying trade of German ports is passing into the hands of other maritime nations, the ratio of German entries being less than it was thirty years ago.

The tonnage of entries into all German ports was as follows :—

| Year | German    | Foreign   | Total     | German Ratio per Cent. |
|------|-----------|-----------|-----------|------------------------|
| 1860 | 1,740,000 | 1,990,000 | 3,730,000 | 47                     |
| 1870 | 2,705,000 | 3,500,000 | 6,205,000 | 43                     |
| 1880 | 2,560,000 | 3,970,000 | 6,530,000 | 39                     |
| 1888 | 3,910,000 | 5,530,000 | 9,440,000 | 42                     |

Entries in the ports of the German Empire in 1886 were as follows :—

| From              | Vessels | Tons      | Flag              | Vessels | Tons      |
|-------------------|---------|-----------|-------------------|---------|-----------|
| German ports      | 28,320  | 1,520,000 | German            | 6,967   | 3,740,000 |
| Great Britain     | 7,042   | 3,420,000 | British           | 4,193   | 2,710,000 |
| Denmark           | 4,330   | 520,000   | Danish            | 4,032   | 570,000   |
| Sweden and Norway | 3,238   | 560,000   | Russian           | 457     | 120,000   |
| United States     | 860     | 1,170,000 | Sweden and Norway | 3,054   | 800,000   |
| Various           | 4,057   | 2,030,000 | Various           | 29,203  | 1,280,000 |
| Total             | 47,856  | 9,220,000 | Total             | 47,856  | 9,220,000 |

Entries and clearances in 1888 were as follows :—

| Ports   | Entered, Tons | Cleared, Tons | Total      |
|---------|---------------|---------------|------------|
| Hamburg | 4,410,000     | 4,440,000     | 8,850,000  |
| Bremen  | 1,180,000     | 1,190,000     | 2,370,000  |
| Stettin | 1,040,000     | 1,060,000     | 2,100,000  |
| Dantzig | 630,000       | 640,000       | 1,270,000  |
| Various | 2,180,000     | 2,105,000     | 4,285,000  |
| Total   | 9,440,000     | 9,435,000     | 18,875,000 |

The trade of Hamburg has grown nearly tenfold since 1846, when the entries were 460,000 tons.

The coasting trade in 1885 showed the following entries :—

|             | Vessels | Tons       |
|-------------|---------|------------|
| Hamburg     | 6,489   | 3,633,000  |
| Bremen      | 2,426   | 976,000    |
| Other ports | 52,270  | 5,615,000  |
| Total       | 61,185  | 10,224,000 |

Vessels with cargo formed 92, in ballast 8 per cent. of the above tonnage.

#### RUSSIA AND FINLAND

In 1842 the merchant navy comprised 1000 vessels with 240,000 tons aggregate. In recent years the returns show :—

| Year | Vessels |       |       | Tons    |         |         | Carrying Power |
|------|---------|-------|-------|---------|---------|---------|----------------|
|      | Steam   | Sail  | Total | Steam   | Sail    | Total   |                |
| 1876 | 356     | 3,975 | 4,331 | 82,000  | 600,000 | 682,000 | 930,000        |
| 1880 | 529     | 5,776 | 6,305 | 100,000 | 640,000 | 740,000 | 1,040,000      |
| 1886 | 594     | 3,982 | 4,576 | 142,000 | 605,000 | 747,000 | 1,170,000      |

The tonnage of vessels entered into Russian ports was :—

| Year | Russian | Foreign   | Total     |
|------|---------|-----------|-----------|
| 1837 | 47,000  | 888,000   | 935,000   |
| 1866 | 540,000 | 2,036,000 | 2,576,000 |
| 1871 | 595,000 | 3,400,000 | 3,995,000 |
| 1880 | 580,000 | 4,440,000 | 5,020,000 |
| 1888 | 510,000 | 6,900,000 | 7,410,000 |

The internal navigation in 1880 employed 385 steamers and 13,000 canal-boats. The sea-going and coast traffic in 1888 showed entries as follows :—

|           | Vessels | Tons       |
|-----------|---------|------------|
| Sea-going | 12,575  | 7,410,000  |
| Coast     | 23,978  | 4,753,000  |
| Total     | 36,553  | 12,163,000 |

Sea-going entries were distributed thus :—

|                      | Vessels | Tons      |
|----------------------|---------|-----------|
| Baltic . . . . .     | 6,966   | 3,090,000 |
| Black Sea . . . . .  | 4,921   | 3,730,000 |
| Other seas . . . . . | 688     | 590,000   |
| Total . . . . .      | 12,575  | 7,410,000 |

## AUSTRIA

The first impulse given to Austrian shipping was the establishment of the Austrian Lloyd's Company to trade in the Levant in 1833; the second, the Danube Navigation Company, founded in 1850. The latter has steamers which carry 1,200,000 passengers and 1,400,000 tons of merchandise yearly. The merchant navy of the Empire in 1849 comprised 6083 vessels of 260,000 tons aggregate, manned by 27,000 seamen. In later years we find as follows :—

| Year           | Vessels |      |       | Tons   |         |         | Carrying Power |
|----------------|---------|------|-------|--------|---------|---------|----------------|
|                | Steam   | Sail | Total | Steam  | Sail    | Total   |                |
| 1870 . . . . . | 91      | 702  | 793   | 50,000 | 280,000 | 330,000 | 480,000        |
| 1880 . . . . . | 80      | 526  | 606   | 60,000 | 230,000 | 290,000 | 470,000        |
| 1888 . . . . . | 98      | 269  | 367   | 90,000 | 130,000 | 220,000 | 490,000        |

The tonnage of entries was as follows :—

| Year           | Austrian  | Foreign | Total     |
|----------------|-----------|---------|-----------|
| 1861 . . . . . | 2,400,000 | 420,000 | 2,820,000 |
| 1870 . . . . . | 2,840,000 | 590,000 | 3,430,000 |
| 1880 . . . . . | 4,190,000 | 630,000 | 4,820,000 |
| 1888 . . . . . | 6,740,000 | 805,000 | 7,545,000 |

In later years the returns of shipping of the kingdom of Italy show as follows :—

|                | Vessels |        |        | Tons    |         |           | Carrying Power |
|----------------|---------|--------|--------|---------|---------|-----------|----------------|
|                | Steam   | Sail   | Total  | Steam   | Sail    | Total     |                |
| 1872 . . . . . | 118     | 10,951 | 11,069 | 38,000  | 993,000 | 1,031,000 | 1,145,000      |
| 1880 . . . . . | 158     | 7,822  | 7,980  | 77,000  | 922,000 | 999,000   | 1,230,000      |
| 1888 . . . . . | 266     | 6,544  | 6,810  | 175,000 | 675,000 | 850,000   | 1,375,000      |

Port entries since 1861 have risen as follows in tonnage :—

| Year           | Italian   | Foreign   | Total Sea-going | Coasting   | Total Entries |
|----------------|-----------|-----------|-----------------|------------|---------------|
| 1861 . . . . . | 820,000   | 1,700,000 | 2,520,000       | ...        | ...           |
| 1870 . . . . . | 1,340,000 | 2,450,000 | 3,790,000       | 5,930,000  | 9,720,000     |
| 1880 . . . . . | 1,700,000 | 2,990,000 | 4,690,000       | 8,400,000  | 13,090,000    |
| 1888 . . . . . | 1,720,000 | 4,950,000 | 6,670,000       | 13,380,000 | 20,050,000    |

The above figures show that since 1870 the sea-going trade has risen 75 per cent., and coasting trade 125 per cent.

The total of entries and clearances in 1888 was as follows :—

|                     | Entries, Tons | Cleared, Tons | Total      |
|---------------------|---------------|---------------|------------|
| Sea-going . . . . . | 6,670,000     | 6,400,000     | 13,070,000 |
| Coasting . . . . .  | 13,380,000    | 12,790,000    | 26,170,000 |
| Total . . . . .     | 20,050,000    | 19,190,000    | 39,240,000 |

In 1889 the tonnage of sea-going vessels that entered the Danube was as follows :—

|                   | Tons      |
|-------------------|-----------|
| British . . . . . | 1,001,000 |
| Greek . . . . .   | 128,000   |
| Various . . . . . | 285,000   |
| Total . . . . .   | 1,414,000 |

This table, however, applied only to that part of the Danube outside the Austrian dominions.

The total shipping of the Austrian Empire of all sizes in 1886 was as follows :—

|                     | Vessels | Tons    | Seamen |
|---------------------|---------|---------|--------|
| Sea-going . . . . . | 393     | 250,000 | 5,400  |
| Coasting . . . . .  | 8,975   | 62,000  | 23,400 |
| Total . . . . .     | 9,368   | 312,000 | 28,800 |

The aggregate horse-power of merchant steamers was 23,000.

## ITALY

In 1842 the merchant shipping of all the Italian States summed up 14,680 vessels, with an aggregate of 462,000 tons. In 1850 the marine of the three principal States was as follows :—

|                    | Vessels | Tons    |
|--------------------|---------|---------|
| Naples . . . . .   | 3,600   | 168,000 |
| Sardinia . . . . . | 6,300   | 167,000 |
| Tuscany . . . . .  | 800     | 34,000  |
| Total . . . . .    | 10,700  | 369,000 |

The aggregate of vessels' tonnage entered and cleared was as follows :—

| Year           | Sea-going  | Coasting   | Total      |
|----------------|------------|------------|------------|
| 1861 . . . . . | 5,080,000  | 8,000,000  | 13,080,000 |
| 1870 . . . . . | 7,620,000  | 9,680,000  | 17,300,000 |
| 1888 . . . . . | 11,070,000 | 26,170,000 | 39,240,000 |

This shows that the shipping business of Italy has more than doubled since 1870. The trade of the principal ports in 1888 was as follows :—

|                   | Tons Entered | Tons Cleared | Total      |
|-------------------|--------------|--------------|------------|
| Genoa . . . . .   | 2,810,000    | 2,850,000    | 5,660,000  |
| Naples . . . . .  | 1,750,000    | 1,750,000    | 3,500,000  |
| Palermo . . . . . | 1,390,000    | 1,390,000    | 2,780,000  |
| Leghorn . . . . . | 1,300,000    | 1,290,000    | 2,590,000  |
| Messina . . . . . | 1,080,000    | 1,070,000    | 2,150,000  |
| Venice . . . . .  | 890,000      | 890,000      | 1,780,000  |
| Various . . . . . | 10,830,000   | 9,950,000    | 20,780,000 |
| Total . . . . .   | 20,050,000   | 19,190,000   | 39,240,000 |

## SPAIN

At the death of Charles II., in 1700, the merchant navy had an aggregate of 27,000 tons. In recent years the tonnage was :—

| Year | Steam   | Sail    | Total   | Carrying Power |
|------|---------|---------|---------|----------------|
| 1842 | ...     | 280,000 | 280,000 | 280,000        |
| 1859 | 13,000  | 460,000 | 473,000 | 512,000        |
| 1872 | 45,000  | 340,000 | 385,000 | 520,000        |
| 1880 | 230,000 | 330,000 | 560,000 | 1,250,000      |
| 1888 | 395,000 | 205,000 | 600,000 | 1,785,000      |

Port entries of sea-going vessels showed the following tonnage :—

| Year       | Spanish   | Foreign   | Total      |
|------------|-----------|-----------|------------|
| 1860 . . . | 420,000   | 930,000   | 1,350,000  |
| 1872 . . . | 890,000   | 1,960,000 | 2,850,000  |
| 1880 . . . | 1,300,000 | 4,400,000 | 5,700,000  |
| 1888 . . . | 4,600,000 | 6,850,000 | 11,450,000 |

The total port traffic in 1888 was as follows in tonnage :—

|                 | Entered    | Cleared    | Total      |
|-----------------|------------|------------|------------|
| Sea-going . . . | 11,450,000 | 10,880,000 | 22,330,000 |
| Coasting . . .  | 5,660,000  | 5,240,000  | 10,900,000 |
| Total . . .     | 17,110,000 | 16,120,000 | 33,230,000 |

The returns of coast traffic are for 1885; no later published.

## PORTUGAL

In 1842 the merchant navy counted 798 vessels, with an aggregate of 81,000 tons; in 1889 it comprised only 443 vessels, with an aggregate of 78,000 tons. The tonnage of vessels entered and cleared was as follows :—

| Flag           | Entered   |           | Cleared   |           |
|----------------|-----------|-----------|-----------|-----------|
|                | 1878      | 1888      | 1878      | 1888      |
| Portuguese . . | 170,000   | 210,000   | 160,000   | 190,000   |
| Foreign . . .  | 2,330,000 | 3,750,000 | 2,250,000 | 3,730,000 |
| Total . . .    | 2,500,000 | 3,960,000 | 2,410,000 | 3,920,000 |

Of the foreign entries in 1888, British vessels stood for 2,140,000 tons, or considerably more than half the trade of Portugal.

## SWEDEN

The merchant navy at various dates stood thus :—

| Year | Steam   | Sail    | Total   | Carrying Power |
|------|---------|---------|---------|----------------|
| 1800 | ...     | 64,000  | 64,000  | 64,000         |
| 1837 | ...     | 120,000 | 120,000 | 120,000        |
| 1872 | 48,000  | 340,000 | 388,000 | 530,000        |
| 1880 | 81,000  | 460,000 | 541,000 | 780,000        |
| 1888 | 125,000 | 375,000 | 500,000 | 875,000        |

The tonnage of port entries was as follows :—

| Year       | Swedish   | Foreign   | Total     |
|------------|-----------|-----------|-----------|
| 1830 . . . | 163,000   | 170,000   | 333,000   |
| 1866 . . . | 495,000   | 1,135,000 | 1,630,000 |
| 1870 . . . | 680,000   | 1,480,000 | 2,160,000 |
| 1880 . . . | 1,270,000 | 2,170,000 | 3,440,000 |
| 1888 . . . | 1,760,000 | 3,260,000 | 5,020,000 |

The entries in 1888 were as follows :—

|               | With Cargo | In Ballast | Total     |
|---------------|------------|------------|-----------|
| Swedish . . . | 1,060,000  | 700,000    | 1,760,000 |
| Foreign . . . | 1,010,000  | 2,250,000  | 3,260,000 |
| Total . . .   | 2,070,000  | 2,950,000  | 5,020,000 |

|               | Steamers  | Sailing   | Total     |
|---------------|-----------|-----------|-----------|
| Swedish . . . | 1,110,000 | 650,000   | 1,760,000 |
| Foreign . . . | 2,295,000 | 965,000   | 3,260,000 |
| Total . . .   | 3,405,000 | 1,615,000 | 5,020,000 |

## NORWAY

In 1836 the merchant navy was one of the most considerable in the world, comprising 2430 vessels, with an aggregate of 212,000 tons, and 13,000 seamen. The tonnage at various dates was as follows :—

|            | Sail      | Steam   | Total     | Carrying Power |
|------------|-----------|---------|-----------|----------------|
| 1836 . . . | 212,000   | ...     | 212,000   | 212,000        |
| 1872 . . . | 1,090,000 | 30,000  | 1,120,000 | 1,210,000      |
| 1880 . . . | 1,460,000 | 58,000  | 1,518,000 | 1,690,000      |
| 1888 . . . | 1,400,000 | 135,000 | 1,535,000 | 1,940,000      |

Tonnage of port entries at various dates showed thus :—

| Year       | Norwegian | Foreign | Total     |
|------------|-----------|---------|-----------|
| 1860 . . . | 700,000   | 260,000 | 960,000   |
| 1870 . . . | 1,120,000 | 480,000 | 1,600,000 |
| 1880 . . . | 1,340,000 | 630,000 | 1,970,000 |
| 1888 . . . | 1,450,000 | 850,000 | 2,300,000 |

The sea-going trade in 1887 showed the ports thus :—

|                   | Tons Entered | Tons Cleared |
|-------------------|--------------|--------------|
| Christiania . . . | 740,000      | 560,000      |
| Bergen . . .      | 270,000      | 240,000      |
| Drontheim . . .   | 110,000      | 130,000      |
| Various . . .     | 1,210,000    | 1,500,000    |
| Total . . .       | 2,330,000    | 2,430,000    |

In 1876 the merchant navy of Norway had 56,200 seamen, of whom 43,700 in sea-going vessels, the rest in coasters.

## DENMARK

In 1748 the Danish merchant navy counted 1800 vessels; in 1789 it exceeded 4000, declining in 1825 to 3870, and in 1835 to 3700. The tonnage at various dates showed :—

| Year       | Steam  | Sail    | Total   | Carrying Power |
|------------|--------|---------|---------|----------------|
| 1825 . . . | ...    | 118,000 | 118,000 | 118,000        |
| 1835 . . . | ...    | 144,000 | 144,000 | 144,000        |
| 1850 . . . | ...    | 153,000 | 153,000 | 153,000        |
| 1872 . . . | 15,000 | 175,000 | 190,000 | 235,000        |
| 1880 . . . | 52,000 | 198,000 | 250,000 | 405,000        |
| 1888 . . . | 95,000 | 175,000 | 270,000 | 555,000        |

Tonnage of port entries was as follows :—

| Year       | Danish    | Foreign   | Total     |
|------------|-----------|-----------|-----------|
| 1860 . . . | 260,000   | 340,000   | 600,000   |
| 1870 . . . | 310,000   | 400,000   | 710,000   |
| 1880 . . . | 1,200,000 | 1,030,000 | 2,230,000 |
| 1888 . . . | 1,750,000 | 1,630,000 | 3,380,000 |

The shipping trade of 1888 was as follows in tonnage :—

|               | Steam     | Sail      | Total     |
|---------------|-----------|-----------|-----------|
| Entered . . . | 2,670,000 | 710,000   | 3,380,000 |
| Cleared . . . | 2,650,000 | 720,000   | 3,370,000 |
| Total . . .   | 5,320,000 | 1,430,000 | 6,750,000 |

The Sound dues during fourteen years down to 1799 averaged £150,000 a year from 10,000 vessels, that is, £15 each. In later years we find as follows :—

| Year       | Dues Paid by |               |          | Number of Vessels |
|------------|--------------|---------------|----------|-------------------|
|            | British      | Other Vessels | Total, £ |                   |
| 1821 . . . | 67,000       | 100,000       | 167,000  | 9,200             |
| 1830 . . . | 51,000       | 110,000       | 161,000  | 13,300            |
| 1837 . . . | 54,000       | 160,000       | 214,000  | 13,100            |

The dues were 1 per cent. on the value of the cargo, and were abolished in 1857, when Great Britain paid Denmark £1,200,000 and other nations £2,400,000 as indemnity.

#### HOLLAND

The tonnage of merchant shipping of the Dutch flag was as follows :—

| Year       | Steam   | Sail    | Total   | Carrying Power |
|------------|---------|---------|---------|----------------|
| 1826 . . . | ...     | 148,000 | 148,000 | 148,000        |
| 1842 . . . | ...     | 275,000 | 275,000 | 275,000        |
| 1872 . . . | 34,000  | 350,000 | 384,000 | 490,000        |
| 1880 . . . | 65,000  | 265,000 | 330,000 | 525,000        |
| 1888 . . . | 105,000 | 140,000 | 245,000 | 560,000        |

Tonnage of port entries was as follows :—

| Year       | Dutch     | Foreign   | Total     |
|------------|-----------|-----------|-----------|
| 1828 . . . | 284,000   | 439,000   | 723,000   |
| 1837 . . . | 327,000   | 449,000   | 776,000   |
| 1860 . . . | 650,000   | 1,005,000 | 1,655,000 |
| 1870 . . . | 660,000   | 1,650,000 | 2,310,000 |
| 1880 . . . | 1,055,000 | 2,390,000 | 3,445,000 |
| 1888 . . . | 1,600,000 | 3,510,000 | 5,110,000 |

The trade of 1888 showed as follows :—

|               | With Cargo | In Ballast | Total      |
|---------------|------------|------------|------------|
| Entered . . . | 4,900,000  | 210,000    | 5,110,000  |
| Cleared . . . | 2,960,000  | 2,080,000  | 5,040,000  |
| Total . . .   | 7,860,000  | 2,290,000  | 10,150,000 |

The principal ports showed as follows, cargo only :—

|                | Entered   | Cleared   | Total     |
|----------------|-----------|-----------|-----------|
| Rotterdam . .  | 2,525,000 | 1,420,000 | 3,945,000 |
| Amsterdam . .  | 940,000   | 570,000   | 1,510,000 |
| Flushing . . . | 630,000   | 650,000   | 1,280,000 |
| Various . . .  | 805,000   | 320,000   | 1,125,000 |
| Total . . .    | 4,900,000 | 2,960,000 | 7,860,000 |

In 1670 Sir William Petty estimated that the Dutch possessed one-half the shipping of the world : at present they have less than 1½ per cent. of the total.

BELGIUM  
The merchant navy was as follows, in tonnage :—

| Year       | Steam  | Sail   | Total  | Carrying Power |
|------------|--------|--------|--------|----------------|
| 1842 . . . | ...    | 27,000 | 27,000 | 27,000         |
| 1870 . . . | 10,000 | 20,000 | 30,000 | 60,000         |
| 1880 . . . | 65,000 | 10,000 | 75,000 | 270,000        |
| 1888 . . . | 73,000 | 4,000  | 77,000 | 295,000        |

Tonnage of port entries was as follows :—

| Year       | Steam     | Sail    | Total     |
|------------|-----------|---------|-----------|
| 1840 . . . | ...       | 237,000 | 237,000   |
| 1850 . . . | ...       | 315,000 | 315,000   |
| 1860 . . . | 176,000   | 491,000 | 667,000   |
| 1870 . . . | 839,000   | 736,000 | 1,575,000 |
| 1880 . . . | 2,813,000 | 758,000 | 3,571,000 |
| 1887 . . . | 4,080,000 | 492,000 | 4,572,000 |

The countries from which the tonnage came were :—

|                   | 1840    | 1860    | 1887      |
|-------------------|---------|---------|-----------|
| Great Britain . . | 60,000  | 240,000 | 1,740,000 |
| United States . . | 30,000  | 40,000  | 620,000   |
| Germany . . .     | 30,000  | 75,000  | 370,000   |
| Russia . . .      | 35,000  | 90,000  | 315,000   |
| France . . .      | 10,000  | 20,000  | 190,000   |
| Argentina . . .   | ...     | 20,000  | 190,000   |
| Various . . .     | 72,000  | 182,000 | 1,147,000 |
| Total . . .       | 237,000 | 667,000 | 4,572,000 |

Antwerp stands for 80 per cent. of the shipping trade of the kingdom, viz. :—

|                   | 1840    | 1860    | 1887      |
|-------------------|---------|---------|-----------|
| Antwerp . . .     | 180,000 | 512,000 | 3,665,000 |
| Other ports . . . | 57,000  | 155,000 | 907,000   |
| Total . . .       | 237,000 | 667,000 | 4,572,000 |

#### GREECE

The mercantile marine at various dates had the following tonnage :—

|            | Steam  | Sail    | Total   | Carrying Power |
|------------|--------|---------|---------|----------------|
| 1842 . . . | ...    | 186,000 | 186,000 | 186,000        |
| 1872 . . . | 6,000  | 234,000 | 240,000 | 258,000        |
| 1887 . . . | 31,000 | 227,000 | 258,000 | 350,000        |

Tonnage of port entries was as follows :—

| Year       | Greek   | Foreign   | Total     |
|------------|---------|-----------|-----------|
| 1860 . . . | 430,000 | 500,000   | 930,000   |
| 1870 . . . | 420,000 | 850,000   | 1,270,000 |
| 1888 . . . | 330,000 | 2,040,000 | 2,370,000 |

Piræus (Athens) stood for 1,550,000 tons, or 66 per cent. of the total. The merchant navy of Greece in 1880 had 26,800 sailors.

#### TURKEY

The tonnage of the merchant navy at various dates was as follows :—

| Year       | Sail    | Steam  | Total   | Carrying Power |
|------------|---------|--------|---------|----------------|
| 1842 . . . | 182,000 | ...    | 182,000 | 182,000        |
| 1875 . . . | 170,000 | 10,000 | 180,000 | 210,000        |
| 1889 . . . | 153,000 | 64,000 | 217,000 | 410,000        |

Port entries in 1888 were as follows:—

| At                   | Tons       | Flag         | Tons       |
|----------------------|------------|--------------|------------|
| Constantinople . . . | 8,790,000  | British . .  | 9,270,000  |
| Levant and Black Sea | 18,790,000 | Turkish . .  | 4,810,000  |
| Red Sea . . . . .    | 540,000    | Austrian . . | 3,720,000  |
| Persian Gulf . . .   | 160,000    | Various . .  | 10,480,000 |
| Total . . . . .      | 28,280,000 | Total . . .  | 28,280,000 |

In 1888 no fewer than 15,820 vessels entered the Dardanelles, with an aggregate of 10,460,000 tons, the share of British vessels being 7,030,000 tons.

## EGYPT

The trade returns of the Suez Canal since 1870 will be found under the head of *Canals*, p. 102.

The tonnage of arrivals at Alexandria and that of vessels passing through the Suez Canal in 1888 showed thus:—

|                    | Alexandria, Tons | Canal, Tons |
|--------------------|------------------|-------------|
| British . . . . .  | 690,000          | 7,340,000   |
| Turkish . . . . .  | 250,000          | 30,000      |
| French . . . . .   | 250,000          | 580,000     |
| Austrian . . . . . | 160,000          | 170,000     |
| Russian . . . . .  | 120,000          | 50,000      |
| Italian . . . . .  | 60,000           | 400,000     |
| Various . . . . .  | 60,000           | 870,000     |
| Total . . . . .    | 1,590,000        | 9,440,000   |

## UNITED STATES

The merchant shipping of the Union at various dates was in tonnage as follows:—

| Year           | High Seas | Coasting, &c. | Total     | Sail      | Steam     | Carrying Power |
|----------------|-----------|---------------|-----------|-----------|-----------|----------------|
| 1789 . . . . . | 124,000   | 78,000        | 202,000   | 202,000   | ...       | 202,000        |
| 1795 . . . . . | 530,000   | 218,000       | 748,000   | 748,000   | ...       | 748,000        |
| 1800 . . . . . | 670,000   | 300,000       | 970,000   | 970,000   | ...       | 970,000        |
| 1810 . . . . . | 980,000   | 440,000       | 1,420,000 | 1,420,000 | ...       | 1,420,000      |
| 1820 . . . . . | 580,000   | 700,000       | 1,280,000 | 1,260,000 | 20,000    | 1,340,000      |
| 1830 . . . . . | 540,000   | 650,000       | 1,190,000 | 1,125,000 | 65,000    | 1,385,000      |
| 1840 . . . . . | 760,000   | 1,420,000     | 2,180,000 | 1,980,000 | 200,000   | 2,780,000      |
| 1850 . . . . . | 1,440,000 | 2,095,000     | 3,535,000 | 3,010,000 | 525,000   | 5,110,000      |
| 1860 . . . . . | 2,380,000 | 2,970,000     | 5,350,000 | 4,480,000 | 870,000   | 7,960,000      |
| 1870 . . . . . | 1,450,000 | 2,800,000     | 4,250,000 | 3,175,000 | 1,075,000 | 7,475,000      |
| 1880 . . . . . | 1,310,000 | 2,760,000     | 4,070,000 | 2,800,000 | 1,210,000 | 7,700,000      |
| 1889 . . . . . | 1,000,000 | 3,310,000     | 4,310,000 | 2,540,000 | 1,770,000 | 9,620,000      |

American shipping differs from that of other nations, inasmuch as less than one-fourth is engaged on the high seas: coasting and internal traffic take 77 per cent. of the total merchant-navy. The carrying-power has risen only 20 in the last thirty years. It was less in 1880 than twenty years before, but has since recovered.

The tonnage of vessels built since 1812 was as follows:—

| Period   | Sail       | Steam     | Total      | Carrying Power | Do. per Annum |
|----------|------------|-----------|------------|----------------|---------------|
| 1812-20  | 730,000    | 25,000    | 755,000    | 830,000        | 92,000        |
| 1821-30  | 830,000    | 65,000    | 895,000    | 1,090,000      | 109,000       |
| 1831-40  | 1,010,000  | 175,000   | 1,185,000  | 1,710,000      | 171,000       |
| 1841-50  | 1,480,000  | 370,000   | 1,850,000  | 2,960,000      | 296,000       |
| 1851-60  | 2,930,000  | 730,000   | 3,660,000  | 5,850,000      | 585,000       |
| 1861-70  | 2,110,000  | 910,000   | 3,020,000  | 5,750,000      | 575,000       |
| 1871-80  | 1,770,000  | 760,000   | 2,530,000  | 4,810,000      | 481,000       |
| 1881-89  | 930,000    | 970,000   | 1,900,000  | 4,810,000      | 534,000       |
| 78 years | 11,790,000 | 4,005,000 | 15,795,000 | 27,810,000     | 356,000       |

If we suppose that the vessels which have disappeared from the register in the last nine years were either lost or broken up (since very few have been sold to other flags), we find the death-rate of American vessels as follows:—

|                 | Lost, &c., Tons Yearly | Tonnage of Shipping | Annual Loss per Cent. |
|-----------------|------------------------|---------------------|-----------------------|
| Sail . . . . .  | 140,000                | 2,700,000           | 5.2                   |
| Steam . . . . . | 45,000                 | 1,500,000           | 3.0                   |
| Total . . . . . | 185,000                | 4,200,000           | 4.4                   |

The principal maritime states showed tonnage of vessels belonging to citizens of same in 1850 and 1886 thus:—

| State                  | Tons      |           |
|------------------------|-----------|-----------|
|                        | 1850      | 1886      |
| New York . . . . .     | 944,000   | 1,220,000 |
| Massachusetts . . . .  | 685,000   | 440,000   |
| Maine . . . . .        | 501,000   | 490,000   |
| Pennsylvania . . . . . | 258,000   | 280,000   |
| Louisiana . . . . .    | 250,000   | 70,000    |
| Maryland . . . . .     | 193,000   | 150,000   |
| Various . . . . .      | 704,000   | 1,620,000 |
| Total . . . . .        | 3,535,000 | 4,270,000 |

The proportions of trade—that is, of imports and exports combined—done on American and on foreign bottoms since 1821 are shown as follows:—

| Year | Trade, £           |             |             | Percentage |         |
|------|--------------------|-------------|-------------|------------|---------|
|      | United States Flag | Foreign     | Total       | American   | Foreign |
| 1821 | 23,600,000         | 3,100,000   | 26,700,000  | 89         | 11      |
| 1830 | 27,300,000         | 3,100,000   | 30,400,000  | 90         | 10      |
| 1840 | 41,900,000         | 8,500,000   | 50,400,000  | 83         | 17      |
| 1850 | 50,000,000         | 19,000,000  | 69,000,000  | 72         | 28      |
| 1860 | 105,500,000        | 53,000,000  | 158,500,000 | 66         | 34      |
| 1870 | 62,000,000         | 132,000,000 | 194,000,000 | 32         | 68      |
| 1880 | 58,200,000         | 272,000,000 | 330,800,000 | 17         | 83      |
| 1889 | 54,000,000         | 253,000,000 | 307,000,000 | 17         | 83      |

The tonnage of entries into United States ports under various flags was :—

| Flag                 | Tonnage   |           |            | Ratio |       |       |
|----------------------|-----------|-----------|------------|-------|-------|-------|
|                      | 1860      | 1870      | 1889       | 1860  | 1870  | 1889  |
| American . . . .     | 3,302,000 | 2,452,000 | 3,130,000  | 66.0  | 39.2  | 23.5  |
| British . . . . .    | 1,263,000 | 2,792,000 | 6,820,000  | 25.2  | 44.4  | 51.3  |
| German . . . . .     | 231,000   | 679,000   | 1,130,000  | 4.6   | 10.9  | 8.5   |
| Scandinavian . . . . | 32,000    | 108,000   | 725,000    | 0.6   | 1.7   | 5.4   |
| Italian . . . . .    | 32,000    | 48,000    | 290,000    | 0.6   | 0.8   | 2.2   |
| French . . . . .     | 24,000    | 81,000    | 320,000    | 0.5   | 1.3   | 2.4   |
| Spanish . . . . .    | 63,000    | 31,000    | 260,000    | 1.3   | 0.5   | 1.9   |
| Various . . . . .    | 50,000    | 79,000    | 635,000    | 1.2   | 1.2   | 4.8   |
| Total . . . . .      | 5,003,000 | 6,270,000 | 13,310,000 | 100.0 | 100.0 | 100.0 |

The tonnage entered and cleared at the principal ports was :—

| State                 | Entered   |           |            | Cleared   |           |            |
|-----------------------|-----------|-----------|------------|-----------|-----------|------------|
|                       | 1865      | 1875      | 1889       | 1865      | 1875      | 1889       |
| New York . . . . .    | 2,080,000 | 4,420,000 | 5,600,000  | 2,100,000 | 4,310,000 | 5,450,000  |
| Boston . . . . .      | 660,000   | 770,000   | 1,400,000  | 670,000   | 630,000   | 1,220,000  |
| Philadelphia . . . .  | 160,000   | 580,000   | 1,100,000  | 140,000   | 620,000   | 870,000    |
| San Francisco . . . . | 320,000   | 720,000   | 1,050,000  | 400,000   | 750,000   | 1,060,000  |
| New Orleans . . . . . | 50,000    | 450,000   | 770,000    | 70,000    | 520,000   | 770,000    |
| Various . . . . .     | 560,000   | 2,200,000 | 3,390,000  | 780,000   | 2,510,000 | 4,300,000  |
| Total . . . . .       | 3,830,000 | 9,140,000 | 13,310,000 | 4,160,000 | 9,340,000 | 13,670,000 |

The following table of steamboat traffic was published in 1881 for the preceding year :—

|                         | Steamers | Tonnage   | Passengers  | Goods, Tons | Earnings, £ | Wages, £  |
|-------------------------|----------|-----------|-------------|-------------|-------------|-----------|
| Lakes . . . . .         | 947      | 222,000   | 1,420,000   | 4,380,000   | 2,520,000   | 690,000   |
| Mississippi . . . . .   | 681      | 132,000   | 2,710,000   | 4,820,000   | 2,460,000   | 790,000   |
| Ohio . . . . .          | 473      | 107,000   | 4,030,000   | 2,410,000   | 1,580,000   | 585,000   |
| New England . . . . .   | 463      | 119,000   | 15,470,000  | 2,630,000   | 1,620,000   | 560,000   |
| Middle States . . . . . | 1,459    | 433,000   | 135,720,000 | 7,190,000   | 6,660,000   | 1,830,000 |
| Gulf . . . . .          | 1,116    | 208,000   | 9,160,000   | 4,110,000   | 2,870,000   | 965,000   |
| Total . . . . .         | 5,139    | 1,221,000 | 168,510,000 | 25,540,000  | 17,710,000  | 5,420,000 |

The crews mustered 57,100 men, their wages averaging £85. The steamers carried merchandise 21 times their own tonnage, besides passengers. Each steamer carried in the year 33,000 passengers and 5000 tons of merchandise. One tug on the Mississippi can convey in six days, from St. Louis to New Orleans, boats carrying 10,000 tons of grain, which would require 70 railway trains of 15 waggons each.

The official return of wrecks and casualties shows :—

|                    | Tonnage of Vessels |           |         |         |
|--------------------|--------------------|-----------|---------|---------|
|                    | Lost               |           | Damaged |         |
|                    | 1880               | 1889      | 1880    | 1889    |
|                    | 1880               | 1889      | 1880    | 1889    |
| Atlantic . . . . . | 31,000             | 50,000    | 207,000 | 266,000 |
| Lakes . . . . .    | 11,000             | 13,000    | 111,000 | 146,000 |
| Various . . . . .  | 68,000             | 63,000    | 187,000 | 178,000 |
| Total . . . . .    | 110,000            | 126,000   | 505,000 | 590,000 |
| Loss, £ Sterling   |                    |           |         |         |
| Atlantic . . . . . | 600,000            | 980,000   | 110     | 144     |
| Lakes . . . . .    | 250,000            | 250,000   | 29      | 9       |
| Various . . . . .  | 1,050,000          | 1,130,000 | 330     | 459     |
| Total . . . . .    | 1,900,000          | 2,360,000 | 469     | 612     |

#### CANADA

The merchant navy has grown in tonnage very rapidly, viz :—

| Year | Steam   | Sail      | Total     | Carrying Power |
|------|---------|-----------|-----------|----------------|
| 1841 | 5,000   | 345,000   | 350,000   | 365,000        |
| 1866 | 28,000  | 727,000   | 755,000   | 840,000        |
| 1877 | 77,000  | 1,233,000 | 1,310,000 | 1,540,000      |
| 1888 | 207,000 | 880,000   | 1,087,000 | 1,710,000      |

Although there has been a decline of 220,000 nominal tonnage in the last eleven years, there is an actual increase of 170,000 tons in carrying power owing to steamers taking the place of sailing vessels. Port entries of the high seas show the following tonnage :—

| Year           | Tons      | Year           | Tons      |
|----------------|-----------|----------------|-----------|
| 1829 . . . . . | 430,000   | 1880 . . . . . | 3,690,000 |
| 1860 . . . . . | 2,650,000 | 1885 . . . . . | 3,840,000 |
| 1870 . . . . . | 3,150,000 | 1888 . . . . . | 4,620,000 |

Of the entries in 1888 there were 35 per cent. in ballast.

The provinces which owned the shipping of the Dominion in 1888 were:—

|                       | Vessels | Tons      |
|-----------------------|---------|-----------|
| Nova Scotia . . . .   | 2,851   | 486,000   |
| New Brunswick . . . . | 1,009   | 240,000   |
| Quebec . . . .        | 1,498   | 180,000   |
| Ontario . . . .       | 1,330   | 140,000   |
| Various . . . .       | 454     | 44,000    |
| Total . . . .         | 7,142   | 1,090,000 |

## AUSTRALIA

The tonnage of entries at various dates was as follows:—

| Year         | Sydney    | Melbourne | Various   | Total     |
|--------------|-----------|-----------|-----------|-----------|
| 1822 . . . . | 57,000    | ...       | 17,000    | 74,000    |
| 1841 . . . . | 178,000   | ...       | 98,000    | 276,000   |
| 1851 . . . . | 146,000   | 120,000   | 278,000   | 544,000   |
| 1861 . . . . | 373,000   | 545,000   | 528,000   | 1,446,000 |
| 1871 . . . . | 750,000   | 678,000   | 770,000   | 2,198,000 |
| 1888 . . . . | 2,383,000 | 2,154,000 | 2,808,000 | 7,350,000 |

The average size of vessels has increased very notably, viz.:—

| Year         | Vessels | Tons      | Tons per Vessel |
|--------------|---------|-----------|-----------------|
| 1841 . . . . | 1,288   | 276,000   | 214             |
| 1851 . . . . | 2,670   | 544,000   | 204             |
| 1861 . . . . | 5,383   | 1,446,000 | 269             |
| 1871 . . . . | 6,866   | 2,198,000 | 320             |
| 1881 . . . . | 8,350   | 4,752,000 | 570             |
| 1888 . . . . | 9,306   | 7,345,000 | 790             |

The tonnage of port entries for the several Colonies was:—

|                           | 1860      | 1871      | 1888      |
|---------------------------|-----------|-----------|-----------|
| New South Wales . . . .   | 430,000   | 750,000   | 2,380,000 |
| Victoria . . . .          | 590,000   | 680,000   | 2,150,000 |
| South Australia . . . .   | 105,000   | 190,000   | 990,000   |
| New Zealand . . . .       | 140,000   | 270,000   | 530,000   |
| Queensland . . . .        | 40,000    | 140,000   | 500,000   |
| Tasmania . . . .          | 115,000   | 110,000   | 390,000   |
| Western Australia . . . . | 60,000    | 60,000    | 410,000   |
| Total . . . .             | 1,480,000 | 2,200,000 | 7,350,000 |

## OTHER COLONIES

Port entries at various dates showed tonnage approximately thus:—

|                      | 1860      | 1870      | 1880       | 1887       |
|----------------------|-----------|-----------|------------|------------|
| India . . . .        | 1,470,000 | 2,005,000 | 2,850,000  | 3,580,000  |
| Singapore . . . .    | 680,000   | 820,000   | 2,400,000  | 4,180,000  |
| Ceylon . . . .       | 400,000   | 710,000   | 1,450,000  | 2,070,000  |
| Mauritius . . . .    | 300,000   | 230,000   | 270,000    | 310,000    |
| Hong-Kong . . . .    | 780,000   | 1,320,000 | 3,040,000  | 4,580,000  |
| South Africa . . . . | 290,000   | 210,000   | 1,005,000  | 1,070,000  |
| West Indies . . . .  | 540,000   | 770,000   | 1,785,000  | 3,130,000  |
| Gibraltar . . . .    | 980,000   | 1,480,000 | 3,220,000  | 5,250,000  |
| Malta . . . .        | 930,000   | 1,490,000 | 3,070,000  | 3,410,000  |
| Various . . . .      | 410,000   | 920,000   | 1,190,000  | 1,760,000  |
| Total . . . .        | 6,780,000 | 9,955,000 | 20,280,000 | 29,340,000 |

## CHILI

The merchant navy is made up thus:—

|               | Vessels | Tons   |
|---------------|---------|--------|
| Steam . . . . | 38      | 19,000 |
| Sail . . . .  | 139     | 58,000 |
| Total . . . . | 177     | 77,000 |

Tonnage of entries was as follows:—

| Year         | Chilian | Foreign   | Total     |
|--------------|---------|-----------|-----------|
| 1878 . . . . | 150,000 | 1,070,000 | 1,220,000 |
| 1888 . . . . | 250,000 | 1,820,000 | 2,070,000 |

There is a very large coasting trade, the entries of which amount to 6,700,000 tons yearly.

## ARGENTINA

Port entries showed tonnage as follows:—

| Flag              | 1872      | 1882      | 1886      |
|-------------------|-----------|-----------|-----------|
| Argentine . . . . | 159,000   | 240,000   | 1,150,000 |
| British . . . .   | 361,000   | 342,000   | 960,000   |
| French . . . .    | 146,000   | 202,000   | 430,000   |
| Italian . . . .   | 131,000   | 125,000   | 215,000   |
| German . . . .    | 57,000    | 90,000    | 240,000   |
| Spanish . . . .   | 9,000     | 40,000    | 30,000    |
| Various . . . .   | 251,000   | 174,000   | 490,000   |
| Total . . . .     | 1,114,000 | 1,213,000 | 3,515,000 |

The total sea-going and coast entries in 1886 had tonnage thus:—

| At                    | Sea-Going | Coast     | Total     |
|-----------------------|-----------|-----------|-----------|
| Buenos Ayres . . . .  | 1,590,000 | 810,000   | 2,400,000 |
| Rosario . . . .       | 410,000   | 580,000   | 990,000   |
| Concordia . . . .     | 220,000   | 25,000    | 245,000   |
| Concepcion . . . .    | 180,000   | 65,000    | 245,000   |
| Guaileguaychu . . . . | 170,000   | 10,000    | 180,000   |
| Various . . . .       | 945,000   | 620,000   | 1,565,000 |
| Total . . . .         | 3,515,000 | 2,110,000 | 5,625,000 |

The high-seas entries in 1888 were as follows:—

|               | With Cargo | In Ballast | Total     |
|---------------|------------|------------|-----------|
| Sail . . . .  | 1,160,000  | 40,000     | 1,200,000 |
| Steam . . . . | 2,640,000  | 1,040,000  | 3,680,000 |
| Total . . . . | 3,800,000  | 1,080,000  | 4,880,000 |

Tonnage of vessels cleared showed thus:—

|               | With Cargo | In Ballast | Total     |
|---------------|------------|------------|-----------|
| Sail . . . .  | 270,000    | 730,000    | 1,000,000 |
| Steam . . . . | 2,280,000  | 1,030,000  | 3,310,000 |
| Total . . . . | 2,550,000  | 1,760,000  | 4,310,000 |

## URUGUAY

Tonnage of port entries was as follows:—

| Year         | Uruguayan | Foreign   | Total     |
|--------------|-----------|-----------|-----------|
| 1876 . . . . | 2,000     | 1,080,000 | 1,082,000 |
| 1888 . . . . | 1,000     | 1,620,000 | 1,621,000 |

In 1888 the returns of entries showed :—

| At              | Vessels | Tons      |
|-----------------|---------|-----------|
| Montevideo . .  | 1,357   | 1,620,000 |
| Other ports . . | 3,540   | 1,550,000 |
| Total . .       | 4,897   | 3,170,000 |

All the trade of the high seas was done at Montevideo ; the other ports had only coast traffic.

#### CHINA

Port entries had the following tonnage :—

| Year       | Chinese | Foreign   | Total     |
|------------|---------|-----------|-----------|
| 1878 . . . | 3,000   | 1,540,000 | 1,543,000 |
| 1888 . . . | 93,000  | 2,737,000 | 2,830,000 |

The above was the traffic of the high seas : the total of tonnage entered and cleared, including coast trade, in 1888 was as follows :—

|               | Vessels | Tons       |
|---------------|---------|------------|
| British . . . | 15,115  | 14,070,000 |
| Chinese . . . | 9,054   | 5,740,000  |
| German . . .  | 2,762   | 1,570,000  |
| Various . . . | 1,230   | 928,000    |
| Total . . .   | 28,161  | 22,308,000 |

Of the total tonnage, 95 per cent. was steam.

The tonnage of entries only in 1889 (sea-going and coast trade) showed as follows :—

|               |            |
|---------------|------------|
| British . . . | 7,500,000  |
| Chinese . . . | 3,000,000  |
| Various . . . | 1,300,000  |
| Total . . .   | 11,800,000 |

#### JAPAN

The tonnage of the merchant navy was as follows :—

| Year | Steam  | Sail   | Total   | Carrying Power |
|------|--------|--------|---------|----------------|
| 1878 | 44,000 | 20,000 | 64,000  | 196,000        |
| 1887 | 72,000 | 61,000 | 133,000 | 350,000        |

Port entries showed tonnage as follows :—

| Year       | Japanese | Foreign   | Total     |
|------------|----------|-----------|-----------|
| 1881 . . . | 130,000  | 470,000   | 600,000   |
| 1888 . . . | 230,000  | 1,100,000 | 1,330,000 |

Entries in 1888 were as follows :—

| Port           | Tons      | Flag           | Tons      |
|----------------|-----------|----------------|-----------|
| Nagasaki . . . | 640,000   | British . . .  | 590,000   |
| Yokohama . . . | 420,000   | German . . .   | 220,000   |
| Kobe . . .     | 260,000   | American . . . | 130,000   |
| Various . . .  | 10,000    | Various . . .  | 390,000   |
| Total . . .    | 1,330,000 | Total . . .    | 1,330,000 |

#### ALGERIA

In 1886 the port entries were as follows :—

| Flag          | Vessels | Tons      | Crew    |
|---------------|---------|-----------|---------|
| French . . .  | 2,001   | 1,170,000 | 63,300  |
| British . . . | 580     | 510,000   | 12,200  |
| Spanish . . . | 1,581   | 150,000   | 17,800  |
| Various . . . | 800     | 150,000   | 7,500   |
| Total . . .   | 4,962   | 1,980,000 | 100,800 |

In 1888 the entries reached 2,170,000 tons.

## SICKNESS

Neison and Finlayson (contributions to *Vital Statistics*) find that two persons are constantly sick for one death during the year. The Board of Health of Massachusetts finds that each inhabitant loses 13 days yearly by sickness. According to Dr. Farr at the State Congress of 1860, you may expect to find 2 per cent. of people aged 30, and 10 per cent. of those aged 75 constantly sick any day of the year. Sir William Wilde found 2½ per cent. of the people of Dublin confined to bed. International statistics of sickness are only to be found in the armies of the different powers. The following table, published in 1875, is for various years, showing the annual averages thus :—

|                     | Loss of Days<br>per Soldier | Men in Hos-<br>pital per 1000 | Invalided per<br>1000 |
|---------------------|-----------------------------|-------------------------------|-----------------------|
| British . . .       | 18                          | 50                            | 36                    |
| French . . .        | 18                          | 47                            | 7                     |
| German . . .        | 15                          | 41                            | 23                    |
| Austrian . . .      | 13                          | 36                            | 21                    |
| Italian . . .       | 15                          | 40                            | ...                   |
| Portuguese . . .    | 13                          | 34                            | ...                   |
| Belgian . . .       | 18                          | 51                            | 9                     |
| United States . . . | 21                          | 58                            | 25                    |
| Do. coloured . . .  | 19                          | 53                            | ...                   |
| Russian . . .       | 28                          | 78                            | ...                   |

In the Crimean war the hospital entries of British and French were :—

| Cause          | Number  |         | Ratio   |        |
|----------------|---------|---------|---------|--------|
|                | British | French  | British | French |
| Wounds . . .   | 18,300  | 116,000 | 11.3    | 26.7   |
| Fever, &c. . . | 144,400 | 320,000 | 88.7    | 73.3   |
| Total . . .    | 162,700 | 436,000 | 100.0   | 100.0  |

At the siege of Metz the French in hospital averaged 17,000 men, being more than 10 per cent. the garrison numbering 168,000. Towards the close of the siege, when the garrison was only 105,000, there were 21,000 in hospital.

In the American war of 1861-65, the Federal army enrolled 2,252,000 men, of whom 179,000 were coloured, and the average strength was 431,000 men : the average number in hospital was 37,000 or 9 per cent.

The following table shows the distribution of sickness according to months in various places as judged by hospital entries :—

|                 | Paris | Rome  | Algiers | Geneva |
|-----------------|-------|-------|---------|--------|
| January . . .   | 101   | 99    | 65      | 116    |
| February . . .  | 102   | 114   | 48      | 112    |
| March . . .     | 132   | 85    | 49      | 121    |
| April . . .     | 125   | 71    | 71      | 108    |
| May . . .       | 114   | 60    | 70      | 110    |
| June . . .      | 97    | 48    | 113     | 95     |
| July . . .      | 85    | 81    | 170     | 93     |
| August . . .    | 80    | 150   | 138     | 98     |
| September . . . | 102   | 139   | 134     | 89     |
| October . . .   | 91    | 121   | 164     | 83     |
| November . . .  | 86    | 128   | 107     | 88     |
| December . . .  | 85    | 104   | 71      | 87     |
| Year . . .      | 1,200 | 1,200 | 1,200   | 1,200  |

#### UNITED KINGDOM

Finklyson's tables as regards the sick ratios at various ages in England give the following results, that is, the percentage who become sick during the year, the duration

of sickness, and the loss in days on the whole number of workpeople at each age :—

| Age | Per Cent. Sick |         | Days of Illness |         | Loss of Days on Whole Number |         |
|-----|----------------|---------|-----------------|---------|------------------------------|---------|
|     | Indoor         | Outdoor | Indoor          | Outdoor | Indoor                       | Outdoor |
| 20  | 24.6           | 26.2    | 27              | 25      | 6.6                          | 7.0     |
| 25  | 22.5           | 23.7    | 29              | 28      | 6.4                          | 6.7     |
| 30  | 21.0           | 22.7    | 31              | 30      | 6.5                          | 6.8     |
| 35  | 21.2           | 22.3    | 32              | 31      | 6.8                          | 6.9     |
| 40  | 21.9           | 23.5    | 35              | 36      | 7.6                          | 8.0     |
| 45  | 22.8           | 23.7    | 39              | 39      | 8.9                          | 9.1     |
| 50  | 25.6           | 25.0    | 44              | 46      | 11.3                         | 11.3    |
| 55  | 28.5           | 26.5    | 52              | 47      | 14.9                         | 12.5    |
| 60  | 30.8           | 29.1    | 61              | 55      | 18.7                         | 16.5    |
| 65  | 35.5           | 32.5    | 75              | 70      | 26.6                         | 24.8    |

The ratio of sick has naturally declined with death-rate, the tables published in 1870 for England and Wales comparing with those of 1845 as follows :—

*Days of Sickness per Inhabitant.*

| Age        | Urban |      | Rural |      | All England |      | Scotland |
|------------|-------|------|-------|------|-------------|------|----------|
|            | 1845  | 1870 | 1845  | 1870 | 1845        | 1870 | 1845     |
|            |       |      |       |      |             |      |          |
| 21-30 . .  | 6.3   | 5.6  | 6.0   | 5.4  | 6.1         | 5.5  | 6.0      |
| 31-40 . .  | 11.4  | 7.1  | 6.4   | 7.1  | 8.9         | 7.1  | 6.2      |
| 41-50 . .  | 13.4  | 11.2 | 9.0   | 10.4 | 11.2        | 10.8 | 9.5      |
| 51-60 . .  | 23.2  | 20.3 | 17.8  | 20.1 | 20.5        | 20.2 | 19.9     |
| 40 years . | 13.8  | 11.1 | 9.8   | 10.7 | 11.7        | 10.9 | 10.4     |

The Census returns taken of sickness in Ireland show thus :—

| Diseases        | Sick per 10,000 Inhabitants |      |      |        |
|-----------------|-----------------------------|------|------|--------|
|                 | 1851                        | 1861 | 1871 | Medium |
| Zymotic . . .   | 53                          | 17   | 9    | 26     |
| Brain . . . .   | 37                          | 50   | 58   | 48     |
| Respiratory . . | 16                          | 16   | 17   | 16     |
| Various . . . . | 53                          | 48   | 48   | 50     |
| Total . . . .   | 159                         | 131  | 132  | 140    |

**FRANCE**

A report was published in 1856 showing the working during three years of friendly societies among workmen, that is, the percentage falling sick during the year, the duration of illness, and the loss in days on the whole number of workers of each age, viz. :—

| Age         | Sick Percentage | Days of Illness | Loss of Days on Whole Number |
|-------------|-----------------|-----------------|------------------------------|
| 16-35 . . . | 29.0            | 17              | 4.9                          |
| 36-55 . . . | 30.0            | 21              | 6.2                          |
| 56-75 . . . | 33.0            | 27              | 9.2                          |

Another report in 1886 for fifteen years gave the following averages, that is, the ratio falling sick during each year, and the average duration of illness :—

| Period         | Percentage Sick |       | Days of Illness |       |
|----------------|-----------------|-------|-----------------|-------|
|                | Men             | Women | Men             | Women |
| 1871-80 . . .  | 26.0            | 29.0  | 20              | 14    |
| 1881-85 . . .  | 26.0            | 27.0  | 18              | 13    |
| 15 years . . . | 26.0            | 28.3  | 19              | 13½   |

The number of convicts sent to hospital daily in ten years ending 1880, that is, the ratio per 100,000 of each class, was as follows :—

| Year in Prison     | Per 100,000 |        |
|--------------------|-------------|--------|
|                    | Male        | Female |
| First . . . . .    | 154         | 136    |
| Second . . . . .   | 170         | 154    |
| Third . . . . .    | 190         | 190    |
| Fourth . . . . .   | 220         | 172    |
| Fifth . . . . .    | 190         | 220    |
| Over fifth . . . . | 160         | 150    |

**GERMANY**

Mr. Heym's investigations during twenty years down to 1870 at Leipzig, resulted in the following percentage of persons sick during the year, the average length of illness, and the loss of days in each year from illness, to the whole population of each age :—

| Age               | Per Cent. Sick in Year |       | Days of Illness |       | Loss of Days in Whole Number |       |
|-------------------|------------------------|-------|-----------------|-------|------------------------------|-------|
|                   | Men                    | Women | Men             | Women | Men                          | Women |
| 15-24             | 26.5                   | 18.8  | 23              | 27    | 6.0                          | 5.1   |
| 25-34             | 21.4                   | 17.7  | 25              | 36    | 5.4                          | 6.4   |
| 35-44             | 22.0                   | 18.0  | 32              | 41    | 7.0                          | 7.4   |
| 45-54             | 21.4                   | 17.5  | 38              | 43    | 8.1                          | 7.6   |
| 55-64             | 26.5                   | 20.0  | 54              | 57    | 14.4                         | 14.6  |
| 65-74             | 32.7                   | 18.0  | 58              | 48    | 19.0                         | 8.6   |
| General average } | 22.1                   | 18.1  | 31              | 39    | 6.8                          | 8.7   |

The associated clubs of workmen and others in Germany showed the number of sick during the year and other particulars as follows :—

|                     | 1885      | 1886      |
|---------------------|-----------|-----------|
| Associates . . . .  | 4,294,000 | 4,570,000 |
| Sick in year . . .  | 1,805,000 | 1,713,000 |
| Constantly sick . . | 69,400    | 71,400    |

The loss by sickness was less than six days on the whole number, namely, 5.9 in 1885, and 5.7 in 1886, which is much less than the average in Dr. Heym's table; but his probably includes older people.

**SILK**

The consumption of silk and the approximate value of manufactures are shown as follows :—

|                   | Annual Average, Lbs. Silk |            | Value of Manufactures, £ |            |
|-------------------|---------------------------|------------|--------------------------|------------|
|                   | 1861-70                   | 1881-87    | 1861-70                  | 1881-87    |
| U. Kingdom        | 4,900,000                 | 3,200,000  | 9,600,000                | 6,400,000  |
| France . . . .    | 15,000,000                | 14,800,000 | 29,800,000               | 29,400,000 |
| Germany . . .     | 2,100,000                 | 6,800,000  | 4,100,000                | 14,500,000 |
| Russia . . . .    | 300,000                   | 900,000    | 600,000                  | 1,800,000  |
| Austria . . .     | 1,100,000                 | 1,800,000  | 2,000,000                | 3,700,000  |
| Italy . . . .     | 1,000,000                 | 800,000    | 2,100,000                | 1,600,000  |

| Switzerland       | 1,600,000                 | 3,100,000  | 3,300,000                | 6,000,000  |
| Europe . . . .    | 26,300,000                | 32,000,000 | 52,100,000               | 64,600,000 |
| U. States . . .   | 1,200,000                 | 3,500,000  | 2,500,000                | 7,200,000  |
| China . . . .     | 12,000,000                | 12,000,000 | 18,000,000               | 18,000,000 |
| Japan . . . .     | 3,300,000                 | 3,300,000  | 7,000,000                | 6,000,000  |
| Other countries } | 1,200,000                 | 1,200,000  | 2,400,000                | 2,200,000  |
| Total . . . .     | 44,000,000                | 52,000,000 | 82,000,000               | 98,000,000 |

The annual production is estimated at 300,000 tons of cocoons or 52,000,000 lbs. raw silk, viz. :—

|                             | Lbs.              |
|-----------------------------|-------------------|
| China . . . . .             | 21,000,000        |
| Japan . . . . .             | 6,800,000         |
| Italy . . . . .             | 10,600,000        |
| France, Turkey, &c. . . . . | 13,600,000        |
| <b>Total . . . . .</b>      | <b>52,000,000</b> |

#### UNITED KINGDOM

Silk has been manufactured since the time of Edward III., the industry having been introduced by some French prisoners after the battle of Crecy. The consumption of raw silk since 1770 has been as follows :—

| Period            | Lbs. per Annum | Value of Manufactures, £ |
|-------------------|----------------|--------------------------|
| 1770-90 . . . . . | 790,000        | 3,400,000                |
| 1800-20 . . . . . | 1,280,000      | 4,500,000                |
| 1830-50 . . . . . | 5,500,000      | 10,800,000               |
| 1851-60 . . . . . | 6,100,000      | 11,500,000               |
| 1861-70 . . . . . | 4,900,000      | 9,600,000                |
| 1871-80 . . . . . | 3,500,000      | 7,100,000                |
| 1881-88 . . . . . | 3,200,000      | 6,400,000                |

The imports and exports of silk manufactures were as follows :—

| Year           | Imports, £ | Exports, £ | Surplus Imports, £ |
|----------------|------------|------------|--------------------|
| 1854 . . . . . | 2,280,000  | 1,440,000  | 840,000            |
| 1860 . . . . . | 3,200,000  | 1,690,000  | 1,510,000          |
| 1870 . . . . . | 15,250,000 | 1,700,000  | 13,550,000         |
| 1880 . . . . . | 13,320,000 | 2,300,000  | 11,020,000         |
| 1888 . . . . . | 10,470,000 | 3,400,000  | 7,070,000          |

The value of silk goods consumed in thirty-five years was as follows :—

| Period             | Millions £ Sterling Aggregate |         |       | Shillings Yearly per Inhabitant |
|--------------------|-------------------------------|---------|-------|---------------------------------|
|                    | British                       | Foreign | Total |                                 |
| 1854-60 . . . . .  | 70                            | 18      | 88    | 10                              |
| 1861-70 . . . . .  | 79                            | 91      | 170   | 11                              |
| 1871-80 . . . . .  | 51                            | 114     | 165   | 10                              |
| 1881-88 . . . . .  | 32                            | 88      | 120   | 8                               |
| 35 years . . . . . | 232                           | 311     | 543   | ...                             |

The balance-sheet since 1840 shows the silk industry thus :—

| Period             | Millions £ Sterling |              |            |
|--------------------|---------------------|--------------|------------|
|                    | Raw Silk            | Manufactures | Net Result |
| 1841-50 . . . . .  | 65                  | 108          | 43         |
| 1851-60 . . . . .  | 68                  | 115          | 47         |
| 1861-70 . . . . .  | 55                  | 96           | 41         |
| 1871-80 . . . . .  | 32                  | 71           | 39         |
| 1881-88 . . . . .  | 18                  | 50           | 32         |
| 48 years . . . . . | 238                 | 440          | 202        |

The silk-factories of the United Kingdom were as follows :—

| Year           | Factories | Operatives | Spindles  | Looms  |
|----------------|-----------|------------|-----------|--------|
| 1838 . . . . . | 268       | 34,000     | ...       | ...    |
| 1856 . . . . . | ...       | 56,000     | ...       | 8,000  |
| 1870 . . . . . | 696       | 48,000     | 1,130,000 | 12,400 |
| 1885 . . . . . | 691       | 43,000     | 1,060,000 | 12,000 |

The Census returns show still more emphatically the decline of this industry, viz. :—

#### Silk Operatives in England and Wales

| Year           | Number  | Year           | Number |
|----------------|---------|----------------|--------|
| 1841 . . . . . | 54,000  | 1871 . . . . . | 77,000 |
| 1851 . . . . . | 117,000 | 1881 . . . . . | 64,000 |

The use of silk decreases notwithstanding the increase of wealth.

#### FRANCE

The consumption of silk has been approximately as follows :—

| Period            | Raw Silk, Lbs. Yearly |            |            | Value of Manufactures, £ |
|-------------------|-----------------------|------------|------------|--------------------------|
|                   | French                | Imported   | Total      |                          |
| 1830-32 . . . . . | 1,620,000             | 1,140,000  | 2,760,000  | 5,200,000                |
| 1842-46 . . . . . | 2,770,000             | 4,070,000  | 6,840,000  | 12,700,000               |
| 1850-52 . . . . . | 3,830,000             | 6,370,000  | 10,200,000 | 18,200,000               |
| 1868-73 . . . . . | 1,200,000             | 15,400,000 | 16,600,000 | 34,600,000               |
| 1881-87 . . . . . | 1,200,000             | 13,600,000 | 14,800,000 | 29,400,000               |

The output of the factories was approximately as follows :—

| Period             | Millions £ Sterling Aggregate |          |       |
|--------------------|-------------------------------|----------|-------|
|                    | Exported                      | Home Use | Total |
| 1831-40 . . . . .  | 33                            | 47       | 80    |
| 1841-50 . . . . .  | 70                            | 70       | 140   |
| 1851-60 . . . . .  | 110                           | 90       | 200   |
| 1861-70 . . . . .  | 168                           | 130      | 298   |
| 1871-80 . . . . .  | 138                           | 150      | 288   |
| 1881-87 . . . . .  | 70                            | 136      | 206   |
| 57 years . . . . . | 589                           | 623      | 1,212 |

The value of silk manufactures consumed in France was approximately as follows :—

| Period             | Millions £ Sterling Aggregate |          |       | Shillings Yearly per Inhabitant |
|--------------------|-------------------------------|----------|-------|---------------------------------|
|                    | French                        | Imported | Total |                                 |
| 1831-40 . . . . .  | 47                            | ...      | 47    | 3                               |
| 1841-50 . . . . .  | 70                            | ...      | 70    | 4                               |
| 1851-60 . . . . .  | 90                            | ...      | 90    | 5                               |
| 1861-70 . . . . .  | 130                           | 10       | 140   | 8                               |
| 1871-80 . . . . .  | 150                           | 15       | 165   | 9                               |
| 1881-87 . . . . .  | 136                           | 14       | 150   | 11                              |
| 57 years . . . . . | 623                           | 39       | 662   | ...                             |

About the year 1620 the mulberry tree was first cultivated for the rearing of silkworms, and in 1780 the cocoons weighed 6600 tons, valued at £660,000 sterling. The farmers have recently been cutting down the mulberry trees for fuel, as the following table shows :—

| Year           | Mulberry Trees | Cocoons, Tons | Lbs. Silk Produced |
|----------------|----------------|---------------|--------------------|
| 1810 . . . . . | ...            | 3,900         | 770,000            |
| 1820 . . . . . | 9,632,000      | 5,230         | 1,010,000          |
| 1835 . . . . . | 14,880,000     | 9,010         | 1,950,000          |
| 1853 . . . . . | ...            | 26,100        | 4,300,000          |
| 1884 . . . . . | 6,100,000      | 9,700         | 1,600,000          |

The price of cocoons was 1s. per lb. in the 18th century, and rose to 2s. about 1850. A few years later a disease carried off two-thirds of the silkworms, which were badly housed and overcrowded, causing the cocoons to rise to 4s.; but the price fell owing to large importations, and is now hardly remunerative. In 1884 the total yield of cocoons sold for £1,500,000, and was divided among 141,400 cultivators, giving a little over £10 to each.

The balance-sheet of the silk industry since 1830 was approximately as follows :—

| Period         | Millions £ Sterling Aggregate |              |            |
|----------------|-------------------------------|--------------|------------|
|                | Raw Silk                      | Manufactures | Net Result |
| 1831-40 . . .  | 48                            | 80           | 32         |
| 1841-50 . . .  | 86                            | 140          | 54         |
| 1851-60 . . .  | 120                           | 200          | 80         |
| 1861-70 . . .  | 166                           | 298          | 132        |
| 1871-80 . . .  | 125                           | 288          | 163        |
| 1881-87 . . .  | 72                            | 206          | 134        |
| 57 years . . . | 617                           | 1,212        | 595        |

In the 18th century Lyons counted 15,000 silk-factories, but the industry suffered so much during the Revolution that in 1800 there were only 3500 left. It revived in later years, Lyons consuming one-sixth of the silk crop of the world, or 50,000 tons of cocoons, one-half of which was imported from Italy until the recent rupture of commercial relations. In 1840 the silk-factories had 1790 steam-engines, of 36,000 aggregate horse-power. In 1866 France had 1172 mills, with 110,000 operatives, 1,080,000 spindles, and 50,000 power-loom, turning out silks to the value of 29 millions sterling.

#### GERMANY

In 1800 Oddy valued the silk manufactures of Prussia at £700,000 a year, and in 1840 the factories had 14,000 operatives with 12,000 looms, consuming 700,000 lbs. of raw silk per annum, the output being valued at £1,600,000 sterling. The consumption of raw silk in all Germany was approximately as follows :—

| Period        | Lbs. Yearly | Value of Manufactures, £ |
|---------------|-------------|--------------------------|
| 1841-50 . . . | 1,100,000   | 2,200,000                |
| 1851-60 . . . | 1,500,000   | 3,000,000                |
| 1861-70 . . . | 2,100,000   | 4,100,000                |
| 1871-80 . . . | 4,200,000   | 8,500,000                |
| 1881-87 . . . | 6,800,000   | 14,500,000               |

The consumption and export were approximately thus :—

| Period        | Average per Annum |             |             |
|---------------|-------------------|-------------|-------------|
|               | Home Use          | Exported    | Total Make  |
| 1873-80 . . . | £ 4,900,000       | £ 3,600,000 | £ 8,500,000 |
| 1881-87 . . . | 5,800,000         | 8,700,000   | 14,500,000  |

The balance-sheet of the industry was approximately as follows :—

| Period         | Millions £ Sterling Aggregate |              |            |
|----------------|-------------------------------|--------------|------------|
|                | Raw Silk                      | Manufactures | Net Result |
| 1841-50 . . .  | 13                            | 22           | 9          |
| 1851-60 . . .  | 18                            | 30           | 12         |
| 1861-70 . . .  | 23                            | 41           | 18         |
| 1871-80 . . .  | 40                            | 85           | 45         |
| 1881-87 . . .  | 38                            | 102          | 64         |
| 47 years . . . | 132                           | 280          | 148        |

In 1884 the silk-factories counted 87,000 operatives, the chief seat of this industry being Crefeld, in Prussia.

#### RUSSIA

In 1828 Schubert found 184 silk-factories, the output of which he estimated much too high, at £800,000. In

1864 Buschen counted 326 factories, with 9000 operatives. The consumption of silk was as follows :—

| Period        | Lbs.    | Value of Manufactures, £ |
|---------------|---------|--------------------------|
| 1861-70 . . . | 330,000 | 600,000                  |
| 1871-80 . . . | 580,000 | 1,200,000                |
| 1881-87 . . . | 900,000 | 1,800,000                |

The consumption of silk manufactures was as follows :—

| Period        | Yearly Average |           |             | Pence per inhabitant |
|---------------|----------------|-----------|-------------|----------------------|
|               | Russian        | Imported  | Total       |                      |
| 1861-70 . . . | £ 600,000      | £ 500,000 | £ 1,100,000 | 4                    |
| 1871-80 . . . | 1,200,000      | 400,000   | 1,600,000   | 5                    |
| 1881-87 . . . | 1,800,000      | 200,000   | 2,000,000   | 6                    |

The balance-sheet of the industry was approximately as follows :—

| Period         | Millions £ Sterling Aggregate |              |            |
|----------------|-------------------------------|--------------|------------|
|                | Raw Silk                      | Manufactures | Net Result |
| 1861-70 . . .  | 4                             | 6            | 2          |
| 1871-80 . . .  | 6                             | 12           | 6          |
| 1881-87 . . .  | 5                             | 13           | 8          |
| 27 years . . . | 15                            | 31           | 16         |

According to the *Bulletin Statistique* for 1884, Russia had 20,000 operatives engaged in silk-factories, turning out goods to the value of three millions sterling per annum; but this estimate is too high; probably paper roubles were mistaken for silver.

#### AUSTRIA

In 1834 the Empire counted 3990 silk-factories, with 160,000 operatives, producing manufactures worth £3,000,000 per annum; but this included the Italian provinces. The consumption of silk since 1860 has been as follows :—

| Period        | Lbs. Yearly |         |           | Value of Manufactures, £ |
|---------------|-------------|---------|-----------|--------------------------|
|               | Imported    | Native  | Total     |                          |
| 1861-70 . . . | 800,000     | 300,000 | 1,100,000 | 2,000,000                |
| 1871-80 . . . | 1,100,000   | 300,000 | 1,400,000 | 2,800,000                |
| 1881-87 . . . | 1,540,000   | 300,000 | 1,840,000 | 3,700,000                |

The consumption of silk manufactures was as follows :—

| Period        | Yearly Average, £ |           |           | Pence per inhabitant |
|---------------|-------------------|-----------|-----------|----------------------|
|               | Austrian          | Imported  | Total     |                      |
| 1861-70 . . . | 2,000,000         | 300,000   | 2,300,000 | 17                   |
| 1871-80 . . . | 2,800,000         | 1,100,000 | 3,900,000 | 26                   |
| 1881-87 . . . | 3,700,000         | 300,000   | 4,000,000 | 25                   |

The balance-sheet of the industry may be summed up thus :—

| Period         | Millions £ Aggregate |              |       |
|----------------|----------------------|--------------|-------|
|                | Raw Silk             | Manufactures | Total |
| 1861-70 . . .  | 11                   | 20           | 9     |
| 1871-80 . . .  | 14                   | 28           | 14    |
| 1881-87 . . .  | 10                   | 26           | 16    |
| 27 years . . . | 35                   | 74           | 39    |

In 1884 the factories had 15,000 operatives engaged in this industry.

## ITALY

Silk is one of the most valuable of Italian products, the exportation averaging 10 millions sterling per annum. Lombardy is the chief seat of silk-growing, and until recently 90 per cent. of the quantity was from Japanese eggs imported on cards from Japan. These cards are worth 7s. per ounce, or £12,000 a ton, about ten tons being now imported yearly. Formerly the eggs yielded 50 lbs. cocoons per ounce, but latterly only 35 lbs., representing a value of 50s., or seven times the original cost of the eggs. The province of Lombardy raises yearly 11,000 tons of cocoons, worth £200 a ton.

There are factories for throwing silk at Milan and Turin, and some of the fibre is consumed at home for velvets and damasks, but the greatest part is usually exported to France for the Lyons factories. The production and export of silk approximated yearly as follows:—

| Period        | Production, Lbs. | Export, Lbs. | Home Use, Lbs. |
|---------------|------------------|--------------|----------------|
| 1861-70 . . . | 5,600,000        | 4,600,000    | 1,000,000      |
| 1871-80 . . . | 7,400,000        | 6,600,000    | 800,000        |
| 1881-87 . . . | 10,600,000       | 9,800,000    | 800,000        |

The import and export of manufactured silks were as follows:—

| Period        | Yearly Average |           |                    |
|---------------|----------------|-----------|--------------------|
|               | Import, £      | Export, £ | Surplus Imports, £ |
| 1861-70 . . . | 400,000        | 220,000   | 180,000            |
| 1871-80 . . . | 880,000        | 600,000   | 280,000            |
| 1881-87 . . . | 960,000        | 600,000   | 360,000            |

The consumption of silk manufactures was as follows:—

| Period        | Yearly Average |           |             | Pence per Inhabitant |
|---------------|----------------|-----------|-------------|----------------------|
|               | Italian        | Imported  | Total       |                      |
| 1861-70 . . . | £ 2,000,000    | £ 180,000 | £ 2,180,000 | 23                   |
| 1871-80 . . . | £ 1,600,000    | £ 280,000 | £ 1,880,000 | 20                   |
| 1881-87 . . . | £ 1,600,000    | £ 360,000 | £ 1,960,000 | 18                   |

The value of silk industry to Italy may be summed up thus:—

| Period         | Millions £ Sterling Aggregate |               |              |               |             |             |
|----------------|-------------------------------|---------------|--------------|---------------|-------------|-------------|
|                | Cost of Japan Eggs            | Silk Exported | Manufactures | Total Product | Deduct Eggs | Net Product |
| 1861-70 . . .  | 10                            | 84            | 20           | 104           | 10          | 94          |
| 1871-80 . . .  | 8                             | 122           | 16           | 138           | 8           | 130         |
| 1881-87 . . .  | 2                             | 80            | 11           | 91            | 2           | 89          |
| 27 years . . . | 20                            | 286           | 47           | 333           | 20          | 313         |

In 1878 Italy had 2030 silk-factories, with 2,100,000 spindles, giving employment to 16,000 men; there were also 120,000 women and 76,000 children engaged in attending to the silk-worms.

In 1840 the kingdom of Sardinia had several silk-factories, with an aggregate of 14,900 operatives. The cocoon crop of Italy for the years 1881-88 averaged 86 million pounds.

## SPAIN

Silk manufacture flourished under the Moors for some centuries before the industry was known in France. It

even survived their expulsion, for Seville had 16,000 silk-loom in 1550, but a hundred years later there were only sixty. Coming down to our own time, we find that in 1870 Spain had silk-factories with an aggregate of 3000 looms and 9000 operatives; the number of the latter in 1884 was only 8000, and the output was valued at £1,000,000 in the *Bulletin Statistique*, although Spanish writers (prone to exaggerate) claim a value of £2,800,000 sterling. The silkworm thrives in the south, the production of native silk averaging 300,000 lbs. yearly.

The consumption in the factories averaged as follows:—

| Period        | Silk, Lbs. Yearly |          |         | Value of Manufactures, £ |
|---------------|-------------------|----------|---------|--------------------------|
|               | Spanish           | Imported | Total   |                          |
| 1861-70 . . . | 300,000           | ...      | 300,000 | 600,000                  |
| 1871-80 . . . | 300,000           | 140,000  | 440,000 | 900,000                  |
| 1881-87 . . . | 300,000           | 290,000  | 590,000 | 1,200,000                |

The consumption of silk manufactures was as follows:—

| Period        | Yearly Average |           |             | Pence per Inhabitant |
|---------------|----------------|-----------|-------------|----------------------|
|               | Spanish        | Imported  | Total       |                      |
| 1861-70 . . . | £ 600,000      | £ 300,000 | £ 900,000   | 15                   |
| 1871-80 . . . | £ 900,000      | £ 200,000 | £ 1,100,000 | 17                   |
| 1881-87 . . . | £ 1,200,000    | £ 400,000 | £ 1,600,000 | 22                   |

The balance-sheet of the industry was approximately as follows:—

| Period         | Millions £ Aggregate |              |             |
|----------------|----------------------|--------------|-------------|
|                | Raw Silk             | Manufactures | Net Product |
| 1861-70 . . .  | 3                    | 6            | 3           |
| 1871-80 . . .  | 4                    | 9            | 5           |
| 1881-87 . . .  | 3                    | 8            | 5           |
| 27 years . . . | 10                   | 23           | 13          |

## BELGIUM

Silk manufacture is declining, the average consumption since 1880 being only 400,000 lbs. raw silk yearly, and the output of the mills £800,000. Belgium, moreover, consumes imported silk goods to the value of £400,000 a year.

## SWITZERLAND

Silk manufacture holds the foremost rank in Switzerland, the output averaging six millions sterling, nearly all of which is exported.

## UNITED STATES

The Census returns show as follows:—

| Year | Factories | Operatives | Capital, £ | Manufactures, £ |
|------|-----------|------------|------------|-----------------|
| 1850 | 67        | 2,000      | 200,000    | 400,000         |
| 1870 | 86        | 7,000      | 1,000,000  | 2,000,000       |
| 1880 | 322       | 31,000     | 4,000,000  | 7,300,000       |

The consumption of silk was as follows:—

| Period        | Lbs. Yearly | Value of Textures, £ |
|---------------|-------------|----------------------|
| 1861-70 . . . | 1,200,000   | 2,500,000            |
| 1871-80 . . . | 1,400,000   | 3,000,000            |
| 1881-87 . . . | 3,500,000   | 7,200,000            |

The value of all silk manufactures consumed was :—

| Period  | Yearly Average |                |            | Shillings<br>per<br>Inhabitant |
|---------|----------------|----------------|------------|--------------------------------|
|         | American,<br>£ | Imported,<br>£ | Total, £   |                                |
| 1861-70 | 2,500,000      | 3,100,000      | 5,600,000  | 3                              |
| 1871-80 | 3,000,000      | 5,100,000      | 8,100,000  | 4                              |
| 1881-87 | 7,200,000      | 6,800,000      | 14,000,000 | 5                              |

The balance-sheet was approximately as follows :—

| Period         | Millions £ Aggregate |              |            |
|----------------|----------------------|--------------|------------|
|                | Raw Silk             | Manufactures | Net Result |
| 1861-70 . . .  | 14                   | 25           | 11         |
| 1871-80 . . .  | 15                   | 30           | 15         |
| 1881-87 . . .  | 20                   | 50           | 30         |
| 27 years . . . | 49                   | 105          | 56         |

#### CHINA

Silk is known to have been cultivated for 3000 years, the best coming from the province of Kwantung. The ordinary crop is 21,000,000 lbs., of which 60 per cent. is consumed in China. The quantities exported have been :—

| Period        | Annual Average, Lbs. |
|---------------|----------------------|
| 1873-80 . . . | 9,300,000            |
| 1881-87 . . . | 8,100,000            |

The values of all silk exports have been as follows :—

| Period        | Raw Silk  | Manufactures | Total     |
|---------------|-----------|--------------|-----------|
|               | £ Yearly  | £ Yearly     | £ Yearly  |
| 1873-80 . . . | 3,900,000 | 700,000      | 4,600,000 |
| 1881-87 . . . | 3,100,000 | 800,000      | 3,900,000 |

About 60 per cent. of the raw silk exported is from Shanghai, and 50 per cent. of manufactured silks from Canton.

#### JAPAN

Official returns for the years 1884-87 show an average production of 6,800,000 lbs. raw silk, disposed of in this manner :—

|                        | Lbs.      | Value, £  |
|------------------------|-----------|-----------|
| Home manufacture . . . | 3,300,000 | 6,000,000 |
| Exported raw . . .     | 3,500,000 | 2,400,000 |
| Total . . .            | 6,800,000 | 8,400,000 |

Of the silk goods manufactured in the country, about £250,000 worth is exported yearly, the rest consumed in Japan.

#### TURKEY

The annual production of silk averages about 1,200,000 lbs., of which five-sixths are exported.

The value of silk and cocoons exported in 1888 was £1,100,000 sterling. Local manufactures probably attain a value of £350,000 per annum.

#### INDIA

The imports and exports of raw silk have been :—

| Period        | Annual Average, Lbs. |           |                 |                 |
|---------------|----------------------|-----------|-----------------|-----------------|
|               | Imports              | Exports   | Surplus Imports | Surplus Exports |
| 1867-70 . . . | 1,800,000            | 2,300,000 | ...             | 500,000         |
| 1871-75 . . . | 2,100,000            | 2,200,000 | ...             | 100,000         |
| 1876-80 . . . | 2,000,000            | 1,600,000 | 400,000         | ...             |
| 1881-88 . . . | 2,100,000            | 1,600,000 | 500,000         | ...             |

The value of silk manufactures imported and exported was as follows :—

| Period        | Annual Average |         |                    |
|---------------|----------------|---------|--------------------|
|               | Imports, £     | Exports | Surplus Imports, £ |
| 1867-70 . . . | 450,000        | 120,000 | 330,000            |
| 1871-80 . . . | 600,000        | 210,000 | 450,000            |
| 1881-88 . . . | 1,300,000      | 320,000 | 980,000            |

The value of Indian silk manufactures is unknown.

#### SLAVERY

In ancient Greece and Rome the ordinary wages of a slave and his market value were as follows :—

##### GREECE

|                | Day's Wage,<br>Pence | Value,<br>£ |
|----------------|----------------------|-------------|
| Labourer . . . | 6                    | 56          |
| Farmer . . .   | 10                   | 103         |
| Cutler . . .   | 8                    | 77          |
| Boatman . . .  | 6                    | 60          |

##### ROME

|                  | Day's Wage,<br>Pence | Value,<br>£ |
|------------------|----------------------|-------------|
| Gardener . . .   | 8                    | 65          |
| Carpenter . . .  | 20                   | 148         |
| Blacksmith . . . | 20                   | 145         |
| Shepherd . . .   | 6                    | 51          |
| Baker . . .      | 19                   | 140         |
| Cook . . .       | ...                  | 430         |
| Actress . . .    | ...                  | 820         |
| Physician . . .  | ...                  | 1,100       |

Some of the wealthy Romans had 10,000 slaves. After great victories they could often be bought for a few shillings on the battle-field.

#### SLAVE-TRADE

The *Journal des Economistes* gives the following table of the number of slaves shipped from Africa in sixty years ending 1847 :—

| Period          | Shipped   | Died    | Landed in America |
|-----------------|-----------|---------|-------------------|
| 1788-98 . . .   | 100,000   | 14,000  | 86,000            |
| 1798-1805 . . . | 85,000    | 12,000  | 73,000            |
| 1805-15 . . .   | 178,000   | 25,000  | 153,000           |
| 1815-30 . . .   | 441,000   | 110,000 | 331,000           |
| 1830-40 . . .   | 214,000   | 54,000  | 160,000           |
| 1840-47 . . .   | 444,000   | 112,000 | 332,000           |
| 60 years . . .  | 1,462,000 | 327,000 | 1,135,000         |

About 22 per cent. perished on the voyage.

There are no records of the number of slaves carried by English and other dealers in the 16th, 17th, and 18th centuries to America, but it is believed to exceed 3,000,000, the Treaty of Utrecht securing great advantages in 1713 to the British flag in this trade. The records for the year 1787 showed the number of African slaves landed alive in America as follows :—

| Carried by            | Number |
|-----------------------|--------|
| British . . .         | 38,000 |
| French . . .          | 31,000 |
| Portuguese . . .      | 25,000 |
| Dutch, Danes, &c. . . | 6,500  |

Total . . . 100,500

The Danes were the first to abolish slavery in their West Indian islands. The emancipation of slaves in the

British West Indies and other colonies in 1834 gave liberty to 780,000, viz. :—

|                   | Number  | Indemnity, £ | Per Head, £ |
|-------------------|---------|--------------|-------------|
| Jamaica . . . .   | 311,700 | 6,152,000    | 20          |
| Barbadoes . . .   | 83,000  | 1,721,000    | 21          |
| Trinidad . . . .  | 22,300  | 1,039,000    | 50          |
| Antigua, &c. . .  | 172,093 | 3,421,000    | 20          |
| Guyana . . . . .  | 84,900  | 4,297,000    | 53          |
| Mauritius . . . . | 68,600  | 2,113,000    | 31          |
| Cape of Good Hope | 38,400  | 1,247,000    | 33          |
| Total . . . . .   | 780,993 | 20,000,000   | 26          |

The difference paid per head in the above colonies is very remarkable.

The French freed their West Indian slaves in 1848, the Dutch in 1863, the latter emancipating 46,000 at £32 per head paid to their masters.

Slavery was abolished in the United States in 1861, the number of slaves in that country having been as follows :—

| Year           | Number    | Year           | Number    |
|----------------|-----------|----------------|-----------|
| 1790 . . . . . | 697,900   | 1830 . . . . . | 2,009,030 |
| 1800 . . . . . | 893,040   | 1840 . . . . . | 2,487,500 |
| 1810 . . . . . | 1,191,400 | 1850 . . . . . | 3,204,300 |
| 1820 . . . . . | 1,538,100 | 1860 . . . . . | 3,979,700 |

The number of slaves in the several States was as follows :—

|                     | 1790    | 1820      | 1840      |
|---------------------|---------|-----------|-----------|
| Virginia . . . .    | 293,000 | 425,000   | 449,000   |
| South Carolina .    | 107,000 | 258,000   | 327,000   |
| North Carolina .    | 101,000 | 205,000   | 246,000   |
| Maryland . . . .    | 103,000 | 107,000   | 90,000    |
| Georgia . . . . .   | 29,000  | 150,000   | 281,000   |
| Kentucky . . . .    | 11,000  | 127,000   | 182,000   |
| Tennessee . . . .   | ...     | 80,000    | 183,000   |
| Louisiana . . . .   | ...     | 69,000    | 168,000   |
| Alabama . . . . .   | ...     | 47,000    | 254,000   |
| Mississippi . . . . | ...     | 33,000    | 195,000   |
| Various . . . . .   | 54,000  | 37,000    | 111,000   |
| Total . . . . .     | 698,000 | 1,538,000 | 2,486,000 |

The proportion of slaves in the total coloured population was as follows :—

| Year           | Coloured Population | Slaves    | Slave Ratio per Cent. |
|----------------|---------------------|-----------|-----------------------|
| 1790 . . . . . | 757,000             | 608,000   | 92                    |
| 1820 . . . . . | 1,772,000           | 1,538,000 | 86                    |
| 1840 . . . . . | 2,874,000           | 2,486,000 | 87                    |
| 1850 . . . . . | 3,639,000           | 3,204,000 | 88                    |
| 1860 . . . . . | 4,486,000           | 3,980,000 | 89                    |

The slave ratio was steadily increasing for forty years until the war of emancipation in 1860, which (besides 655,000 men killed) cost an outlay of 555 millions sterling, equal to £140 per slave. In the French island of Guadeloupe slaves formed two-thirds of the population just before the emancipation in 1848, viz. :—

|                  | 1781   | 1833    | 1847    |
|------------------|--------|---------|---------|
| Free . . . . .   | 14,800 | 23,800  | 38,800  |
| Slaves . . . . . | 83,900 | 98,600  | 91,500  |
| Total . . . . .  | 98,700 | 122,400 | 130,300 |

From 1833 to 1847 the masters had voluntarily manumitted 18,600 slaves, being at the rate of 4 per cent. male, and 7 per cent. female slaves yearly. The annual

birth-rate and death-rate of slaves per 1000 compared with that of the French settlers thus :—

|                          | French Settlers | Slaves |
|--------------------------|-----------------|--------|
| Birth-rate . . . .       | 33.2            | 24.9   |
| Death-rate . . . .       | 31.4            | 23.6   |
| Increase of population . | 1.8             | 1.3    |

Slavery was abolished in Cuba in 1880, in Brazil in 1889. In the latter country, by a previous enumeration, there were found to be 805,000 male and 706,000 female slaves, held by 41,000 owners, the average price being from £80 to £100.

### Serfs

The condition of European serfs was a mild form of slavery. In the 18th century Danish noblemen gave their coachmen permission to flog women; the peasants were bought and sold with the estates like cattle. As regards other countries, the conditions, &c., may be summed up thus :—

### AUSTRIA

In 1840 the value of servitude to the nobility was estimated at £51,200,000 a year thus :—

|                                     | Value, £   |
|-------------------------------------|------------|
| Labour (two days per week) . . . .  | 35,000,000 |
| Tithe of crops, &c. . . . .         | 12,000,000 |
| Male tribute, timber . . . . .      | 1,400,000  |
| Female tribute, spun wool . . . . . | 1,800,000  |
| Fowls, eggs, butter . . . . .       | 1,000,000  |

51,200,000

There were 7,000,000 serfs. Some Bohemian nobles had as many as 10,000. The redemption was effected by giving the nobles 5 per cent. Government scrip, and land then rose 50 per cent. in value.

### GERMANY

In 1848 the State took 60 million acres from the nobles, leaving them still 25 million acres, and gave the former among the serfs. Indemnity as follows :—

1. Government scrip, £180 for each serf family, to nobleman.
2. Land-tax, £3 per annum, transferred to peasant.
3. Interest, £7 per annum for forty-seven years, to be paid by peasant to the State, being 4 per cent. on cost of redemption.

### FRANCE

The Corvée, which prevailed during the Middle Ages, was as follows :—

Each man gave one day's work with a waggon, or two days if he had no waggon, yearly, unpaid, to the State; each woman one day. The man could commute by paying 2s., the woman 1s.

### RUSSIA

Previous to the emancipation of 1861 the number of serfs was as follows :—

|                    | Male       | Female     | Total      |
|--------------------|------------|------------|------------|
| Crown serfs . . .  | 11,168,000 | 11,683,000 | 22,851,000 |
| Appanage . . . .   | 1,624,000  | 1,702,000  | 3,326,000  |
| Held by nobles . . | 10,674,000 | 11,081,000 | 21,755,000 |
| Total . . . . .    | 23,466,000 | 24,466,000 | 47,932,000 |

There were 103,000 noblemen holding 22 million serfs in this manner :—

| Nobles            | Serfs      | Average |
|-------------------|------------|---------|
| 23,100 . . . . .  | 18,575,000 | 802     |
| 36,150 . . . . .  | 2,520,000  | 70      |
| 43,800 . . . . .  | 660,000    | 15      |
| 103,050 . . . . . | 21,755,000 | 211     |

The cost of emancipating these serfs was 65 millions sterling, but as the nobles had already mortgaged them up to 30 millions sterling in the Imperial Bank, the Government deducted this sum. The account was made up thus :—

|                              |                   |
|------------------------------|-------------------|
|                              | £                 |
| Mortgages remitted . . . . . | 30,400,000        |
| Russian stock . . . . .      | 20,230,000        |
| Paid by serfs . . . . .      | 10,470,000        |
| Balance due . . . . .        | 3,900,000         |
| <b>Total . . . . .</b>       | <b>65,000,000</b> |

The lands are mortgaged to the State until 1912 as security for the advances by Government, viz., £50,630,000 sterling. In 1879 the serfs were holders of 186 millions acres, viz. :—

| Title                  | Holders           | Acres              |
|------------------------|-------------------|--------------------|
| Crown-gift . . . . .   | 6,117,000         | 84,200,000         |
| Appanage . . . . .     | 1,625,000         | 30,200,000         |
| Purchase . . . . .     | 10,137,000        | 65,500,000         |
| Beggar-lots . . . . .  | 1,840,000         | 6,440,000          |
| <b>Total . . . . .</b> | <b>19,719,000</b> | <b>186,340,000</b> |

In return for crown-gift the holders have to pay 50 per cent. extra poll-tax till 1902. Beggar-lots are lands given gratis by the nobles to the peasants, rather than sell farm-lots at £1 per acre to them.

#### ROUMANIA

The emancipation law of 1870 compelled the Boyars either to give the peasant half his farm gratis or to sell the whole at 26s. per acre: 400 Boyars preferred the former. Previously the conditions of servitude were: to work twelve days in the year for the Boyar, to give him one-tenth of the crops, and to buy groceries at the Boyar's store.

#### EGYPT

Corvée, or compulsory labour, was imposed in 1883 on 202,000 Fellahs, who had to work 100 days unpaid, and in 1888 on 59,000 for the same term.

#### SMUGGLERS

In 1830 there were 100,000 contrabandistas in Spain, without counting their wives, &c., the total of persons living by smuggling being calculated at 300,000.

#### SOAP

The production and consumption in the United Kingdom were approximately as follows, the exact consumption not being known since 1853, when the duty was abolished :—

| Year           | Million Lbs.     |                  |        | Consumption per Inhabitant, Lbs. | Duty per Ton | Price per Ton |
|----------------|------------------|------------------|--------|----------------------------------|--------------|---------------|
|                | Manufac-<br>ture | Consump-<br>tion | Export |                                  |              |               |
| 1791 . . . . . | 48               | 46               | 2      | 3.1                              | £21          | £76           |
| 1801 . . . . . | 57               | 54               | 3      | 3.6                              | 21           | 74            |
| 1811 . . . . . | 76               | 73               | 3      | 4.2                              | 21           | 73            |
| 1821 . . . . . | 98               | 94               | 4      | 4.6                              | 28           | 68            |
| 1831 . . . . . | 123              | 107              | 16     | 4.5                              | 28           | 52            |
| 1841 . . . . . | 199              | 170              | 29     | 6.4                              | 14           | 48            |
| 1851 . . . . . | 217              | 195              | 22     | 7.0                              | 14           | 40            |
| 1861 . . . . . | 254              | 232              | 22     | 8.0                              | ...          | 27            |
| 1871 . . . . . | ...              | ...              | 17     | ...                              | ...          | 27            |
| 1881 . . . . . | ...              | ...              | 39     | ...                              | ...          | 22            |

It is believed that the average consumption of soap per inhabitant has doubled since the duty was removed, and now reaches 14 lbs. The quantity manufactured yearly would, therefore, appear to be 260,000 tons, of which 235,000 are consumed in the United Kingdom, and 25,000 exported. The export of soap in recent years has been as follows :—

| Year           | Tons   | Value, £ | £ per Ton |
|----------------|--------|----------|-----------|
| 1875 . . . . . | 12,500 | 310,000  | 25        |
| 1880 . . . . . | 19,500 | 440,000  | 22        |
| 1885 . . . . . | 20,100 | 470,000  | 23        |
| 1889 . . . . . | 25,000 | 505,000  | 20        |

In 1881 France manufactured 255 million lbs., the consumption in that country averaging 6 lbs. per inhabitant.

#### SOCIETIES

The following table shows approximately the principal features of friendly societies of all descriptions :—

|                         | Societies | Members   | Capital, £ |
|-------------------------|-----------|-----------|------------|
| Great Britain . . . . . | 22,000    | 7,000,000 | 58,000,000 |
| France . . . . .        | 8,000     | 1,250,000 | 5,200,000  |
| Germany . . . . .       | 24,000    | 7,400,000 | 23,000,000 |
| Russia . . . . .        | 500       | 35,000    | 300,000    |
| Austria . . . . .       | 1,900     | 870,000   | 17,000,000 |
| Italy . . . . .         | 2,200     | 330,000   | 900,000    |
| Switzerland . . . . .   | 630       | 100,000   | 300,000    |
| Belgium . . . . .       | 210       | 30,000    | 250,000    |
| Denmark . . . . .       | 720       | 90,000    | ...        |
| Canada . . . . .        | 40        | 80,000    | 5,100,000  |
| Australia . . . . .     | 900       | 100,000   | ...        |

These societies may be said to have sprung up in the last thirty years, possessing at present a paid-up capital of nearly 120 millions sterling.

#### UNITED KINGDOM

The number of friendly societies registered in 92 years was as follows :—

| Period                    | Number        | Yearly Average |
|---------------------------|---------------|----------------|
| 1793-1855 . . . . .       | 26,034        | 412            |
| 1856-73 . . . . .         | 20,058        | 1,114          |
| 1874-84 . . . . .         | 7,436         | 676            |
| <b>92 years . . . . .</b> | <b>53,528</b> | <b>582</b>     |

The above is exclusive of building societies and co-operative associations.

The advance of friendly societies in late years is shown thus :—

|                     | 1873      | 1880       |
|---------------------|-----------|------------|
| Members . . . . .   | 1,787,000 | 4,802,000  |
| Assets, £ . . . . . | 8,630,000 | 13,003,000 |

The progress of co-operative societies is shown thus :—

| Year           | Societies | Members | Capital, £ | Sales, £   |
|----------------|-----------|---------|------------|------------|
| 1861 . . . . . | 66        | 38,000  | 365,000    | 1,100,000  |
| 1871 . . . . . | 749       | 249,000 | 2,530,000  | 8,200,000  |
| 1880 . . . . . | 1,182     | 604,000 | 6,200,000  | 23,200,000 |
| 1888 . . . . . | 1,363     | 935,000 | 12,800,000 | 36,700,000 |

The above figures do not include 115 societies in 1888, which failed to publish particulars.

The returns published for 1888 were as follows :—

|                    | Societies | Members | Capital, £ | Sales, £   | Profits, £ |
|--------------------|-----------|---------|------------|------------|------------|
| England . . . . .  | 1,020     | 786,000 | 10,800,000 | 28,800,000 | 2,650,000  |
| Scotland . . . . . | 323       | 148,000 | 1,800,000  | 7,100,000  | 640,000    |
| Total . . . . .    | 1,343     | 934,000 | 12,600,000 | 35,900,000 | 3,290,000  |

There are twenty societies in Ireland, but the business done is small. The summary of transactions in Great Britain shows that in twenty-five years down to December 1888, the co-operative societies made sales exceeding 471 millions sterling, leaving a profit of £39,800,000, out of which the societies had made investments which amounted in December 1888 to a value of £5,300,000.

Building societies show the following progress in fourteen years :—

| Year           | Societies | Members | Receipts, £ | Assets, £  | Liabilities, £ | Net Assets, £ |
|----------------|-----------|---------|-------------|------------|----------------|---------------|
| 1874 . . . . . | 474       | 270,000 | 15,900,000  | 38,800,000 | 13,500,000     | 25,300,000    |
| 1888 . . . . . | 2,545     | 604,000 | 20,400,000  | 53,200,000 | 15,200,000     | 38,000,000    |

The returns for 1888 show as follows :—

|                          | Societies | Members | Receipts, £ | Assets, £  | Liabilities, £ | Net Assets, £ |
|--------------------------|-----------|---------|-------------|------------|----------------|---------------|
| England . . . . .        | 2,444     | 582,900 | 19,500,000  | 51,200,000 | 14,700,000     | 36,500,000    |
| Scotland . . . . .       | 50        | 9,000   | 400,000     | 1,010,000  | 240,000        | 770,000       |
| Ireland . . . . .        | 51        | 12,300  | 530,000     | 990,000    | 250,000        | 740,000       |
| United Kingdom . . . . . | 2,545     | 604,200 | 20,430,000  | 53,200,000 | 15,190,000     | 38,010,000    |

#### FRANCE

Official returns are to the following effect :—

| Year           | Societies | Members   | Capital, £ |
|----------------|-----------|-----------|------------|
| 1853 . . . . . | 2,695     | 318,000   | 500,000    |
| 1860 . . . . . | 4,252     | 358,000   | 1,000,000  |
| 1870 . . . . . | 5,788     | 849,000   | 2,100,000  |
| 1880 . . . . . | 6,777     | 1,066,000 | 3,800,000  |
| 1885 . . . . . | 7,960     | 1,252,000 | 5,200,000  |

The above returns for 1885 include 182,000 honorary members. The sick ratio showed thus :—

|                 | Members   | Sick    | Sick Ratio |
|-----------------|-----------|---------|------------|
| Men . . . . .   | 899,000   | 232,000 | 25.8       |
| Women . . . . . | 171,000   | 44,000  | 25.8       |
| Total . . . . . | 1,070,000 | 276,000 | 25.8       |

The women who were sick showed an average duration of 13 days' illness, the men 18. The death-rate in 1885 was 13.5 per 1000. Receipts, £1,000,000; expenditure, £880,000; surplus, £120,000. Each sick person cost 36 shillings, or 25 pence per day.

#### GERMANY

Official returns for 1886 show as follows :—

|                        | Societies | Members   |
|------------------------|-----------|-----------|
| Prussia . . . . .      | 8,529     | 2,445,000 |
| Bavaria . . . . .      | 4,271     | 397,000   |
| Saxony . . . . .       | 2,188     | 571,000   |
| Other States . . . . . | 4,250     | 1,157,000 |
| Total . . . . .        | 19,238    | 4,570,000 |

Some of the principal trades represented were :—

|                     |         |                     |         |
|---------------------|---------|---------------------|---------|
| Textiles . . . . .  | 543,000 | Pottery . . . . .   | 223,000 |
| Ironworks . . . . . | 345,000 | Sugar . . . . .     | 127,000 |
| Building . . . . .  | 590,000 | Carpentry . . . . . | 125,000 |

The total income of the above societies in 1885 was £3,300,000, and their expenditure £2,600,000.

Co-operative societies were begun about 1860, and received a great impulse from Mr. Schultz-Delitsch. Dr. Schenck published a report in 1888 which compares these societies with previous years :—

| Year           | Societies | Members   | Paid Capital, £ |
|----------------|-----------|-----------|-----------------|
| 1860 . . . . . | 133       | 31,600    | 80,000          |
| 1870 . . . . . | 740       | 314,700   | 2,200,000       |
| 1880 . . . . . | 4,920     | 1,710,000 | 8,650,000       |
| 1888 . . . . . | 5,000     | 2,000,000 | 15,000,000      |

The ratio of shareholders from the different classes of society in these companies, and in Schultz's popular banks, showed as follows :—

|                     | Co-operative Companies | Popular Banks |
|---------------------|------------------------|---------------|
| Farmers . . . . .   | 27.0                   | 30.0          |
| Artisans . . . . .  | 29.0                   | 34.0          |
| Merchants . . . . . | 44.0                   | 36.0          |
| Total . . . . .     | 100.0                  | 100.0         |

In December 1888 the Schultz-Delitsch companies comprised 2200 popular banks and 2620 co-operative societies. The progress of the popular banks appears as follows :—

| Year           | Shareholders | Capital, £ | Advances, £ |
|----------------|--------------|------------|-------------|
| 1859 . . . . . | 18,700       | 370,000    | 620,000     |
| 1887 . . . . . | 456,300      | 5,030,000  | 39,400,000  |

Deposits in 1887 amounted to £21,400,000 sterling. The Journeymen's Union, for the support of widows and orphans, had 270,000 members in 1882, with an income of £1,100,000 yearly.

#### AUSTRIA

In 1889 there were 1916 friendly societies, numbering 609,000 male and 262,000 female members. Only 1064

of these societies published statements, the aggregate of which showed :—

|                               |              |
|-------------------------------|--------------|
| Capital and reserve . . . . . | £ 17,000,000 |
| Deposits . . . . .            | 37,100,000   |

## ITALY

Official returns give the following particulars :—

| Year           | Societies | Members | Assets, £ |
|----------------|-----------|---------|-----------|
| 1862 . . . . . | 443       | 111,600 | 108,000   |
| 1873 . . . . . | 1,447     | 217,900 | 396,000   |
| 1880 . . . . . | 2,188     | 332,000 | 845,000   |

Days lost by sickness in the year average on the whole number of members 4.4, that is, 6.3 on women and 4.1 on men. Average duration of illness, 20 days.

## BELGIUM

Official returns are to the following effect :—

| Year           | Societies | Members | Income, £ |
|----------------|-----------|---------|-----------|
| 1860 . . . . . | 36        | 6,300   | 17,000    |
| 1880 . . . . . | 179       | 25,800  | 39,000    |
| 1886 . . . . . | 211       | 31,700  | 44,000    |

There are seven building societies, which have built 1093 houses, containing 5400 rooms, accommodating 8430 persons, at an average rent of £2 yearly per head, or 63s. per room. Income £17,000, expenses £7600, net rental £9400.

## AUSTRALIA

In 1873 Victoria had 682 societies with 50,000 members, whose death-rate reached 10 per 1000. Income £152,000, reserve £262,000.

The consumption in the three kingdoms of British and imported spirits was approximately as follows :—

| Year           | Gallons    |           |           |                | Gallons per Inhabitant |          |         |                |
|----------------|------------|-----------|-----------|----------------|------------------------|----------|---------|----------------|
|                | England    | Scotland  | Ireland   | United Kingdom | England                | Scotland | Ireland | United Kingdom |
| 1800 . . . . . | 4,350,000  | 1,280,000 | 1,330,000 | 6,960,000      | 0.51                   | 0.74     | 0.26    | 0.45           |
| 1810 . . . . . | 4,790,000  | 1,750,000 | 4,730,000 | 11,260,000     | 0.48                   | 0.97     | 0.80    | 0.68           |
| 1820 . . . . . | 4,280,000  | 1,860,000 | 3,300,000 | 9,450,000      | 0.35                   | 0.92     | 0.49    | 0.45           |
| 1830 . . . . . | 7,730,000  | 6,010,000 | 9,005,000 | 22,745,000     | 0.55                   | 2.60     | 1.15    | 0.95           |
| 1840 . . . . . | 8,280,000  | 6,180,000 | 7,402,000 | 21,862,000     | 0.52                   | 2.40     | 0.90    | 0.80           |
| 1850 . . . . . | 9,330,000  | 7,120,000 | 7,410,000 | 23,860,000     | 0.52                   | 2.43     | 1.12    | 0.88           |
| 1860 . . . . . | 12,910,000 | 7,890,000 | 6,400,000 | 27,200,000     | 0.65                   | 2.62     | 1.10    | 0.95           |
| 1870 . . . . . | 14,630,000 | 8,580,000 | 8,300,000 | 31,510,000     | 0.67                   | 2.56     | 1.55    | 1.01           |
| 1881 . . . . . | 21,600,000 | 8,800,000 | 6,610,000 | 37,010,000     | 0.84                   | 2.35     | 1.29    | 1.06           |
| 1888 . . . . . | 22,400,000 | 8,400,000 | 6,300,000 | 37,100,000     | 0.77                   | 2.10     | 1.33    | 0.96           |

The consumption of alcohol per head in French cities in 1885 was :—

|                      | Gallons   | Gallons per Inhabitant |
|----------------------|-----------|------------------------|
| Paris . . . . .      | 3,100,000 | 1.40                   |
| Marseilles . . . . . | 440,000   | 1.40                   |
| Lyons . . . . .      | 440,000   | 1.10                   |
| Bordeaux . . . . .   | 220,000   | 1.00                   |
| Rouen . . . . .      | 300,000   | 2.70                   |
| Havre . . . . .      | 350,000   | 3.30                   |

For further details see *Alcohol*, p. 58.

It is found that one bushel of grain will make 4½ gallons of spirits or 27 gallons of beer, and that 4 bushels of malt are equal to 5 bushels of grain. Thus, a ton of grain produces 180 gallons of spirits, a ton of malt 225 gallons.

## SPIRITS

The consumption in the principal countries at previous dates was as follows :—

|                         | Gallons per Inhabitant |      |      |      |      |           |
|-------------------------|------------------------|------|------|------|------|-----------|
|                         | 1830                   | 1840 | 1850 | 1860 | 1870 | 1881 1888 |
| United Kingdom          | 0.95                   | 0.80 | 0.88 | 0.95 | 1.01 | 1.06 0.96 |
| France . . . . .        | 0.26                   | 0.33 | 0.39 | 0.51 | 0.60 | 0.90 1.10 |
| Germany . . . . .       | ...                    | 0.60 | ...  | 1.08 | ...  | 1.33 1.40 |
| Russia . . . . .        | 5.00                   | 3.70 | 4.80 | ...  | ...  | 2.20 1.10 |
| Sweden . . . . .        | 8.80                   | 8.00 | 8.40 | 6.00 | 4.60 | 4.25 4.20 |
| Denmark . . . . .       | ...                    | 7.20 | ...  | 5.80 | ...  | 4.30 4.30 |
| Belgium . . . . .       | 0.96                   | ...  | 1.26 | ...  | 1.90 | 2.40 2.40 |
| United States . . . . . | 5.55                   | 3.10 | 2.50 | 2.10 | 1.62 | 1.50 1.20 |

The consumption in Russia in 1881 was estimated at 174 million gallons, but the official returns for 1886 only give 91 millions; perhaps illicit distilling may account for the difference.

The manufacture of spirits in England and Wales was as follows :—

| Year           | Gallons    | Duty, Pence | Gallons per Inhabitant |
|----------------|------------|-------------|------------------------|
| 1700 . . . . . | 1,210,000  | 4           | 0.22                   |
| 1720 . . . . . | 2,530,000  | 4           | 0.42                   |
| 1740 . . . . . | 6,715,000  | 4           | 1.10                   |
| 1760 . . . . . | 2,320,000  | 30          | 0.33                   |
| 1780 . . . . . | 2,330,000  | 30          | 0.35                   |
| 1800 . . . . . | 4,410,000  | 60          | 0.50                   |
| 1820 . . . . . | 4,315,000  | 120         | 0.56                   |
| 1830 . . . . . | 7,680,000  | 90          | 0.55                   |
| 1850 . . . . . | 9,620,000  | 90          | 0.54                   |
| 1860 . . . . . | 12,910,000 | 90          | 0.65                   |
| 1870 . . . . . | 11,220,000 | 120         | 0.48                   |
| 1881 . . . . . | 16,930,000 | 120         | 0.65                   |

## SPONGES

On the coast of Syria 300 boats with 1500 divers pick up annually sponges worth £25,000; best worth 40s., inferior, 4s. per lb. Depth, 30 to 150 ft.

Simmonds states the sponge-fisheries as follows :—

|                         | Value, £ |
|-------------------------|----------|
| West Indies . . . . .   | 120,000  |
| Mediterranean . . . . . | 150,000  |

The quantities imported into Great Britain were :—

|                | Lbs.    |
|----------------|---------|
| 1840 . . . . . | 78,000  |
| 1855 . . . . . | 474,000 |
| 1870 . . . . . | 840,000 |

No returns since 1870.

STEAM-POWER.

*Aggregate horse-power of the world at various dates, in millions.*

*Horse-power of nations; in millions, in 1888.*

*Horse-power per 1000 inhabitants.*

## SQUARES

| Name              | City   | Acres |
|-------------------|--------|-------|
| Grosvenor . . . . | London | 10    |
| Parade . . . . .  | Vienna | 15    |
| Schloss . . . . . | Berlin | 16    |
| Bellecour . . . . | Lyons  | 32    |
| St. Stephen's . . | Dublin | 40    |

## STATISTICS.

The library of the Royal Statistical Society comprises 27,000 volumes, and is far from complete. There are at least 50,000 statistical works extant, and if a student were able to examine three of them daily he would require 50 years to get through them. More than 500 new works on statistics are published yearly.

## STEAM

The following table shows approximately the steam-power of all nations at various dates :—

|                      | Horse-Power |           |           |            |            |            | Per 100 Inhabitants in 1888 |
|----------------------|-------------|-----------|-----------|------------|------------|------------|-----------------------------|
|                      | 1840        | 1850      | 1860      | 1870       | 1880       | 1888       |                             |
| United Kingdom . . . | 620,000     | 1,290,000 | 2,450,000 | 4,040,000  | 7,600,000  | 9,200,000  | 25                          |

| Various . . . . .    | 10,000      | 10,000    | 80,000    | 120,000    | 390,000    | 600,000    | 6                           |
| Europe . . . . .     | 860,000     | 2,240,000 | 5,540,000 | 11,570,000 | 22,000,000 | 28,630,000 | 9                           |
| United States . . .  | 760,000     | 1,680,000 | 3,470,000 | 5,590,000  | 9,110,000  | 14,400,000 | 24                          |
| Colonies, &c. . . .  | 30,000      | 70,000    | 400,000   | 1,300,000  | 3,040,000  | 7,120,000  | ...                         |
| Total . . . . .      | 1,650,000   | 3,990,000 | 9,380,000 | 18,460,000 | 34,150,000 | 50,150,000 | ...                         |

The distribution of fixed steam-power was approximately as follows :—

|                       | 1840    | 1850      | 1860      | 1870      | 1880      | 1888       |
|-----------------------|---------|-----------|-----------|-----------|-----------|------------|
| United Kingdom . . .  | 350,000 | 500,000   | 700,000   | 900,000   | 2,000,000 | 2,200,000  |
| Continent . . . . .   | 100,000 | 220,000   | 650,000   | 1,860,000 | 3,270,000 | 4,150,000  |
| United States . . . . | 360,000 | 600,000   | 800,000   | 1,220,000 | 2,200,000 | 3,300,000  |
| Colonies, &c. . . . . | 20,000  | 40,000    | 70,000    | 120,000   | 200,000   | 400,000    |
| Total . . . . .       | 830,000 | 1,360,000 | 2,220,000 | 4,100,000 | 7,670,000 | 10,050,000 |

The distribution of railway steam-power was approximately thus :—

|                       | 1840    | 1850      | 1860      | 1870       | 1880       | 1888       |
|-----------------------|---------|-----------|-----------|------------|------------|------------|
| United Kingdom . . .  | 200,000 | 700,000   | 1,400,000 | 2,140,000  | 3,200,000  | 3,500,000  |
| Continent . . . . .   | 90,000  | 630,000   | 2,210,000 | 5,200,000  | 9,640,000  | 12,780,000 |
| United States . . . . | 200,000 | 600,000   | 1,800,000 | 3,300,000  | 5,700,000  | 9,300,000  |
| Colonies, &c. . . . . | ...     | 10,000    | 300,000   | 1,100,000  | 2,700,000  | 6,400,000  |
| Total . . . . .       | 490,000 | 1,940,000 | 5,710,000 | 11,740,000 | 21,240,000 | 31,980,000 |

The distribution of shipping steam-power was approximately thus :—

|                       | 1840    | 1850    | 1860      | 1870      | 1880      | 1888      |
|-----------------------|---------|---------|-----------|-----------|-----------|-----------|
| United Kingdom . . .  | 70,000  | 90,000  | 350,000   | 1,000,000 | 2,400,000 | 3,500,000 |
| Continent . . . . .   | 50,000  | 100,000 | 200,000   | 470,000   | 1,490,000 | 2,670,000 |
| United States . . . . | 200,000 | 480,000 | 870,000   | 1,070,000 | 1,210,000 | 1,770,000 |
| Colonies, &c. . . . . | 10,000  | 20,000  | 30,000    | 80,000    | 140,000   | 180,000   |
| Total . . . . .       | 330,000 | 690,000 | 1,450,000 | 2,620,000 | 5,240,000 | 8,120,000 |

Summing up the table, we find as follows:—

|                     | 1840      | 1850      | 1860      | 1870       | 1880       | 1888       |
|---------------------|-----------|-----------|-----------|------------|------------|------------|
| Fixed . . . . .     | 830,000   | 1,360,000 | 2,220,000 | 4,100,000  | 7,670,000  | 10,050,000 |
| Locomotives . . . . | 490,000   | 1,940,000 | 5,710,000 | 11,740,000 | 21,240,000 | 31,980,000 |
| Shipping . . . . .  | 330,000   | 690,000   | 1,450,000 | 2,680,000  | 5,240,000  | 8,120,000  |
| Total . . . . .     | 1,650,000 | 3,990,000 | 9,380,000 | 18,460,000 | 34,150,000 | 50,150,000 |

The following table shows approximately the number of fixed engines in 1880, and of locomotives and steam-boats in 1888:—

|                     | Number        |             | Steamers   |       |
|---------------------|---------------|-------------|------------|-------|
|                     | Fixed Engines | Locomotives | Mercantile | War   |
| U. Kingdom . . . .  | 110,000       | 16,000      | 6,870      | 200   |
| France . . . . .    | 37,800        | 9,600       | 1,020      | 200   |
| Germany . . . . .   | 55,100        | 13,000      | 750        | 60    |
| Russia . . . . .    | 8,950         | 6,000       | 650        | 280   |
| Austria . . . . .   | 9,150         | 4,500       | 100        | 50    |
| Italy . . . . .     | 4,450         | 2,000       | 270        | 150   |
| Spain . . . . .     | 2,300         | 1,300       | 420        | 25    |
| Portugal . . . . .  | 140           | 250         | 40         | 30    |
| Sweden . . . . .    | 1,500         | 700         | 960        | 30    |
| Norway . . . . .    | 700           | 200         | 540        | 20    |
| Denmark . . . . .   | 800           | 200         | 290        | 20    |
| Holland . . . . .   | 5,750         | 650         | 110        | 30    |
| Belgium . . . . .   | 11,750        | 2,400       | 50         | ...   |
| Switzerland . . . . | 1,500         | 650         | 30         | ...   |
| Various . . . . .   | 500           | 3,000       | 140        | 60    |
| Europe . . . . .    | 250,390       | 60,450      | 18,240     | 1,155 |
| United States . . . | 60,300        | 31,000      | 5,920      | 70    |
| Colonies, &c. . . . | 15,000        | 15,700      | 600        | 80    |
| Total . . . . .     | 325,690       | 107,150     | 18,760     | 1,305 |

Steam being measured by horse-power, it is well to bear in mind the following facts:—

One horse-power will raise 10 tons per minute a height of 12 inches, working 8 hours a day. This is about 5000 foot-tons daily, or 12 times a man's work.

(1.) Mail-coach horses: Four will draw a coach, say 2 tons, at the rate of 10 miles an hour, for 6 days every week, and last 5 years.

(2.) Canal horses: One will draw a barge of 25 tons, resistance 108 lbs., at  $\frac{1}{4}$  miles per hour.

(3.) Waggoners' horses: One will easily draw a ton 30 miles in a day of 12 hours.

Sims mentions a Devonshire cart-horse, 15 hands, 1200 lbs., which gave an average of 8000 foot-tons daily.

The horse-power of Niagara is  $3\frac{1}{2}$  millions nominal, equal to 10 million horses effective, valued at £15,000,000 per annum, if conveyed by electricity to New York.

The measurement of horse-power, that is, of raising a certain weight 12 inches per minute during 8 hours daily, is variously given by the best authorities, viz.:—

|                    | Lbs.   |                     | Lbs.   |
|--------------------|--------|---------------------|--------|
| Smeaton . . . . .  | 22,000 | Desaguliers . . . . | 27,500 |
| Sims . . . . .     | 23,400 | Watt . . . . .      | 32,000 |
| Tredgold . . . . . | 27,500 | Saussure . . . . .  | 34,000 |

In 1880 Mr. Engel showed that the value of industries dependent on steam was 6275 millions sterling; his table for 1880 may compare with one for 1888 as follows:—

|                      | Millions £ Sterling |       | Increase |
|----------------------|---------------------|-------|----------|
|                      | 1880                | 1888  |          |
| Railways . . . . .   | 4,000               | 5,700 | 1,700    |
| Factories, &c. . . . | 2,000               | 2,600 | 600      |
| Steamers . . . . .   | 275                 | 410   | 135      |
| Total . . . . .      | 6,275               | 8,710 | 2,435    |

This shows that in eight years about 300 millions sterling per annum of new capital went into industries worked by steam. Mr. Engel finds that the maintenance of a 300-horse locomotive costs £900 a year, or £3 per horse-power, whereas the food of a live horse costs £30 per annum. Stationary engines, he says, cost £15 per annum per horse-power. A water-wheel of 100 horse-power costs only £7 per annum, or less than 18d. per horse. He shows that during twelve years ending 1878 each locomotive in Prussia drew yearly 1710 tons a distance of 6 miles per horse-power; that is, a 300-horse engine drew nearly the above weight daily 10 kilometres or 6 miles. He shows further that a live horse draws about 92 tons in the year a distance of 6 miles, and that on comparing the cost of maintenance, the locomotive does its work at one halfpenny per ton, whereas the live horse costs 7s. for the same, that is, one ton for 6 miles. In other words, horse-draught costs 168 times as much as that done by locomotive. In simple form it may be stated thus:—

Locomotive draws daily 100 tons a length of 100 miles for 50s., say 6d. per ton per 100 miles.

Horse draws one ton two miles daily for 20d., being at the rate of 84s. per ton per 100 miles.

In 1880 the average power of locomotives was 250 horse in England, 290 in Germany, 350 in France, and 420 in Switzerland.

#### UNITED KINGDOM

In 1775 England had 20 steam-engines, with an aggregate of 300 horse-power. The use of steam in textile factories rose as follows:—

| Year           | Horse-Power |
|----------------|-------------|
| 1835 . . . . . | 41,000      |
| 1850 . . . . . | 108,000     |
| 1860 . . . . . | 375,000     |
| 1870 . . . . . | 478,000     |

According to Fairbairn, in 1860 the steam-engines, fixed and movable, amounted to an aggregate of 3,650,000 horse-power. Engel made the aggregate in 1880 no less than 6,986,000. The following table shows approximately the growth of the various classes of steam-power:—

| Year | Horse-Power |             |            |           |
|------|-------------|-------------|------------|-----------|
|      | Fixed       | Locomotives | Steamboats | Total     |
| 1840 | 350,000     | 180,000     | 70,000     | 600,000   |
| 1850 | 500,000     | 700,000     | 90,000     | 1,290,000 |
| 1860 | 700,000     | 1,350,000   | 350,000    | 2,400,000 |
| 1870 | 940,000     | 2,100,000   | 1,000,000  | 4,040,000 |
| 1880 | 2,000,000   | 3,200,000   | 2,400,000  | 7,600,000 |
| 1888 | 2,200,000   | 3,500,000   | 3,500,000  | 9,200,000 |

Engel seems to have under-estimated the horse-power of steamers, his estimate for the United Kingdom in 1880 being as follows:—

|                      |           |
|----------------------|-----------|
| Fixed . . . . .      | 2,000,000 |
| Locomotives . . . .  | 3,240,000 |
| Steamboats . . . . . | 1,746,000 |
|                      | 6,986,000 |

In the preceding table steamboats, of course, include both merchant vessels and the royal navy. Actual horse-power is double the nominal.

The power of locomotives in England is variously estimated at 220 to 250 horse-power. From the above table it appears that the steam force of the United King-

dom has grown 15-fold in 48 years. In 1886 there were 134,000 factories in the United Kingdom, nearly all driven by steam.

## FRANCE

Engel's tables down to 1878 are included in the following :—

| Year       | Engines, Number |             |            | Horse-Power |             |            | Total     |
|------------|-----------------|-------------|------------|-------------|-------------|------------|-----------|
|            | Fixed           | Locomotives | Steamboats | Fixed       | Locomotives | Steamboats |           |
| 1840 . . . | 2,591           | 142         | 263        | 34,000      | 42,000      | 11,000     | 87,000    |
| 1850 . . . | 5,322           | 973         | 537        | 67,000      | 291,000     | 22,000     | 380,000   |
| 1860 . . . | 14,936          | 3,101       | 681        | 181,000     | 930,000     | 37,000     | 1,148,000 |
| 1870 . . . | 27,958          | 4,835       | 973        | 341,000     | 1,452,000   | 60,000     | 1,853,000 |
| 1878 . . . | 38,880          | 6,669       | 1,183      | 492,000     | 2,363,000   | 169,000    | 3,024,000 |
| 1885 . . . | 50,980          | 9,155       | 4,290      | 695,000     | 3,290,000   | 530,000    | 4,515,000 |

The earliest record of steam-power is for 1835, when there were 1450 engines, with 19,000 horse-power. The distribution of steam, as officially reported, was in 1885 as follows :—

|                         | Number | Horse-Power | Average |
|-------------------------|--------|-------------|---------|
| Mines . . .             | 4,140  | 102,000     | 25      |
| Foundries . . .         | 7,050  | 147,000     | 20      |
| Textile factories . . . | 6,470  | 147,000     | 22      |
| Flour-mills . . .       | 8,620  | 92,000      | 11      |
| Farms . . .             | 11,940 | 66,000      | 6       |
| Various . . .           | 12,760 | 141,000     | 11      |
| Total fixed . . .       | 50,980 | 695,000     | 14      |
| Locomotives . . .       | 9,155  | 3,290,000   | 360     |
| Steamboats . . .        | 937    | 530,000     | 560     |
| Total . . .             | 61,072 | 4,515,000   | 74      |

In this table the number of steamboats is given; in the preceding that of engines.

## GERMANY

The following contains Engel's table for Prussia down to 1878 :—

| Year | Horse-Power |             |          |           |
|------|-------------|-------------|----------|-----------|
|      | Fixed       | Locomotives | Steamers | Total     |
| 1840 | 11,700      | 300         | 200      | 12,200    |
| 1852 | 43,000      | 40,200      | 9,200    | 92,400    |
| 1861 | 143,000     | 206,000     | 16,000   | 365,000   |
| 1878 | 958,000     | 2,033,000   | 50,000   | 3,041,000 |
| 1888 | 1,500,000   | 2,600,000   | 120,000  | 4,220,000 |

The steam-power of Germany at various dates was approximately as follows :

|                       | Horse-Power |         |         |           |           |           |
|-----------------------|-------------|---------|---------|-----------|-----------|-----------|
|                       | 1840        | 1850    | 1860    | 1870      | 1880      | 1888      |
| Fixed . . . . .       | 20,000      | 40,000  | 200,000 | 900,000   | 1,680,000 | 2,000,000 |
| Locomotives . . . . . | 20,000      | 200,000 | 600,000 | 1,500,000 | 3,020,000 | 3,700,000 |
| Steamers . . . . .    | ...         | 20,000  | 50,000  | 80,000    | 420,000   | 500,000   |
| Total . . . . .       | 40,000      | 260,000 | 850,000 | 2,480,000 | 5,120,000 | 6,200,000 |

According to the Census of 1880 the employment of steam in fixed engines was as follows :—

|                     | Horse-Power |
|---------------------|-------------|
| Factories . . . . . | 1,283,000   |
| Mines . . . . .     | 394,000     |
| Total . . . . .     | 1,677,000   |

The increase of manufactures and mining since 1880

The number of engines in Prussia was as follows :—

|                       | 1840 | 1852  | 1861  | 1878   |
|-----------------------|------|-------|-------|--------|
| Fixed . . . . .       | 615  | 2,124 | 7,000 | 35,430 |
| Locomotives . . . . . | 13   | 607   | 1,450 | 6,990  |
| Steamboats . . . . .  | 6    | 102   | 198   | 623    |
| Total . . . . .       | 634  | 2,833 | 8,648 | 43,043 |

Mr. Engel's locomotive steam-power for 1852 seems low, as Prussia had then 2000 miles of railway; it is only 20 horse-power per mile.

The distribution of steam-power of stationary engines in Prussia in 1878 was as follows :—

| Class              | Engines | Horse-Power |
|--------------------|---------|-------------|
| 4-horse . . . . .  | 1,998   | 8,000       |
| 15-horse . . . . . | 10,140  | 156,000     |
| Various . . . . .  | 23,300  | 794,000     |
| Total . . . . .    | 35,430  | 958,000     |

The total steam-power of Prussia in 1878 showed thus :—

|                       | Engines | Horse-Power |
|-----------------------|---------|-------------|
| Stationary . . . . .  | 35,430  | 958,000     |
| Locomotives . . . . . | 6,990   | 2,033,000   |
| Steamboats . . . . .  | 623     | 50,000      |
| Total . . . . .       | 43,043  | 3,041,000   |

leads to the inference that the motive power of fixed engines in 1888 was 2,000,000 horse-power.

## RUSSIA

Moscow had two steam-engines in 1820, and in ten years later the number had risen to 100.

In 1880 there were 8946 fixed engines, with an aggregate of 237,000 horse-power. The whole steam-power

of the Empire may be estimated to have been approximately as follows :—

| Year | Horse-Power |             |            |           |
|------|-------------|-------------|------------|-----------|
|      | Fixed       | Locomotives | Steamboats | Total     |
| 1840 | 10,000      | 10,000      | 10,000     | 30,000    |
| 1860 | 60,000      | 100,000     | 40,000     | 200,000   |
| 1880 | 237,000     | 1,400,000   | 100,000    | 1,737,000 |
| 1888 | 300,000     | 1,800,000   | 140,000    | 2,240,000 |

In 1888 the mining works alone had 100,000 horse-power, almost all steam.

## AUSTRIA

Official returns for Austria proper give as follows :—

| Year           | Engines | Horse-Power |
|----------------|---------|-------------|
| 1841 . . . . . | 312     | 7,100       |
| 1852 . . . . . | 1,182   | 49,800      |
| 1863 . . . . . | 4,416   | 336,000     |
| 1875 . . . . . | 12,390  | 1,275,000   |

|                       | Engines |       |        | Horse-Power |         |           |
|-----------------------|---------|-------|--------|-------------|---------|-----------|
|                       | 1852    | 1863  | 1875   | 1852        | 1863    | 1875      |
| Fixed . . . . .       | 671     | 2,882 | 9,160  | 9,000       | 47,000  | 157,000   |
| Locomotives . . . . . | 405     | 1,244 | 2,786  | 27,800      | 249,000 | 990,000   |
| Steamers . . . . .    | 106     | 290   | 462    | 13,000      | 40,000  | 128,000   |
| Total . . . . .       | 1,182   | 4,416 | 12,390 | 49,800      | 336,000 | 1,275,000 |

## SPAIN AND PORTUGAL

The amount of steam-power in the Peninsula in 1870 and 1888 is shown approximately thus :—

|                       | 1870    |          |         | 1888    |          |         |
|-----------------------|---------|----------|---------|---------|----------|---------|
|                       | Spain   | Portugal | Total   | Spain   | Portugal | Total   |
| Fixed . . . . .       | 20,000  | 1,000    | 21,000  | 48,000  | 3,000    | 51,000  |
| Locomotives . . . . . | 150,000 | 20,000   | 170,000 | 300,000 | 60,000   | 360,000 |
| Steamers . . . . .    | 45,000  | 5,000    | 50,000  | 390,000 | 15,000   | 405,000 |
| Total . . . . .       | 215,000 | 26,000   | 241,000 | 738,000 | 78,000   | 816,000 |

In 1873 the textile mills of Spain had 17,000 horse-power, the factories of Portugal 70 engines, with a total of 1200 horse ; in 1888 the latter had 2700 horse-power.

## SWITZERLAND

In 1877 there were 1580 fixed engines, with an aggregate of 32,000 horse-power. In 1885 there were 600 locomotives, with an average power of 420 horse, being much above the European average. The total steam-power may be estimated thus :—

|                       | Engines | Horse-Power |
|-----------------------|---------|-------------|
| Fixed . . . . .       | 2,000   | 38,000      |
| Locomotives . . . . . | 600     | 250,000     |
| Steamers . . . . .    | ...     | 2,000       |
| Total . . . . .       | ...     | 290,000     |

In 1851 there were but 34 fixed engines, the number rising to 312 in 1860, and to 955 in 1870.

## HOLLAND

In 1883 there were 6689 steam-engines against 4753 in 1877. The total in 1883 (exclusive of railway locomotives) showed as follows :—

|                    | Engines | Horse-Power |
|--------------------|---------|-------------|
| On land . . . . .  | 5,564   | 73,100      |
| On water . . . . . | 1,125   | 37,300      |

In 1887 the fixed engines of Austria without Hungary rose to 19,615, and the whole steam-power of the Empire in 1888 may be estimated thus :—

|                       | Engines | Horse-Power |
|-----------------------|---------|-------------|
| Fixed . . . . .       | 24,000  | 400,000     |
| Locomotives . . . . . | 4,400   | 1,500,000   |
| Steamers . . . . .    | ...     | 250,000     |
| Total . . . . .       | ...     | 2,150,000   |

## ITALY

In 1877 there were 4459 fixed engines with 54,000 horse-power, and in 1888 the horse-power may be supposed to have reached 150,000, seeing that the consumption of coal has trebled in the interval.

The steam-power was approximately as follows :—

|                       | Horse-Power |         |
|-----------------------|-------------|---------|
|                       | 1877        | 1888    |
| Fixed . . . . .       | 54,000      | 150,000 |
| Locomotives . . . . . | 300,000     | 500,000 |
| Steamers . . . . .    | 60,000      | 180,000 |
| Total . . . . .       | 414,000     | 830,000 |

## BELGIUM

In 1836 the total steam-power of the Kingdom was 20,000 horse.

Official returns are to the following effect :—

| Year | Engines    |                   |        | Horse-Power |              |         |
|------|------------|-------------------|--------|-------------|--------------|---------|
|      | Facto-ries | Locomo-tives, &c. | Total  | Facto-ries  | Loco-motives | Total   |
| 1845 | 1,501      | 172               | 1,673  | 39,000      | 9,000        | 48,000  |
| 1850 | 2,013      | 269               | 2,282  | 51,000      | 15,000       | 66,000  |
| 1860 | 4,346      | 651               | 4,997  | 99,000      | 63,000       | 162,000 |
| 1870 | 8,133      | 1,161             | 9,294  | 176,000     | 172,000      | 348,000 |
| 1880 | 11,758     | 2,302             | 14,060 | 275,000     | 332,000      | 607,000 |
| 1887 | 13,036     | 3,331             | 16,367 | 337,000     | 476,000      | 813,000 |

The steam-power in 1887 showed in detail thus :—

|                       | Engines | Horse-Power | Average |
|-----------------------|---------|-------------|---------|
| Factories . . . . .   | 13,036  | 337,000     | 26      |
| Locomotives . . . . . | 2,990   | 446,000     | 150     |
| Steamers . . . . .    | 341     | 30,000      | 88      |
| Total . . . . .       | 16,367  | 813,000     | 50      |

## SCANDINAVIA

In 1888 the steam-power of the three northern kingdoms was approximately as follows :—

|                 | Horse-Power |         |         |         |
|-----------------|-------------|---------|---------|---------|
|                 | Sweden      | Norway  | Denmark | Total   |
| Fixed . . . .   | 28,000      | 10,000  | 10,000  | 48,000  |
| Locomotives . . | 140,000     | 30,000  | 40,000  | 210,000 |
| Steamers . . .  | 130,000     | 140,000 | 100,000 | 370,000 |
| Total . . . .   | 298,000     | 180,000 | 150,000 | 628,000 |

## UNITED STATES

There is no record of fixed horse-power before 1870, but we can estimate by the number of hands engaged in manufactures at previous dates. The whole steam-power was approximately thus :—

| Year | Horse-Power |             |             |            | Per 1000 Population |
|------|-------------|-------------|-------------|------------|---------------------|
|      | Fixed       | Locomotives | Steam-boats | Total      |                     |
| 1840 | 360,000     | 200,000     | 200,000     | 760,000    | 44                  |
| 1850 | 600,000     | 600,000     | 500,000     | 1,700,000  | 73                  |
| 1860 | 800,000     | 1,800,000   | 900,000     | 3,500,000  | 111                 |
| 1870 | 1,216,000   | 3,300,000   | 1,100,000   | 5,616,000  | 148                 |
| 1880 | 2,186,000   | 5,700,000   | 1,200,000   | 9,086,000  | 180                 |
| 1888 | 3,300,000   | 9,300,000   | 1,800,000   | 14,400,000 | 240                 |

In the above table locomotives are taken at 300 horse each, and the horse-power of steamers as equivalent to their tonnage. The fixed horse-power for 1888 is not known, but as mining has increased 90 per cent. and manufactures over 30 per cent., it is likely motive-power has risen 50 per cent. since 1880.

## STONE

The latest statistics as to stone-quarries show the annual yield thus :—

|                     | Product, Tons | Value, £  |
|---------------------|---------------|-----------|
| Great Britain . . . | 11,000,000    | 8,700,000 |
| France . . . . .    | 8,000,000     | 6,600,000 |
| Belgium . . . . .   | 2,000,000     | 1,300,000 |
| United States . . . | 7,000,000     | 5,300,000 |

The marble quarries of Italy have an output valued at one million sterling.

## STREETS

Heavy traffic averages 100,000 tons, light 50,000 tons per yard per annum. The former wears wooden pavement an inch in five years. Some authorities estimate

the first cost of paving per square yard as follows :—  
Stone 10s, wood 14s., asphalt 18s.

The cost of paving and keeping in order a street 10 yards wide and 1000 yards long in wood and stone is shown as follows :—

|                       | Heavy Traffic, £ |        | Light Traffic, £ |       |
|-----------------------|------------------|--------|------------------|-------|
|                       | Wood             | Stone  | Wood             | Stone |
| First cost . . .      | 7,500            | 7,200  | 7,500            | 7,200 |
| Maintenance, 30 years | 15,000           | 3,600  | 7,500            | 2,400 |
| Total . . . . .       | 22,500           | 10,800 | 15,000           | 9,600 |

The streets of Paris, taking a medium width of 50 feet, are as follows :—

|                 | Square Metres | Miles Long | Maintenance, £ |
|-----------------|---------------|------------|----------------|
| Cut stone . . . | 1,800,000     | 75         | 160,000        |
| Rough . . . .   | 5,800,000     | 244        | 120,000        |
| Asphalt . . . . | 270,000       | 11         | 12,000         |
| Total . . . . . | 7,870,000     | 330        | 292,000        |

Side-walks made of granite cost 18s. per square yard for construction, and 1d. yearly for repairs. The sweeping of the streets employs 3100 men.

The streets of Berlin, at an average width of 50 feet, are :—

|                 | Square Metres | Miles Long |
|-----------------|---------------|------------|
| Paved . . . . . | 4,280,000     | 180        |
| Asphalt . . . . | 125,000       | 5          |
| Wood . . . . .  | 10,000        | ...        |
| Total . . . . . | 4,415,000     | 185        |

Sweeping costs £80,000 a year.

## STRENGTH

Taking that of a man as 100, Byron's Gladiator is equal to 173, the Farnese Hercules 362, and a horse 750.

## SUGAR

The following table shows the production approximately :—

|                | Cane, Tons | Beet, Tons | Total     |
|----------------|------------|------------|-----------|
| 1840 . . . . . | 1,100,000  | 50,000     | 1,150,000 |
| 1850 . . . . . | 1,200,000  | 200,000    | 1,400,000 |
| 1860 . . . . . | 1,800,000  | 400,000    | 2,200,000 |
| 1870 . . . . . | 1,830,000  | 900,000    | 2,730,000 |
| 1880 . . . . . | 1,860,000  | 1,810,000  | 3,670,000 |
| 1889 . . . . . | 2,580,000  | 2,780,000  | 5,360,000 |

The production of beet-sugar according to the *Bulletin Statistique* was as follows in Europe :—

|                    | Tons Yearly |         |         |         |           |           |
|--------------------|-------------|---------|---------|---------|-----------|-----------|
|                    | 1836-39     | 1840-49 | 1850-59 | 1860-69 | 1870-79   | 1880-84   |
| France . . . . .   | 43,000      | 34,000  | 93,000  | 188,000 | 370,000   | 406,000   |
| Germany . . . . .  | 6,000       | 14,000  | 87,000  | 169,000 | 297,000   | 667,000   |
| Austria . . . . .  | 1,000       | 3,000   | 28,000  | 70,000  | 205,000   | 478,000   |
| Russia . . . . .   | ...         | ...     | 26,000  | 118,000 | 260,000   | 284,000   |
| Belgium . . . . .  | ...         | ...     | 11,000  | 28,000  | 68,000    | 75,000    |
| Holland, &c. . . . | ...         | ...     | ...     | 1,000   | 18,000    | 30,000    |
| Europe . . . . .   | 50,000      | 51,000  | 245,000 | 574,000 | 1,218,000 | 1,940,000 |

According to the same writer, the United States produced in the last four years 337,000 tons of beet-sugar yearly.

Licht and Goerz compute the production of beet-sugar in 1887 and 1889 as follows in tons:—

|                 | 1887      | 1889      |
|-----------------|-----------|-----------|
| Germany . . . . | 1,013,000 | 975,000   |
| Austria . . . . | 523,000   | 575,000   |
| France . . . .  | 485,000   | 475,000   |
| Russia . . . .  | 487,000   | 510,000   |
| Belgium . . . . | 132,000   | 137,000   |
| Holland . . . . | 36,000    | 45,000    |
| Various . . . . | 56,000    | 61,000    |
| Total . . . .   | 2,732,000 | 2,778,000 |

This seems to exclude any beet-sugar raised in the United States. The *Economist* gives the following table:—

| Year         | Cane, Tons | Beet, Tons | Total     |
|--------------|------------|------------|-----------|
| 1882 . . . . | 2,107,000  | 2,147,000  | 4,254,000 |
| 1884 . . . . | 2,351,000  | 2,546,000  | 4,897,000 |
| 1886 . . . . | 2,346,000  | 2,729,000  | 5,074,000 |
| 1888 . . . . | 2,412,000  | 2,850,000  | 5,262,000 |

The following statistics refer to the manufacture of beet-sugar:—

|                 | Factories |      | Tons Root Used |           | Sugar, Tons |         |
|-----------------|-----------|------|----------------|-----------|-------------|---------|
|                 | 1883      | 1887 | 1883           | 1887      | 1883        | 1887    |
| Germany . . . . | 358       | 401  | 8,700,000      | 8,300,000 | 830,000     | 990,000 |
| France . . . .  | 496       | 391  | 7,200,000      | 4,900,000 | 410,000     | 415,000 |
| Austria . . . . | 232       | 209  | 4,900,000      | 4,300,000 | 560,000     | 520,000 |
| Belgium . . . . | 155       | 111  | ...            | ...       | 95,000      | 105,000 |

The production of cane-sugar, according to N. Spallart and others, was by latest accounts as follows:—

|                  | Tons    |                     | Tons    |
|------------------|---------|---------------------|---------|
| Cuba . . . .     | 530,000 | Guadeloupe, &c. . . | 100,000 |
| Java . . . .     | 320,000 | United States . . . | 100,000 |
| Brazil . . . .   | 230,000 | Porto Rico . . . .  | 80,000  |
| India . . . .    | 220,000 | Honolulu . . . .    | 60,000  |
| Jamaica, &c. . . | 210,000 | Argentina . . . .   | 60,000  |
| Manilla . . . .  | 180,000 | Egypt . . . .       | 40,000  |
| Mauritius . . .  | 120,000 | Peru . . . .        | 30,000  |
| Guiana . . . .   | 120,000 | Mexico . . . .      | 30,000  |
| China . . . .    | 100,000 | Australia . . . .   | 20,000  |

The *Ann. Stat.* for 1885 published the following table of average annual consumption during the four years immediately preceding, to which may be added a table published in Paris in 1868:—

|                      | 1881-84   |                     | 1868                |
|----------------------|-----------|---------------------|---------------------|
|                      | Tons      | Lbs. per Inhabitant | Lbs. per Inhabitant |
| United Kingdom . .   | 1,105,000 | 69                  | 40                  |
| France . . . .       | 386,000   | 23                  | 18                  |
| Germany . . . .      | 313,000   | 15                  | 10                  |
| Austria . . . .      | 231,000   | 13                  | 4                   |
| Russia . . . .       | 300,000   | 8                   | 2                   |
| Sweden . . . .       | 37,000    | 18                  | 8                   |
| Norway . . . .       | 10,000    | 11                  | 10                  |
| Holland . . . .      | 55,000    | 29                  | 41                  |
| Belgium . . . .      | 40,000    | 16                  | 22                  |
| Denmark . . . .      | 27,000    | 30                  | 20                  |
| Switzerland . . .    | 30,000    | 23                  | 10                  |
| Italy . . . .        | 100,000   | 7                   | ...                 |
| Spain and Portugal . | 60,000    | 6                   | 4                   |
| Total . . . .        | 2,694,000 | ...                 | ...                 |

In 1887 the total consumption of sugar was put down as follows:—

|                        | Tons      |
|------------------------|-----------|
| United Kingdom . . . . | 1,100,000 |
| Continent . . . .      | 1,900,000 |
| United States . . . .  | 1,500,000 |
| Australia . . . .      | 100,000   |
| Various . . . .        | 600,000   |
| Total . . . .          | 5,300,000 |

It appears that the world consumes now twice as much sugar as in 1870, and four times as much as in 1850. The fall in price partly explains this prodigious increase of consumption.

#### UNITED KINGDOM

The consumption of sugar has been as follows:—

| Year         | Tons      | Lbs. per Inhab. | Duty per Ton | Price per Ton |
|--------------|-----------|-----------------|--------------|---------------|
| 1705 . . . . | 12,000    | 3               | £3           | £70           |
| 1730 . . . . | 41,000    | 9               | 4            | 70            |
| 1750 . . . . | 53,000    | 11              | 5            | 70            |
| 1780 . . . . | 77,000    | 14              | 7            | 70            |
| 1801 . . . . | 165,000   | 22              | 20           | 85            |
| 1811 . . . . | 184,000   | 23              | 27           | 90            |
| 1820 . . . . | 143,000   | 15              | 27           | 63            |
| 1830 . . . . | 214,000   | 20              | 24           | 49            |
| 1840 . . . . | 188,000   | 15              | 24           | 48            |
| 1850 . . . . | 310,000   | 25              | 10           | 40            |
| 1860 . . . . | 420,000   | 32              | 13           | 35            |
| 1870 . . . . | 690,000   | 49              | 5            | 32            |
| 1881 . . . . | 1,050,000 | 68              | ...          | 22            |
| 1888 . . . . | 1,170,000 | 70              | ...          | 14            |

About 70,000 tons are annually consumed by brewers.

#### FRANCE

A table published in 1869 gives the consumption from 1817 till 1868:—

| Year         | Tons    | Lbs. per Inhabitant |
|--------------|---------|---------------------|
| 1817 . . . . | 31,000  | 2                   |
| 1825 . . . . | 55,000  | 4                   |
| 1832 . . . . | 73,000  | 5                   |
| 1840 . . . . | 109,000 | 6                   |
| 1854 . . . . | 135,000 | 8                   |
| 1862 . . . . | 200,000 | 12                  |
| 1868 . . . . | 310,000 | 18                  |
| 1887 . . . . | 410,000 | 23                  |

The last item is not official, but the ratio already quoted for the years 1881-84. France has 439 sugar-factories, employing 68,400 men, moved by 48,000 horse-power of steam, and valued at £15,200,000. The production of beet-root averages 11 tons per acre.

#### GERMANY

The production of beet-root is officially stated thus:—

| Period          | Tons of Roots Yearly |
|-----------------|----------------------|
| 1844-55 . . . . | 680,000              |
| 1856-65 . . . . | 1,710,000            |
| 1866-75 . . . . | 2,820,000            |
| 1876-80 . . . . | 4,680,000            |
| 1881-87 . . . . | 8,310,000            |

The quantity of sugar obtained from a ton of roots has risen in late years, viz:—

| Year         | Tons Roots | Tons Sugar | Per Cent. |
|--------------|------------|------------|-----------|
| 1872 . . . . | 2,250,000  | 185,000    | 8.3       |
| 1880 . . . . | 4,810,000  | 410,000    | 8.5       |
| 1887 . . . . | 8,310,000  | 990,000    | 11.9      |

The estimated consumption of roots in 400 beet-sugar factories during the year 1889 was 6,500,000 tons, which produced 992,000 tons of sugar, or more than 15 per cent.

The first mention of beet-sugar is in 1816, when 1400 tons were produced in Prussia. In 1836 it was found that 100,000 tons of beet did not yield quite 5000 tons of sugar.

#### RUSSIA

The sugar industry was begun at Tula in 1811, but was little heard of until 1850. The area under beet-root in 1864 was 290,000 acres, and the production close on a million tons of roots, an average of less than  $3\frac{1}{2}$  tons per acre. In 1883 there were 214 sugar-factories, consuming 4,000,000 tons of roots, from which they extracted 260,000 tons of sugar, say  $6\frac{1}{2}$  per cent., against 10 per cent. in Germany. In 1887 the mills turned out 405,000 tons of sugar. The millers buy the roots at 15s. a ton, and sell the sugar at £18 per ton, which leaves them a profit of 30s. per ton of sugar, after paying their 40,000 operatives and all expenses. The peasants who grow the beet-root count on an average crop of six tons per acre, which they sell for 90s., and their rent and taxes being 16s. an acre, they count on 74s. an acre for the support of their household.

#### SUICIDE

It is customary to compute the number per million inhabitants yearly, and under this heading whenever the term "million inhabitants" is used, it signifies more correctly one million persons of a given age or class. Partial records down to recent years will be found for the principal countries. The following is a general table:—

|                         | Suicides Yearly per Million Population |         |         |
|-------------------------|----------------------------------------|---------|---------|
|                         | 1851-60                                | 1871-77 | 1885-87 |
| England . . . . .       | 65                                     | 67      | 80      |
| Scotland . . . . .      | ...                                    | 40      | ...     |
| Ireland . . . . .       | ...                                    | 17      | ...     |
| France . . . . .        | 105                                    | 157     | 205     |
| Germany . . . . .       | 126                                    | 143     | 208     |
| Russia . . . . .        | 35                                     | 30      | ...     |
| Austria . . . . .       | 45                                     | 122     | 159     |
| Italy . . . . .         | 18                                     | 37      | 45      |
| Spain . . . . .         | ...                                    | 14      | ...     |
| Portugal . . . . .      | 14                                     | 18      | ...     |
| Sweden . . . . .        | 72                                     | 81      | ...     |
| Norway . . . . .        | 100                                    | 73      | ...     |
| Denmark . . . . .       | 274                                    | 258     | ...     |
| Holland . . . . .       | ...                                    | 36      | ...     |
| Belgium . . . . .       | 49                                     | 67      | 130     |
| Switzerland . . . . .   | ...                                    | 202     | ...     |
| Massachusetts . . . . . | ...                                    | 82      | ...     |
| Australia . . . . .     | ...                                    | 86      | 115     |

City rates are usually much higher than the average for the corresponding countries.

The following table is not for a given term of years, but merely compares the latest rates recorded for various cities:—

| Per Million Inhabitants |     |                              |
|-------------------------|-----|------------------------------|
| Berlin . . . . .        | 170 | Naples . . . . . 60          |
| Brussels . . . . .      | 271 | New York . . . . . 144       |
| Copenhagen . . . . .    | 302 | Paris . . . . . 422          |
| Dresden . . . . .       | 240 | Rio Janeiro . . . . . 60     |
| Florence . . . . .      | 76  | Rome . . . . . 53            |
| Frankfort . . . . .     | 344 | St. Petersburg . . . . . 206 |
| Genoa . . . . .         | 64  | Stockholm . . . . . 272      |
| London . . . . .        | 85  | Turin . . . . . 110          |
| Milan . . . . .         | 133 | Vienna . . . . . 287         |

In all countries suicide is more frequent with men than

women, as the following table shows; as also the different rates per million for urban and for rural population:—

|                   | Per Million |       | Percentage of Sexes |         |
|-------------------|-------------|-------|---------------------|---------|
|                   | Urban       | Rural | Males               | Females |
| France . . . . .  | 217         | 118   | 79                  | 21      |
| Prussia . . . . . | 162         | 97    | 81                  | 19      |
| Denmark . . . . . | 307         | 271   | 77                  | 23      |
| Saxony . . . . .  | 317         | 219   | 81                  | 19      |
| Italy . . . . .   | 66          | 30    | 80                  | 20      |
| Belgium . . . . . | 61          | 34    | 85                  | 15      |
| Sweden . . . . .  | 167         | 68    | 77                  | 23      |
| Norway . . . . .  | 103         | 65    | 76                  | 24      |
| Denmark . . . . . | 236         | 238   | 77                  | 23      |

In Holland, of 100 suicides 16 are by women; in Austria, 18; in England, 26; in Russia, 21; in Switzerland, 12; in Spain, 29; and in the United States, 28. The difference that prevails between married and single is pointed out by various writers. In Switzerland, during four years ending 1880, of 100 women under 30 years who committed suicide 80 were unmarried.

The following table shows approximately the ratios of adults, married and unmarried, in several countries, and the ratios of suicide according to Legoyt:—

|                       | Inhabitants, Percentage |           | Suicides, Percentage |           |
|-----------------------|-------------------------|-----------|----------------------|-----------|
|                       | Married                 | Unmarried | Married              | Unmarried |
| France . . . . .      | 55                      | 45        | 46                   | 54        |
| Germany . . . . .     | 52                      | 48        | 43                   | 57        |
| Italy . . . . .       | 53                      | 47        | 44                   | 56        |
| Switzerland . . . . . | 47                      | 53        | 43                   | 57        |

In all countries the rate of suicide among unmarried is much higher than among married. In France, as shown later on, the value of domestic ties as a restraint against suicide is shown in the fact that persons with children are much less disposed to it than those who have none.

Suicide is much more frequent in Protestant than in Catholic countries. Legoyt and other writers show that in countries where both religions exist the tendency of Protestants to suicide is greater, as shown in the rates for the following countries per million inhabitants yearly:—

|                           | Protestant | Catholic | General Rate |
|---------------------------|------------|----------|--------------|
| United Kingdom . . . . .  | 63         | 17       | 56           |
| Prussia . . . . .         | 170        | 52       | 131          |
| Bavaria . . . . .         | 195        | 69       | 102          |
| Austria-Hungary . . . . . | 140        | 90       | 96           |
| Switzerland . . . . .     | 262        | 81       | 202          |

Legoyt says the Jews have even a lower rate of suicide than Catholics.

If we suppose 1200 suicides yearly in each of the following countries, the months in which they occur show as follows:—

|                     | London | France | Austria | Italy | Sweden |
|---------------------|--------|--------|---------|-------|--------|
| January . . . . .   | 88     | 86     | 74      | 71    | 74     |
| February . . . . .  | 86     | 90     | 77      | 94    | 61     |
| March . . . . .     | 101    | 102    | 90      | 101   | 86     |
| April . . . . .     | 112    | 112    | 105     | 118   | 120    |
| May . . . . .       | 120    | 117    | 132     | 136   | 137    |
| June . . . . .      | 122    | 135    | 140     | 144   | 130    |
| July . . . . .      | 108    | 119    | 132     | 122   | 125    |
| August . . . . .    | 107    | 102    | 104     | 104   | 120    |
| September . . . . . | 92     | 92     | 99      | 88    | 90     |
| October . . . . .   | 93     | 90     | 95      | 77    | 102    |
| November . . . . .  | 87     | 79     | 82      | 73    | 82     |
| December . . . . .  | 84     | 76     | 70      | 72    | 73     |
| Total . . . . .     | 1,200  | 1,200  | 1,200   | 1,200 | 1,200  |

The causes of suicide vary with race and climate thus :—

| <i>Spain and Italy</i> |       | <i>North Europe</i> |       |
|------------------------|-------|---------------------|-------|
| Insanity . . . . .     | 29.0  | Insanity . . . . .  | 34.0  |
| Poverty . . . . .      | 22.0  | Grief . . . . .     | 23.0  |
| Sickness . . . . .     | 20.0  | Drink . . . . .     | 15.0  |
| Various . . . . .      | 29.0  | Various . . . . .   | 28.0  |
| Total . . . . .        | 100.0 | Total . . . . .     | 100.0 |

The distribution according to seasons, from observations in 1861-77, was as follows :—

|                       | Spring | Summer | Autumn | Winter | Total |
|-----------------------|--------|--------|--------|--------|-------|
| U. Kingdom . . . . .  | 336    | 372    | 264    | 228    | 1,200 |
| France . . . . .      | 331    | 356    | 261    | 252    | 1,200 |
| Prussia . . . . .     | 341    | 348    | 272    | 239    | 1,200 |
| Saxony . . . . .      | 332    | 353    | 270    | 245    | 1,200 |
| Bavaria . . . . .     | 348    | 364    | 254    | 234    | 1,200 |
| Wurtemberg . . . . .  | 335    | 373    | 252    | 240    | 1,200 |
| Austria . . . . .     | 357    | 375    | 235    | 233    | 1,200 |
| Italy . . . . .       | 355    | 370    | 238    | 237    | 1,200 |
| Sweden . . . . .      | 343    | 375    | 274    | 208    | 1,200 |
| Norway . . . . .      | 383    | 366    | 273    | 178    | 1,200 |
| Denmark . . . . .     | 350    | 370    | 264    | 216    | 1,200 |
| Holland . . . . .     | 384    | 356    | 220    | 240    | 1,200 |
| Belgium . . . . .     | 331    | 359    | 277    | 233    | 1,200 |
| Switzerland . . . . . | 322    | 346    | 294    | 238    | 1,200 |
| Spain . . . . .       | 316    | 449    | 240    | 195    | 1,200 |

Suicide is most frequent in the summer months in all countries except Norway and Holland, where the spring months are most fatal.

The occurrence of suicide by day or night shows the following percentages in France and Switzerland :—

|                            | France | Switzerland |
|----------------------------|--------|-------------|
| Noon to 6 P.M. . . . .     | 22.8   | 22.0        |
| 6 P.M. to midnight . . . . | 23.2   | 23.6        |
| Midnight to 6 A.M. . . . . | 18.3   | 18.0        |
| 6 A.M. to noon . . . . .   | 35.7   | 36.4        |

The method of suicide varies with sex and country as follows, according to Ritti's observations in 1861-77 :—

| <i>Men</i>            |         |          |          |       |        |         |
|-----------------------|---------|----------|----------|-------|--------|---------|
|                       | Hanging | Drowning | Firearms | Knife | Poison | Various |
| England . . . . .     | 407     | 155      | 66       | 218   | 70     | 84      |
| France . . . . .      | 468     | 254      | 139      | 35    | 15     | 89      |
| Prussia . . . . .     | 645     | 131      | 133      | 40    | 20     | 31      |
| Saxony . . . . .      | 701     | 134      | 104      | 20    | 16     | 25      |
| Wurtemberg . . . . .  | 736     | 157      | 33       | 53    | 11     | 10      |
| Austria . . . . .     | 505     | 208      | 172      | ...   | 66     | 49      |
| Italy . . . . .       | 166     | 350      | 163      | 63    | 53     | 205     |
| Sweden . . . . .      | 510     | 193      | 116      | 95    | 79     | 7       |
| Norway . . . . .      | 664     | 184      | 54       | 47    | ...    | 51      |
| Denmark . . . . .     | 727     | 142      | 37       | 18    | 60     | 16      |
| Belgium . . . . .     | 563     | 198      | 139      | 42    | 15     | 43      |
| Switzerland . . . . . | 458     | 228      | 186      | 70    | 25     | 33      |

| <i>Women</i>          |         |          |          |       |        |         |
|-----------------------|---------|----------|----------|-------|--------|---------|
|                       | Hanging | Drowning | Firearms | Knife | Poison | Various |
| England . . . . .     | 281     | 324      | 1        | 115   | 155    | 124     |
| France . . . . .      | 311     | 423      | 10       | 28    | 37     | 191     |
| Prussia . . . . .     | 440     | 326      | 81       | 36    | 70     | 47      |
| Saxony . . . . .      | 461     | 440      | 5        | 25    | 45     | 24      |
| Wurtemberg . . . . .  | 458     | 441      | ...      | 60    | 21     | 20      |
| Austria . . . . .     | 324     | 410      | 38       | ...   | 176    | 52      |
| Italy . . . . .       | 175     | 491      | 31       | 54    | 79     | 170     |
| Sweden . . . . .      | 404     | 324      | 1        | 87    | 179    | 5       |
| Norway . . . . .      | 557     | 332      | 5        | 9     | ...    | 97      |
| Denmark . . . . .     | 583     | 359      | 1        | 26    | 31     | ...     |
| Belgium . . . . .     | 447     | 395      | 2        | 26    | 70     | 60      |
| Switzerland . . . . . | 228     | 516      | 45       | 45    | 91     | 75      |

According to Bulgarin, 73 per cent. of male suicides in Russia are by hanging. The Austrian classification does not distinguish those by the knife; hence the blanks.

It is a painful fact that in all armies suicide is much more frequent than among civilians of same age. The rates per million in the several countries show thus, age 20 to 60 years, for the years 1869-73 :—

|                    | Soldiers | Civilians |
|--------------------|----------|-----------|
| British . . . . .  | 380      | 110       |
| French . . . . .   | 510      | 205       |
| German . . . . .   | 640      | 250       |
| Austrian . . . . . | 860      | 120       |
| Italian . . . . .  | 300      | 80        |
| Belgian . . . . .  | 460      | 70        |
| Swedish . . . . .  | 450      | 120       |

In 1882 the rates in the British army were :—

| Age             | U. Kingdom | Colonies | India |
|-----------------|------------|----------|-------|
| 20-25 . . . . . | 200        | 210      | 130   |
| 25-30 . . . . . | 390        | 330      | 390   |
| 30-35 . . . . . | 510        | 450      | 840   |
| 35-40 . . . . . | 710        | 810      | 1,030 |

The rates in the United Kingdom were 310 for infantry, 340 for artillery, and 500 for cavalry, per million.

#### UNITED KINGDOM

Dr. Ogle's paper for England and Wales shows 42,630 suicides in 26 years ending 1883. Some of these were of children under 10 years old, but not sufficient to adopt a rate. He therefore classifies age thus :—

| Rates per Million  |         |      |        |
|--------------------|---------|------|--------|
|                    | Persons | Male | Female |
| 10-15 . . . . .    | 4       | 4    | 3      |
| 15-20 . . . . .    | 28      | 26   | 30     |
| 20-25 . . . . .    | 47      | 62   | 34     |
| 25-35 . . . . .    | 69      | 99   | 42     |
| 35-45 . . . . .    | 116     | 175  | 68     |
| 45-55 . . . . .    | 184     | 271  | 103    |
| 55-65 . . . . .    | 251     | 396  | 119    |
| 65-75 . . . . .    | 243     | 394  | 113    |
| 75-85 . . . . .    | 183     | 306  | 85     |
| Over 85 . . . . .  | 116     | 226  | 46     |
| All ages . . . . . | 72      | 104  | 41     |

It will be seen that suicide is much more frequent among males than females, the ratio being as follows :—

| Age               | Female | Male |
|-------------------|--------|------|
| 10-15 . . . . .   | 100    | 133  |
| 25-35 . . . . .   | 100    | 236  |
| 55-65 . . . . .   | 100    | 333  |
| Over 85 . . . . . | 100    | 491  |

Suicides among males of 25-65 years of age were per million as follows :—

|                         |                            |                            |
|-------------------------|----------------------------|----------------------------|
| Miner . . . . . 74      | Painter . . . . . 224      | Baker . . . . . 328        |
| Clergyman . . . . . 139 | Weaver . . . . . 229       | Clerk . . . . . 329        |
| Fisherman . . . . . 157 | Miller . . . . . 230       | Broker . . . . . 346       |
| Gardener . . . . . 160  | Tanner . . . . . 249       | Milkman . . . . . 353      |
| Mason . . . . . 175     | Shoemaker . . . . . 252    | Hairdresser . . . . . 364  |
| Labourer . . . . . 177  | Tailor . . . . . 256       | Butcher . . . . . 407      |
| Policeman . . . . . 201 | Printer . . . . . 262      | Lawyer . . . . . 408       |
| Carpenter . . . . . 213 | Farmer . . . . . 270       | Physician . . . . . 472    |
| Carter . . . . . 214    | Schoolmaster . . . . . 290 | Beer-seller . . . . . 474  |
| Grocer . . . . . 218    | Cabman . . . . . 303       | Soldier . . . . . 1,149    |
| Smith . . . . . 222     | Watchmaker . . . . . 315   | Gen. average . . . . . 222 |

The method of suicide is shown in the following table:—

| Method                     | Persons | Males | Females |
|----------------------------|---------|-------|---------|
| Hanging . . . . .          | 365     | 417   | 240     |
| Drowning . . . . .         | 185     | 152   | 264     |
| Cut or stab . . . . .      | 184     | 207   | 129     |
| Poison . . . . .           | 99      | 79    | 145     |
| Gunsbot . . . . .          | 48      | 67    | 2       |
| Jump from height . . . . . | 25      | 21    | 36      |
| Railway train . . . . .    | 19      | 24    | 8       |
| Otherwise . . . . .        | 75      | 33    | 176     |
| All methods . . . . .      | 1,000   | 1,000 | 1,000   |

The ratio of methods, however, varies with age, as shown thus:—

|                    | Males |       | Females |       |
|--------------------|-------|-------|---------|-------|
|                    | 25-35 | 55-65 | 25-35   | 55-65 |
| Gan . . . . .      | 101   | 45    | 2       | 1     |
| Cut . . . . .      | 219   | 202   | 146     | 138   |
| Poison . . . . .   | 111   | 58    | 206     | 83    |
| Drowning . . . . . | 185   | 132   | 295     | 200   |
| Hanging . . . . .  | 282   | 500   | 184     | 305   |
| Various . . . . .  | 102   | 63    | 167     | 273   |
| Total . . . . .    | 1,000 | 1,000 | 1,000   | 1,000 |

The following table shows the suicide mortality at different ages in various occupations:—

|                        | Per Million |       |                       | Per Million |       |
|------------------------|-------------|-------|-----------------------|-------------|-------|
|                        | 25-45       | 45-65 |                       | 25-45       | 45-65 |
| Lawyer . . . . .       | 324         | 562   | Baker . . . . .       | 163         | 632   |
| Physician . . . . .    | 381         | 639   | Hairdresser . . . . . | 270         | 536   |
| Schoolmaster . . . . . | 156         | 536   | Printer . . . . .     | 156         | 458   |
| Broker . . . . .       | 271         | 485   | Tailor . . . . .      | 147         | 457   |
| Clerk . . . . .        | 249         | 475   | Shoemaker . . . . .   | 203         | 341   |
| Farmer . . . . .       | 160         | 473   | Mason . . . . .       | 90          | 330   |
| Miller . . . . .       | 68          | 555   | Carpenter . . . . .   | 122         | 381   |
| Gardener . . . . .     | 98          | 274   | Policeman . . . . .   | 82          | 421   |
| Beer-seller . . . . .  | 402         | 606   | Cabman . . . . .      | 193         | 506   |
| Druggist . . . . .     | 380         | 563   | Soldier . . . . .     | 506         | 2,336 |
| Grocer . . . . .       | 160         | 326   | Fisherman . . . . .   | 43          | 367   |
| Butcher . . . . .      | 243         | 708   | Labourer . . . . .    | 114         | 292   |

There has been a steady decline of suicide in London compared with population, viz.:—

| Period            | Annual Average |                         |
|-------------------|----------------|-------------------------|
|                   | Number         | Per Million Inhabitants |
| 1841-50 . . . . . | 231            | 107                     |
| 1851-60 . . . . . | 257            | 100                     |
| 1861-70 . . . . . | 268            | 88                      |
| 1871-80 . . . . . | 305            | 85                      |

This is contrary to the result in nearly all other cities. In Scotland the rates per million persons at various ages are stated as follows:—

| Age             | Per Million Persons |        |                    |
|-----------------|---------------------|--------|--------------------|
|                 | Male                | Female | General Population |
| 20-30 . . . . . | 128                 | 42     | 84                 |
| 31-40 . . . . . | 128                 | 57     | 93                 |
| 41-50 . . . . . | 180                 | 52     | 115                |
| 51-60 . . . . . | 162                 | 42     | 101                |
| 61-70 . . . . . | 150                 | 36     | 93                 |
| 71-80 . . . . . | 11                  | 26     | 20                 |

Scotland is the only country in the world where the rate of suicide in urban population is less than among the rural.

#### FRANCE

From whatever cause, the increase of suicide has been terrific; the official returns show thus:—

| Year           | Number | Per Million Inhabitants |
|----------------|--------|-------------------------|
| 1830 . . . . . | 1,756  | 51                      |
| 1840 . . . . . | 2,752  | 82                      |
| 1850 . . . . . | 3,596  | 103                     |
| 1860 . . . . . | 4,050  | 112                     |
| 1870 . . . . . | 4,957  | 133                     |
| 1880 . . . . . | 6,638  | 178                     |
| 1885 . . . . . | 7,902  | 205                     |

Legoyt gives the annual average during fifty-three years as follows:—

| Period            | Number | Per Million Inhabitants |
|-------------------|--------|-------------------------|
| 1827-30 . . . . . | 1,739  | 50                      |
| 1831-40 . . . . . | 2,345  | 70                      |
| 1841-50 . . . . . | 3,200  | 90                      |
| 1851-60 . . . . . | 3,830  | 105                     |
| 1861-70 . . . . . | 4,935  | 130                     |
| 1871-79 . . . . . | 5,818  | 157                     |

He shows the difference between persons with children and those without as follows:—

|                   | Per Million   |                  |
|-------------------|---------------|------------------|
|                   | With Children | Without Children |
| Husband . . . . . | 205           | 470              |
| Widower . . . . . | 526           | 1,004            |
| Wife . . . . .    | 45            | 158              |
| Widow . . . . .   | 104           | 238              |

He classes married and single persons as follows:—

|                     | Per Million |
|---------------------|-------------|
| Married . . . . .   | 272         |
| Unmarried . . . . . | 422         |
| Widowed . . . . .   | 737         |

Guerry classifies the ratios for days of the week, 100 being the average, as follows:—

|                     |     |                    |     |
|---------------------|-----|--------------------|-----|
| Sunday . . . . .    | 96  | Thursday . . . . . | 110 |
| Monday . . . . .    | 106 | Friday . . . . .   | 96  |
| Tuesday . . . . .   | 110 | Saturday . . . . . | 78  |
| Wednesday . . . . . | 104 |                    |     |

In five years ending 1880 no fewer than 238 children under fifteen years of age committed suicide.

#### GERMANY

In Prussia the official returns show the annual suicides per million inhabitants as follows:—

|                   |    |                   |     |
|-------------------|----|-------------------|-----|
| 1816-20 . . . . . | 70 | 1841-50 . . . . . | 105 |
| 1821-30 . . . . . | 86 | 1851-60 . . . . . | 126 |
| 1831-40 . . . . . | 99 | 1861-75 . . . . . | 130 |

In Saxony and Frankfort the rates per million were:—

| <i>Saxony</i> |   |     | <i>Frankfort</i> |   |     |
|---------------|---|-----|------------------|---|-----|
| 1836-50       | . | 191 | 1852-59          | . | 349 |
| 1851-70       | . | 264 | 1860-69          | . | 365 |
| 1871-77       | . | 299 | 1870-77          | . | 344 |

The rates for Bavaria, Wurtemberg, and Baden were as follows:—

|                      | 1841-45 | 1871-76 |
|----------------------|---------|---------|
| Bavaria . . . . .    | 55      | 90      |
| Wurtemberg . . . . . | 107     | 162     |
| Baden . . . . .      | 68      | 156     |

In Bavaria the lowest rates were from November to January inclusive, the highest in May and June. As regards condition, the rates per million in Bavaria were:—

|                     |     |
|---------------------|-----|
| Married . . . . .   | 98  |
| Unmarried . . . . . | 115 |
| Widowed . . . . .   | 197 |

These rates apply only to adults, the rate for all ages, as shown above, having been only 90.

As regards condition in Prussia, the annual average number of suicides in three years ending 1875 was as follows:—

|                    | Men   | Women | Total |
|--------------------|-------|-------|-------|
| Divorced . . . . . | 43    | 8     | 51    |
| Single . . . . .   | 796   | 224   | 1,020 |
| Married . . . . .  | 1,130 | 215   | 1,345 |
| Widowed . . . . .  | 351   | 118   | 469   |
| Total . . . . .    | 2,320 | 565   | 2,885 |

## AUSTRIA

Official returns show that for Austria, without Hungary, the rates rose thus, per million inhabitants:—

|                   |     |
|-------------------|-----|
| 1864-72 . . . . . | 72  |
| 1873-77 . . . . . | 122 |

The rate in Hungary for 1864-65 was only 52. The records of Vienna for 1876-78 showed yearly 110 suicides of children under 14.

## ITALY

The following table is for all Italy from 1865, but previous rates are only for the kingdom of Sardinia:—

| Period            | Suicides Yearly | Per Million Inhabitants |
|-------------------|-----------------|-------------------------|
| 1824 . . . . .    | ...             | 10                      |
| 1838 . . . . .    | ...             | 15                      |
| 1865-74 . . . . . | 498             | 20                      |
| 1874-77 . . . . . | 990             | 37                      |
| 1880 . . . . .    | 1,260           | 45                      |

Those recorded in ten years ending 1874 were:—

|                 |       |
|-----------------|-------|
| Men . . . . .   | 3,955 |
| Women . . . . . | 1,028 |

Total . . . . . 4,983

Various cities and provinces had the following rates recorded at different dates, per million inhabitants:—

| Naples            |    | Milan             |     |
|-------------------|----|-------------------|-----|
| 1828 . . . . .    | 56 | 1821-25 . . . . . | 52  |
| 1835 . . . . .    | 88 | 1831-35 . . . . . | 58  |
| 1875 . . . . .    | 60 | 1876 . . . . .    | 133 |
| Lombardy          |    | Turin             |     |
| 1817-27 . . . . . | 20 | 1825-39 . . . . . | 60  |
| 1865 . . . . .    | 50 | 1855-59 . . . . . | 90  |
| 1874 . . . . .    | 44 | 1860-64 . . . . . | 110 |

The rate of suicide per million inhabitants was five times higher in Piedmont and Lombardy than in Naples and Sicily, the ratio of persons able to read and write being twice as high in the former as in the latter provinces, from which Italian writers deduce (and Dr. Ogle favours the theory) that education is a predisposing cause. Perhaps climate or race has some effect, the northern Italians being a very different race from the southern.

The rates as to condition for all Italy in the years 1866-70 were as follows, per million:—

|                     | Men |                    |      |
|---------------------|-----|--------------------|------|
| Married . . . . .   | 41  | Firearms . . . . . | 24.5 |
| Unmarried . . . . . | 44  | Drowning . . . . . | 19.0 |
| Widowed . . . . .   | 15  | Various . . . . .  | 56.5 |

Suicide was nearly three times more numerous in May than in October, as 280 to 100.

The occupations of those who committed suicide in 1874-75 were:—

|                       | Number | Yearly | Ratio |
|-----------------------|--------|--------|-------|
| Farmers . . . . .     | 252    |        | 26.0  |
| Operatives . . . . .  | 206    |        | 21.2  |
| Proprietors . . . . . | 83     |        | 8.6   |
| Merchants . . . . .   | 55     |        | 5.7   |
| Soldiers . . . . .    | 60     |        | 6.3   |
| Various . . . . .     | 311    |        | 32.2  |
| Total . . . . .       | 967    |        | 100.0 |

## SWEDEN

Official records are quoted by Morselli, which may be condensed as follows; this table shows the rate of suicide yearly per million inhabitants:—

| Sweden              |      | Stockholm         |      |
|---------------------|------|-------------------|------|
| Period              | Rate | Period            | Rate |
| 1749-80 . . . . .   | 12   | 1831-40 . . . . . | 149  |
| 1781-1830 . . . . . | 39   | 1841-50 . . . . . | 177  |
| 1831-50 . . . . .   | 66   | 1851-60 . . . . . | 210  |
| 1851-65 . . . . .   | 72   | 1861-70 . . . . . | 363  |
| 1866-75 . . . . .   | 82   | 1871-75 . . . . . | 272  |

The rates for all Sweden in the last fifteen years of Morselli's tables showed as follows:—

|                      | 1861-70 | 1871-75 |
|----------------------|---------|---------|
| Urban . . . . .      | 205     | 167     |
| Rural . . . . .      | 63      | 68      |
| All Sweden . . . . . | 80      | 81      |

The percentages as regarded sex showed this variation:—

|                   | 1861-70 | 1871-75 |
|-------------------|---------|---------|
| Males . . . . .   | 78.1    | 76.3    |
| Females . . . . . | 21.9    | 23.7    |
| Total . . . . .   | 100.0   | 100.0   |

## NORWAY AND DENMARK

These two countries peopled by the same race present as great a contrast as England and Ireland. The rates of suicide per million inhabitants were:—

| Period            | Norway | Denmark |
|-------------------|--------|---------|
| 1831-40 . . . . . | 103    | 213     |
| 1841-50 . . . . . | 108    | 245     |
| 1851-60 . . . . . | 100    | 274     |
| 1861-70 . . . . . | 81     | 282     |
| 1871-75 . . . . . | 73     | 258     |

In Norway a law was passed in 1850 restricting the sale of liquor, which is supposed to have had some effect in diminishing suicide.

## SWITZERLAND

Official returns for six years ending 1881 show the rates of suicide yearly per million inhabitants thus:—

| Cantons              | Catholics | Protestants | General Population |
|----------------------|-----------|-------------|--------------------|
| Catholics . . . . .  | 20        | 205         | 81                 |
| Protestant . . . . . | 127       | 602         | 262                |
| Mixed . . . . .      | 116       | 360         | 280                |

It would appear that in Catholic cantons the Protestants are much less prone to suicide than where their own religion is dominant. For like reason Catholics are much

are liable to suicide in Protestant or mixed cantons than their own.

### BELGIUM

Official returns give the annual rate per million inhabitants as follows:—

|                  |    |                   |     |
|------------------|----|-------------------|-----|
| 831-40 . . . . . | 43 | 1866-75 . . . . . | 67  |
| 841-50 . . . . . | 61 | 1881-85 . . . . . | 105 |
| 851-65 . . . . . | 49 | 1887 . . . . .    | 130 |

The returns for the years 1881-85 showed the ratios of 1000 suicides as follows:—

| Method             | Men | Women | Total |
|--------------------|-----|-------|-------|
| Hanging . . . . .  | 425 | 53    | 478   |
| Drowning . . . . . | 205 | 72    | 277   |
| Firearms . . . . . | 118 | 3     | 121   |
| Dagger . . . . .   | 32  | 3     | 35    |
| Poison . . . . .   | 8   | 13    | 21    |
| Various . . . . .  | 52  | 16    | 68    |
| Total . . . . .    | 840 | 160   | 1,000 |

The returns for 1887 show age ratios as follows:—

| Age               | Men | Women | Total |
|-------------------|-----|-------|-------|
| 0-10 . . . . .    | 19  | 5     | 24    |
| 16-25 . . . . .   | 98  | 35    | 133   |
| 25-40 . . . . .   | 197 | 38    | 235   |
| 40-50 . . . . .   | 180 | 32    | 212   |
| 50-60 . . . . .   | 179 | 24    | 203   |
| 60-70 . . . . .   | 113 | 19    | 132   |
| Over 70 . . . . . | 44  | 17    | 61    |
| Total . . . . .   | 830 | 170   | 1,000 |

### UNITED STATES

The *New York Chronicle* in 1888 published tables covering four years for the whole of the Union, but these cannot be regarded as complete. They summed up 6253 suicides, being less than 30 per million inhabitants yearly, whereas the actual rate will hardly fall short of 60. The tables meanwhile enable us to form averages as to age and other particulars:—

| Age, Years        | Annual Suicides | Ratio |
|-------------------|-----------------|-------|
| 0-15 . . . . .    | 12              | 0.8   |
| 15-20 . . . . .   | 88              | 5.7   |
| 21-30 . . . . .   | 205             | 13.3  |
| 31-40 . . . . .   | 213             | 13.9  |
| 41-50 . . . . .   | 231             | 15.1  |
| 51-60 . . . . .   | 175             | 11.5  |
| Over 60 . . . . . | 607             | 39.7  |

Total . . . . . 1,531 100.0

The condition showed the following figures:—

|                    | Men | Women | Total | Ratio |
|--------------------|-----|-------|-------|-------|
| Married . . . . .  | 513 | 150   | 663   | 53.3  |
| Single . . . . .   | 330 | 118   | 448   | 36.2  |
| Widowed . . . . .  | 72  | 32    | 104   | 8.4   |
| Divorced . . . . . | 16  | 10    | 26    | 2.1   |
| Total . . . . .    | 931 | 310   | 1,241 | 100.0 |

The principal professions of suicides were:—

|                      | Number | Ratio |
|----------------------|--------|-------|
| Farmers . . . . .    | 195    | 15.8  |
| Labourers . . . . .  | 50     | 4.0   |
| Courtesans . . . . . | 33     | 2.6   |
| Innkeepers . . . . . | 30     | 2.4   |
| Various . . . . .    | 933    | 75.2  |
| Total . . . . .      | 1,241  | 100.0 |

Some of those in the first table were not classified as to condition or profession.

### AUSTRALIA

Coghlan's tables for thirteen years ending 1888 give the rates per million inhabitants yearly thus:—

|                           |    |                       |     |
|---------------------------|----|-----------------------|-----|
| Tasmania . . . . .        | 51 | New Zealand . . . . . | 95  |
| South Australia . . . . . | 87 | Victoria . . . . .    | 113 |
| New South Wales . . . . . | 88 | Queensland . . . . .  | 135 |

General rate for Australia was as follows:—

|                |     |
|----------------|-----|
| 1871 . . . . . | 86  |
| 1888 . . . . . | 115 |

### SULPHUR

The quantities exported from Sicily and those imported into Great Britain were as follows:—

| Year           | Export from Sicily, Tons | Import into Great Britain, Tons | Value per Ton, £ |
|----------------|--------------------------|---------------------------------|------------------|
| 1820 . . . . . | 18,500                   | 4,600                           | 10               |
| 1830 . . . . . | 38,100                   | 12,100                          | 8                |
| 1840 . . . . . | 77,800                   | 34,400                          | 5                |
| 1850 . . . . . | 85,000                   | 33,500                          | 8                |
| 1860 . . . . . | 140,000                  | 50,200                          | 9                |
| 1870 . . . . . | 173,000                  | 53,300                          | 6                |
| 1880 . . . . . | 287,000                  | 46,400                          | 5                |
| 1888 . . . . . | 324,000                  | 40,000                          | 4                |

There are 18,000 miners engaged at the sulphur deposits in Sicily.

### SURGERY

The mortality after amputation in various hospitals was stated to be in 1880 thus:—

#### Deaths per 100

|                  |      |                         |      |
|------------------|------|-------------------------|------|
| London . . . . . | 37.8 | Edinburgh . . . . .     | 43.3 |
| Paris . . . . .  | 60.0 | Glasgow . . . . .       | 36.0 |
| Zürich . . . . . | 46.0 | English rural . . . . . | 17.8 |

In such German hospitals as have adopted the Listerian method, invented by Professor Lister of Glasgow, the death-rate after amputation has fallen to 4.7. Some English hospitals showed the following:—

#### Death-Rate per Cent.

| <i>London</i>               |      | <i>Rural</i>            |      |
|-----------------------------|------|-------------------------|------|
| University . . . . .        | 25.7 | Tewkesbury . . . . .    | 3.8  |
| St. Bartholomew's . . . . . | 36.6 | St. Leonard's . . . . . | 10.0 |
| Guy's . . . . .             | 38.2 | St. Alban's . . . . .   | 14.2 |
| St. George's . . . . .      | 38.8 | Ashford . . . . .       | 20.0 |
| Whitechapel . . . . .       | 47.3 | Stockton . . . . .      | 25.0 |

#### Death-Rate per Cent.

| Amputation        | English Rural | Glasgow | Glasgow   | Guy's   | University College, London |
|-------------------|---------------|---------|-----------|---------|----------------------------|
|                   | 1859-78       | 1850-74 | 1795-1838 | 1854-61 | 1871                       |
| Arm . . . . .     | 8.1           | 34.0    | 48.0      | 20.0    | Fore-arm, 5.0              |
| Leg . . . . .     | 15.5          | 45.0    | 68.0      | 39.0    | Leg, 22.6                  |
| Thigh . . . . .   | 33.3          | 52.0    | 92.0      | 50.0    | Shoulder, 37.4             |
| General . . . . . | 17.8          | 36.0    | 51.0      | 38.2    | Hip, 40.0                  |

The following tables refer to various campaigns:—

|                                | Death-Rate per Cent. |              |
|--------------------------------|----------------------|--------------|
|                                | Arm                  | Leg or Thigh |
| Peninsula . . . . .            | 12.9                 | 20.8         |
| Waterloo . . . . .             | 11.6                 | 26.8         |
| Crimea . . . . .               | 15.5                 | 50.2         |
| United States (1863) . . . . . | 21.2                 | 64.0         |

The amputation death-rates of the Crimean and American campaigns may be compared (Erichsen) thus:—

|                    | Crimea | United States |
|--------------------|--------|---------------|
| Hand . . . . .     | ...    | 1.6           |
| Arm . . . . .      | 19.0   | 21.2          |
| Shoulder . . . . . | 35.0   | 39.2          |
| Foot . . . . .     | 16.0   | 9.2           |
| Leg . . . . .      | 37.0   | 26.0          |
| Knee . . . . .     | 57.0   | 55.0          |
| Thigh . . . . .    | 64.0   | 64.4          |
| Hip . . . . .      | 100.0  | 85.7          |

Schede compares the results of Lister's with other systems thus:—

|                    | Percentage of Deaths |            |          |
|--------------------|----------------------|------------|----------|
|                    | Old System           | Kronlein's | Lister's |
| Arm . . . . .      | 10                   | 14         | 0        |
| Leg . . . . .      | 33                   | 18         | 2        |
| Thigh . . . . .    | 41                   | 36         | 7        |
| Shoulder . . . . . | 52                   | 20         | 11       |
| General . . . . .  | 30                   | 20         | 4        |

Bugnot compares the general mortality of divers systems thus: Lister, 11; Kronlein, 17; Simpson, 33; Trelat, 46; old method, 53 per cent.

In previous records the average mortality of amputations was estimated per cent. thus: Lawrie, 37; Malgaigne, 39; Le Fort, 43; Trelat, 46; Churchill, 49. There were 790 cases at the Paris Hospital in 1841-46, of whom 320 died, say 40 per cent. *The Dict. Sci. Med.*

records 5000 amputations, of which 1900 proved fatal, say 38 per cent., the respective rates of mortality being:—

|                    |      |                 |      |
|--------------------|------|-----------------|------|
| Fore-arm . . . . . | 13.4 | Leg . . . . .   | 50.6 |
| Arm . . . . .      | 51.5 | Thigh . . . . . | 84.8 |

Hall observed in the Crimea that the mortality after wounds and amputations was much greater in summer and autumn than in winter.

In the ligation of arteries, Philippe and Inman recognise a death-rate of 33 per cent.; Norrit, 38 per cent. In cases of hernia: Textor, 43; Cooper, 47; London hospitals, 51; and Malgaigne, 60.

Sir Spencer Wells gives the age and death-rate of cases of ovariectomy thus:—

| Age                | Ratio of Cases | Deaths per 100 |
|--------------------|----------------|----------------|
| Under 30 . . . . . | 27.6           | 25             |
| 30-40 . . . . .    | 26.4           | 27             |
| 40-50 . . . . .    | 24.6           | 23             |
| Over 50 . . . . .  | 21.4           | 29             |
| Total . . . . .    | 100.0          | 26             |

The above is the result of 500 cases. He shows also that in 1000 operations for this disease the death-rate has been diminishing thus:—

|                       | Deaths |                       | Deaths |
|-----------------------|--------|-----------------------|--------|
| 1st hundred . . . . . | 34     | 6th hundred . . . . . | 28     |
| 2nd " . . . . .       | 28     | 7th " . . . . .       | 24     |
| 3rd " . . . . .       | 23     | 8th " . . . . .       | 24     |
| 4th " . . . . .       | 22     | 9th " . . . . .       | 17     |
| 5th " . . . . .       | 20     | 10th " . . . . .      | 11     |

## T.

## TALLOW

The production of tallow (including lard) averages 18 per cent. of that of meat, and is shown approximately as follows:—

|                          | Tons       |             | Consumption, Lbs. per Inhab. |
|--------------------------|------------|-------------|------------------------------|
|                          | Production | Consumption |                              |
| United Kingdom . . . . . | 200,000    | 200,000     | 18                           |
| France . . . . .         | 215,000    | 265,000     | 16                           |
| Germany . . . . .        | 250,000    | 270,000     | 12                           |
| Russia . . . . .         | 340,000    | 335,000     | 8                            |
| Austria . . . . .        | 200,000    | 190,000     | 11                           |
| Italy . . . . .          | 65,000     | 65,000      | 4                            |
| Spain . . . . .          | 95,000     | 95,000      | 22                           |
| Portugal . . . . .       | 15,000     | 15,000      | 8                            |
| Sweden . . . . .         | 25,000     | 27,000      | 12                           |
| Norway . . . . .         | 12,000     | 12,000      | 11                           |
| Denmark . . . . .        | 20,000     | 20,000      | 22                           |
| Holland . . . . .        | 20,000     | 90,000      | 48                           |
| Belgium . . . . .        | 20,000     | 25,000      | 9                            |
| Various . . . . .        | 80,000     | 80,000      | ...                          |
| Europe . . . . .         | 1,557,000  | 1,779,000   | 12                           |
| United States . . . . .  | 880,000    | 700,000     | 25                           |
| Canada . . . . .         | 40,000     | 40,000      | 18                           |
| Australia . . . . .      | 90,000     | 60,000      | 36                           |
| Argentina . . . . .      | 50,000     | 35,000      | 22                           |
| Total . . . . .          | 2,617,000  | 2,614,000   | ...                          |

The use of tallow candles has greatly declined since the introduction of gas, petroleum, and electric light, but the consumption of tallow has, nevertheless, steadily increased, as well as that of lard.

The countries with a surplus of tallow and lard exported thus:—

|                     | Tons Exported |        |        |         |         |
|---------------------|---------------|--------|--------|---------|---------|
|                     | 1880          | 1880   | 1870   | 1880    | 1888    |
| Russia . . . . .    | 66,400        | 40,300 | 21,100 | 10,400  | 3,000   |
| U. States . . . . . | 2,200         | 34,000 | 32,000 | 220,000 | 180,000 |
| Argentina . . . . . | 8,600         | 45,300 | 62,400 | 23,300  | 15,000  |
| Australia . . . . . | ...           | 6,200  | 25,300 | 32,100  | 30,500  |

The production and consumption of tallow and lard in the United Kingdom were approximately as follows:—

|                | Tons     |          |          | Consumption, Lbs. per Inhab. |
|----------------|----------|----------|----------|------------------------------|
|                | Produced | Consumed | Imported |                              |
| 1830 . . . . . | 170,000  | 226,600  | 56,600   | 21                           |
| 1840 . . . . . | 175,000  | 231,300  | 56,300   | 21                           |
| 1850 . . . . . | 180,000  | 242,200  | 62,200   | 21                           |
| 1860 . . . . . | 185,000  | 265,100  | 80,100   | 22                           |
| 1870 . . . . . | 195,000  | 283,000  | 88,000   | 21                           |
| 1880 . . . . . | 200,000  | 299,000  | 99,000   | 19                           |
| 1888 . . . . . | 200,000  | 287,000  | 87,000   | 18                           |

The production and consumption in the United States were approximately as follows:—

| Year           | Tons     |          |          | Consumption, Lbs. per Inhab. |
|----------------|----------|----------|----------|------------------------------|
|                | Produced | Consumed | Exported |                              |
| 1860 . . . . . | 530,000  | 496,000  | 34,000   | 33                           |
| 1870 . . . . . | 460,000  | 428,000  | 32,000   | 24                           |
| 1880 . . . . . | 760,000  | 540,000  | 220,000  | 24                           |
| 1888 . . . . . | 880,000  | 700,000  | 180,000  | 25                           |

## TAXES

Omitting public services, such as the post-office and revenues from crown lands and forests, the amount levied by taxation yearly (1888-90) was about as follows:—\*

|            | Amount, £   |             |             | Shillings per Inhab. | Percentage of Earnings |
|------------|-------------|-------------|-------------|----------------------|------------------------|
|            | National    | Local       | Total       |                      |                        |
| U. Kingdom | 73,440,000  | 45,780,000  | 119,220,000 | 63                   | 9.3                    |
| France     | 102,000,000 | 40,800,000  | 142,800,000 | 74                   | 13.6                   |
| Germany    | 64,900,000  | 44,000,000  | 108,900,000 | 45                   | 10.4                   |
| Russia     | 61,200,000  | 11,200,000  | 72,400,000  | 16                   | 7.4                    |
| Austria    | 50,100,000  | 5,300,000   | 55,400,000  | 28                   | 9.5                    |
| Italy      | 53,800,000  | 27,200,000  | 81,000,000  | 54                   | 22.0                   |
| Spain      | 31,900,000  | 5,000,000   | 36,900,000  | 41                   | 12.3                   |
| Portugal   | 6,600,000   | 1,000,000   | 7,600,000   | 33                   | 14.0                   |
| Sweden     | 3,670,000   | 3,300,000   | 6,970,000   | 28                   | 6.7                    |

| Europe     | 474,720,000 | 195,730,000 | 670,450,000 | 44                   | 11.0                   |

\* The taxes of Prussia, Bavaria, &c., are included as national in Germany, but those of the States of New York, Pennsylvania, &c., are included among local in the United States. Local taxes of Canada and some other countries are in blank, because they cannot be ascertained.

The following table, by Professor Bochk in 1885, shows the sums levied on the principal articles of consumption:—

|             | Amount, £  |             |            |            |             | Pence per Inhabitant |             |       |         |       |
|-------------|------------|-------------|------------|------------|-------------|----------------------|-------------|-------|---------|-------|
|             | Liquor     | Coffee, &c. | Sugar      | Tobacco    | Total       | Liquor               | Coffee, &c. | Sugar | Tobacco | Total |
| U. Kingdom  | 19,000,000 | 4,400,000   | ...        | 8,600,000  | 32,000,000  | 130                  | 30          | ...   | 60      | 220   |
| France      | 10,300,000 | 4,600,000   | 6,200,000  | 11,800,000 | 32,900,000  | 65                   | 30          | 40    | 75      | 210   |

| India     | 47,500,000  | ...         | 47,500,000  | 5                    | ...                    |
| Total     | 622,420,000 | 247,930,000 | 870,350,000 | ...                  | ...                    |

Block's estimate of the percentage of direct taxes in the total amount raised by taxation in the several countries in 1872 compares with the percentage in 1889 as follows:—

## Percentage of Direct Taxation

|            | 1872 | 1889 |             | 1872 | 1889 |
|------------|------|------|-------------|------|------|
| U. Kingdom | 15   | 21   | Sweden      | 24   | 17   |
| France     | 25   | 18   | Norway      | 0    | 0    |
| Germany    | 34   | 19   | Denmark     | 28   | 20   |
| Russia     | 20   | 13   | Holland     | 33   | 27   |
| Austria    | 46   | 24   | Belgium     | 31   | 31   |
| Italy      | 51   | 30   | Switzerland | 34   | 0    |
| Spain      | 44   | 39   | Greece      | 48   | 37   |
| Portugal   | 30   | 15   | U. States   | 0    | 0    |

Except in the countries of the United Kingdom and Belgium, the ratio of direct taxation has declined very notably.

A simple classification of the national taxes in various countries is as follows; customs, excise, stamps and death duties, property and income, viz. :—

|                          | £ Sterling  |             |             |             |            |             |
|--------------------------|-------------|-------------|-------------|-------------|------------|-------------|
|                          | Customs     | Excise      | Stamps, &c. | Property    | Sundries   | Total       |
| United Kingdom . . . . . | 20,000,000  | 25,500,000  | 12,700,000  | 15,300,000  | ...        | 73,500,000  |
| France . . . . .         | 15,000,000  | 39,000,000  | 26,000,000  | 14,300,000  | 7,700,000  | 102,000,000 |
| Germany . . . . .        | 13,500,000  | 22,100,000  | 9,000,000   | 12,500,000  | 7,800,000  | 64,900,000  |
| Russia . . . . .         | 12,100,000  | 30,000,000  | 3,300,000   | 8,200,000   | 7,600,000  | 61,200,000  |
| Austria . . . . .        | 3,900,000   | 22,200,000  | 6,600,000   | 11,700,000  | 5,700,000  | 50,100,000  |
| Italy . . . . .          | 10,600,000  | 13,400,000  | 7,900,000   | 16,200,000  | 5,700,000  | 53,800,000  |
| Spain . . . . .          | 6,900,000   | 7,200,000   | 3,600,000   | 6,600,000   | 7,600,000  | 31,900,000  |
| Portugal . . . . .       | 3,100,000   | 1,300,000   | 1,000,000   | 1,000,000   | 200,000    | 6,600,000   |
| Sweden . . . . .         | 2,100,000   | 800,000     | 200,000     | 600,000     | ...        | 3,700,000   |
| Norway . . . . .         | 1,100,000   | 300,000     | 100,000     | ...         | ...        | 1,500,000   |
| Denmark . . . . .        | 1,400,000   | ...         | 300,000     | 500,000     | 300,000    | 2,500,000   |
| Holland . . . . .        | 400,000     | 3,600,000   | 1,800,000   | 1,900,000   | 600,000    | 8,300,000   |
| Belgium . . . . .        | 1,100,000   | 1,400,000   | 2,000,000   | 1,800,000   | 500,000    | 6,800,000   |
| Europe . . . . .         | 91,200,000  | 166,800,000 | 74,500,000  | 90,600,000  | 43,700,000 | 466,800,000 |
| United States . . . . .  | 46,600,000  | 27,200,000  | ...         | ...         | ...        | 73,800,000  |

Holland is the only country of Europe which admits coffee free of duty.

British cotton manufactures are heavily taxed in many countries, the rates "ad valorem" according to tariffs in 1884 showing in the various countries thus :—

|                     | Per Cent. |                       | Per Cent. |                        | Per Cent. |
|---------------------|-----------|-----------------------|-----------|------------------------|-----------|
| Argentina . . . . . | 30        | China . . . . .       | 5         | S. Australia . . . . . | 10        |

While the ratio of import dues is being reduced by Great Britain, it has increased in the rest of the world by more than one-fourth in the last ten years.

The customs dues of various nations compare with the value of merchandise imported (such dues being, as a rule, levied on imports, and not on exports) as follows :—

|                          | Customs Dues, £ |             | Imports, £    |               | Duty, Percentage |      |
|--------------------------|-----------------|-------------|---------------|---------------|------------------|------|
|                          | Average 1871-80 | 1889        | 1871-80       | 1889          | 1871-80          | 1889 |
| United Kingdom . . . . . | 20,100,000      | 20,000,000  | 371,400,000   | 427,000,000   | 5.4              | 4.7  |

## TAXES

559

## TAXES

If the commerce of the United Kingdom be subtracted, the account will stand thus for the rest of the world :—

| Period         | Customs, £  | Imports, £    | Duty per Cent. |
|----------------|-------------|---------------|----------------|
| 1871-80 . . .  | 83,600,000  | 863,000,000   | 9.8            |
| 1889 . . . . . | 132,800,000 | 1,067,000,000 | 12.5           |

Property and income or personal taxes are approximately as follows :—

|               | Land-Tax    | House-Tax   | Income-Tax   | Total        |
|---------------|-------------|-------------|--------------|--------------|
| U. Kingdom    | £ 1,020,000 | £ 1,940,000 | £ 12,700,000 | £ 15,660,000 |
| France . . .  | 4,800,000   | 4,500,000   | 5,000,000    | 14,300,000   |
| Germany . .   | 4,000,000   | 2,000,000   | 6,500,000    | 12,500,000   |
| Russia . . .  | 4,000,000   | ...         | 9,200,000    | 13,200,000   |
| Austria . .   | 5,000,000   | 3,000,000   | 3,400,000    | 11,400,000   |
| Italy . . . . | 4,300,000   | 2,700,000   | 9,200,000    | 16,200,000   |
| Spain . . . . | 6,600,000   | ...         | ...          | 6,600,000    |
| Portugal . .  | 700,000     | 100,000     | 200,000      | 1,000,000    |
| Sweden . . .  | 400,000     | ...         | 200,000      | 600,000      |
| Denmark . .   | 400,000     | 100,000     | ...          | 500,000      |
| Holland . .   | 1,000,000   | ...         | 900,000      | 1,900,000    |
| Belgium . .   | 1,000,000   | ...         | 800,000      | 1,800,000    |
| Europe . . .  | 33,220,000  | 14,340,000  | 48,100,000   | 95,660,000   |

The income-tax collected in the United Kingdom includes £1,200,000 from land and £2,500,000 from

house property, for which reason the above items ought more correctly to read thus :—

|                      |             |
|----------------------|-------------|
| Land-tax . . . . .   | £ 2,220,000 |
| House-tax . . . . .  | 4,440,000   |
| Income-tax . . . . . | 9,000,000   |
| Total . . . . .      | 15,660,000  |

Taxes on land in various countries are described at length under *Land-taxes*.

## UNITED KINGDOM

The *Financial Reform Almanac* sums up from parliamentary blue-books the taxation and expenditure of the United Kingdom in eighty-nine years as follows :—

| Period  | Millions £ Sterling |        |          |       |             |       |      |          |
|---------|---------------------|--------|----------|-------|-------------|-------|------|----------|
|         | Revenue             |        |          |       | Expenditure |       |      |          |
|         | Customs             | Excise | Sundries | Total | Debt        | Army  | Navy | Sundries |
| 1801-10 | 123                 | 215    | 206      | 544   | 216         | 230   | 148  | 72       |
| 1811-20 | 150                 | 272    | 252      | 674   | 292         | 290   | 152  | 91       |
| 1821-30 | 175                 | 252    | 172      | 599   | 297         | 96    | 60   | 101      |
| 1831-40 | 204                 | 163    | 146      | 513   | 290         | 83    | 48   | 103      |
| 1841-50 | 227                 | 145    | 186      | 558   | 291         | 93    | 69   | 100      |
| 1851-60 | 237                 | 181    | 244      | 662   | 290         | 151   | 107  | 124      |
| 1861-70 | 237                 | 204    | 289      | 730   | 264         | 162   | 112  | 157      |
| 1871-80 | 217                 | 271    | 313      | 801   | 276         | 176   | 106  | 212      |
| 1881-89 | 178                 | 215    | 408      | 801   | 260         | 167   | 109  | 254      |
| 89 yrs. | 1,748               | 1,918  | 2,216    | 5,882 | 2,476       | 1,448 | 911  | 1,214    |

The above table, however, includes not only taxes, but likewise public services, such as the Post-Office. The principal items of taxation have been in recent years as follows :—

|                     | 1853         | 1860         | 1870         | 1880         | 1889         |
|---------------------|--------------|--------------|--------------|--------------|--------------|
| Customs . . . . .   | £ 22,140,000 | £ 24,390,000 | £ 21,500,000 | £ 19,170,000 | £ 19,970,000 |
| Excise . . . . .    | 15,790,000   | 20,240,000   | 21,880,000   | 25,220,000   | 25,470,000   |
| Income-tax . . . .  | 5,510,000    | 9,600,000    | 10,040,000   | 9,230,000    | 12,700,000   |
| Stamps . . . . .    | 6,920,000    | 8,040,000    | 9,290,000    | 11,310,000   | 12,340,000   |
| Land-tax, &c. . . . | 3,380,000    | 3,230,000    | 4,500,000    | 2,670,000    | 2,960,000    |
| Total . . . . .     | 53,740,000   | 65,500,000   | 67,210,000   | 67,600,000   | 73,440,000   |

The following is a synopsis of the import tariff at four dates of distinct fiscal policy :—

|                    | Duties Expressed in Shillings |      |      |      |
|--------------------|-------------------------------|------|------|------|
|                    | 1787                          | 1819 | 1834 | 1890 |
| Bacon, cwt. . . .  | 47                            | 56   | 28   | ...  |
| Books, " . . . .   | 20                            | 100  | 100  | ...  |
| Butter, " . . . .  | 24                            | 20   | 20   | ...  |
| Cheese, " . . . .  | 14                            | 10   | 10   | ...  |
| Cocoa, " . . . .   | 240                           | 280  | 19   | 2    |
| Coffee, " . . . .  | 224                           | 280  | 140  | 14   |
| Cotton, " . . . .  | 9                             | 9    | 3    | ...  |
| Eggs, " . . . . .  | 3                             | 6    | 6    | ...  |
| Paper, " . . . . . | 7                             | 94   | 28   | ...  |
| Potatoes, " . . .  | 4                             | 2    | 2    | ...  |
| Rice, " . . . . .  | 7                             | 15   | 15   | ...  |
| Soup, " . . . . .  | 44                            | 90   | 90   | ...  |
| Spirits, gallon .  | 6                             | 22   | 22   | 10   |
| Sugar, cwt. . . .  | 27                            | 63   | 63   | ...  |
| Tallow, " . . . .  | ...                           | 3    | 1    | ...  |
| Tea, " . . . . .   | 45                            | 224  | 240  | 37   |
| Tobacco, " . . .   | 392                           | 448  | 784  | 356  |
| Wine, gallon . .   | 5                             | 14   | 54   | 1    |
| Wool, cwt. . . .   | 0                             | 56   | 9    | ...  |

Blanks in the above table signify duty-free. Grain was subject to import dues on a sliding scale, according to market prices in Great Britain, down to 1846.

*Customs dues* are levied on fewer articles than formerly, the ratio of import duties to the value of all imported merchandise showing as follows :—

| Year           | Per Cent. | Year           | Per Cent. | Year           | Per Cent. |
|----------------|-----------|----------------|-----------|----------------|-----------|
| 1580 . . . . . | 1         | 1720 . . . . . | 21        | 1844 . . . . . | 40        |
| 1614 . . . . . | 8         | 1800 . . . . . | 20        | 1866 . . . . . | 10        |
| 1684 . . . . . | 13        | 1827 . . . . . | 46        | 1889 . . . . . | 5         |

The amount of customs dues per inhabitant at various dates was as follows :—

| Year           | Customs, £ | Shillings per Inhabitant |
|----------------|------------|--------------------------|
| 1684 . . . . . | 530,000    | 2.0                      |
| 1720 . . . . . | 1,555,000  | 5.1                      |
| 1800 . . . . . | 6,788,000  | 13.0                     |
| 1844 . . . . . | 24,277,000 | 18.0                     |
| 1889 . . . . . | 19,970,000 | 10.5                     |

The amount per head is greater than in European countries (except Portugal, Denmark, and Norway), but less than in the United States, Canada, or Australia.

The principal items paying duty in recent years were :—

|                    | 1853       | 1860       | 1870       | 1880       | 1889       |
|--------------------|------------|------------|------------|------------|------------|
|                    | £          | £          | £          | £          | £          |
| Sugar . . . . .    | 4,050,000  | 6,010,000  | 5,400,000  | ...        | ...        |
| Tea . . . . .      | 5,980,000  | 5,400,000  | 2,640,000  | 3,700,000  | 4,630,000  |
| Coffee . . . . .   | 440,000    | 440,000    | 350,000    | 210,000    | 180,000    |
| Spirits . . . . .  | 2,580,000  | 2,520,000  | 4,190,000  | 4,680,000  | 4,300,000  |
| Wine . . . . .     | 1,790,000  | 1,630,000  | 1,480,000  | 1,390,000  | 1,210,000  |
| Tobacco . . . . .  | 4,540,000  | 5,600,000  | 6,610,000  | 8,560,000  | 8,860,000  |
| Grain . . . . .    | 400,000    | 500,000    | 100,000    | ...        | ...        |
| Sundries . . . . . | 2,360,000  | 2,290,000  | 730,000    | 630,000    | 790,000    |
| Total . . . . .    | 22,140,000 | 24,390,000 | 21,500,000 | 19,170,000 | 19,970,000 |

*Excise* is the tax which produces the largest sum to the exchequer. The articles on which this tax is levied were as follows :—

|                    | 1853       | 1860       | 1870       | 1880       | 1889       |
|--------------------|------------|------------|------------|------------|------------|
|                    | £          | £          | £          | £          | £          |
| Spirits . . . . .  | 6,230,000  | 9,760,000  | 10,970,000 | 13,630,000 | 12,880,000 |
| Malt . . . . .     | 5,320,000  | 6,650,000  | 6,480,000  | 6,730,000  | 8,770,000  |
| Licenses . . . . . | 1,180,000  | 1,460,000  | 3,700,000  | 3,500,000  | 3,510,000  |
| Sundries . . . . . | 3,060,000  | 2,350,000  | 730,000    | 1,360,000  | 310,000    |
| Total . . . . .    | 15,790,000 | 20,240,000 | 21,880,000 | 25,220,000 | 25,470,000 |

If we sum up all the liquor-duties we find as follows :—

|                            | 1853       | 1860       | 1870       | 1880       | 1889       |
|----------------------------|------------|------------|------------|------------|------------|
|                            | £          | £          | £          | £          | £          |
| British spirits . . . . .  | 6,230,000  | 9,760,000  | 10,970,000 | 13,630,000 | 12,880,000 |
| Imported spirits . . . . . | 2,580,000  | 2,520,000  | 4,190,000  | 4,680,000  | 4,300,000  |
| Wines . . . . .            | 1,790,000  | 1,630,000  | 1,480,000  | 1,390,000  | 1,210,000  |
| Malt . . . . .             | 5,320,000  | 6,650,000  | 6,480,000  | 6,730,000  | 8,770,000  |
| Total . . . . .            | 15,920,000 | 20,580,000 | 23,120,000 | 26,430,000 | 27,160,000 |

Since 1881 the malt-tax is termed beer-tax.

The receipts from the excise at various dates have been :—

| Year           | Amount, £  | Year           | Amount, £  |
|----------------|------------|----------------|------------|
| 1744 . . . . . | 3,750,000  | 1830 . . . . . | 18,640,000 |
| 1786 . . . . . | 5,540,000  | 1850 . . . . . | 15,280,000 |
| 1808 . . . . . | 19,870,000 | 1889 . . . . . | 25,470,000 |

*Stamp-duties* were invented by Charles II. ; the revenue derived from them showed as follows :—

| Year           | Amount, £ | Year           | Amount, £  |
|----------------|-----------|----------------|------------|
| 1800 . . . . . | 3,130,000 | 1850 . . . . . | 6,560,000  |
| 1820 . . . . . | 6,560,000 | 1870 . . . . . | 9,390,000  |
| 1840 . . . . . | 6,730,000 | 1889 . . . . . | 12,340,000 |

Stamp-duties show as follows since 1853 :—

|                     | 1853      | 1860      | 1870      | 1880       | 1889       |
|---------------------|-----------|-----------|-----------|------------|------------|
|                     | £         | £         | £         | £          | £          |
| Legacies . . . . .  | 2,420,000 | 3,340,000 | 4,720,000 | 6,230,000  | 6,560,000  |
| Insurance . . . . . | 1,350,000 | 1,760,000 | 520,000   | 120,000    | 170,000    |
| Deeds . . . . .     | 1,380,000 | 1,380,000 | 1,690,000 | 2,080,000  | 3,150,000  |
| Bills . . . . .     | 610,000   | 580,000   | 850,000   | 840,000    | 820,000    |
| Receipts . . . . .  | 180,000   | 390,000   | 580,000   | 810,000    | 1,040,000  |
| Sundries . . . . .  | 980,000   | 590,000   | 930,000   | 1,230,000  | 600,000    |
| Total . . . . .     | 6,920,000 | 8,040,000 | 9,290,000 | 11,310,000 | 12,340,000 |

Among the minor taxes included above under excise or stamp-duties, the product of some in 1889 was as follows :—

|                     | Number  | Amount, £ |                  | Amount, £ |
|---------------------|---------|-----------|------------------|-----------|
| Dogs . . . . .      | 980,000 | 370,000   | Medicines        | 200,000   |
| Guns . . . . .      | 170,000 | 85,000    | Plate . . . . .  | 78,000    |
| Game . . . . .      | 62,000  | 160,000   | Railways         | 310,000   |
| Servants . . . . .  | 184,000 | 138,000   | Crests . . . . . | 75,000    |
| Carriages . . . . . | 492,000 | 500,000   | Cards . . . . .  | 17,000    |

*Income-tax*.—This was introduced by Pitt as a war-tax in 1798. The rate and product at various dates have been :—

| Year           | Pence per £ | Product, £ | Per Penny, £ |
|----------------|-------------|------------|--------------|
| 1803 . . . . . | 12          | 4,700,000  | 400,000      |
| 1808 . . . . . | 24          | 16,500,000 | 700,000      |
| 1844 . . . . . | 7           | 5,190,000  | 740,000      |
| 1856 . . . . . | 16          | 15,070,000 | 960,000      |
| 1875 . . . . . | 2           | 4,310,000  | 2,150,000    |
| 1889 . . . . . | 6           | 12,700,000 | 2,100,000    |

The tax was repealed in 1816, revived in 1842, extended to Ireland in 1853. The principal features since 1842 were :—

| Years    | Average Rate (Pence) | Annual Product | Product per Penny | Product per Inhab. |
|----------|----------------------|----------------|-------------------|--------------------|
| 1842-51  | 7.0                  | 5,467,000      | 782,000           | 65                 |
| 1852-61  | 9.8                  | 10,224,000     | 1,041,000         | 89                 |
| 1862-71  | 5.5                  | 7,764,000      | 1,408,000         | 62                 |
| 1872-81  | 3.8                  | 7,062,000      | 1,868,000         | 52                 |
| 40 years | 6.0                  | 7,625,000      | 1,275,000         | 66                 |
| 1882-89  | 6.5                  | 12,800,000     | 1,970,000         | 84                 |
| 1889     | 6.0                  | 12,700,000     | 2,100,000         | 80                 |

The proportions of this tax collected in each of the three kingdoms were as follows :—

|                   | 1860  | 1870  | 1880  | 1888  |
|-------------------|-------|-------|-------|-------|
| England . . . .   | 84.0  | 85.2  | 84.2  | 85.4  |
| Scotland . . . .  | 9.0   | 9.0   | 9.6   | 9.0   |
| Ireland . . . . . | 7.0   | 5.8   | 6.2   | 5.6   |
| United Kingdom .  | 100.0 | 100.0 | 100.0 | 100.0 |

The various kinds of property or income which produced it were in the following ratio :—

|                    | 1860  | 1870  | 1880  | 1888  |
|--------------------|-------|-------|-------|-------|
| Houses . . . . .   | 18.3  | 17.3  | 20.0  | 21.2  |
| Lands . . . . .    | 17.4  | 14.6  | 12.1  | 9.6   |
| Professions, &c. . | 64.3  | 68.1  | 67.9  | 69.2  |
| Total . . . . .    | 100.0 | 100.0 | 100.0 | 100.0 |

*Conscience-money.*—Between the years 1870 and 1880, the average sum received yearly by the Chancellor of the Exchequer for unpaid taxes was £9100, in most cases for evasion of the income-tax.

*Land-tax.*—This tax is said to have produced £80,000 a year in the time of Edward the Confessor, which would be equivalent in weight of silver to £250,000 of present money, and in purchasing value to one million sterling. Under William III. in 1692 it produced £500,000, which was supposed to be equal to 20 per cent. or 4s. in the pound of the rental value. Pitt also fixed it at 4s. The following table shows the sum it has actually produced at various dates in this century, and what it ought to have produced at 4s. in the pound of assessed rental :—

|                | Product, £ | Rental, £  | Tax at 4s. |
|----------------|------------|------------|------------|
| 1810 . . . . . | 1,420,000  | 41,910,000 | 8,400,000  |
| 1840 . . . . . | 1,300,000  | 47,700,000 | 9,500,000  |
| 1850 . . . . . | 1,150,000  | 48,400,000 | 9,700,000  |
| 1876 . . . . . | 1,090,000  | 57,700,000 | 11,500,000 |
| 1880 . . . . . | 1,050,000  | 59,500,000 | 11,900,000 |
| 1889 . . . . . | 1,020,000  | 51,300,000 | 10,300,000 |

*House-tax.*—This was originally a window-tax, but converted into a house-duty in 1851. Under either form the product is shown thus :—

| Year           | Amount, £ |
|----------------|-----------|
| 1850 . . . . . | 1,749,000 |
| 1876 . . . . . | 1,410,000 |
| 1889 . . . . . | 1,940,000 |

The house-duty does not extend to Ireland. In 1887 the house-rental of Great Britain was £129,800,000, whence the actual product seems to be under 4d. in the pound, or about 1½ per cent. on the assessed rental, but

it is in reality much more, as houses under £20 are exempted. The product in 1888 was :—

|                    | Valuation, £ | Tax, £    |
|--------------------|--------------|-----------|
| Houses . . . . .   | 44,100,000   | 1,650,000 |
| Shops, &c. . . . . | 18,900,000   | 290,000   |
| Total . . . . .    | 63,000,000   | 1,940,000 |

This gives an average all round of 8d. in the pound, say 3½ per cent.

The window-tax was introduced by William III. in 1695, and increased by the Georges, but repealed in 1851. The number of windows taxed in 1801 and 1850 was as follows :—

| Year           | Houses    | Windows    | Windows per House |
|----------------|-----------|------------|-------------------|
| 1801 . . . . . | 1,781,000 | 10,300,000 | 5.8               |
| 1850 . . . . . | 3,648,000 | 21,900,000 | 6.0               |

The returns of this tax in 1850 showed as follows :—

|                   | Houses | Tax, £ | Per House         |
|-------------------|--------|--------|-------------------|
| Liverpool . . . . | 11,500 | 33,000 | £ s. d.<br>2 18 0 |
| Manchester . . .  | 7,900  | 22,000 | 2 15 0            |
| Bath . . . . .    | 3,800  | 22,000 | 5 18 0            |
| Brighton . . . .  | 3,600  | 18,000 | 5 1 0             |
| Birmingham . .    | 5,400  | 16,000 | 2 19 0            |
| Bristol . . . . . | 4,700  | 15,000 | 3 4 0             |
| Leeds . . . . .   | 2,500  | 8,100  | 3 5 0             |

It was not extended to Ireland, and the proceeds from Great Britain in 1850 were as follows :—

| Windows         | Houses   |           |               | Duty, £   |           |               |
|-----------------|----------|-----------|---------------|-----------|-----------|---------------|
|                 | Eng-land | Scot-land | Great Britain | England   | Scot-land | Great Britain |
| 8-10 . . . . .  | 156,000  | 15,000    | 171,000       | 167,000   | 15,000    | 182,000       |
| 11-20 . . . . . | 216,000  | 15,000    | 231,000       | 687,000   | 48,000    | 735,000       |
| 21-30 . . . . . | 48,000   | 4,000     | 52,000        | 366,000   | 25,000    | 391,000       |
| Over 30 . . . . | 30,000   | 1,600     | 31,600        | 404,000   | 37,000    | 441,000       |
| Total . . . . . | 450,000  | 35,600    | 485,600       | 1,624,000 | 125,000   | 1,749,000     |

The tax was graduated thus according to the number of windows :—

| Windows      | Tax     | Windows     | Tax     |
|--------------|---------|-------------|---------|
|              | £ s. d. |             | £ s. d. |
| 8 . . . . .  | 0 16 0  | 20 . . . .  | 5 12 0  |
| 10 . . . . . | 1 8 0   | 50 . . . .  | 17 5 0  |
| 15 . . . . . | 3 10 0  | 100 . . . . | 29 8 0  |

*Newspaper-duty* was invented by Queen Anne, a penny on each sheet, which George III. raised ultimately to 4d. The tax was reduced to one penny per sheet in 1836, and abolished in 1855. The circulation of newspapers was as follows at various dates :—

| Year           | Tax, Pence | Circulation |
|----------------|------------|-------------|
| 1753 . . . . . | 1          | 7,400,000   |
| 1790 . . . . . | 2          | 14,100,000  |
| 1810 . . . . . | 3½         | 20,200,000  |
| 1820 . . . . . | 4          | 24,900,000  |
| 1843 . . . . . | 1          | 56,400,000  |

*Advertisement-duty.*—This was another of Queen Anne's taxes, and was fixed for many years at 3s. 6d. per advertisement in England and 2s. 6d. in Ireland. It was

reduced by one-half in 1833 and abolished in 1853. In 1851 the number of advertisements that paid duty was :—

|                    |           |
|--------------------|-----------|
| England . . . . .  | 1,770,000 |
| Scotland . . . . . | 250,000   |
| Ireland . . . . .  | 240,000   |

United Kingdom . . . . . 2,260,000

*Soap-duty.*—Another of Queen Anne's taxes, dating from 1711. It was at first £28 per ton, and produced approximately as follows :—

| Year           | Tons, Soap | Duty, £   |
|----------------|------------|-----------|
| 1801 . . . . . | 25,000     | 500,000   |
| 1811 . . . . . | 34,000     | 700,000   |
| 1821 . . . . . | 43,000     | 900,000   |
| 1831 . . . . . | 55,000     | 1,200,000 |
| 1840 . . . . . | 88,000     | 900,000   |
| 1852 . . . . . | 97,000     | 1,130,000 |

*Paper-duty.*—Invented by William III. in 1694. It acted as an effectual check on knowledge, so much so that Charles Knight had to pay £20,000 on the paper consumed in his *Penny Cyclopædia* of 1830, which caused him to lose money in so useful a work. Porter gives the consumption of paper and amount of duty as follows :—

| Year           | Tons   | Tax, £    | £ per Ton |
|----------------|--------|-----------|-----------|
| 1803 . . . . . | 14,000 | 400,000   | 28        |
| 1811 . . . . . | 17,000 | 480,000   | 28        |
| 1821 . . . . . | 22,000 | 580,000   | 28        |
| 1831 . . . . . | 28,000 | 730,000   | 28        |
| 1841 . . . . . | 44,000 | 640,000   | 14        |
| 1860 . . . . . | ...    | 1,350,000 | ...       |

The duty was repealed by Mr. Gladstone in 1861.

*Salt-duty.*—Invented by Queen Anne in 1702. During the French war it was raised to £30 per ton, being fifteen times the value of the salt. The consumption then averaged 210,000 tons, or 16 lbs. per inhabitant, and when the tax was abolished in 1825 it rose very rapidly.

*Carriage-duty.*—The number of persons assessed to this tax at various dates was as follows :—

| Year           | Number  | Per 10,000 Pop. |
|----------------|---------|-----------------|
| 1812 . . . . . | 63,100  | 52              |
| 1830 . . . . . | 85,100  | 51              |
| 1860 . . . . . | 245,000 | 112             |
| 1870 . . . . . | 325,000 | 125             |
| 1880 . . . . . | 463,000 | 154             |
| 1888 . . . . . | 492,000 | 150             |

The carriages paying duty in 1888 were :—

|                               |         |
|-------------------------------|---------|
| Hackney carriages . . . . .   | 53,600  |
| Private " one horse . . . . . | 358,000 |
| " " two " . . . . .           | 80,600  |
| Total . . . . .               | 492,200 |

*Servant-duty.*—This was invented by George III. during the American war, and the number of servants taxed at various dates was as follows :—

| Year           | Number  | Year           | Number  |
|----------------|---------|----------------|---------|
| 1812 . . . . . | 86,100  | 1876 . . . . . | 220,000 |
| 1831 . . . . . | 101,800 | 1888 . . . . . | 184,000 |

This tax is only on male servants in Great Britain, that on female servants having been repealed in 1792.

*Legacy Duties.*—These began in 1796, and comprise legacy, succession, and probate duties; they range from

1 to 11½ per cent. according to relationship. The amount of property on which these duties were paid was :—

|                    | 1840       | 1873        | 1888        |
|--------------------|------------|-------------|-------------|
|                    | £          | £           | £           |
| England . . . . .  | 47,100,000 | 106,800,000 | 170,500,000 |
| Scotland . . . . . | 3,100,000  | 14,200,000  | 19,000,000  |
| Ireland . . . . .  | 4,500,000  | 8,400,000   | 12,100,000  |
| United Kingdom     | 54,700,000 | 129,400,000 | 201,600,000 |

Excluding the property falling under succession-duty, that which came under probate-duty in the United Kingdom in 1888 was as follows :—

| Estates of                | Number | Value, £    |
|---------------------------|--------|-------------|
| Under £1000 . . . . .     | 31,079 | 10,600,000  |
| £1000-£4000 . . . . .     | 8,343  | 17,200,000  |
| £4000-£10,000 . . . . .   | 2,982  | 19,200,000  |
| £10,000-£50,000 . . . . . | 2,079  | 44,100,000  |
| Over £50,000 . . . . .    | 432    | 67,000,000  |
| Total . . . . .           | 44,915 | 158,100,000 |

For local rates and taxes see *Local Taxation*.

#### FRANCE

Some of the principal taxes are shown as follows :—

|                        | Amount, £  |             | Shillings per Inhabitant |      |
|------------------------|------------|-------------|--------------------------|------|
|                        | 1880       | 1890        | 1880                     | 1890 |
| Customs . . . . .      | 12,400,000 | 15,000,000  | 6.6                      | 8.0  |
| Property . . . . .     | 7,000,000  | 7,300,000   | 3.6                      | 3.8  |
| Sugar . . . . .        | 4,400,000  | 7,100,000   | 2.3                      | 3.7  |
| Windows . . . . .      | 1,700,000  | 2,000,000   | 0.9                      | 1.1  |
| Liquor . . . . .       | 17,300,000 | 17,000,000  | 9.2                      | 9.2  |
| Licenses . . . . .     | 4,000,000  | 4,200,000   | 2.1                      | 2.2  |
| Registration . . . . . | 19,500,000 | 20,400,000  | 10.4                     | 11.0 |
| Stamps . . . . .       | 5,600,000  | 6,400,000   | 3.0                      | 3.5  |
| Tobacco . . . . .      | 13,700,000 | 14,900,000  | 7.2                      | 8.0  |
| Sundries . . . . .     | 7,400,000  | 7,700,000   | 3.9                      | 4.2  |
| Total . . . . .        | 93,000,000 | 102,000,000 | 49.2                     | 54.7 |

The increase of taxation, national and local, has been very great in the past sixty years, viz. :—

| Year           | National, £ | Local, £   | Total, £    | Shillings per Inhabitant |
|----------------|-------------|------------|-------------|--------------------------|
| 1830 . . . . . | 37,600,000  | 7,100,000  | 44,700,000  | 28                       |
| 1840 . . . . . | 44,200,000  | 8,800,000  | 53,000,000  | 31                       |
| 1850 . . . . . | 52,200,000  | 11,700,000 | 63,900,000  | 35                       |
| 1860 . . . . . | 65,700,000  | 18,100,000 | 83,800,000  | 45                       |
| 1870 . . . . . | 68,500,000  | 21,300,000 | 89,800,000  | 48                       |
| 1880 . . . . . | 93,000,000  | 32,400,000 | 125,400,000 | 66                       |
| 1890 . . . . . | 102,000,000 | 40,800,000 | 142,800,000 | 75                       |

*Tobacco.*—This is one of the principal taxes, and shows as follows :—

| Year           | Amount, £ | Year           | Amount, £  |
|----------------|-----------|----------------|------------|
| 1815 . . . . . | 2,000,000 | 1860 . . . . . | 7,800,000  |
| 1830 . . . . . | 2,700,000 | 1890 . . . . . | 14,000,000 |

*Registration.*—This is mostly on transfer of property, and shows thus :—

| Year           | Amount, £  | Year           | Amount, £  |
|----------------|------------|----------------|------------|
| 1830 . . . . . | 6,100,000  | 1871 . . . . . | 15,000,000 |
| 1850 . . . . . | 8,100,000  | 1880 . . . . . | 19,500,000 |
| 1860 . . . . . | 11,000,000 | 1890 . . . . . | 20,400,000 |

*Liquor-duties* were as follows:—

| Year       | Amount, £ | Year       | Amount, £  |
|------------|-----------|------------|------------|
| 1830 . . . | 4,100,000 | 1870 . . . | 9,100,000  |
| 1850 . . . | 4,300,000 | 1886 . . . | 17,000,000 |

The *octroi* and other local taxes are fully described under *Local Taxation*.

#### GERMANY

Apart from the taxes levied in each particular State, there are the following imperial ones:—

|                    | Amount, £         |                   | Shillings per Inhabitant |             |
|--------------------|-------------------|-------------------|--------------------------|-------------|
|                    | 1885              | 1890              | 1885                     | 1890        |
| Customs . . .      | 10,400,000        | 13,500,000        | 4.7                      | 5.6         |
| Salt . . . . .     | 1,900,000         | 2,000,000         | 0.9                      | 0.8         |
| Sugar . . . . .    | 1,600,000         | 2,600,000         | 0.7                      | 1.1         |
| Tobacco . . . .    | 400,000           | 500,000           | 0.2                      | 0.2         |
| Liquor . . . . .   | 2,900,000         | 7,700,000         | 1.3                      | 3.3         |
| Stamps . . . . .   | 1,100,000         | 1,400,000         | 0.5                      | 0.6         |
| <b>Total . . .</b> | <b>18,300,000</b> | <b>27,700,000</b> | <b>8.3</b>               | <b>11.6</b> |

In 1887 was published the following statement of the customs dues collected throughout Germany since 1835:—

| Year           | Sum, £     | Period  | Average, £ | Shillings per Inhab. |
|----------------|------------|---------|------------|----------------------|
| 1835 . . . . . | 2,400,000  | 1835-40 | 2,700,000  | 2.1                  |
| 1850 . . . . . | 3,400,000  | 1841-50 | 3,800,000  | 2.6                  |
| 1860 . . . . . | 3,500,000  | 1851-60 | 3,700,000  | 2.3                  |
| 1870 . . . . . | 4,300,000  | 1861-70 | 3,700,000  | 2.1                  |
| 1880 . . . . . | 7,100,000  | 1871-80 | 6,500,000  | 3.0                  |
| 1887 . . . . . | 12,700,000 | 1881-87 | 11,200,000 | 4.8                  |

The duty on spirits was raised in 1887, and now produces £6,700,000.

The import dues collected on grain in 1889 were as follows:—

|                    | Tons             | Duty, £          | Shillings per Ton |
|--------------------|------------------|------------------|-------------------|
| Wheat . . . . .    | 370,000          | 930,000          | 50                |
| Rye . . . . .      | 750,000          | 1,870,000        | 50                |
| Oats . . . . .     | 260,000          | 520,000          | 40                |
| Barley . . . . .   | 630,000          | 710,000          | 23                |
| Various . . . . .  | 600,000          | 680,000          | 23                |
| <b>Total . . .</b> | <b>2,610,000</b> | <b>4,710,000</b> | <b>38</b>         |

The principal taxes (not local or municipal) levied in the several States of Germany may be summed up approximately thus:—

|                    | Direct, £         | Indirect, £       | Total, £          |
|--------------------|-------------------|-------------------|-------------------|
| Prussia . . . . .  | 8,300,000         | 14,100,000        | 22,400,000        |
| Bavaria . . . . .  | 1,300,000         | 4,500,000         | 5,800,000         |
| Saxony . . . . .   | 1,100,000         | 400,000           | 1,500,000         |
| Wurtemberg . . .   | 600,000           | 600,000           | 1,200,000         |
| Baden . . . . .    | 600,000           | 600,000           | 1,200,000         |
| Small States . . . | 1,800,000         | 3,300,000         | 5,100,000         |
| <b>Total . . .</b> | <b>13,700,000</b> | <b>23,500,000</b> | <b>37,200,000</b> |

These, added to the imperial taxes before mentioned, sum up a total of £64,900,000.

Prussia has income-tax, land-tax, house-tax, and trade-tax, the aggregate of which has been as follows:—

| Year           | Amount, £ | Shillings per Inhabitant |
|----------------|-----------|--------------------------|
| 1880 . . . . . | 7,600,000 | 5.5                      |
| 1888 . . . . . | 8,300,000 | 5.6                      |

The assessments to income-tax in Prussia and Saxony will be found under the head of *Income*.

#### RUSSIA

The principal taxes are shown as follows:—

|                    | Amount, £         |                   | Pence per Inhab. |            |
|--------------------|-------------------|-------------------|------------------|------------|
|                    | 1879              | 1889              | 1879             | 1889       |
| Customs . . . . .  | 9,200,000         | 12,100,000        | 27               | 32         |
| Poll-tax . . . . . | 11,700,000        | 8,200,000         | 34               | 21         |
| Liquor . . . . .   | 22,800,000        | 25,700,000        | 66               | 68         |
| Salt . . . . .     | 1,300,000         | ...               | 4                | ...        |
| Tobacco . . . . .  | 1,300,000         | 2,600,000         | 4                | 7          |
| Sugar . . . . .    | 500,000           | 1,700,000         | 1                | 4          |
| Stamps . . . . .   | 1,400,000         | 2,000,000         | 4                | 5          |
| Registration . . . | 900,000           | 1,000,000         | 2                | 2          |
| Passports . . . .  | 300,000           | 300,000           | 1                | 1          |
| Sundries . . . . . | 2,400,000         | 7,600,000         | 7                | 20         |
| <b>Total . . .</b> | <b>51,800,000</b> | <b>61,200,000</b> | <b>150</b>       | <b>160</b> |

The above does not include revenue from crown domains or departments of public service, such as post-office. The poll-tax in 1882 was as follows:—

|                    | No. Taxed         | Amount           | Pence per Head |
|--------------------|-------------------|------------------|----------------|
| Proprietors . . .  | 693,000           | 140,000          | 48             |
| Cossacks, &c. . .  | 1,347,000         | 350,000          | 60             |
| Serfs . . . . .    | 21,502,000        | 5,203,000        | 57             |
| <b>Total . . .</b> | <b>23,542,000</b> | <b>5,693,000</b> | <b>58</b>      |

#### AUSTRIA

The principal taxes of Austria proper were as follows:—

|                      | Amount, £         |                   | Shillings per Inhab. |             |
|----------------------|-------------------|-------------------|----------------------|-------------|
|                      | 1878              | 1887              | 1878                 | 1887        |
| Land-tax . . . . .   | 3,700,000         | 2,900,000         | 3.3                  | 2.5         |
| House-tax . . . .    | 2,400,000         | 2,400,000         | 2.2                  | 2.1         |
| Income-tax . . . .   | 2,000,000         | 2,000,000         | 1.8                  | 1.7         |
| Licences . . . . .   | 900,000           | 900,000           | 0.8                  | 0.8         |
| Customs . . . . .    | 1,900,000         | 3,600,000         | 1.7                  | 3.2         |
| Salt . . . . .       | 1,900,000         | 1,700,000         | 1.7                  | 1.5         |
| Sugar . . . . .      | 1,400,000         | 2,800,000         | 1.3                  | 2.4         |
| Cattle . . . . .     | 500,000           | 500,000           | 0.5                  | 0.5         |
| Tobacco . . . . .    | 6,000,000         | 6,300,000         | 5.4                  | 5.8         |
| Liquor . . . . .     | 2,600,000         | 3,200,000         | 2.3                  | 2.8         |
| Stamps . . . . .     | 1,700,000         | 1,500,000         | 1.5                  | 1.3         |
| Lotteries, &c. . . . | 3,200,000         | 3,300,000         | 2.9                  | 2.9         |
| <b>Total . . .</b>   | <b>28,200,000</b> | <b>31,100,000</b> | <b>25.4</b>          | <b>27.5</b> |

In the above table florins are taken at 24d. for 1878, and 20d. for 1887. There are also some taxes common to the whole monarchy not included above,

In Hungary the principal taxes were:—

|                     | Amount, £         |                   | Shillings per Inhab. |             |
|---------------------|-------------------|-------------------|----------------------|-------------|
|                     | 1882              | 1889              | 1882                 | 1889        |
| Land-tax . . . . .  | 2,300,000         | 2,100,000         | 3.0                  | 2.8         |
| House-tax . . . . . | 500,000           | 600,000           | 0.7                  | 0.8         |
| Licences . . . . .  | 1,000,000         | 1,100,000         | 1.3                  | 1.4         |
| Income-tax . . . .  | 800,000           | 1,400,000         | 1.0                  | 1.8         |
| Excise . . . . .    | 1,500,000         | 3,300,000         | 2.0                  | 4.4         |
| Tobacco . . . . .   | 3,200,000         | 3,900,000         | 4.2                  | 5.2         |
| Lotteries . . . . . | 2,500,000         | 2,100,000         | 3.3                  | 2.8         |
| Salt . . . . .      | 1,200,000         | 1,200,000         | 1.6                  | 1.6         |
| Registration, &c. . | 2,300,000         | 3,300,000         | 3.1                  | 4.4         |
| <b>Total . . .</b>  | <b>15,300,000</b> | <b>19,000,000</b> | <b>20.2</b>          | <b>25.2</b> |

Incomes from crown domains and public services are not included.

## ITALY

The principal taxes are shown as follows:—

|                   | Amount, £  |            | Shillings per Inhab. |      |
|-------------------|------------|------------|----------------------|------|
|                   | 1881       | 1890       | 1881                 | 1890 |
| Property-tax . .  | 7,600,000  | 7,000,000  | 5.3                  | 4.7  |
| Income-tax . .    | 7,400,000  | 9,200,000  | 5.2                  | 6.2  |
| Grist-tax . . .   | 1,900,000  | ...        | 1.3                  | ...  |
| Registration . .  | 2,400,000  | 2,800,000  | 1.7                  | 1.8  |
| Legacy dues . .   | 1,200,000  | 1,500,000  | 0.8                  | 1.0  |
| Stamps . . . .    | 1,700,000  | 2,900,000  | 1.1                  | 1.9  |
| Octroi . . . . .  | 3,300,000  | 3,300,000  | 2.2                  | 2.2  |
| Customs . . . .   | 6,200,000  | 10,600,000 | 4.2                  | 7.2  |
| Tobacco . . . .   | 4,200,000  | 7,600,000  | 2.8                  | 5.1  |
| Salt . . . . .    | 3,300,000  | 2,500,000  | 2.2                  | 1.7  |
| Lotteries . . . . | 2,900,000  | 3,100,000  | 2.0                  | 2.1  |
| Railway-tax . .   | 600,000    | 700,000    | 0.4                  | 0.5  |
| Sundries . . . .  | ...        | 2,600,000  | ...                  | 1.7  |
| Total . . . . .   | 42,700,000 | 53,800,000 | 29.2                 | 36.1 |

The above is exclusive of state properties and public services. It is to be observed that octroi is here national, in other countries a provincial tax. The grist-tax was abolished in 1884. Property-tax was made up thus:—

| Year         | Land-Tax, £ | House-Tax, £ | Total, £  | Shillings per Inhab. |
|--------------|-------------|--------------|-----------|----------------------|
| 1870 . . . . | 2,320,000   | 880,000      | 3,200,000 | 2.5                  |
| 1876 . . . . | 2,840,000   | 1,220,000    | 4,060,000 | 3.0                  |
| 1890 . . . . | 4,250,000   | 2,750,000    | 7,000,000 | 4.7                  |

Local taxes in 1885 amounted to 27 millions sterling: see *Local Taxation*.

## SPAIN

The principal taxes in 1887 were as follows:—

|                   | £          | Shillings per Inhabitant |
|-------------------|------------|--------------------------|
| Land-tax . . . .  | 6,600,000  | 7.2                      |
| Tobacco . . . .   | 6,400,000  | 7.0                      |
| Stamps, &c. . . . | 5,600,000  | 6.2                      |
| Customs . . . .   | 6,900,000  | 7.6                      |
| Excise . . . . .  | 6,400,000  | 7.0                      |
| Total . . . . .   | 31,900,000 | 35.0                     |

## PORTUGAL

The principal taxes were as follows:—

|                   | Amount, £ |           | Shillings per Inhab. |      |
|-------------------|-----------|-----------|----------------------|------|
|                   | 1881      | 1890      | 1881                 | 1890 |
| Land-tax . . . .  | 700,000   | 700,000   | 3.1                  | 3.0  |
| House-tax . . . . | 80,000    | 100,000   | 0.3                  | 0.4  |
| Licences . . . .  | 250,000   | 250,000   | 1.1                  | 1.0  |
| Tobacco . . . .   | 750,000   | 900,000   | 3.3                  | 3.8  |
| Customs . . . .   | 1,800,000 | 3,100,000 | 8.0                  | 13.0 |
| Octroi . . . . .  | 300,000   | 450,000   | 1.3                  | 2.0  |
| Income-tax . . .  | 180,000   | 200,000   | 0.8                  | 0.9  |
| Registration, &c. | 950,000   | 900,000   | 4.2                  | 4.0  |
| Total . . . . .   | 5,010,000 | 6,600,000 | 22.1                 | 28.1 |

## FINLAND

This is the least taxed country in Europe: total taxes £1,400,000, or 13s. per inhabitant.

## SWEDEN

The principal taxes were as follows:—

|                  | Amount, £ |           | Shillings per Inhab. |      |
|------------------|-----------|-----------|----------------------|------|
|                  | 1880      | 1890      | 1880                 | 1890 |
| Land-tax . . . . | 250,000   | 440,000   | 1.1                  | 1.8  |
| Customs . . . .  | 1,350,000 | 2,060,000 | 6.0                  | 8.4  |
| Liquor . . . . . | 830,000   | 750,000   | 3.7                  | 3.0  |
| Stamps . . . . . | 170,000   | 200,000   | 0.8                  | 0.8  |
| Income-tax . . . | 300,000   | 220,000   | 1.4                  | 0.9  |
| Total . . . . .  | 2,900,000 | 3,670,000 | 13.0                 | 14.9 |

## NORWAY

The principal taxes were as follows:—

|                   | Amount, £ |           | Shillings per Inhab. |      |
|-------------------|-----------|-----------|----------------------|------|
|                   | 1879      | 1890      | 1879                 | 1890 |
| Customs . . . .   | 990,000   | 1,100,000 | 10.0                 | 11.0 |
| Liquor . . . . .  | 320,000   | 280,000   | 3.2                  | 2.8  |
| Stamps, &c. . . . | 100,000   | 100,000   | 1.0                  | 1.0  |
| Total . . . . .   | 1,410,000 | 1,480,000 | 14.2                 | 14.8 |

## DENMARK

The following were the principal taxes:—

|                   | Amount, £ |           | Shillings per Inhab. |      |
|-------------------|-----------|-----------|----------------------|------|
|                   | 1880      | 1889      | 1880                 | 1889 |
| Land-tax . . . .  | 370,000   | 370,000   | 3.7                  | 3.5  |
| House-tax . . . . | 110,000   | 140,000   | 1.1                  | 1.3  |
| Customs . . . .   | 1,100,000 | 1,400,000 | 11.0                 | 13.3 |
| Stamps, &c. . . . | 480,000   | 620,000   | 4.8                  | 5.9  |
| Total . . . . .   | 2,060,000 | 2,530,000 | 20.6                 | 24.0 |

## HOLLAND

The principal taxes were the following:—

|                   | Amount, £ |           | Shillings per Inhab. |      |
|-------------------|-----------|-----------|----------------------|------|
|                   | 1879      | 1890      | 1879                 | 1890 |
| Land-tax . . . .  | 880,000   | 1,000,000 | 4.2                  | 4.4  |
| Poll-tax . . . .  | 810,000   | 900,000   | 3.9                  | 4.0  |
| Liquor . . . . .  | 1,900,000 | 2,200,000 | 9.0                  | 9.7  |
| Customs . . . .   | 380,000   | 400,000   | 1.8                  | 1.8  |
| Stamps, &c. . . . | 1,960,000 | 1,800,000 | 9.3                  | 8.0  |
| Excise . . . . .  | 1,300,000 | 1,400,000 | 6.2                  | 6.1  |
| Sundries . . . .  | 400,000   | 600,000   | 1.9                  | 2.6  |
| Total . . . . .   | 7,630,000 | 8,300,000 | 36.3                 | 36.6 |

Excise was made up in 1883 as follows (exclusive of the liquor-tax):—

|                 | Tons    | Duty, £ | £ per Ton |
|-----------------|---------|---------|-----------|
| Sugar . . . . . | 120,000 | 520,000 | 4.4       |
| Salt . . . . .  | 40,000  | 300,000 | 7.5       |
| Soap . . . . .  | 18,000  | 150,000 | 8.3       |
| Beef . . . . .  | ...     | 250,000 | ...       |

The number of cattle killed for market was 280,000, say about 90,000 tons, and the tax averaged, therefore, nearly £3 per ton.

## TAXES

565

## TAXES

## BELGIUM

The principal taxes were as follows:—

|                   | Amount, £ |           | Shillings per Inhab. |      |
|-------------------|-----------|-----------|----------------------|------|
|                   | 1879      | 1890      | 1879                 | 1890 |
| Land-tax . .      | 890,000   | 960,000   | 3.3                  | 3.2  |
| Income-tax . .    | 620,000   | 800,000   | 2.4                  | 2.7  |
| Customs . .       | 740,000   | 1,090,000 | 2.8                  | 3.6  |
| Liquor . .        | 1,100,000 | 1,400,000 | 4.2                  | 4.7  |
| Registration, &c. | 2,500,000 | 2,560,000 | 9.0                  | 8.5  |
| Total . .         | 5,850,000 | 6,810,000 | 21.7                 | 22.7 |

## GREECE

The principal taxes were as follows:—

|                | Amount, £ |           | Shillings per Inhab. |      |
|----------------|-----------|-----------|----------------------|------|
|                | 1881      | 1890      | 1881                 | 1890 |
| Land-tax . .   | 220,000   | 380,000   | 2.5                  | 4.2  |
| Cattle-tax . . | 70,000    | 90,000    | 0.8                  | 1.0  |
| House-tax . .  | 40,000    | 80,000    | 0.4                  | 0.9  |
| Licences . .   | 50,000    | 100,000   | 0.5                  | 1.1  |
| Customs . .    | 670,000   | 760,000   | 7.5                  | 8.4  |
| Stamps . .     | 180,000   | 330,000   | 2.0                  | 3.6  |
| Sundries . .   | ...       | 650,000   | ...                  | 7.1  |
| Total . .      | 1,230,000 | 2,390,000 | 13.7                 | 26.3 |

Sundries include £70,000 from salt, £140,000 from the Government monopoly of petroleum, and £240,000 from tobacco.

## ROUMANIA AND SERVIA

The principal taxes are as follows (1888):—

|              | Amount, £ |           | Shillings per Inhab. |        |
|--------------|-----------|-----------|----------------------|--------|
|              | Roumania  | Servia    | Roumania             | Servia |
| Customs . .  | 900,000   | 200,000   | 3.6                  | 2.0    |
| Excise . .   | 1,600,000 | 800,000   | 6.4                  | 8.0    |
| Sundries . . | 1,700,000 | 400,000   | 6.8                  | 4.0    |
| Total . .    | 4,200,000 | 1,400,000 | 16.8                 | 14.0   |

## TURKEY

The only taxes of which much is known are those on salt and tobacco (mortgaged to bondholders), which see under the section of *Finance*.

## EGYPT

The taxes in this country are likewise set forth under the title of *Finance*.

## UNITED STATES

The principal taxes have been as follows:—

| Year | Amount, £  |            |            | Shillings per Inhabitant |          |       |
|------|------------|------------|------------|--------------------------|----------|-------|
|      | Customs    | Internal   | Total      | Customs                  | Internal | Total |
| 1790 | 900,000    | ...        | 900,000    | 4.5                      | ...      | 4.5   |
| 1800 | 1,870,000  | 170,000    | 2,040,000  | 7.0                      | 0.7      | 7.7   |
| 1810 | 1,780,000  | 2,000      | 1,782,000  | 5.0                      | ...      | 5.0   |
| 1820 | 3,120,000  | 20,000     | 3,140,000  | 6.6                      | ...      | 6.6   |
| 1830 | 4,590,000  | 3,000      | 4,593,000  | 7.0                      | ...      | 7.0   |
| 1840 | 2,800,000  | ...        | 2,800,000  | 3.3                      | ...      | 3.3   |
| 1850 | 8,300,000  | ...        | 8,300,000  | 7.2                      | ...      | 7.2   |
| 1860 | 11,050,000 | ...        | 11,050,000 | 7.1                      | ...      | 7.1   |
| 1870 | 34,500,000 | 32,500,000 | 67,000,000 | 17.8                     | 16.8     | 34.6  |
| 1880 | 38,800,000 | 25,800,000 | 64,600,000 | 15.6                     | 10.3     | 25.9  |
| 1889 | 46,600,000 | 27,200,000 | 73,800,000 | 15.0                     | 8.7      | 23.7  |

Internal revenue was made up thus:—

|                  | 1865       | 1875       | 1889        |
|------------------|------------|------------|-------------|
| Spirits . . . .  | £2,600,000 | £9,600,000 | £15,400,000 |
| Tobacco . . . .  | 1,600,000  | 6,800,000  | 6,600,000   |
| Beer . . . .     | 500,000    | 1,600,000  | 5,000,000   |
| Sundries . . . . | 23,500,000 | 2,400,000  | 200,000     |
| Total . . . .    | 28,200,000 | 20,400,000 | 27,200,000  |

The principal States producing internal revenue are:—

| State            | Amount, £ | State          | Amount, £ |
|------------------|-----------|----------------|-----------|
| New York . . .   | 3,200,000 | Ohio . . . .   | 2,400,000 |
| Illinois . . . . | 6,400,000 | Pennsylvania . | 1,800,000 |
| Kentucky . . .   | 3,500,000 | Missouri . . . | 1,600,000 |

The above six States produce 70 per cent. of the total.

The items which composed customs revenue in the United States were as follows:—

|                | Value, £   |             | Duty, £    |            | Percentage |      |
|----------------|------------|-------------|------------|------------|------------|------|
|                | 1880       | 1889        | 1880       | 1889       | 1880       | 1889 |
| Sugar . . . .  | 16,100,000 | 17,400,000  | 8,800,000  | 11,700,000 | 55         | 67   |
| Woolens . . .  | 6,700,000  | 10,900,000  | 4,600,000  | 7,400,000  | 68         | 68   |
| Silks . . . .  | 6,500,000  | 7,300,000   | 3,900,000  | 3,700,000  | 60         | 50   |
| Cottons . . .  | 5,300,000  | 5,600,000   | 2,100,000  | 2,200,000  | 40         | 40   |
| Linens, &c. .  | 4,900,000  | 5,400,000   | 1,700,000  | 1,900,000  | 35         | 35   |
| Iron . . . .   | 12,900,000 | 9,000,000   | 4,800,000  | 3,600,000  | 37         | 40   |
| Tobacco . . .  | 1,300,000  | 2,800,000   | 1,000,000  | 2,300,000  | 75         | 80   |
| Liquor . . . . | 1,700,000  | 2,300,000   | 1,200,000  | 1,600,000  | 72         | 70   |
| Leather . . .  | 2,400,000  | 2,300,000   | 700,000    | 700,000    | 30         | 30   |
| Glass . . . .  | 1,100,000  | 1,600,000   | 600,000    | 900,000    | 55         | 55   |
| China . . . .  | 1,200,000  | 1,300,000   | 500,000    | 700,000    | 42         | 52   |
| Fruit . . . .  | 2,500,000  | 2,700,000   | 700,000    | 800,000    | 28         | 30   |
| Drugs . . . .  | 2,800,000  | 2,700,000   | 800,000    | 1,000,000  | 28         | 36   |
| Sundries . . . | 22,000,000 | 29,500,000  | 6,700,000  | 8,100,000  | 30         | 27   |
| Total . . . .  | 87,400,000 | 100,800,000 | 38,100,000 | 46,600,000 | 44         | 46   |

The aggregate of national and local taxation was approximately as follows:—

|                | Amount, £  |             | Shillings per Inhabitant |      |
|----------------|------------|-------------|--------------------------|------|
|                | 1880       | 1889        | 1880                     | 1889 |
| National . . . | 11,050,000 | 73,800,000  | 7.0                      | 23.7 |
| Local . . . .  | 19,600,000 | 52,200,000  | 12.6                     | 16.7 |
| Total . . .    | 30,650,000 | 126,000,000 | 19.6                     | 40.4 |

State taxes are set forth at length under the title of *Local Taxation*.

## CANADA

The principal taxes have been as follows:—

| Year         | Amount, £ |           |           | Shillings per Inhabitant |
|--------------|-----------|-----------|-----------|--------------------------|
|              | Customs   | Excise    | Total     |                          |
| 1868 . . . . | 1,700,000 | 600,000   | 2,300,000 | 14                       |
| 1872 . . . . | 2,600,000 | 900,000   | 3,500,000 | 20                       |
| 1876 . . . . | 2,600,000 | 1,200,000 | 3,800,000 | 20                       |
| 1880 . . . . | 2,900,000 | 800,000   | 3,700,000 | 18                       |
| 1884 . . . . | 4,100,000 | 1,100,000 | 5,200,000 | 23                       |
| 1887 . . . . | 4,500,000 | 1,300,000 | 5,800,000 | 24                       |

## AUSTRALIA

The taxation in 1888 of the several colonies was:—

|                  | Customs, £ | Internal, £ | Total, £   | £ per Inhab. |
|------------------|------------|-------------|------------|--------------|
| N. S. Wales . .  | 2,140,000  | 540,000     | 2,680,000  | 2.5          |
| Victoria . . .   | 2,350,000  | 720,000     | 3,070,000  | 2.9          |
| Queensland . .   | 1,350,000  | 230,000     | 1,580,000  | 4.2          |
| S. Australia . . | 530,000    | 210,000     | 740,000    | 2.4          |
| W. Australia . . | 180,000    | ...         | 180,000    | 4.3          |
| Tasmania . . .   | 300,000    | 110,000     | 410,000    | 2.8          |
| New Zealand . .  | 1,390,000  | 640,000     | 2,030,000  | 3.4          |
| Total . . . .    | 8,240,000  | 2,450,000   | 10,690,000 | 3.0          |

## INDIA

The principal taxes show as follows:—

|                  | 1865       | 1875       | 1890       | Pence per Inhabitant |      |      |
|------------------|------------|------------|------------|----------------------|------|------|
|                  |            |            |            | 1865                 | 1875 | 1890 |
| Land-tax         | 20,400,000 | 20,500,000 | 19,500,000 | 25                   | 25   | 23   |
| Opium . . . .    | 8,500,000  | 9,200,000  | 6,900,000  | 10                   | 11   | 8    |
| Salt . . . . .   | 5,300,000  | 6,000,000  | 6,700,000  | 6                    | 7    | 8    |
| Customs . . . .  | 2,300,000  | 2,600,000  | 1,200,000  | 2                    | 2    | 1    |
| Excise . . . . . | 2,200,000  | 2,400,000  | 3,900,000  | 2                    | 2    | 3    |
| Stamps . . . .   | 2,000,000  | 2,500,000  | 3,300,000  | 2                    | 2    | 3    |
| Sundries . . . . | 4,500,000  | 4,000,000  | 6,000,000  | 5                    | 4    | 7    |
| Total . . . .    | 45,200,000 | 47,200,000 | 47,500,000 | 52                   | 53   | 53   |

In 1865 and 1875 the rupee is taken at 24d., in 1890 at 20d.

## TEA

The consumption at present averages as follows:—

|                     | Lbs.        | Oz. per Inhab. |
|---------------------|-------------|----------------|
| United Kingdom . .  | 184,500,000 | 80             |
| United States . . . | 80,000,000  | 20             |
| Russia . . . . .    | 37,000,000  | 7              |
| Australia . . . . . | 20,000,000  | 88             |
| Canada . . . . .    | 22,000,000  | 70             |
| Various . . . . .   | 106,500,000 | ...            |
| Total . . . . .     | 450,000,000 | ...            |

Tea is mostly grown in China, the plants being 4 feet apart, that is, 2700 to the acre. Plants seven years old will give 700 lbs. tea to the acre, or 4 oz. per plant. The average exportation from tea-growing countries is shown thus:—

|                  | Millions of Lbs. |         |         |
|------------------|------------------|---------|---------|
|                  | 1880-83          | 1884-85 | 1887-88 |
| China . . . . .  | 284              | 290     | 290     |
| India . . . . .  | 53               | 66      | 90      |
| Japan . . . . .  | 37               | 35      | 40      |
| Java . . . . .   | 5                | 6       | 7       |
| Paraguay . . . . | 10               | 10      | 10      |
| Ceylon . . . . . | 1                | 8       | 19      |
| Total . . . . .  | 390              | 415     | 496     |

The consumption in the United States, compared with population, has not varied in fifteen years, being about 20 oz. per inhabitant. In the United Kingdom it steadily increases, and Indian tea, which is said to contain much more body than Chinese (as 4 lbs. to 5 lbs.), is rapidly supplanting that of China.

In 1888 the consumption in the United Kingdom was as follows:—

|                           | Lbs.        |
|---------------------------|-------------|
| Chinese . . . . .         | 78,500,000  |
| Indian and Ceylon . . . . | 105,800,000 |
| Total . . . . .           | 184,300,000 |

In 1878 India supplied only 17 per cent. of the tea consumed in Great Britain.

The following table shows the consumption since 1711:—

| Year           | Lbs.        | Oz. per Inhabitant | Duty per Lb., Pence | Price per Lb., Pence |
|----------------|-------------|--------------------|---------------------|----------------------|
| 1711 . . . . . | 142,000     | 1                  | 66                  | 216                  |
| 1725 . . . . . | 370,000     | 1                  | 66                  | 200                  |
| 1740 . . . . . | 1,003,000   | 3                  | 66                  | 200                  |
| 1750 . . . . . | 2,568,000   | 6                  | 40                  | 150                  |
| 1760 . . . . . | 4,072,000   | 9                  | 36                  | 120                  |
| 1770 . . . . . | 7,149,000   | 14                 | 30                  | 100                  |
| 1780 . . . . . | 5,152,000   | 9                  | 40                  | 110                  |
| 1790 . . . . . | 14,693,000  | 24                 | 7                   | 65                   |
| 1800 . . . . . | 20,359,000  | 21                 | 18                  | 70                   |
| 1810 . . . . . | 19,093,000  | 17                 | 46                  | 80                   |
| 1820 . . . . . | 22,452,000  | 18                 | 38                  | 70                   |
| 1830 . . . . . | 30,047,000  | 20                 | 30                  | 60                   |
| 1840 . . . . . | 32,253,000  | 20                 | 25                  | 50                   |
| 1850 . . . . . | 49,572,000  | 29                 | 26                  | 48                   |
| 1860 . . . . . | 78,340,000  | 43                 | 18                  | 40                   |
| 1870 . . . . . | 118,200,000 | 61                 | 6                   | 30                   |
| 1881 . . . . . | 167,700,000 | 73                 | 6                   | 25                   |
| 1888 . . . . . | 184,300,000 | 80                 | 6                   | 20                   |

In 1890 the duty was reduced to 4d., and as the price now averages 18d., it is probable the consumption will reach this year (1891) about 200 million pounds, or 5½ lbs. per inhabitant.

## TELEPHONES

In 1876 there were 200 working in Europe, and 330 in the United States. In 1883 there were nearly 79,000 working in 303 towns, viz.:—

|                     | Towns | Telephones |
|---------------------|-------|------------|
| Europe . . . . .    | 161   | 30,100     |
| America . . . . .   | 126   | 47,200     |
| Asia . . . . .      | 7     | 240        |
| Africa . . . . .    | 4     | 240        |
| Australia . . . . . | 5     | 900        |
| Total . . . . .     | 303   | 78,800     |

The numbers in use in various countries in 1885 and 1888 were:—

|                  | 1885   | 1888   |                   | 1885   | 1888  |
|------------------|--------|--------|-------------------|--------|-------|
| U. Kingdom . . . | 12,000 | 20,400 | Italy . . .       | 7,000  | 9,200 |
| France . . .     | 10,000 | 10,000 | Switzerland . . . | ...    | 7,600 |
| Germany . . .    | 17,000 | 33,000 | Spain . . .       | 1,000  | 2,200 |
| Russia . . .     | 3,000  | 7,600  | Sweden . . .      | 10,000 | ...   |
| Denmark . . .    | ...    | 1,900  | Holland . . .     | 4,000  | ...   |
| Austria . . .    | 2,500  | 4,000  | Belgium . . .     | 4,000  | 5,200 |

In 1888 the numbers in various cities were:—

|                    |       |                      |       |
|--------------------|-------|----------------------|-------|
| Berlin . . .       | 8,600 | St. Petersburg . . . | 1,500 |
| New York . . .     | 6,900 | Milan . . .          | 1,200 |
| Paris . . .        | 5,300 | Manchester . . .     | 1,200 |
| Stockholm . . .    | 3,800 | Vienna . . .         | 1,200 |
| Buenos Ayres . . . | 2,800 | Liverpool . . .      | 1,100 |
| Montevideo . . .   | 2,200 | Glasgow . . .        | 1,100 |
| Rome . . .         | 2,100 | Zurich . . .         | 1,100 |
| Hamburg . . .      | 1,900 | Naples . . .         | 1,000 |
| Geneva . . .       | 1,500 | Moscow . . .         | 800   |

The total number of telephones in use in the United States in 1885 was 325,000, and in Canada 18,000. The number of messages transmitted daily averages 100,000 in Berlin, 90,000 in London, 26,000 in Belgium, 16,000 in Austria. The United Kingdom in 1887 had 30,000 miles of telephone wire in use, Belgium 7000, Austria 7000, Germany 51,000, and the whole of Europe 330,000 miles. The longest lines in Europe are Berlin-Hanover 225 miles, Vienna-Budapesth 150 miles.

## THEATRES

The following table (1882) shows the number in each country, and how many have been burnt from 1880 to 1882:—

|                     | Number | Burnt | Period   | Burnt |
|---------------------|--------|-------|----------|-------|
| Great Britain . . . | 152    | 68    | 1800-10  | 16    |
| France . . .        | 337    | 63    | 1811-20  | 14    |
| Italy . . .         | 348    | 45    | 1821-30  | 31    |
| Spain . . .         | 160    | 17    | 1831-40  | 33    |
| Germany . . .       | 191    | 49    | 1841-50  | 44    |
| Russia . . .        | 44     | 25    | 1851-60  | 74    |
| Austria . . .       | 152    | 26    | 1861-70  | 98    |
| United States . . . | 550    | 176   | 1871-82  | 159   |
| Total . . .         | 1,934  | 469   | 83 years | 469   |

In 1882 the gross receipts of London theatres were £1,320,000, being an average of 7s. per inhabitant. The expenditure was:—

|                            |           |
|----------------------------|-----------|
| Pay to actors . . .        | 725,000   |
| Pay to authors . . .       | 79,000    |
| Rent . . .                 | 119,000   |
| Sundries and profits . . . | 397,000   |
|                            | 1,320,000 |

The gross receipts of Paris theatres were as follows:—

| Year       | £         | In 1889          | £       |
|------------|-----------|------------------|---------|
| 1850 . . . | 330,000   | Opera . . .      | 160,000 |
| 1860 . . . | 580,000   | Hippodrome . . . | 113,000 |
| 1867 . . . | 840,000   | Français . . .   | 94,000  |
| 1878 . . . | 1,200,000 | Comique . . .    | 77,000  |
| 1889 . . . | 1,280,000 | Various . . .    | 836,000 |

The sum paid to authors for plays in 1888 was £75,000 sterling. The number of actors employed was about 3200.

The loss of life by fires at theatres was as follows:—

| Year | Theatre              | Victims | Year | Theatre            | Victims |
|------|----------------------|---------|------|--------------------|---------|
| 1772 | Amsterdam . . .      | 48      | 1847 | Carlsruhe . . .    | 63      |
| 1778 | Saragossa . . .      | 137     | 1857 | Leghorn . . .      | 102     |
| 1794 | Capo d'Istria . . .  | 945     | 1867 | Philadelphia . . . | 13      |
| 1811 | Richmond . . .       | 78      | 1876 | Brooklyn . . .     | 283     |
| 1836 | St. Petersburg . . . | 770     | 1880 | Nice . . .         | 790     |
| 1845 | Canton . . .         | 1,660   | 1881 | Vienna . . .       | 1,460   |
| 1846 | Quebec . . .         | 355     | 1883 | Smolensk . . .     | 380     |

## THERMAL SPRINGS

The nature of some of the principal is thus shown:—

|                       | Carbonates |       | Sulphates |       | Chlorides of Sodium | All Fixed |
|-----------------------|------------|-------|-----------|-------|---------------------|-----------|
|                       | Soda       | Lime  | Soda      | Lime  |                     |           |
| Aix-les-Bains . . .   | ...        | 148   | 096       | 016   | 008                 | 430       |
| Aix-la-Chapelle . . . | 650        | 159   | 283       | ...   | 2,639               | 4,102     |
| Baden-Baden . . .     | ...        | 166   | ...       | 300   | 1,600               | 2,314     |
| Bath . . .            | ...        | 126   | 274       | 1,143 | 180                 | 2,060     |
| Bigorre . . .         | ...        | 142   | 400       | 1,900 | 040                 | 2,900     |
| Bilin . . .           | 3,009      | 402   | 827       | ...   | 382                 | 4,960     |
| Bourboule . . .       | 2,272      | 196   | 279       | ...   | 3,346               | 6,519     |
| Bussang . . .         | 789        | 054   | 110       | ...   | 078                 | 1,123     |

| Lisbon . . .          | ...        | 571   | ...       | 485   | 15,428              | 20,507    |
| Leamington . . .      | ...        | ...   | 3,993     | ...   | 3,424               | 11,513    |
| Malvern . . .         | ...        | ...   | 027       | ...   | ...                 | 076       |
| Neuenahr . . .        | 1,055      | 305   | 250       | ...   | 150                 | 2,313     |
| Ofen . . .            | 029        | 122   | 21,196    | 7,066 | 2,753               | 56,816    |
| Pfeffers . . .        | ...        | 142   | 009       | 007   | 052                 | 291       |
| Royat . . .           | 349        | 1,000 | 183       | ...   | 1,728               | 5,586     |
| St. Galmier . . .     | 238        | ...   | 079       | 180   | 216                 | 1,886     |
| St. Moritz . . .      | 191        | 726   | 272       | ...   | 039                 | 1,446     |
| Schwalbach . . .      | 188        | 439   | 005       | ...   | 007                 | 1,189     |
| Seltzer . . .         | 1,021      | 550   | 150       | ...   | 2,040               | 4,092     |
| Spa . . .             | 127        | 173   | 020       | ...   | 026                 | 658       |
| Tarasp . . .          | 3,545      | 1,619 | 2,155     | ...   | 3,828               | 12,251    |

The temperature, in Fahrenheit, of the principal springs, is shown thus:—

|                  |     |                   |     |                      |     |
|------------------|-----|-------------------|-----|----------------------|-----|
| Bilin . . .      | 66  | Thermopylae . . . | 113 | Ischia . . .         | 140 |
| St. Didier . . . | 70  | Vichy . . .       | 113 | Ofen . . .           | 144 |
| Mallow . . .     | 72  | Bath . . .        | 115 | Arles . . .          | 145 |
| Bristol . . .    | 74  | Gastein . . .     | 117 | Baden-Baden . . .    | 147 |
| Yverdon . . .    | 76  | Bigorre . . .     | 119 | Plombières . . .     | 147 |
| Buxton . . .     | 82  | Töplitz . . .     | 121 | Viseu . . .          | 153 |
| Kreuznach . . .  | 86  | Lucca . . .       | 124 | Wisbaden . . .       | 158 |
| Patras . . .     | 97  | Cauterets . . .   | 130 | Balkan . . .         | 163 |
| Wildbad . . .    | 98  | Ems . . .         | 131 | Acqui . . .          | 167 |
| Pfeffers . . .   | 101 | Aachen . . .      | 135 | Carlsbad . . .       | 167 |
| Alicante . . .   | 104 | Guimaraens . . .  | 138 | Chaudes-Aigues . . . | 174 |
| Pisa . . .       | 106 | Luchon . . .      | 140 | Baths of Nero . . .  | 182 |

In 1882 an official report of the result of some French springs was as follows:—

|                 | Barèges | Amelie | Vichy | Bourbonne | General Average |
|-----------------|---------|--------|-------|-----------|-----------------|
| Cured . . .     | 12      | 9      | 22    | 16        | 15              |
| Improved . . .  | 52      | 45     | 61    | 62        | 55              |
| No effect . . . | 33      | 36     | 14    | 17        | 25              |
| Worse . . .     | 3       | 10     | 3     | 5         | 5               |

## TIDES

The height of ordinary tides at various places is:—

|                 | <i>Feet</i> |                   | <i>Feet</i> |                   | <i>Feet</i> |
|-----------------|-------------|-------------------|-------------|-------------------|-------------|
| Bantry . . .    | 11          | Granville . . .   | 21          | Penzance . . .    | 16          |
| Belfast . . .   | 8           | Greenock . . .    | 9           | Portsmouth . . .  | 10          |
| Bergen . . .    | 4           | Harwich . . .     | 9           | Queenstown . . .  | 9           |
| Bordeaux . . .  | 8           | Havre . . .       | 13          | Ramsgate . . .    | 15          |
| Boulogne . . .  | 13          | Holyhead . . .    | 12          | St. Nazare . . .  | 9           |
| Brest . . .     | 13          | Hull . . .        | 15          | St. Malo . . .    | 19          |
| Calais . . .    | 10          | Isle of Man . . . | 19          | Scarborough . . . | 12          |
| Cherbourg . . . | 9           | Inverness . . .   | 12          | Shields . . .     | 9           |
| Dieppe . . .    | 15          | Jersey . . .      | 17          | Sligo . . .       | 8           |
| Dover . . .     | 14          | Kingstown . . .   | 9           | Sunderland . . .  | 10          |
| Drontheim . . . | 8           | Kinsale . . .     | 15          | Thurso . . .      | 9           |
| Dundee . . .    | 15          | Leith . . .       | 12          | Ushant . . .      | 20          |
| Dunkirk . . .   | 9           | Limerick . . .    | 17          | Waterford . . .   | 9           |
| Fundy Bay . . . | 66          | Liverpool . . .   | 19          | Weston-S.-M. . .  | 27          |
| Galway . . .    | 10          | London . . .      | 16          | Westport . . .    | 13          |
| Glasgow . . .   | 9           | Penbroke . . .    | 15          | Whitehaven . . .  | 24          |

Toulon has a tide of 4 inches, which is about the average of the Mediterranean.

## TIME

## TIN

The average yearly consumption of tin metal in Great Britain was:—

| Years           | Tons, Tin Metal |            |        | Value per Ton, £ |
|-----------------|-----------------|------------|--------|------------------|
|                 | British         | Net Import | Total  |                  |
| 1800-20 average | 2,510           | ...        | 2,510  | 76               |
| 1821-40 "       | 4,180           | ...        | 4,180  | 70               |
| 1841-60 "       | 5,910           | 450        | 6,360  | 107              |
| 1861 . . .      | 7,450           | ...        | 7,450  | 122              |
| 1871 . . .      | 10,900          | 810        | 11,710 | 136              |
| 1880 . . .      | 9,200           | 6,550      | 15,750 | 91               |
| 1888 . . .      | 9,200           | 22,000     | 31,200 | 117              |

\* Dresden, for example, 12.54, signifies 54 minutes past noon.

The production in 1882 was as follows:—

|                     | Tons    |           | Value of Ore, £ | Metal Ratio per Cent. |
|---------------------|---------|-----------|-----------------|-----------------------|
|                     | Tin Ore | Tin Metal |                 |                       |
| Great Britain . . . | 13,700  | 9,200     | 670,000         | 56                    |
| Australia . . .     | 24,000  | 17,500    | 1,250,000       | 74                    |
| Java . . .          | 15,000  | 9,000     | 700,000         | 60                    |
| Total . . .         | 52,700  | 35,700    | 2,620,000       | 69                    |

## TOBACCO

In 1884 the production was as follows:—

|                     | Acres     | Tons    |
|---------------------|-----------|---------|
| United States . . . | 610,000   | 210,000 |
| West Indies . . .   | 50,000    | 22,000  |
| Brazil . . .        | 105,000   | 38,000  |
| Japan . . .         | 100,000   | 40,000  |
| Java . . .          | 110,000   | 46,000  |
| India . . .         | 580,000   | 170,000 |
| Russia . . .        | 110,000   | 75,000  |
| Austria . . .       | 140,000   | 65,000  |
| Turkey . . .        | 90,000    | 35,000  |
| Germany . . .       | 52,000    | 32,000  |
| France . . .        | 26,000    | 15,000  |
| Manilla, &c. . .    | 54,000    | 20,000  |
| Total . . .         | 2,029,000 | 768,000 |

The following table shows the consumption in 1883 approximately:—

|                           | Tons    | Oz. per Inhabitant |
|---------------------------|---------|--------------------|
| United Kingdom . . .      | 23,000  | 23                 |
| France . . .              | 32,000  | 29                 |
| Germany . . .             | 61,000  | 48                 |
| Russia . . .              | 54,000  | 24                 |
| Austria . . .             | 48,000  | 42                 |
| Italy . . .               | 18,000  | 22                 |
| Spain and Portugal . . .  | 18,000  | 32                 |
| Belgium and Holland . . . | 23,000  | 84                 |
| Scandinavia . . .         | 10,000  | 40                 |
| Turkey . . .              | 22,000  | 70                 |
| Switzerland . . .         | 7,000   | 82                 |
| Europe . . .              | 383,000 | 44                 |
| United States . . .       | 85,000  | 59                 |
| India . . .               | 165,000 | 30                 |
| Japan . . .               | 38,000  | 39                 |
| Brazil . . .              | 20,000  | 70                 |
| Colonies, &c. . .         | 77,000  | ...                |
| The World . . .           | 768,000 | ...                |

The consumption per inhabitant has increased much more rapidly in France than in the United Kingdom, viz.:—

|      | Million Lbs.   |        | Oz. per Inhabitant |        | Duty, Pence per Lb. |        |
|------|----------------|--------|--------------------|--------|---------------------|--------|
|      | United Kingdom | France | United Kingdom     | France | United Kingdom      | France |
| 1801 | 17             | ...    | 16                 | ...    | 20                  | ...    |
| 1811 | 21             | 20     | 18                 | 11     | 27                  | 6      |
| 1821 | 16             | 22     | 12                 | 12     | 48                  | 6      |
| 1831 | 20             | 24     | 13                 | 12     | 36                  | 12     |
| 1841 | 22             | 36     | 13                 | 17     | 36                  | 12     |
| 1851 | 31             | 44     | 18                 | 20     | 36                  | 24     |
| 1861 | 35             | 56     | 19                 | 24     | 36                  | 30     |
| 1872 | 44             | 61     | 22                 | 26     | 36                  | 40     |
| 1881 | 51             | 70     | 23                 | 29     | 42                  | 40     |
| 1888 | 57             | 80     | 23                 | 33     | 42                  | 40     |

De Foville estimates the consumption as follows:—

|               | Oz. per Inhabitant |               | Oz. per Inhabitant |
|---------------|--------------------|---------------|--------------------|
| France . . .  | 28                 | Austria . . . | 42                 |
| Belgium . . . | 87                 | Norway . . .  | 35                 |
| Holland . . . | 70                 | Denmark . . . | 35                 |
| Germany . . . | 53                 | Russia . . .  | 28                 |

Professor Bochk estimates the annual consumption per head at two epochs as follows:—

|            | Oz. per Inhab. |         |         | Oz. per Inhab. |         |
|------------|----------------|---------|---------|----------------|---------|
|            | 1870-74        | 1880-84 |         | 1870-74        | 1880-84 |
| U. Kingdom | 23             | 23      | Norway  | 40             | 37      |
| France     | 29             | 33      | Holland | 85             | 110     |
| Germany    | 67             | 48      | Belgium | 45             | 51      |
| Sweden     | 32             | 31      | Italy   | 29             | 21      |

Newmann Spallart's estimate (1885) is as follows:—

|             | Oz. per Inhabitant |               | Oz. per Inhabitant |
|-------------|--------------------|---------------|--------------------|
| France      | 33                 | Sweden        | 41                 |
| Germany     | 69                 | Denmark       | 56                 |
| Russia      | 32                 | Norway        | 40                 |
| Austria     | 70                 | Holland       | 98                 |
| Italy       | 24                 | Belgium       | 88                 |
| Switzerland | 80                 | United States | 106                |

The market value of various kinds of tobacco in 1884 was as follows:—

|               | £ per Ton | Value of Crop, £ |
|---------------|-----------|------------------|
| Cuba          | 400       | 4,800,000        |
| Manilla       | 90        | 1,800,000        |
| Algeria       | 45        | 300,000          |
| United States | 50        | 10,000,000       |
| Brazil        | 70        | 2,800,000        |
| Java          | 63        | 1,200,000        |
| Turkey        | 63        | 2,200,000        |

The percentage of nicotine was as follows:—

|          |     |            |     |
|----------|-----|------------|-----|
| Syria    | 0.0 | California | 4.0 |
| Havana   | 2.0 | Kentucky   | 6.1 |
| Maryland | 2.3 | Virginia   | 6.9 |
| Alsace   | 3.0 | France     | 7.5 |

Snuff contains 2½ per cent., Brazilian tobacco 10 per cent. In most countries there are heavy taxes on tobacco, for which see *Taxes*.

#### FRANCE

The tobacco monopoly dates from 1816; the proceeds in 1889 amounted to £14,900,000, and it is believed that the Government makes a profit of 12 millions sterling per annum. The largest factory is that of Lille, which turns out 600,000 tons yearly. Not quite half the tobacco consumed is grown in France, the crop averaging 16,000 tons, imported tobacco 20,000 tons. About 20,000 persons are employed by Government in the manufacture or sale. Cigars and cigarettes form 13 per cent., tobacco for pipes 87 per cent.; the sale of cigars has been as follows:—

| Year | Tons  | Ratio of Total |
|------|-------|----------------|
| 1839 | 226   | 1.5            |
| 1859 | 2,210 | 9.0            |
| 1883 | 4,800 | 13.0           |

Most of the imported tobacco comes from the United States. The tobacco grown in France covers 25,000 acres, the average number of plants being 10,000 to the acre.

#### GERMANY

The cultivation has been as follows:—

| Year | Acres  | Crop, Tons | Value, £ | £ per Ton |
|------|--------|------------|----------|-----------|
| 1871 | 56,000 | 35,900     | 890,000  | 25.5      |
| 1877 | 54,000 | 31,700     | 580,000  | 20.5      |
| 1887 | 54,000 | 38,600     | 820,000  | 21.5      |

The production is short of requirements, imports averaging 25,000 tons yearly.

#### RUSSIA

The production according to N. Spallart has been:—

| Year | Acres   | Tons   | Cwts. per Acre |
|------|---------|--------|----------------|
| 1875 | 140,000 | 49,000 | 7.0            |
| 1885 | 130,000 | 51,000 | 7.8            |

Spallart estimates the consumption at 80,000 tons, which implies an importation of about 30,000 tons, but the trade returns show less than one-tenth of that quantity.

#### AUSTRIA

The production has been approximately as follows:—

| Year | Tons    |         |        |
|------|---------|---------|--------|
|      | Austria | Hungary | Total  |
| 1835 | 7,000   | 15,000  | 22,000 |
| 1877 | 6,000   | 50,000  | 56,000 |
| 1885 | 4,000   | 60,000  | 64,000 |

Besides the above crop, Austria consumes yearly about 15,000 tons imported.

#### ITALY

The consumption according to Spallart was as follows:—

| Year | Tons    |          |        |
|------|---------|----------|--------|
|      | Italian | Imported | Total  |
| 1879 | 4,300   | 12,100   | 16,400 |
| 1885 | 5,200   | 14,600   | 19,800 |

#### CUBA

The quantity of tobacco raised is comparatively small, exports seldom exceeding 8000 tons, including 500 tons of cigars. The quality, however, is so fine that the unmanufactured tobacco ranges from £200 to £800 a ton, and cigars from £1000 to £5000 a ton. Newmann Spallart gives the exportation as follows:—

| Year | Tobacco, Tons | Cigars, Tons | Total |
|------|---------------|--------------|-------|
| 1875 | 7,100         | 700          | 7,800 |
| 1884 | 6,200         | 500          | 6,700 |

In 1888 Cuba exported 220 million cigars and 300,000 bales of tobacco. Porto Rico exports 2500 tons of tobacco.

#### MANILLA

The Compañia General, with a capital of three millions sterling, owns large estates, employs 10,000 hands, and turns out yearly 80 million cigars, 400 million cigarettes, and 2500 tons of cut tobacco. The island of Luzon has 60,000 acres under tobacco. In 1889 there were 112 million cigars exported, of which 26 millions went to Spain, 18 millions to England.

#### UNITED STATES

The United States exported the following quantities:—

|      | Tons    | Value, £  | £ per Ton |
|------|---------|-----------|-----------|
| 1800 | 40,000  | 1,100,000 | 27.5      |
| 1820 | 41,000  | 1,500,000 | 37.0      |
| 1840 | 62,000  | 1,900,000 | 32.0      |
| 1860 | 86,000  | 2,500,000 | 28.8      |
| 1870 | 84,000  | 4,300,000 | 51.5      |
| 1880 | 97,000  | 3,400,000 | 35.0      |
| 1889 | 100,000 | 4,700,000 | 47.0      |

Full details of the tobacco crop of the United States are given under the title of *Agriculture*.

### TOYS

France exported the following in 1889 :—

| To                      | Tons  | Value, £  |
|-------------------------|-------|-----------|
| Great Britain . . . .   | 1,325 | 500,000   |
| Other countries . . . . | 6,335 | 2,300,000 |
| Total . . . .           | 7,660 | 2,800,000 |

Berlin papers in 1890 give statistics of Christmas trees, viz. :—

|                         |         |
|-------------------------|---------|
| Berlin takes . . . . .  | 400,000 |
| Dresden takes . . . . . | 200,000 |

Those of 3 feet sell for a shilling, 10 feet 2s., and 20 feet 10s. to 15s., including the flower-pot.

The following were the most important trade unions in the United Kingdom in 1887 :—

|                           | Number | Funds, £ |
|---------------------------|--------|----------|
| Engineers . . . . .       | 51,900 | 125,100  |
| Carpenters . . . . .      | 25,500 | 40,000   |
| Boiler-makers . . . . .   | 25,100 | 10,200   |
| Cotton-spinners . . . . . | 15,400 | 51,700   |

Mr. Philips Bevan in 1880 compiled the following table of strikes in the United Kingdom in ten preceding years :—

| Trades           | Districts            | Towns           |
|------------------|----------------------|-----------------|
| Builders . 598   | Scotland . . . 473   | London . . 56   |
| Colliers . 339   | York . . . 338       | Manchester . 44 |
| Textile . 277    | Lancashire . . 149   | Leeds . . 73    |
| Carpenters . 187 | Northumberland . 138 | Sheffield . 66  |
| Masons . 151     | South-West . . 135   | Glasgow . 85    |
| Various . 800    | Various . . . 1,119  | Edinburgh . 65  |
|                  |                      | Newcastle . 63  |
| Total . 2,352    | Total . . 2,352      |                 |

### ITALY

In five years ending 1876 there were 206 strikes :—

|                             |     |
|-----------------------------|-----|
| Masters gained . . . . .    | 124 |
| Operatives gained . . . . . | 82  |

Total . . . . . 206

There were 137 for higher wages, and 69 for other causes.

The trades in which the strikes in these States occurred were (1881-86) as follows :—

| Trade               | Hands on Strike |          |          |              |         |         |           |
|---------------------|-----------------|----------|----------|--------------|---------|---------|-----------|
|                     | Massachusetts   | Illinois | New York | Pennsylvania | Ohio    | Various | Total     |
| Mining . . . . .    | ...             | 30,200   | ...      | 118,400      | 50,700  | 59,600  | 258,900   |
| Metals . . . . .    | 4,200           | 22,000   | 11,400   | 90,400       | 27,100  | 38,300  | 193,400   |
| Transport . . . . . | 2,500           | 17,900   | 51,200   | 2,700        | 3,500   | 50,100  | 127,900   |
| Building . . . . .  | 7,600           | 9,700    | 57,100   | 4,200        | 1,900   | 19,400  | 99,900    |
| Tobacco . . . . .   | 1,000           | 1,800    | 74,100   | 2,500        | 2,600   | 15,400  | 97,400    |
| Clothing . . . . .  | 2,500           | 3,900    | 47,200   | 10,800       | 200     | 9,800   | 74,400    |
| Cottons . . . . .   | 17,100          | ...      | 6,300    | 1,900        | 500     | 17,800  | 43,600    |
| Shoes . . . . .     | 22,900          | 900      | 3,500    | 1,200        | 4,500   | 7,800   | 40,800    |
| Food . . . . .      | ...             | 33,000   | 4,700    | 100          | 100     | 2,100   | 40,000    |
| Timber . . . . .    | ...             | 12,000   | ...      | ...          | ...     | 22,900  | 34,900    |
| Furniture . . . . . | 900             | 9,300    | 5,900    | 1,100        | 2,500   | 5,400   | 25,100    |
| Machinery . . . . . | 300             | 4,300    | 4,500    | 2,200        | 2,700   | 8,300   | 22,300    |
| Brick . . . . .     | ...             | 5,000    | 6,500    | 900          | 600     | 7,300   | 20,300    |
| Various . . . . .   | 22,100          | 41,900   | 57,500   | 47,000       | 12,800  | 63,000  | 244,300   |
| Total . . . . .     | 81,100          | 191,900  | 329,900  | 283,400      | 109,700 | 327,200 | 1,323,200 |

### TRADE UNIONS

According to Mr. George Howell, there are about 8000 trade unions in Great Britain, counting 1,200,000 members, with an aggregate revenue of £2,000,000. He publishes the following balance-sheet for 30 years down to 1881 :—

#### Payments

|                                  |            |
|----------------------------------|------------|
| Sick operatives . . . . .        | £1,004,000 |
| Out of work operatives . . . . . | 1,979,000  |
| On strike operatives . . . . .   | 274,000    |
| Pensions . . . . .               | 330,000    |
| Funerals . . . . .               | 319,000    |
| Accidents . . . . .              | 120,000    |
| Loans . . . . .                  | 67,000     |

Total . . . . . £4,093,000

Forty-four principal unions showed as follows :—

|                      | 1871    | 1883    |
|----------------------|---------|---------|
| Members . . . . .    | 224,000 | 253,000 |
| Income, £ . . . . .  | 240,000 | 293,000 |
| Reserve, £ . . . . . | 200,000 | 431,000 |

### UNITED STATES

Commissioner Wadlin, chief of the Bureau of Statistics for Massachusetts, published in 1888 a report on strikes from 1825 to 1886; with a vast amount of detail on all the strikes by operatives and lockouts by employers during the six years ending December 1886. These latter may be summed up thus :—

|                         | Strikes        |                 | Hands after Strike | Lockouts, Hands Involved |
|-------------------------|----------------|-----------------|--------------------|--------------------------|
|                         | Hands Employed | Hands on Strike |                    |                          |
| Massachusetts . . . . . | 114,000        | 81,100          | 109,300            | 14,300                   |
| Illinois . . . . .      | 214,000        | 191,900         | 213,300            | 21,400                   |
| New York . . . . .      | 376,600        | 329,900         | 374,100            | 71,200                   |
| Pennsylvania . . . . .  | 361,600        | 283,400         | 358,100            | 16,700                   |
| Ohio . . . . .          | 132,700        | 109,700         | 130,200            | 7,300                    |
| Various . . . . .       | 461,400        | 327,200         | 450,000            | 29,700                   |
| Total . . . . .         | 1,660,300      | 1,323,200       | 1,635,000          | 160,800                  |

The trades affected by lockouts by masters were (1881-86) as follows :—

|                     | Hands Locked Out |          |        |        |        |         |         |
|---------------------|------------------|----------|--------|--------|--------|---------|---------|
|                     | Tobacco          | Clothing | Shoes  | Food   | Metals | Various | Total   |
| Massachusetts . . . | ...              | ...      | 11,100 | 700    | ...    | 2,500   | 14,300  |
| Illinois . . .      | 500              | 600      | ...    | 16,000 | 1,700  | 2,600   | 21,400  |
| New York . . .      | 23,900           | 23,100   | 500    | ...    | 4,500  | 19,200  | 71,200  |
| Pennsylvania . . .  | 800              | 1,400    | 4,000  | ...    | 5,900  | 4,600   | 16,700  |
| Ohio . . .          | 1,700            | ...      | 2,000  | ...    | 1,000  | 2,800   | 7,500   |
| Various . . .       | 3,600            | 1,900    | 300    | ...    | 3,500  | 20,400  | 29,700  |
| Total . . .         | 30,500           | 27,000   | 17,900 | 16,700 | 16,600 | 52,100  | 160,800 |

The following is a general summary of all strikes in the State of Massachusetts between 1825 and 1886 :—

| Trade            | Number | Locality      | Number |
|------------------|--------|---------------|--------|
| Textiles . . .   | 59     | Boston . . .  | 35     |
| Shoemakers . . . | 34     | Lynn . . .    | 14     |
| Builders . . .   | 10     | Lowell . . .  | 10     |
| Various . . .    | 56     | Various . . . | 90     |
| Total . . .      | 159    | Total . . .   | 159    |

The causes and results were as follows :—

| For                     | Result                 |
|-------------------------|------------------------|
| Better wages . . . 118  | Successful . . . 24    |
| Shorter hours . . . 24  | Unsuccessful . . . 109 |
| Various causes . . . 17 | Compromised . . . 26   |
| Total . . . 159         | Total . . . 159        |

The loss caused in Massachusetts by strikes to employers and operatives in the several trades during the said six years (1881-86) was as follows :—

| Trade               | To Employers | To Operatives | Total     |
|---------------------|--------------|---------------|-----------|
| Shoes . . .         | £ 100,000    | £ 330,000     | £ 430,000 |
| Woollen-mills . . . | 105,000      | 170,000       | 275,000   |
| Cotton-mills . . .  | 15,000       | 130,000       | 145,000   |
| Building . . .      | 90,000       | 50,000        | 140,000   |
| Leather . . .       | 30,000       | 30,000        | 60,000    |
| Sundries . . .      | 70,000       | 160,000       | 230,000   |
| Total . . .         | 410,000      | 870,000       | 1,280,000 |

If the losses in Massachusetts be on a par with those of the other States according to the number of hands on strike and of those involved in lockouts, the total for the Union would be as follows :—

|                    | Aggregate Loss in Strikes of Six Years |               |             | Loss in Lockouts |
|--------------------|----------------------------------------|---------------|-------------|------------------|
|                    | To Employers                           | To Operatives | Total       |                  |
| Massachusetts      | £ 410,000                              | £ 870,000     | £ 1,280,000 | £ 315,000        |
| Illinois . . .     | 950,000                                | 2,060,000     | 3,010,000   | 470,000          |
| New York . . .     | 1,650,000                              | 3,560,000     | 5,210,000   | 1,580,000        |
| Pennsylvania . . . | 1,400,000                              | 3,070,000     | 4,470,000   | 360,000          |
| Ohio . . .         | 540,000                                | 1,160,000     | 1,700,000   | 170,000          |
| Other States . . . | 1,630,000                              | 3,530,000     | 5,160,000   | 650,000          |
| Total . . .        | 6,580,000                              | 14,250,000    | 20,830,000  | 3,545,000        |

This shows a total supposed loss of 24 millions sterling, or 4 millions a year, in disputes between employers and operatives.

The loss caused by lockouts in the same six years was :—

| Trade          | To Employers | To Operatives | Total     |
|----------------|--------------|---------------|-----------|
| Shoes . . .    | £ 27,000     | £ 110,000     | £ 137,000 |
| Building . . . | 63,000       | 5,000         | 68,000    |
| Leather . . .  | 12,000       | 75,000        | 87,000    |
| Sundries . . . | 13,000       | 10,000        | 23,000    |
| Total . . .    | 115,000      | 200,000       | 315,000   |

## TRAMWAYS

Statistics are wanting as regards most countries.

### UNITED KINGDOM

The mileage and cost have been as follows :—

|                | Miles |      | Cost, £   |            | £ per Mile |        |
|----------------|-------|------|-----------|------------|------------|--------|
|                | 1880  | 1889 | 1880      | 1889       | 1880       | 1889   |
| England . . .  | 269   | 758  | 4,200,000 | 11,200,000 | 15,550     | 14,700 |
| Scotland . . . | 50    | 81   | 800,000   | 1,300,000  | 16,000     | 15,500 |
| Ireland . . .  | 48    | 110  | 700,000   | 1,200,000  | 13,500     | 11,000 |
| U. Kingdom     | 367   | 949  | 5,700,000 | 13,700,000 | 15,400     | 14,400 |

Traffic returns in 1889 showed as follows :—

|                | Million Passengers | Passengers per Mile | Receipts, £ | Net, £  | Ratio to Capital |
|----------------|--------------------|---------------------|-------------|---------|------------------|
| England . . .  | 380                | 501,000             | 2,370,000   | 543,000 | 4.9              |
| Scotland . . . | 71                 | 871,000             | 400,000     | 119,000 | 9.3              |
| Ireland . . .  | 27                 | 249,000             | 211,000     | 51,000  | 4.2              |
| U. Kingdom     | 478                | 503,000             | 2,981,000   | 713,000 | 5.2              |

According to Scott Russell, the cost of working tramways by compressed air (as at Nantes) is 5d. per mile, by steam 39d., and by horse 56d. per mile. He also says that a tramcar drawn by two horses on the level will require the following number, according to gradients :—

| Gradient      | Horses |
|---------------|--------|
| 1 in 75 . . . | 4      |
| 1 in 37 . . . | 6      |
| 1 in 25 . . . | 8      |

The above returns show that the average fare in pence is 1.5 in England, 1.3 in Scotland, and 1.8 in Ireland.

### GERMANY

Berlin has 80 miles of tramway, which carried 52 million passengers in 1888.

## FRANCE

In 1889 there were 455 miles of tramway in use. The cost of construction was £5,650,000, or £12,000 per mile, and the traffic in 1888 showed:—

|                       |             |
|-----------------------|-------------|
| Earnings . . . . .    | £ 1,430,000 |
| Expenses . . . . .    | 1,160,000   |
| Net product . . . . . | 270,000     |

This was equal to 4½ per cent. on the capital cost. The Omnibus Co. of Paris has 13,700 horses, of which 10,200 are used for busses and 3500 for trams, being 15 for each bus and 14 for each tramcar.

## UNITED STATES

The United States and Canada showed tramways thus:—

|                 | 1882  | 1890  |
|-----------------|-------|-------|
| Lines . . . . . | 415   | 957   |
| Miles . . . . . | 3,020 | 8,820 |

The lines running in 1882 employed 35,000 men and 100,000 horses, carrying 101 million passengers monthly. The horses drew 18,000 cars, and consumed yearly 150,000 tons hay and 300,000 tons grain: they last four years. The value of tramways in 1890 was:—

|                           |              |
|---------------------------|--------------|
| Horse trams . . . . .     | £ 12,200,000 |
| Steam and cable . . . . . | 11,600,000   |
| Electric . . . . .        | 10,200,000   |
| Total . . . . .           | 34,000,000   |

## BELGIUM

In 1888 there were 42 miles of tramway; traffic of year, 14,800,000 passengers; receipts, £199,000; net earnings, £61,000; cost of construction, £1,030,000.

## HOLLAND

In 1882 the returns were:—

|                     | Miles | Passengers | Receipts, £ |
|---------------------|-------|------------|-------------|
| Amsterdam . . . . . | 38    | 8,400,000  | 85,000      |
| Rotterdam . . . . . | 12    | 4,100,000  | 31,000      |
| Hague . . . . .     | 20    | 2,350,000  | 27,000      |
| Various . . . . .   | 190   | 4,050,000  | 57,000      |
| Total . . . . .     | 260   | 18,900,000 | 210,000     |

Returns for later years show:—

|                       | 1884       | 1888       |
|-----------------------|------------|------------|
| Miles . . . . .       | 380        | 555        |
| Horses . . . . .      | ...        | 1,023      |
| Locomotives . . . . . | 152        | 214        |
| Passengers . . . . .  | 20,100,000 | 30,900,000 |
| Receipts, £ . . . . . | 267,000    | 282,000    |

## SWITZERLAND

In 1888 there were 22 miles of tramway, worked by 5 locomotives and 260 horses, carrying yearly 6,300,000 passengers; receipts, £37,000; net receipts, £8200; cost of construction, £169,000, or £7600 per mile.

## TRANSPORT

The following table shows approximately the weight of sea-borne merchandise yearly:—

|                    | Tons Yearly |            |             |             | Ratio in 1888 |
|--------------------|-------------|------------|-------------|-------------|---------------|
|                    | 1861-70     | 1871-80    | 1880        | 1888        |               |
| Grain . . . . .    | 4,375,000   | 10,072,000 | 10,530,000  | 13,600,000  | 9.3           |
| Cotton . . . . .   | 486,000     | 995,000    | 1,170,000   | 1,450,000   | 1.0           |
| Wool . . . . .     | 121,000     | 252,000    | 301,000     | 440,000     | 0.3           |
| Meat . . . . .     | 125,000     | 380,000    | 660,000     | 730,000     | 0.5           |
| Coal . . . . .     | 14,200,000  | 22,100,000 | 30,400,000  | 38,200,000  | 26.2          |
| Iron . . . . .     | 1,920,000   | 3,490,000  | 4,588,000   | 4,700,000   | 3.2           |
| Sugar . . . . .    | 1,260,000   | 2,086,000  | 2,350,000   | 2,600,000   | 1.8           |
| Clothing . . . . . | 1,410,000   | 2,520,000  | 2,815,000   | 3,100,000   | 2.1           |
| Coffee . . . . .   | 346,000     | 452,000    | 527,000     | 630,000     | 0.4           |
| Timber . . . . .   | 16,170,000  | 21,215,000 | 23,550,000  | 25,400,000  | 17.3          |
| Sundries . . . . . | 13,807,000  | 26,778,000 | 35,875,000  | 55,550,000  | 37.9          |
| Total * . . . . .  | 54,220,000  | 90,340,000 | 112,766,000 | 146,400,000 | 100.0         |

The weight and value of sea-borne merchandise at various dates were approximately as follows:—

| Year           | Tons, Millions | Value, Million £ | Value per Ton |
|----------------|----------------|------------------|---------------|
| 1830 . . . . . | 10             | 193              | £19           |
| 1840 . . . . . | 15             | 287              | 19            |
| 1850 . . . . . | 25             | 438              | 17            |
| 1860 . . . . . | 41             | 701              | 17            |
| 1870 . . . . . | 71             | 995              | 14            |
| 1880 . . . . . | 117            | 1,360            | 12            |
| 1888 . . . . . | 146            | 1,490            | 10            |

The weight borne on canals and rivers was approximately thus:—

|                      | Tons       |                         | Tons        |
|----------------------|------------|-------------------------|-------------|
| U. Kingdom . . . . . | 34,300,000 | Canada . . . . .        | 3,400,000   |
| France . . . . .     | 24,500,000 | United States . . . . . | 51,000,000  |
| Germany . . . . .    | 8,000,000  |                         |             |
| Russia . . . . .     | 8,600,000  | Total . . . . .         | 137,500,000 |
| Belgium . . . . .    | 7,700,000  |                         |             |

The foregoing is an estimate as regards the United States, based on the fact that in 1880 the steamboats alone carried 25,500,000 tons merchandise, without counting flat-boats drawn by tugs.

The weight of merchandise carried by railways was approximately as follows:—

|                          | Millions of Tons |      |       |       |
|--------------------------|------------------|------|-------|-------|
|                          | 1860             | 1870 | 1880  | 1888  |
| United Kingdom . . . . . | 82               | 170  | 256   | 282   |
| Continent . . . . .      | 68               | 231  | 413   | 483   |
| United States . . . . .  | 70               | 150  | 361   | 599   |
| Colonies, &c . . . . .   | 2                | 11   | 40    | 75    |
| The World . . . . .      | 222              | 562  | 1,070 | 1,430 |

\* These totals are equal to 65 per cent. of the aggregate annual tonnage of the port-entries of the world at the various periods (see p. 522).

It appears, therefore, that the annual goods traffic of the world daily, counting 310 days to the year, is as follows:—

|                    | Tons      |
|--------------------|-----------|
| By rail . . . . .  | 4,610,000 |
| On sea . . . . .   | 470,000   |
| By canal . . . . . | 440,000   |
| Total . . . . .    | 5,520,000 |

But as each sea-voyage may be assumed to last ten days, during which the merchandise is being carried, the real goods traffic of the world (allowing three days for canal traffic) averages daily as follows:—

|                    | Tons       |
|--------------------|------------|
| By rail . . . . .  | 4,610,000  |
| By sea . . . . .   | 4,700,000  |
| By canal . . . . . | 1,320,000  |
| Total . . . . .    | 10,630,000 |

As regards passenger traffic, the following table shows approximately the principal sea-routes and their number yearly:—

| Between                                   | Passengers |
|-------------------------------------------|------------|
| Europe and United States . . . . .        | 900,000    |
| England and France . . . . .              | 650,000    |
| Mediterranean and South America . . . . . | 450,000    |
| France and Algeria . . . . .              | 240,000    |
| Danube ports . . . . .                    | 1,650,000  |
| Adriatic and Levant . . . . .             | 280,000    |

The traffic between England and the Continent has been as follows:—

| Year           | Passengers |
|----------------|------------|
| 1842 . . . . . | 109,000    |
| 1848 . . . . . | 124,000    |
| 1889 . . . . . | 730,000    |

Dover and Calais boats carry 360,000; Newhaven and Dieppe, 190,000; Folkestone and Boulogne, 115,000; Dover and Ostend, 56,000.

As regards railway passengers, see *Railways*.

## TRAVELLERS

In 1870 there were 398,000 in Russia, including 237,000 Germans and 123,000 Austrians.

In 1879 there were 947,000 persons who visited Switzerland, of whom 350,000 were Germans, 210,000 Americans, and 160,000 Russians. See *Passengers and Transport*.

## TRUFFLES

Perigord produces 1500 tons per annum, worth £1000 per ton; 90 per cent. are consumed in France.

## TULIPS

One root of the "Viceroy" sold at Amsterdam for £2600, and when a law was passed against paying over £500 for a root, a "Semper Augustus" fetched £460, with a carriage and pair of horses. Holland has 600 acres under tulips, and exports the value of £110,000 per annum.

## TUNNELS

Herodotus mentions a tunnel 8 × 8 feet, with a length of 1100 yards, to supply Samos with water; remains discovered in 1882. The Schemnitz tunnel, completed in 1888, was begun in the 18th century, at a height of 3000 feet over sea-level: the original contract was for £7 a lineal yard, but the works were suspended from

1795 to 1825, and again from 1835 to 1855; the cost has been one million sterling. The Channel tunnel was first proposed by De Gramond in 1867, in the form of a metal telescope 30 × 24 feet, to cost 7 millions sterling, and be completed in seven years. Hawkshaw took up the project in 1869, Bateman and Revy being associated in the plans. A company was formed in 1874; estimated cost, 3 millions sterling; length, 30 miles; opening, 14 × 14 feet; trains to go 40 miles an hour, each having 12 carriages with 400 passengers, and 20 waggons with 100 tons goods; estimated yearly traffic, 6,000,000 passengers and 1,500,000 tons goods. Parliament opposed the project, and the works were suspended in 1883.

The most remarkable tunnels are the following:—

| Date | Tunnel                | Length, Yards | Cost per Yard, £ | Maker                | Years in Making | Aperture, Feet |
|------|-----------------------|---------------|------------------|----------------------|-----------------|----------------|
| 1827 | Harecastle . . . . .  | 2,926         | ...              | Telford . . . . .    | 3               | 14 × 16        |
| 1835 | Kilsby . . . . .      | 2,070         | 154              | Stephenson . . . . . | ...             | 27 × 24        |
| 1843 | Thames . . . . .      | 560           | 1,100            | Brunel . . . . .     | 11              | 38 × 22        |
| 1870 | Mont Ceniz . . . . .  | 13,540        | 201              | Grattoni . . . . .   | 13              | 10 × 8         |
| 1879 | Baltimore . . . . .   | 10,800        | ...              | ...                  | ...             | ...            |
| 1881 | St. Gothard . . . . . | 16,390        | 152              | Favre . . . . .      | 8               | 9 × 8          |
| 1884 | Aariberg . . . . .    | 6,720         | 220              | Favre . . . . .      | 20              | ...            |
| 1884 | Hudson . . . . .      | 1,833         | 1,100            | Richardson . . . . . | 4               | 18 × 18        |
| 1885 | Mersey . . . . .      | 2,700         | 200              | Favre . . . . .      | 4               | 27 × 20        |
| 1885 | Severn . . . . .      | ...           | ...              | Richardson . . . . . | 12              | ...            |
| 1886 | Hoosac . . . . .      | 7,900         | ...              | ...                  | 16              | 24 × 9         |
| 1888 | Schemnitz . . . . .   | 19,400        | 52               | ...                  | 106             | 9 × 7          |

The following engines have been used for tunnels:—

| Date | Inventor             | Strokes per Minute | Date | Inventor             | Strokes per Minute |
|------|----------------------|--------------------|------|----------------------|--------------------|
| 1813 | Trevethick . . . . . | ...                | 1873 | Darlington . . . . . | 500                |
| 1853 | Bartlett . . . . .   | ...                | 1873 | Ferroux . . . . .    | ...                |
| 1857 | Sommeiller . . . . . | 400                | 1873 | Ingersoll . . . . .  | 400                |
| 1863 | Sachs . . . . .      | 400                | 1875 | Barrow . . . . .     | ...                |
| 1868 | Dubois . . . . .     | 300                | 1875 | Ullathorne . . . . . | ...                |
| 1868 | François . . . . .   | 300                | 1876 | Beaumont . . . . .   | ...                |

| 1869 | Ostercamp . . . . .  | 220                | 1877 | Jordan . . . . .     | ...                |
| 1872 | M'Kean . . . . .     | 500                | 1877 | Schramm . . . . .    | 500                |

Brunton's borer has been found in late years to make 49 inches of tunnel per hour, with 7 feet diameter. The following table shows various methods:—

| Tunnel                | Feet Opening | Engine               | Pressure, Lbs. Sq. Inch | Tons Excavated | Tons Daily |
|-----------------------|--------------|----------------------|-------------------------|----------------|------------|
| Thames . . . . .      | 800          | Brunel . . . . .     | ...                     | 45,000         | 12         |
| Mont Ceniz . . . . .  | 81           | Sommeiller . . . . . | 90                      | 240,000        | 60         |
| Airolo . . . . .      | 70           | M'Kean . . . . .     | 90                      | ...            | ...        |
| Schemnitz . . . . .   | 60           | Sachs . . . . .      | 60                      | 45,000         | 15         |
| Comstock . . . . .    | 140          | Burleigh . . . . .   | 70                      | ...            | 155        |
| Hudson . . . . .      | 324          | ...                  | ...                     | 52,000         | 80         |
| Ronchamps . . . . .   | 52           | Dubois . . . . .     | 67                      | ...            | ...        |
| Belmore . . . . .     | 27           | Darlington . . . . . | 50                      | ...            | 3          |
| St. Gothard . . . . . | 72           | Ferroux . . . . .    | 90                      | 265,000        | 102        |

The Channel and Mersey tunnels employed Beaumont's compressed-air borer. The cost of excavation was £13 per ton of clay in the Thames tunnel, £11 per ton of rock in Mont Ceniz, and £9 per ton in St Gothard.

U. AND V.

UMBRELLAS

In France the value of those made yearly is known, and if four francs be taken as the average price, the account will stand thus :—

| Year       | Makers | Umbrellas | Value, £  |
|------------|--------|-----------|-----------|
| 1830 . . . | 160    | 1,800,000 | 280,000   |
| 1847 . . . | 303    | 2,500,000 | 405,000   |
| 1882 . . . | 890    | 7,500,000 | 1,180,000 |

The value of British umbrellas exported from the United Kingdom was :—

| Year           | £       |
|----------------|---------|
| 1875 . . . . . | 360,000 |
| 1889 . . . . . | 610,000 |

London imports about 3,000,000 umbrellas from the United Kingdom, and one million from other countries. China exports a large number of paper-covered umbrellas.

VITAL STATISTICS

The following is a conspectus of births, deaths, and marriages in various countries, showing the average for ten years ending 1888, or the latest available group of years :—

|               | Births     | Deaths    | Surplus of Births | Marriages |
|---------------|------------|-----------|-------------------|-----------|
| England . .   | 890,000    | 521,000   | 369,000           | 202,000   |
| Scotland . .  | 125,000    | 74,000    | 51,000            | 26,000    |
| Ireland . .   | 117,000    | 90,000    | 27,000            | 21,000    |
| U. Kingdom    | 1,132,000  | 685,000   | 447,000           | 249,000   |
| France . .    | 923,000    | 844,000   | 79,000            | 282,000   |
| Germany . .   | 1,722,000  | 1,177,000 | 545,000           | 357,000   |
| Russia . .    | 3,790,000  | 2,733,000 | 1,057,000         | 695,000   |
| Austria . .   | 862,000    | 674,000   | 188,000           | 175,000   |
| Hungary . .   | 713,000    | 556,000   | 157,000           | 159,000   |
| Italy . .     | 1,074,000  | 813,000   | 261,000           | 221,000   |
| Spain . .     | 575,000    | 514,000   | 61,000            | 118,000   |
| Portugal . .  | 155,000    | 110,000   | 45,000            | 33,300    |
| Sweden . .    | 137,000    | 79,000    | 58,000            | 29,500    |
| Norway . .    | 60,000     | 32,000    | 28,000            | 12,700    |
| Denmark . .   | 65,500     | 38,500    | 27,000            | 15,200    |
| Holland . .   | 147,000    | 91,000    | 56,000            | 30,300    |
| Belgium . .   | 175,000    | 119,000   | 56,000            | 39,800    |
| Switzerland . | 82,500     | 61,000    | 21,500            | 19,900    |
| Roumania . .  | 198,000    | 137,000   | 61,000            | 41,600    |
| Servia . .    | 90,500     | 52,000    | 38,500            | 21,200    |
| Greece . .    | 46,000     | 32,500    | 13,500            | 10,200    |
| Europe . .    | 11,947,500 | 8,748,000 | 3,199,500         | 2,512,700 |
| Australia . . | 121,500    | 48,000    | 73,500            | 25,800    |
| Uruguay . .   | 23,600     | 10,300    | 13,300            | 3,400     |
| Japan . .     | 981,000    | 739,000   | 242,000           | 305,000   |

Under the title of *Births, Deaths, and Marriages*, detailed statistics will be found, showing the birth-rate, death-rate, and other important considerations bearing on vital statistics. The above table shows that there are in Europe 33,000 births and 24,000 deaths daily, or 16 births and 12 deaths a minute. It shows also that the ordinary excess of births over deaths in Europe is 3,200,000 yearly; but the increase of population is not more than 2,400,000, as the ordinary emigration is 960,000, the number of emigrants returning to Europe being under 200,000.

UNITED KINGDOM

The number of births, deaths, and marriages was as follows :—

Births

| Year      | England | Scotland | Ireland | U. Kingdom |
|-----------|---------|----------|---------|------------|
| 1870 . .  | 793,000 | 115,000  | 150,000 | 1,058,000  |
| 1871 . .  | 797,000 | 116,000  | 152,000 | 1,065,000  |
| 1872 . .  | 826,000 | 119,000  | 149,000 | 1,094,000  |
| 1873 . .  | 830,000 | 120,000  | 144,000 | 1,094,000  |
| 1874 . .  | 855,000 | 124,000  | 141,000 | 1,120,000  |
| 1875 . .  | 851,000 | 124,000  | 138,000 | 1,113,000  |

## INDIA

In 1887 the birth-rates and death-rates per 1000 of population were :—

|                         | <i>Births</i> | <i>Deaths</i> |
|-------------------------|---------------|---------------|
| Bengal . . . . .        | 24.7          | 22.7          |
| North-West and Oude . . | 41.2          | 32.0          |
| Punjab . . . . .        | 38.8          | 26.9          |
| Central Provinces . . . | 45.4          | 34.2          |
| Lower Burmah . . . . .  | 25.5          | 19.9          |
| Assam . . . . .         | 28.0          | 27.9          |
| Madras . . . . .        | 29.3          | 21.8          |
| Bombay . . . . .        | 34.8          | 28.8          |
| Mysore . . . . .        | 24.1          | 15.9          |

Official returns are as follow :—

## GERMANY

*Births*

| Year              | Prussia   | Bavaria | Saxony  | Wurtemberg | Duchies, &c. | Empire    |
|-------------------|-----------|---------|---------|------------|--------------|-----------|
| 1879 . . . . .    | 1,052,000 | 208,000 | 125,000 | 81,000     | 270,000      | 1,736,000 |
| 1880 . . . . .    | 1,029,000 | 203,000 | 123,000 | 78,000     | 263,000      | 1,696,000 |
| 1881 . . . . .    | 1,013,000 | 204,000 | 125,000 | 77,000     | 263,000      | 1,682,000 |
| 1882 . . . . .    | 1,036,000 | 202,000 | 127,000 | 76,000     | 261,000      | 1,702,000 |
| 1883 . . . . .    | 1,029,000 | 197,000 | 127,000 | 73,000     | 258,000      | 1,684,000 |
| 1884 . . . . .    | 1,051,000 | 204,000 | 133,000 | 74,000     | 264,000      | 1,726,000 |
| 1885 . . . . .    | 1,065,000 | 200,000 | 133,000 | 72,000     | 260,000      | 1,730,000 |
| 1886 . . . . .    | 1,074,000 | 200,000 | 137,000 | 71,000     | 264,000      | 1,746,000 |
| 1887 . . . . .    | 1,085,000 | 200,000 | 137,000 | 70,000     | 265,000      | 1,757,000 |
| 1888 . . . . .    | 1,091,000 | 197,000 | 140,000 | 69,000     | 264,000      | 1,761,000 |
| Average . . . . . | 1,052,000 | 202,000 | 131,000 | 74,000     | 263,000      | 1,722,000 |

## FRANCE

*Births*

| Year           | Males   | Females | Total   |
|----------------|---------|---------|---------|
| 1810 . . . . . | 481,000 | 451,000 | 932,000 |
| 1820 . . . . . | 495,000 | 465,000 | 960,000 |
| 1830 . . . . . | 497,000 | 471,000 | 968,000 |
| 1840 . . . . . | 489,000 | 463,000 | 952,000 |
| 1850 . . . . . | 490,000 | 464,000 | 954,000 |
| 1860 . . . . . | 490,000 | 467,000 | 957,000 |
| 1870 . . . . . | 483,000 | 461,000 | 944,000 |
| 1880 . . . . . | 469,000 | 451,000 | 920,000 |
| 1885 . . . . . | 474,000 | 450,000 | 924,000 |

*Deaths*

| Year           | Males   | Females | Total     |
|----------------|---------|---------|-----------|
| 1810 . . . . . | 379,000 | 351,000 | 730,000   |
| 1820 . . . . . | 367,000 | 402,000 | 769,000   |
| 1830 . . . . . | 407,000 | 401,000 | 808,000   |
| 1840 . . . . . | 406,000 | 403,000 | 809,000   |
| 1850 . . . . . | 381,000 | 381,000 | 762,000   |
| 1860 . . . . . | 393,000 | 389,000 | 782,000   |
| 1870 . . . . . | 553,000 | 494,000 | 1,047,000 |
| 1880 . . . . . | 443,000 | 415,000 | 858,000   |
| 1885 . . . . . | 435,000 | 402,000 | 837,000   |

*Surplus of Births over Deaths*

|                |         |         |         |
|----------------|---------|---------|---------|
| 1810 . . . . . | 102,000 | 100,000 | 202,000 |
| 1820 . . . . . | 128,000 | 63,000  | 191,000 |
| 1830 . . . . . | 90,000  | 70,000  | 160,000 |
| 1840 . . . . . | 83,000  | 60,000  | 143,000 |
| 1850 . . . . . | 109,000 | 83,000  | 192,000 |
| 1860 . . . . . | 97,000  | 78,000  | 175,000 |
| 1870 . . . . . | ...     | ...     | ...     |
| 1880 . . . . . | 26,000  | 36,000  | 62,000  |
| 1885 . . . . . | 39,000  | 48,000  | 87,000  |

In 1870 the deaths exceeded the births by 103,000.

The sterility of the French people in late years is ominous, the surplus of births over deaths being much less than half what it was seventy years ago.

*Marriages*

| Year           | Number  | Year           | Number  | Year           | Number  |
|----------------|---------|----------------|---------|----------------|---------|
| 1810 . . . . . | 233,000 | 1840 . . . . . | 283,000 | 1870 . . . . . | 224,000 |
| 1820 . . . . . | 209,000 | 1850 . . . . . | 298,000 | 1880 . . . . . | 279,000 |
| 1830 . . . . . | 270,000 | 1860 . . . . . | 289,000 | 1885 . . . . . | 283,000 |

The returns for the latest years were as follows :—

| Year              | Births  | Deaths  | Marriages | Still-births |
|-------------------|---------|---------|-----------|--------------|
| 1886 . . . . .    | 913,000 | 860,000 | 283,000   | 43,600       |
| 1887 . . . . .    | 899,000 | 843,000 | 277,000   | 42,900       |
| 1888 . . . . .    | 883,000 | 838,000 | 277,000   | 42,100       |
| 1879-88 . . . . . | 923,000 | 844,000 | 282,000   | 43,500       |

## Deaths

| Year    | Prussia | Bavaria | Saxony | Wurtemberg | Duchies, &c. | Empire    |
|---------|---------|---------|--------|------------|--------------|-----------|
| 1879    | 667,000 | 155,000 | 81,000 | 58,000     | 183,000      | 1,144,000 |
| 1880    | 693,000 | 152,000 | 87,000 | 56,000     | 185,000      | 1,173,000 |
| 1881    | 682,000 | 152,000 | 83,000 | 54,000     | 185,000      | 1,156,000 |
| 1882    | 700,000 | 153,000 | 86,000 | 54,000     | 184,000      | 1,177,000 |
| 1883    | 711,000 | 155,000 | 90,000 | 51,000     | 183,000      | 1,190,000 |
| 1884    | 718,000 | 154,000 | 95,000 | 53,000     | 183,000      | 1,203,000 |
| 1885    | 717,000 | 153,000 | 91,000 | 53,000     | 186,000      | 1,200,000 |
| 1886    | 743,000 | 154,000 | 96,000 | 50,000     | 191,000      | 1,234,000 |
| 1887    | 686,000 | 151,000 | 88,000 | 46,000     | 181,000      | 1,152,000 |
| 1888    | 665,000 | 156,000 | 87,000 | 50,000     | 185,000      | 1,143,000 |
| Average | 698,000 | 154,000 | 88,000 | 53,000     | 184,000      | 1,177,000 |

## Surplus of Births over Deaths

|         |         |        |        |        |        |         |
|---------|---------|--------|--------|--------|--------|---------|
| 1879    | 385,000 | 53,000 | 44,000 | 23,000 | 87,000 | 592,000 |
| 1880    | 335,000 | 51,000 | 36,000 | 22,000 | 78,000 | 523,000 |
| 1881    | 331,000 | 52,000 | 42,000 | 23,000 | 78,000 | 526,000 |
| 1882    | 336,000 | 49,000 | 41,000 | 22,000 | 77,000 | 525,000 |
| 1883    | 318,000 | 42,000 | 37,000 | 22,000 | 75,000 | 494,000 |
| 1884    | 333,000 | 50,000 | 38,000 | 21,000 | 81,000 | 523,000 |
| 1885    | 348,000 | 47,000 | 42,000 | 19,000 | 74,000 | 530,000 |
| 1886    | 331,000 | 46,000 | 41,000 | 21,000 | 73,000 | 512,000 |
| 1887    | 399,000 | 49,000 | 49,000 | 24,000 | 84,000 | 605,000 |
| 1888    | 426,000 | 41,000 | 53,000 | 19,000 | 79,000 | 618,000 |
| Average | 354,000 | 48,000 | 43,000 | 21,000 | 79,000 | 545,000 |

## Marriages

|         |         |        |        |        |        |         |
|---------|---------|--------|--------|--------|--------|---------|
| 1879    | 207,000 | 35,000 | 25,000 | 13,000 | 55,000 | 335,000 |
| 1880    | 208,000 | 35,000 | 26,000 | 13,000 | 55,000 | 337,000 |
| 1881    | 210,000 | 36,000 | 26,000 | 12,000 | 55,000 | 339,000 |
| 1882    | 217,000 | 38,000 | 27,000 | 13,000 | 55,000 | 350,000 |

| 1887    | 44,000 | 6,900 | 5,300 | 2,500 | 9,300  | 68,000 |
| 1888    | 43,000 | 6,600 | 5,500 | 2,500 | 9,400  | 67,000 |
| Average | 43,000 | 7,000 | 5,100 | 2,800 | 9,700  | 68,000 |

## RUSSIA

Official returns are as follows:—

| Year    | Births    | Deaths    | Marriages | Surplus of Births |
|---------|-----------|-----------|-----------|-------------------|
| 1856    | 2,706,900 | 2,146,900 | 557,100   | 560,000           |
| 1863    | 3,045,000 | 2,308,000 | 577,300   | 737,000           |
| 1876    | 3,549,000 | 2,443,000 | 590,000   | 1,106,000         |
| 1877    | 3,531,000 | 2,451,000 | 527,000   | 1,080,000         |
| 1878    | 3,418,000 | 2,760,000 | 665,000   | 658,000           |
| 1879    | 3,662,000 | 2,541,000 | 743,000   | 1,121,000         |
| 1880    | 3,669,000 | 2,658,000 | 702,000   | 1,011,000         |
| 1881    | 3,678,000 | 2,633,000 | 769,000   | 1,045,000         |
| 1882    | 3,906,000 | 3,034,000 | 716,000   | 872,000           |
| 1883    | 3,881,000 | 2,879,000 | 733,000   | 1,002,000         |
| 1884    | 4,336,000 | 2,857,000 | 754,000   | 1,479,000         |
| 1885    | 4,266,000 | 3,071,000 | 747,000   | 1,195,000         |
| 1876-85 | 3,790,000 | 2,733,000 | 695,000   | 1,057,000         |

The above is only European Russia, exclusive of Poland, Finland, &amp;c.

The following table shows the births and deaths of the whole Empire in 1887:—

|                | Births    | Deaths    | Surplus of Births |
|----------------|-----------|-----------|-------------------|
| Russia         | 3,942,000 | 2,742,000 | 1,200,000         |
| Poland         | 329,000   | 202,000   | 127,000           |
| Finland (1886) | 79,000    | 50,000    | 29,000            |
| Siberia        | 212,000   | 150,000   | 62,000            |
| Caucasus       | 268,000   | 172,000   | 96,000            |
| Turkestan      | 52,000    | 42,000    | 10,000            |
| Total          | 4,882,000 | 3,358,000 | 1,524,000         |

Exclusive of the Asiatic provinces, Russia has an increase of 1,300,000 souls yearly.

## AUSTRIA

The official returns for ten years ending 1887 were :—

### Births

| Year        | Austria | Hungary | Total     |
|-------------|---------|---------|-----------|
| 1878 . . .  | 855,000 | 665,000 | 1,520,000 |
| 1879 . . .  | 857,000 | 714,000 | 1,571,000 |
| 1880 . . .  | 829,000 | 672,000 | 1,501,000 |
| 1881 . . .  | 833,000 | 677,000 | 1,510,000 |
| 1882 . . .  | 874,000 | 697,000 | 1,571,000 |
| 1883 . . .  | 859,000 | 719,000 | 1,578,000 |
| 1884 . . .  | 878,000 | 741,000 | 1,619,000 |
| 1885 . . .  | 861,000 | 737,000 | 1,598,000 |
| 1886 . . .  | 876,000 | 760,000 | 1,636,000 |
| 1887 . . .  | 889,000 | 744,000 | 1,633,000 |
| Average . . | 862,000 | 713,000 | 1,575,000 |

### Deaths

|             |         |         |           |
|-------------|---------|---------|-----------|
| 1878 . . .  | 684,000 | 586,000 | 1,270,000 |
| 1879 . . .  | 652,000 | 566,000 | 1,218,000 |
| 1880 . . .  | 654,000 | 593,000 | 1,247,000 |
| 1881 . . .  | 677,000 | 553,000 | 1,230,000 |
| 1882 . . .  | 687,000 | 572,000 | 1,259,000 |
| 1883 . . .  | 677,000 | 527,000 | 1,204,000 |
| 1884 . . .  | 667,000 | 515,000 | 1,182,000 |
| 1885 . . .  | 689,000 | 536,000 | 1,225,000 |
| 1886 . . .  | 678,000 | 540,000 | 1,218,000 |
| 1887 . . .  | 672,000 | 569,000 | 1,241,000 |
| Average . . | 674,000 | 556,000 | 1,230,000 |

### Surplus of Births over Deaths

|             |         |         |         |
|-------------|---------|---------|---------|
| 1878 . . .  | 171,000 | 79,000  | 250,000 |
| 1879 . . .  | 205,000 | 148,000 | 353,000 |
| 1880 . . .  | 175,000 | 79,000  | 254,000 |
| 1881 . . .  | 156,000 | 124,000 | 280,000 |
| 1882 . . .  | 187,000 | 125,000 | 312,000 |
| 1883 . . .  | 182,000 | 192,000 | 374,000 |
| 1884 . . .  | 211,000 | 226,000 | 437,000 |
| 1885 . . .  | 187,000 | 201,000 | 388,000 |
| 1886 . . .  | 198,000 | 220,000 | 418,000 |
| 1887 . . .  | 217,000 | 175,000 | 392,000 |
| Average . . | 188,000 | 157,000 | 345,000 |

### Marriages

|             |         |         |         |
|-------------|---------|---------|---------|
| 1878 . . .  | 164,000 | 147,000 | 311,000 |
| 1879 . . .  | 169,000 | 162,000 | 331,000 |
| 1880 . . .  | 167,000 | 144,000 | 311,000 |
| 1881 . . .  | 177,000 | 158,000 | 335,000 |
| 1882 . . .  | 183,000 | 164,000 | 347,000 |
| 1883 . . .  | 176,000 | 168,000 | 344,000 |
| 1884 . . .  | 179,000 | 167,000 | 346,000 |
| 1885 . . .  | 175,000 | 165,000 | 340,000 |
| 1886 . . .  | 180,000 | 161,000 | 341,000 |
| 1887 . . .  | 182,000 | 152,000 | 334,000 |
| Average . . | 175,000 | 159,000 | 334,000 |

### Still-Births

|             |        |        |        |
|-------------|--------|--------|--------|
| 1878 . . .  | 21,500 | 9,400  | 30,900 |
| 1879 . . .  | 22,500 | 10,800 | 33,300 |
| 1880 . . .  | 22,000 | 10,400 | 32,400 |
| 1881 . . .  | 22,500 | 10,900 | 33,400 |
| 1882 . . .  | 24,000 | 11,300 | 35,300 |
| 1883 . . .  | 23,800 | 12,300 | 36,100 |
| 1884 . . .  | 24,500 | 12,700 | 37,200 |
| 1885 . . .  | 24,500 | 13,100 | 37,600 |
| 1886 . . .  | 24,900 | 13,600 | 38,500 |
| 1887 . . .  | 26,100 | 13,800 | 39,900 |
| Average . . | 23,600 | 11,800 | 35,400 |

## ITALY

Official returns come down to 1887, and show thus for ten years :—

| Year        | Births    | Deaths  | Surplus of Births | Marriages | Still-Births |
|-------------|-----------|---------|-------------------|-----------|--------------|
| 1878 . . .  | 1,012,000 | 814,000 | 198,000           | 200,000   | 31,300       |
| 1879 . . .  | 1,064,000 | 837,000 | 227,000           | 213,000   | 33,600       |
| 1880 . . .  | 958,000   | 870,000 | 88,000            | 197,000   | 30,400       |
| 1881 . . .  | 1,081,000 | 784,000 | 297,000           | 230,000   | 35,500       |
| 1882 . . .  | 1,061,000 | 787,000 | 274,000           | 224,000   | 35,400       |
| 1883 . . .  | 1,071,000 | 794,000 | 277,000           | 232,000   | 37,200       |
| 1884 . . .  | 1,131,000 | 780,000 | 351,000           | 240,000   | 38,300       |
| 1885 . . .  | 1,126,000 | 787,000 | 339,000           | 234,000   | 39,300       |
| 1886 . . .  | 1,087,000 | 845,000 | 242,000           | 233,000   | 39,200       |
| 1887 . . .  | 1,153,000 | 829,000 | 324,000           | 236,000   | 42,500       |
| Average . . | 1,074,000 | 813,000 | 261,000           | 224,000   | 36,300       |

## SPAIN

Vital statistics are neglected and much in arrear :—

| Year        | Births  | Deaths  | Surplus of Births | Marriages |
|-------------|---------|---------|-------------------|-----------|
| 1868 . . .  | 580,000 | 549,000 | 31,000            | 112,000   |
| 1869 . . .  | 602,000 | 551,000 | 51,000            | 137,000   |
| 1870 . . .  | 600,000 | 510,000 | 90,000            | 106,000   |
| 1884 . . .  | 518,000 | 444,000 | 74,000            | ...       |
| Average . . | 575,000 | 514,000 | 61,000            | 118,000   |

## PORTUGAL

According to the official returns we find :—

| Year        | Births  | Deaths  | Surplus of Births | Marriages |
|-------------|---------|---------|-------------------|-----------|
| 1873 . . .  | 148,000 | 116,000 | 32,000            | 32,100    |
| 1874 . . .  | 153,000 | 117,000 | 36,000            | 33,300    |
| 1875 . . .  | 154,000 | 107,000 | 47,000            | 33,100    |
| 1886 . . .  | 156,000 | 99,000  | 57,000            | 33,700    |
| 1887 . . .  | 166,000 | 109,000 | 57,000            | 34,300    |
| Average . . | 155,000 | 110,000 | 45,000            | 33,300    |

## SWEDEN

| Year        | Births  | Deaths | Surplus of Births | Marriages | Still-Births |
|-------------|---------|--------|-------------------|-----------|--------------|
| 1879 . . .  | 139,000 | 77,000 | 62,000            | 28,600    | 4,200        |
| 1880 . . .  | 134,000 | 83,000 | 51,000            | 28,900    | 4,000        |
| 1881 . . .  | 133,000 | 81,000 | 52,000            | 28,300    | 3,900        |
| 1882 . . .  | 134,000 | 79,000 | 55,000            | 29,000    | 3,800        |
| 1883 . . .  | 133,000 | 79,000 | 54,000            | 29,400    | 3,700        |
| 1884 . . .  | 139,000 | 81,000 | 58,000            | 30,200    | 3,800        |
| 1885 . . .  | 137,000 | 83,000 | 54,000            | 30,900    | 4,000        |
| 1886 . . .  | 140,000 | 78,000 | 62,000            | 30,100    | 4,000        |
| 1887 . . .  | 140,000 | 76,000 | 64,000            | 29,500    | 3,900        |
| 1888 . . .  | 136,000 | 76,000 | 60,000            | 28,100    | 3,800        |
| Average . . | 137,000 | 79,000 | 58,000            | 29,500    | 3,900        |

## NORWAY

|             |        |        |        |        |       |
|-------------|--------|--------|--------|--------|-------|

## W.

## WAGES

The earliest scale of wages is that fixed by the Emperor Diocletian, A.D. 303, for the whole Roman Empire, viz. :—

*Wages Daily without Food, Pence English*

|                     |                    |                    |
|---------------------|--------------------|--------------------|
| Shepherd . . . 10   | Labourer . . . 10  | Painter . . . 30   |
| Ass-driver . . . 10 | Mason . . . 20     | Smith . . . 20     |
| Baker . . . 20      | Carpenter . . . 20 | Stonecutter . . 25 |

The pay to a brickmaker was 12d. per 100; to a sheep-shearer, 80d. per 100; to a common schoolmaster, 30d. per month; to one who taught Greek or geometry, 100d. per month for each pupil; and a lawyer's fee was 600d.

The following is a table of international wages at three periods of the present century, reduced to English money (see Embassy Reports, 1869) :—

|                  | Day Labour, Pence |      |      | Indoor Labour, £ per Annum |      | Female Labour, £ per Annum |      |
|------------------|-------------------|------|------|----------------------------|------|----------------------------|------|
|                  | 1835              | 1865 | 1880 | 1835                       | 1880 | 1835                       | 1880 |
| England . . .    | 20                | 26   | 30   | 12                         | 20   | 6                          | 9    |
| Scotland . . .   | 16                | 25   | 28   | 9                          | 18   | 5                          | 8    |
| Ireland . . .    | 8                 | 14   | 18   | 5                          | 10   | 2                          | 5    |
| France . . .     | 15                | 20   | 25   | 8                          | 12   | 3                          | 5    |
| Germany . . .    | 8                 | 16   | 18   | 4                          | 10   | 2                          | 5    |
| Russia . . .     | 6                 | 12   | 12   | 3                          | 8    | 2                          | 4    |
| Austria . . .    | 10                | 16   | 20   | 8                          | 12   | 2                          | 4    |
| Italy . . .      | 4                 | 8    | 10   | 2                          | 6    | 1                          | 3    |
| Holland . . .    | 9                 | 15   | 20   | 6                          | 10   | 3                          | 5    |
| Belgium . . .    | 9                 | 18   | 20   | 6                          | 10   | 3                          | 5    |
| Scandinavia . .  | 8                 | ...  | 14   | 4                          | 8    | 2                          | 4    |
| Spain & Portugal | 8                 | 10   | 16   | ...                        | 8    | ...                        | 5    |
| United States .  | 42                | 74   | 66   | 28                         | 40   | ...                        | ...  |

Tradesmen's wages in 1880 in various countries were as follows :—

|                 | Shillings per Week |        |         |         |       |          |         |
|-----------------|--------------------|--------|---------|---------|-------|----------|---------|
|                 | Great Britain      | France | Belgium | Germany | Italy | New York | Chicago |
| Printer . . .   | 32                 | 20     | 19      | 20      | 16    | 54       | 62      |
| Painter . . .   | 32                 | 21     | 18      | 16      | 19    | 54       | 38      |

An Italian economist compares a bricklayer's wages at various dates in three countries thus :—

| Year       | Pence per Day |             |       |
|------------|---------------|-------------|-------|
|            | France        | Switzerland | Italy |
| 1850 . . . | 21            | 17          | 15    |
| 1857 . . . | 24            | 25          | 17    |
| 1874 . . . | 31            | 38          | 35    |

White's memoir gives the following scale of wages in England, France, and United States in 1825 (an asterisk signifies "with food") :—

|                          | England | France | U. States |
|--------------------------|---------|--------|-----------|
|                          | s. d.   | s. d.  | s. d.     |
| Carpenter, by day . .    | 4 0     | 2 6    | 6 0       |
| Mason, " . . .           | 4 6     | 3 0    | 6 8       |
| Machinist, " . . .       | 4 6     | 3 6    | 5 6       |
| Cotton-spinner, by day . | 4 0     | 3 6    | 5 0       |
| Woollen-spinner, " . .   | 3 9     | 3 8    | 4 6       |
| Weaver, " . . .          | 3 0     | 2 0    | 3 9       |
| Farm labourer, * month . | 27 0    | 20 0   | 38 0      |
| Housemaid, * week . .    | 3 0     | ...    | 5 0       |

Tailors' wages in various countries in 1880 were as follows :—

| Shillings Weekly    |    |                |    |
|---------------------|----|----------------|----|
| Great Britain . . . | 25 | Belgium . . .  | 17 |
| France . . .        | 21 | Italy . . .    | 18 |
| Germany . . .       | 15 | New York . . . | 58 |

The pay in European armies in 1880 was as follows :—

|                        | £ Sterling per Annum |        |         |
|------------------------|----------------------|--------|---------|
|                        | English              | French | Italian |
| General . . .          | ...                  | 660    | 600     |
| Colonel . . .          | 1,000                | 280    | 280     |
| Lieutenant-colonel . . | 320                  | 220    | 210     |
| Major . . .            | 292                  | 180    | 170     |
| Captain . . .          | 212                  | 120    | 120     |
| Lieutenant . . .       | 118                  | 80     | 90      |
| Ensign . . .           | 100                  | 52     | ...     |
| Sergeant . . .         | 36                   | 15     | ...     |
| Private . . .          | 18                   | 5      | ...     |

The wages in woollen mills in various countries in 1880 were as follows:—

|             | Shillings per Week |        |         |         |           |
|-------------|--------------------|--------|---------|---------|-----------|
|             | England            | France | Belgium | Germany | U. States |
| Sorter . .  | 24                 | 22     | 10*     | 5*      | 44        |
| Carder . .  | 24                 | 11*    | 8*      | 8*      | 25        |
| Spinner . . | 12*                | 11*    | ...     | 12      | 26*       |
| Dresser . . | 24                 | 16     | 12      | 7*      | 54        |
| Weaver . .  | 30                 | 24     | 18      | 12      | 35        |
| Fireman . . | 26                 | 19     | 15      | ...     | 35        |
| Carpenter . | 33                 | 27     | 15      | ...     | 52        |
| Engineer .  | 40                 | 27     | 18      | 16      | 75        |

(The asterisk signifies female hands).

In 1880 was published the following table of relation between wages and food in various countries:—

|                   | Shillings per Week |      |         | Ratio |      |         |
|-------------------|--------------------|------|---------|-------|------|---------|
|                   | Wages              | Food | Surplus | Wages | Food | Surplus |
| Great Britain . . | 31                 | 14   | 19      | 100   | 45   | 55      |
| France . . . .    | 21                 | 12   | 10      | 100   | 57   | 43      |
| Germany . . . .   | 16                 | 10   | 6       | 100   | 62   | 38      |
| Belgium . . . .   | 20                 | 12   | 8       | 100   | 60   | 40      |
| Italy . . . . .   | 15                 | 9    | 6       | 100   | 60   | 40      |
| Spain . . . . .   | 16                 | 10   | 6       | 100   | 62   | 38      |
| United States . . | 48                 | 16   | 32      | 100   | 33   | 67      |
| Australia . . .   | 40                 | 11   | 29      | 100   | 28   | 72      |

## UNITED KINGDOM

| 1850 . . | 25 0 0            | 20 0 0            | 10 0 0           | 8 0 0            | 25 0 0              | 20 0 0           | 10 0 0            | 8 0 0             | 25 0 0              | 20 0 0           | 10 0 0           | 8 0 0            |
| 1880 . . | 36 0 0            | 30 0 0            | 15 0 0           | 10 0 0           | 36 0 0              | 30 0 0           | 15 0 0            | 10 0 0            | 36 0 0              | 30 0 0           | 15 0 0           | 10 0 0           |

In the Middle Ages the pay of fighting men was:—

|                | Old Money, Present Value, Groats | £ s. d. |
|----------------|----------------------------------|---------|
| Count . . . .  | 40                               | 2 2 0   |
| Baron . . . .  | 20                               | 1 1 0   |
| Knight . . . . | 12                               | 0 13 0  |
| Man-at-arms .  | 3                                | 0 3 0   |
| Cross-bowman . | 1                                | 0 1 0   |
| Archer . . . . | 1                                | 0 0 6   |

Artisans' wages in England have been approximately as follows:—

| Year         | Shillings per Week |       |           |         |                |
|--------------|--------------------|-------|-----------|---------|----------------|
|              | Blacksmith         | Mason | Carpenter | Plumber | Cotton-spinner |
| 1740 . . . . | 16                 | 16    | 15        | 18      | 12             |
| 1780 . . . . | 17                 | 17    | 15        | 18      | 12             |
| 1820 . . . . | 24                 | 25    | 20        | 25      | 16             |
| 1840 . . . . | 21                 | 23    | 20        | 22      | 18             |
| 1860 . . . . | 28                 | 30    | 25        | 30      | 20             |
| 1880 . . . . | 32                 | 35    | 30        | 35      | 24             |

Wages in cotton-mills, according to Ellison, have been as follows:—

|                 | 1839           | 1849           | 1859           | 1887            |
|-----------------|----------------|----------------|----------------|-----------------|

| Weaver . . . .  | 13 0           | 13 0           | 15 0           | 17 c            |

In 1886 Giffen gave the following factory averages:—

|                 | Wages, Shillings Weekly |         |       |
|-----------------|-------------------------|---------|-------|
|                 | Cotton                  | Woollen | Linen |
| Men . . . . .   | 25.2                    | 23.2    | 19.7  |
| Women . . . .   | 15.2                    | 13.2    | 8.9   |
| Boys . . . . .  | 9.3                     | 8.5     | 6.2   |
| Girls . . . . . | 6.8                     | 7.4     | 4.9   |

Arthur Young found the weekly wages in 1768 thus:—

|                    |                  |                   |                   |
|--------------------|------------------|-------------------|-------------------|
| Farm labourer . .  | £ s. d.<br>0 7 0 | Cutler . . . . .  | £ s. d.<br>0 14 0 |
| Woman labourer . . | 0 3 0            | Weaver . . . . .  | 0 7 6             |
| Collier . . . . .  | 0 15 0           | Woman do. . . . . | 0 4 7             |

Dr. Giffen gives the following table of agricultural wages in 1835 and 1885 per week:—

|                   | 1835    | 1885    |
|-------------------|---------|---------|
|                   | £ s. d. | £ s. d. |
| Surrey . . . . .  | 0 10 6  | 0 16 0  |
| Sussex . . . . .  | 0 10 7  | 0 14 0  |
| Essex . . . . .   | 0 10 4  | 0 13 6  |
| Dorset . . . . .  | 0 7 6   | 0 12 6  |
| Warwick . . . .   | 0 10 0  | 0 16 0  |
| Cheshire . . . .  | 0 13 0  | 0 15 6  |
| York . . . . .    | 0 12 0  | 0 17 6  |
| Wales . . . . .   | 0 7 6   | 0 14 6  |
| Scotland . . . .  | 0 9 6   | 0 16 6  |
| Ireland . . . . . | 0 4 6   | 0 8 0   |

In 1881 was published the following comparison between the wages of cotton-mill operatives in Great Britain and those in the United States:—

| England         |    | United States   |    |
|-----------------|----|-----------------|----|
| Sizers . . . .  |    | Cardboys . . .  |    |
| 36              | 40 | 14              | 10 |
| Weavers . . .   | 30 | Doffers . . . . | 15 |
| Pickers . . . . | 15 | 28              | 15 |
| Strippers . . . | 17 | 28              | 15 |
|                 |    | Winders . . . . | 15 |

In 1867 Leone Levi summed up the earnings of the working classes as follows:—

|                    | Millions Sterling per Annum |          |         |                |
|--------------------|-----------------------------|----------|---------|----------------|
|                    | England                     | Scotland | Ireland | United Kingdom |
| Agriculture . . .  | 44                          | 8        | 23      | 75             |
| Textiles . . .     | 33                          | 6        | 8       | 47             |
| Building . . .     | 35                          | 4        | 4       | 43             |
| Clothing . . .     | 21                          | 5        | 7       | 33             |
| Metals . . .       | 27                          | 3        | 2       | 32             |
| Ships and railways | 25                          | 2        | 1       | 28             |
| Mines . . .        | 13                          | 2        | ...     | 15             |
| Servants . . .     | 47                          | 5        | 8       | 60             |
| Various . . .      | 66                          | 8        | 12      | 86             |
| Total . .          | 311                         | 43       | 65      | 419            |

In 1884 he published a second table in which he compared the earnings with 1867 thus:—

|                     | Per Head, £ |      | Total, Millions £ |      |
|---------------------|-------------|------|-------------------|------|
|                     | 1867        | 1884 | 1867              | 1884 |
| Males under 20 . .  | 19          | 18   | 23                | 29   |
| Females . . .       | 20          | 23   | 27                | 30   |
| Males over 20 . .   | 50          | 56   | 294               | 363  |
| Females . . .       | 29          | 37   | 75                | 99   |
| General average . . | 38          | 43   | 419               | 521  |

The wages of able-bodied seamen, according to the *Year-Book of Commerce*, averaged as follows:—

| Voyage            | Shillings per Month |      |      |      |      |      |
|-------------------|---------------------|------|------|------|------|------|
|                   | 1860                | 1865 | 1870 | 1875 | 1880 | 1889 |
| Mediterranean . . | 55                  | 55   | 52   | 70   | 55   | 60   |
| North America . . | 55                  | 50   | 55   | 70   | 50   | 60   |
| South America . . | 50                  | 50   | 50   | 65   | 50   | 60   |
| Africa . . .      | 55                  | 50   | 50   | 65   | 53   | 60   |
| India . . .       | 50                  | 50   | 50   | 65   | 50   | 60   |
| Australia . . .   | 50                  | 50   | 50   | 65   | 50   | 60   |
| Average . . .     | 53                  | 51   | 51   | 67   | 51   | 60   |

The above were the rates in sailing vessels, the pay in steamers being usually 10s. a month higher.

From miscellaneous statistics published by the Board of Trade, the wages in 1880 appear as follows:—

| Trade             | Locality   | Shillings Weekly | Hours per Week |
|-------------------|------------|------------------|----------------|
| Bookbinding . .   | Edinburgh  | 24               | 54             |
| Builders . . .    | London     | 25               | 52             |
| " . . .           | Portsmouth | 21               | 56             |
| " . . .           | Bristol    | 21               | 54             |
| " . . .           | Liverpool  | 22               | 50             |
| " . . .           | Sheffield  | 20               | 48             |
| " . . .           | Edinburgh  | 20               | 48             |
| " . . .           | Glasgow    | 18               | 48             |
| Chandlery . . .   | London     | 22               | ...            |
| " . . .           | Bristol    | 21               | 64             |
| " . . .           | Liverpool  | 21               | 54             |
| Chemical . . .    | Liverpool  | 18               | 54             |
| " . . .           | Manchester | 20               | 60             |
| Coachbuilding . . | London     | 23               | ...            |
| " . . .           | Liverpool  | 20               | 56             |
| " . . .           | Dublin     | 16               | 58             |
| Cottlery . . .    | Stafford   | 20               | 54             |
| " . . .           | Glasgow    | 18               | 57             |
| Cotton-mills . .  | Manchester | 19               | ...            |

| Trade             | Locality      | Shillings Weekly | Hours per Week |
|-------------------|---------------|------------------|----------------|

| " . . .           | Manchester    | 19               | 60             |
| " . . .           | Edinburgh     | 15               | 60             |
| Porcelain . . .   | Stafford      | 15               | ...            |
| Screws . . .      | Birmingham    | 24               | 54             |
| Shipbuilding . .  | Glasgow       | 16               | 54             |
| " . . .           | Liverpool     | 21               | 54             |
| " . . .           | Hull          | 19               | 54             |
| " . . .           | Dundee        | 16               | 54             |
| Sugar . . .       | London        | 25               | 59             |
| " . . .           | Bristol       | 17               | 59             |
| " . . .           | Greenock      | 17               | 60             |
| Twine . . .       | London        | 20               | 54             |
| " . . .           | Liverpool     | 20               | 60             |
| " . . .           | Greenock      | 18               | 56             |
| " . . .           | Dundee        | 18               | 56             |
| Woollen-mills . . | Stroud        | 15               | 56             |
| " . . .           | Huddersfield  | 20               | 56             |

In 1882 the ordinary wages in piece-work for army-clothing were as follows:—

|                | Pence |                | Pence |
|----------------|-------|----------------|-------|
| Tunic . . .    | 38    | Dozen caps . . | 30    |
| Trousers . . . | 14    | " towels . .   | 4     |
| Frock . . .    | 22    | " belts . .    | 12    |

A good worker earns 4s. daily.

The wages of a collier in 1884 averaged 49d. daily, being exactly the same as in 1870, but the output of coal rose in the interval from 230 to 318 tons per miner; thus the cost of extracting a ton of coal was 46d. in 1884, against 65d. in 1870.

#### FRANCE

Wages in the 13th and 14th centuries, reduced to the same weight of silver in English money of to-day, were as follows per month:—

|                    | £ s. d. |                   | £ s. d. |
|--------------------|---------|-------------------|---------|
| Archer . . .       | 0 15 0  | Field-marshal . . | 15 0 0  |
| Baker . . .        | 0 9 0   | Footman . . .     | 0 5 0   |
| Blacksmith . . .   | 0 8 0   | Gardener . . .    | 0 18 0  |
| Butler, king's . . | 5 10 0  | Knight . . .      | 4 10 0  |
| Carpenter . . .    | 1 5 0   | Milliner . . .    | 1 2 0   |
| Canon . . .        | 4 0 0   | Queen . . .       | 800 0 0 |

In the 15th century they were as follows:—

|                    | £ s. d. |                 | £ s. d. |
|--------------------|---------|-----------------|---------|
| Archer . . .       | 0 5 0   | Physician . . . | 15 0 0  |
| Butler, king's . . | 15 0 0  | Secretary . . . | 7 10 0  |
| Chamberlain . . .  | 20 0 0  | Surgeon . . .   | 7 10 0  |
| Chaplain . . .     | 15 0 0  | Huntsman . . .  | 30 0 0  |

# WAGES

De Foville gives the following wages in Paris from 1805 to 1875:—

| Trade            | Pence per Day |      |      |      |      |
|------------------|---------------|------|------|------|------|
|                  | 1805          | 1810 | 1853 | 1866 | 1875 |
| Bricklayer . . . | 31            | 38   | 50   | 57   | 60   |
| Carpenter . . .  | 29            | 31   | 48   | 57   | 57   |
| Fitter . . .     | 36            | 38   | 40   | 44   | 50   |
| Glazier . . .    | 29            | ...  | 36   | 48   | 50   |
| Joiner . . .     | 33            | 30   | 38   | 43   | 48   |
| Locksmith . . .  | ...           | ...  | 38   | 48   | 48   |
| Labourer . . .   | 16            | 18   | 24   | 32   | 33   |
| Mason . . .      | 31            | 31   | 40   | 50   | 53   |
| Navy . . .       | 21            | 21   | 28   | 38   | 38   |
| Painter . . .    | 40            | ...  | 38   | 48   | 57   |
| Plumber . . .    | 40            | ...  | 38   | 53   | 57   |
| Slater . . .     | 48            | ...  | 48   | 57   | 57   |
| Smith . . .      | 48            | 48   | 48   | 62   | 67   |
| Stonemason . . . | 32            | 33   | 48   | 53   | 53   |

The *Revue d'Economie* in 1887 published the following retrospect of wages:—

| Year           | Pence Daily |           |
|----------------|-------------|-----------|
|                | Rural       | Operative |
| 1768 . . . . . | 6           | 9         |
| 1789 . . . . . | 8           | 14        |
| 1825 . . . . . | 12          | 17        |
| 1852 . . . . . | 14          | 20        |
| 1872 . . . . . | 19          | 29        |
| 1880 . . . . . | 22          | 33        |

Another French economist gives the following table:—

|                     | Average Daily Wages, Pence |      |      |      |      |      |
|---------------------|----------------------------|------|------|------|------|------|
|                     | 1700                       | 1750 | 1790 | 1810 | 1850 | 1880 |
| Printer . . .       | 18                         | 20   | 25   | 30   | 25   | 35   |
| Painter . . .       | 15                         | 18   | 20   | 35   | 22   | 33   |
| Carpenter . . .     | 15                         | 18   | 20   | 35   | 22   | 35   |
| Tailor . . .        | 10                         | 15   | 18   | 30   | 20   | 28   |
| Blacksmith . . .    | 15                         | 18   | 20   | 30   | 25   | 35   |
| Builder . . .       | 15                         | 18   | 20   | 35   | 22   | 35   |
| Bootmaker . . .     | 10                         | 15   | 18   | 30   | 21   | 28   |
| Plumber . . .       | 15                         | 18   | 20   | 35   | 22   | 33   |
| Baker . . .         | 10                         | 15   | 18   | 30   | 20   | 33   |
| Milliner . . .      | 6                          | 8    | 9    | 10   | 13   | 20   |
| Laundress . . .     | 5                          | 6    | 8    | 10   | 13   | 18   |
| Farm-labourer . . . | 8                          | 10   | 12   | 18   | 20   | 25   |
| Woman . . .         | 4                          | 5    | 6    | 9    | 10   | 15   |
| Boy . . .           | 2                          | 2    | 3    | 4    | 5    | 7    |

## Wages of Women in France, Pence Daily

|                    | 1844 | 1853 | 1860 | 1872 |
|--------------------|------|------|------|------|
| Dressmakers . . .  | 12   | 17   | 19   | 19   |
| Flowermakers . . . | 15   | 24   | 22   | 28   |
| Shirtmakers . . .  | 9    | 15   | 17   | 19   |
| Staymakers . . .   | 10   | 15   | 19   | 19   |
| Embroiderers . . . | 15   | 19   | 19   | 28   |
| Closers . . .      | 15   | 24   | 19   | 28   |
| Lacemakers . . .   | 15   | 22   | 24   | 28   |
| Laundresses . . .  | 19   | 24   | 24   | 28   |

## Wages of Miners Weekly

|                | s. d. |                | s. d. |
|----------------|-------|----------------|-------|
| 1860 . . . . . | 11 0  | 1875 . . . . . | 16 6  |
| 1865 . . . . . | 11 6  | 1880 . . . . . | 16 0  |
| 1870 . . . . . | 13 6  | 1886 . . . . . | 15 6  |

Wages at Paris and in the departmental towns of France averaged as follows (without food) in 1885:—

|                    | Pence Daily |             |                  | Pence Daily |             |
|--------------------|-------------|-------------|------------------|-------------|-------------|
|                    | Paris       | Departments |                  | Paris       | Departments |
| Baker . . .        | 67          | 35          | Hatter . . .     | 62          | 35          |
| Binder . . .       | 53          | 30          | Laundress . . .  | 38          | 18          |
| Blacksmith . . .   | 67          | 37          | Painter . . .    | 72          | 36          |
| Brewer . . .       | 48          | 33          | Plumber . . .    | 57          | 36          |
| Bricklayer . . .   | 77          | 35          | Printer . . .    | 62          | 37          |
| Cabinetmaker . . . | 74          | 35          | Saddler . . .    | 43          | 33          |
| Carpenter . . .    | 82          | 38          | Sawyer . . .     | 67          | 35          |
| Confectioner . . . | 48          | 28          | Shoemaker . . .  | 34          | 29          |
| Cooper . . .       | 48          | 33          | Stonemason . . . | 82          | 38          |
| Cutler . . .       | 57          | 31          | Tailor . . .     | 48          | 33          |
| Dressmaker . . .   | 19          | 17          | Tanner . . .     | 48          | 32          |
| Dyer . . .         | 43          | 31          | Tinsmith . . .   | 48          | 33          |
| Fireman . . .      | 57          | 34          | Turner . . .     | 48          | 34          |
| Founder . . .      | 67          | 37          | Wagoner . . .    | 48          | 35          |
| Glazier . . .      | 53          | 31          | Watchmaker . . . | 57          | 40          |
| Hairdresser . . .  | 29          | 27          | Weaver . . .     | 36          | 25          |

Other occupations showed the following yearly wages:—

|                       | £ per Annum |             |
|-----------------------|-------------|-------------|
|                       | Paris       | Departments |
| Clerks . . . . .      | 48          | 37          |
| Lady-clerks . . . . . | 32          | 25          |
| Shop-girls . . . . .  | 20          | 20          |
| Footmen . . . . .     | 24          | 18          |
| Housemaids . . . . .  | 20          | 12          |

## GERMANY

Yves Guyot gives the daily wages at Mulhouse in the spinning trade from 1835 to 1880 thus:—

|                   | Pence Daily |      |      |      |      |
|-------------------|-------------|------|------|------|------|
|                   | 1835        | 1845 | 1855 | 1865 | 1880 |
| Overseers . . .   | 28          | 34   | 42   | 44   | 60   |
| Enginemens . . .  | 18          | 22   | 30   | 27   | 34   |
| Oilers . . .      | 15          | 18   | 16   | 24   | 30   |
| Scutchers . . .   | 9           | 10   | 10   | 13   | 17   |
| Cardmenders . . . | 13          | 14   | 27   | 22   | 26   |
| Throstlers . . .  | 15          | 15   | 16   | 17   | 23   |
| Piecers . . .     | 6           | 7    | 12   | 14   | 22   |
| Doffers . . .     | ...         | ...  | 9    | 10   | 16   |

The wages at Guebwiller silk-factory were as follows:—

|                   | Pence Daily |      |
|-------------------|-------------|------|
|                   | 1848        | 1880 |
| Weavers . . . . . | 26          | 30   |
| Warpers . . . . . | 19          | 23   |
| Fluters . . . . . | 7           | 18   |
| Winders . . . . . | 11          | 18   |
| Folders . . . . . | 11          | 23   |

## BELGIUM

Agricultural wages in Belgium at various dates were:—

| Year           | Pence Daily |         |           |         |
|----------------|-------------|---------|-----------|---------|
|                | Men         |         | Women     |         |
|                | With Food   | Without | With Food | Without |
| 1830 . . . . . | ...         | 10      | ...       | 6       |
| 1840 . . . . . | ...         | 11      | ...       | 7       |
| 1850 . . . . . | 6           | 11      | 4         | 7       |
| 1874 . . . . . | 11          | 19      | 6         | 12      |
| 1880 . . . . . | 12          | 23      | 7         | 12      |

## ITALY

Bodio's table of wages for certain trades, reduced to English money, gives the following:—

| Trade               | Shillings per Week |      |      |      |
|---------------------|--------------------|------|------|------|
|                     | 1817               | 1859 | 1866 | 1874 |
| Iron mines . . .    | 6                  | 6    | 6    | 8    |
| Marble mines . . .  | 10                 | 11   | 11   | 19   |
| Chalk mines . . .   | 6                  | 6    | 9    | 10   |
| Cotton-mill . . .   | 7                  | 7    | 8    | 10   |
| Flax-mill . . .     | 8                  | 10   | 10   | 12   |
| Wool-mill . . .     | 6                  | 7    | 7    | 8    |
| Silk-mill . . .     | 6                  | 8    | 8    | 10   |
| Dyeing . . .        | 9                  | 10   | 11   | 12   |
| Tanning . . .       | 6                  | 7    | 8    | 10   |
| Stone-cutting . . . | 9                  | 10   | 12   | 13   |
| Foundry . . .       | 8                  | 8    | 8    | 10   |
| Masons . . .        | 7                  | 8    | 10   | 14   |
| Mechanics . . .     | 7                  | 9    | 11   | 17   |
| Carpenters . . .    | 10                 | 13   | 16   | 19   |
| Wheelwrights . . .  | 8                  | 8    | 9    | 11   |
| Glass-blowers . . . | 18                 | 18   | 22   | 22   |
| Papermakers . . .   | 5                  | 5    | 6    | 6    |
| Compositors . . .   | 7                  | 7    | 8    | 11   |
| Tailors . . .       | 6                  | 8    | 10   | 12   |
| Brewers . . .       | 7                  | 8    | 9    | 11   |

The aggregate weekly earnings of 20 operatives in the above occupations compared as follows:—

| Year           | Shillings | Average |
|----------------|-----------|---------|
| 1847 . . . . . | 156       | 7.8     |
| 1859 . . . . . | 174       | 8.7     |
| 1866 . . . . . | 199       | 10.0    |
| 1874 . . . . . | 245       | 12.3    |

Thus in 15 years, from 1859 to 1874, wages rose 41 per cent., but it would appear from the subjoined table that there has been hardly any perceptible rise since 1874.

Wages for a Working Day of 10½ Hours, in English Pence

| Year       | Spinners | Weavers | Carpenters | Masons |
|------------|----------|---------|------------|--------|
| 1862 . . . | 10.9     | 12.3    | 18.2       | 15.3   |
| 1863 . . . | 11.4     | 12.7    | 18.2       | 15.3   |
| 1864 . . . | 11.4     | 13.6    | 18.2       | 15.3   |
| 1865 . . . | 11.8     | 14.5    | 18.2       | 15.3   |
| 1866 . . . | 12.3     | 15.4    | 18.2       | 15.3   |
| 1867 . . . | 12.7     | 15.4    | 18.2       | 15.3   |
| 1868 . . . | 12.7     | 15.9    | 18.2       | 15.3   |
| 1869 . . . | 13.2     | 16.4    | 18.2       | 15.3   |
| 1870 . . . | 13.6     | 16.8    | 22.7       | 18.2   |
| 1871 . . . | 14.5     | 17.3    | 22.7       | 18.2   |
| 1872 . . . | 16.4     | 17.7    | 22.7       | 18.2   |
| 1873 . . . | 18.2     | 19.1    | 22.7       | 20.5   |
| 1874 . . . | 20.4     | 21.8    | 22.7       | 20.5   |
| 1875 . . . | 20.4     | 21.8    | 22.7       | 20.5   |
| 1876 . . . | 20.4     | 21.8    | 22.7       | 20.5   |
| 1877 . . . | 20.4     | 21.8    | 22.7       | 20.5   |
| 1878 . . . | 20.4     | 21.8    | 22.7       | 20.5   |
| 1879 . . . | 20.4     | 21.8    | 22.7       | 20.5   |
| 1880 . . . | 20.4     | 22.7    | 22.7       | 22.7   |
| 1881 . . . | 20.9     | 22.7    | 22.7       | 22.7   |
| 1882 . . . | 20.9     | 22.7    | 24.2       | 24.2   |
| 1883 . . . | 20.9     | 22.7    | 24.2       | 24.2   |
| 1884 . . . | 20.9     | 22.7    | 24.2       | 24.2   |

The ratio of increase is shown as follows:—

| Year       | Spinner | Weaver | Carpenter | Mason |
|------------|---------|--------|-----------|-------|
| 1864 . . . | 100     | 100    | 100       | 100   |
| 1874 . . . | 180     | 160    | 125       | 134   |
| 1884 . . . | 184     | 167    | 133       | 158   |

Professor Bodio's tables, comparing prices of wheat and maize with the average earnings of twenty-seven

trades, and reducing these earnings to pounds of grain, may be summed up thus:—

| Year       | Day of Ten Hours |             |             | Days to Earn One Ton of Grain |
|------------|------------------|-------------|-------------|-------------------------------|
|            | Wheat, Lbs.      | Maize, Lbs. | Total, Lbs. |                               |
| 1862 . . . | 6.2              | 6.2         | 12.4        | 181                           |
| 1863 . . . | 7.5              | 7.5         | 15.0        | 148                           |
| 1864 . . . | 7.7              | 7.7         | 15.4        | 146                           |
| 1865 . . . | 8.0              | 8.0         | 16.0        | 140                           |
| 1866 . . . | 7.2              | 7.2         | 14.4        | 154                           |
| 1867 . . . | 6.2              | 6.2         | 12.4        | 181                           |
| 1868 . . . | 6.4              | 6.4         | 12.8        | 176                           |
| 1869 . . . | 8.6              | 8.6         | 17.2        | 130                           |
| 1870 . . . | 8.2              | 8.2         | 16.4        | 136                           |
| 1871 . . . | 7.0              | 7.0         | 14.0        | 158                           |
| 1872 . . . | 6.7              | 6.7         | 13.4        | 166                           |
| 1873 . . . | 6.8              | 6.8         | 13.6        | 163                           |
| 1874 . . . | 6.4              | 6.4         | 12.8        | 176                           |
| 1875 . . . | 9.6              | 9.6         | 19.2        | 116                           |
| 1876 . . . | 9.6              | 9.6         | 19.2        | 116                           |
| 1877 . . . | 8.2              | 8.2         | 16.4        | 136                           |
| 1878 . . . | 8.5              | 8.5         | 17.0        | 132                           |
| 1879 . . . | 8.8              | 8.8         | 17.6        | 127                           |
| 1880 . . . | 8.5              | 8.5         | 17.0        | 132                           |
| 1881 . . . | 10.5             | 10.5        | 21.0        | 106                           |
| 1882 . . . | 10.5             | 10.5        | 21.0        | 106                           |
| 1883 . . . | 12.1             | 12.1        | 24.2        | 93                            |
| 1884 . . . | 13.5             | 13.5        | 27.0        | 84                            |
| 1885 . . . | 13.7             | 13.7        | 27.4        | 82                            |

## UNITED STATES

Commissioner Carroll Wright, chief of the Washington Bureau of Statistics, has published a retrospect of wages, which may be condensed thus:—

| Trade              | Pence Daily |         |         |         |         |         |
|--------------------|-------------|---------|---------|---------|---------|---------|
|                    | 1770-1800   | 1801-20 | 1821-40 | 1841-60 | 1861-80 | 1881-83 |
| Blacksmith . . .   | 35          | 42      | 63      | 79      | 114     | 96      |
| Bookbinder . . .   | ...         | ...     | 46      | 72      | 96      | 75      |
| Brewer . . .       | ...         | ...     | ...     | 101     | 107     | 122     |
| Butcher . . .      | 17          | 31      | 46      | ...     | 101     | 68      |
| Carpenter . . .    | 30          | 55      | 74      | 85      | 121     | 120     |
| Carriages . . .    | ...         | ...     | 67      | 85      | 120     | 114     |

Commissioner Carroll Wright compares the average wages in Massachusetts and Great Britain, from 1860 to 1883, in various trades as follows :—

| Trade                   | Shillings Weekly |               | Trade      | Shillings Weekly |               |
|-------------------------|------------------|---------------|------------|------------------|---------------|
|                         | Massachusetts    | Great Britain |            | Massachusetts    | Great Britain |
| Agricultural implements | 43               | 37            | Hats       | 46               | 25            |
| Boots                   | 48               | 21            | Hosiery    | 28               | 20            |
| Bricks                  | 36               | 17            | Linen      | 27               | 13            |
| Building                | 62               | 32            | Liquor     | 53               | 80            |
| Carpets                 | 25               | 17            | Machines   | 49               | 33            |
| Carriages               | 57               | 35            | Metals     | 47               | 37            |
| Clothing                | 42               | 30            | Printing   | 48               | 28            |
| Cottons                 | 27               | 24            | Printworks | 36               | 23            |
| Food                    | 41               | 16            | Stone      | 66               | 42            |
| Furniture               | 46               | 34            | Woolens    | 29               | 23            |
| Glass                   | 51               | 36            | Worsteds   | 30               | 18            |

He compares the wages of men only, as follows :—

| Trade                   | Shillings Weekly |               | Trade      | Shillings Weekly |               |
|-------------------------|------------------|---------------|------------|------------------|---------------|
|                         | Massachusetts    | Great Britain |            | Massachusetts    | Great Britain |
| Agricultural implements | 44               | 37            | Hats       | 59               | 34            |
| Boots                   | 57               | 30            | Hosiery    | 38               | 27            |
| Bricks                  | 36               | 23            | Linen      | 36               | 28            |
| Building                | 62               | 33            | Liquor     | 54               | 80            |
| Carpets                 | 33               | 25            | Machines   | 50               | 33            |
| Carriages               | 58               | 35            | Metals     | 51               | 44            |
| Clothing                | 72               | 37            | Printing   | 64               | 38            |
| Cottons                 | 40               | 31            | Printworks | 42               | 33            |
| Food                    | 46               | 23            | Stone      | 60               | 42            |
| Furniture               | 46               | 34            | Woolens    | 32               | 31            |
| Glass                   | 62               | 40            | Worsteds   | 36               | 25            |

The wages of women and children in 1860-83 are compared thus :—

*Shillings Wages Weekly*

|            | Women         |               | Children      |               |
|------------|---------------|---------------|---------------|---------------|
|            | Massachusetts | Great Britain | Massachusetts | Great Britain |
| Boots      | 36            | 15            | 19            | 11            |
| Carpets    | 23            | 15            | 17            | 12            |
| Carriages  | ...           | ...           | 23            | 10            |
| Clothing   | 31            | 36            | 16            | 19            |
| Cottons    | 25            | 19            | 18            | 12            |
| Food       | 24            | 10            | 23            | 6             |
| Furniture  | 25            | ...           | 23            | ...           |
| Hats       | 31            | 14            | 19            | 10            |
| Hosiery    | 25            | 16            | 23            | 9             |
| Metals     | 22            | 12            | 19            | 10            |
| Printing   | 26            | 12            | 19            | 10            |
| Printworks | 22            | 14            | 19            | 12            |
| Woolens    | 27            | 13            | 20            | 9             |
| Linens     | 21            | 11            | 16            | 6             |
| Worsteds   | 25            | 14            | 16            | 11            |

The average was for women 15½ shillings a week in Great Britain and 26 in the United States, and for children 10½ and 19 shillings respectively.

The following is a general average scale of wages at various dates :—

*Wages Shillings Weekly*

| Trade        | Massachusetts |      |      | Great Britain |      |      |
|--------------|---------------|------|------|---------------|------|------|
|              | 1872          | 1878 | 1883 | 1872          | 1878 | 1883 |
| Boots        | 61            | 50   | 48   | 23            | 19   | 18   |
| Building     | 64            | 52   | 62   | 27            | 23   | 30   |
| Carriage     | 70            | 58   | 57   | 27            | 30   | 20   |
| Clothing     | 51            | 40   | 42   | 24            | 15   | 26   |
| Cottons      | 33            | 32   | 27   | 22            | 20   | 19   |
| Food         | 40            | 46   | 41   | 19            | 32   | 11   |
| Glass        | 47            | 44   | 51   | 29            | 25   | 29   |
| Linen        | 32            | 22   | 27   | 13            | 15   | 12   |
| Machinery    | 56            | 42   | 48   | 28            | 20   | 29   |
| Metals       | 64            | 48   | 47   | 28            | 27   | 31   |
| Printing     | 53            | 56   | 47   | 28            | 27   | 23   |
| Printworks   | 54            | 40   | 36   | 25            | 22   | 20   |
| Shipbuilding | 66            | 49   | 84   | 28            | 25   | 33   |
| Woolens      | 30            | 28   | 33   | 19            | 23   | 20   |

Atkinson gives the following wages for Massachusetts :—

|          | Shillings per Week |      |      |      |      |
|----------|--------------------|------|------|------|------|
|          | 1840               | 1850 | 1860 | 1870 | 1880 |
| Carder   | 18                 | 21   | 21   | 28   | 31   |
| Dresser  | 29                 | 41   | 46   | 64   | 55   |
| Dyer     | 26                 | 26   | 26   | 38   | 37   |
| Labourer | 12                 | 18   | 21   | 26   | 25   |
| Mechanic | 25                 | 31   | 38   | 38   | 40   |
| Spinner  | 21                 | 28   | 31   | 42   | 40   |
| Weaver   | 18                 | 21   | 18   | 27   | 31   |

The following table by Commissioner Wadlin, for Massachusetts in 1885, shows the percentage that wages stand for in cost of production in various articles :—

|                      | Per Cent. |           | Per Cent. |
|----------------------|-----------|-----------|-----------|
| Agricult. implements | 38        | Hosiery   | 32        |
| Arms                 | 30        | Ink       | 25        |
| Boots                | 25        | Ivoryware | 22        |
| Bricks               | 57        | Leather   | 14        |
| Brooms               | 33        | Linen     | 33        |
| Building             | 34        | Liquor    | 13        |
| Buttons              | 27        | Lumber    | 25        |
| Carpets              | 21        | Machines  | 47        |
| Carriages            | 46        | Metals    | 36        |
| Cement               | 32        | Paints    | 17        |
| Chemicals            | 9         | Paper     | 18        |
| Clocks               | 77        | Printing  | 39        |
| Clothing             | 23        | Rubber    | 25        |
| Cordage              | 14        | Salt      | 52        |
| Cottons              | 30        | Silks     | 30        |
| Drugs                | 23        | Stone     | 56        |
| Dye-stuffs           | 21        | Tobacco   | 35        |
| Earthenware          | 66        | Toys      | 52        |
| Electroplating       | 28        | Trunks    | 22        |
| Furniture            | 37        | Woolens   | 21        |
| Glass                | 62        | Worsteds  | 21        |

Commissioner Wadlin's report gives in a classified form the wages of 248,000 operatives, which in English money show as follows :—

| Weekly Shillings | Number  |        |         | Ratio |        |       |
|------------------|---------|--------|---------|-------|--------|-------|
|                  | Male    | Female | Total   | Male  | Female | Total |
| Under 21         | 15,700  | 25,400 | 41,100  | 9.0   | 34.6   | 16.5  |
| 21-29            | 20,300  | 28,200 | 48,500  | 11.6  | 38.3   | 19.5  |
| 29-37            | 27,300  | 12,300 | 39,600  | 15.6  | 16.8   | 16.0  |
| 37-50            | 43,600  | 5,500  | 49,100  | 25.0  | 7.5    | 19.8  |
| Over 50          | 67,900  | 2,000  | 69,900  | 38.8  | 2.8    | 28.2  |
| Total            | 174,800 | 73,400 | 248,200 | 100.0 | 100.0  | 100.0 |

The following is a summary of the principal trades in 1875 and 1885 in Massachusetts; that is, the number of hands and the amount of wages (in gold) reduced to English money:—

|                      | Hands   |         | Wages Paid, £ |            | Average, £ per Hand |      |
|----------------------|---------|---------|---------------|------------|---------------------|------|
|                      | 1875    | 1885    | 1875          | 1885       | 1875                | 1885 |
| Boots . . . . .      | 48,000  | 64,900  | 3,700,000     | 5,600,000  | 77                  | 86   |
| Building . . . . .   | 24,000  | 27,900  | 1,900,000     | 2,700,000  | 80                  | 97   |
| Clothing . . . . .   | 13,700  | 18,300  | 1,000,000     | 1,200,000  | 73                  | 66   |
| Cottons . . . . .    | 60,200  | 60,100  | 3,500,000     | 3,500,000  | 58                  | 58   |
| Food . . . . .       | 4,700   | 11,500  | 500,000       | 1,000,000  | 106                 | 86   |
| Furniture . . . . .  | 6,700   | 8,200   | 650,000       | 750,000    | 97                  | 91   |
| Leather . . . . .    | 6,600   | 9,200   | 700,000       | 900,000    | 105                 | 98   |
| Machines . . . . .   | 9,600   | 14,600  | 1,300,000     | 1,500,000  | 135                 | 103  |
| Metals . . . . .     | 17,600  | 24,200  | 2,200,000     | 2,400,000  | 125                 | 99   |
| Paper . . . . .      | 6,500   | 8,600   | 500,000       | 650,000    | 77                  | 74   |
| Printing . . . . .   | 5,500   | 9,900   | 550,000       | 950,000    | 100                 | 96   |
| Printworks . . . . . | 3,200   | 8,600   | 40,000        | 600,000    | 125                 | 70   |
| Rubber . . . . .     | 1,100   | 6,500   | 80,000        | 450,000    | 73                  | 70   |
| Woollens . . . . .   | 19,000  | 19,000  | 1,200,000     | 1,200,000  | 63                  | 63   |
| Worsteds . . . . .   | 1,500   | 8,000   | 100,000       | 500,000    | 67                  | 62   |
| Various . . . . .    | 69,140  | 79,830  | 5,480,000     | 6,700,000  | 79                  | 84   |
| Total . . . . .      | 297,040 | 379,330 | 23,400,000    | 30,600,000 | 80                  | 81   |

The following table shows the average earnings per hour, and the number of hours of work, in the period 1860-83:—

| Trade                                  | Pence per Hour |               | Hours Weekly  |               |
|----------------------------------------|----------------|---------------|---------------|---------------|
|                                        | Massachusetts  | Great Britain | Massachusetts | Great Britain |
| Agricultural imple-<br>ments . . . . . | 8.5            | 8.2           | 60            | 54            |
| Boots . . . . .                        | 9.8            | 4.2           | 60            | 52            |
| Bricks . . . . .                       | 6.7            | ...           | 64            | ...           |
| Building . . . . .                     | 12.5           | 7.0           | 60            | 52            |
| Carriages . . . . .                    | 11.5           | 4.5           | 60            | 54            |
| Clothing . . . . .                     | 8.6            | 6.3           | 58            | 54            |
| Cottons . . . . .                      | 5.4            | 4.2           | 60            | 56            |
| Food . . . . .                         | 8.2            | 2.4           | 60            | 56            |
| Furniture . . . . .                    | 9.3            | 7.6           | 60            | 52            |
| Glass . . . . .                        | 10.2           | ...           | 60            | ...           |
| Hats . . . . .                         | 9.2            | 5.1           | 60            | 54            |
| Hosiery . . . . .                      | 5.4            | 4.3           | 60            | 54            |
| Linen . . . . .                        | 5.4            | 2.6           | 60            | 54            |
| Machinery . . . . .                    | 9.8            | 6.6           | 60            | 52            |
| Metals . . . . .                       | 9.5            | 6.9           | 60            | 54            |
| Printing . . . . .                     | 9.8            | 5.1           | 58            | 54            |
| Printworks . . . . .                   | 7.2            | 4.6           | 60            | 54            |
| Woollens . . . . .                     | 5.8            | 4.3           | 60            | 56            |
| Worsteds . . . . .                     | 6.1            | 3.2           | 60            | 56            |

The last four Census reports, down to 1880, give the following returns as to amount of wages paid (in gold) in all kinds of manufacturing industries:—

|                         | Million Dollars |      |      |      | Per Operative, in £ Sterling |      |      |      |
|-------------------------|-----------------|------|------|------|------------------------------|------|------|------|
|                         | 1850            | 1860 | 1870 | 1880 | 1850                         | 1860 | 1870 | 1880 |
| Maine . . . . .         | 7               | 8    | 14   | 14   | 51                           | 47   | 52   | 53   |
| New Hampshire . . . . . | 6               | 8    | 14   | 15   | 46                           | 50   | 60   | 65   |
| Vermont . . . . .       | 2               | 3    | 6    | 5    | 52                           | 66   | 61   | 58   |
| Rhode Island . . . . .  | 5               | 9    | 19   | 21   | 50                           | 57   | 66   | 67   |
| Connecticut . . . . .   | 12              | 19   | 39   | 44   | 51                           | 60   | 75   | 78   |

We learn from the preceding table that the average wages for operatives have been increasing every decade. Three operatives in 1880 earned more than four did in 1850: they also produced more (see p. 379).

The ratio which wages bore to the value of goods manufactured was:—

| States                | 1850 | 1860 | 1870 | 1880 | Average per Cent. |
|-----------------------|------|------|------|------|-------------------|
| New England . . . . . | 26   | 22   | 21   | 21   | 22                |
| Middle . . . . .      | 22   | 19   | 18   | 18   | 19                |
| South . . . . .       | 21   | 18   | 16   | 16   | 18                |
| West . . . . .        | 21   | 17   | 17   | 16   | 18                |
| Union . . . . .       | 24   | 19   | 18   | 18   | 20                |

During the gold fever at San Francisco, daily wages were as follows:—

|                       | s. | d. |                      | s. | d. |
|-----------------------|----|----|----------------------|----|----|
| Bricklayer . . . . .  | 41 | 8  | Tailor . . . . .     | 16 | 8  |
| Stonecutter . . . . . | 41 | 8  | Hatter . . . . .     | 29 | 2  |
| Plasterer . . . . .   | 37 | 6  | Watchmaker . . . . . | 33 | 4  |
| Glazier . . . . .     | 25 | 0  | Carpenter . . . . .  | 41 | 0  |

Mr. Young published in 1870 the following scale of wages current in various States of the Union :—

|                     | Wages Reduced to English Money,<br>Shillings Weekly |               |          |              |       |           |          |
|---------------------|-----------------------------------------------------|---------------|----------|--------------|-------|-----------|----------|
|                     | Maine                                               | Massachusetts | New York | Pennsylvania | Texas | Louisiana | Illinois |

| Wheelwright . . .   | 72                                                  | 63     | 72       | 75      | 71              |
| Farm labourer . . . | 42                                                  | 37     | 29       | 41      | 37              |

*Note.*—The above wages were in paper money at 13 per cent. discount as compared with gold; thus 80s. were in reality only 70s.

### WARS

The wars of ninety years down to 1880 involved an expenditure of 3047 millions sterling, besides the loss of 4,470,000 lives, viz. :—

| Date          | Belligerents                     | Expenditure,<br>Million £ | Loss in<br>Men |
|---------------|----------------------------------|---------------------------|----------------|
| 1793-1815     | England and France . . .         | 1,250                     | 1,900,000      |
| 1828 . . .    | Russia and Turkey . . .          | 20                        | 120,000        |

| 1864-70 . . . | Brazil and Paraguay . . .        | 48                        | 330,000        |
| 1870-71 . . . | France and Germany . . .         | 316                       | 290,000        |
| 1876-77 . . . | Russia and Turkey . . .          | 190                       | 180,000        |
|               |                                  | 3,047                     | 4,470,000      |

### Summary

| Period    | Expenditure,<br>Million £ | Loss of Life | Per Annum |              |
|-----------|---------------------------|--------------|-----------|--------------|
|           |                           |              | Million £ | Loss of Life |
| 1790-1820 | 1,250                     | 1,900,000    | 42        | 63,000       |
| 1821-1850 | 118                       | 450,000      | 4         | 15,000       |
| 1851-1860 | 350                       | 548,000      | 35        | 55,000       |
| 1861-1880 | 1,329                     | 1,572,000    | 66        | 79,000       |
|           | 3,047                     | 4,470,000    |           |              |

*British Wars.*—In less than 300 years, Great Britain has expended 1359 millions sterling in war, viz. :—

| Date            | Locality                  | Expenditure,<br>Million £ | Commander        |
|-----------------|---------------------------|---------------------------|------------------|
| 1599 . . .      | Ireland . . .             | 4                         | Essex            |
| 1642-48 . . .   | England and Holland . . . | 57                        | Cromwell         |
| 1688-97 . . .   | Ireland and Holland . . . | 33                        | William III.     |
| 1702-63 . . .   | Germany, Spain, &c. . .   | 182                       | Marlborough, &c. |
| 1759 . . .      | Canada . . .              | 62                        | Wolfe            |
| 1775-80 . . .   | United States . . .       | 121                       | Cornwallis       |
| 1793-1815 . . . | France, &c. . .           | 831                       | Wellington       |
| 1854-56 . . .   | Crimea . . .              | 69                        | Raglan           |
|                 |                           | 1,359                     |                  |

In the Crimean War, 97,860 men took the field, of whom 2755 were killed in action; 18,280 were wounded, and of these 1847 died in hospital, and 17,580 died of disease; total deaths 22,182, or 22½ per cent. of the total strength.

*French Wars.*—In 218 years France spent 993 millions sterling in war, viz. :—

| Date          | Reign                | Locality          | Expenditure,<br>Million £ | Commander    |
|---------------|----------------------|-------------------|---------------------------|--------------|
| 1654-1713     | Louis XIV. . .       | Flanders, &c. . . | 154                       | Turenne, &c. |
| 1733-63       | Louis XV. . .        | " . . .           | 82                        | Saxe         |
| 1778-83       | Louis XVI. . .       | U. States . . .   | 22                        | Lafayette    |
| 1791-1815     | Napoleon . . .       | Europe, &c. . .   | 255                       | Bonaparte    |
| 1830-47       | Louis Philippe . . . | Algeria . . .     | 38                        | Bugeaud, &c. |
| 1854-56       | Napoleon III. . .    | Crimea . . .      | 93                        | Pellissier   |
| 1859 . . .    | " . . .              | Italy . . .       | 18                        | MacMahon     |
| 1866 . . .    | " . . .              | Mexico . . .      | 15                        | Bazaine      |
| 1870-71 . . . | " . . .              | Rhine . . .       | 316                       | Lebeuf       |
|               |                      |                   | 993                       |              |

In the Crimean war 309,400 men took the field, of whom 8490 were killed in action; 39,870 were wounded, and of these 11,750 died in hospital, and 75,375 died of disease; total deaths 95,615, or 31 per cent. of total strength. It is remarkable that 29 per cent. of the wounded died, and 30 per cent. of men admitted to hospital for disease, whereas the British lost only 10 per cent. of wounded and 12 per cent. of men admitted for disease. At the same time only 71 per cent. of the French army were admitted to hospital for disease, namely 225,000; whereas 147 per cent. of the British were so admitted, that is, the whole army nearly twice over during the campaign, such admission reaching 144,400, or 46,000 more than the total strength. The casualties of the

French compare with those of the other belligerents in the Crimea thus:—

|                  | English | French  | Turk    | Russian | Total     |
|------------------|---------|---------|---------|---------|-----------|
| Took field . .   | 98,100  | 309,400 | 165,000 | 888,000 | 1,460,500 |
| Killed in battle | 2,755   | 8,490   | 10,100  | 30,600  | 51,945    |
| Died of wounds   | 1,847   | 11,750  | 10,800  | 42,000  | 66,397    |
| Died of sickness | 17,580  | 75,375  | 24,500  | 374,000 | 491,455   |
| Total loss . .   | 22,182  | 95,615  | 45,400  | 446,600 | 609,797   |

#### Shots Fired

| By           | Millions | Killed            | Shots to Kill |
|--------------|----------|-------------------|---------------|
| English . .  | 15       | 21,000 Russians . | 700           |
| French . .   | 29       | 51,000 „ . .      | 590           |
| Russians . . | 45       | 48,000 Allies . . | 910           |
| Total . .    | 89       | 120,000 men . .   | 740           |

In the Franco-Italian war 128,000 French took the field, of whom 2536 were killed in action; 17,054 were wounded, and of these 2962 died in hospital, besides 2040 who died of disease; total deaths 7538, or 6 per cent.

In the Mexican war of 1862-66 there were 35,000 French landed in Mexico, of whom 1180 were killed in action; 2559 were wounded, and of these 549 died; deaths from disease were 4925, making a total of 6654, or 19 per cent. of total strength.

In the Franco-German war of 1870-71, 710,000 French took the field, and of these no fewer than 138,870 were killed in action or died in hospital, including 2977 officers. The death-roll of the French was, of men killed in action or died in hospital, as follows:—

|                          |         |
|--------------------------|---------|
| In France . . . . .      | 119,929 |
| In Germany . . . . .     | 17,240  |
| In Switzerland . . . . . | 1,701   |

Total . . . . . 138,870

This includes 45,000 deaths from disease, but it is believed that many not recorded died of wounds, having gone to their homes. Deaths were at least 20 per cent.

*German Wars.*—The campaign of Sadowa, between Prussia and Austria, in 1866, showed as follows:—

|                  | Prussians | Austrians | Total   |
|------------------|-----------|-----------|---------|
| Took field . . . | 309,000   | 330,000   | 639,000 |
| Killed . . . .   | 2,650     | 11,100    | 13,750  |
| Wounded . . .    | 14,820    | 29,310    | 44,130  |
| Missing . . . .  | 3,304     | 43,750    | 47,054  |
| Hors-de-combat . | 20,774    | 84,160    | 104,934 |
| Returned home .  | 285,226   | 245,840   | 531,066 |

The Prussians had one officer killed or wounded for 21 men, the Austrians one for 18 men.

In the Franco-German war of 1870-71 the casualties were as shown in the following table:—

|                    | French  | Germans   | Total     |
|--------------------|---------|-----------|-----------|
| Took field . . .   | 420,000 | 780,000   | 1,200,000 |
| Reinforced . . .   | 290,000 | 223,000   | 513,000   |
| Total . . . .      | 710,000 | 1,003,000 | 1,713,000 |
| Killed . . . .     | 41,000  | 19,782    | 60,782    |
| Died of wounds .   | 36,000  | 10,710    | 46,710    |
| Died of sickness . | 45,000  | 14,259    | 59,259    |
| Disabled . . . .   | 116,000 | 89,000    | 205,000   |
| Prisoners . . . .  | 446,000 | ...       | 446,000   |
| Hors-de-combat .   | 684,000 | 133,751   | 817,751   |

#### Killed and Wounded

|                  | French  | Germans | Total   |
|------------------|---------|---------|---------|
| Woerth . . . .   | 32,000  | 11,000  | 43,000  |
| Mars-le-Tour . . | 26,000  | 16,200  | 42,200  |
| Gravelotte . . . | 28,500  | 20,100  | 48,600  |
| Paris . . . . .  | 30,000  | 13,300  | 43,300  |
| Orleans, &c. . . | 76,500  | 57,400  | 133,900 |
| Total . . . .    | 193,000 | 118,000 | 311,000 |

The number of Germans killed includes 4010 missing, who are supposed to have been slain in action. The hospital records of the Germans showed that 127,870 wounded of their army were admitted, but only 107,710 died, say 84 per cent. Deaths from disease included 6965 of typhoid fever. The minimum force in the field was 781,000 in August 1870, the maximum 937,000 in February 1871. The death-rate during the whole campaign in the different arms was:—

|                    | Per 1000 |                    | Per 1000 |
|--------------------|----------|--------------------|----------|
| Engineers . . . .  | 17.6     | Staff . . . . .    | 105.0    |
| Cavalry . . . . .  | 27.1     | Captains . . . .   | 87.0     |
| Artillery . . . .  | 27.2     | All officers . . . | 76.0     |
| Infantry . . . . . | 52.8     | Officers and men . | 45.9     |

The Germans fired off 30 million musket cartridges and 363,000 rounds of artillery, with which they killed or mortally wounded 77,000 French, being 400 shots to kill, as compared with 740 in the Crimean war (q.v.). See *Battles*.

*Russian Wars.*—The campaigns of the last sixty years cost 335 millions sterling and 664,000 men, viz:—

| Date       | Reign         | Locality     | Expenditure, Million £ | Loss in Men |
|------------|---------------|--------------|------------------------|-------------|
| 1828 . .   | Nicholas . .  | Balkans . .  | 15                     | 86,000      |
| 1854-56 .  | Nicholas . .  | Crimea . .   | 142                    | 447,000     |
| 1876-77 .  | Alexander II. | Turkey . .   | 133                    | 110,000     |
| 1878-80 .  | Alexander II. | Khiva, &c. . | 45                     | 21,000      |
| 52 years . | ...           | ...          | 335                    | 664,000     |

*American Wars.*—According to Stedman, an officer under Lord Cornwallis, the strength of the British and American armies in the War of Independence was:—

| Year           | British | Americans |
|----------------|---------|-----------|
| 1776 . . . . . | 27,700  | 3,300     |
| 1777 . . . . . | 30,000  | 8,000     |
| 1781 . . . . . | 7,000   | 32,600    |

The British army consisted largely of Hessian and other soldiers bought in Germany by George III., and for whom the British Government paid the following sums to the German princes:—

|                  | Men    | Sum, £    | £ per Man | Perished in the War |
|------------------|--------|-----------|-----------|---------------------|
| Hesse . . . . .  | 16,992 | 2,600,000 | 153       | 6,500               |
| Brunswick . . .  | 5,723  | 780,000   | 137       | 3,015               |
| Anspach, &c. . . | 6,451  | 1,747,000 | 275       | 2,328               |
| Total . . . .    | 29,166 | 5,127,000 | 175       | 11,843              |

During the five years that the war lasted 288,200 Americans fought for their country, the States being represented by the following numbers:—

|                    | Men    |                    | Men    |
|--------------------|--------|--------------------|--------|
| Massachusetts . .  | 83,000 | New Jersey . . .   | 17,000 |
| Connecticut . . .  | 40,000 | New Hampshire . .  | 15,000 |
| Pennsylvania . . . | 33,000 | Rhode Island . . . | 10,000 |
| Virginia . . . . . | 32,000 | North Carolina . . | 7,300  |
| New York . . . . . | 21,000 | South Carolina . . | 6,400  |
| Maryland . . . . . | 18,000 | Georgia, &c. . . . | 5,500  |

The American army, after the surrender of Lord Cornwallis, was found to number thus:—

|                                |        |
|--------------------------------|--------|
| 49 regiments of foot . . . . . | 28,224 |
| 4 " horse . . . . .            | 1,536  |
| 4 " artillery . . . . .        | 2,340  |
| 1 " pioneers . . . . .         | 480    |

Total . . . . . 32,580

The total expenses of the war were 135 million dollars, say 28 millions sterling. In the second war with England (1812-15), the American army at one time counted 32,000 men under the colours. In the war with Mexico (1845), the Americans had 90,100 men, of whom 7780 died, including 6060 of disease, and the rest killed in action or who died of wounds received.

An official statement of the war for the Union in 1863-65 was as follows:—

#### Northern Army

|                          | Officers | White Men | Coloured | Total     | Ratio |
|--------------------------|----------|-----------|----------|-----------|-------|
| Took field . . . . .     | 84,000   | 2,073,000 | 179,000  | 2,336,000 | 100   |
| Killed . . . . .         | 3,930    | 38,790    | 1,520    | 44,240    | 1.9   |
| Died of wounds . . . . . | 2,070    | 30,890    | 1,046    | 34,006    | 1.5   |
| " sickness . . . . .     | 1,720    | 121,110   | 26,200   | 149,030   | 6.4   |
| Missing . . . . .        | 1,600    | 60,910    | 4,614    | 67,124    | 2.9   |
| Returned home . . . . .  | 74,680   | 1,821,300 | 145,620  | 2,041,600 | 87.3  |

Kolb gives the following summary:—

|                     | Killed | Wounded | Prisoners |
|---------------------|--------|---------|-----------|
| Northerns . . . . . | 43,573 | 132,265 | 87,481    |
| Southerns . . . . . | 26,720 | 101,843 | 78,731    |
| Total . . . . .     | 70,293 | 234,108 | 166,212   |

According to another account the Northern army lost:—

|                    | Killed | Died of Sickness | Total   |
|--------------------|--------|------------------|---------|
| Officers . . . . . | 5,221  | 2,321            | 7,542   |
| Men . . . . .      | 90,868 | 182,329          | 273,197 |
| Total . . . . .    | 96,089 | 184,650          | 280,739 |

The Ordnance department served out 7892 cannon, 4,022,000 rifles, 2,360,000 equipments for infantry and cavalry, 12,000 tons powder, 42,000 tons lead, and 1022 million rounds of cartridge.

#### WATER

The weight of alluvial deposits to 1000 gallons of water is as follows:—

|              | <i>Lbs.</i>    |             | <i>Lbs.</i> |            | <i>Lbs.</i> |
|--------------|----------------|-------------|-------------|------------|-------------|
| Loch Katrine | $\frac{1}{2}$  | Danube      | 2           | Wear       | 16          |
| Windermere   | $\frac{1}{2}$  | Garonne     | 2           | Ganges     | 22          |
| Severn       | 1              | Rhine       | 2           | Cheltenham | 134         |
| Avon         | 1              | Mersey      | 3           | Harrogate  | 157         |
| Tunbridge    | $1\frac{1}{2}$ | Thames      | 4           | Oxus       | 250         |
| Spree        | $1\frac{1}{2}$ | Mississippi | 6           | Seidlitz   | 321         |
| Geneva       | 2              | Spa         | 14          | Atlantic   | 448         |

A ton of water contains 224 gallons or 36 cubic feet, but sea-water is 2 per cent. heavier. An inch of rainfall gives 14,500,000 gallons of water to the square mile, or 22,500 gallons to the acre. Snow requires 8 cubic feet to produce one cubic foot of water. Current requires a minimum fall of one inch in 10 miles. The water-power of Niagara is 10,000,000 cubic feet per minute, equal to 3,000,000 horse-power. In 1880 the United States had 51,000 water-wheels with an aggregate of 1,500,000 horse-power.

Water supply has always been a matter of the highest importance. Rome, in the time of the Caesars, had nine aqueducts, measuring 249 miles in the aggregate: they poured into the city 330 million gallons daily, or 160 gallons per inhabitant. The great aqueduct of Peru, built by the Incas, was 360 miles long. Among modern works the most famous are:—

| Name                        | Miles | Million Gallons Daily | Cost of Work, £ |
|-----------------------------|-------|-----------------------|-----------------|
| Croton (New York) . . . . . | 41    | 88                    | 1,800,000       |
| Madrid . . . . .            | 47    | 40                    | 2,300,000       |
| Marseilles . . . . .        | 51    | 60                    | 450,000         |
| Glasgow . . . . .           | 34    | 50                    | 1,550,000       |
| Washington . . . . .        | 16    | 90                    | ...             |

The supply of various cities is shown as follows:—

|                         | Gallons Daily | Gallons per Inhabitant |
|-------------------------|---------------|------------------------|
| Ancient Rome . . . . .  | 330,000,000   | 160                    |
| Modern Rome . . . . .   | 200,000,000   | 670                    |
| London . . . . .        | 145,000,000   | 38                     |
| Paris . . . . .         | 88,000,000    | 39                     |
| New York . . . . .      | 88,000,000    | 70                     |
| Chicago . . . . .       | 60,000,000    | 120                    |
| Sydney . . . . .        | 50,000,000    | 120                    |
| Glasgow . . . . .       | 26,000,000    | 48                     |
| St. Louis . . . . .     | 25,000,000    | 70                     |
| Marseilles . . . . .    | 18,000,000    | 50                     |
| Buffalo . . . . .       | 17,000,000    | 120                    |
| Manchester . . . . .    | 11,000,000    | 20                     |
| Liverpool . . . . .     | 11,000,000    | 20                     |
| Boston . . . . .        | 10,000,000    | 27                     |
| San Francisco . . . . . | 10,000,000    | 42                     |
| Newark . . . . .        | 10,000,000    | 80                     |
| Edinburgh . . . . .     | 10,000,000    | 33                     |
| Dublin . . . . .        | 7,000,000     | 22                     |
| Melbourne . . . . .     | 7,000,000     | 25                     |
| Hamburg . . . . .       | 5,000,000     | 12                     |

Artesian wells are of great antiquity; they were known at Thebes 2000 years before the Christian era. In modern times that of Grenelle, near Paris, is the most famous, having taken eight years in boring, 1833-41; it gives 700,000 gallons daily, the water rising 32 feet above the surface, with a temperature of 81½° Fahr.

| Well                       | Depth, Feet | Diameter, Inches | Gallons Water per Minute | Cost of Well, £ |
|----------------------------|-------------|------------------|--------------------------|-----------------|
| Grenelle . . . . .         | 1,798       | 3.74             | 484                      | 14,550          |
| Passy . . . . .            | 1,923       | 27.60            | 1,980                    | 40,000          |
| Kissingen . . . . .        | 1,880       | 4.00             | 600                      | 7,000           |
| St. Louis, U.S. . . . .    | 2,200       | ...              | ...                      | 2,000           |
| Chicago . . . . .          | 700         | ...              | 820                      | ...             |
| Calais . . . . .           | 1,138       | ...              | ...                      | 3,560           |
| Donchery . . . . .         | 1,215       | ...              | ...                      | 3,045           |
| Trafalgar Square . . . . . | 393         | ...              | 500                      | ...             |
| Lille . . . . .            | 592         | ...              | ...                      | 320             |
| Algeria . . . . .          | 177         | ...              | 1,130                    | ...             |
| Elbeuf . . . . .           | 492         | 2.05             | 66                       | ...             |
| St. Denis . . . . .        | 262         | 2.28             | 28                       | ...             |

There are 78 of these wells in England, varying from 100 to 1000 feet. Several have been sunk in China more than 1000 feet, at a cost of only seven shillings per foot.

The water companies of London in 1880 showed: capital, £12,463,000; receipts, £1,460,000; expenses, £740,000; net profit, £720,000.

The water-supply of Paris in 1884 was as follows, daily:—

|                           |            |
|---------------------------|------------|
| Aqueduct . . . . .        | 55,000,000 |
| Seine and wells . . . . . | 33,000,000 |
| Total . . . . .           | 88,000,000 |

# WEALTH OF NATIONS.

Bullerlyne, Hanson & Co Edinburgh & London.

## WEALTH

Various estimates have been made from time to time, by economists and others, as to the wealth of the principal countries and the ratio per inhabitant. Thus in a paper read at Bath in 1888, before the British Association, by the author of this Dictionary, the wealth of the United States was estimated at £212 per inhabitant, the census of 1890 afterwards showing that the real average was £216 per inhabitant, a difference of less than 2 per cent. The wealth of nations in 1888 was approximately thus:—

|                | Millions £ Sterling |          |           |           |             |         |          |        | £ per Inhab. |
|----------------|---------------------|----------|-----------|-----------|-------------|---------|----------|--------|--------------|
|                | Farms               | Railways | Buildings | Furniture | Merchandise | Bullion | Sundries | Total  |              |
| United Kingdom | 2,287               | 865      | 2,420     | 1,210     | 690         | 120     | 3,208    | 10,800 | 300          |
| France         | 3,230               | 570      | 1,700     | 850       | 310         | 330     | 1,910    | 8,900  | 240          |

## UNITED KINGDOM

The following table shows the estimates made at various dates:—

| Date | Millions £ | Comprising        | Authority      |
|------|------------|-------------------|----------------|
| 1660 | 250        | England and Wales | Petty          |
| 1703 | 490        | " "               | Davenant       |
| 1774 | 1,100      | " "               | Young          |
| 1800 | 1,740      | Great Britain     | Beeke, Eden    |
| 1812 | 2,190      | United Kingdom    | Colquhoun      |
| 1822 | 2,600      | " "               | Lord Liverpool |
| 1833 | 3,750      | " "               | Pablo Pebrer   |
| 1840 | 4,100      | " "               | Porter         |
| 1865 | 6,113      | " "               | Giffen         |
| 1875 | 8,548      | " "               | "              |
| 1885 | 10,037     | " "               | "              |

Regarding Petty's valuation, we only know that land constituted 57 per cent. of the total, the selling price being then under £5 an acre. At the time of Davenant it had risen to £9, and of Young to £18. Towards the close of the 18th century Beeke, Pitt, and Eden made valuations of Great Britain, all previous ones being of England without Scotland. Dr. Beeke valued the real estate at 920 millions, viz:—

|                         | £           |
|-------------------------|-------------|
| Land in England         | 600,000,000 |
| Land in Scotland        | 120,000,000 |
| Houses in Great Britain | 200,000,000 |
| Real estate             | 920,000,000 |

The most elaborate work of this kind was Colquhoun's in 1812, the first valuation of the United Kingdom: he made the total 2745 millions in the currency of the period, equal in gold to 2190 millions sterling. His

table of values evidently formed the basis on which Lord Liverpool and Pablo Pebrer afterwards constructed theirs. Pebrer's estimate of the value of the United Kingdom in 1833 was as follows:—

|                       | Million £ Sterling |          |         | United Kingdom |
|-----------------------|--------------------|----------|---------|----------------|
|                       | England            | Scotland | Ireland |                |
| Lands                 | 1,000              | 200      | 400     | 1,600          |
| Cattle                | 150                | 26       | 66      | 242            |
| Grain                 | 40                 | 7        | 13      | 60             |
| Houses                | 400                | 40       | 93      | 533            |
| Furniture             | 173                | 20       | 53      | 246            |
| Public buildings      | 42                 | 4        | 11      | 57             |
| Mines and canals      | 151                | 10       | 5       | 166            |
| Merchandise           | 133                | 21       | 32      | 186            |
| Jewellery and clothes | 66                 | 7        | 13      | 86             |
| Sundries              | 316                | 38       | 64      | 418            |
| Total                 | 2,471              | 373      | 750     | 3,594          |

He furthermore estimated the earnings and capital of the United Kingdom and Colonies thus:—

|              | Earnings, £ | Capital, Million £ | Population | £ per Inhab. |          |
|--------------|-------------|--------------------|------------|--------------|----------|
|              |             |                    |            | Capital      | Earnings |
| U. Kingdom   | 514,800,000 | 3,594              | 24,300,000 | 149          | 21.0     |
| Canada       | 17,600,000  | 62                 | 910,000    | 68           | 19.4     |
| West Indies  | 22,500,000  | 89                 | 730,000    | 121          | 31.0     |
| Mauritius    | 1,900,000   | 13                 | 100,000    | 130          | 12.0     |
| South Africa | 1,100,000   | 6                  | 55,000     | 109          | 20.0     |
| Australia    | 500,000     | 3                  | 40,000     | 75           | 12.5     |
| Total        | 557,700,000 | 3,767              | 26,135,000 | 144          | 21.5     |

Porter's estimate in 1840 in a manner confirmed all those previously made, showing a progressive increase of wealth, and relied, moreover, on the legacy and succession returns. Dr. Giffen's tables for 1865-75-85 are *sui generis*, laying down a new method of valuation, namely, capitalising the various sources of income in the income-tax returns. His table for 1885 may be condensed thus:—

|                                  | Income, £   | Capital Value, Mill. £ | Years' Purchase |
|----------------------------------|-------------|------------------------|-----------------|
| Lands . . . . .                  | 65,090,000  | 1,691                  | 28              |
| Houses . . . . .                 | 128,500,000 | 1,927                  | 15              |
| Farmers' profits . . . . .       | 65,223,000  | 522                    | 8               |
| Foreign loans . . . . .          | 21,096,000  | 527                    | 25              |
| British railways . . . . .       | 33,270,000  | 932                    | 28              |
| Foreign railways . . . . .       | 3,808,000   | 76                     | 20              |
| Trades and professions . . . . . | 38,096,000  | 541                    | 15              |
| Furniture, &c. . . . .           | ...         | 960                    | ...             |
| Various companies . . . . .      | 34,789,000  | 696                    | 20              |
| Mines and quarries . . . . .     | 8,536,000   | 34                     | 4               |
| Gasworks . . . . .               | 5,026,000   | 126                    | 25              |
| Waterworks . . . . .             | 3,260,000   | 65                     | 20              |
| Ironworks . . . . .              | 2,265,000   | 9                      | 4               |
| Canals . . . . .                 | 3,546,000   | 71                     | 20              |
| Investments abroad . . . . .     | 50,000,000  | 500                    | 10              |
| Public property . . . . .        | ...         | 500                    | ...             |
| Sundries . . . . .               | 91,517,000  | 860                    | ...             |
| Total . . . . .                  | 554,022,000 | 10,037                 | ...             |

If there be a weak point in Dr. Giffen's method, it is the capitalising of farmers' profits and income arising from trades and professions, together 1063 millions sterling; many people will question whether these items should be counted at all.

The following table shows approximately the principal items of national wealth at various dates:—

|                             | Million £ |       |       |        |
|-----------------------------|-----------|-------|-------|--------|
|                             | 1812      | 1840  | 1860  | 1888   |
| Lands . . . . .             | 1,380     | 1,680 | 1,748 | 1,873  |
| Cattle, &c. . . . .         | 240       | 280   | 350   | 414    |
| Houses . . . . .            | 255       | 740   | 1,100 | 2,424  |
| Railways . . . . .          | ...       | 21    | 348   | 865    |
| Shipping . . . . .          | 15        | 23    | 44    | 134    |
| Merchandise . . . . .       | 70        | 110   | 370   | 690    |
| Furniture . . . . .         | 130       | 370   | 550   | 1,212  |
| Bullion . . . . .           | 23        | 61    | 105   | 124    |
| Foreign loans, &c. . . . .  | 105       | 330   | 420   | 1,660  |
| Public properties . . . . . | 266       | 485   | 925   | 1,404  |
| Total . . . . .             | 2,190     | 4,100 | 5,960 | 10,800 |

Land is still one of the great features of wealth. For the sake of comparison, we may capitalise the rental at thirty years' purchase since the middle of the 18th century. As regards 1888, it is admitted that the rental valuation is 20 per cent. more than the landlords actually receive, and hence in the following table the value for 1888 is doubtless too high:—

| Year           | Value of Land, Million £ Sterling |          |         |       |
|----------------|-----------------------------------|----------|---------|-------|
|                | England                           | Scotland | Ireland | Total |
| 1750 . . . . . | 381                               | 24       | 93      | 498   |
| 1780 . . . . . | 507                               | 36       | 159     | 702   |
| 1814 . . . . . | 1,112                             | 145      | 213     | 1,470 |
| 1843 . . . . . | 1,264                             | 167      | 246     | 1,677 |
| 1850 . . . . . | 1,286                             | 167      | 252     | 1,704 |
| 1860 . . . . . | 1,289                             | 189      | 270     | 1,748 |
| 1868 . . . . . | 1,433                             | 216      | 276     | 1,925 |
| 1877 . . . . . | 1,548                             | 231      | 298     | 2,077 |
| 1888 . . . . . | 1,365                             | 207      | 301     | 1,873 |

The value of land in the three kingdoms rose 40 per cent. during the wars in Canada and United States, but the wars against Bonaparte caused a still greater rise owing to the enormous prices paid for grain. The upward movement continued until 1877, from which date there has been a steady, continuous decline.

Houses in the early part of the present century were little over 10 per cent. of the wealth of the nation; at present they exceed 25 per cent. of the total. I have capitalised the rental at 18 years, while Dr. Giffen thinks 15 years sufficient.

The increase of house property in the United Kingdom in a single lifetime, say 67 years, has been over 2000 millions sterling, viz.:—

| Year | Number of Houses | Rental, £   | Value, Million £ | Annual Increase |                  |
|------|------------------|-------------|------------------|-----------------|------------------|
|      |                  |             |                  | Houses          | Value, Million £ |
| 1821 | 3,572,000        | 20,300,000  | 366              | ...             | ...              |
| 1841 | 4,775,000        | 41,500,000  | 747              | 60,000          | 19               |
| 1861 | 5,131,000        | 61,200,000  | 1,102            | 18,000          | 18               |
| 1887 | 7,100,000        | 134,700,000 | 2,424            | 77,000          | 56               |

It must not, however, be supposed that 2000 millions sterling have been expended on new houses since 1821: the value of sites has risen very remarkably, which is included in the above table. The actual house property of the United Kingdom may be distinguished approximately thus:—

|                             | Number    | Value, Million £ | £ per House |
|-----------------------------|-----------|------------------|-------------|
| Built before 1840 . . . . . | 4,400,000 | 1,570            | 357         |
| .. since 1840 . . . . .     | 2,700,000 | 854              | 316         |
| Total . . . . .             | 7,100,000 | 2,424            | 341         |

There is no country in the world in which the value of house property to population is so high as in England, nor any (except Russia) where it is lower than in Ireland. The houses and values in the three kingdoms stand thus:—

|                      | Houses    | Value, £      | £ per House |
|----------------------|-----------|---------------|-------------|
| England . . . . .    | 5,206,000 | 2,131,000,000 | 408         |
| Scotland . . . . .   | 980,000   | 230,000,000   | 235         |
| Ireland . . . . .    | 914,000   | 63,000,000    | 69          |
| U. Kingdom . . . . . | 7,100,000 | 2,424,000,000 | 341         |

The growth of house property in each of the three kingdoms has been already set forth in detail under the title *Houses*.

Railways constitute an entirely new element of wealth that has sprung up in the last fifty years: they represent at present a value far in excess of the National Debt.

| Year           | Miles  | Cost, £     | Cost per Mile |
|----------------|--------|-------------|---------------|
| 1840 . . . . . | 650    | 21,000,000  | 32,000        |
| 1860 . . . . . | 10,430 | 348,100,000 | 33,400        |
| 1888 . . . . . | 19,810 | 864,700,000 | 43,700        |

The increase of railway capital in twenty years, down to 1860, was £16,400,000 per annum, and £18,400,000 in the years from 1860 to 1888. Shipping has grown about nine-fold in value since Colquhoun's estimate in 1812, and at present represents a sum equal to the collective values of all the other merchant navies of the world; for this item, be it understood, does not include war-vessels, the latter being counted with dockyards, arsenals, and other public property.

The shipping of our merchant navy, including machinery and fittings, represents the following amount :—

|                 | Tons      | Value, £    | £ per Ton |
|-----------------|-----------|-------------|-----------|
| Sailing . . . . | 3,115,000 | 24,920,000  | 8         |
| Steam . . . .   | 4,350,000 | 108,750,000 | 25        |
| Total . . . .   | 7,465,000 | 133,670,000 | ...       |

Merchandise in the above summary is put down at a sum equal to 12 months' imports and exports at the several dates.

Furniture is, at auctioneers' estimates, taken at 50 per cent. of the value of house property. Bullion and foreign loans have been estimated at various dates more or less at the figures stated. Foreign investments in 1888 were approximately as follows :—

|                                     |               |
|-------------------------------------|---------------|
| Colonial loans and railways . . . . | £ 430,000,000 |
| Australian mortgages . . . .        | 330,000,000   |
| Foreign loans and railways . . . .  | 900,000,000   |
| Total . . . .                       | 1,660,000,000 |

Public properties in the United Kingdom were approximately thus :—

|                                           |               |
|-------------------------------------------|---------------|
| 1800 miles of roads . . . .               | £ 90,000,000  |
| 6000 miles of streets . . . .             | 60,000,000    |
| Canals, docks, and royal navy . . . .     | 115,000,000   |
| Drains, waterworks, telegraphs . . . .    | 178,000,000   |
| Public buildings . . . .                  | 400,000,000   |
| Parks, crown forests, arsenals, &c. . . . | 561,000,000   |
| Total . . . .                             | 1,404,000,000 |

The total wealth of the three kingdoms in 1888 was, excluding public properties, thus :—

|                       | Millions £ Sterling |          |         |       |
|-----------------------|---------------------|----------|---------|-------|
|                       | England             | Scotland | Ireland | Total |
| Lands . . . .         | 1,365               | 207      | 301     | 1,873 |
| Houses . . . .        | 2,131               | 230      | 63      | 2,424 |
| Cattle, &c. . . .     | 267                 | 53       | 94      | 414   |
| Railways . . . .      | 714                 | 114      | 37      | 865   |
| Furniture . . . .     | 1,066               | 115      | 31      | 1,212 |
| Other items * . . . . | 2,271               | 229      | 112     | 2,612 |
| Total . . . .         | 7,814               | 948      | 638     | 9,400 |

The distribution of wealth in the United Kingdom may be approximately arrived at if we multiply the number of estates that paid legacy-duty by fifty, which corresponds more or less to the number of inhabitants. The official returns showing the amount of property changing hands under probate or legacy in the years 1885-89 give the averages thus per annum :—

| Estates                   | Number | Amount, £   | Average, £ |
|---------------------------|--------|-------------|------------|
| Over £500,000 . . . .     | 11     | 9,400,000   | 855,000    |
| £100,000-£500,000 . . . . | 147    | 27,800,000  | 190,000    |
| £10,000-£100,000 . . . .  | 2,279  | 60,400,000  | 26,500     |
| £1,000-£10,000 . . . .    | 11,153 | 35,500,000  | 3,200      |
| Under £1,000 . . . .      | 30,660 | 10,100,000  | 330        |
| Total . . . .             | 44,250 | 143,200,000 | 3,250      |

The above is exclusive of estates paying succession-duty, which amounted in the same years to an average of £44,800,000, equal to 31 per cent. of the former. In order, therefore, to estimate the total value of property

\* As the amount under this heading that would correspond to each country cannot be ascertained, the sum is distributed *pro rata* according to the income-tax assessments of the three kingdoms.

changing hands, we may be permitted to add 31 per cent. to the number of each class as given above, and likewise to the amount. The account will then stand thus :—

| Estates                   | Amount, £   | Average, £ |
|---------------------------|-------------|------------|
| Over £500,000 . . . .     | 12,000,000  | 855,000    |
| £100,000-£500,000 . . . . | 36,700,000  | 190,000    |
| £10,000-£100,000 . . . .  | 78,500,000  | 26,500     |
| £1,000-£10,000 . . . .    | 46,800,000  | 3,200      |
| Under £1,000 . . . .      | 14,000,000  | 340        |
| Total . . . .             | 188,000,000 | 3,250      |

If we follow Porter's method, and multiply the above number of estates by fifty, as the number of living persons is about fifty times the annual number of deaths, we find the wealth of the kingdom is held as in the subjoined table. Moreover, as each estate proved may be taken to stand for a household averaging 5½ persons, we must distribute the amount in households, and not per individual :—

| Class                | Households | Average, £ | Aggregate, Millions £ |
|----------------------|------------|------------|-----------------------|
| Millionaires . . . . | 700        | 855,000    | 599                   |
| Very rich . . . .    | 9,650      | 190,000    | 1,834                 |
| Rich . . . .         | 148,250    | 26,500     | 3,928                 |
| Middle . . . .       | 730,500    | 3,200      | 2,336                 |
| Struggling . . . .   | 2,008,000  | 340        | 680                   |
| Poor . . . .         | 3,916,900  | ...        | ...                   |
| Total . . . .        | 6,814,000  | ...        | 9,377                 |

The above total is almost equal to the amount given in the conspectus as the wealth of the kingdom, if we deduct 1400 millions for public works, &c. It is, however, apparent that a portion (probably 10 per cent.) of the wealth on which probate duty is paid consists of fiduciary documents which cannot be considered in a nation's wealth, such as bills of exchange and stocks of the National Debt. This last, 700 millions sterling, is held in the United Kingdom, and consequently figures among testamentary estates, while adding nothing to the nation's wealth.

#### FRANCE

Numerous estimates have been made: those of La-voisier, 1789, and Chaptal, in 1815, were as follows :—

|                           | Millions £ |       |
|---------------------------|------------|-------|
|                           | 1789       | 1815  |
| Rural property . . . .    | 840        | 1,040 |
| Urban property . . . .    | 280        | 320   |
| Personal property . . . . | 400        | 440   |
| Total . . . .             | 1,520      | 1,800 |

Those of Fournier de Flaix and Yves Guyot, from 1826 to date, are as follows :—

| Flaix     |       |          |       | Guyot     |       |          |       |
|-----------|-------|----------|-------|-----------|-------|----------|-------|
| Million £ |       |          |       | Million £ |       |          |       |
| Year      | Real  | Personal | Total | Year      | Real  | Personal | Total |
| 1826      | 1,560 | 1,020    | 2,580 | 1826      | 1,720 | 1,120    | 2,840 |
| 1833      | 1,674 | 1,152    | 2,826 | 1833      | 1,840 | 1,280    | 3,120 |
| 1841      | 1,881 | 1,359    | 3,240 | 1841      | 2,080 | 1,560    | 3,600 |
| 1849      | 2,115 | 1,530    | 3,645 | 1855      | 2,280 | 1,560    | 3,840 |
| 1857      | 2,322 | 1,971    | 4,293 | 1860      | 2,480 | 1,880    | 4,360 |
| 1865      | 2,934 | 2,646    | 5,580 | 1865      | 2,640 | 2,200    | 4,840 |
| 1873      | 3,510 | 3,312    | 6,822 | 1875      | 3,560 | 3,240    | 6,800 |
| 1882      | 4,835 | 4,275    | 9,110 | 1885      | 4,480 | 4,080    | 8,560 |

The following is a summary of the most notable estimates:—

| Year           | Million £ | Author         |
|----------------|-----------|----------------|
| 1789 . . . . . | 1,520     | Lavoisier      |
| 1815 . . . . . | 1,800     | Chaptal        |
| 1853 . . . . . | 5,000     | Girardin       |
| 1871 . . . . . | 7,000     | Wolowski       |
| 1872 . . . . . | 7,600     | Ayen           |
| 1879 . . . . . | 8,000     | Foville        |
| 1879 . . . . . | 7,520     | Leroy Beaulieu |
| 1879 . . . . . | 9,600     | Amelin         |
| 1880 . . . . . | 9,200     | Vacher         |
| 1881 . . . . . | 8,640     | Mouey          |
| 1882 . . . . . | 9,110     | Flaix          |
| 1885 . . . . . | 8,560     | Guyot          |

The following table shows approximately the components of the wealth of France at various dates:—

|                        | Value in Million £ |       |       |       |       |
|------------------------|--------------------|-------|-------|-------|-------|
|                        | 1789               | 1826  | 1840  | 1873  | 1885  |
| Land . . . . .         | 740                | 1,293 | 1,473 | 3,000 | 2,688 |
| Cattle, &c. . . . .    | 105                | 202   | 270   | 588   | 541   |
| Houses . . . . .       | 280                | 510   | 720   | 1,150 | 1,704 |
| Furniture . . . . .    | 140                | 255   | 360   | 675   | 852   |
| Railways . . . . .     | ...                | ...   | 10    | 270   | 532   |
| Shipping . . . . .     | 4                  | 7     | 7     | 12    | 15    |
| Bullion . . . . .      | 88                 | 110   | 115   | 180   | 300   |
| Merchandise . . . . .  | 11                 | 19    | 33    | 120   | 155   |
| Public works . . . . . | 40                 | 170   | 300   | 450   | 630   |
| Sundries . . . . .     | 112                | 274   | 312   | 377   | 1,143 |
| Total . . . . .        | 1,520              | 2,840 | 3,600 | 6,822 | 8,560 |

De Flaix and Vacher make the total 500 or 600 millions more than the above estimate for 1885, but perhaps they have not sufficiently allowed for the depreciation of land since 1880. The above total is that given by Yves Guyot for 1885. The increase of wealth since 1873 appears to have averaged 116 millions sterling per annum.

#### BELGIUM

Massalski, in his *Richesse de Belgique* (1880), sums up the national wealth at 29½ milliards of francs, or 1180 millions sterling, which is 17 per cent. over my estimate. It is to be observed that properties subject to legacy and succession duties from 1880 to 1885 averaged only 18 millions sterling, which at the current death-rate of 20 per thousand would give a total wealth of 900 millions sterling, exclusive of royal palaces, public works, &c.: these latter would hardly exceed 110 millions sterling.

#### GERMANY

It is remarkable that whereas the earnings of the German people, as set forth under the head of *Income*, are only 1 per cent. less than those of France, the wealth of Germany appears to be one-sixth less. This is, however, in great measure explained by the great difference in the value of land, Germany averaging £21, France £33 per cultivated acre. The imperial assessment for taxation is in the following ratio, and if we suppose wealth to be distributed in like manner, it will be as in the subjoined table:—

|                        | Ratio | Millions £ |
|------------------------|-------|------------|
| Prussia . . . . .      | 60.3  | 4,520      |
| Bavaria . . . . .      | 11.7  | 880        |
| Saxony . . . . .       | 6.6   | 500        |
| Wurtemberg . . . . .   | 4.3   | 320        |
| Baden . . . . .        | 3.4   | 250        |
| Alsace . . . . .       | 3.4   | 250        |
| Hesse . . . . .        | 2.1   | 150        |
| Other States . . . . . | 8.2   | 630        |
| Total . . . . .        | 100.0 | 7,500      |

Soetbeer shows that the earnings of the Prussian people advanced 25 per cent. from 1872 to 1885, and if we suppose that wealth increased in like degree, this makes the accumulation of thirteen years amount to 1136 millions, or 88 millions sterling per annum—say 40s. per inhabitant, against 72s. in the United Kingdom.

#### AUSTRIA

In 1880 Beer estimated the total wealth of the monarchy at 40,000 million florins, or about 3800 millions sterling, being only 10 per cent. under my estimate. We have no means to arrive at the increase of wealth, but Roschmann in 1883 estimated the national earnings at 610 millions sterling, against 550 millions in 1874, an increase of 11 per cent. If wealth increased in the same ratio the accumulation must have been 380 millions sterling, or 42 millions per annum, say 23s. per inhabitant, against 40s. in Germany.

#### ITALY

Newmann Spallart valued the total wealth of the country thus:—

|                                  | Million £ Sterling |
|----------------------------------|--------------------|
| Lands . . . . .                  | 1,160              |
| Houses . . . . .                 | 360                |
| Furniture, railways, &c. . . . . | 404                |
| Total . . . . .                  | 1,924              |

This was too low a valuation, an Italian writer in 1868 having arrived at a total of 1934 millions.

Pantaleoni, following Porter's method, based on legacy returns, shows that (exclusive of public property) the wealth of the people exceeds 2100 millions; he multiplies the amount of property subjected to legacy or succession by forty. The amount of such property in 1884 was £53,500,000, and hence the national wealth was 2140 millions sterling. This is exclusive of roads, public buildings, royal navy, arsenals, harbours &c., worth at least 300 millions, bringing up the total to 2440 millions sterling. This is 16 per cent. less than my estimate. Possibly some of the property subjected to legacy-duty was undervalued, in order to enable the heirs to evade a part of the duties. According to the *Archivio*, the value of lands and houses in 1880 was 1562 millions sterling; in my table they stand for 1576 millions, a difference of less than 1 per cent.

#### SPAIN

The figures of the Junta de Medios in 1832 compare with mine for 1888 as follows:—

|                    | Million £ Sterling |       |          |
|--------------------|--------------------|-------|----------|
|                    | 1832               | 1888  | Increase |
| Lands . . . . .    | 686                | 984   | 298      |
| Houses . . . . .   | 237                | 340   | 103      |
| Railways . . . . . | ...                | 94    | 94       |
| Sundries . . . . . | 186                | 1,098 | 912      |
| Total . . . . .    | 1,109              | 2,516 | 1,407    |

It is manifest that the item of sundries in 1832, which included everything in the kingdom except land and houses, was very much understated. Personal property alone would have been at least 25 per cent. of total. A proper valuation in 1832 would perhaps have shown a total of 1400 millions. In that case the accumulation of the 56 years down to 1888 would average 20 millions sterling per annum, or 27s. per inhabitant, as compared with 40s. in Germany, and 72s. in United Kingdom.

## DENMARK

In 1885 Falbe estimated the total wealth at 372 millions sterling, or 20 per cent. less than my total for 1888. His figures were:—

|                             | Million £ |
|-----------------------------|-----------|
| Houses and lands . . . . .  | 257       |
| Personal property . . . . . | 115       |
| Total . . . . .             | 372       |

He estimated that real estate had risen from 65 millions sterling in 1848, being an increase of 192 millions sterling in 37 years, say £5,200,000 per annum. This (irrespective of chattels or personal property) was equivalent to an accumulation of 60s. yearly per inhabitant. It was the direct result of breaking up the estates of the nobles, and facilitating their purchase by the peasantry.

## HOLLAND

The value of testamentary and succession property which changed hands in the years 1879–83, latest that the *Résumé* publishes, averaged as follows:—

|                                 | £          |
|---------------------------------|------------|
| Houses and lands . . . . .      | 9,100,000  |
| Dutch National Debt . . . . .   | 1,200,000  |
| Other personal assets . . . . . | 13,000,000 |
| Total . . . . .                 | 23,300,000 |

Excluding the National Debt for reasons already given, we find a sum of £22,100,000, which, multiplied by 44 (as the living were in those years 44 times the number of deaths), gives approximately the wealth of Holland, say 972 millions sterling; the figure in the conspectus is 980 millions.

## UNITED STATES

The first Census of wealth was taken in 1790, which showed as follows:—

|                     | \$          | £           |
|---------------------|-------------|-------------|
| Lands . . . . .     | 479,000,000 | 99,800,000  |
| Houses, &c. . . . . | 141,000,000 | 29,400,000  |
| Total . . . . .     | 620,000,000 | 129,200,000 |

The following table shows the results in English gold at each Census, and an estimate for 1888 as already given:—

\* The New York *Journal of Commerce* in 1887 estimated the wealth of the Union at 61,000 millions of dollars, or 12,700 millions sterling, showing, moreover, that the amount of insured property had risen as follows:—

| Year           | £             |
|----------------|---------------|
| 1870 . . . . . | 735,000,000   |
| 1880 . . . . . | 1,495,000,000 |
| 1885 . . . . . | 2,184,000,000 |

The several Census returns from 1850 to 1880 show the wealth of each State in values reduced to English gold (allowing 14 per cent. discount for paper values in 1870) as follows:—

|                         | Million £ Sterling |      |      |       | Increase of 30 Years | £ Sterling per Inhabitant |      |      |      |
|-------------------------|--------------------|------|------|-------|----------------------|---------------------------|------|------|------|
|                         | 1850               | 1860 | 1870 | 1880  |                      | 1850                      | 1860 | 1870 | 1880 |
| Maine . . . . .         | 26                 | 39   | 63   | 104   | 78                   | 44                        | 60   | 102  | 160  |
| New Hampshire . . . . . | 22                 | 32   | 46   | 68    | 46                   | 70                        | 96   | 144  | 196  |
| Vermont . . . . .       | 19                 | 25   | 42   | 60    | 41                   | 60                        | 77   | 126  | 180  |
| Rhode Island . . . . .  | 17                 | 28   | 53   | 87    | 70                   | 112                       | 160  | 240  | 320  |
| Connecticut . . . . .   | 32                 | 92   | 140  | 177   | 145                  | 85                        | 201  | 256  | 283  |
| Massachusetts . . . . . | 119                | 169  | 384  | 581   | 462                  | 120                       | 135  | 257  | 320  |
| New England . . . . .   | 235                | 385  | 728  | 1,077 | 842                  | 86                        | 122  | 208  | 270  |

| Year           | Wealth, Million £ | £ Sterling per Inhabitant | Yearly Increase |                |
|----------------|-------------------|---------------------------|-----------------|----------------|
|                |                   |                           | Of Wealth, £    | Per Inhabitant |
| 1790 . . . . . | 129               | 33                        | ...             | £ s. d.        |
| 1800 . . . . . | 222               | 42                        | 9,300,000       | 2 1 0          |
| 1810 . . . . . | 312               | 43                        | 9,000,000       | 1 9 0          |
| 1820 . . . . . | 392               | 41                        | 8,000,000       | 0 19 0         |
| 1830 . . . . . | 552               | 43                        | 16,000,000      | 1 9 0          |
| 1840 . . . . . | 782               | 46                        | 23,000,000      | 1 11 0         |
| 1850 . . . . . | 1,484             | 64                        | 70,200,000      | 3 10 0         |
| 1860 . . . . . | 3,361             | 107                       | 187,700,000     | 6 16 0         |
| 1870 . . . . . | 5,413             | 140                       | 205,200,000     | 5 17 0         |
| 1880 . . . . . | 9,077             | 180                       | 366,400,000     | 8 4 0          |
| 1888 . . . . . | 12,824            | 210                       | 468,400,000     | 8 10 0         |

The following table shows approximately the chief components of American wealth since 1850:—

|                     | Millions of Dollars, Gold |        |        |        |        |
|---------------------|---------------------------|--------|--------|--------|--------|
|                     | 1850                      | 1860   | 1870   | 1880   | 1888   |
| Land . . . . .      | 3,310                     | 6,910  | 8,320  | 10,197 | 12,300 |
| Cattle . . . . .    | 550                       | 1,080  | 1,415  | 1,630  | 2,405  |
| Railways . . . . .  | 290                       | 1,140  | 2,047  | 4,897  | 9,340  |
| Factories . . . . . | 520                       | 1,010  | 1,902  | 2,790  | 3,500  |
| Houses . . . . .    | 1,000                     | 2,600  | 5,460  | 10,800 | 14,000 |
| Furniture . . . . . | 500                       | 1,300  | 2,730  | 5,400  | 7,000  |
| Sundries . . . . .  | 966                       | 2,120  | 4,108  | 7,928  | 13,055 |
| Total . . . . .     | 7,136                     | 16,160 | 25,982 | 43,642 | 61,600 |

Comparing the Census returns of 1880 with those of 1850, it appears that the accumulations of thirty years amounted in the State of New York alone to 1360 millions sterling, and that the six States of New York, Pennsylvania, Illinois, Ohio, Massachusetts, and California stood for 60 per cent. of the total accumulations of the Union. If we suppose that each inhabitant contributed equally to the public wealth, and take the mean number of each nationality for the 30 years in question, we find the accumulations of 30 years ending 1880 were made up thus:—

| State                   | Increase of Wealth, Million £ Sterling, by |       |         |        |       |
|-------------------------|--------------------------------------------|-------|---------|--------|-------|
|                         | Americans                                  | Irish | Germans | Others | Total |
| New York . . . . .      | 1,027                                      | 156   | 87      | 90     | 1,360 |
| Pennsylvania . . . . .  | 831                                        | 63    | 41      | 37     | 972   |
| Illinois . . . . .      | 494                                        | 27    | 47      | 43     | 611   |
| Ohio . . . . .          | 506                                        | 17    | 38      | 20     | 581   |
| Massachusetts . . . . . | 355                                        | 66    | 4       | 37     | 462   |
| California . . . . .    | 195                                        | 23    | 14      | 61     | 293   |
| Other States . . . . .  | 2,822                                      | 119   | 143     | 228    | 3,312 |
| Total . . . . .         | 6,230                                      | 471   | 374     | 516    | 7,591 |

|                          | Million £ Sterling |       |       |       | Increase of 30 Years | £ Sterling per Inhabitant |      |      |      |

| Nevada . . . . .         | ...                | ...   | 6     | 14    | 14                   | ...                       | ...  | 145  | 230  |
| Territories . . . . .    | 6                  | 21    | 38    | 108   | 102                  | ...                       | ...  | ...  | ...  |
| The West . . . . .       | 245                | 894   | 1,890 | 3,532 | 3,287                | 43                        | 92   | 136  | 187  |
| The Union . . . . .      | 1,486              | 3,366 | 5,413 | 9,077 | 7,591                | 64                        | 107  | 140  | 180  |

The accumulations per inhabitant in thirty years average £205 sterling, or nearly £7 per annum, viz. :-

| States                | Increase Million £ | Annual Average, £ | Mean Population | Annual Accumulation per Head |
|-----------------------|--------------------|-------------------|-----------------|------------------------------|
| New England . . . . . | 842                | 28,070,000        | 3,400,000       | £ s. d.<br>8 4 0             |
| Middle . . . . .      | 2,749              | 91,630,000        | 9,500,000       | 9 13 0                       |
| South . . . . .       | 713                | 23,800,000        | 11,700,000      | 2 1 0                        |
| West . . . . .        | 3,287              | 109,600,000       | 12,200,000      | 9 0 0                        |
| Union . . . . .       | 7,591              | 253,100,000       | 36,800,000      | 6 17 0                       |

This is a prodigious growth of wealth in thirty years, and without parallel in the history of the human race. Nevertheless the accumulation per head is less than in Australia.

#### AUSTRALIA

According to Mr. Coghlan the wealth of Australia was approximately as follows :-

|                | Millions | Population | Per Head |
|----------------|----------|------------|----------|
|                | £        |            | £        |
| 1838 . . . . . | 26       | 200,000    | 130      |
| 1863 . . . . . | 181      | 1,264,000  | 144      |
| 1888 . . . . . | 1,136    | 3,680,000  | 307      |

This includes the five Colonies of the mainland, and

also Tasmania and New Zealand. It is, however, incomplete, because it excludes public works, crown-lands, and other public properties.

The total wealth, as shown in the conspectus, appears to reach the sum of 1373 millions sterling, and to have grown in eighteen years as follows :-

|                       | Million £ Sterling |       |
|-----------------------|--------------------|-------|
|                       | 1870               | 1888  |
| Lands . . . . .       | 89                 | 533   |

| Railways . . . . .    | 27                 | 94    |
| Houses . . . . .      | 60                 | 239   |
| Furniture . . . . .   | 30                 | 120   |
| Merchandise . . . . . | 29                 | 65    |
| Sundries . . . . .    | 38                 | 255   |
| Total . . . . .       | 320                | 1,373 |

At a meeting of one of the Australian banks in London in 1888, it was stated that the wealth of the seven Colonies was as follows :-

|                          | Million £ |
|--------------------------|-----------|
| Private wealth . . . . . | 1,015     |
| Public works . . . . .   | 175       |
| Banks . . . . .          | 148       |
| Total . . . . .          | 1,338     |

This was, however, irrespective of crown-lands, the value of which could not be easily stated.

Mr. Coghlan's distribution of the wealth of the several Colonies differs from my estimates as follows (1888):—

|                         | Millions Sterling |         |
|-------------------------|-------------------|---------|
|                         | Coghlan           | Mulhall |
| New South Wales . . .   | 410               | 483     |
| Victoria . . . . .      | 386               | 370     |
| Queensland . . . . .    | 106               | 132     |
| South Australia . . . . | 57                | 131     |
| Tasmania . . . . .      | 26                | 36      |
| New Zealand . . . . .   | 145               | 208     |
| Western Australia . . . | 6                 | 13      |
| Total . . . . .         | 1,136             | 1,373   |

Mr. Coghlan's figures, as already stated, exclude railways, crown-lands, &c. The principal components of wealth in 1888 may be estimated to have stood thus in million £ sterling:—

|                | Land | Cattle | Railways | Houses | Furniture | Merchandise | Sundries | Total | £ per Head |
|----------------|------|--------|----------|--------|-----------|-------------|----------|-------|------------|
| N. S. Wales    | 181  | 25     | 27       | 92     | 46        | 23          | 89       | 483   | 440        |
| Victoria . .   | 107  | 12     | 28       | 91     | 46        | 18          | 68       | 370   | 337        |
| Queensland .   | 58   | 12     | 13       | 12     | 6         | 6           | 25       | 132   | 330        |
| S. Australia . | 64   | 5      | 10       | 13     | 7         | 7           | 25       | 131   | 413        |
| Tasmania . .   | 16   | 1      | 2        | 5      | 3         | 2           | 7        | 36    | 240        |
| New Zealand    | 100  | 11     | 13       | 25     | 12        | 8           | 39       | 208   | 345        |
| W. Australia   | 7    | 1      | 1        | 1      | ...       | 1           | 2        | 13    | 310        |
| Total . . .    | 533  | 67     | 94       | 239    | 120       | 65          | 255      | 1,373 | 377        |

The increase of wealth in Australia would therefore seem to have been as follows:—

| Date       | Wealth, Million £ | Annual Increase, £ | Mean Population | Annual Accumulation per Inhabitant |
|------------|-------------------|--------------------|-----------------|------------------------------------|
| 1836 . . . | 26                | ...                | ...             | £ s. d.                            |
| 1863 . . . | 181               | 6,200,000          | 700,000         | 8 16 0                             |
| 1870 . . . | 320               | 19,900,000         | 1,600,000       | 12 9 0                             |
| 1888 . . . | 1,373             | 58,500,000         | 2,800,000       | 20 18 0                            |

The average annual accumulation per inhabitant has been more than double that in the United States, where it has never exceeded £8 10s.

Respecting the Colony of New South Wales, Mr. Coghlan states that if public works, railways &c., were included, the total would reach 521 millions sterling, that is, 8 per cent. over my estimate. And as regards Victoria, one of the Melbourne papers (apparently quoting the official statistics of Mr. Hayter) says:—"In the statistics of the Colony for 1886, an estimate is made of the wealth of the population on the basis of the property left by deceased persons, it being supposed that the average amount left by each person dying is equivalent to the average amount possessed by each person living. On this basis the national wealth amounted to nearly 144 millions sterling, or £185 per head in the five years 1872 to 1876; to nearly 187 millions sterling, or £223 per head in the five years 1877 to 1881; and to nearly 286 millions sterling, or £305 per head in the five years 1882 to 1886."

The above is exclusive of railways, public works &c., which would doubtless bring up the total to my figure of 370 millions sterling in 1888. With respect to New Zealand, the official returns for 1886, exclusive of public

works, and crown-lands, amounted to 152 millions sterling, which was apparently equivalent to 200 millions, including the items omitted. It is right to observe that the public debt, which was 175 millions sterling in December 1889, is held almost wholly in England, and ought therefore to be deducted from the wealth. This would leave a balance of 1200 millions sterling, or £330 per inhabitant, against £247 in the United Kingdom, £210 in the United States, £230 in Denmark, £224 in France.

## CANADA

The following table shows approximately the total wealth in 1861 and 1888:—

|                       | Million £ Sterling |      |          |
|-----------------------|--------------------|------|----------|
|                       | 1861               | 1888 | Increase |
| Lands . . . . .       | 102                | 282  | 180      |
| Cattle, &c. . . . .   | 38                 | 80   | 42       |
| Railways . . . . .    | 23                 | 151  | 128      |
| Houses . . . . .      | 80                 | 127  | 47       |
| Furniture . . . . .   | 40                 | 64   | 24       |
| Merchandise . . . . . | 21                 | 41   | 20       |
| Sundries . . . . .    | 88                 | 235  | 147      |
| Total . . . . .       | 392                | 980  | 588      |

This shows an annual accumulation of 22 millions sterling, with a mean population of 4,000,000 souls, say £5 10s. per head, against £8 10s. in the United States, and £17 10s. during the same period in Australia.

## CAPE COLONY

In 1883 the value of lands and houses was assessed as follows:—

|                           | £          |
|---------------------------|------------|
| Cape Town . . . . .       | 4,979,000  |
| Port Elizabeth . . . . .  | 1,950,000  |
| Kimberley . . . . .       | 1,711,000  |
| Rural districts . . . . . | 29,160,000 |
| Total . . . . .           | 37,800,000 |

## WEIGHTS AND MEASURES

The following is a general table of weights and measures:—

| Name                  | Locality      | Equivalent         |
|-----------------------|---------------|--------------------|
| Acre . . . . .        | England       | 4,840 square yards |
| Almud . . . . .       | Turkey        | 7=8 gallons        |
| " . . . . .           | Portugal      | 4=15 "             |
| Amphora . . . . .     | Rome          | 7 "                |
| Ar . . . . .          | France        | 100=247 acres      |
| Ardeb . . . . .       | Egypt         | 300 lbs.           |
| Arpent . . . . .      | France        | 12=10 acres        |
| Arroba . . . . .      | Spain         | 25 lbs.            |
| Aum . . . . .         | Germany       | 31 gallons         |
| Bag, cocoa . . . . .  | England       | 112 lbs.           |
| " coffee . . . . .    | Brazil        | 160 "              |
| " rice . . . . .      | India         | 168 "              |
| " sugar . . . . .     | "             | 168 "              |
| Bale . . . . .        | United States | 485 "              |
| " . . . . .           | Brazil        | 156 "              |
| " . . . . .           | Egypt         | 600 "              |
| " . . . . .           | India         | 376 "              |
| Barrel, ale . . . . . | England       | 36 gallons         |
| " apples . . . . .    | United States | 150 lbs.           |
| " flour . . . . .     | "             | 200 "              |
| " fish . . . . .      | Norway        | 1,000 in number    |
| Berkovetz . . . . .   | Russia        | 400 lbs.           |
| Bonnier . . . . .     | France        | 3 acres            |

| Name                 | Locality      | Equivalent       | Name          | Locality      | Equivalent        |
|----------------------|---------------|------------------|---------------|---------------|-------------------|
| Bushel, barley       | England       | 54 lbs.          | Mark          | France        | gold = 695        |
| " beans              | "             | 63 "             | Maund         | India         | 80 lbs.           |
| " hempseed           | "             | 44 "             | Motre         | France        | 100 = 328 feet    |
| " maize              | "             | 59 "             | Mancus.       | England       | 2 ounces          |
| " malt               | "             | 38 "             | Metzen        | Germany       | 24 = 1 ton        |
| " oats               | "             | 40 "             | Mile          | England       | 1,760 yards       |
| " peas               | "             | 64 "             | "             | Ireland       | 2,240 "           |
| " rye                | "             | 59 "             | "             | Germany       | 8,140 "           |
| " salt               | "             | 56 "             | "             | Turkey        | 1,870 "           |
| " wheat              | "             | 61 "             | "             | Sweden        | 11,770 "          |
| Bunder               | Holland       | 2 = 1 acre       | "             | Geographical  | 2,025 "           |
| Butt                 | England       | 108 gallons      | Millimetre    | France        | 25 = 1 inch       |
| Cable                | "             | 120 fathoms      | Minute        | "             | 60 = 1 hour       |
| Cantar               | Egypt         | 100 lbs.         | Morgen        | Germany       | 5 = 3 acres       |
| Cask, rice           | United States | 672 "            | Mudden        | Holland       | 14 = 1 ton        |
| " tallow             | England       | 1,008 "          | Muid          | France        | 50 bushels        |
| " wine               | "             | 108 gallons      | Oke           | Greece        | 4 = 11 lbs.       |
| Catty                | China         | 3 = 4 lbs.       | Ounce         | England       | 16 = 1 lb.        |
| Centner              | Germany       | 110 lbs.         | "             | Avoirdupois   | 12 = 1 lb.        |
| " metric             | "             | 220 "            | Pack, wool    | England       | 240 lbs.          |
| Chain                | England       | 66 feet          | Palm          | "             | 4 inches          |
| Chaldron, coal       | "             | 3 = 8 tons       | Parasang      | Persia        | 3½ miles          |
| Chest, tea           | China         | 82 lbs.          | Peck          | England       | 14 lbs.           |
| Chetvert             | Russia        | 310 "            | Pennyweight   | "             | 20 = 1 ounce      |
| Chittack             | India         | 2 ounces         | Perch         | "             | 5½ yards          |
| Cord, wood           | Germany       | 2½ tons          | Picul         | China         | 133 lbs.          |

## WHEAT

It cannot be grown farther than 60° N. lat. The greatest elevation at which it is found is as follows:—

|                  | <i>Feet</i> |                   | <i>Feet</i> |
|------------------|-------------|-------------------|-------------|
| Alps . . . .     | 3,600       | Sierra Nevada . . | 8,200       |
| Brazil . . . .   | 5,000       | Abyssinia . . . . | 10,000      |
| Caucasus . . . . | 8,000       | Andes . . . .     | 11,000      |

The yield in various countries for 100 lbs. of seed is:—

|               | <i>Lbs.</i> |                     | <i>Lbs.</i> |
|---------------|-------------|---------------------|-------------|
| Russia . . .  | 500         | France . . .        | 750         |
| Sweden . . .  | 500         | Poland . . .        | 800         |
| Denmark . . . | 600         | Great Britain . . . | 900         |
| Prussia . . . | 600         | Holland . . .       | 900         |
| Spain . . .   | 600         | United States . . . | 900         |
| Austria . . . | 700         | Italy . . .         | 1,000       |

The cultivation in the United Kingdom was:—

| Period  | Annual Average |                 |             |         |
|---------|----------------|-----------------|-------------|---------|
|         | Acres          | Million Bushels | Consumption | Deficit |
| 1849-54 | 4,270,000      | 118             | 152         | 34      |
| 1855-66 | 3,740,000      | 107             | 161         | 54      |
| 1867-72 | 3,560,000      | 98              | 176         | 78      |
| 1873-78 | 3,310,000      | 80              | 184         | 104     |
| 1881-89 | 2,750,000      | 80              | 224         | 144     |

The average value of wheat crop per acre in United States was as follows in British money:—

| Period  | Shillings | Period  | Shillings |
|---------|-----------|---------|-----------|
| 1871-74 | 58        | 1880-83 | 49        |
| 1875-79 | 52        | 1884-87 | 34        |

See full statistics at page 8, *Agriculture*.

## WINDMILLS

Holland has 10,100 windmills, representing a value of 20 millions sterling, with an aggregate force of 52,200 horse-power. Cost of drainage, 10d. per acre, with a lift of 3 feet; 20d. at 6 feet, and so on. The average area drained by each mill in Holland is 310 acres, each lifting 150,000 tons or 33 million gallons water daily.

## WINE

\* For consumption of wine see *Alcohol*, p. 58.

The figures for 1876-85 are by Newmann Spallart, those of 1880-88 from the *Moniteur Vinicole* (apparently too high), and the latest estimates are from numerous sources. An acre of vineyard has ordinarily 2400 vine plants.

#### Retrospect of Production

|                           | Millions of Gallons |         |         |
|---------------------------|---------------------|---------|---------|
|                           | 1810-20             | 1840-50 | 1880-88 |
| France . . . . .          | 455                 | 820     | 670     |
| Italy . . . . .           | 310                 | 360     | 665     |
| Spain . . . . .           | 170                 | 250     | 630     |
| Austria . . . . .         | 590                 | 500     | 225     |
| Portugal . . . . .        | 75                  | 100     | 125     |
| Germany . . . . .         | 30                  | 40      | 75      |
| Other countries . . . . . | 120                 | 230     | 321     |
| Total . . . . .           | 1,750               | 2,300   | 2,711   |

The vine flourishes between 35 and 50 degrees of N. lat., and 28 and 46 S.

The largest vine in the world is said to be one growing at Oys, Portugal, which has been in bearing since 1802. Its maximum yield was in 1864, in which year it produced a sufficient quantity of grapes to make 165 gallons of wine. In Portugal it is customary to plant 2500 vines to the acre, and the yield is often 240 gallons per acre, or a gallon from 10 vines. In South Africa a bushel of grapes gives a gallon of wine.

#### UNITED KINGDOM

The consumption has been as follows:—

| Year           | Gallons    | Duty, Shillings per Gallon | Gallons per Inhabitant |
|----------------|------------|----------------------------|------------------------|
| 1801 . . . . . | 6,877,000  | 10                         | 0.45                   |
| 1811 . . . . . | 5,630,000  | 14                         | 0.32                   |
| 1821 . . . . . | 4,702,000  | 14                         | 0.23                   |
| 1831 . . . . . | 6,220,000  | 6                          | 0.26                   |
| 1841 . . . . . | 6,185,000  | 6                          | 0.22                   |
| 1851 . . . . . | 6,282,000  | 6                          | 0.23                   |
| 1861 . . . . . | 10,693,000 | 1                          | 0.36                   |
| 1871 . . . . . | 16,145,000 | 1                          | 0.53                   |
| 1881 . . . . . | 15,559,000 | 1                          | 0.44                   |
| 1888 . . . . . | 13,500,000 | 1                          | 0.36                   |

#### GERMANY

The area and vintage in 1884 were as follows:—

|                        | Acres   | Gallons    | Value, £   |
|------------------------|---------|------------|------------|
| Alsace . . . . .       | 80,000  | 21,000,000 | 4,200,000  |
| Bavaria . . . . .      | 60,000  | 9,000,000  | 1,800,000  |
| Wurtemberg . . . . .   | 60,000  | 9,000,000  | 1,800,000  |
| Baden . . . . .        | 55,000  | 8,000,000  | 1,600,000  |
| Prussia . . . . .      | 50,000  | 8,000,000  | 1,600,000  |
| Other States . . . . . | 30,000  | 9,000,000  | 1,800,000  |
| Total . . . . .        | 335,000 | 64,000,000 | 12,800,000 |

#### ITALY

The vintage in the years 1883-85 averaged as follows:—

|                                | Gallons     | Value, £   |
|--------------------------------|-------------|------------|
| Island of Sardinia . . . . .   | 9,000,000   | 700,000    |
| Piedmont and Liguria . . . . . | 57,000,000  | 4,600,000  |
| Lombardy and Venetia . . . . . | 46,000,000  | 3,700,000  |
| Tuscany . . . . .              | 44,000,000  | 3,600,000  |
| States of the Church . . . . . | 81,000,000  | 6,500,000  |
| Naples . . . . .               | 138,000,000 | 11,000,000 |
| Sicily . . . . .               | 106,000,000 | 8,500,000  |
| Total . . . . .                | 481,000,000 | 38,600,000 |

The area under vines increased rapidly in late year, from 4,800,000 acres in 1880 to 7,640,000 in 1888.

#### FRANCE

A table of French vintages since 1810 is given at page 19 (*Agriculture*).

The following statistics of Champagne are published at Rheims:—

| Year           | Millions of Bottles |        |
|----------------|---------------------|--------|
|                | Stock               | Export |
| 1850 . . . . . | 20                  | 5      |
| 1860 . . . . . | 36                  | 8      |
| 1870 . . . . . | 39                  | 14     |
| 1880 . . . . . | 68                  | 17     |
| 1886 . . . . . | 83                  | 15     |

The stock in 1886 was considered equal to four years' consumption, which comprises 3,000,000 bottles yearly in France, and 17,000,000 in other countries.

#### UNITED STATES

Official returns of the vintages since 1840 show thus:—

| Year           | Gallons   | Year           | Gallons    |
|----------------|-----------|----------------|------------|
| 1840 . . . . . | 120,000   | 1870 . . . . . | 3,060,000  |
| 1850 . . . . . | 220,000   | 1880 . . . . . | 23,300,000 |
| 1860 . . . . . | 1,860,000 | 1885 . . . . . | 17,400,000 |

The Census of 1880 showed the vineyards thus:—

|                        | Acres   | Gallons Wine | Value, £ Stg. |
|------------------------|---------|--------------|---------------|
| California . . . . .   | 32,000  | 13,600,000   | 850,000       |
| New York . . . . .     | 13,000  | 600,000      | 80,000        |
| Ohio . . . . .         | 10,000  | 1,600,000    | 330,000       |
| Other States . . . . . | 127,000 | 7,700,000    | 1,540,000     |
| Total . . . . .        | 182,000 | 23,500,000   | 2,800,000     |

#### GREECE

The area and vintage of grapes and currants were as follows:—

| Year           | Acres   | Gallons    |
|----------------|---------|------------|
| 1860 . . . . . | 162,000 | 15,000,000 |
| 1875 . . . . . | 260,000 | 25,000,000 |
| 1879 . . . . . | 310,000 | 30,000,000 |
| 1887 . . . . . | ...     | 50,000,000 |

#### ALGERIA

Area and vintage have increased rapidly of late years, viz:—

| Year           | Acres   | Gallons    |
|----------------|---------|------------|
| 1880 . . . . . | 55,000  | 9,000,000  |
| 1885 . . . . . | 132,000 | 22,000,000 |
| 1888 . . . . . | 238,000 | 40,000,000 |

In 1889 Algeria exported 34 million gallons to France.

#### WINE-EXPORTING COUNTRIES

The exportation was approximately (mill. galls.):—

| Year           | France | Italy | Spain | Portugal | Greece | Total |
|----------------|--------|-------|-------|----------|--------|-------|
| 1830 . . . . . | 18     | 2     | 10    | 3        | ...    | 33    |
| 1840 . . . . . | 24     | 3     | 15    | 4        | ...    | 46    |
| 1850 . . . . . | 38     | 4     | 20    | 4        | ...    | 66    |
| 1860 . . . . . | 48     | 5     | 24    | 5        | 1      | 83    |
| 1870 . . . . . | 70     | 5     | 33    | 6        | 2      | 110   |
| 1880 . . . . . | 55     | 48    | 134   | 7        | 3      | 247   |
| 1887 . . . . . | 53     | 52    | 167   | 10       | 4      | 286   |

Rudesheimer is worth £20 a gallon. Prince Woronoff sells his Tokay, 220 years old, at £9 a bottle. Champagne vintage averages 20 million bottles, of which France exports 17 millions. The Xeres vineyards, 15,000 acres, produce 4 million gallons yearly of sherry. Wine ac- es strength after 200 years.

**WOOL**

The production has been (unwashed) approximately as follows :—

|                          | Millions of Lbs. |            |              |              |              |
|--------------------------|------------------|------------|--------------|--------------|--------------|
|                          | 1820             | 1840       | 1860         | 1880         | 1887         |
| United Kingdom . . . . . | 100              | 121        | 155          | 176          | 160          |
| France . . . . .         | 116              | 144        | 150          | 117          | 126          |
| Germany . . . . .        | 64               | 85         | 125          | 120          | 115          |

Europe in 1820 produced 94 per cent. of the wool of the world, whereas now it does not produce 40 per cent.

The principal features of the woollen industry in 1887-88 were approximately as follows :—

|                        | Million Lbs. Wool |              | Million Lbs. Yarn Spun | Woollen Manufactures, £ |                    |

#### UNITED KINGDOM

The woollen industry dates its importance from the reign of Edward III., who introduced foreign workmen.

Gregory King in 1690, estimated the value of woollen manufactures at eight millions sterling, of which one-fourth were exported; he valued the wool at two millions sterling.

The woollen industry approximately was thus:—

| Year           | Millions of Lbs. |          |            |           |          |               | Value of Output, £ |
|----------------|------------------|----------|------------|-----------|----------|---------------|--------------------|
|                | British Wool     | Imported | Total Wool | Wool Spun | Exported | Wool Consumed |                    |
| 1780 . . . . . | 80               | 3        | 83         | 58        | ...      | 58            | 16,600,000         |
| 1800 . . . . . | 90               | 10       | 100        | 68        | ...      | 75            | 18,000,000         |
| 1820 . . . . . | 100              | 10       | 110        | 75        | ...      | 80            | 18,700,000         |
| 1830 . . . . . | 115              | 32       | 147        | 96        | 2        | 94            | 19,400,000         |
| 1840 . . . . . | 120              | 48       | 168        | 108       | 4        | 104           | 22,100,000         |
| 1850 . . . . . | 141              | 60       | 201        | 129       | 14       | 115           | 27,700,000         |
| 1860 . . . . . | 144              | 104      | 248        | 153       | 28       | 125           | 34,600,000         |
| 1870 . . . . . | 155              | 171      | 326        | 194       | 35       | 159           | 47,800,000         |
| 1880 . . . . . | 159              | 226      | 385        | 224       | 26       | 199           | 47,500,000         |
| 1888 . . . . . | 136              | 300      | 436        | 245       | 40       | 205           | 43,900,000         |

The output was composed as follows:—

| Year | Manufactures, £ |            |            | Ex-ported Yarn, £ | Total Output, £ |
|------|-----------------|------------|------------|-------------------|-----------------|
|      | Home Use        | Export     | Total      |                   |                 |
| 1780 | 14,000,000      | 2,600,000  | 16,600,000 | ...               | 16,600,000      |
| 1800 | 11,100,000      | 6,900,000  | 18,000,000 | ...               | 18,000,000      |
| 1820 | 13,100,000      | 5,600,000  | 18,700,000 | ...               | 18,700,000      |
| 1830 | 14,500,000      | 4,700,000  | 19,200,000 | 200,000           | 19,400,000      |
| 1840 | 16,300,000      | 5,300,000  | 21,600,000 | 500,000           | 22,100,000      |
| 1850 | 17,600,000      | 8,600,000  | 26,200,000 | 1,500,000         | 27,700,000      |
| 1860 | 18,600,000      | 12,200,000 | 30,800,000 | 3,800,000         | 34,600,000      |
| 1870 | 21,100,000      | 21,700,000 | 42,800,000 | 5,000,000         | 47,800,000      |
| 1880 | 26,900,000      | 17,300,000 | 44,200,000 | 3,300,000         | 47,500,000      |
| 1888 | 19,800,000      | 20,000,000 | 39,800,000 | 4,100,000         | 43,900,000      |

The business of sixty-seven years may be stated thus:—

| Period           | Tons      |           | Value, Millions £ |                |            |
|------------------|-----------|-----------|-------------------|----------------|------------|
|                  | Wool      | Yarn Spun | Wool              | Manu- factures | Net Result |
| 1821-30 . . . .  | 570,000   | 380,000   | 70                | 191            | 121        |
| 1831-40 . . . .  | 680,000   | 440,000   | 81                | 208            | 127        |
| 1841-50 . . . .  | 820,000   | 520,000   | 91                | 244            | 153        |
| 1851-60 . . . .  | 1,040,000 | 650,000   | 119               | 311            | 192        |
| 1861-70 . . . .  | 1,290,000 | 790,000   | 140               | 412            | 272        |
| 1871-80 . . . .  | 1,570,000 | 930,000   | 156               | 476            | 320        |
| 1881-87 . . . .  | 1,200,000 | 700,000   | 97                | 320            | 223        |
| 67 years . . . . | 7,170,000 | 4,410,000 | 754               | 2,162          | 1,408      |

The quantity of wool consumed was approximately as follows :—

| Period         | Tons Aggregate |           |           |
|----------------|----------------|-----------|-----------|
|                | British        | Foreign   | Total     |
| 1821-40 . . .  | 980,000        | 270,000   | 1,250,000 |
| 1841-60 . . .  | 1,180,000      | 680,000   | 1,860,000 |
| 1861-70 . . .  | 670,000        | 620,000   | 1,290,000 |
| 1871-80 . . .  | 690,000        | 880,000   | 1,570,000 |
| 1881-87 . . .  | 390,000        | 810,000   | 1,200,000 |
| 67 years . . . | 3,910,000      | 3,260,000 | 7,170,000 |

In 1774 Campbell estimated woollen manufactures at 12 millions sterling, in 1815 Stevenson at 18 millions, and in 1837 M'Culloch at 22½ millions.

Notwithstanding the magnitude of this industry, Great Britain imports large quantities of foreign goods. The following table shows the value of the total consumption of woollen merchandise :—

| Period        | Annual Consumption |             |            |
|---------------|--------------------|-------------|------------|
|               | British, £         | Imported, £ | Total, £   |
| 1851-60 . . . | 18,100,000         | 1,100,000   | 19,200,000 |
| 1861-70 . . . | 21,300,000         | 2,050,000   | 23,350,000 |
| 1871-80 . . . | 21,600,000         | 5,020,000   | 26,620,000 |
| 1881-88 . . . | 22,600,000         | 7,100,000   | 29,700,000 |

The following table shows the surplus of exports since 1850 :—

| Period         | Millions £ Woollen Merchandise |         |                 |
|----------------|--------------------------------|---------|-----------------|
|                | Imports                        | Exports | Surplus Exports |
| 1851-60 . . .  | 11                             | 131     | 120             |
| 1861-70 . . .  | 21                             | 237     | 116             |
| 1871-80 . . .  | 50                             | 260     | 210             |
| 1881-88 . . .  | 57                             | 185     | 128             |
| 38 years . . . | 139                            | 813     | 574             |

Since 1881 one-tenth of the imported woollen goods has been re-shipped to the Colonies or elsewhere.

This is meantime balanced by the importation of rags averaging £600,000 yearly value, not included in the above imports.

The imports and exports of woollen yarn were :—

| Period         | Millions of Lbs. Aggregate |          |                 |
|----------------|----------------------------|----------|-----------------|
|                | Imported                   | Exported | Surplus Exports |
| 1851-60 . . .  | ...                        | 203      | 203             |
| 1861-70 . . .  | 63                         | 333      | 270             |
| 1871-80 . . .  | 122                        | 334      | 212             |
| 1881-88 . . .  | 118                        | 306      | 188             |
| 38 years . . . | 303                        | 1,176    | 873             |

The statistics of woollen-factories are as follows :—

| Year       | Factories | Operatives | Spindles  | Looms   |
|------------|-----------|------------|-----------|---------|
| 1838 . . . | 1,313     | 71,300     | ...       | 5,000   |
| 1850 . . . | 1,998     | 154,000    | 2,500,000 | 42,000  |
| 1870 . . . | 2,579     | 239,000    | 4,950,000 | 113,000 |
| 1878 . . . | 2,410     | 271,000    | 6,310,000 | 146,000 |
| 1885 . . . | 2,751     | 282,000    | 6,140,000 | 140,000 |

The operatives were as follows :—

|             | 1870    | 1878    | 1888    |
|-------------|---------|---------|---------|
| Men . . .   | 96,000  | 101,000 | 113,000 |
| Women . . . | 119,000 | 139,000 | 145,000 |
| Boys . . .  | 12,000  | 15,000  | 12,000  |
| Girls . . . | 12,000  | 16,000  | 12,000  |
| Total . . . | 239,000 | 271,000 | 282,000 |

#### FRANCE

The first machinery for spinning wool was erected at Rheims in 1809, and that city now contains 330 factories. France has at present 2424 woollen factories, of which 740 are worked by steam; spindles 3,100,000, power-looms 41,000. The industry since 1820 shows thus approximately :—

| Year       | Millions of Lbs. |            |            |           | Value of Output, £ |
|------------|------------------|------------|------------|-----------|--------------------|
|            | French Wool      | Int-ported | Total Wool | Yarn Spun |                    |
| 1820 . . . | 116              | 11         | 127        | 80        | 19,800,000         |
| 1830 . . . | 130              | 15         | 145        | 96        | 20,000,000         |
| 1840 . . . | 144              | 30         | 174        | 108       | 22,000,000         |
| 1860 . . . | 150              | 121        | 271        | 136       | 31,200,000         |
| 1870 . . . | 133              | 194        | 327        | 147       | 35,800,000         |
| 1880 . . . | 117              | 255        | 372        | 155       | 33,300,000         |
| 1887 . . . | 126              | 294        | 420        | 172       | 30,800,000         |

The value of goods exported, and of those kept for home consumption, were approximately as follows :—

| Year       | Home Use, £ | Exported, £ | Total, £   |
|------------|-------------|-------------|------------|
| 1820 . . . | 18,100,000  | 1,700,000   | 19,800,000 |
| 1830 . . . | 18,800,000  | 1,200,000   | 20,000,000 |
| 1840 . . . | 19,000,000  | 3,000,000   | 22,000,000 |
| 1860 . . . | 23,700,000  | 7,500,000   | 31,200,000 |
| 1870 . . . | 25,200,000  | 10,600,000  | 35,800,000 |
| 1880 . . . | 16,500,000  | 16,800,000  | 33,300,000 |
| 1887 . . . | 15,200,000  | 15,600,000  | 30,800,000 |

The business of sixty-seven years may be stated thus :—

| Period   | Tons      |           | Value, Millions £ |               |             |
|----------|-----------|-----------|-------------------|---------------|-------------|
|          | Wool      | Spun Yarn | Wool              | Manu-factures | Net Results |
| 1821-30  | 590,000   | 370,000   | 68                | 185           | 117         |
| 1831-40  | 670,000   | 430,000   | 79                | 205           | 126         |
| 1841-50  | 850,000   | 490,000   | 86                | 233           | 147         |
| 1851-60  | 960,000   | 530,000   | 96                | 252           | 156         |
| 1861-70  | 1,280,000 | 620,000   | 111               | 325           | 214         |
| 1871-80  | 1,760,000 | 670,000   | 113               | 328           | 215         |
| 1881-87  | 1,250,000 | 510,000   | 72                | 230           | 158         |
| 67 years | 7,360,000 | 3,620,000 | 625               | 1,758         | 1,133       |

France, like Great Britain, consumes a considerable quantity of imported woollen goods. The total consumption since 1860 was :—

| Period         | Millions £ Sterling |          |       | Annual Average, £ |
|----------------|---------------------|----------|-------|-------------------|
|                | French              | Imported | Total |                   |
| 1861-70 . . .  | 245                 | 15       | 260   | 26,600,000        |
| 1871-80 . . .  | 209                 | 28       | 237   | 23,700,000        |
| 1881-87 . . .  | 111                 | 22       | 133   | 19,000,000        |
| 27 years . . . | 565                 | 65       | 630   | 23,300,000        |

## GERMANY

Woollen manufactures were of minor importance at the beginning of the century. Oddy valued the product of all Prussian woollen-mills in 1800 at £1,700,000 sterling.

The woollen industry of Germany since 1820 is summed up approximately as follows:—

| Period       | Tons      |           | Value, Millions £ |                   |     |
|--------------|-----------|-----------|-------------------|-------------------|-----|
|              | Wool      | Yarn Spun | Wool              | Manu-<br>factures | Net |
| 1821-30 . .  | 330,000   | 210,000   | 40                | 105               | 65  |
| 1831-40 . .  | 380,000   | 240,000   | 44                | 114               | 70  |
| 1841-50 . .  | 470,000   | 300,000   | 53                | 142               | 89  |
| 1851-60 . .  | 580,000   | 360,000   | 65                | 171               | 106 |
| 1861-70 . .  | 690,000   | 410,000   | 73                | 215               | 142 |
| 1871-80 . .  | 950,000   | 480,000   | 81                | 235               | 154 |
| 1881-87 . .  | 950,000   | 410,000   | 57                | 185               | 128 |
| 67 years . . | 4,350,000 | 2,410,000 | 413               | 1,167             | 754 |

A statement published in 1878 showed that the woollen-mills of Germany counted 2,000,000 spindles, the annual output being estimated at 26 millions sterling. Germany consumes imported woollen goods to the value of £500,000 per annum. The output of German woollen-factories from 1871 to 1887 is accounted for thus, approximately:—

| Period       | Millions £ |          |                 | Average<br>Home Use,<br>£ |
|--------------|------------|----------|-----------------|---------------------------|
|              | Home Use   | Exported | Total<br>Output |                           |
| 1871-80 . .  | 167        | 68       | 235             | 16,700,000                |
| 1881-87 . .  | 110        | 75       | 185             | 15,700,000                |
| 17 years . . | 277        | 143      | 420             | 16,300,000                |

## RUSSIA

The business of sixty-seven years may be summed up thus:—

| Period       | Tons<br>Wool<br>Consumed | Tons<br>Yarn<br>Spun | Value, Millions £ |                   |     |
|--------------|--------------------------|----------------------|-------------------|-------------------|-----|
|              |                          |                      | Wool              | Manu-<br>factures | Net |
| 1821-30 . .  | 420,000                  | 280,000              | 46                | 126               | 80  |
| 1831-40 . .  | 430,000                  | 290,000              | 47                | 124               | 77  |
| 1841-50 . .  | 470,000                  | 310,000              | 49                | 132               | 83  |
| 1851-60 . .  | 490,000                  | 330,000              | 54                | 141               | 87  |
| 1861-70 . .  | 520,000                  | 350,000              | 56                | 166               | 110 |
| 1871-80 . .  | 720,000                  | 480,000              | 72                | 211               | 139 |
| 1881-87 . .  | 480,000                  | 320,000              | 41                | 130               | 89  |
| 67 years . . | 3,530,000                | 2,360,000            | 365               | 1,030             | 665 |

Russia had a surplus of wool, and exported in the above period approximately the following quantity:—

| Period      | Tons    | Lbs. Yearly |
|-------------|---------|-------------|
| 1821-40 . . | 60,000  | 6,600,000   |
| 1841-70 . . | 330,000 | 24,000,000  |
| 1871-87 . . | 260,000 | 35,000,000  |

67 years . . . 650,000 . . .

In 1824 there were 324 factories, and in 1866 the number had risen to 1831, with 105,000 operatives, who turned out goods valued at 18 millions sterling.

The importation of woollen manufactures from abroad was as follows, viz.:—

| Year     | £       | Year     | £         | Year     | £         |
|----------|---------|----------|-----------|----------|-----------|
| 1860 . . | 460,000 | 1870 . . | 970,000   | 1880 . . | 1,210,000 |
| 1865 . . | 400,000 | 1875 . . | 1,600,000 | 1887 . . | 270,000   |

It appears that Russia is now almost able to supply her own needs.

## AUSTRIA

The business of sixty-seven years was approximately as follows:—

| Period       | Tons<br>Wool<br>Consumed | Tons<br>Yarn<br>Spun | Value, Millions £ |                  |     |
|--------------|--------------------------|----------------------|-------------------|------------------|-----|
|              |                          |                      | Wool              | Manu-<br>facture | Net |
| 1821-30 . .  | 270,000                  | 180,000              | 30                | 81               | 51  |
| 1831-40 . .  | 290,000                  | 200,000              | 33                | 85               | 52  |
| 1841-50 . .  | 310,000                  | 210,000              | 33                | 90               | 57  |
| 1851-60 . .  | 320,000                  | 220,000              | 35                | 93               | 58  |
| 1861-70 . .  | 320,000                  | 220,000              | 34                | 107              | 73  |
| 1871-80 . .  | 380,000                  | 250,000              | 36                | 110              | 74  |
| 1881-87 . .  | 310,000                  | 210,000              | 25                | 84               | 59  |
| 67 years . . | 2,200,000                | 1,490,000            | 226               | 650              | 424 |

In 1840 the woollen-mills of the Empire counted 100,000 operatives. Statistics for 1880 showed 657 mills, 62,000 operatives, 11,000 power-looms, 550,000 spindles, moved by 14,000 horse-power. Spallart valued the product at £12,300,000 in 1884. The disposal of the manufactures was as follows:—

|               | Yearly Average           |           |            |
|---------------|--------------------------|-----------|------------|
|               | Home Con-<br>sumption, £ | Export, £ | Total, £   |
| 1841-60 . . . | 9,100,000                | ...       | 9,100,000  |
| 1861-70 . . . | 9,100,000                | 1,600,000 | 10,700,000 |
| 1871-80 . . . | 8,800,000                | 2,200,000 | 11,000,000 |
| 1881-87 . . . | 9,700,000                | 2,300,000 | 12,000,000 |

At the same time there has been a consumption of foreign imported goods.

The total value of woollen goods consumed since 1860 has been:—

| Period       | Millions £ |          |       | Annual<br>Average,<br>£ |
|--------------|------------|----------|-------|-------------------------|
|              | Austrian   | Imported | Total |                         |
| 1861-70 . .  | 91         | 18       | 109   | 10,900,000              |
| 1871-80 . .  | 88         | 17       | 105   | 10,500,000              |
| 1881-87 . .  | 68         | 10       | 78    | 11,100,000              |
| 27 years . . | 247        | 45       | 292   | ...                     |

## ITALY

In 1860 the woollen-mills depended almost wholly on native wool, but now almost one-half is imported. The business of sixty-seven years may be estimated approximately thus:—

| Period       | Tons    |           | Value, Millions £ |                  |     |
|--------------|---------|-----------|-------------------|------------------|-----|
|              | Wool    | Yarn Spun | Wool              | Manu-<br>facture | Net |
| 1821-30 . .  | 90,000  | 60,000    | 11                | 27               | 16  |
| 1831-40 . .  | 100,000 | 65,000    | 12                | 27               | 15  |
| 1841-50 . .  | 120,000 | 75,000    | 13                | 32               | 19  |
| 1851-60 . .  | 130,000 | 80,000    | 15                | 34               | 19  |
| 1861-70 . .  | 160,000 | 95,000    | 17                | 46               | 29  |
| 1871-80 . .  | 190,000 | 115,000   | 20                | 49               | 29  |
| 1881-87 . .  | 160,000 | 95,000    | 12                | 34               | 22  |
| 67 years . . | 950,000 | 585,000   | 100               | 249              | 149 |

The consumption of wool was approximately as follows :—

| Period       | Tons    |         |         | Lbs. Yearly |
|--------------|---------|---------|---------|-------------|
|              | Italian | Foreign | Total   |             |
| 1821-60 . .  | 370,000 | 70,000  | 440,000 | 24,000,000  |
| 1861-80 . .  | 230,000 | 120,000 | 350,000 | 39,000,000  |
| 1881-87 . .  | 90,000  | 70,000  | 160,000 | 52,000,000  |
| 67 years . . | 690,000 | 260,000 | 950,000 | ...         |

Meantime the mills have been wholly insufficient to supply the needs of the country.

The total value of woollen goods consumed in Italy since 1860 was as follows :—

| Period       | Millions £ Sterling Aggregate |          |       | Annual Average, £ |
|--------------|-------------------------------|----------|-------|-------------------|
|              | Home-Made                     | Imported | Total |                   |
| 1861-70 . .  | 46                            | 21       | 67    | 6,700,000         |
| 1871-80 . .  | 49                            | 22       | 71    | 7,100,000         |
| 1881-87 . .  | 34                            | 15       | 49    | 7,000,000         |
| 27 years . . | 129                           | 58       | 187   | 6,900,000         |

It appears that not only 40 per cent. of the wool used in the country is of foreign growth, but also that one-third of the woollen goods is imported. In 1840 the kingdom of Sardinia had 62 woollen-mills, employing 5400 hands. In 1877 the kingdom of Italy counted in its woollen-factories 25,000 operatives, with 6600 looms and 305,000 spindles, the mills representing an aggregate of 7300 horse-power, of which 6200 water, the rest steam.

#### SPAIN

The business of sixty-seven years may be estimated approximately thus :—

| Period       | Tons Wool Consumed | Tons Yarn Spun | Value, Millions £ |                  |     |
|--------------|--------------------|----------------|-------------------|------------------|-----|
|              |                    |                | Wool              | Manu-<br>facture | Net |
| 1821-30 . .  | 150,000            | 100,000        | 16                | 45               | 29  |
| 1831-40 . .  | 160,000            | 110,000        | 18                | 47               | 29  |
| 1841-50 . .  | 160,000            | 110,000        | 17                | 47               | 30  |
| 1851-60 . .  | 200,000            | 130,000        | 22                | 56               | 34  |
| 1861-70 . .  | 220,000            | 150,000        | 24                | 71               | 47  |
| 1871-80 . .  | 250,000            | 170,000        | 26                | 75               | 49  |
| 1881-87 . .  | 170,000            | 110,000        | 14                | 44               | 30  |
| 67 years . . | 1,310,000          | 880,000        | 137               | 385              | 248 |

In spite of high protective duties, Spain is forced to obtain woollen manufactures in large quantities from abroad.

The consumption of Spanish and imported woollen goods since 1860 has been as follows :—

| Period       | Millions £ Sterling Aggregate |          |       | Annual Average, £ |
|--------------|-------------------------------|----------|-------|-------------------|
|              | Spanish                       | Imported | Total |                   |
| 1861-70 . .  | 71                            | 8        | 79    | 7,900,000         |
| 1871-80 . .  | 75                            | 8        | 83    | 8,300,000         |
| 1881-87 . .  | 44                            | 8        | 52    | 7,400,000         |
| 27 years . . | 190                           | 24       | 214   | ...               |

The export of Spanish wool has been as follows :—

|                    | Tons    |
|--------------------|---------|
| 1861-80 . . . . .  | 70,000  |
| 1881-87 . . . . .  | 35,000  |
| 27 years . . . . . | 105,000 |

The mills are unable to consume even the wool grown in Spain; they contain 7000 looms and 25,000 operatives.

#### PORTUGAL

The business of sixty-seven years was approximately as follows :—

| Period       | Tons Wool Consumed | Tons Yarn Spun | Value, Millions £ |                  |     |
|--------------|--------------------|----------------|-------------------|------------------|-----|
|              |                    |                | Wool              | Manu-<br>facture | Net |
| 1821-30 . .  | 20,000             | 10,000         | 2                 | 5                | 3   |
| 1831-40 . .  | 25,000             | 15,000         | 3                 | 7                | 4   |
| 1841-50 . .  | 30,000             | 20,000         | 4                 | 8                | 4   |
| 1851-60 . .  | 40,000             | 25,000         | 5                 | 11               | 6   |
| 1861-70 . .  | 50,000             | 30,000         | 6                 | 14               | 8   |
| 1871-80 . .  | 55,000             | 35,000         | 6                 | 15               | 9   |
| 1881-87 . .  | 45,000             | 30,000         | 4                 | 12               | 8   |
| 67 years . . | 265,000            | 165,000        | 30                | 72               | 42  |

Two-thirds of the wool used is native, one-third imported. Woollen goods are also imported to the value of £300,000, the total consumption of this class of goods being therefore nearly two millions sterling yearly.

#### SCANDINAVIA

The woollen industries of the three northern kingdoms collectively may be summed up approximately thus :—

| Period       | Tons Wool Consumed | Tons Yarn Spun | Value, Millions £ |                  |     |
|--------------|--------------------|----------------|-------------------|------------------|-----|
|              |                    |                | Wool              | Manu-<br>facture | Net |
| 1821-30 . .  | 60,000             | 40,000         | 7                 | 18               | 11  |
| 1831-40 . .  | 70,000             | 45,000         | 7                 | 19               | 12  |
| 1841-50 . .  | 80,000             | 50,000         | 8                 | 22               | 14  |
| 1851-60 . .  | 90,000             | 60,000         | 10                | 25               | 15  |
| 1861-70 . .  | 100,000            | 65,000         | 10                | 31               | 21  |
| 1871-80 . .  | 110,000            | 70,000         | 10                | 30               | 20  |
| 1881-87 . .  | 70,000             | 45,000         | 6                 | 18               | 12  |
| 67 years . . | 580,000            | 375,000        | 58                | 163              | 105 |

Denmark exports, and Sweden and Norway import wool. The consumption of home-made and imported goods was as follows :—

| Period      | Yearly Value, £ Sterling |           |           |
|-------------|--------------------------|-----------|-----------|
|             | Home-Made                | Imported  | Total     |
| 1861-70 . . | 3,100,000                | 800,000   | 3,900,000 |
| 1871-80 . . | 3,000,000                | 2,200,000 | 5,200,000 |
| 1881-87 . . | 2,600,000                | 2,850,000 | 5,450,000 |

The importations of woollen goods into the three kingdoms were as follows :—

|             | Yearly Value, £ |           |           |
|-------------|-----------------|-----------|-----------|
|             | 1861-70         | 1871-80   | 1881-87   |
| Sweden . .  | 220,000         | 900,000   | 1,200,000 |
| Norway . .  | 100,000         | 500,000   | 600,000   |
| Denmark . . | 500,000         | 800,000   | 1,050,000 |
| Total . .   | 820,000         | 2,200,000 | 2,850,000 |

## BELGIUM

The business of 67 years may be summed up approximately as follows :—

| Period       | Tons Wool Consumed | Tons Yarn Spun | Value, Millions £ |                   |     |
|--------------|--------------------|----------------|-------------------|-------------------|-----|
|              |                    |                | Wool              | Manu-<br>factures | Net |
| 1821-30 . .  | 35,000             | 10,000         | 2                 | 5                 | 3   |
| 1831-40 . .  | 45,000             | 15,000         | 3                 | 7                 | 4   |
| 1841-50 . .  | 75,000             | 25,000         | 5                 | 11                | 6   |
| 1851-60 . .  | 100,000            | 30,000         | 6                 | 13                | 7   |
| 1861-70 . .  | 310,000            | 100,000        | 18                | 47                | 29  |
| 1871-80 . .  | 500,000            | 170,000        | 29                | 75                | 46  |
| 1881-87 . .  | 320,000            | 110,000        | 15                | 44                | 29  |
| 67 years . . | 1,385,000          | 460,000        | 78                | 202               | 124 |

The wool is almost all imported, only 2 per cent. being Belgian. It is not, however, all made into stuffs, about one-fifth being re-exported as woollen yarn. The imports and exports of woollen goods, including yarn, showed :—

| Period      | Annual Average, £ |           |                    |
|-------------|-------------------|-----------|--------------------|
|             | Imports           | Exports   | Surplus<br>Exports |
| 1861-70 . . | 800,000           | 2,300,000 | 1,500,000          |
| 1871-80 . . | 900,000           | 3,800,000 | 2,900,000          |
| 1881-87 . . | 800,000           | 3,300,000 | 2,500,000          |

The output of the mills and the home consumption were :—

| Period      | Annual Average, £ |            |             |
|-------------|-------------------|------------|-------------|
|             | Output            | Net Export | Consumption |
| 1861-70 . . | 4,700,000         | 1,500,000  | 3,200,000   |
| 1871-80 . . | 7,500,000         | 2,900,000  | 4,600,000   |
| 1881-87 . . | 6,300,000         | 3,300,000  | 3,000,000   |

## UNITED STATES

The wool consumed was approximately as follows :—

|              | Tons      |           |           |
|--------------|-----------|-----------|-----------|
|              | American  | Imported  | Total     |
| 1821-40 . .  | 250,000   | 20,000    | 270,000   |
| 1841-60 . .  | 620,000   | 140,000   | 760,000   |
| 1861-80 . .  | 1,400,000 | 540,000   | 1,940,000 |
| 1881-87 . .  | 850,000   | 360,000   | 1,210,000 |
| 67 years . . | 3,120,000 | 1,060,000 | 4,180,000 |

## YACHTS

The number in Great Britain has been as follows :—

| Year     | Clubs | Yachts | Year     | Clubs | Yachts |
|----------|-------|--------|----------|-------|--------|
| 1853 . . | 18    | 1,046  | 1873 . . | 40    | 2,805  |
| 1863 . . | 18    | 1,348  | 1883 . . | 55    | 4,030  |

France has 9370 yachts, averaging three tons, and £61 in value : of the whole number, only 103 are steamers.

Lord Brassey's *Sunbeam* circumnavigated the globe in eleven months, from July 1876 to May 1877, making 14,465 miles by steam and 20,312 under sail, in all 34,777 miles, averaging 105 miles a day, including time in port. She was 157 feet long, 531 tons, 70 horse-power, and consumed 4 tons of coal daily, steaming 10 knots an hour. Mr. Lambert's *Wanderer* was 23 months making the tour of the globe (1880-82), but only 280 days actually at sea, having made 48,490 miles between steam and sail.

In 1840 there were 1420 mills, with 21,000 operatives, the number of the latter reaching 39,000 in 1850. The Census of 1880 showed 2689 mills, with a capital of 33 millions sterling, which had 162,000 operatives and two million spindles.

The business of sixty-seven years was approximately as follows :—

| Period       | Tons Wool Consumed | Tons Yarn Spun | Value, Millions £ |                   |     |
|--------------|--------------------|----------------|-------------------|-------------------|-----|
|              |                    |                | Wool              | Manu-<br>factures | Net |
| 1821-30 . .  | 100,000            | 60,000         | 10                | 27                | 17  |
| 1831-40 . .  | 170,000            | 100,000        | 17                | 45                | 28  |
| 1841-50 . .  | 340,000            | 190,000        | 30                | 81                | 51  |
| 1851-60 . .  | 420,000            | 210,000        | 38                | 117               | 79  |
| 1861-70 . .  | 690,000            | 350,000        | 62                | 190               | 128 |
| 1871-80 . .  | 1,250,000          | 610,000        | 101               | 282               | 181 |
| 1881-87 . .  | 1,210,000          | 590,000        | 83                | 241               | 158 |
| 67 years . . | 4,180,000          | 2,110,000      | 341               | 983               | 642 |

The consumption of woollen goods since 1840 has been approximately as follows :—

| Period       | Value, Millions £ Aggregate |          |       | Yearly<br>Average,<br>£ | Shillings<br>per<br>Inhab. |
|--------------|-----------------------------|----------|-------|-------------------------|----------------------------|
|              | American                    | Imported | Total |                         |                            |
| 1841-50 . .  | 81                          | 22       | 103   | 10,300,000              | 10.1                       |
| 1851-60 . .  | 117                         | 56       | 173   | 17,300,000              | 12.5                       |

## INDIA

In December 1889 there were four woollen mills, representing an aggregate capital of £1,200,000, with 7000 spindles and 300 looms. The consumption of wool is not stated, nor the value of products.

## WORK

Foot-Tons of Energy

|                                      |     |

## Y.

## YARN

Exports of British yarn were as follows :—

| Year     | Million Lbs. |         |                   |       | Value, £   |
|----------|--------------|---------|-------------------|-------|------------|
|          | Cotton       | Woollen | Linen<br>and Jute | Total |            |
| 1821 . . | 22           | ...     | ...               | 22    | 2,306,000  |
| 1831 . . | 64           | 2       | 1                 | 67    | 4,270,000  |
| 1841 . . | 119          | 4       | 18                | 141   | 8,362,000  |
| 1851 . . | 144          | 14      | 19                | 177   | 9,071,000  |
| 1861 . . | 178          | 28      | 28                | 234   | 14,468,000 |
| 1871 . . | 194          | 44      | 50                | 298   | 23,641,000 |
| 1881 . . | 255          | 30      | 36                | 321   | 17,693,000 |
| 1889 . . | 252          | 45      | 48                | 345   | 17,300,000 |

The prices of yarn at various dates were in pence per pound :—

| Year           | Cotton | Woollen | Linen |
|----------------|--------|---------|-------|
| 1831 . . . . . | 22     | 26      | 19    |
| 1841 . . . . . | 14     | 29      | 12    |
| 1851 . . . . . | 12     | 25      | 12    |
| 1861 . . . . . | 13     | 30      | 14    |
| 1871 . . . . . | 19     | 34      | 15    |
| 1881 . . . . . | 13     | 26      | 14    |
| 1889 . . . . . | 11     | 23      | 15    |

The consumption of imported yarn in various countries in 1888 was as follows :—

|                    | Millions of Lbs. |         |            |       |
|--------------------|------------------|---------|------------|-------|
|                    | Cotton           | Woollen | Linen, &c. | Total |
| France . . . . .   | 20               | ...     | ...        | 20    |
| Germany . . . . .  | 34               | 27      | ...        | 61    |
| Russia . . . . .   | 9                | ...     | ...        | 9     |
| Austria . . . . .  | 22               | 9       | ...        | 31    |
| Italy . . . . .    | 8                | ...     | 9          | 17    |
| Spain . . . . .    | 1                | ...     | 8          | 9     |
| Sweden . . . . .   | 3                | 3       | ...        | 6     |
| Holland . . . . .  | 20               | 1       | ...        | 21    |
| Roumania . . . . . | 9                | ...     | ...        | 9     |
| Egypt . . . . .    | 3                | ...     | ...        | 3     |
| China . . . . .    | 90               | ...     | ...        | 90    |
| Japan . . . . .    | 64               | ...     | ...        | 64    |
| Total . . . . .    | 283              | 40      | 17         | 340   |

Belgium and Switzerland produce more yarn than they require, the former exporting about 30 million lbs., the latter 16 million lbs. yearly.

## Z.

## ZINC

The production of zinc was as follows :—

|                         | Tons    |         |
|-------------------------|---------|---------|
|                         | 1880    | 1888    |
| Great Britain . . . . . | 22,000  | 27,000  |
| Belgium . . . . .       | 99,000  | 133,000 |
| Prussia . . . . .       | 64,000  | 83,000  |
| United States . . . . . | 21,000  | 50,000  |
| Spain, &c. . . . .      | 22,000  | 24,000  |
| Total . . . . .         | 228,000 | 317,000 |

The zinc industry of Great Britain is shown thus :—

| Year | Tons            |               |        |               |             | Value<br>per<br>Ton,<br>£ |
|------|-----------------|---------------|--------|---------------|-------------|---------------------------|
|      | Produc-<br>tion | Im-<br>ported | Total  | Ex-<br>ported | Home<br>Use |                           |
| 1831 | 700             | 3,800         | 4,500  | 3,100         | 1,400       | 14                        |
| 1851 | 3,900           | 18,600        | 22,500 | 4,500         | 18,000      | 21                        |
| 1871 | 4,960           | 20,930        | 25,890 | 8,060         | 17,830      | 18                        |
| 1881 | 15,950          | 46,100        | 62,050 | 10,700        | 51,350      | 15                        |
| 1889 | 9,400           | 56,400        | 65,800 | 7,700         | 58,100      | 15                        |

In the previous table Great Britain is credited with a production of 27,000 tons, but this includes 18,000 tons extracted from foreign ores imported. Not all the zinc imported is metallic, a large portion being mineral ore. Belgian ore gives 18 per cent. of metal, German 16, British 28 per cent. The production of zinc in the world has trebled since 1870. See *Mining*.

# DICTIONARY OF STATISTICS.

## PART II.

### A

#### AGES AND SEXES

THE ages of some nations have been seriously affected in the last half-century by wars, emigration, and other causes; some have grown younger, others have lost severely in the age of 20 to 50, others show a lower percentage of children, as will appear in comparison further on. The census returns of all countries for 1890-91 (Spain 1887) show the relative proportions of age as follows:—

| Age      | England | Scotland | Ireland | France | Germany | Austria | Hungary | Switzerland | Spain | Scandinavia | Holland | Belgium | Bulgaria | Japan | Australia | U. States | Average |
|----------|---------|----------|---------|--------|---------|---------|---------|-------------|-------|-------------|---------|---------|----------|-------|-----------|-----------|---------|
| Under 10 | 239     | 243      | 208     | 175    | 242     | 239     | 262     | 217         | 230   | 239         | 245     | 224     | 305      | 228   | 265       | 243       | 238     |
| 10-20    | 213     | 216      | 234     | 174    | 207     | 197     | 191     | 198         | 186   | 195         | 202     | 202     | 192      | 204   | 208       | 217       | 202     |
| 20-30    | 172     | 168      | 162     | 163    | 162     | 162     | 156     | 161         | 160   | 146         | 156     | 165     | 116      | 153   | 197       | 183       | 161     |
| 30-40    | 131     | 126      | 108     | 138    | 127     | 131     | 137     | 125         | 132   | 124         | 121     | 126     | 122      | 135   | 132       | 135       | 129     |
| 40-50    | 99      | 96       | 98      | 123    | 104     | 109     | 108     | 114         | 114   | 101         | 101     | 103     | 108      | 115   | 85        | 94        | 104     |
| 50-60    | 71      | 72       | 85      | 101    | 78      | 83      | 78      | 91          | 86    | 84          | 83      | 83      | 65       | 78    | 64        | 64        | 79      |
| 60-70    | 47      | 48       | 60      | 76     | 52      | 52      | 46      | 64          | 65    | 68          | 59      | 60      | 45       | 57    | 33        | 39        | 54      |
| Over 70  | 28      | 31       | 45      | 50     | 28      | 27      | 22      | 30          | 27    | 43          | 33      | 37      | 47       | 30    | 16        | 25        | 33      |
| Total    | 1,000   | 1,000    | 1,000   | 1,000  | 1,000   | 1,000   | 1,000   | 1,000       | 1,000 | 1,000       | 1,000   | 1,000   | 1,000    | 1,000 | 1,000     | 1,000     | 1,000   |

The ratio of children, under 10, is so low in France and Ireland as to show that either the moral or the economic condition of those countries is unsatisfactory. The average of old persons, over 60, is highest in France and Scandinavia. The age of greatest physical strength being from 20 to 60, it is important to compare the ratios of this age in various countries as follows:—

| Per 1000 Inhabitants |                    |
|----------------------|--------------------|
| France . . . 525     | Australia . . 478  |
| Spain . . . 492      | Belgium . . . 477  |
| Switzerland . 491    | U. States . . 476  |
| Austria . . . 485    | England . . . 473  |
| Japan . . . 481      | Germany . . . 471  |
|                      | Scotland . . . 462 |
|                      | Holland . . . 461  |
|                      | Scandinavia . 455  |
|                      | Ireland . . . 453  |
|                      | Bulgaria . . . 411 |

With the exception of Bulgaria there is no country where the able-bodied population stands so low as in Ireland, which in some manner accounts for the unfortunate condition of the island, and shows the direct result of emigration.

The relative smallness of the able-bodied population in Bulgaria seems to indicate that the country has not yet recovered from the effects of the massacres committed there by the Turks in 1876. The very high ratio in France is partly due to the fact that 400,000 Belgian, and 250,000 Italian, operatives have settled there.

As regard sexes, the number of females compared with males of corresponding age in the various countries is shown as follows:—

| Age       | Number of Females to 1000 Males |          |         |        |         |         |         |             |       |             |         |         |          |       |           |           |         |
|-----------|---------------------------------|----------|---------|--------|---------|---------|---------|-------------|-------|-------------|---------|---------|----------|-------|-----------|-----------|---------|
|           | England                         | Scotland | Ireland | France | Germany | Austria | Hungary | Switzerland | Spain | Scandinavia | Holland | Belgium | Bulgaria | Japan | Australia | U. States | Average |
| Under 10. | 1,008                           | 972      | 970     | 996    | 995     | 1,002   | 995     | 998         | 975   | 973         | 988     | 992     | 958      | 978   | 972       | 971       | 984     |

| 50-60     | 1,123                           | 1,208    | 1,064   | 1,025  | 1,117   | 1,103   | 1,009   | 1,122       | 1,072 | 1,123       | 1,049   | 1,025   | 862      | 980   | 693       | 922       | 1,031   |
| 60-70     | 1,180                           | 1,313    | 1,061   | 1,055  | 1,182   | 1,150   | 1,062   | 1,152       | 1,034 | 1,152       | 1,108   | 1,072   | 922      | 1,068 | 662       | 922       | 1,008   |
| Over 70   | 1,308                           | 1,653    | 1,077   | 1,137  | 1,223   | 1,094   | 1,042   | 1,137       | 1,128 | 1,311       | 1,239   | 1,194   | 973      | 1,310 | 700       | 934       | 1,153   |
| General   | 1,064                           | 1,072    | 1,029   | 1,014  | 1,040   | 1,044   | 1,015   | 1,058       | 1,040 | 1,068       | 1,024   | 1,005   | 961      | 980   | 866       | 953       | 1,015   |

There is a dearth of females in Bulgaria, Japan, and Australia, but a large surplus in England, Scotland, Switzerland, and Scandinavia. If we take the usual marrying age for women, say from 20 to 40, we find as follows:—

## MARRYING AGE

## Females to 1000 Males

|                   |                   |               |
|-------------------|-------------------|---------------|
| Scandinavia 1,127 | Switzerland 1,080 | Hungary 1,017 |
| Spain 1,118       | Ireland 1,063     | France 1,003  |
| Scotland 1,105    | Austria 1,047     | Belgium 987   |
| England 1,083     | Germany 1,034     | U. States 928 |
| Bulgaria 1,083    | Holland 1,029     | Australia 810 |

It is worthy of notice that although Bulgaria has a deficit of females there is nevertheless in that country a surplus of women of marrying age, exceeding 8 per cent. It is also remarkable that, except in France and Germany, the excess of women of marrying age is greater in all countries than the average surplus of females of all ages.

As regards changes in the ratios of sex in the last decade\* we find:—

## Number of Females to 1000 Males

|                | 1861  | 1891  |                   | 1881  | 1891  |
|----------------|-------|-------|-------------------|-------|-------|
| England . . .  | 1,053 | 1,064 | Scandinavia . . . | 1,051 | 1,068 |
| Scotland . . . | 1,079 | 1,072 | Holland . . .     | 1,023 | 1,024 |
| Ireland . . .  | 1,041 | 1,029 | Belgium . . .     | 1,002 | 1,005 |
| U. Kingdom . . | 1,053 | 1,062 | Switzerland . .   | 1,040 | 1,058 |
| France . . .   | 1,005 | 1,014 | Greece . . .      | 901   | 921   |
| Germany . . .  | 1,038 | 1,040 | United States . . | 966   | 953   |
| Austria . . .  | 1,046 | 1,044 | Canada . . .      | 968   | 965   |
| Hungary . . .  | 1,031 | 1,015 | Australia . . .   | 849   | 866   |
| Spain . . .    | 1,044 | 1,040 | Average . . .     | 1,013 | 1,016 |

It appears, therefore, that the surplus of females in general averages 3 per thousand more than was the case in 1881. And if we take only the 14 European countries we find the mean for 1891 was 1035, as against 1032 in 1881, showing in like manner an increase of 3 per thousand. Considering only the sexes of persons between 20 and 40 years of age, the surplus of females in European countries is as follows:—

|                 |         |                 |           |
|-----------------|---------|-----------------|-----------|
| England . . .   | 403,000 | Austria . . .   | 160,000   |
| Scotland . . .  | 60,000  | Hungary . . .   | 50,000    |
| Ireland . . .   | 35,000  | Spain . . .     | 196,000   |
| United Kingdom  | 498,000 | Scandinavia . . | 144,000   |
| France . . .    | 28,000  | Holland . . .   | 19,000    |
| Germany . . .   | 235,000 | Bulgaria . . .  | 30,000    |
| Switzerland . . | 32,000  | Total . . .     | 1,392,000 |

On the other hand there is a deficit of women of that age (20-40) of 14,000 in Belgium, 127,000 in Australia, 49,000 in Canada, and 690,000 in the United States, in all 880,000. If this number were to emigrate from Europe it would reduce the surplus to 512,000.

## ENGLAND AND WALES

| Age            | Number (000 omitted) |         |        | Ratio | Females to 1000 Males |
|----------------|----------------------|---------|--------|-------|-----------------------|
|                | Males                | Females | Total  |       |                       |
| Under 10 . . . | 3,461                | 3,488   | 6,949  | 239   | 1,008                 |
| 10-20 . . .    | 3,076                | 3,098   | 6,174  | 213   | 1,007                 |
| 20-30 . . .    | 2,358                | 2,638   | 4,996  | 172   | 1,119                 |
| 30-40 . . .    | 1,843                | 1,966   | 3,809  | 131   | 1,067                 |
| 40-50 . . .    | 1,388                | 1,496   | 2,884  | 99    | 1,078                 |
| 50-60 . . .    | 963                  | 1,082   | 2,045  | 71    | 1,123                 |
| 60-70 . . .    | 617                  | 728     | 1,345  | 47    | 1,180                 |
| Over 70 . . .  | 347                  | 454     | 801    | 28    | 1,308                 |
| Total pop.     | 14,053               | 14,950  | 29,003 | 1,000 | 1,064                 |

\* In 1881 the ratio in Italy was 995 females to 1000 males: in Russia the new census gives 1028 females to 1000 males.

## SCOTLAND

| Age            | Number (000 omitted) |         |       | Ratio | Females to 1000 Males |

## UNITED KINGDOM

|                |     |     |       |     |     |       |
|----------------|-----|-----|-------|-----|-----|-------|
| Under 15 . . . | 182 | 181 | 363   | 174 | 174 | 348   |
| 15-45 . . .    | 214 | 229 | 443   | 220 | 236 | 456   |
| 45-55 . . .    | 40  | 44  | 84    | 42  | 46  | 88    |
| Over 55 . . .  | 51  | 59  | 110   | 49  | 59  | 108   |
| Total . . .    | 487 | 513 | 1,000 | 485 | 515 | 1,000 |

Comparing the last census with the preceding, we find that the ratio of young people under 15 has fallen very notably in the three kingdoms, especially in Ireland. As a necessary consequence the proportion of persons between 15 and 45 has risen: the ratio of this class has risen 3 per cent. in Ireland, the same in England, and 1½ per cent. in Scotland. Persons between 45 and 55 have risen in ratio both in England and Ireland, but fallen in Scotland. Finally, those over 55 show a relative decline in England, but a rise in the sister kingdoms. This last class is much greater in Ireland than in Great Britain. When we consider sexes we find the preponderance of females has increased in England, while it has declined in Scotland and Ireland. Taking the United Kingdom as a whole, the excess of the female population is now 62 per thousand, as compared with 53 per thousand in 1881. This cannot be the result of emigration, seeing that in Ireland the sexes are less unequal. If we limit our observation to persons between 15 and 45, we find the preponderance of females is 77 per thousand in England, 69 in Scotland, and 50 per thousand in Ireland. Altogether, the proportion of women between 15 and 45 in the United Kingdom is 3 per cent. higher now than in 1881, and yet the birth-rate has fallen remarkably.

## FRANCE

The ratios of population by four censuses were:—

| Age            | 1841  | 1861  | 1881  | 1891  |
|----------------|-------|-------|-------|-------|
| Under 10 . . . | 185   | 186   | 183   | 175   |
| 10-20 . . .    | 176   | 169   | 170   | 174   |
| 20-30 . . .    | 163   | 164   | 158   | 163   |
| 30-40 . . .    | 148   | 144   | 137   | 138   |
| 40-50 . . .    | 125   | 125   | 123   | 123   |
| 50-60 . . .    | 102   | 101   | 103   | 101   |
| Over 60 . . .  | 101   | 111   | 126   | 126   |
| Total . . .    | 1,000 | 1,000 | 1,000 | 1,000 |

The ratio of persons between 30 and 40 is 4 per cent. less than it was in 1861, probably the result of the Franco-German war. The ratio of persons over 60 has risen 25 per cent.

## GERMANY

The census of 1891 compares with that of 1871 as follows:—

| Age            | Number (000 omitted) |        |          | Ratio |       |
|----------------|----------------------|--------|----------|-------|-------|
|                | 1871                 | 1891   | Increase | 1871  | 1891  |
| Under 20 . . . | 17,850               | 22,175 | 4,325    | 435   | 449   |
| 20-40 . . .    | 12,220               | 14,309 | 2,089    | 298   | 289   |
| 40-60 . . .    | 7,790                | 9,000  | 1,210    | 190   | 182   |
| Over 60 . . .  | 3,160                | 3,944  | 784      | 77    | 80    |
| Total pop. . . | 41,020               | 49,428 | 8,408    | 1,000 | 1,000 |

The class which shows the greatest increase is that of persons under 20, which grew 24 per cent. in 20 years, while the rest of the population rose only 17 per cent. At present Germany has 449, France only 349, per thousand of her population under 20 years of age. The German census of 1891 compares with that of 1885 as follows:—

| Age            | Number (000 omitted) |        |         |        |
|----------------|----------------------|--------|---------|--------|
|                | Males                |        | Females |        |
|                | 1885                 | 1891   | 1885    | 1891   |
| Under 20 . . . | 10,490               | 11,099 | 10,510  | 11,076 |
| 20-40 . . .    | 6,585                | 7,037  | 6,880   | 7,272  |
| 40-60 . . .    | 4,100                | 4,299  | 4,465   | 4,701  |
| Over 60 . . .  | 1,760                | 1,796  | 2,065   | 2,148  |
| Total pop. . . | 22,935               | 24,231 | 23,920  | 25,197 |

The changes which took place in the composition of the nation as regards sex were as follows:—

| Age            | Number of Females to 1000 Males |       |
|----------------|---------------------------------|-------|
|                | 1885                            | 1891  |
| Under 20 . . . | 1,002                           | 998   |
| 20-40 . . .    | 1,045                           | 1,033 |
| 40-60 . . .    | 1,089                           | 1,093 |
| Over 60 . . .  | 1,173                           | 1,196 |
| General . . .  | 1,044                           | 1,040 |

The surplus of females under 40 years of age has diminished, but over 40 it has increased, and on the whole it is 4 per thousand less than it was in 1885.

## AUSTRIA

The census of Austria (without Hungary) in 1890 compares with that of 1880 as follows:—

| Age            | Number (000 omitted) |        |         |        |
|----------------|----------------------|--------|---------|--------|
|                | Males                |        | Females |        |
|                | 1880                 | 1890   | 1880    | 1890   |
| Under 20 . . . | 4,770                | 5,181  | 4,845   | 5,249  |
| 20-40 . . .    | 3,190                | 3,427  | 3,365   | 3,587  |
| 40-60 . . .    | 2,045                | 2,197  | 2,245   | 2,371  |
| Over 60 . . .  | 815                  | 884    | 870     | 1,000  |
| Total pop. . . | 10,820               | 11,689 | 11,325  | 12,207 |

# AGES AND SEXES

612

# AGES AND SEXES

The changes as regards sex are shown as follows :—

| Age                | Number of Females to 1000 Males |       |
|--------------------|---------------------------------|-------|
|                    | 1880                            | 1890  |
| Under 20 . . . . . | 1,016                           | 1,013 |
| 20-40 . . . . .    | 1,055                           | 1,047 |
| 40-60 . . . . .    | 1,008                           | 1,079 |
| Over 60 . . . . .  | 1,067                           | 1,131 |
| General . . . . .  | 1,046                           | 1,044 |

The surplus of females declined 2 per thousand in 10 years.

## SWITZERLAND

The composition of the Swiss population was as follows :—

| Age                | 1880  |         |       | 1888  |         |       |
|--------------------|-------|---------|-------|-------|---------|-------|
|                    | Males | Females | Total | Males | Females | Total |
| Under 20 . . . . . | 281   | 285     | 566   | 284   | 291     | 575   |
| 20-40 . . . . .    | 167   | 179     | 346   | 158   | 172     | 330   |
| Over 60 . . . . .  | 42    | 46      | 88    | 44    | 51      | 95    |
| Total . . . . .    | 490   | 510     | 1,000 | 486   | 514     | 1,000 |

The surplus of females has gone up from 40 to 58 per thousand, and it is to be observed that the ratio of persons between 30 and 60 years has declined very seriously, while that of old people, over 60, shows a rise of 8 per cent.

## SPAIN

The census of 1887 compares with previous ones thus :—

| Age                | 1846  | 1860  | 1887  |
|--------------------|-------|-------|-------|
| Under 20 . . . . . | 442   | 420   | 416   |
| 20-40 . . . . .    | 322   | 343   | 292   |
| 40-60 . . . . .    | 179   | 179   | 200   |
| Over 60 . . . . .  | 57    | 58    | 92    |
| Total pop. . . . . | 1,000 | 1,000 | 1,000 |

The classes under 40 show a startling decline, which may be the result of emigration or of civil wars, and is unfortunate.

## SCANDINAVIA

The three northern kingdoms have undergone the following changes in 20 years :—

| Age                | Sweden |       | Norway |       | Denmark |       |
|--------------------|--------|-------|--------|-------|---------|-------|
|                    | 1870   | 1890  | 1870   | 1890  | 1870    | 1890  |
| Under 20 . . . . . | 431    | 423   | 434    | 450   | 422     | 437   |
| 20-40 . . . . .    | 312    | 270   | 310    | 263   | 310     | 278   |
| 40-60 . . . . .    | 179    | 193   | 166    | 174   | 184     | 182   |
| Over 60 . . . . .  | 78     | 114   | 90     | 113   | 84      | 103   |
| Total pop. . . . . | 1,000  | 1,000 | 1,000  | 1,000 | 1,000   | 1,000 |

These kingdoms show a marked decline in the ratio of persons between 20 and 60 years of age, and a corresponding increase in that of old people.

## HOLLAND

The census of 1889 compares with previous ones thus :—

| Age                | 1849  | 1869  | 1889  |
|--------------------|-------|-------|-------|
| Under 20 . . . . . | 425   | 427   | 447   |
| 20-40 . . . . .    | 308   | 309   | 277   |
| 40-60 . . . . .    | 188   | 187   | 181   |
| Over 60 . . . . .  | 79    | 77    | 92    |
| Total pop. . . . . | 1,000 | 1,000 | 1,000 |

Here, as in most countries, the ratio of old people has risen remarkably.

## AUSTRALIA

The census of 1891 gave the following result :—

| Age                | Number (000 omitted) |          |            |            |              |          |              |
|--------------------|----------------------|----------|------------|------------|--------------|----------|--------------|
|                    | N. S. Wales          | Victoria | N. Zealand | Queensland | S. Australia | Tasmania | W. Australia |
| Under 10 . . . . . | 308                  | 278      | 169        | 107        | 89           | 41       | 12           |
| 10-20 . . . . .    | 230                  | 232      | 146        | 74         | 69           | 30       | 9            |
| 20-30 . . . . .    | 218                  | 243      | 104        | 85         | 58           | 28       | 11           |
| 30-40 . . . . .    | 156                  | 146      | 76         | 58         | 43           | 19       | 8            |
| 40-50 . . . . .    | 99                   | 87       | 60         | 36         | 27           | 11       | 5            |
| 50-60 . . . . .    | 64                   | 81       | 44         | 23         | 19           | 8        | 3            |
| 60-70 . . . . .    | 32                   | 51       | 19         | 8          | 11           | 5        | 2            |
| Over 70 . . . . .  | 17                   | 22       | 9          | 3          | 4            | 5        | 1            |
| Total pop. . . . . | 1,124                | 1,140    | 627        | 394        | 320          | 147      | 50           |

## Ratio

| Age                | 1842 | 1855 | 83  | 48  | 41 | 19 | 5  |
|--------------------|------|------|-----|-----|----|----|----|
| Under 20 . . . . . | 142  | 135  | 83  | 48  | 41 | 19 | 5  |
| 20-40 . . . . .    | 98   | 102  | 47  | 37  | 27 | 13 | 5  |
| 40-60 . . . . .    | 43   | 44   | 27  | 16  | 12 | 5  | 2  |
| Over 60 . . . . .  | 12   | 19   | 8   | 3   | 4  | 2  | 1  |
| Total . . . . .    | 295  | 300  | 165 | 104 | 84 | 39 | 13 |

The distribution of sexes in the colonies was as follows :—

|                           | Males     | Females   | Females to 1000 Males |
|---------------------------|-----------|-----------|-----------------------|
| New South Wales . . . . . | 608,000   | 516,000   | 849                   |
| Victoria . . . . .        | 598,000   | 542,000   | 907                   |
| New Zealand . . . . .     | 333,000   | 294,000   | 883                   |
| Queensland . . . . .      | 224,000   | 170,000   | 760                   |
| South Australia . . . . . | 167,000   | 154,000   | 922                   |
| Tasmania . . . . .        | 78,000    | 69,000    | 885                   |
| West Australia . . . . .  | 30,000    | 20,000    | 667                   |
| Total . . . . .           | 2,038,000 | 1,765,000 | 866                   |

## BELGIUM

The census of 1890 compares with previous ones thus :—

| Age                | 1846  | 1856  | 1880  | 1890  |
|--------------------|-------|-------|-------|-------|
| Under 10 . . . . . | 225   | 206   | 235   | 224   |
| 10-20 . . . . .    | 188   | 191   | 192   | 202   |
| 20-30 . . . . .    | 166   | 165   | 154   | 165   |
| 30-40 . . . . .    | 135   | 140   | 127   | 126   |
| 40-50 . . . . .    | 118   | 116   | 107   | 103   |
| 50-60 . . . . .    | 78    | 94    | 86    | 83    |
| 60-70 . . . . .    | 55    | 55    | 59    | 60    |
| Over 70 . . . . .  | 35    | 33    | 40    | 37    |
| Total . . . . .    | 1,000 | 1,000 | 1,000 | 1,000 |

Persons between 20 and 40 stand in much lower ratio than they did 40 years ago, but this class has improved

since 1880. It is probably affected by the large number of Belgian operatives who go into France, to avoid military service.

# UNITED STATES

The census of 1890 compares with the preceding one thus :—

| Age            | Number (000 omitted) |        | Ratio |       |
|----------------|----------------------|--------|-------|-------|
|                | 1880                 | 1890   | 1880  | 1890  |
| Under 10 . . . | 13,394               | 15,209 | 267   | 243   |
| 10-20 . . . .  | 10,727               | 13,592 | 214   | 217   |
| 20-30 . . . .  | 9,168                | 11,424 | 183   | 183   |
| 30-40 . . . .  | 6,309                | 8,444  | 126   | 135   |
| 40-50 . . . .  | 4,558                | 5,918  | 91    | 94    |
| 50-60 . . . .  | 3,111                | 3,999  | 62    | 64    |
| 60-70 . . . .  | 1,830                | 2,469  | 36    | 39    |
| Over 70 . . .  | 1,059                | 1,567  | 21    | 25    |
| Total pop. .   | 50,156               | 62,622 | 1,000 | 1,000 |

The class of children under 10 shows a relative decline of 9 per cent., while all classes over 30 years of age show a notable rise.

# AGRICULTURE

The productive area in 1895 was approximately as follows :—

|                    | Millions of Acres |         |       | Acres per 100 Inhabitants |
|--------------------|-------------------|---------|-------|---------------------------|
|                    | Crops             | Pasture | Total |                           |
| Great Britain .    | 16                | 17      | 33    | 91                        |
| Ireland . . .      | 4                 | 11      | 15    | 330                       |
| France . . . .     | 67                | 23      | 90    | 230                       |
| Germany . . .      | 65                | 22      | 87    | 170                       |

| United States .    | 226               | 397     | 623   | 890                       |

As a general rule two productive acres are required for the support of each inhabitant, and where this ratio does not exist food must be imported. It appears, thus, that Great Britain, Germany, and Italy are over-populated, while Russia, Spain, and Ireland have not sufficient inhabitants. The production of food in various countries may be compared by reducing all to a common denominator, that is considering 100 gallons of wine or 3 tons of potatoes as equal to a ton of grain, and one of meat equal to 8 of grain. In 1894-96 the production, on the said basis, averaged as follows :—

|               | Tons Yearly of Food |             |             | Tons per Farming-hand |
|---------------|---------------------|-------------|-------------|-----------------------|
|               | Grain               | Sundries    | Total       |                       |
| U. Kingdom .  | 7,500,000           | 10,900,000  | 18,400,000  | 7.2                   |
| France . . .  | 18,100,000          | 22,700,000  | 40,800,000  | 5.7                   |
| Germany . .   | 18,600,000          | 23,500,000  | 42,100,000  | 5.3                   |
| Russia . . .  | 53,000,000          | 23,700,000  | 76,700,000  | 2.2                   |
| Austria . .   | 19,500,000          | 14,100,000  | 33,600,000  | 2.7                   |
| Italy . . . . | 6,700,000           | 10,600,000  | 17,300,000  | 2.2                   |
| Spain . . . . | 5,800,000           | 9,900,000   | 15,700,000  | 3.8                   |
| Denmark . .   | 2,100,000           | 1,200,000   | 3,300,000   | 8.2                   |
| Holland . .   | 1,100,000           | 1,700,000   | 2,800,000   | 6.1                   |
| Europe . . .  | 145,200,000         | 132,000,000 | 277,200,000 | 3.2                   |
| U. States . . | 89,400,000          | 41,400,000  | 130,800,000 | 14.5                  |

Considering merely the weight of food produced, it appears that one farming hand in the United States raises as much as two in the United Kingdom, three in Germany, five in Austria, or seven in Russia. There is, in fact, a prodigious waste of labour in most countries of Europe. The number of farmers and farm-labourers in Europe is just nine times that of the United States, while the weight of food raised is only double; that is to say, it takes 4½ Europeans to raise as much food as an American. The production of grain in 1892-95 averaged as follows :—

|                 | Millions of Bushels |       |         |       | Bushels per acre |
|-----------------|---------------------|-------|---------|-------|------------------|
|                 | Wheat               | Oats  | Various | Total |                  |
| U. Kingdom .    | 49                  | 167   | 85      | 301   | 34               |
| France . . . .  | 303                 | 216   | 205     | 724   | 20               |
| Germany . . .   | 122                 | 176   | 384     | 682   | 18               |
| Russia . . . .  | 322                 | 590   | 1,208   | 2,120 | 12               |

| Total . . . .   | 1,981               | 2,458 | 5,261   | 9,700 | 18               |

If the grain crops of India, Asia Minor, &c., were added to the above (say 600 million bushels), the total would be a little over 10 milliards of bushels or 250 million tons; nearly double the quantity raised 40 years ago. This is, of course, exclusive of rice. The following table shows the approximate weight :—

|                  | Millions of Bushels yearly |         |          |
|------------------|----------------------------|---------|----------|
|                  | 1851-60                    | 1892-95 | Increase |
| Europe . . . .   | 4,150                      | 5,733   | 1,583    |
| United States .  | 1,050                      | 3,575   | 2,525    |
| Colonies . . . . | 60                         | 392     | 332      |
| Total . . . .    | 5,260                      | 9,700   | 4,440    |

Levasseur's table of wheat production in Europe shows :—

|                       | Millions of Bushels yearly |         |         |
|-----------------------|----------------------------|---------|---------|
|                       | 1831-40                    | 1876-82 | 1885-90 |
| United Kingdom . . .  | 119                        | 91      | 77      |
| France . . . . .      | 188                        | 279     | 304     |
| Germany . . . . .     | 50                         | 102     | 108     |
| Russia . . . . .      | 110                        | 276     | 268     |
| Austria . . . . .     | 64                         | 138     | 171     |
| Italy . . . . .       | 36                         | 141     | 121     |
| Spain . . . . .       | 58                         | 168     | 86      |
| Portugal . . . . .    | 4                          | 10      | 6       |
| Scandinavia . . . . . | 4                          | 8       | 10      |
| Holland . . . . .     | ...                        | 6       | 6       |
| Belgium . . . . .     | 8                          | 22      | 19      |

| Switzerland . . .      | 100                 | 100     | 2               | 2     |
| Roumania, &c. . .      | 6,300               | 7,500   | 17              | 146   |
| Europe . . .           | 92,000              | 95,000  | 1,170           | 1,420 |
| United States . . .    | 27,600              | 34,600  | 290             | 430   |
| Canada . . .           | 2,200               | 2,700   | 30              | 50    |
| Australia . . .        | 1,800               | 4,500   | 24              | 30    |
| Argentina . . .        | 300                 | 5,200   | 6               | 50    |
| India . . .            | 20,000              | 21,800  | 200             | 220   |
| Various . . .          | 10,100              | 14,200  | 160             | 200   |
| The World . . .        | 154,000             | 178,000 | 1,880           | 2,400 |

The average product per acre at the two periods was as follows :—

|                          | Bushels per Acre |      |
|--------------------------|------------------|------|
|                          | 1876             | 1896 |
| United Kingdom . . .     | 26               | 33   |
| European Continent . . . | 12               | 15   |
| United States . . .      | 11               | 12½  |
| Other countries . . .    | 12               | 11   |
| The World . . .          | 12               | 13½  |

The average wheat crop of the world for 14 years (1880-93) was in millions of bushels as follows :— Europe, 1270; United States, 440; India, 260; other countries, 210; total, 2180. See report of United States Agricultural Department.

Wheat constitutes one-fourth of the grain crop of Europe, one-fifth of that of the world. Taking the average yield of all grain per acre, the heaviest ratio falls to Ireland.

The various countries show as follows :—

| Bushels of Grain per Acre |    |                 |    |
|---------------------------|----|-----------------|----|
| Ireland . . .             | 38 | Sweden . . .    | 27 |
| Germany . . .             | 18 | Germany . . .   | 18 |
| Great Britain . . .       | 33 | U. States . . . | 24 |
| Roumania . . .            | 15 | Belgium . . .   | 31 |
| Canada . . .              | 20 | Russia . . .    | 12 |
| Holland . . .             | 31 | France . . .    | 20 |
| Italy . . .               | 11 | Denmark . . .   | 28 |
| Austria . . .             | 19 | Spain . . .     | 11 |

The percentage of area under grain in the various countries has a wide range, being influenced by climate, soil, population, and other circumstances, viz :—

| Acres under Grain in 100 of Area |    |                 |    |
|----------------------------------|----|-----------------|----|
| Ireland . . .                    | 7  | Spain . . .     | 17 |
| Germany . . .                    | 29 | U. States . . . | 8  |
| Holland . . .                    | 18 | Italy . . .     | 29 |
| Great Britain . . .              | 13 | France . . .    | 28 |
| Denmark . . .                    | 32 | Russia . . .    | 13 |
| Austria . . .                    | 28 | Belgium . . .   | 33 |

The production of grain compared with population is as follows :—

| Bushels per Inhabitant |    |                 |    |
|------------------------|----|-----------------|----|
| Great Britain . . .    | 7  | Belgium . . .   | 12 |
| France . . .           | 19 | Italy . . .     | 7  |
| Germany . . .          | 13 | Russia . . .    | 20 |
| Holland . . .          | 9  | Spain . . .     | 13 |
| Denmark . . .          | 42 | Ireland . . .   | 12 |
| Austria . . .          | 19 | U. States . . . | 54 |

The area devoted to pasture in various parts of the world is :—

|                     | Millions of Acres | Cattle,* Millions | Acres per Head |
|---------------------|-------------------|-------------------|----------------|
| Europe . . .        | 527               | 172               | 3.1            |
| United States . . . | 397               | 76                | 5.2            |
| Australia . . .     | 802               | 35                | 23.0           |
| Argentina . . .     | 238               | 41                | 5.8            |
| Total . . .         | 1,701             | 324               | 5.2            |

One hundred acres of pasture land will carry about 200 sheep or 33 horned cattle. An acre of artificial grasses or turnips will maintain 6 sheep or one head of cattle. In Australia, however, the pasture is usually so poor that 100 acres will carry only 100 sheep or 16 big cattle; in Argentina, on the other hand, the average is 300 sheep or 50 cattle per 100 acres.

The annual production of meat exceeds 15 million tons, and of this amount Europe stands for more than 60 per cent., viz :—

|                    | Tons      |           |           |            |
|--------------------|-----------|-----------|-----------|------------|
|                    | Beef      | Mutton    | Pork      | Total      |
| U. Kingdom . . .   | 590,000   | 320,000   | 190,000   | 1,100,000  |
| France . . .       | 700,000   | 210,000   | 290,000   | 1,200,000  |
| Germany . . .      | 880,000   | 150,000   | 490,000   | 1,520,000  |
| Russia . . .       | 1,380,000 | 480,000   | 430,000   | 2,290,000  |
| Austria . . .      | 710,000   | 140,000   | 360,000   | 1,210,000  |
| Other States . . . | 1,045,000 | 608,000   | 407,000   | 2,060,000  |
| Europe . . .       | 5,305,000 | 1,908,000 | 2,167,000 | 9,380,000  |
| U. States . . .    | 2,410,000 | 370,000   | 2,050,000 | 4,830,000  |
| Colonies . . .     | 500,000   | 295,000   | 85,000    | 880,000    |
| Total . . .        | 8,215,000 | 2,573,000 | 4,302,000 | 15,090,000 |

The live stock of Europe in 1896 compares with Moreau's tables for 1838 as follows :—

| Year       | Millions |        |       |      |
|------------|----------|--------|-------|------|
|            | Horses   | Cattle | Sheep | Pigs |
| 1838 . . . | 26       | 71     | 185   | 43   |
| 1896 . . . | 39       | 105    | 176   | 53   |

\* The unit is a horse or a cow, and sheep are counted as six for one.

The live stock of the United States showed as follows :—

| Year           | Millions |        |       |      |
|----------------|----------|--------|-------|------|
|                | Horses   | Cattle | Sheep | Pigs |
| 1840 . . . . . | 4        | 15     | 19    | 26   |
| 1870 . . . . . | 8        | 24     | 29    | 25   |
| 1897 . . . . . | 17       | 47     | 37    | 41   |

The value of all farm products in the years 1891-95 averaged as follows :—

|                      | Millions £ |         |       | Shillings per Acre |
|----------------------|------------|---------|-------|--------------------|
|                      | Tillage    | Pasture | Total |                    |
| United Kingdom . .   | 126        | 104     | 230   | 96                 |
| France . . . . .     | 284        | 132     | 416   | 92                 |
| Germany . . . . .    | 262        | 155     | 417   | 96                 |
| Russia . . . . .     | 370        | 170     | 540   | 18                 |
| Austria . . . . .    | 215        | 109     | 324   | 76                 |
| Other States . . . . | 417        | 226     | 643   | 61                 |
| Europe . . . . .     | 1,674      | 896     | 2,570 | 47                 |
| United States . . .  | 486        | 327     | 813   | 45                 |

The value of farm products at four different periods in the nineteenth century is shown approximately in the following table :—

|                     | Before 1840 |            | 1850-63 |            | 1874-84 |            | 1891-1896  |
|---------------------|-------------|------------|---------|------------|---------|------------|------------|
|                     | Year        | Millions £ | Year    | Millions £ | Year    | Millions £ | Millions £ |
| Great Britain . . . | 1836        | 158        | 1855    | 221        | 1878    | 196        | 175        |
| Ireland . . . . .   | 1836        | 69         | 1855    | 72         | 1878    | 65         | 55         |
| United Kingdom . .  | 1836        | 227        | 1855    | 293        | 1878    | 261        | 230        |
| France . . . . .    | 1825        | 253        | 1862    | 440        | 1882    | 504        | 416        |

| Australia . . . . . | 1836        | 3          | 1860    | 20         | 1880    | 56         | 70         |
| Argentina . . . . . | 1836        | 5          | 1860    | 15         | 1880    | 31         | 45         |
| South Africa . . .  | 1836        | 1          | 1860    | 2          | 1880    | 7          | 8          |
| Uruguay . . . . .   | 1836        | 2          | 1860    | 5          | 1880    | 7          | 8          |
| Total . . . . .     |             | 1,530      |         | 2,503      |         | 3,506      | 3,530      |

In Europe there was a steady rise of agricultural values from 1820 till 1874-5, but a decline set in about 1878, since which year there has been a fall of about 200 millions, or 8 per cent. On the other hand the United States have had a rise of 10 per cent. since 1880.

The amount of agricultural capital in 1891-96 was approximately as follows :—

|                     | Value, Millions £ Sterling |        |          |        |
|---------------------|----------------------------|--------|----------|--------|
|                     | Land                       | Cattle | Sundries | Total  |
| Great Britain . . . | 1,390                      | 143    | 153      | 1,686  |
| Ireland . . . . .   | 296                        | 59     | 36       | 391    |
| France . . . . .    | 2,580                      | 232    | 281      | 3,093  |

| Belgium . . . . .   | 300                        | 22     | 32       | 354    |
| Switzerland . . . . | 138                        | 18     | 16       | 172    |
| Danubian States . . | 420                        | 42     | 46       | 508    |
| Greece . . . . .    | 94                         | 5      | 10       | 109    |
| Europe . . . . .    | 13,812                     | 1,579  | 1,539    | 16,930 |
| United States . . . | 3,314                      | 451    | 377      | 4,142  |
| Canada . . . . .    | 245                        | 43     | 23       | 311    |
| Australia . . . . . | 236                        | 120    | 36       | 392    |
| Argentina . . . . . | 129                        | 51     | 18       | 198    |
| Total . . . . .     | 17,736                     | 2,245  | 1,992    | 21,973 |

Agricultural capital almost reaches 22 milliards sterling, and as the aggregate wealth of nations is a little over 70 milliards, the former may be said to represent one-third of the total. If we would compare the gross value of farm products yearly with the amount of capital, the result will be as follows :—

| Percentage on Capital |      |                   |      |                     |      |
|-----------------------|------|-------------------|------|---------------------|------|
| U. Kingdom . . . .    | 11.1 | Italy . . . . .   | 14.5 | Switzerland . . . . | 11.6 |
| France . . . . .      | 13.4 | Spain . . . . .   | 11.2 | U. States . . . . . | 19.6 |
| Germany . . . . .     | 16.6 | Denmark . . . .   | 13.8 | Canada . . . . .    | 18.4 |
| Russia . . . . .      | 19.9 | Holland . . . . . | 12.4 | Australia . . . . . | 17.1 |
| Austria . . . . .     | 17.7 | Belgium . . . . . | 12.5 | Argentina . . . . . | 23.2 |

Agricultural capital divided among population gives the ratios per inhabitant thus :—

| £ per Head         |    |                   |     |                     |    |
|--------------------|----|-------------------|-----|---------------------|----|
| U. Kingdom . . . . | 53 | Italy . . . . .   | 45  | Belgium . . . . .   | 50 |
| France . . . . .   | 80 | Spain . . . . .   | 68  | U. States . . . . . | 58 |
| Germany . . . . .  | 48 | Portugal . . . .  | 35  | Canada . . . . .    | 60 |
| Russia . . . . .   | 26 | Denmark . . . .   | 115 | Australia . . . . . | 92 |
| Austria . . . . .  | 41 | Holland . . . . . | 61  | Argentina . . . . . | 50 |

The relative importance of agriculture in the several countries is shown by the proportions of wealth, earnings, and population corresponding to this pursuit, viz. :—

|                     | Percentage of Agricultural, in total |        |          |
|---------------------|--------------------------------------|--------|----------|
|                     | Population                           | Wealth | Earnings |
| Great Britain . . . | 10                                   | 15     | 8        |
| Ireland . . . . .   | 45                                   | 60     | 35       |
| France . . . . .    | 42                                   | 32     | 21       |
| Germany . . . . .   | 39                                   | 31     | 20       |
| Russia . . . . .    | 70                                   | 43     | 32       |
| Austria . . . . .   | 62                                   | 39     | 27       |
| Italy . . . . .     | 52                                   | 45     | 28       |
| Holland . . . . .   | 22                                   | 33     | 18       |
| Belgium . . . . .   | 25                                   | 36     | 14       |
| United States . . . | 35                                   | 25     | 16       |
| Canada . . . . .    | 43                                   | 31     | 18       |
| Australia . . . . . | 25                                   | 36     | 20       |
| Average . . . . .   | 40                                   | 31     | 20       |

Viewed simply as a money-making occupation, agriculture is by no means so profitable as other pursuits, for while it represents broadly about 40 per cent. of the population and 31 per cent. of the wealth, it stands for only 20 per cent. of the earnings of nations. Agricultural interests stand highest in Russia and Ireland, lowest in Great Britain and Holland.

## UNITED KINGDOM

The returns of 1897 show the productive area to be nearly 48 million acres or 62 per cent. of the total, viz. :—

|                 | Acres (ooo omitted) |          |         |          |
|-----------------|---------------------|----------|---------|----------|
|                 | England             | Scotland | Ireland | U. King. |
| Wheat . . .     | 1,840               | 50       | 50      | 1,940    |
| Oats . . .      | 2,090               | 970      | 1,170   | 4,230    |
| Barley, &c. . . | 2,280               | 250      | 190     | 2,720    |
| All grain . . . | 6,210               | 1,270    | 1,410   | 8,830    |
| Potatoes . . .  | 390                 | 120      | 680     | 1,190    |
| Turnips . . .   | 1,360               | 480      | 310     | 2,150    |
| Sundries . . .  | 4,650               | 1,630    | 1,440   | 7,720    |
| All crops . . . | 12,610              | 3,500    | 3,840   | 19,950   |
| Pasture . . .   | 15,150              | 1,390    | 11,380  | 27,920   |
| Total . . .     | 27,760              | 4,890    | 15,220  | 47,870   |

The crops of the United Kingdom in the last 3 years were :—

|                       | 1895       | 1896       | 1897       |
|-----------------------|------------|------------|------------|
| Wheat, tons . . .     | 960,000    | 1,460,000  | 1,410,000  |
| Oats, " . . .         | 4,360,000  | 4,070,000  | 4,090,000  |
| Barley, &c., " . . .  | 2,120,000  | 2,220,000  | 2,110,000  |
| All grain, " . . .    | 7,440,000  | 7,750,000  | 7,610,000  |
| Potatoes, " . . .     | 7,060,000  | 6,250,000  | 4,110,000  |
| Turnips, &c., " . . . | 35,600,000 | 33,000,000 | 37,200,000 |
| Hay, " . . .          | 12,200,000 | 11,400,000 | 14,100,000 |
| Total . . .           | 62,300,000 | 59,300,000 | 63,020,000 |

The crops of 1897 were 6 per cent. less in weight than those of 1894. The average yield per acre for the last three years was as follows :—

|                     | Great Britain | Ireland | United Kingdom |
|---------------------|---------------|---------|----------------|
| Wheat, bushel . . . | 30            | 30      | 30             |
| Oats, " . . .       | 37            | 41      | 38             |
| Barley, " . . .     | 33            | 37      | 34             |
| Potatoes, " . . .   | 240           | 146     | 187            |
| Turnips, cwt. . .   | 262           | 288     | 266            |
| Hay, " . . .        | 24            | 43      | 28             |

Irish crops are, as a rule, much heavier than those of Great Britain, the only exception being potatoes, which in Ireland rarely give 4 tons per acre, whereas in Great Britain the average is 6 tons. The most remarkable difference is as regards hay, the yield per acre in Ireland being always double what it is in Great Britain.

The crops of the last 10 years gave the following yield per acre for the United Kingdom.

| Year       | Bushels per Acre |        |      |           |
|------------|------------------|--------|------|-----------|
|            | Wheat            | Barley | Oats | All Grain |
| 1887 . . . | 32               | 31     | 34   | 33        |
| 1888 . . . | 28               | 33     | 38   | 34        |
| 1889 . . . | 30               | 32     | 40   | 35        |
| 1890 . . . | 31               | 35     | 42   | 37        |
| 1891 . . . | 31               | 35     | 40   | 36        |
| 1892 . . . | 26               | 35     | 40   | 35        |
| 1893 . . . | 26               | 29     | 38   | 32        |
| 1894 . . . | 31               | 35     | 42   | 38        |
| 1895 . . . | 26               | 32     | 39   | 34        |
| 1896 . . . | 34               | 34     | 38   | 36        |
| 1897 . . . | 30               | 33     | 39   | 35        |

A comparison of the value of farm products at present with M'Culloch's estimates in 1846 and Caird's in 1878 results as follows :—

|                     | 1846<br>£   | 1878<br>£   | 1896<br>£   |
|---------------------|-------------|-------------|-------------|
| Grain . . .         | 77,000,000  | 87,000,000  | 38,200,000  |
| Hay and straw . . . | 19,000,000  | 22,000,000  | 44,000,000  |
| Potatoes, &c. . .   | 41,600,000  | 16,700,000  | 43,800,000  |
| Meat . . .          | 46,500,000  | 87,000,000  | 55,200,000  |
| Dairy . . .         | 19,400,000  | 39,500,000  | 33,000,000  |
| Sundries . . .      | 14,500,000  | 8,500,000   | 15,800,000  |
| Total . . .         | 218,000,000 | 260,700,000 | 230,000,000 |

M'Culloch's valuation for 1846 was made up for the three kingdoms as follows :—

|                     | Millions £ Sterling |          |         |          |
|---------------------|---------------------|----------|---------|----------|
|                     | England             | Scotland | Ireland | U. King. |
| Grain . . .         | 51.8                | 9.7      | 15.5    | 77.0     |
| Hay and straw . . . | 13.0                | 2.4      | 3.6     | 19.0     |
| Green crops . . .   | 28.7                | 5.3      | 7.6     | 41.6     |
| Meat . . .          | 26.0                | 6.3      | 14.2    | 46.5     |
| Dairy . . .         | 13.4                | 2.4      | 3.6     | 19.4     |
| Sundries . . .      | 9.1                 | 1.9      | 3.5     | 14.5     |
| Total . . .         | 142.0               | 28.0     | 48.0    | 218.0    |

The value of all farm products is now about the same as 60 years ago, viz. :—

| Year       | Millions £ Sterling |          |         |          |
|------------|---------------------|----------|---------|----------|
|            | England             | Scotland | Ireland | U. King. |
| 1836 . . . | 136.1               | 23.2     | 60.3    | 226.6    |
| 1846 . . . | 142.0               | 28.0     | 48.0    | 218.0    |
| 1895 . . . | 147.0               | 28.0     | 55.0    | 230.0    |

The estimate for 1836 was made by Moreau, that for 1846 by M'Culloch.

The mean value in the years 1893-95 was as follows :—

|                | Millions £ Sterling |          |         |          |
|----------------|---------------------|----------|---------|----------|
|                | England             | Scotland | Ireland | U. King. |
| Grain . . .    | 26.6                | 5.2      | 6.4     | 38.2     |
| Straw . . .    | 9.1                 | 1.5      | 1.6     | 12.2     |
| Potatoes . . . | 8.8                 | 2.4      | 7.0     | 18.2     |
| Hay . . .      | 20.3                | 2.1      | 9.4     | 31.8     |
| Sundries . . . | 18.2                | 3.8      | 3.6     | 25.6     |
| Tillage . . .  | 83.0                | 15.0     | 28.0    | 126.0    |
| Meat . . .     | 33.2                | 7.4      | 14.6    | 55.2     |
| Dairy . . .    | 21.0                | 3.6      | 8.4     | 33.0     |
| Sundries . . . | 9.8                 | 2.0      | 4.0     | 15.8     |
| Total . . .    | 147.0               | 28.0     | 55.0    | 230.0    |

The value of products compared with the number of hands, according to last census, shows as follows :—

|                      | Hands     | £           | £ per Hand |
|----------------------|-----------|-------------|------------|
| England . . .        | 1,337,000 | 147,000,000 | 110        |
| Scotland . . .       | 249,000   | 28,000,000  | 112        |
| Ireland . . .        | 941,000   | 55,000,000  | 58         |
| United Kingdom . . . | 2,527,000 | 230,000,000 | 91         |

There seems to be a great waste of labour in Ireland, since it takes two hands in that island to produce as much value as one in Great Britain. Moreover the value of yield per acre of productive area is comparatively low in Ireland, viz. :—

|                    | Acres      | £           | Shillings per Acre |
|--------------------|------------|-------------|--------------------|
| England . . . . .  | 27,800,000 | 147,000,000 | 106                |
| Scotland . . . . . | 4,900,000  | 28,000,000  | 114                |
| Ireland . . . . .  | 15,200,000 | 55,000,000  | 72                 |
| United Kingdom . . | 47,900,000 | 230,000,000 | 96                 |

Although the weight of crops per acre is heavier in Ireland, the gross value of product is less than in Great Britain, because the great markets of consumption are in the latter island. The gross product per acre of productive area in the United Kingdom is 4 shillings more than in France. Agricultural capital in the United Kingdom has declined about 450 millions sterling in 15 years, say 30 millions per annum, viz. :—

| Year           | Millions £ |        |          |       |
|----------------|------------|--------|----------|-------|
|                | Land       | Cattle | Sundries | Total |
| 1880 . . . . . | 2,086      | 209    | 230      | 2,525 |
| 1895 . . . . . | 1,686      | 202    | 189      | 2,077 |

Agricultural capital in the three kingdoms stands approximately as follows :—

|                    | Millions £ |        |          |       |
|--------------------|------------|--------|----------|-------|
|                    | Land       | Cattle | Sundries | Total |
| England . . . . .  | 1,202      | 118    | 132      | 1,452 |
| Scotland . . . . . | 188        | 25     | 21       | 234   |
| Ireland . . . . .  | 296        | 59     | 36       | 391   |
| United Kingdom . . | 1,686      | 202    | 189      | 2,077 |

The value of agricultural product after deducting rent and taxes in the three kingdoms is as follows :—

|                   | England, £  | Scotland, £ | Ireland, £ |
|-------------------|-------------|-------------|------------|
| Product . . . . . | 147,000,000 | 28,000,000  | 55,000,000 |
| Rent . . . . .    | 40,100,000  | 6,300,000   | 10,800,000 |
| Taxes . . . . .   | 16,200,000  | 1,900,000   | 2,700,000  |
| Balance . . . . . | 90,700,000  | 19,800,000  | 41,500,000 |

The balance gives the following averages as to productive area and hands :—

|                    | Shillings per Acre | £ per Hand |
|--------------------|--------------------|------------|
| England . . . . .  | 65                 | 68         |
| Scotland . . . . . | 81                 | 80         |
| Ireland . . . . .  | 54                 | 44         |
| United Kingdom . . | 64                 | 60         |

Pastoral industry has increased as follows :—

|                  | Great Britain |            | Ireland   |            |
|------------------|---------------|------------|-----------|------------|
|                  | 1855          | 1897       | 1855      | 1897       |
| Horses . . . . . | 1,490,000     | 1,540,000  | 550,000   | 530,000    |
| Cattle . . . . . | 4,390,000     | 6,540,000  | 3,560,000 | 4,460,000  |
| Sheep . . . . .  | 24,370,000    | 26,410,000 | 3,600,000 | 4,160,000  |
| Pigs . . . . .   | 2,510,000     | 2,350,000  | 1,180,000 | 1,330,000  |
| Total . . . . .  | 32,760,000    | 36,840,000 | 8,890,000 | 10,480,000 |

Thus the total live stock of the United Kingdom has risen from 41½ to 47 millions, an increase of 14 per cent. in 41 years, whereas population increased 40 per cent. in the same interval. Agricultural matters are also treated under the items of *Food Supply* and *Land*.

FRANCE

There has been little variation of agricultural area in the last 16 years, except as regards vineyards, which have suffered severely from phylloxera :—

|                      | 1880       | 1896       |
|----------------------|------------|------------|
| Wheat, acres . . . . | 16,990,000 | 16,970,000 |
| Oats " . . . . .     | 8,580,000  | 9,670,000  |
| Rye, &c. " . . . .   | 11,440,000 | 9,320,000  |
| All grain " . . . .  | 37,010,000 | 35,960,000 |
| Vineyards " . . . .  | 5,450,000  | 4,360,000  |
| Beetroot " . . . .   | 1,110,000  | 1,630,000  |
| Potatoes " . . . .   | 3,220,000  | 3,810,000  |

While the area under grain is not much larger than it was 40 years ago, the system of agriculture has so much improved that the weight of crop is one-fourth heavier, viz. :—

|                     | Crop, Tons |            | Bushels per Acre |      |
|---------------------|------------|------------|------------------|------|
|                     | 1855       | 1895       | 1855             | 1896 |
| Wheat . . . . .     | 5,300,000  | 8,200,000  | 13.0             | 19.4 |
| Oats, &c. . . . .   | 9,800,000  | 10,800,000 | 19.6             | 22.8 |
| All grain . . . . . | 15,100,000 | 19,000,000 | 16.8             | 21.1 |

The area and crops of the last five years (1892-96) gave the following averages :—

|                     | Acres      | Bushels     | Bush. per Ac. |
|---------------------|------------|-------------|---------------|
| Wheat . . . . .     | 17,200,000 | 313,000,000 | 18.2          |
| Oats . . . . .      | 9,600,000  | 234,000,000 | 24.4          |
| Rye . . . . .       | 3,800,000  | 67,000,000  | 17.6          |
| Barley . . . . .    | 2,200,000  | 44,000,000  | 20.0          |
| Various . . . . .   | 3,600,000  | 66,000,000  | 18.0          |
| All grain . . . . . | 36,400,000 | 723,000,000 | 19.9          |

The devastation caused by phylloxera resulted in the loss of 1,900,000 acres of vineyard :—

| Year              | Acres, Vines | Million Galls. Wine | Gallons per Acre |
|-------------------|--------------|---------------------|------------------|
| 1871 . . . . .    | 6,040,000    | 1,300               | 215              |
| 1891 . . . . .    | 4,410,000    | 660                 | 150              |
| 1895 . . . . .    | 4,150,000    | 590                 | 142              |
| 1891-95 . . . . . | 4,370,000    | 770                 | 176              |

The average vintage during 40 years before the phylloxera was 140 gallons per acre, so that it may be said the present area of vineyards gives a fair crop (176 gallons per acre). Most of the destroyed vineyards have been laid down under potatoes or beetroot, the area of which has increased by one-fourth, viz. :—

|                    | 1880      | 1895      | Increase, Ac. |
|--------------------|-----------|-----------|---------------|
| Potatoes . . . . . | 3,220,000 | 3,810,000 | 590,000       |
| Beetroot . . . . . | 1,110,000 | 1,630,000 | 520,000       |
|                    | 4,330,000 | 5,440,000 | 1,110,000     |

Pastoral industry is stationary, as official returns show :—

| Year         | Cattle     | Sheep      | Pigs      |
|--------------|------------|------------|-----------|
| 1885 . . . . | 13,100,000 | 24,100,000 | 5,880,000 |
| 1890 . . . . | 13,560,000 | 23,200,000 | 6,020,000 |
| 1896 . . . . | 13,330,000 | 21,200,000 | 6,400,000 |

The value of agricultural products has fallen heavily in recent years, notwithstanding protective tariffs and other futile measures, viz. :—

|                     | Millions £ Sterling |      | 1895 |
|---------------------|---------------------|------|------|
|                     | 1886                | 1890 |      |
| Grain . . . .       | 129                 | 120  | 114  |
| Wine . . . .        | 49                  | 45   | 33   |
| Other crops . . . . | 104                 | 106  | 120  |
| Meat . . . .        | 60                  | 65   | 56   |
| Dairy . . . .       | 59                  | 46   | 46   |
| Sundries . . . .    | 59                  | 56   | 47   |
| Total . . . .       | 460                 | 438  | 416  |

De Foville would include dung among agricultural products, and estimates the annual quantity at 100 million tons, worth about 40 millions sterling; it is, however, excluded by all statisticians. The loss of agricultural capital since 1880 has been even greater than in the United Kingdom, averaging 32 millions sterling per annum, viz. :—

| Year         | Millions £ |        |          |       |
|--------------|------------|--------|----------|-------|
|              | Land       | Cattle | Sundries | Total |
| 1880 . . . . | 2,986      | 231    | 357      | 3,574 |
| 1895 . . . . | 2,580      | 232    | 281      | 3,093 |

Although agriculture occupies 44 per cent. of the population, France has to import both grain and meat. See *Food Supply*.

#### GERMANY

The cultivated area has almost doubled in 40 years, viz. :—

| Year         | Cultivated | Uncultivated | Total, Acres |
|--------------|------------|--------------|--------------|
| 1856 . . . . | 35,330,000 | 93,710,000   | 129,040,000  |
| 1896 . . . . | 65,200,000 | 68,300,000   | 133,500,000  |

The progress of agriculture in the last 15 years is shown thus :—

|                   | Acres (000 omitted) |         | Crop, Tons (000 omitted) |         |
|-------------------|---------------------|---------|--------------------------|---------|
|                   | 1880-82             | 1894-96 | 1880-82                  | 1894-96 |
| Wheat . . . .     | 4,490               | 4,910   | 2,280                    | 2,900   |
| Rye . . . .       | 14,620              | 14,800  | 5,500                    | 6,950   |
| Oats, &c. . . .   | 14,830              | 18,240  | 7,020                    | 8,750   |
| All grain . . . . | 33,940              | 37,950  | 14,800                   | 18,600  |
| Potatoes . . . .  | 6,830               | 7,500   | 21,100                   | 31,000  |
| Beetroot . . . .  | 1,250               | 2,120   | 12,600                   | 20,300  |
| Hay . . . .       | 14,600              | 14,600  | 18,200                   | 17,200  |
| Various . . . .   | 1,280               | 2,980   | 3,100                    | 9,500   |
| Total . . . .     | 57,900              | 65,150  | 69,800                   | 96,600  |

The area under crops has risen 12 per cent. since 1882. The average weight of crop per acre (excluding hay) was 31 cwt. (1.55 ton) in the last 3 years, as compared with 24 cwt. in 1880-82; that is to say, an improvement of 30 per cent. Nevertheless agriculture is backward: only 48 per cent. of the empire is under cultivation, although as many hands are employed as in the United States. The production of food is equivalent to 5 tons for each farming-hand, against 15 tons in the United States. Germany has to subsist on imported grain for two months every year. Notwithstanding the density of population, live stock (excepting sheep) is increasing in numbers :—

| Year         | Horses    | Cattle     | Sheep      | Pigs       |
|--------------|-----------|------------|------------|------------|
| 1873 . . . . | 3,350,000 | 15,780,000 | 25,200,000 | 7,120,000  |
| 1893 . . . . | 3,840,000 | 17,560,000 | 16,700,000 | 12,170,000 |

The value of farm products has almost doubled since the valuation by Block and Viebahn in 1856, and now reaches 417 millions sterling, viz. :—

|                  | Millions £* |         |              |         |
|------------------|-------------|---------|--------------|---------|
|                  | Prussia     | Bavaria | Other States | Germany |
| Grain . . . .    | 65.0        | 12.4    | 31.8         | 109.2   |
| Potatoes . . . . | 41.8        | 8.6     | 13.2         | 63.6    |
| Hay . . . .      | 20.4        | 3.5     | 4.1          | 28.0    |
| Roots, &c. . . . | 38.0        | 8.3     | 14.9         | 61.2    |
| Meat . . . .     | 37.8        | 9.4     | 15.8         | 63.0    |
| Dairy . . . .    | 35.9        | 8.9     | 15.2         | 60.0    |
| Sundries . . . . | 19.1        | 4.9     | 8.0          | 32.0    |
| Total . . . .    | 258.0       | 56.0    | 103.0        | 417.0   |

Prussia is less productive than some of the other German states, and stands for only 60 per cent. of the value of farm products, while she has 65 per cent. of the productive area of the empire. The agricultural capital of Germany is nearly 600 millions sterling less than that of France, and is made up thus :—

|                  | Millions £ |         |              |         |
|------------------|------------|---------|--------------|---------|
|                  | Prussia    | Bavaria | Other States | Germany |
| Land . . . .     | 1,252      | 264     | 461          | 1,977   |
| Cattle . . . .   | 187        | 46      | 70           | 303     |
| Sundries . . . . | 144        | 31      | 53           | 228     |
| Total . . . .    | 1,583      | 341     | 584          | 2,508   |

Dividing the amount among the number of farms, we find a ratio of £840 to each farm in Germany, as compared with £880 in France, £3200 in England, and £760 in Ireland. The agricultural capital and products of Germany, France, and the United Kingdom may be compared thus :—

|                        | Millions £ Sterling |         | £ per Inhabitant |         |
|------------------------|---------------------|---------|------------------|---------|
|                        | Capital             | Product | Capital          | Product |
| Germany . . . .        | 2,508               | 417     | 48               | 8       |
| France . . . .         | 3,093               | 416     | 80               | 11      |
| United Kingdom . . . . | 2,077               | 230     | 53               | 6       |

The quota of agricultural product to each farming hand is only £44 in Germany, against £58 in France and £91 in the United Kingdom.

\* The table is read thus: 65.0 means £65,000,000, and 12.4 means £12,400,000.

## RUSSIA

Official returns for 1892 show that the emancipation of the serfs has caused the farming area to be almost doubled in twenty years, viz. :—

|                      | Millions of Acres |       |
|----------------------|-------------------|-------|
|                      | 1872              | 1892  |
| Farming area . . . . | 305               | 589   |
| Forests, &c. . . . . | 939               | 752   |
| Total . . . . .      | 1,244             | 1,341 |

In the above table Poland is included, as also in the following statement of grain. The averages for 1893-1895 were :—

|                   | Millions of Bushels |        |             |
|-------------------|---------------------|--------|-------------|
|                   | Crop                | Export | Consumption |
| Wheat . . . . .   | 330                 | 135    | 195         |
| Rye . . . . .     | 780                 | 44     | 736         |
| Oats . . . . .    | 650                 | 46     | 594         |
| Various . . . . . | 450                 | 125    | 335         |
| Total . . . . .   | 2,210               | 350    | 1,860       |

The value of grain exported in the said three years averaged 34 millions sterling. The crops of Russia proper and Poland averaged separately as follows :—

|                     | Millions of Bushels |        |       |
|---------------------|---------------------|--------|-------|
|                     | Russia              | Poland | Total |
| Wheat . . . . .     | 314                 | 16     | 330   |
| Rye . . . . .       | 728                 | 52     | 780   |
| Oats . . . . .      | 605                 | 45     | 650   |
| Barley, &c. . . . . | 427                 | 23     | 450   |
| Total . . . . .     | 2,074               | 136    | 2,210 |

Later years show a great decline in Russian crops. The following table refers to Russia proper, exclusive of Poland :—

|                     | Millions of Bushels |       |       |         |
|---------------------|---------------------|-------|-------|---------|
|                     | 1895                | 1896  | 1897  | Average |
| Wheat . . . . .     | 232                 | 218   | 180   | 210     |
| Rye . . . . .       | 658                 | 622   | 506   | 595     |
| Oats . . . . .      | 545                 | 506   | 405   | 485     |
| Barley, &c. . . . . | 250                 | 262   | 233   | 248     |
| Total . . . . .     | 1,685               | 1,608 | 1,324 | 1,541   |

Consumption is accounted for in this way : 360 million bushels kept for seed, 440 million given to cattle, and 900 million used for human food, an average of 8½ bushels per inhabitant : this last includes not only what is used for bread but also what is made into Vodka brandy and beer. The production of wine has increased so rapidly that the vintage reaches 55 million gallons, being 120 gallons to the acre. The production of meat is approximately 2,300,000 tons yearly, including 250,000 tons in Poland. The census of 1888 compared with that of 1877 showed a decline of 10 per cent. in cattle and 15 per cent. both in sheep and in pigs, which was perhaps owing to the rapid increase of population and conse-

quently greater consumption of meat. The census of 1888 showed as follows :—

|                  | Russia     | Poland    | Total       |
|------------------|------------|-----------|-------------|
| Horses . . . . . | 19,700,000 | 1,200,000 | 20,900,000  |
| Cattle . . . . . | 24,600,000 | 3,000,000 | 27,600,000  |
| Sheep . . . . .  | 44,500,000 | 3,700,000 | 48,200,000  |
| Pigs . . . . .   | 9,200,000  | 1,500,000 | 10,700,000  |
| Total . . . . .  | 98,000,000 | 9,400,000 | 107,400,000 |

The area covered by the principal crops in 1895 was approximately :—

|                       | Acres       |            |             |
|-----------------------|-------------|------------|-------------|
|                       | Russia      | Poland     | Total       |
| Grain . . . . .       | 161,300,000 | 9,200,000  | 170,500,000 |
| Potatoes . . . . .    | 5,820,000   | 1,750,000  | 7,570,000   |
| Flax and hemp . . . . | 4,680,000   | ...        | 4,680,000   |
| Hay, &c. . . . .      | 116,200,000 | 2,250,000  | 118,450,000 |
| Total . . . . .       | 288,000,000 | 13,600,000 | 301,600,000 |

The value of agricultural products in 1894 was approximately :—

|                    | Millions £ Sterling |        |       |
|--------------------|---------------------|--------|-------|
|                    | Russia              | Poland | Total |
| Grain . . . . .    | 242                 | 16     | 258   |
| Potatoes . . . . . | 16                  | 5      | 21    |
| Flax, &c. . . . .  | 14                  | ...    | 14    |
| Hay . . . . .      | 46                  | 2      | 48    |
| Sundries . . . . . | 26                  | 6      | 32    |
| Meat . . . . .     | 77                  | 10     | 87    |
| Dairy, &c. . . . . | 74                  | 9      | 83    |
| Total . . . . .    | 495                 | 48     | 543   |

The above gives an average gross product per acre of 34 shillings in Russia and 70 in Poland. This, however, is exclusive of 290 million acres used for permanent pasture, and if these were brought into account the average yield on the whole farming area of Russia and Poland would be only 18 shillings per acre. The agricultural capital of the empire has more than doubled since the emancipation of the serfs, showing approximately as follows :—

| Year           | Millions £ Sterling |        |          |       |
|----------------|---------------------|--------|----------|-------|
|                | Land                | Cattle | Sundries | Total |
| 1870 . . . . . | 798                 | 320    | 112      | 1,230 |
| 1895 . . . . . | 2,113               | 360    | 247      | 2,720 |

The capital in 1895 stood more or less as follows :—

|                  | Millions £ Sterling |        |          |       |
|------------------|---------------------|--------|----------|-------|
|                  | Land                | Cattle | Sundries | Total |

See *Food, Land.*

## AUSTRIA-HUNGARY

The area under crops in the whole monarchy showed the following averages:—

|                    | Acres      |            |
|--------------------|------------|------------|
|                    | 1881-83    | 1893-95    |
| Grain . . . . .    | 35,400,000 | 41,200,000 |
| Potatoes . . . . . | 3,450,000  | 4,020,000  |
| Beetroot . . . . . | 710,000    | 1,600,000  |
| Vines . . . . .    | 1,440,000  | 1,300,000  |
| Sundries . . . . . | 2,200,000  | 4,180,000  |
| Total . . . . .    | 43,200,000 | 53,300,000 |

The only branch of agriculture which shows a decline is vineyards, while the area of grain has increased at the rate of half a million acres yearly since 1883. The two portions of the monarchy stood in 1893-95 as follows:—

|                    | Acres      |            |            |
|--------------------|------------|------------|------------|
|                    | Austria    | Hungary    | Monarchy   |
| Grain . . . . .    | 17,140,000 | 24,060,000 | 41,200,000 |
| Vines . . . . .    | 620,000    | 680,000    | 1,300,000  |
| Roots, &c. . . . . | 6,740,000  | 4,060,000  | 10,800,000 |
| Total . . . . .    | 24,500,000 | 28,800,000 | 53,300,000 |

The average crops in the same three years were as follows:—

|                     | Tons       |            |            |
|---------------------|------------|------------|------------|
|                     | Austria    | Hungary    | Total      |
| Wheat . . . . .     | 1,070,000  | 3,830,000  | 4,900,000  |
| Oats . . . . .      | 2,520,000  | 1,780,000  | 4,300,000  |
| Rye, &c. . . . .    | 4,110,000  | 6,090,000  | 10,200,000 |
| All grain . . . . . | 7,700,000  | 11,700,000 | 19,400,000 |
| Potatoes . . . . .  | 9,100,000  | 3,300,000  | 12,400,000 |
| Beetroot . . . . .  | 7,500,000  | 4,500,000  | 12,000,000 |
| Hay . . . . .       | 10,800,000 | 8,200,000  | 19,000,000 |
| Total . . . . .     | 35,100,000 | 27,700,000 | 62,800,000 |

Nearly one-third of the monarchy is still under forest, viz., 24 million acres in Austria and 23 millions in Hungary. Austria does not raise enough food for her population, the deficit being met by the surplus in Hungary.

Pastoral industry seems to make no progress; the latest returns give a total of 40 million head of live stock, as compared with 45 millions in 1870. At present the returns show as follows:—

|                  | Austria    | Hungary    | Total      |
|------------------|------------|------------|------------|
| Horses . . . . . | 1,580,000  | 1,750,000  | 3,330,000  |
| Cattle . . . . . | 8,040,000  | 4,880,000  | 13,520,000 |
| Sheep . . . . .  | 4,230,000  | 13,870,000 | 15,100,000 |
| Pigs . . . . .   | 3,550,000  | 4,800,000  | 8,350,000  |
| Total . . . . .  | 18,000,000 | 22,300,000 | 40,300,000 |

The gross value of farming products is approximately as follows:—

|                       | Millions £ Sterling |         |       |
|-----------------------|---------------------|---------|-------|
|                       | Austria             | Hungary | Total |
| Grain . . . . .       | 48                  | 72      | 120   |
| Green crops . . . . . | 59                  | 36      | 95    |
| Meat . . . . .        | 26                  | 25      | 51    |
| Dairy, &c. . . . .    | 37                  | 21      | 58    |
| Total . . . . .       | 170                 | 154     | 324   |

The productive area of the whole monarchy, including 32 million acres of permanent pasture, is 85,400,000 acres, and the value of products averages 76 shillings per acre, as compared with 92 shillings in France. In half a century the agricultural capital has almost trebled, mainly owing to the emancipation of the serfs, viz.:—

| Year           | Millions £ Sterling |        |          |       |
|----------------|---------------------|--------|----------|-------|
|                | Land                | Cattle | Sundries | Total |
| 1840 . . . . . | 543                 | 50     | 59       | 652   |
| 1894 . . . . . | 1,473               | 161    | 163      | 1,797 |

In 1894 the two kingdoms stood approximately as follows:—

|                    | Austria | Hungary | Total |
|--------------------|---------|---------|-------|
| Land . . . . .     | 796     | 677     | 1,473 |
| Cattle . . . . .   | 88      | 73      | 161   |
| Sundries . . . . . | 88      | 75      | 163   |
| Total . . . . .    | 972     | 825     | 1,797 |

In 1885 the whole monarchy contained 6,150,000 farms. Each farm, therefore, represents a capital of £290, and a gross annual product of £52, the bulk of the peasants being poor, while the princely land-owners of Hungary and Bohemia possess enormous wealth.

## ITALY

A great portion of the kingdom consists of mountains, forests, or waste lands, but so indefatigable is the Italian peasantry that in 15 years nearly 5 million acres have been reclaimed, the arable and the uncultivated areas showing as follows:—

|                      | Acres      |            |           |
|----------------------|------------|------------|-----------|
|                      | 1880       | 1895       | Increase  |
| Grain . . . . .      | 20,300,000 | 20,500,000 | 200,000   |
| Vines . . . . .      | 4,800,000  | 8,500,000  | 3,700,000 |
| Olives . . . . .     | 2,200,000  | 2,600,000  | 400,000   |
| Sundries . . . . .   | 12,200,000 | 12,600,000 | 400,000   |
| Tillage . . . . .    | 39,500,000 | 44,200,000 | 4,700,000 |
| Pasture, &c. . . . . | 31,300,000 | 26,600,000 | ...       |
| Total . . . . .      | 70,800,000 | 70,800,000 | ...       |

Grain crops are light, seldom exceeding 13 bushels per acre, the average for 3 years ending 1895 having been as follows:—

|                     | Acres      | Tons      | Bushels per Acre |
|---------------------|------------|-----------|------------------|
| Wheat . . . . .     | 11,300,000 | 3,030,000 | 10.7             |
| Maize . . . . .     | 4,750,000  | 1,720,000 | 14.5             |
| Oats, &c. . . . .   | 4,380,000  | 1,050,000 | 9.5              |
| All grain . . . . . | 20,430,000 | 5,800,000 | 11.3             |

The production of wine in the last 3 years has averaged 580 million gallons, or about 70 gallons per acre, against 176 in France, the Italian vintage rarely giving a higher average than 90 gallons per acre. Rice cultivation shows a remarkable falling off, the crop ranging from 350,000 to 400,000 tons, which is barely two-thirds of what it was 15 years ago, and this circumstance causes much dissatisfaction, as the growth of rice is a most unhealthy occupation. In order to convey a correct idea of the agricultural industry, it may be well to give here the old territorial divisions as they now stand in tillage area, approximately, thus:—

|                           | Acres (000 omitted) |       |          |        |
|---------------------------|---------------------|-------|----------|--------|
|                           | Grain               | Wine  | Sundries | Total  |
| Venice . . . . .          | 2,100               | 1,050 | 1,350    | 4,480  |
| Lombardy . . . . .        | 2,050               | 500   | 1,420    | 3,970  |
| Piedmont . . . . .        | 1,820               | 750   | 1,830    | 4,400  |
| Duchies . . . . .         | 2,400               | 1,650 | 2,150    | 6,200  |
| Papal States . . . . .    | 3,600               | 2,050 | 2,550    | 8,200  |
| Naples . . . . .          | 5,800               | 1,600 | 3,900    | 11,300 |
| Sicily . . . . .          | 2,200               | 720   | 1,580    | 4,500  |
| Sardinia Island . . . . . | 530                 | 180   | 240      | 950    |
| Total . . . . .           | 20,500              | 8,500 | 15,000   | 44,000 |

The acreage under grain is made up as follows (000 omitted):—

|                           | Wheat  | Maize | Oats, &c. | Total  |
|---------------------------|--------|-------|-----------|--------|
| Venice . . . . .          | 750    | 1,030 | 320       | 2,100  |
| Lombardy . . . . .        | 730    | 830   | 490       | 2,050  |
| Piedmont . . . . .        | 770    | 480   | 570       | 1,820  |
| Duchies . . . . .         | 1,480  | 550   | 390       | 2,400  |
| Papal States . . . . .    | 2,180  | 930   | 490       | 3,600  |
| Naples . . . . .          | 3,240  | 960   | 1,500     | 5,800  |
| Sicily . . . . .          | 1,650  | 20    | 530       | 2,200  |
| Sardinia Island . . . . . | 400    | 20    | 110       | 530    |
| Total . . . . .           | 11,300 | 4,800 | 4,400     | 20,500 |

Sundries include hay, green crops, olive groves, &c., as follows, in acres (000 omitted):—

|                           | Hay   | Olives | Green Crops | Total  |
|---------------------------|-------|--------|-------------|--------|
| Venice . . . . .          | 670   | ...    | 660         | 1,330  |
| Lombardy . . . . .        | 990   | ...    | 430         | 1,420  |
| Piedmont . . . . .        | 890   | 150    | 790         | 1,830  |
| Duchies . . . . .         | 870   | 300    | 980         | 2,150  |
| Papal States . . . . .    | 1,190 | 330    | 1,030       | 2,550  |
| Naples . . . . .          | 510   | 1,440  | 1,950       | 3,900  |
| Sicily . . . . .          | 670   | 330    | 580         | 1,580  |
| Sardinia Island . . . . . | 110   | 50     | 80          | 240    |
| Total . . . . .           | 5,900 | 2,600  | 6,500       | 15,000 |

The official valuation of farm products is only 176 millions sterling, but this is exclusive of hay. The total value appears to be 208 millions sterling, viz:—

|                          | Official, £ | Real, £     |
|--------------------------|-------------|-------------|
| Grain . . . . .          | 53,400,000  | 53,400,000  |
| Wine . . . . .           | 33,500,000  | 33,500,000  |
| Hay . . . . .            | ...         | 26,700,000  |
| Fruit, &c. . . . .       | 9,600,000   | 15,200,000  |
| Meat, dairy, &c. . . . . | 79,000,000  | 79,200,000  |
| Total . . . . .          | 175,500,000 | 208,000,000 |

The productive area, including 9 million acres of permanent pasture, covers 53 million acres; the value of products therefore averages 77 shillings per acre, against 92 in France. The number of hands engaged in farming

is 7,800,000, which leaves the average product for each hand only £27, as compared with £58 in France.

Agricultural capital has trebled since 1840, viz:—

| Year           | Millions £ |        |          |       |
|----------------|------------|--------|----------|-------|
|                | Land       | Cattle | Sundries | Total |
| 1840 . . . . . | 377        | 30     | 41       | 448   |
| 1890 . . . . . | 1,180      | 92     | 127      | 1,399 |

The agricultural resources of Italy are so insufficient for her population that the average importation of grain reaches 700,000 tons yearly. See *Food, Land*.

#### SPAIN

Official returns for 1888 show 41 million acres under grain, equivalent to a crop of at least 10 million tons, which would leave a surplus of 3 million tons for exportation. We find, however, that so far from any surplus there is an average deficit of 330,000 tons, which is covered by importation. This shows that the official return is a gross exaggeration. The *Uebersichten* of 1893 estimates the aggregate crop at 5 million tons, Spallart's estimate having been 8 millions, and the actual production appears to be under 6 million tons. Hence it will be evident that the statement of Spanish agriculture in Part I. of this volume is altogether too high. The area of the kingdom is 125,300,000 acres, of which 72,100,000 consist of mountain and forests, the rest being apparently as shown in the following table:—

|                       | Area, Acres |                          | Product, £  |
|-----------------------|-------------|--------------------------|-------------|
| Grain . . . . .       | 20,800,000  | Grain . . . . .          | 39,200,000  |
| Vineyards . . . . .   | 4,200,000   | Wine . . . . .           | 33,600,000  |
| Other crops . . . . . | 7,200,000   | Sundries . . . . .       | 21,200,000  |
| Pasture . . . . .     | 21,000,000  | Meat, dairy, &c. . . . . | 41,200,000  |
| Total . . . . .       | 53,200,000  | Total . . . . .          | 135,200,000 |

This gives an average of 51 shillings per acre, against 77 shillings in Italy, but the product per hand is greater in Spain, namely £33, against £27 in Italy. As regards the production of wine, Spain holds third rank among nations, the vintage being usually one-fifth less than that of Italy, or about one-half that of France: in 1895 and 1896 the average was 420 million gallons. The growth of agricultural capital has been retarded by civil wars, the increase having been less than 50 per cent. in 60 years, viz:—

| Year           | Millions £ Sterling |        |          |       |
|----------------|---------------------|--------|----------|-------|
|                | Land                | Cattle | Sundries | Total |
| 1832 . . . . . | 724                 | 34     | 76       | 834   |
| 1892 . . . . . | 1,056               | 46     | 110      | 1,212 |

Dividing the above capital among the number of farms, it gives an average of £444 each, as compared with £880 in France. See *Cattle, Food, Land*.

#### PORTUGAL

The total area under crops is less than 4 million acres, or one-fifth of the kingdom, viz:—

|                       | Area, Acres | Product, £ |
|-----------------------|-------------|------------|
| Grain . . . . .       | 2,600,000   | 5,500,000  |
| Vineyards . . . . .   | 500,000     | 6,700,000  |
| Other crops . . . . . | 800,000     | 5,700,000  |
| Pasture . . . . .     | 7,700,000   | 8,100,000  |
| Waste . . . . .       | 9,200,000   | ...        |
| Total . . . . .       | 20,800,000  | 26,000,000 |

Official returns give a total product estimated at £23,200,000, but this seems to omit dairy products. The productive area, tillage and pasture, being 11,600,000 acres, the average product is 45 shillings per acre, against 51 in Spain. Portuguese writers assert that the area under crops could be trebled but for the system of land tenure, which forces the people to emigrate. The vintage ranges from 50 to 80 million gallons, of which about one-fourth is exported. Agricultural capital reaches 164 millions sterling, of which 138 millions are represented by land. Peasant farms show an average value of £210 each. See *Cattle, Food, Land*.

#### SWEDEN AND NORWAY.

The climate of these countries is so adverse that agriculture has made little progress in recent years, the area under crops hardly reaching 9 million acres, or 5 per cent. of the total extent. Latest returns show:—

| Area              | Sweden      | Norway     | Total       |
|-------------------|-------------|------------|-------------|
| Grain, acres . .  | 4,150,000   | 450,000    | 4,600,000   |
| Sundries, acres . | 4,250,000   | 150,000    | 4,400,000   |
| Pasture, " . .    | 3,900,000   | 2,200,000  | 6,100,000   |
| Forest, &c. " .   | 98,400,000  | 76,900,000 | 175,300,000 |
| Total " . .       | 110,700,000 | 79,700,000 | 190,400,000 |
| Grain, tons . .   | 2,800,000   | 400,000    | 3,200,000   |
| Potatoes, tons .  | 1,300,000   | 500,000    | 1,800,000   |

The hay crop of Sweden averages 2½ million tons, that of Norway may be estimated at 1 million. Live stock in Sweden shows an increase of 500,000 in 20 years, but in Norway has been stationary, latest returns being as follows:—

|              | Sweden    | Norway    | Total     |
|--------------|-----------|-----------|-----------|
| Horses . . . | 500,000   | 150,000   | 650,000   |
| Cattle . . . | 2,520,000 | 1,010,000 | 2,530,000 |
| Sheep . . .  | 1,400,000 | 1,700,000 | 3,100,000 |
| Pigs . . .   | 770,000   | 120,000   | 890,000   |
| Total . .    | 5,190,000 | 2,980,000 | 7,170,000 |

Farmers are not wholly dependent on agricultural products; many of them devote themselves also to fishing or wood-cutting. The approximate value of agricultural industry is as follows:—

|                  | Sweden, £  | Norway, £ | Total, £   |
|------------------|------------|-----------|------------|
| Grain . . .      | 13,000,000 | 2,000,000 | 15,000,000 |
| Hay & sundries . | 6,800,000  | 1,300,000 | 8,100,000  |
| Meat . . .       | 8,000,000  | 2,800,000 | 10,800,000 |
| Dairy, &c. . .   | 9,200,000  | 2,900,000 | 12,100,000 |
| Total . .        | 37,000,000 | 9,000,000 | 46,000,000 |

Agricultural capital has quadrupled in 60 years, being now approximately as follows:—

|              | Millions £ Sterling |        |          |       |
|--------------|---------------------|--------|----------|-------|
|              | Land                | Cattle | Sundries | Total |
| Sweden . . . | 154                 | 29     | 18       | 201   |
| Norway . . . | 58                  | 12     | 7        | 77    |
| Total . .    | 212                 | 41     | 25       | 278   |

The average of capital to each farm is £730. See *Cattle, Food, Land*.

#### DENMARK.

This prosperous little kingdom shows an increase in the last 15 years of 400,000 acres under cultivation, 300,000 tons in average grain crop, and of 6 millions sterling in the value of exports of farm products. The average crops showed thus:—

|                       | 1879-82   | 1895-96   |
|-----------------------|-----------|-----------|
| Oats, tons . . .      | 750,000   | 950,000   |
| Barley, tons . .      | 550,000   | 520,000   |
| Rye, &c. tons . .     | 650,000   | 800,000   |
| Total grain, tons . . | 1,950,000 | 2,270,000 |
| Potatoes, tons . .    | 240,000   | 520,000   |
| Roots, tons . . .     | 440,000   | 3,520,000 |
| Total, tons . . .     | 2,630,000 | 6,310,000 |

Besides the above there are large crops of hay and clover, averaging together 1,400,000 tons yearly. Although the production of grain exceeds one ton per head of the population, there is none for export, a large quantity being kept for cattle. Pastoral industry thrives apace, the returns showing an increase of 10 per cent. in live stock since 1881. If we reduce all live stock to a common denominator equivalent to horned cattle, it will be found that Denmark carries a very high proportion to its area under grass, viz.:—

|                   | Pasture, Acres | Cattle     | Do. per 100 Acres |
|-------------------|----------------|------------|-------------------|
| Denmark . . .     | 2,600,000      | 2,400,000  | 92                |
| Holland . . .     | 2,800,000      | 2,100,000  | 75                |
| Great Britain . . | 16,600,000     | 12,300,000 | 75                |
| Ireland . . .     | 11,200,000     | 5,700,000  | 51                |

The productive area of Denmark, between tillage and pasture, is only 7,100,000 acres, yet the value of products reaches 35 millions sterling, equal to 99 shillings per acre, as compared with 92 shillings in France, and 75 in Ireland, which shows that in spite of an ungenial climate the Danes contrive to carry on agriculture with great success. They export meat, butter, and eggs to the value of 10 millions sterling per annum. The official value of crops is 15 millions sterling, apparently exclusive of market-garden products. The total value is approximately as follows: grain 12, other crops 7, meat 6, dairy 8, sundries 2; total 35 millions. The aggregate value of farms being 254 millions sterling, the product is equal to 14 per cent. on capital, against 13½ per cent. in France. The latest and best agricultural machinery is more used in Denmark than elsewhere. Agricultural exports are equal to £5 per head of the population, as compared with £2 in Canada, £2 in the United States, £3 in Ireland, and £8 in Australia. See *Cattle, Food, Land*.

#### HOLLAND

This little kingdom is so well irrigated that it has 420 yards of canal per acre of superficial extent. Hence we find that the yield of grain per acre is 7 per cent. higher even than in Denmark, and averages 30 bushels. Although the area under grain is 10 per cent. less than it was 15 years ago, the crops are heavier, the averages at two periods showing thus:—

|                 | Tons      |           | Bushels per Acre |         |
|-----------------|-----------|-----------|------------------|---------|
|                 | 1880-82   | 1893-95   | 1880-82          | 1893-95 |
| Oats . . .      | 310,000   | 370,000   | 42               | 45      |
| Rye . . .       | 230,000   | 270,000   | 19               | 23      |
| Wheat, &c. . .  | 390,000   | 370,000   | 22               | 27      |
| Total grain . . | 930,000   | 1,010,000 | 26               | 30      |
| Potatoes . . .  | 1,200,000 | 1,830,000 | 138              | 200     |
| Beetroot . . .  | 410,000   | 890,000   | 360              | 420     |

The yield per acre is heavier not only in grain but also in potatoes and beetroot. At the same time horned cattle have increased 2 per cent., pigs 92 per cent., and the export of dairy products risen to more than 100,000 tons yearly. Pastures are so rich that cattle for the market often weigh over a ton, and milch cows give an average product of 250 pounds of cheese and butter, a result unequalled in any part of the world. The following table shows the value of all products, and of what is exported :—

| Product, £      |            | Export, £      |           |
|-----------------|------------|----------------|-----------|
| Grain . . .     | 6,200,000  | Butter . . .   | 1,150,000 |
| Green crops . . | 11,700,000 | Cheese . . .   | 950,000   |
| Meat . . .      | 6,100,000  | Flax . . .     | 300,000   |
| Dairy . . .     | 9,800,000  | Meat . . .     | 600,000   |
| Sundries . . .  | 2,200,000  | Vegetables . . | 2,200,000 |
| Total . . .     | 36,000,000 | Total . . .    | 5,200,000 |

Agricultural capital has declined in the last 10 years, as shown thus :—

| Year       | Millions £ |        |          |       |
|------------|------------|--------|----------|-------|
|            | Land       | Cattle | Sundries | Total |
| 1886 . . . | 314        | 28     | 38       | 380   |
| 1896 . . . | 240        | 28     | 27       | 295   |

The value of products per acre is 142 shillings, against 92 in France and 96 in the United Kingdom. Dutch farmers are apparently the richest and most prosperous in the world, each farm representing a capital of £1800 and a gross output of £220, although the average area is no more than 34 acres. See *Cattle, Food, Land*.

#### BELGIUM

This is a country of kitchen gardens and spade cultivation, yielding a prodigious amount of agricultural products in ratio to extent, the average output showing 160 shillings per acre. The crops of 1893-96 compare with those of 1880 thus :—

|                 | Tons      |           | Bushels per Acre |         |
|-----------------|-----------|-----------|------------------|---------|
|                 | 1880      | 1893-96   | 1880             | 1893-96 |
| Wheat . . .     | 440,000   | 440,000   | 24               | 26      |
| Oats . . .      | 660,000   | 650,000   | 43               | 43      |
| Rye . . .       | 430,000   | 500,000   | 25               | 27      |
| Barley, &c. . . | 330,000   | 310,000   | 33               | 33      |
| Total . . .     | 1,860,000 | 1,900,000 | 31               | 32      |
| Potatoes . . .  | 2,820,000 | 3,650,000 | 115              | ...     |
| Beetroot . . .  | 1,750,000 | 2,150,000 | 480              | 520     |

Notwithstanding the industry of the people, the country does not produce food for more than 60 per cent. of the population, whereas the waste of labour is so great that the number of hands engaged in agriculture ought to be sufficient, with proper machinery, to raise food for 11,000,000 persons, or nearly double the actual population of Belgium, if the area of the kingdom were larger. Thus it comes to pass that the maximum product of farming per acre, so far from being advantageous, must be regarded as deplorable in an economic sense. The old adage which says "the plough is silver but the spade is golden" contains as much nonsense as can be conveyed in so few words. Far better would it be if 500,000 Belgian farmers were located beyond the Mississippi.

The following table shows the value of agricultural products, and of similar imports :—

| Products, £     |            | Imports, £     |            |
|-----------------|------------|----------------|------------|
| Grain . . .     | 12,100,000 | Grain . . .    | 7,800,000  |
| Green crops . . | 16,800,000 | Meat . . .     | 1,500,000  |
| Meat . . .      | 5,000,000  | Butter . . .   | 400,000    |
| Dairy, &c. . .  | 10,100,000 | Sundries . . . | 300,000    |
| Total . . .     | 44,000,000 | Total . . .    | 10,000,000 |

Agricultural capital has fallen heavily in 15 years, viz. :—

| Year       | Millions £ Sterling |        |          |       |
|------------|---------------------|--------|----------|-------|
|            | Land                | Cattle | Sundries | Total |
| 1880 . . . | 377                 | 24     | 44       | 445   |
| 1895 . . . | 300                 | 22     | 32       | 354   |

The value of product compared with capital is the same as in Holland, 12 per cent. See *Cattle, Food, Land*.

#### SWITZERLAND

Agriculture is an industry of secondary importance, although it gives occupation to 40 per cent. of the Swiss people. There are 300,000 farms, with an average of 4 acres under tillage and 13 under pasture, the peasants in many cases adding to their income by cutting timber, or by receiving travellers into their houses in the summer season. The country hardly raises food for one-third of its population, the value of products and of imports showing thus :—

| Products, £     |            | Imports, £     |           |
|-----------------|------------|----------------|-----------|
| Grain . . .     | 2,000,000  | Grain . . .    | 3,300,000 |
| Green crops . . | 7,000,000  | Meat . . .     | 2,200,000 |
| Meat . . .      | 4,000,000  | Vegetables . . | 400,000   |
| Dairy, &c. . .  | 7,000,000  | Sundries . . . | 300,000   |
| Total . . .     | 20,000,000 | Total . . .    | 6,200,000 |

Dairy-farming is carried on with great success in various cantons, the export of cheese and condensed milk exceeding 40,000 tons yearly, worth 3 millions sterling. The total farming capital is 172 millions, of which land stands for 138 millions sterling, the average value of each farm being £490, against £880 in France.

#### THE DANUBIAN STATES

Although agriculture is the chief occupation, it is very backward in these countries, the number of hands engaged in farming being out of all proportion to the results obtained.

|                 | Acres (000 omitted) |        |          |        |
|-----------------|---------------------|--------|----------|--------|
|                 | Roumania            | Servia | Bulgaria | Total  |
| Grain . . .     | 10,600              | 2,400  | 4,900    | 17,900 |
| Green crops . . | 2,600               | 2,500  | 1,600    | 6,700  |
| Pasture . . .   | 9,600               | 5,600  | 5,700    | 20,900 |
| Forest, &c. . . | 9,600               | 1,700  | 11,400   | 22,700 |
| Total . . .     | 32,400              | 12,200 | 23,600   | 68,200 |

#### Crop, Million Bushels

|                 |     |    |    |     |
|-----------------|-----|----|----|-----|
| Wheat . . .     | 57  | 12 | 32 | 101 |
| Maize . . .     | 65  | 14 | 22 | 101 |
| Barley, &c. . . | 46  | 10 | 20 | 76  |
| Total . . .     | 168 | 36 | 74 | 278 |

The aggregate area under vineyards in the three States is 1,100,000 acres, the vintage showing as follows:—

|                    | Millions of Gallons |      |         |
|--------------------|---------------------|------|---------|
|                    | 1895                | 1896 | Average |
| Roumania . . . . . | 68                  | 164  | 116     |
| Servia . . . . .   | 17                  | 25   | 21      |
| Bulgaria . . . . . | 26                  | 30   | 28      |
| Total . . . . .    | 111                 | 219  | 165     |

Fruit is largely cultivated in Servia, orchards covering 180,000 acres, and producing the famous Slivovitz plum, of which 20,000 tons are exported yearly for making brandy. Cattle-farming is much attended to in all three States, live stock being approximately as follows:—

|                  | Number (000 omitted) |        |          |        |
|------------------|----------------------|--------|----------|--------|
|                  | Roumania             | Servia | Bulgaria | Total  |
| Horses . . . . . | 600                  | 150    | 250      | 900    |
| Cattle . . . . . | 2,500                | 800    | 300      | 3,600  |
| Sheep . . . . .  | 5,200                | 3,500  | 8,500    | 17,200 |
| Pigs . . . . .   | 900                  | 900    | 500      | 2,300  |
| Total . . . . .  | 9,200                | 5,300  | 9,500    | 24,000 |

These States export agricultural products to the value of 15 millions sterling yearly, for the most part grain; not more than two-thirds of the crops are kept for consumption, the surplus for export usually exceeding two million tons of grain. The value of farm products is approximately as follows:—

|                       | Millions £ Sterling |        |          |       |
|-----------------------|---------------------|--------|----------|-------|
|                       | Roumania            | Servia | Bulgaria | Total |
| Grain . . . . .       | 23                  | 5      | 10       | 38    |
| Green crops . . . . . | 9                   | 4      | 6        | 19    |
| Meat . . . . .        | 8                   | 4      | 4        | 16    |
| Sundries . . . . .    | 6                   | 2      | 2        | 10    |
| Total . . . . .       | 46                  | 15     | 22       | 83    |

The total product gives only 38 shillings per acre, against 75 shillings in Austria-Hungary. The average coming to each hand employed in agriculture is no more than £21, as compared with £58 in France and the same in Ireland. Agricultural capital is shown approximately as follows:—

|                    | Millions £ Sterling |        |          |       |
|--------------------|---------------------|--------|----------|-------|
|                    | Roumania            | Servia | Bulgaria | Total |
| Land . . . . .     | 200                 | 90     | 130      | 420   |
| Cattle . . . . .   | 22                  | 10     | 10       | 42    |
| Sundries . . . . . | 22                  | 10     | 14       | 46    |
| Total . . . . .    | 244                 | 110    | 154      | 508   |

There are altogether 1,300,000 farms; average value £384, average product £65. See *Food, Land*.

#### GREECE

The progress of agriculture has been slow, viz:—

|                        | Acres      |            |            |
|------------------------|------------|------------|------------|
|                        | 1860       | 1889       | 1893       |
| Cultivated . . . . .   | 810,000    | 2,090,000  | 2,340,000  |
| Uncultivated . . . . . | 10,590,000 | 13,810,000 | 13,560,000 |
| Total . . . . .        | 11,400,000 | 15,900,000 | 15,900,000 |

The difference of area in the above table arises from the annexation of Thessaly in 1881. According to Greek writers, one-half of the uncultivated land could be brought under tillage, but agriculture is so backward that Greece has to import both grain and meat. Latest official returns showed 1,210,000 acres under grain, producing 200,000 tons of wheat and 200,000 of maize, barley, and rye; this was equivalent to an average crop of 13 bushels to the acre. Currant-growing was for some years most profitable, this fruit being worth £20 a ton in the decade ending 1890, but of late years it has fallen to £11, causing widespread agricultural depression. Currants have been grown chiefly for exportation, being much used in the manufacture of claret and other wines in France. Greece exported on an average 60,000 tons yearly before the phylloxera made great ravages (1876), and subsequently the demand for currants was such that the export reached 120,000 tons in 1893. The area under vineyards is 340,000 acres, and official returns put down the vintage at 66 million gallons, but this appears an exaggeration, the average for the last two years having been only 41 millions, that is, 120 gallons of wine per acre, as compared with 150 in the Danubian States. The value of agricultural products and the amount of capital are shown approximately as follows:—

|                       | Products, £ |                    | Capital, £  |
|-----------------------|-------------|--------------------|-------------|
| Grain . . . . .       | 2,400,000   | Land . . . . .     | 94,000,000  |
| Other crops . . . . . | 6,600,000   | Cattle . . . . .   | 5,000,000   |
| Meat, &c. . . . .     | 5,000,000   | Sundries . . . . . | 10,000,000  |
| Total . . . . .       | 14,000,000  | Total . . . . .    | 109,000,000 |

The total productive area, between tillage and pasture, being 8,200,000 acres, the product is equal to 34 shillings per acre: it gives, moreover, £21 for each hand engaged in farming, being the same as in the Danubian States.

The progress made in Greek agriculture is seen by comparing Bickford's tables for 1889 with those of Bikelas for 1860, viz:—

|                                 | 1860       | 1889       |
|---------------------------------|------------|------------|
| Wheat, . . . . . acres          | 230,000    | 620,000    |
| Other grain, . . . . . "        | 330,000    | 590,000    |
| Vines and currants, . . . . . " | 160,000    | 440,000    |
| Sundries, . . . . . "           | 90,000     | 440,000    |
| Under crops, . . . . . "        | 810,000    | 2,090,000  |
| Fallow, . . . . . "             | 630,000    | 1,010,000  |
| Forest, . . . . . "             | 1,350,000  | 1,500,000  |
| Mountains, &c. . . . . "        | 8,610,000  | 11,300,000 |
| Total . . . . .                 | 11,400,000 | 15,900,000 |

There are 60,000 acres under currant plantations, which give an ordinary yield of 3 tons per acre, the crop having quadrupled in 40 years, viz:—

| Year           | Tons   | Year           | Tons    |
|----------------|--------|----------------|---------|
| 1851 . . . . . | 41,000 | 1871 . . . . . | 81,000  |
| 1861 . . . . . | 43,000 | 1881 . . . . . | 125,000 |
| 1866 . . . . . | 56,000 | 1891 . . . . . | 167,000 |

#### UNITED STATES

The position of agriculture may be taken in at a glance by considering the occupied and the unoccupied areas in the great divisions of the Union

(exclusive of Alaska) according to the census of 1890, viz. :—

| Division          | Millions of Acres |             |             |       |
|-------------------|-------------------|-------------|-------------|-------|
|                   | Im-proved         | Unim-proved | Unoc-cupied | Total |
| New England . . . | 11                | 9           | 24          | 44    |
| Middle . . . . .  | 36                | 13          | 24          | 73    |
| South . . . . .   | 104               | 146         | 272         | 522   |
| Prairie . . . . . | 184               | 73          | 271         | 528   |
| Pacific . . . . . | 23                | 24          | 708         | 755   |
| Total . . . . .   | 358               | 265         | 1,299       | 1,922 |

The total area occupied by farms was 623 million acres, or nearly one-third of the Union. An official report for 1895 showed the area under other crops than hay to be 183 million acres, from which it would appear that 440 million acres are devoted to pasture. As a natural result of the Homestead Law of 1862, and of the new railways constructed in the West, we find that farming has made prodigious strides in the Prairie and the Pacific States. The improved area at the successive census dates was as follows :—

| Divisions         | Millions of Acres |      |      |      |      |
|-------------------|-------------------|------|------|------|------|
|                   | 1850              | 1860 | 1870 | 1880 | 1890 |
| New England . . . | 11                | 12   | 12   | 13   | 11   |
| Middle . . . . .  | 26                | 30   | 33   | 37   | 36   |
| South . . . . .   | 49                | 65   | 58   | 82   | 104  |
| Prairie . . . . . | 27                | 52   | 78   | 137  | 184  |
| Pacific . . . . . | ...               | 4    | 8    | 16   | 23   |
| Union . . . . .   | 113               | 163  | 189  | 285  | 358  |

If we compare the number of hands with the extent of farms at the above dates we find that, doubtless owing to improved machinery, each hand now cultivates 10 acres more than down to the year 1870, being an improvement of 50 per cent. in 20 years, viz. :—

| Year           | Hands     | Acres       | Acres per Hand |
|----------------|-----------|-------------|----------------|
| 1850 . . . . . | 3,120,000 | 113,100,000 | 36             |
| 1860 . . . . . | 4,890,000 | 163,100,000 | 33             |
| 1870 . . . . . | 5,668,000 | 188,800,000 | 33             |
| 1880 . . . . . | 7,217,000 | 284,600,000 | 40             |
| 1890 . . . . . | 8,323,000 | 357,600,000 | 49             |

Western and Southern farms are steadily growing larger, while those of New England and the Middle States become smaller, the latter being apparently the result of a great development of dairy-farming in recent years, viz. :—

| Divisions         | Hands     |           | Acres per Hand |      |
|-------------------|-----------|-----------|----------------|------|
|                   | 1870      | 1890      | 1870           | 1890 |
| New England . . . | 263,000   | 273,000   | 46             | 39   |
| Middle . . . . .  | 620,000   | 827,000   | 53             | 43   |
| South . . . . .   | 2,640,000 | 3,850,000 | 22             | 27   |
| Prairie . . . . . | 1,950,000 | 3,060,000 | 40             | 60   |
| Pacific . . . . . | 195,000   | 313,000   | 42             | 73   |
| Union . . . . .   | 5,668,000 | 8,323,000 | 33             | 49   |

The grain crops are on a colossal scale, summing up in the last 25 years almost 1600 million tons, being an average of 64 millions tons yearly, viz. :—

| Period             | Yearly Average, Tons (ooo omitted) |        |           |        |
|--------------------|------------------------------------|--------|-----------|--------|
|                    | Maize                              | Wheat  | Oats, &c. | Total  |
| 1872-76 . . . . .  | 27,200                             | 7,100  | 8,900     | 43,200 |
| 1877-81 . . . . .  | 36,400                             | 10,100 | 11,500    | 58,000 |
| 1882-86 . . . . .  | 40,500                             | 10,900 | 15,600    | 67,000 |
| 1887-91 . . . . .  | 43,600                             | 11,100 | 18,700    | 73,400 |
| 1892-96 . . . . .  | 43,400                             | 12,300 | 20,300    | 76,000 |
| 25 years . . . . . | 38,200                             | 10,400 | 15,000    | 63,600 |

Less than one-twelfth of the grain produced has been exported, viz. :—

| Period             | Yearly Average, Tons |           |             |
|--------------------|----------------------|-----------|-------------|
|                    | Crop                 | Export    | Consumption |
| 1872-76 . . . . .  | 43,200,000           | 2,700,000 | 40,500,000  |
| 1877-81 . . . . .  | 58,000,000           | 5,800,000 | 52,200,000  |
| 1882-86 . . . . .  | 67,000,000           | 4,500,000 | 62,500,000  |
| 1887-91 . . . . .  | 73,400,000           | 4,400,000 | 69,000,000  |
| 1892-96 . . . . .  | 70,000,000           | 6,500,000 | 63,500,000  |
| 25 years . . . . . | 63,600,000           | 4,700,000 | 58,900,000  |

The weight of grain exported in 25 years was 118 million tons, of which 75 millions were wheat, 37 millions maize, and the rest oats and barley. The agricultural returns for the years 1893-95 give the following averages :—

|                     | Acres       | Tons       | Crop Value, £ Sterling |
|---------------------|-------------|------------|------------------------|
| Maize . . . . .     | 72,200,000  | 41,500,000 | 119,000,000            |
| Wheat . . . . .     | 34,500,000  | 11,000,000 | 47,000,000             |
| Oats . . . . .      | 27,400,000  | 17,800,000 | 39,400,000             |
| Rye, &c. . . . .    | 6,000,000   | 2,700,000  | 10,100,000             |
| All grain . . . . . | 140,100,000 | 73,000,000 | 215,500,000            |

The following table shows for the same three years the average yield in bushels per acre, the value of crop per bushel, and the yield per acre of grain in money, American and English :—

|                   | Bushels per Acre | Cents per Bushel | Produce per Acre |           |
|-------------------|------------------|------------------|------------------|-----------|
|                   |                  |                  | \$               | Shillings |
| Maize . . . . .   | 23               | 36               | 8.00             | 33.3      |
| Wheat . . . . .   | 13               | 51               | 6.60             | 27.5      |
| Oats . . . . .    | 26               | 27               | 6.90             | 28.7      |
| Rye, &c. . . . .  | 19               | 43               | 8.10             | 33.7      |
| General . . . . . | 21               | 36               | 7.40             | 30.8      |

The crops of 1897, owing to the rise in wheat, gave a much better result, official returns showing as follows :—

|                  | Tons       | Value £     | Cents per Bushel |
|------------------|------------|-------------|------------------|
| Maize . . . . .  | 47,600,000 | 104,000,000 | 26               |
| Wheat . . . . .  | 13,300,000 | 89,000,000  | 80               |
| Oats . . . . .   | 17,500,000 | 31,000,000  | 21               |
| Rye, &c. . . . . | 2,700,000  | 9,000,000   | 40               |
| Total . . . . .  | 81,100,000 | 233,000,000 | 34               |

An official return in 1894 estimated the cost of producing grain, per acre, as follows, in American dollars and cents :—

|                      | New<br>England<br>\$ | Middle<br>\$ | South<br>\$ | Prairie<br>\$ |
|----------------------|----------------------|--------------|-------------|---------------|
| Rent . . . . .       | 4.14                 | 4.09         | 2.90        | 2.80          |
| Manure . . . . .     | 4.55                 | 5.58         | 1.99        | 1.74          |
| Tillage . . . . .    | 3.77                 | 2.87         | 1.62        | 1.70          |
| Harvesting . . . . . | 3.52                 | 2.05         | 0.87        | 1.27          |
| Sundries . . . . .   | 8.14                 | 5.26         | 4.00        | 3.47          |
| Total . . . . .      | 24.12                | 19.85        | 11.38       | 10.98         |

The cost of the two crops, wheat and maize, in 1894 was officially stated thus :—

|                      | Wheat<br>\$ | Maize<br>\$ | Total<br>\$   |
|----------------------|-------------|-------------|---------------|
| Rent . . . . .       | 98,300,000  | 189,700,000 | 288,000,000   |
| Manure . . . . .     | 75,600,000  | 116,400,000 | 192,000,000   |
| Tillage . . . . .    | 65,400,000  | 101,400,000 | 166,800,000   |
| Harvesting . . . . . | 41,600,000  | 76,400,000  | 118,000,000   |
| Sundries . . . . .   | 128,100,000 | 249,100,000 | 377,200,000   |
| Total . . . . .      | 409,000,000 | 733,000,000 | 1,142,000,000 |

In the same year the value of the crops was, wheat 226 millions, maize 555 million dollars, showing a loss of 183 million dollars on wheat and 178 millions on maize. Such losses, however, are not in hard cash, as the farmer often holds his land free of rent, and not less frequently has manure and tillage free of actual outlay.

Cotton-growing during the last 30 years is shown as follows :—

| Period            | Tons Yearly |           | Value, Millions \$ |        |
|-------------------|-------------|-----------|--------------------|--------|
|                   | Crop        | Exported  | Crop               | Export |
| 1867-71 . . . . . | 600,000     | 400,000   | 265                | 175    |
| 1872-76 . . . . . | 810,000     | 550,000   | 275                | 188    |
| 1877-81 . . . . . | 1,140,000   | 770,000   | 238                | 161    |
| 1882-86 . . . . . | 1,310,000   | 880,000   | 268                | 179    |
| 1887-91 . . . . . | 1,600,000   | 1,080,000 | 300                | 203    |
| 1892-96 . . . . . | 1,810,000   | 1,200,000 | 275                | 183    |

The difference between the weight of crop and what was exported represents the home consumption in American factories. Cotton is grown solely in the Southern States.

Hay represents nearly double the value of the cotton crop, the average for the last three years being 478 million dollars, viz. :—

| Divisions            | Hay, Acres | Tons       | Value, \$   |
|----------------------|------------|------------|-------------|
| N. England . . . . . | 3,700,000  | 4,100,000  | 51,000,000  |
| Middle . . . . .     | 8,600,000  | 10,000,000 | 119,000,000 |
| South . . . . .      | 3,400,000  | 4,500,000  | 48,000,000  |
| Prairie . . . . .    | 23,900,000 | 27,300,000 | 185,000,000 |
| Pacific . . . . .    | 4,600,000  | 10,100,000 | 75,000,000  |
| Union . . . . .      | 44,200,000 | 56,000,000 | 478,000,000 |

Potatoes show the following average returns for the same three years, 1893-95 :—

|                      | Acres     | Tons      | Value, \$  |
|----------------------|-----------|-----------|------------|
| N. England . . . . . | 180,000   | 550,000   | 10,600,000 |
| Middle . . . . .     | 710,000   | 1,440,000 | 23,800,000 |
| South . . . . .      | 240,000   | 420,000   | 9,700,000  |
| Prairie . . . . .    | 1,710,000 | 2,710,000 | 44,200,000 |
| Pacific . . . . .    | 110,000   | 290,000   | 4,800,000  |
| Union . . . . .      | 2,950,000 | 5,410,000 | 93,100,000 |

The Pacific States appear to give the heaviest hay crop in the world (except Ireland), their average being almost 2½ tons per acre. New England gives a heavier yield of potatoes per acre than the rest of the Union, the average for the United States being under 3 tons per acre, as compared with 6 tons in Great Britain and 4 in Ireland.

The area, product, and value of crops in 1896 were :—

|                     | Acres       | Tons        | Value, £    | Shill.<br>per Acre |
|---------------------|-------------|-------------|-------------|--------------------|
| Maize . . . . .     | 81,030,000  | 57,100,000  | 102,100,000 | 25                 |
| Wheat . . . . .     | 34,620,000  | 10,700,000  | 64,700,000  | 37                 |
| Oats . . . . .      | 27,570,000  | 17,700,000  | 27,400,000  | 20                 |
| Barley . . . . .    | 2,950,000   | 1,750,000   | 4,600,000   | 31                 |
| Rye, &c. . . . .    | 2,580,000   | 950,000     | 3,300,000   | 26                 |
| All grain . . . . . | 148,750,000 | 88,200,000  | 202,100,000 | 27                 |
| Hay . . . . .       | 43,260,000  | 59,300,000  | 79,900,000  | 37                 |
| Cotton . . . . .    | 23,450,000  | 1,840,000   | 59,200,000  | 51                 |
| Potatoes . . . . .  | 2,770,000   | 6,300,000   | 15,100,000  | 108                |
| Tobacco . . . . .   | 590,000     | 180,000     | 5,100,000   | 173                |
| Sugar, &c. . . . .  | 3,580,000   | 290,000     | 19,700,000  | 110                |
| Total . . . . .     | 222,400,000 | 156,110,000 | 381,100,000 | 34                 |

The average value of farm products in the last three years was approximately as follows, reduced to English money :—

|                      | Millions £ Sterling |       |        |          |       |       |          |       |
|----------------------|---------------------|-------|--------|----------|-------|-------|----------|-------|
|                      | Grain               | Hay   | Cotton | Potatoes | Meat  | Dairy | Sundries | Total |
| N. England . . . . . | 2.1                 | 10.5  | ...    | 2.2      | 3.1   | 6.7   | 5.4      | 30.0  |
| Middle . . . . .     | 19.9                | 24.8  | ...    | 4.8      | 12.9  | 26.8  | 17.7     | 106.0 |
| South . . . . .      | 56.2                | 10.0  | 51.0   | 2.0      | 44.0  | 19.4  | 26.4     | 209.0 |
| Prairie . . . . .    | 127.0               | 38.8  | ...    | 9.0      | 73.6  | 56.3  | 60.3     | 365.0 |
| Pacific . . . . .    | 10.8                | 15.9  | ...    | 1.0      | 23.3  | 0.8   | 10.2     | 62.0  |
| Total . . . . .      | 216.0               | 100.0 | 51.0   | 19.0     | 156.0 | 110.0 | 120.0    | 772.0 |

Cattle-farms, as already shown, cover an area of 400 million acres, with the following amount of stock in 1896 :—

|                      | Live Stock (000 omitted) |        |        |        |
|----------------------|--------------------------|--------|--------|--------|
|                      | Horses                   | Cattle | Sheep  | Pigs   |
| N. England . . . . . | 400                      | 1,300  | 700    | 300    |
| Middle . . . . .     | 1,600                    | 4,100  | 2,600  | 2,100  |
| South . . . . .      | 4,500                    | 14,500 | 7,600  | 16,400 |
| West . . . . .       | 10,900                   | 28,300 | 27,400 | 24,000 |
| Union . . . . .      | 17,400                   | 48,200 | 38,300 | 42,800 |

In the United States (as in Australia and Argentina) the flocks and herds are subject to great fluctuations. See *Cattle*, page 654.

The gross product per acre, counting only the improved area, comes out as follows in the various sections :—

| States               | Acres       | £ Sterling  | Shill.<br>per Acre |
|----------------------|-------------|-------------|--------------------|
| N. England . . . . . | 10,750,000  | 30,000,000  | 56                 |
| Middle . . . . .     | 35,750,000  | 106,000,000 | 59                 |
| South . . . . .      | 103,800,000 | 209,000,000 | 40                 |
| Prairie . . . . .    | 184,300,000 | 365,000,000 | 40                 |
| Pacific . . . . .    | 23,000,000  | 62,000,000  | 54                 |
| Union . . . . .      | 357,600,000 | 772,000,000 | 43                 |

Comparing product with the number of hands engaged, we find as follows:—

| States        | Hands     | £ Sterling  | £ per Hand |
|---------------|-----------|-------------|------------|
| Eastern . . . | 1,100,000 | 136,000,000 | 124        |
| South . . .   | 3,850,000 | 209,000,000 | 54         |
| Prairie . . . | 3,060,000 | 365,000,000 | 120        |
| Pacific . . . | 310,000   | 62,000,000  | 200        |
| Union . . .   | 8,320,000 | 772,000,000 | 93         |

The United States consume about five-sixths, and export one-sixth, of their farm products, as measured by value, viz:—

| Year           | Millions £ Sterling |          |       |
|----------------|---------------------|----------|-------|
|                | Consumption         | Exported | Total |
| 1860 . . . . . | 367                 | 53       | 420   |
| 1880 . . . . . | 556                 | 143      | 699   |
| 1886 . . . . . | 674                 | 101      | 775   |
| 1893 . . . . . | 685                 | 128      | 813   |

The value of farm products consumed in 1893 was £10.3 per inhabitant, against £11.1 in 1880, the price level having fallen so much, that although the quantity was increased the value was less.

The following table shows the *official* value of farms at the census of 1890, and the *real* approximate value in 1895, compared with the number of agricultural hands:—

| States               | Millions £ Sterling |       | £ per Hand |
|----------------------|---------------------|-------|------------|
|                      | 1890                | 1895  |            |
| N. England . . . . . | 122                 | 142   | 523        |
| Middle . . . . .     | 548                 | 646   | 780        |
| South . . . . .      | 610                 | 713   | 185        |
| West . . . . .       | 2,050               | 2,641 | 784        |
| Total . . . . .      | 3,330               | 4,142 | 497        |

Comparing the above amount of agricultural capital with the improved area, it gives an average of barely £12 per acre, which is lower than in most countries, viz:—

|                  | £ Capital |          |               | £ Capital |          |
|------------------|-----------|----------|---------------|-----------|----------|
|                  | Per Acre  | Per Hand |               | Per Acre  | Per Hand |
| U. States . . .  | 12        | 497      | France . . .  | 34        | 430      |
| G. Britain . . . | 51        | 1,060    | Ireland . . . | 16        | 415      |
| Germany . . .    | 29        | 270      | Italy . . .   | 26        | 175      |

The contrast between the United States and Great Britain in the above table is very striking, and explains why agriculture progresses in the former, and languishes in the latter, country.

#### CANADA

The area under crops, by latest returns, was 20 million acres, equal to 4 acres per inhabitant, as compared with 3½ in the United States. In some respects Canada is more agricultural than the great Republic: the propor-

tion of people living on farms is much higher, and the value of farm products is £11.5 per head of the whole population, whereas it is not quite £11 in the United States. The cultivated area stands thus:—

|                     | Acres (000 omitted) |       |          |        |
|---------------------|---------------------|-------|----------|--------|
|                     | Grain               | Hay   | Sundries | Total  |
| Ontario . . . . .   | 5,040               | 2,530 | 540      | 8,110  |
| Quebec . . . . .    | 1,220               | 2,460 | 1,500    | 5,180  |
| Manitoba . . . . .  | 1,590               | 250   | 990      | 2,830  |
| Acadia, &c. . . . . | 1,900               | 970   | 910      | 3,780  |
| Total . . . . .     | 9,750               | 6,210 | 3,940    | 19,900 |

The latest estimates of grain crops was approximately as follows:—

|                     | Tons      |                 | Tons      |
|---------------------|-----------|-----------------|-----------|
|                     |           |                 |           |
| Ontario . . . . .   | 3,200,000 | Wheat . . . .   | 1,300,000 |
| Quebec . . . . .    | 800,000   | Oats . . . . .  | 2,600,000 |
| Manitoba . . . . .  | 800,000   | Barley . . . .  | 400,000   |
| Acadia, &c. . . . . | 400,000   | Maize, &c. . .  | 900,000   |
| Total . . . . .     | 5,200,000 | Total . . . . . | 5,200,000 |

The production of grain averages 41 bushels per inhabitant, against 49 in the United States; this is the reverse of what we might expect, in view of the heavier crops obtained in Upper Canada, viz:—

|                     | Bushels per Acre |        |      |
|---------------------|------------------|--------|------|
|                     | Wheat            | Barley | Oats |
| Ontario . . . . .   | 18               | 26     | 35   |
| U. States . . . . . | 13               | 21     | 25   |

Tillage has not progressed so much as pastoral industry in late years. Dairy farms have multiplied, as well as grazing farms, and the value of exported food reaches 10 millions sterling per annum. In 1894 the value of all farm products was approximately:—

|                    | Millions £ Sterling |        |       |
|--------------------|---------------------|--------|-------|
|                    | Consumption.        | Export | Total |
| Grain . . . . .    | 17                  | 4      | 21    |
| Meat . . . . .     | 9                   | 2      | 11    |
| Dairy . . . . .    | 5                   | 4      | 9     |
| Sundries . . . . . | 16                  | ...    | 16    |
| Total . . . . .    | 47                  | 10     | 57    |

The improved or productive area increased 70 per cent. in a period of 10 years, down to 1891, viz:—

|                   | Acres under | 1881       | 1891       |
|-------------------|-------------|------------|------------|
|                   |             |            |            |
| Tillage . . . . . |             | 15,100,000 | 19,900,000 |
| Pasture . . . . . |             | 6,400,000  | 15,300,000 |
| Total . . . . .   |             | 21,500,000 | 35,200,000 |

The total farming capital of the Dominion is approximately 311 millions sterling (which is equal to

£60 per inhabitant, against £59 in the United States), as follows:—

|               | Millions £ Sterling |        |          |       |
|---------------|---------------------|--------|----------|-------|
|               | Land                | Cattle | Sundries | Total |
| Ontario . . . | 155                 | 21     | 10       | 186   |
| Quebec . . .  | 50                  | 11     | 6        | 67    |
| Acadia . . .  | 3                   | 6      | 3        | 32    |
| West . . .    | 17                  | 5      | 4        | 26    |
| Total . . .   | 245                 | 43     | 23       | 311   |

Dividing the total among the number of farms, it gives an average of £517 to each, against £730 in the United States and £880 in France.

#### AUSTRALIA

Official returns show that the area under tillage has increased 400,000 acres per annum since 1891, viz.:—

|                     | 1891      | 1896      |
|---------------------|-----------|-----------|
| Victoria . . .      | 2,120,000 | 2,660,000 |
| S. Australia . . .  | 1,930,000 | 2,140,000 |
| New S. Wales . . .  | 850,000   | 1,660,000 |
| New Zealand . . .   | 1,420,000 | 1,600,000 |
| Queensland, &c. . . | 470,000   | 670,000   |
| Total . . .         | 6,790,000 | 8,730,000 |

The above returns, however, exclude 9,100,000 acres of sown grasses in New Zealand, which would bring up the total cultivated area to 17,800,000 acres, or two million acres less than in Canada. Compared with population the area is about equal, being 4 acres per inhabitant in both cases. The area under grain is almost six million acres, viz.:—

|                    | Acres     |           |           | Crop, Tons |
|--------------------|-----------|-----------|-----------|------------|
|                    | Wheat     | Oats, &c. | All Grain |            |
| Victoria . . .     | 1,580,000 | 490,000   | 2,070,000 | 380,000    |
| S. Australia . . . | 1,690,000 | 60,000    | 1,750,000 | 230,000    |
| N. S. Wales . . .  | 870,000   | 260,000   | 1,130,000 | 300,000    |
| New Zealand . . .  | 260,000   | 420,000   | 680,000   | 400,000    |
| Queensland . . .   | 35,000    | 115,000   | 150,000   | 70,000     |
| Tasmania . . .     | 75,000    | 45,000    | 120,000   | 50,000     |
| W. Australia . . . | 30,000    | ...       | 30,000    | 10,000     |
| Total . . .        | 4,540,000 | 1,390,000 | 5,930,000 | 1,440,000  |

The aggregate grain crops of the seven colonies in the last three years were:—

|                | Tons      |           |           |           |
|----------------|-----------|-----------|-----------|-----------|
|                | 1894      | 1895      | 1896      | Average   |
| Wheat . . .    | 790,000   | 630,000   | 670,000   | 700,000   |
| Oats . . .     | 450,000   | 410,000   | 500,000   | 450,000   |
| Maize, &c. . . | 300,000   | 270,000   | 300,000   | 290,000   |
| Total . . .    | 1,540,000 | 1,310,000 | 1,470,000 | 1,440,000 |

Thus the average yield sums up only 58 million bushels yearly, which is less than 10 bushels per acre, against 21 in the United States. About 300,000 tons, or one-fifth

of the crop, are annually exported, home consumption (after deduction for seed) averaging 10 bushels per inhabitant. Vineyards cover an area of 60,000 acres, as compared with 22,000 acres in 1886: the average vintage is over 4 million gallons, giving a yield of 72 gallons per acre, or about half the average in Europe. The average for five years shows:—

|                       | Acres  | Gallons   | Gallons per Acre |
|-----------------------|--------|-----------|------------------|
| Victoria . . .        | 30,000 | 1,800,000 | 60               |
| N. S. Wales . . .     | 8,000  | 800,000   | 100              |
| S. Australia . . .    | 17,000 | 1,400,000 | 85               |
| W. Australia, &c. . . | 4,000  | 300,000   | 75               |
| Total . . .           | 59,000 | 4,300,000 | 72               |

Potatoes are cultivated successfully in all seven colonies, sugar only in Queensland and New South Wales: the crops of last three years were:—

|            | Tons     |            | Tons per Acre |      |
|------------|----------|------------|---------------|------|
|            | Potatoes | Sugar-cane | Potatoes      | Cane |
| 1894 . . . | 580,000  | ...        | 3.9           | ...  |
| 1895 . . . | 450,000  | ...        | 3.5           | ...  |
| 1896 . . . | 510,000  | 1,150,000  | 3.5           | 10.1 |

Pastoral interests greatly surpass those of tillage, wool alone standing for more than the total value of the crops, viz.:—

|                    | Millions £ Sterling* |      |          |       |
|--------------------|----------------------|------|----------|-------|
|                    | Crops                | Wool | Sundries | Total |
| N. S. Wales . . .  | 4.0                  | 9.6  | 7.2      | 20.8  |
| Victoria . . .     | 6.7                  | 2.9  | 6.4      | 16.0  |
| New Zealand . . .  | 4.8                  | 4.8  | 4.5      | 14.1  |
| Queensland . . .   | 1.4                  | 3.3  | 5.0      | 9.7   |
| S. Australia . . . | 3.3                  | 1.3  | 1.8      | 6.4   |
| Tasmania . . .     | 1.0                  | 0.3  | 0.8      | 2.1   |
| W. Australia . . . | 0.3                  | 0.3  | 0.3      | 0.9   |
| Total . . .        | 21.5                 | 22.5 | 26.0     | 70.0  |

Here, as well as in the United States and Argentina the flocks are subject to violent fluctuations, viz.:—

|              | 1881       | 1891        | 1896        |
|--------------|------------|-------------|-------------|
| Sheep . . .  | 78,100,000 | 124,500,000 | 110,500,000 |
| Cattle . . . | 8,700,000  | 11,900,000  | 12,700,000  |
| Horses . . . | 1,200,000  | 1,800,000   | 1,900,000   |
| Total . . .  | 88,000,000 | 138,200,000 | 125,100,000 |

The aggregate number of live stock rose 5 millions yearly between 1881 and 1891, but since the latter year we find an average fall of 2½ millions yearly. The wool-clip averages 320,000 tons, of which 300,000 are exported. The value of all farm products, as shown above, is 70 millions sterling per annum, equal to £17 per head of the population, against £11 in the United States and in Canada, the ratio in Denmark being the same as in

\* This table is to be read thus: N. S. Wales 4.0 means £4,000,000.

Australia. Agricultural wealth stands approximately as follows :—

|                    | Millions £ Sterling |        |          |       |
|--------------------|---------------------|--------|----------|-------|
|                    | Land                | Cattle | Sundries | Total |
| N. S. Wales . . .  | 85                  | 34     | 12       | 131   |
| Victoria . . . .   | 49                  | 21     | 7        | 77    |
| New Zealand . . .  | 43                  | 20     | 6        | 69    |
| Queensland . . . . | 18                  | 34     | 5        | 57    |
| S. Australia . . . | 28                  | 7      | 3        | 38    |
| Tasmania . . . . . | 9                   | 2      | 1        | 12    |
| W. Australia . . . | 4                   | 2      | 1        | 7     |
| Total . . . . .    | 236                 | 120    | 35       | 391   |

Australian pasture lands are generally poor; they rarely carry more than 300 sheep to the square mile, whereas in the Pampas of Argentina it is usual to have from 1000 to 1500.

### SOUTH AFRICA

Cape Colony and Natal are devoted rather to pasture than tillage. In 1893 the total area under crops between the two colonies was 1,540,000 acres, nine-tenths under grain. As population increases, the deficit of grain-supply diminishes, the importation having fallen from 50,000 tons in 1885 to 42,000 in 1895. The grain crop of Cape Colony in 1896 reached 200,000 tons, besides which the colonists raise 2000 tons of tobacco and 25,000 pipes of wine, including the well-known Constantia. The vineyards cover 30,000 acres, and contain 87 million vine-stocks, the average yield being 1 gallon of wine from 15 vine-stocks. Natal has 600,000 acres under tillage, a small portion of which is used for sugar-growing. How much sugar is produced cannot be ascertained, but the exportation has fallen 30 per cent. since 1885, and does not now exceed 7000 tons. The value of all farm products is approximately as follows :—

|                    | Cape, £   | Natal, £  | Total, £  |
|--------------------|-----------|-----------|-----------|
| Wool . . . . .     | 1,600,000 | 500,000   | 2,100,000 |
| Grain . . . . .    | 1,100,000 | 400,000   | 1,500,000 |
| Sundries . . . . . | 3,300,000 | 1,100,000 | 4,400,000 |
| Total . . . . .    | 6,000,000 | 2,000,000 | 8,000,000 |

The breed of sheep has been much improved, the average fleece being now 5 lbs., or 40 per cent. heavier than in 1865. Nevertheless the exportation of wool fluctuates exceedingly, viz. :—

|                   | Tons Shipped Yearly |
|-------------------|---------------------|
| 1881-83 . . . . . | 24,000              |
| 1891-93 . . . . . | 42,000              |
| 1894-95 . . . . . | 34,000              |

Angora hair and ostrich feathers likewise form valuable items of rural industry, the exportation showing as follows :—

| Year           | Lbs. Weight |          | Value, £ Sterling |          |
|----------------|-------------|----------|-------------------|----------|
|                | Hair        | Feathers | Hair              | Feathers |
| 1885 . . . . . | 5,700,000   | 250,000  | 220,000           | 350,000  |
| 1895 . . . . . | 11,500,000  | 590,000  | 730,000           | 530,000  |

Thus the aggregate value of these two items rose in ten years from £570,000 to £1,260,000, an increase of 120

per cent. The live stock of the two colonies stands thus approximately :—

|                  | Cape       | Natal   | Total      |            |
|------------------|------------|---------|------------|------------|
|                  |            |         | 1897       | 1889       |
| Sheep . . . . .  | 14,100,000 | 800,000 | 14,900,000 | 14,900,000 |
| Cattle . . . . . | 2,230,000  | 740,000 | 2,970,000  | 2,120,000  |
| Goats . . . . .  | 5,030,000  | 370,000 | 5,400,000  | 5,450,000  |
| Horses . . . . . | 400,000    | 50,000  | 450,000    | 350,000    |

Cape Colony has, moreover, 220,000 ostriches, and the average yield is nearly 3 pounds of feathers, worth 50 shillings, yearly per bird. The agricultural wealth of the two colonies is about 65 millions, of which 51 millions pertain to Cape Colony.

### ARGENTINA

Tillage has made great strides in the last twenty years, owing to the enormous influx of Italians, the cultivated area showing as follows :—

|                   | Acres   |            |
|-------------------|---------|------------|
|                   | 1874    | 1897       |
| Wheat . . . . .   | 270,000 | 5,200,000  |
| Maize . . . . .   | 250,000 | 2,700,000  |
| Alfa, &c. . . . . | 300,000 | 7,300,000  |
| Total . . . . .   | 820,000 | 15,200,000 |

The country, however, is less suited to tillage than grazing, the crops being light and, moreover, constantly exposed to drought and locusts. The wheat crop of the last four years showed as follows :—

| Year              | Tons      |             |           |
|-------------------|-----------|-------------|-----------|
|                   | Crop      | Consumption | Export    |
| 1892-93 . . . . . | 1,400,000 | 550,000     | 850,000   |
| 1893-94 . . . . . | 2,080,000 | 550,000     | 1,530,000 |
| 1894-95 . . . . . | 1,550,000 | 560,000     | 990,000   |
| 1895-96 . . . . . | 1,130,000 | 580,000     | 550,000   |
| 1896-97 . . . . . | 750,000   | 600,000     | 150,000   |
| Average . . . . . | 1,380,000 | 570,000     | 810,000   |

The average for five years gave a mean crop of 9 bushels to the acre, as compared with 10 in Australia and 13 in the United States. The crop for (December) 1897 was expected to produce nearly the same as that for 1893, which would leave 1,400,000 tons for exportation. Maize covers one-third of the area under grain, and averages 30 bushels to the acre, but is a most uncertain crop, the surplus for exportation in 1896 having been only 180,000 tons, whereas in the preceding year it reached 800,000 tons. Alfa is an artificial grass, like clover, used for fattening sheep or cattle, within closed fences, called *Invernadas*; this crop covers about 3 million acres, chiefly in Buenos Ayres and Cordoba. Sugar-planting was begun on an enlarged scale in 1880, the production reaching 60,000 tons in 1892, and 120,000 in 1896: two-thirds are used for home consumption, and 40,000 tons exported, the Government paying a bounty of £8 per ton on the latter. The production of wine has likewise progressed, under the favour of oppressive duties on foreign wines. Vineyards cover about 100,000 acres, and yield a vintage of 35 million gallons: an equal amount of arti-

ficial wines is manufactured at Buenos Ayres and Rosario from all manner of vegetable, and certain deleterious, ingredients, which (as physicians assert) increases the death-rate of those cities. The area under linseed varies exceedingly, the crop fluctuating between 100,000 and 300,000 tons, all of which is exported.

Pastoral farming has always constituted the real wealth of the republic, the Pampas offering plenty of room for countless flocks and herds: nevertheless this branch of industry shows little increase in the number of live stock, viz. :—

|                  | 1888       | 1895        |
|------------------|------------|-------------|
| Sheep . . . . .  | 70,450,000 | 74,400,000  |
| Cattle . . . . . | 22,870,000 | 21,700,000  |
| Horses . . . . . | 4,400,000  | 4,450,000   |
| Total . . . . .  | 97,720,000 | 100,550,000 |

Although the number shows an increase of only 3 per cent. in seven years, the farmers have done much for improving breeds, by importing blood-stock of every kind from England and elsewhere. In this manner the average fleece has risen in twenty years from 3 lbs. to 5 lbs., and the weight of sheep in equal ratio. Many of the best sheep-farms belong to Irish or Scotch settlers, the area, stock, and gross income of which may be classed thus :—

| Class            | Acres  | Sheep   | Income, £ Sterling |
|------------------|--------|---------|--------------------|
| Small . . . . .  | 3,000  | 6,000   | 600                |
| Medium . . . . . | 15,000 | 30,000  | 3,000              |
| Large . . . . .  | 50,000 | 100,000 | 10,000             |

Consul Cowper (1872) stated that the progress of Buenos Ayres was mainly due to the Irish sheep-farmers; they constitute three-fourths of all foreign settlers devoted to pastoral occupations. Cattle-farming is mostly in the hands of natives, an *estancia* being more or less as follows :—

| Class            | Acres   | Cattle | Horses | Income, £ |
|------------------|---------|--------|--------|-----------|
| Small . . . . .  | 30,000  | 5,000  | 1,000  | 3,000     |
| Medium . . . . . | 100,000 | 12,000 | 2,000  | 7,000     |
| Large . . . . .  | 400,000 | 50,000 | 6,000  | 25,000    |

The annual value of all farm products is about 48 millions sterling, viz. :—

|                    | Product, £ | Consumption, £ | Export, £  |
|--------------------|------------|----------------|------------|
| Grain . . . . .    | 15,000,000 | 9,200,000      | 5,800,000  |
| Wool . . . . .     | 8,000,000  | 100,000        | 7,900,000  |
| Meat . . . . .     | 8,400,000  | 5,000,000      | 3,400,000  |
| Hides, &c. . . . . | 6,700,000  | 2,500,000      | 4,200,000  |
| Sundries . . . . . | 9,900,000  | 7,900,000      | 2,000,000  |
| Total . . . . .    | 48,000,000 | 24,700,000     | 23,300,000 |

The farming product is equal to £12 per inhabitant, against £11 in the United States and £17 in Australia. The estimated value of lands, stock, &c., in 1890 was 198 millions sterling: the gross product, therefore, is about 25 per cent. on capital, against 18 per cent. in Australia and 19 in the United States.

The average weight and value of exports in three years ending 1896 were :—

|                            | Quantity  | Value, £   |
|----------------------------|-----------|------------|
| Wool, tons . . . . .       | 184,000   | 7,900,000  |
| Sheepskins, tons . . . . . | 36,000    | 800,000    |
| Hides, tons . . . . .      | 60,000    | 1,200,000  |
| Meat, " . . . . .          | 92,000    | 1,800,000  |
| Cattle, number . . . . .   | 320,000   | 1,200,000  |
| Sheep, " . . . . .         | 350,000   | 200,000    |
| Horses, " . . . . .        | 40,000    | 100,000    |
| Tallow, &c. . . . .        | ...       | 2,000,000  |
| Wheat, tons . . . . .      | 1,100,000 | 4,300,000  |
| Maize, " . . . . .         | 800,000   | 1,600,000  |
| Linseed, " . . . . .       | 210,000   | 1,300,000  |
| Hay, " . . . . .           | 80,000    | 100,000    |
| Total . . . . .            |           | 22,500,000 |

Tillage estimates for 1897 were as follows :—

|                      | Acres     |           |           |            |
|----------------------|-----------|-----------|-----------|------------|
|                      | Wheat     | Maize     | Sundries  | Total      |
| B. Ayres . . . . .   | 1,020,000 | 1,860,000 | 860,000   | 3,740,000  |
| Santa Fé . . . . .   | 3,200,000 | 300,000   | 900,000   | 4,400,000  |
| Entre Rios . . . . . | 600,000   | 100,000   | 200,000   | 900,000    |
| Cordoba, &c. . . . . | 1,100,000 | 400,000   | 4,660,000 | 6,160,000  |
| Total . . . . .      | 5,920,000 | 2,660,000 | 6,620,000 | 15,200,000 |

#### URUGUAY

The area under tillage is supposed to reach 1,200,000 acres, of which two-thirds are under grain, the crops averaging 120,000 tons of wheat and 80,000 of maize, and leaving a small surplus for exportation. Pastoral interests are of superior importance, but the number of live stock does not increase (owing to civil wars), viz. :—

|                    | 1887       | 1896       |
|--------------------|------------|------------|
| Sheep . . . . .    | 15,900,000 | 14,300,000 |
| Cattle . . . . .   | 6,120,000  | 5,250,000  |
| Horses . . . . .   | 410,000    | 400,000    |
| Total . . . . .    | 22,430,000 | 19,950,000 |
| Value, £ . . . . . | 16,800,000 | 15,400,000 |

The total value of farm products yearly is about 10 millions sterling, viz. :—

|                    | Product, £ | Consumption, £ | Export, £ |
|--------------------|------------|----------------|-----------|
| Wool . . . . .     | 2,200,000  | ...            | 2,200,000 |
| Meat . . . . .     | 3,800,000  | 1,200,000      | 2,600,000 |
| Hides, &c. . . . . | 1,800,000  | 300,000        | 1,500,000 |
| Grain, &c. . . . . | 2,200,000  | 1,500,000      | 700,000   |
| Total . . . . .    | 10,000,000 | 3,000,000      | 7,000,000 |

The official value of land and stock is £38,500,000, and allowing for sundries this gives a total farming capital of 42 millions sterling: the gross product, therefore, is about 24 per cent. on capital, as compared with 25 in Argentina and 19 in the United States.

INDIA

The productive area is much too small for the actual population, viz. :—

|                  | ooo omitted |                        | Acres<br>per<br>Inhab. |
|------------------|-------------|------------------------|------------------------|
|                  | Population  | Area, Acres Cultivated |                        |
| Bengal . . .     | 71,300      | 97,300                 | 54,700                 |
| Bombay . . .     | 18,900      | 80,100                 | 30,100                 |
| Madras . . .     | 35,600      | 90,500                 | 29,900                 |
| Assam . . .      | 5,500       | 31,400                 | 2,900                  |
| Punjab . . .     | 20,900      | 70,400                 | 27,000                 |
| Oude . . .       | 12,700      | 15,300                 | 9,400                  |
| Burmah . . .     | 7,600       | 106,100                | 11,100                 |
| N.W. Prov. . .   | 34,300      | 50,500                 | 27,400                 |
| Central, &c. . . | 14,400      | 76,400                 | 34,500                 |
| Total . . .      | 221,200     | 618,000                | 227,000                |
|                  |             |                        | 1.0                    |

The cultivated area is only as one acre per inhabitant, but might be increased 60 per cent., there being, as shown in survey, 137 million acres available for cultivation, viz. :—

|                     | Uncultivated | Available   |
|---------------------|--------------|-------------|
| Bengal . . .        | 42,600,000   | 37,500,000  |
| Madras . . .        | 60,600,000   | 6,700,000   |
| Punjab . . .        | 43,400,000   | 22,300,000  |
| Burmah . . .        | 95,000,000   | 33,000,000  |
| Assam, &c., &c. . . | 149,400,000  | 37,300,000  |
| Total . . .         | 391,000,000  | 136,800,000 |

The principal areas of crops in 1895 were as follows :—

|                      | Acres (ooo omitted) |         |        |        |
|----------------------|---------------------|---------|--------|--------|
|                      | Rice                | Grain   | Cotton | Tea    |
| Bengal . . .         | 39,000              | 13,100  | 200    | 4,200  |
| Bombay . . .         | 1,800               | 18,400  | 2,700  | 1,800  |
| Madras . . .         | 6,600               | 14,900  | 1,500  | 1,700  |
| Punjab . . .         | 900                 | 19,700  | 1,000  | 1,100  |
| N.W. Provinces . . . | 5,100               | 21,100  | 1,200  | 900    |
| Burmah . . .         | 0,400               | 1,100   | 200    | 400    |
| Central, &c. . .     | 9,500               | 24,000  | 2,900  | 3,800  |
| Total . . .          | 69,300              | 112,300 | 9,700  | 13,900 |

The total farming products are apparently of the annual value of nearly 400 millions sterling, of which one-seventh is exported, viz. :—

|                 | Tons (ooo omitted) |        | Value, Millions £ |        |
|-----------------|--------------------|--------|-------------------|--------|
|                 | Crop               | Export | Crop              | Export |
| Grain . . .     | 32,400             | 400    | 130               | 2.2    |
| Rice . . .      | 22,000             | 1,700  | 88                | 9.2    |
| Cotton . . .    | 800                | 240    | 20                | 7.5    |
| Jute . . .      | 1,100              | 650    | 10                | 7.1    |
| Oil-seeds . . . | 1,000              | 900    | 9                 | 8.2    |
| Opium . . .     | 60                 | 50     | 7                 | 6.1    |
| Tea . . .       | 70                 | 60     | 6                 | 5.5    |
| Coffee . . .    | 40                 | 15     | 4                 | 1.5    |
| Sugar . . .     | 120                | 60     | 1                 | 0.6    |
| Sundries . . .  | ...                | ...    | 115               | 8.1    |
| Total . . .     | ...                | ...    | 390               | 56.0   |

According to the census of 1891 the agricultural population amounted to 172 millions, from which it would appear that the farm products average 40 rupees or 46 shillings per head, say £10 a year for each adult male peasant.

CEYLON

One-eighth of the island is under crops, the whole area showing thus :—

|                      | Acres      |
|----------------------|------------|
| Rice . . .           | 750,000    |
| Tea, coffee, &c. . . | 1,290,000  |
| Pasture . . .        | 910,000    |
| Unproductive . . .   | 13,270,000 |
| Total . . .          | 16,200,000 |

Coffee-growing and chinchona have declined, and other products show a great increase, the exports having been as follows :—

|                    | 1873   | 1887    | 1895   |
|--------------------|--------|---------|--------|
| Coffee, tons . . . | 49,000 | 9,000   | 3,000  |
| Tea, " . . .       | ...    | 6,000   | 44,000 |
| Oil, " . . .       | 6,000  | 16,000  | 21,000 |
| Cocoa, " . . .     | ...    | 800     | 1,400  |
| Chinchona, £ . . . | ...    | 170,000 | 4,000  |

The aggregate value of the above exports was £4,400,000 in 1873, falling to £1,900,000 in 1887, and amounting to £3,500,000 in 1895. No less than 80 per cent. of the population is agricultural, the number of male adults so employed being 850,000.

JAVA

The *Statesman's Year-book* has the following official returns :—

|                    | 1890      | 1894      |
|--------------------|-----------|-----------|
| Rice, acres . . .  | 4,390,000 | 5,060,000 |
| Maize, " . . .     | 1,880,000 | 1,930,000 |
| Sundries, " . . .  | 2,070,000 | 2,380,000 |
| Total, acres . . . | 8,340,009 | 9,370,000 |

The principal crops were as follows :—

|                    | 1891    | 1894    |
|--------------------|---------|---------|
| Sugar, tons . . .  | 420,000 | 480,000 |
| Coffee, " . . .    | 51,000  | 58,000  |
| Chinchona, " . . . | 3,100   | 3,200   |
| Tea, " . . .       | 3,300   | 4,100   |
| Tobacco, " . . .   | 8,200   | 10,300  |

Agricultural exports of Java average 12 millions sterling, and are mostly sold in Holland, the Dutch Government having a profit of about 25 per cent.

JAPAN

The area under crops is one-seventh of the total, viz. :—

|                   | 1891       | 1895       |
|-------------------|------------|------------|
| Rice, acres . . . | 6,730,000  | 7,020,000  |
| Grain, " . . .    | 4,170,000  | 4,340,000  |
| Pasture, " . . .  | 33,600,000 | 33,600,000 |
| Waste, " . . .    | 34,900,000 | 34,440,000 |
| Total . . .       | 79,400,000 | 79,400,000 |

The principal crops were :—

|                      | 1891      | 1895      |
|----------------------|-----------|-----------|
| Rice, tons . . .     | 5,300,000 | 5,000,000 |
| Wheat, " . . .       | 300,000   | 500,000   |
| Barley, rye, " . . . | 1,020,000 | 1,900,000 |
| Sugar, " . . .       | 50,000    | 52,000    |

The value of tillage products sums up 45 millions sterling, or nearly £4 per acre. Live stock comprises 1,500,000 horses and 1,100,000 cattle. The production of raw silk averages 16 million lbs. yearly, worth 8 millions sterling.

#### BRAZIL

Although this country has the same area as the United States, the total extent of productive land does not exceed the area covered by the farms of the single State of Ohio, or about 18 million acres. The chief product is coffee, which has not declined since the emancipation of negroes (1888), as was expected, the crop showing thus:—

| Year       | Tons    | Year       | Tons    |
|------------|---------|------------|---------|
| 1880 . . . | 333,000 | 1892 . . . | 444,000 |
| 1885 . . . | 389,000 | 1897 . . . | 590,000 |

The value of the coffee-crop is about 36 millions sterling, most of it being exported to the United States. Sugar, cotton, tobacco, and Paraguayan tea are also largely exported, as well as maize and mandioca; these items making up about 14 millions sterling. Cattle-farming is almost confined to the southernmost State, Rio Grande do Sul, the *saladeros* of Pelotas killing 3000 head daily in the season. The sum total of tillage and pastoral industry in Brazil does not exceed 60 millions sterling, that is, about the same as Canada.

#### WEST INDIES, BRITISH

Sugar and bananas are the principal products, the cultivated area showing thus:—

|                   | Acres   |          |         |
|-------------------|---------|----------|---------|
|                   | Sugar   | Sundries | Total   |
| Jamaica . . .     | 30,000  | 150,000  | 180,000 |
| Trinidad . . .    | 60,000  | 140,000  | 200,000 |
| Barbadoes . . .   | 30,000  | 70,000   | 100,000 |
| Guiana . . .      | 70,000  | 10,000   | 80,000  |
| Antigua, &c. . .  | 50,000  | 150,000  | 200,000 |
| West Indies . . . | 240,000 | 520,000  | 760,000 |

The export of sugar has notably declined in quantity in the last fifteen years, and still more in value, viz:—

| Average       | Tons    | Value, £  | £ per Ton |
|---------------|---------|-----------|-----------|
| 1881-85 . . . | 290,000 | 4,730,000 | 16.3      |
| 1891-95 . . . | 265,000 | 3,430,000 | 13.0      |

The quantities shipped gave the following yearly averages:—

|                      | 1881-83 | 1887-89 | 1893-95 |
|----------------------|---------|---------|---------|
| Guiana, . . tons . . | 111,000 | 120,000 | 104,000 |
| Trinidad, . . .      | 51,000  | 57,000  | 49,000  |
| Barbadoes, . . .     | 47,000  | 59,000  | 49,000  |
| Jamaica, . . .       | 27,000  | 21,000  | 20,000  |
| Antigua, &c., . .    | 49,000  | 51,000  | 37,000  |
| West Indies . . .    | 285,000 | 308,000 | 259,000 |

The cultivation of fruit for the seaboard cities of the United States has increased very rapidly, the values exported from the single island of Jamaica showing:—

|                               | 1885-86 | 1891-96 |
|-------------------------------|---------|---------|
| Bananas, . . . £ sterling . . | 148,000 | 372,000 |
| Oranges and nuts, . . .       | 56,000  | 148,000 |
| Total, £ . . .                | 204,000 | 520,000 |

Not far from the West Indies are the Bermuda Islands, where small farms are very productive. The official

report for 1897 shows that one farmer gets £100 an acre by growing lilies. Farms range from 5 to 25 acres, the gross product averaging £40 per acre.

#### FREEJEE ISLANDS

In this little group there are 3000 white settlers, who have 40,000 acres under cultivation, one-half under sugar, of which they export 25,000 tons yearly, the exportation having doubled since 1886. Live stock comprises 20,000 cattle, sheep, and Angora goats.

#### CHILI

This is essentially an agricultural country, with 7 million acres under crops, the production of grain ranging from 800,000 to 900,000 tons, of which one-fourth is exported. Live stock is insufficient, the deficit of meat-supply being met by the importation of cattle and sheep across the Andes from Argentina.

#### ALGERIA

Notwithstanding the great efforts and liberality of the French Government this colony makes slow progress in agriculture: the production of grain in 1895 compares with 1886 as follows:—

|               | Acres     |           | Tons      |           |
|---------------|-----------|-----------|-----------|-----------|
|               | 1886      | 1895      | 1886      | 1895      |
| Wheat . . .   | 3,120,000 | 3,170,000 | 630,000   | 840,000   |
| Barley . . .  | 3,600,000 | 3,470,000 | 950,000   | 1,070,000 |
| Oats, &c. . . | 240,000   | 290,000   | 80,000    | 110,000   |
| Total . . .   | 6,960,000 | 6,930,000 | 1,660,000 | 2,020,000 |
| French . . .  | 1,060,000 | 1,090,000 | 290,000   | 430,000   |
| Native . . .  | 5,900,000 | 5,840,000 | 1,370,000 | 1,590,000 |
| Total . . .   | 6,960,000 | 6,930,000 | 1,660,000 | 2,020,000 |

Although the area is less, the weight of crop has increased more than 20 per cent., probably owing to improved mode of agriculture. The average yield per acre shows as follows:—

|                        | Bushels per Acre |      |
|------------------------|------------------|------|
|                        | 1886             | 1895 |
| Wheat . . . . .        | 8.0              | 10.6 |
| Barley . . . . .       | 10.5             | 12.3 |
| All grain . . . . .    | 9.5              | 11.6 |
| French farms . . . . . | 11.0             | 15.8 |
| Arab „ . . . . .       | 9.3              | 10.8 |

Vine-growing has progressed very satisfactorily, there being at present 30,000 vineyards, three-fifths belonging to French or other European settlers. The figures of this branch of industry in 1895 compare with 1886 as follows:—

|                | Acres   | Gallons    | Do. per Acre |
|----------------|---------|------------|--------------|
| 1886 . . . . . | 190,000 | 36,000,000 | 189          |
| 1895 . . . . . | 300,000 | 79,000,000 | 263          |

On the other hand farm stock shows a decline, viz:—

|                | Number (000 omitted) |       |        |       |
|----------------|----------------------|-------|--------|-------|
|                | Cattle               | Sheep | Horses | Goats |
| 1886 . . . . . | 1,190                | 9,360 | 310    | 4,670 |
| 1895 . . . . . | 1,130                | 7,700 | 350    | 3,370 |

Europeans own hardly 10, Arabs 90, per cent. of the live stock, which includes also 250,000 camels.

# TUNIS

The territory covers nearly 29 million acres, of which only one-fourth is under cultivation, viz. :—

|                      | Acres      |
|----------------------|------------|
| Grain . . . . .      | 2,300,000  |
| Olives, &c. . . . .  | 4,500,000  |
| Pasture, &c. . . . . | 22,000,000 |
| Total . . . . .      | 28,800,000 |

Products average about 400,000 tons of grain, 4,000,000 gallons of wine, and 2,000,000 gallons of olive oil. The value of tillage and pastoral products exported (mostly to France) amounts to £1,300,000 per annum. Live stock is comparatively trifling, 1,200,000 sheep, 680,000 goats, 230,000 cattle, 120,000 camels; the pasture lands could carry much more.

# CENTRAL AMERICA

The little republics of Guatemala, Costa Rica, Nicaragua, Salvador, and Honduras, have an aggregate of about 900,000 acres under crops, mostly maize and other grain. There are 200,000 acres under coffee, average crop 50,000 tons, Guatemala standing for two-thirds of the total. The sugar crop of these republics is about 60,000 tons. See Part I.

# CUBA

Before the revolution of 1896 there were 91,000 estates, covering altogether 2,800,000 acres, being an average of 30 acres each. The production of sugar, until the present revolution, was usually a million tons yearly, of which three-fourths went to the United States. The weight of tobacco and cigars exported averaged 120,000 tons. The total value of farm products ranged from 20 to 24 millions sterling, nine-tenths of the island being unpopulated and uncultivated, owing to the wretched system of government.

The adjacent island of Porto Rico has about 600,000 acres under cultivation, and exports coffee, sugar, and tobacco to the value of 3 millions sterling yearly.

# CANARY ISLANDS

Free trade was introduced in 1890, and the result has been a marvellous improvement in the condition of these islands, which were previously subject to constant misery and periodical famines. The total cultivated area hardly exceeds 500,000 acres, but the climate and soil are so favourable for early fruits and vegetables that the African steamers which touch weekly at Tenerife and Las Palmas convey cargoes of same to the London and other English markets. Farming is now so prosperous that land fetches high rents, and cannot be bought under £50 an acre.

# EGYPT

The cultivated area shows a slight increase since the country was taken by the British forces in 1883. It was 4,960,000 acres in 1880, and the returns for 1891 show 5,170,000, that is, an increase of 4 per cent. There are 1,140,000 acres under double cultivation, which explains why the acreage of crops in the following table exceeds the total cultivated area, viz. :—

|                       | 1888      | 1891      |
|-----------------------|-----------|-----------|
| Wheat . . . . .       | 1,290,000 | 1,250,000 |
| Other grain . . . . . | 3,205,000 | 2,960,000 |
| Cotton . . . . .      | 900,000   | 890,000   |
| Clover, &c. . . . .   | 980,000   | 1,230,000 |
| Total . . . . .       | 6,375,000 | 6,330,000 |

The value of crops was estimated in 1884 at 30 millions sterling, but at present hardly reaches 25 millions. See *Land*, and Part I., page 39.

# AGRICULTURAL COLLEGES

So much attention has been given of late years to agricultural science, that most nations have a number of institutions for the purpose.

*France*.—The Agronomic Institute of Paris, and 167 Agricultural Schools, receive from Government yearly grants amounting to £182,000 sterling.

*Germany*.—There are 31 Agricultural Colleges maintained by the State; one of these is Hohenheim, near Stuttgart, which receives £6000 a year. There are Agricultural Schools in every district of Bavaria, the State defraying 50 per cent. of their cost. In other parts of Germany there are similar institutions, which receive on an average £300 a year each per annum.

*Austria* (proper).—There were 65 Agricultural Schools in 1880, and the number has now risen to 118, of which Bohemia has 45. The annual expenditure is £105,000, the State contributing £45,000, the local authorities £30,000, and students the rest. The State also gives £5000 a year to travelling lecturers.

*Hungary*.—At Magyar-Ovar is the great Academy of Agriculture. There are also 4 Agricultural Colleges and 35 Schools, of which 20 are maintained by the Hungarian Treasury at an annual cost of £43,000. These schools turn out 1100 agricultural graduates or licentiates yearly.

*Switzerland*.—There are 16 Agricultural Schools, maintained at a cost of £12,600, the Cantons giving two-thirds, the Federal Treasury one-third.

*United States*.—There are 65 Agricultural Colleges, with 1280 professors and 17,600 students. About 3000 graduate yearly, the course being one of four years. Income £840,000 sterling, of which Congress gives £300,000, the local authorities £240,000. The buildings represent an outlay of £3,700,000 sterling, including £750,000 for the libraries and apparatus.

# ALCOHOL

The average production of liquors in five years ending 1895–96, and the equivalent of all in alcohol, were as follows :—

|                       | Millions of Gallons |       |         | All Red.<br>to<br>Alcohol |
|-----------------------|---------------------|-------|---------|---------------------------|
|                       | Wine                | Beer  | Spirits |                           |
| United Kingdom . . .  | ...                 | 1,180 | 47      | 78                        |
| France . . . . .      | 840                 | 194   | 99      | 143                       |
| Germany . . . . .     | 70                  | 1,230 | 136     | 130                       |
| Russia . . . . .      | 40                  | 90    | 154     | 85                        |
| Austria . . . . .     | 115                 | 376   | 102     | 80                        |
| Italy . . . . .       | 605                 | 2     | 8       | 65                        |
| Spain . . . . .       | 460                 | 21    | ...     | 47                        |
| Portugal . . . . .    | 70                  | ...   | ...     | 7                         |
| Scandinavia . . . . . | ...                 | 86    | 16      | 12                        |
| Holland . . . . .     | ...                 | 50    | 15      | 10                        |
| Belgium . . . . .     | ...                 | 260   | 13      | 18                        |
| Switzerland . . . . . | 30                  | 34    | 2       | 6                         |
| Various . . . . .     | 190                 | 2     | 2       | 20                        |
| Europe . . . . .      | 2,420               | 3,525 | 594     | 701                       |
| United States . . .   | 20                  | 865   | 72      | 77                        |
| Total . . . . .       | 2,440               | 4,390 | 666     | 778                       |

Consumption during the same five years was approximately thus :—

|                          | Million Gallons Yearly |       |         | All Red.<br>to<br>Alcohol |
|--------------------------|------------------------|-------|---------|---------------------------|
|                          | Wine                   | Beer  | Spirits |                           |
| United Kingdom . . . . . | 15                     | 1,160 | 39      | 73                        |
| France . . . . .         | 990                    | 196   | 71      | 143                       |
| Germany . . . . .        | 60                     | 1,230 | 99      | 111                       |
| Russia . . . . .         | 45                     | 50    | 125     | 71                        |
| Austria . . . . .        | 130                    | 376   | 97      | 78                        |
| Italy . . . . .          | 570                    | 3     | 8       | 61                        |

The above is exclusive of Temperance drinks, which according to Bannister, Government analyst, contain from 3 to 13 per cent. of alcohol.

### BEER

Consumption in the principal countries has been approximately as follows :—

|                          | Million Gallons |       | Gallons per Head |      |
|--------------------------|-----------------|-------|------------------|------|
|                          | 1885            | 1895  | 1885             | 1895 |
| United Kingdom . . . . . | 976             | 1,160 | 27.1             | 29.6 |
| Germany . . . . .        | 908             | 1,216 | 19.8             | 23.5 |
| Belgium . . . . .        | 209             | 271   | 35.6             | 42.2 |
| Austria . . . . .        | 279             | 410   | 7.1              | 9.5  |
| France . . . . .         | 183             | 197   | 4.6              | 5.1  |
| Scandinavia . . . . .    | 60              | 90    | 8.5              | 9.7  |
| Russia, &c. . . . .      | 148             | 196   | 1.0              | 1.1  |
| Europe . . . . .         | 2,763           | 3,540 | 7.5              | 9.0  |
| United States . . . . .  | 497             | 870   | 8.8              | 12.7 |
| Total . . . . .          | 3,260           | 4,410 | 7.8              | 9.8  |

A bushel of barley yields 15 gallons of beer in Great Britain, 25 in Germany. Five bushels of barley give 4 of malt.

### SPIRITS

Consumption in the principal countries was approximately thus :—

|                          | Million Gallons |      | Gallons per Head |      |
|--------------------------|-----------------|------|------------------|------|
|                          | 1885            | 1895 | 1885             | 1895 |
| United Kingdom . . . . . | 35              | 39   | 0.96             | 1.00 |
| Germany . . . . .        | 70              | 98   | 1.58             | 1.90 |
| France . . . . .         | 61              | 68   | 1.69             | 1.78 |
| Austria . . . . .        | 84              | 105  | 2.20             | 2.60 |
| Russia . . . . .         | 137             | 132  | 1.46             | 1.03 |
| Scandinavia . . . . .    | 17              | 17   | 2.10             | 1.90 |

| Algeria . . . . .       | 70                         | 90      | + 20       |
| Argentina . . . . .     | 20                         | 33      | + 13       |
| Chile . . . . .         | 30                         | 44      | + 14       |
| South Africa . . . . .  | 3                          | 3       | -          |
| Brazil . . . . .        | 4                          | 9       | + 5        |
| Australia . . . . .     | 2                          | 3       | + 1        |
| United States . . . . . | 20                         | 20      | -          |
| Total . . . . .         | 2,663                      | 2,462   | - 201      |

The world produces at present 8 per cent. less wine than it did in the decade ending 1894. A vineyard has usually from 3000 to 5000 vine-stalks per acre, 20 vines producing as a rule one gallon of wine. In 1890 it was stated that 10,000 vines produced yearly the following quantity of wine :—

| In                      | Galls. | In                    | Galls. |
|-------------------------|--------|-----------------------|--------|
| Australia . . . . .     | 320    | Germany . . . . .     | 530    |
| United States . . . . . | 320    | Switzerland . . . . . | 930    |
| France . . . . .        | 400    | Cape Colony . . . . . | 2800   |

Cape Colony has 20,000 acres of vineyards containing 60 million stalks. See *Wine*, p. 597.

## UNITED KINGDOM

The quantity and value of liquor consumed in the United Kingdom in 1896 were :—

|                          | Millions of Gallons |         |       |            |
|--------------------------|---------------------|---------|-------|------------|
|                          | Beer                | Spirits | Wines | Cider, &c. |
| England . . . . .        | 1,044               | 27      | 13.4  | 14.0       |
| Scotland . . . . .       | 63                  | 8       | 1.4   | 0.5        |
| Ireland . . . . .        | 99                  | 5       | 1.0   | 0.5        |
| United Kingdom . . . . . | 1,206               | 40      | 15.8  | 15.0       |

Reducing all to alcohol, and taking the wholesale value (free of duty), the shares that correspond to the three kingdoms are as follows :—

|                      | Gallons Alcohol | Value, £   | Per Inhabitant |           |
|----------------------|-----------------|------------|----------------|-----------|
|                      |                 |            | Gallons        | Shillings |
| England . . . . .    | 62,500,000      | 67,000,000 | 2.0            | 43        |
| Scotland . . . . .   | 7,100,000       | 6,700,000  | 1.7            | 32        |
| Ireland . . . . .    | 7,200,000       | 7,300,000  | 1.6            | 32        |
| U. Kingdom . . . . . | 76,800,000      | 81,000,000 | 1.9            | 41        |

The quantities of alcohol and the money value of each kind of liquor were :—

|                    | Gallons Alcohol | Value, £   |
|--------------------|-----------------|------------|
| Beer . . . . .     | 54,300,000      | 60,300,000 |
| Spirits . . . . .  | 19,800,000      | 14,800,000 |
| Wines, &c. . . . . | 2,700,000       | 5,900,000  |
| Total . . . . .    | 76,800,000      | 81,000,000 |

The consumption of liquor in the United Kingdom has been as follows :—

|                   | Millions of Gallons |      |      |       |
|-------------------|---------------------|------|------|-------|
|                   | 1886                | 1876 | 1886 | 1896  |
| Beer . . . . .    | 890                 | 990  | 977  | 1,206 |
| Spirits . . . . . | 30                  | 42   | 34   | 40    |
| Wines . . . . .   | 13                  | 18   | 13   | 16    |

## Gallons per Head

|                              | 1886 | 1876 | 1886 | 1896 |
|------------------------------|------|------|------|------|
| Beer . . . . .               | 29.7 | 30.0 | 26.9 | 30.9 |
| Spirits . . . . .            | 1.0  | 1.3  | 0.9  | 1.0  |
| Wine . . . . .               | 0.4  | 0.5  | 0.4  | 0.4  |
| Equivalent alcohol . . . . . | 1.9  | 2.1  | 1.7  | 1.9  |

Reducing all to alcohol, the consumption per head is the same as it was 30 years ago.

## GERMANY

In 1895 were produced 66 million gallons of alcohol, from 2,100,000 tons of potatoes and 350,000 tons of grain; 54 million gallons were used for liquor, the rest for manufactures.

## UNITED STATES

The production of spirits and beer, and the amount paid for Inland Revenue (which includes both liquor and tobacco dues) in 1897 were :—

|                        | Spirits, Gallons | Beer, Barrels | In. Rev. £ Sterling |
|------------------------|------------------|---------------|---------------------|
| Illinois . . . . .     | 22,700,000       | 3,300,000     | 6,600,000           |
| New York . . . . .     | 3,800,000        | 9,500,000     | 3,800,000           |
| Kentucky . . . . .     | 6,800,000        | 400,000       | 3,300,000           |
| Ohio . . . . .         | 7,500,000        | 2,600,000     | 2,600,000           |
| Pennsylvania . . . . . | 1,200,000        | 3,900,000     | 2,400,000           |
| Indiana . . . . .      | 8,700,000        | 600,000       | 1,800,000           |
| Other States . . . . . | 13,600,000       | 14,200,000    | 10,000,000          |
| Union . . . . .        | 64,300,000       | 34,500,000    | 30,500,000          |

The amount levied on spirits and beer was £24,000,000 sterling, equal to a liquor tax of 80 pence per inhabitant.

## TAXES ON ALCOHOL

In the United Kingdom these taxes have risen as follows :—

|                | Beer, £    | Wine, Spirits, £ | Total, £   |
|----------------|------------|------------------|------------|
| 1866 . . . . . | 6,790,000  | 15,350,000       | 22,140,000 |
| 1876 . . . . . | 8,590,000  | 23,040,000       | 31,630,000 |
| 1885 . . . . . | 8,550,000  | 19,530,000       | 28,080,000 |
| 1896 . . . . . | 10,900,000 | 21,630,000       | 32,530,000 |

The duties on British spirits and on beer in the three kingdoms were in 1897 as follows :—

|                      | Spirits, £ | Beer, £    | Total, £   | Shillings p. Inhab. |
|----------------------|------------|------------|------------|---------------------|
| England . . . . .    | 6,450,000  | 9,790,000  | 16,240,000 | 11                  |
| Scotland . . . . .   | 6,130,000  | 600,000    | 6,730,000  | 32                  |
| Ireland . . . . .    | 4,230,000  | 930,000    | 5,160,000  | 23                  |
| U. Kingdom . . . . . | 16,810,000 | 11,320,000 | 28,130,000 | 14                  |

The above is exclusive of duties on wines and imported spirits, which if included would bring up the liquor duties of the United Kingdom to 16 shillings per inhabitant.

In France they were as follows :—

| Year           | Beer, £   | Wine, £   | Spirits, £ | Total, £   |
|----------------|-----------|-----------|------------|------------|
| 1885 . . . . . | 980,000   | 6,600,000 | 9,720,000  | 17,300,000 |
| 1896 . . . . . | 1,000,000 | 8,800,000 | 10,700,000 | 20,500,000 |

In Holland they were :—

| Year           | Beer, £ | Wine, £ | Spirits, £ | Total, £  |
|----------------|---------|---------|------------|-----------|
| 1886 . . . . . | 100,000 | 150,000 | 1,950,000  | 2,200,000 |
| 1896 . . . . . | 100,000 | 150,000 | 2,250,000  | 2,500,000 |

In Belgium they were :—

| Year           | Beer, £ | Wine, £ | Spirits, £ | Total, £  |
|----------------|---------|---------|------------|-----------|
| 1885 . . . . . | 600,000 | 200,000 | 1,400,000  | 2,200,000 |
| 1896 . . . . . | 800,000 | 300,000 | 1,740,000  | 2,840,000 |

In the United States in 1897 the tax on spirits was £17,000,000 or 66 pence per gallon, that on beer was £7,000,000 or 48 pence per barrel.

The taxes on liquor were :—

| Year | Beer, £   | Wine, £ | Spirits, £ | Total, £   |
|------|-----------|---------|------------|------------|
| 1888 | 5,000,000 | 800,000 | 15,000,000 | 20,800,000 |
| 1896 | 7,200,000 | 700,000 | 16,100,000 | 24,000,000 |

In Switzerland the tax on spirits produced :—

| Year           | Gallons   | Tax, £  |
|----------------|-----------|---------|
| 1891 . . . . . | 1,500,000 | 240,000 |
| 1895 . . . . . | 1,200,000 | 200,000 |

In Germany the liquor taxes in 1895 amounted to £11,900,000.

## ANIMALS

Two dogs can draw a sleigh carrying 250 lbs. a distance of 20 miles in 5 hours; eight will draw a sleigh of 3 persons at the rate of 5 miles an hour, and travel 60 miles a day. A reindeer will draw a sleigh 5 feet long and 2 feet wide, carrying one passenger, 110 miles in a day.

The highest recorded price for a dog is £1500, paid by Mr. Reick of New York for a dog called Sir Belvidere. The highest price for a horse has been £25,000, paid by the Czar for an Irish horse called Galtee More. See *Animals*, page 161, and *Dogs*, page 691.

## AQUEDUCTS

Since 1890 five great aqueducts have been constructed or enlarged, viz :—

|                      | Miles | Cost, £   | Gallons Daily |
|----------------------|-------|-----------|---------------|
| New York . . . . .   | 40    | 5,200,000 | ...           |
| Bombay . . . . .     | 65    | ...       | ...           |
| Liverpool . . . . .  | 68    | 2,500,000 | ...           |
| Manchester . . . . . | 100   | 4,500,000 | 100,000,000   |
| Glasgow . . . . .    | 35    | 3,000,000 | 50,000,000    |

See *Water*, page 588, and page 818.

## ARMY

### UNITED KINGDOM

The position of the British army in 1896, compared with 1888, showed thus :—

|                          | 1888    | 1896    |
|--------------------------|---------|---------|
| England . . . . .        | 83,000  | 76,000  |
| Scotland . . . . .       | 5,000   | 4,000   |
| Ireland . . . . .        | 30,000  | 26,000  |
| United Kingdom . . . . . | 118,000 | 106,000 |
| India . . . . .          | 72,000  | 78,000  |
| Egypt . . . . .          | 6,000   | 4,000   |
| Colonies . . . . .       | 25,000  | 34,000  |
| Total . . . . .          | 221,000 | 222,000 |

The whole military force of the British empire shows thus :—

|                                | 1888    | 1896    |
|--------------------------------|---------|---------|
| Regular army . . . . .         | 221,000 | 222,000 |
| Militia and reserves . . . . . | 174,000 | 210,000 |
| Volunteers . . . . .           | 222,000 | 232,000 |
| Indian troops . . . . .        | 145,000 | 145,000 |
| Colonial troops . . . . .      | 15,000  | 15,000  |
| Total . . . . .                | 777,000 | 824,000 |

The different arms in 1896 stood as follows :—

|                        | Regulars | Indians | Volunteers, &c. | Total   |
|------------------------|----------|---------|-----------------|---------|
| Infantry . . . . .     | 126,000  | 113,000 | 341,000         | 580,000 |
| Cavalry . . . . .      | 18,000   | 23,000  | 19,000          | 60,000  |
| Artillery . . . . .    | 31,000   | 5,000   | 70,000          | 106,000 |
| Engineers, &c. . . . . | 47,000   | 4,000   | 27,000          | 78,000  |
| Total . . . . .        | 222,000  | 145,000 | 457,000         | 824,000 |

There are 12,000 officers in the regular army: the nationality of the men, including petty officers, is :—

|                    | Number in 1896 | Percentage |      |
|--------------------|----------------|------------|------|
|                    |                | 1883       | 1896 |
| English . . . . .  | 163,000        | 70         | 78   |
| Scotch . . . . .   | 16,000         | 8          | 8    |
| Irish . . . . .    | 25,000         | 20         | 12   |
| Colonial . . . . . | 5,000          | 2          | 2    |
| Total . . . . .    | 20,000         | 100        | 100  |

Compared with population we find that England produces 5 soldiers per thousand inhabitants, Scotland 4, and Ireland 6. Between regulars and irregulars the British army amounts to 679,000 men, equal to 17 per thousand, or nearly 2 per cent. of the population. The cost of the army in 1897 was :—

|                               | £          |
|-------------------------------|------------|
| Effective service . . . . .   | 15,000,000 |
| Sundries and extras . . . . . | 6,000,000  |
| Total . . . . .               | 21,000,000 |

The effective army represents an annual cost of £70 per man, a higher ratio than in other European countries.

The age of the regular infantry is now much younger than before, viz :—

| Years              | 1846  | 1870  | 1897  |
|--------------------|-------|-------|-------|
| Under 20 . . . . . | 17.7  | 16.0  | 23.1  |
| 20-30 . . . . .    | 62.0  | 52.5  | 71.0  |
| 30-40 . . . . .    | 18.2  | 30.4  | 5.6   |
| Over 40 . . . . .  | 2.1   | 1.1   | 0.3   |
| Total . . . . .    | 100.0 | 100.0 | 100.0 |

### FRANCE

The peace footing in 1897 stood as follows :—

|                        | France  | Colonies | Total   |
|------------------------|---------|----------|---------|
| Infantry . . . . .     | 342,000 | 36,000   | 378,000 |
| Cavalry . . . . .      | 70,000  | 7,000    | 77,000  |
| Artillery . . . . .    | 81,000  | 7,000    | 88,000  |
| Engineers, &c. . . . . | 42,000  | 2,000    | 44,000  |
| Total . . . . .        | 535,000 | 52,000   | 587,000 |

If the gendarmerie were included, the total would reach 610,000 men. The first line of reserve counts 1,740,000 men, available in case of war. The second and third reserves, suitable for garrison duty, number two millions. Between the army and first reserve France is able to put nearly 2½ millions of men under arms, equal to 62 per thousand inhabitants, as compared with 17 per thousand in the United Kingdom. The cost of the War Office is £28,000,000, equal to £48 a man, against £70 for the British army.

## GERMANY

There are 21 army-corps, of which 12 bear Prussian titles. The peace footing in 1897 showed thus:—

|                        | Officers and Men | Horses |
|------------------------|------------------|--------|
| Infantry . . . . .     | 396,000          | ...    |
| Cavalry . . . . .      | 69,000           | 64,000 |
| Artillery . . . . .    | 86,000           | 29,000 |
| Engineers, &c. . . . . | 34,000           | 4,000  |
| Total . . . . .        | 585,000          | 97,000 |

Between the men under colours and the first line of reserve Germany can at any moment call out 3,000,000 effective combatants. The War Office expenditure in 1897 was £24,000,000, equal to £41 per man, against £48 in France.

## RUSSIA

Peace footing stands thus:—

|                        | Officers and Men |         |         | Number of Horses |
|------------------------|------------------|---------|---------|------------------|
|                        | Europe           | Siberia | Total   |                  |
| Infantry . . . . .     | 521,000          | 61,000  | 582,000 | 9,000            |
| Cavalry . . . . .      | 115,000          | 9,000   | 124,000 | 106,000          |
| Artillery . . . . .    | 105,000          | 4,000   | 109,000 | 28,000           |
| Engineers, &c. . . . . | 51,000           | 3,000   | 54,000  | 12,000           |
| Total . . . . .        | 792,000          | 77,000  | 869,000 | 155,000          |

War footing is shown as follows:—

|                        | Regulars  | Reserve   | Total     | Horses  |
|------------------------|-----------|-----------|-----------|---------|
| Infantry . . . . .     | 890,000   | 520,000   | 1,410,000 | 85,000  |
| Cavalry . . . . .      | 115,000   | 165,000   | 280,000   | 255,000 |
| Artillery . . . . .    | 150,000   | 110,000   | 260,000   | 210,000 |
| Engineers, &c. . . . . | 105,000   | 475,000   | 580,000   | 30,000  |
| Total . . . . .        | 1,260,000 | 1,270,000 | 2,530,000 | 580,000 |

The artillery has 1800 field-guns on peace footing, and 5260 in time of war. It may be doubted whether the actual number of men under the colours is the same as above given. At the siege of Plevna the difficulties of the Russian army were apparent. Probably the effective army numbers 600,000 men, and this could be doubled in the event of war.

Army expenditure in 1897 reached £28,500,000, equal to £33 per man, peace footing, as compared with £41 in Germany.

## AUSTRIA-HUNGARY

The army on peace and on war footing is shown thus:—

|                 | Officers | Men       | Horses  | Guns  |
|-----------------|----------|-----------|---------|-------|
| Peace . . . . . | 25,000   | 335,000   | 47,000  | 1,050 |
| War . . . . .   | 45,000   | 1,830,000 | 280,000 | 1,860 |

Peace footing in 1896 stood as follows:—

|                        | Officers and Men | Horses |
|------------------------|------------------|--------|
| Infantry . . . . .     | 234,000          | 1,000  |
| Cavalry . . . . .      | 54,000           | 43,000 |
| Artillery . . . . .    | 38,000           | 2,000  |
| Engineers, &c. . . . . | 34,000           | 1,000  |
| Total . . . . .        | 360,000          | 47,000 |

Army expenditure amounts to £15,000,000, equal to £41 per man, the same as in Germany. The War Office of Vienna spends £12,000,000 for the common defence of the monarchy, besides which the Austrian Diet spends £2,000,000, the Hungarian £1,000,000, for war purposes.

## ITALY

There are 12 army-corps, in all 840,000 men; but the number under the colours rarely exceeds 240,000.

|                        | Regulars | Reserve | Militia | Total     |
|------------------------|----------|---------|---------|-----------|
| Infantry . . . . .     | 160,000  | 450,000 | 340,000 | 950,000   |
| Cavalry . . . . .      | 25,000   | 20,000  | 55,000  | 100,000   |
| Artillery . . . . .    | 32,000   | 93,000  | 55,000  | 180,000   |
| Engineers, &c. . . . . | 23,000   | 37,000  | 40,000  | 100,000   |
| Total . . . . .        | 240,000  | 600,000 | 490,000 | 1,330,000 |

This total is equal to 43 per thousand of the population. Army expenditure amounts to £10,800,000, equal to £45 per man, against £41 in Germany.

## SPAIN

In normal times the peace and war footing are as follows:—

|                        | Peace   | War     |
|------------------------|---------|---------|
| Infantry . . . . .     | 80,000  | 140,000 |
| Cavalry . . . . .      | 15,000  | 20,000  |
| Artillery . . . . .    | 10,000  | 12,000  |
| Engineers, &c. . . . . | 5,000   | 12,000  |
| Total . . . . .        | 110,000 | 184,000 |

In 1897 Spain was said to have 150,000 men fighting the Cuban insurgents, besides 15,000 in the Philippine Islands, and a garrison in the Canaries. The expenditure on the army is usually £5,600,000, equal to £51 per man, against £41 in Germany.

## PORTUGAL

The army consists of 35,000 men, including officers, besides 9000 colonials, mostly natives. It is supposed that in case of war the force could be raised to 150,000 men, 23,000 horses, and 260 guns. This would be equal to 32 men per thousand inhabitants. The army costs £1,100,000 per annum, or £32 per man.

## SWEDEN AND NORWAY

The army of these kingdoms stands as follows:—

|                        | Sweden  | Norway | Total   |
|------------------------|---------|--------|---------|
| Infantry . . . . .     | 28,000  | 15,000 | 43,000  |
| Cavalry . . . . .      | 5,000   | 1,000  | 6,000   |
| Artillery . . . . .    | 4,000   | 1,000  | 5,000   |
| Engineers, &c. . . . . | 2,000   | 1,000  | 3,000   |
| Regulars . . . . .     | 39,000  | 18,000 | 57,000  |
| Reserve . . . . .      | 100,000 | 12,000 | 112,000 |
| War footing . . . . .  | 139,000 | 30,000 | 169,000 |

Expenditure in 1897 was £1,500,000 for Sweden and £500,000 for Norway; that is, £39 per man in the former, and £27 in the latter kingdom.

For other countries see Part I., page 72.

**Military Expenditure.**—The sums annually spent for military purposes compare with population and national earnings as follows:—

|                   | Army        | Navy       | Total       | Shillings<br>per<br>Inhab. |
|-------------------|-------------|------------|-------------|----------------------------|
|                   | £           | £          | £           |                            |
| U. Kingdom . . .  | 18,500,000  | 22,700,000 | 41,200,000  | 21                         |
| France . . .      | 25,200,000  | 11,400,000 | 36,600,000  | 19                         |
| Germany . . .     | 29,100,000  | 6,100,000  | 35,200,000  | 14                         |
| Russia . . .      | 30,600,000  | 8,000,000  | 38,600,000  | 7                          |
| Austria . . .     | 14,200,000  | 2,100,000  | 16,300,000  | 7                          |
| Italy . . .       | 9,400,000   | 4,100,000  | 13,500,000  | 9                          |
| Spain . . .       | 5,700,000   | 1,100,000  | 6,800,000   | 8                          |
| Portugal . . .    | 1,300,000   | 500,000    | 1,800,000   | 8                          |
| Sweden . . .      | 1,500,000   | 400,000    | 1,900,000   | 8                          |
| Norway . . .      | 600,000     | 200,000    | 800,000     | 8                          |
| Denmark . . .     | 600,000     | 300,000    | 900,000     | 8                          |
| Holland . . .     | 1,900,000   | 1,300,000  | 3,200,000   | 13                         |
| Belgium . . .     | 2,000,000   | ...        | 2,000,000   | 6                          |
| Switzerland . . . | 1,000,000   | ...        | 1,000,000   | 7                          |
| Roumania . . .    | 1,800,000   | ...        | 1,800,000   | 6                          |
| Servia . . .      | 600,000     | ...        | 600,000     | 5                          |
| Bulgaria . . .    | 900,000     | ...        | 900,000     | 5                          |
| Turkey . . .      | 7,300,000   | 700,000    | 8,000,000   | 27                         |
| Greece . . .      | 600,000     | 300,000    | 900,000     | 8                          |
| Europe . . .      | 152,800,000 | 59,200,000 | 212,000,000 | 11                         |
| U. States . . .   | 10,200,000  | 7,300,000  | 17,500,000  | 5                          |
| Japan . . .       | 5,000,000   | 1,600,000  | 6,600,000   | 3                          |
| Brazil . . .      | 1,300,000   | 700,000    | 2,000,000   | 3                          |
| Argentina . . .   | 1,300,000   | 800,000    | 2,100,000   | 10                         |
| Chile . . .       | 900,000     | 600,000    | 1,500,000   | 11                         |
| Mexico . . .      | 1,000,000   | 100,000    | 1,100,000   | 2                          |
| Total . . .       | 172,500,000 | 70,300,000 | 242,800,000 | 10                         |

### ARTESIAN WELLS

Besides those given at page 588 are those made in the United States to December 1892.

|                  | No. of<br>Wells | Average Cost, &c. |                 |                          |
|------------------|-----------------|-------------------|-----------------|--------------------------|
|                  |                 | Depth,<br>feet    | £ Ster-<br>ling | Gallons<br>per<br>Minute |
| California . . . | 3,240           | 248               | 88              | 164                      |
| Utah . . .       | 2,524           | 146               | 16              | 26                       |
| Texas, &c. . .   | 2,333           | 250               | 56              | 34                       |
| Total . . .      | 8,097           | 210               | 51              | 54                       |

A well giving 50 gallons a minute suffices to irrigate 5 acres of land. The deepest wells known are, according to Chambers:—

|                     |            |
|---------------------|------------|
| Buda-Pesth . . .    | 3,180 feet |
| St. Louis, U.S. . . | 3,840 ..   |

The well at Buda gives water of the temperature of 165° Fahr., or 2 degrees less than Carlsbad (see p. 567).

### ATHLETICS

There was a bicycle race at St. Albans, 16 entries, on October 13, 1894, which resulted as follows:—

| Rider        | Miles | Min. | Sec. | Rider      | Miles | Min. | Sec. |
|--------------|-------|------|------|------------|-------|------|------|
| Wright . . . | 5     | 13   | 32   | King . . . | 30    | 84   | 30   |
| " . . .      | 20    | 55   | 26   | " . . .    | 50    | 150  | 56   |

A race of 12 hours was won by Hunt, with the following results:—

| Hours | Miles | Hours | Miles | Hours | Miles |
|-------|-------|-------|-------|-------|-------|
| 2     | 47    | 6     | 134   | 10    | 217   |
| 4     | 91    | 8     | 176   | 12    | 260   |

He made 150 miles in 6 hours 44 minutes, and 200 miles in 9 hours 8 minutes. All the foregoing were the quickest runs on record, except King's run of 50 miles, this distance having been done by Knapp, in 1888, in 149 minutes 41 seconds.

On June 1, 1896, Stocks, at Hull, beat all previous records for short runs when he made the following:—

| Miles | Min. | Sec. | Miles | Min. | Sec. |
|-------|------|------|-------|------|------|
| 1     | 1    | 55   | 5     | 9    | 39   |
| 3     | 5    | 44   | 10    | 19   | 30   |

At Catford, England, on August 30, 1897, Walters rode 100 miles in 206 minutes, or 5 minutes less than the best run then on record.

In the last 10 years the record of jumps has been broken by the following:—

High running jump, 77.1 inches—M. Sweeney, New York, 1895.

High pole jump, 11 feet 9 inches—R. Dickenson, Kidderminster, 1891.

Standing broad jump, 12 feet 2 inches—J. Darby, Ashton, 1889.

The 20-mile foot race also has a new record, G. Crossland having done it in 1 hour 52 minutes, at London, 1894.

Cricket records show that the highest innings in England in 1896 fell to Dr. Grace, 301 runs. In the same year's record Prince Ranjitsinghi had an average score of 53, which was the highest, the average for 10 best batters during the year having been 45. The 10 highest bowlers averaged 17. See *Athletics*, p. 74.

## B

## BANKS

In August 1896 the banks of the world stood as follows:—

| Bank of             | £ Sterling (ooo omitted) |         |          |           |
|---------------------|--------------------------|---------|----------|-----------|
|                     | Issue                    | Bullion | Deposits | Discounts |
| England . . . .     | 27,400                   | 45,700  | 61,900   | 44,000    |
| France . . . . .    | 153,600                  | 125,700 | 22,600   | 42,000    |
| Germany . . . . .   | 62,900                   | 40,200  | 22,200   | 39,600    |
| Russia . . . . .    | 115,000                  | 97,600  | 24,700   | 16,500    |
| Austria Hungary .   | 55,400                   | 36,000  | 900      | 18,000    |
| Italy (3) . . . . . | 42,400                   | 20,600  | 12,600   | 13,800    |
| Spain . . . . .     | 41,400                   | 18,700  | 16,100   | 8,700     |
| Portugal . . . . .  | 13,000                   | 3,000   | 500      | 3,900     |
| Sweden . . . . .    | 7,000                    | 2,400   | 22,000   | 11,200    |
| Norway . . . . .    | 2,900                    | 1,400   | 400      | 1,800     |
| Denmark . . . . .   | 5,000                    | 3,700   | 600      | 1,200     |
| Holland . . . . .   | 17,600                   | 9,600   | 400      | 5,700     |
| Belgium . . . . .   | 18,900                   | 4,000   | 2,200    | 17,100    |
| Switzerland . . . . | 7,900                    | 4,000   | 31,500   | 6,700     |
| Roumania . . . . .  | 5,800                    | 2,600   | 600      | 1,800     |
| Servia . . . . .    | 1,000                    | 500     | 100      | 300       |
| Greece . . . . .    | 4,500                    | 100     | 3,800    | 600       |
| Ottoman . . . . .   | 600                      | 1,600   | 5,700    | 700       |
| Europe . . . . .    | 582,300                  | 417,400 | 228,800  | 233,600   |
| New York . . . . .  | 4,000                    | 15,300  | 106,200  | 98,400    |
| Total . . . . .     | 586,300                  | 432,700 | 335,000  | 332,000   |

The following table shows the issue of European banks, their bullion reserves, and the ratio of latter to former in March 1898:—

|                     | £ Sterling (ooo omitted) |         |         |         | Ratio of Bulln. |
|---------------------|--------------------------|---------|---------|---------|-----------------|

| Total . . . . .     | 575,600                  | 349,300 | 106,100 | 455,400 | 79              |

In 1896 the nominal value of the Russian currency was reduced from 38 pence per rouble to 25 pence; but if we suppose the rouble to have been always 25 pence, the

currency of Europe and the bullion reserves of banks will show as follows for seven years:—

|                | £ Sterling (ooo omitted) |       |        |       | Ratio of Bullion |
|----------------|--------------------------|-------|--------|-------|------------------|
|                | Issue                    | Gold  | Silver | Total |                  |
| 1892 . . . . . | 533.0                    | 248.3 | 99.8   | 348.1 | 65.2             |
| 1893 . . . . . | 551.0                    | 244.6 | 99.7   | 344.3 | 62.5             |
| 1894 . . . . . | 561.0                    | 278.0 | 104.1  | 382.1 | 68.1             |
| 1895 . . . . . | 583.0                    | 314.5 | 100.2  | 414.7 | 71.1             |
| 1896 . . . . . | 596.0                    | 314.4 | 100.5  | 414.9 | 69.7             |
| 1897 . . . . . | 563.1                    | 327.9 | 106.4  | 434.3 | 77.1             |
| 1898 . . . . . | 575.6                    | 349.3 | 106.1  | 455.4 | 79.1             |

The amount of paper money in Europe in December of the last three years was:—

|                     | Millions £ Sterling |       |       | Shillings per Inhabitant |
|---------------------|---------------------|-------|-------|--------------------------|
|                     | 1895                | 1896  | 1897  |                          |
| England . . . . .   | 26.3                | 26.7  | 28.3  | 18                       |
| Scotland . . . . .  | 7.3                 | 7.8   | 8.0   | 36                       |
| Ireland . . . . .   | 6.5                 | 6.8   | 6.8   | 30                       |
| United Kingdom . .  | 40.1                | 41.3  | 43.1  | 22                       |
| France . . . . .    | 145.9               | 153.6 | 152.5 | 80                       |
| Germany . . . . .   | 69.7                | 68.9  | 76.0  | 30                       |
| Russia . . . . .    | 115.0               | 112.0 | 107.0 | 20                       |
| Austria . . . . .   | 52.0                | 55.4  | 58.8  | 28                       |
| Italy . . . . .     | 43.4                | 42.8  | 43.1  | 27                       |
| Spain . . . . .     | 39.6                | 41.1  | 48.2  | 54                       |
| Portugal . . . . .  | 12.5                | 13.2  | 14.6  | 60                       |
| Sweden . . . . .    | 6.6                 | 7.2   | 7.9   | 32                       |
| Norway . . . . .    | 2.8                 | 2.9   | 3.3   | 31                       |
| Finland . . . . .   | 2.2                 | 2.6   | 2.9   | 25                       |
| Denmark . . . . .   | 3.9                 | 5.1   | 5.1   | 46                       |
| Holland . . . . .   | 17.3                | 16.9  | 17.8  | 75                       |
| Belgium . . . . .   | 18.0                | 18.8  | 19.5  | 62                       |
| Switzerland . . . . | 7.6                 | 7.9   | 8.7   | 58                       |
| Roumania . . . . .  | 5.2                 | 5.8   | 5.8   | 20                       |
| Servia . . . . .    | 1.0                 | 1.0   | 1.0   | 9                        |
| Greece . . . . .    | 4.5                 | 4.5   | 5.4   | 48                       |
| Total . . . . .     | 587.3               | 601.0 | 621.0 | 33                       |

The bullion reserves of European banks at the close of the last four years were:—

|                | Millions £ Sterling |        |       | Ratio to Currency |
|----------------|---------------------|--------|-------|-------------------|
|                | Gold                | Silver | Total |                   |
| 1894 . . . . . | 279                 | 104    | 383   | 68 per cent.      |
| 1895 . . . . . | 304                 | 89     | 393   | 67 " "            |
| 1896 . . . . . | 314                 | 100    | 414   | 69 " "            |
| 1897 . . . . . | 350                 | 102    | 452   | 73 " "            |

Gold reserve has risen 25 per cent. in three years, while silver reserve has declined 2 per cent. This shows that the world's supply of gold has been over-abundant.

The Bank of Russia has the largest issue in the world, and the largest bullion reserve except that of France. The latter holds 30 per cent. of the total amount of bullion or hard money held by the banks of Europe. If the reserves of the Banks of Germany and Austria

were added to that of the Bank of England, the aggregate would still be less than the bullion held by the Bank of France. The only banks whose bullion reserve exceeds their issue are the Bank of England, the Ottoman, and the New York Associated Banks. The average of bullion reserve to issue, taken for all banks collectively, is as 67 to 100, but there are several where the reserve is less than 50 per cent. of issue, viz. Italy, Spain, Portugal, Sweden, Norway, Belgium, Roumania, and Greece.

The position of European banks in 1896 compares with the same in 1889 as follows:—

|               | 1889        | 1896        | Increase     |
|---------------|-------------|-------------|--------------|
| Issue . . .   | 466,200,000 | 641,300,000 | 37 per cent. |
| Bullion . . . | 263,300,000 | 417,400,000 | 59 " "       |
| Discounts . . | 229,100,000 | 233,600,000 | 2 " "        |

Discounts remained almost stationary, while the stock of bullion rose 59 per cent. Bullion reserves of European and New York banks in 1897 reached 450 millions sterling, that is 350 millions gold and 100 silver. The following table, comprising only seven of the European State banks (to the exclusion of those of Italy, Spain, Portugal, Sweden, Norway, Denmark, Switzerland, Roumania, Servia, Greece, and Turkey), besides the New York Associated Banks and the United States Treasury, shows the reserves of gold in December of the last three years:—

| Bank of         | Gold Reserve, £ |             |             |
|-----------------|-----------------|-------------|-------------|
|                 | 1895            | 1896        | 1897        |
| England . . .   | 45,000,000      | 34,600,000  | 31,800,000  |
| France . . .    | 78,000,000      | 76,600,000  | 78,500,000  |
| Germany . . .   | 42,600,000      | 40,200,000  | 43,500,000  |
| Russia . . .    | 92,200,000      | 113,500,000 | 122,200,000 |
| Austria . . .   | 24,500,000      | 28,700,000  | 31,400,000  |
| Belgium . . .   | 4,100,000       | 4,200,000   | 4,200,000   |
| Holland . . .   | 3,500,000       | 2,600,000   | 2,600,000   |
| New York . . .  | 13,800,000      | 15,300,000  | 20,800,000  |
| Banks . . .     | 303,700,000     | 315,700,000 | 335,000,000 |
| U.S. Treasury . | 19,900,000      | 35,000,000  | 38,800,000  |
| Total . . .     | 323,600,000     | 350,700,000 | 373,800,000 |

This shows that in two years the gold reserves rose 50 millions sterling, or 15 per cent.

Rates of interest in the last twelve years were as follows:—

| Year        | London | Paris | Berlin | Brussels | Amsterdam | St. Petersburg | Vienna | Rome | Average |
|-------------|--------|-------|--------|----------|-----------|----------------|--------|------|---------|
| 1886 . . .  | 3.0    | 3.0   | 3.3    | 2.7      | 2.5       | ...            | 4.0    | ...  | 3.1     |
| 1887 . . .  | 3.3    | 3.0   | 3.4    | 3.1      | 2.5       | 5.1            | 4.1    | 5.5  | 3.7     |
| 1888 . . .  | 3.2    | 3.1   | 3.3    | 3.3      | 2.5       | 5.3            | 4.2    | 5.5  | 3.8     |
| 1889 . . .  | 3.5    | 3.1   | 3.7    | 3.5      | 2.5       | 5.8            | 4.2    | 5.2  | 3.9     |
| 1890 . . .  | 4.5    | 3.0   | 4.4    | 3.2      | 2.8       | 5.9            | 4.5    | 6.0  | 4.3     |
| 1891 . . .  | 3.3    | 3.0   | 3.8    | 3.0      | 3.1       | 4.9            | 4.4    | 5.8  | 3.9     |
| 1892 . . .  | 2.5    | 2.7   | 3.2    | 2.7      | 2.7       | 4.9            | 4.0    | 5.2  | 3.5     |
| 1893 . . .  | 3.0    | 2.5   | 4.1    | 2.8      | 3.8       | 4.7            | 4.2    | 5.2  | 3.8     |
| 1894 . . .  | 2.1    | 2.5   | 3.1    | 3.0      | 2.6       | 4.5            | 4.1    | 5.7  | 3.5     |
| 1895 . . .  | 2.0    | 2.2   | 3.2    | 2.6      | 2.5       | 5.0            | 4.3    | 5.0  | 3.4     |
| 1896 . . .  | 2.5    | 2.0   | 3.7    | 2.9      | 3.0       | 6.1            | 4.1    | 5.0  | 3.7     |
| 1897 . . .  | 2.8    | 2.0   | 3.8    | 3.0      | 3.1       | 5.9            | 4.0    | 5.0  | 3.7     |
| Average . . | 3.0    | 2.7   | 3.6    | 3.0      | 2.8       | 5.3            | 4.2    | 5.4  | 3.7     |

During the last three years the average rates were—at Madrid 4.8, at Lisbon 5.9, at Berne 3.7, and at Bucharest 5.1.

*Exchange.*—The rates of exchange were:—

| Year        | London on |         |          | N. York on London | Silver Pence per oz. |
|-------------|-----------|---------|----------|-------------------|----------------------|
|             | Paris     | Hamburg | Calcutta |                   |                      |
| 1890 . . .  | 25.47     | 20.66   | 18.6     | 4.82              | 47.7                 |
| 1891 . . .  | 25.48     | 20.60   | 17.4     | 4.83              | 45.1                 |
| 1892 . . .  | 25.34     | 20.51   | 15.5     | 4.85              | 39.7                 |
| 1893 . . .  | 25.39     | 20.60   | 15.1     | 4.84              | 35.0                 |
| 1894 . . .  | 25.34     | 20.55   | 13.8     | 4.86              | 28.9                 |
| 1895 . . .  | 25.35     | 20.58   | 13.2     | 4.88              | 29.8                 |
| 1896 . . .  | 25.27     | 20.59   | 14.6     | 4.85              | 30.7                 |
| 1897 . . .  | 25.31     | 20.57   | 15.2     | 4.84              | 27.0                 |
| Average . . | 25.37     | 20.58   | 15.4     | 4.85              | 35.6                 |

The lowest price recorded for silver was on August 31, 1897, namely, 24 pence per ounce, being as 1 to 35 compared with the value of gold, or 60 per cent. below par.

#### UNITED KINGDOM

The statistics for 1897 compare with those of 1890 as follows:—

|                  | Millions £ Sterling* |       |            |       |
|------------------|----------------------|-------|------------|-------|
|                  | England              |       | Scotland   |       |
|                  | 1890                 | 1897  | 1890       | 1897  |
| Capital paid . . | 53.8                 | 59.3  | 9.1        | 9.3   |
| Market value . . | 105.5                | 181.4 | 22.9       | 30.3  |
| Reserve fund . . | 27.8                 | 32.5  | 5.6        | 7.2   |
| Note issue . . . | 26.7                 | 29.4  | 6.4        | 7.4   |
| Deposits . . .   | 387.7                | 565.0 | 88.3       | 95.8  |
| Discounts . . .  | 283.8                | 376.2 | 58.0       | 64.8  |

| Discounts . . .  | 303.1    | 164.4 | 678.5       | 640.4   |
| Assets . . .     | 387.0    | 238.5 | 1,072.3     | 1,134.0 |

If we take discounts as the gauge of banking business England will stand for 78½ per cent., Scotland 14 per cent., Ireland 7½ per cent. of the total for the United Kingdom. The paid-up capital (excluding Colonial) rose 8 per cent. in 7 years, market value of stock 13 per cent., deposits 37 per cent., discounts 26 per cent., and

\* Note.—This table reads thus: capital 53.8 signifies £53,800,000.

## BANKS

641

## BANKS

assets 30 per cent. The deposits in banks of the United Kingdom increased 108 millions in 7 years, being an average of 15½ millions yearly.

The note issue has been as follows:—

| Year       | £ Sterling (ooo omitted) |          |         |            |
|------------|--------------------------|----------|---------|------------|
|            | England                  | Scotland | Ireland | U. Kingdom |
| 1890 . . . | 27,000                   | 7,100    | 7,300   | 41,400     |
| 1892 . . . | 27,500                   | 6,700    | 6,300   | 40,500     |
| 1894 . . . | 27,100                   | 6,900    | 6,500   | 40,500     |
| 1896 . . . | 27,600                   | 7,500    | 6,400   | 41,500     |

Bank of England returns at the close of each year showed as follows:—

| Year       | Issue, £   | Bullion, £ | Deposits, £ |
|------------|------------|------------|-------------|
| 1890 . . . | 24,700,000 | 21,800,000 | 35,400,000  |
| 1891 . . . | 25,500,000 | 23,200,000 | 34,800,000  |
| 1892 . . . | 26,000,000 | 25,000,000 | 34,400,000  |
| 1893 . . . | 25,800,000 | 25,900,000 | 34,200,000  |
| 1894 . . . | 25,500,000 | 35,300,000 | 41,600,000  |
| 1895 . . . | 26,100,000 | 42,500,000 | 56,400,000  |
| 1896 . . . | 26,700,000 | 35,900,000 | 50,600,000  |
| 1897 . . . | 27,400,000 | 28,400,000 | 49,600,000  |

## FRANCE

The progress of the Bank of France since 1880 is shown thus:—

|                          | Millions £ Sterling |      |      |
|--------------------------|---------------------|------|------|
|                          | 1880                | 1889 | 1897 |
| Discount . . . . .       | 348                 | 340  | 415  |
| Issue . . . . .          | 92                  | 115  | 151  |
| Gold reserve . . . . .   | 27                  | 53   | 80   |
| Silver reserve . . . . . | 54                  | 51   | 48   |

The head-office at Paris does half the business of the bank, which has branches all over France (see page 179). The discounts at Paris in 1897 comprised 5,700,000 bills, of which 1,870,000 were for sums less than £4 sterling. The maximum of bills in portfolio was £42,400,000 in January, the minimum £21,400,000 in August. Expenses in 1897 amounted to £640,000. The bank is the property of 28,200 shareholders, who hold between them 182,500 shares of £40 each, the market value of each share being at present £142 sterling. Thus the paid-up capital is £7,300,000, and the value of the shares £26,000,000, the average of stock held by each shareholder being £920.

## AUSTRALIA

The collective figures for the banks of the seven colonies sum up as follows:—

| Year           | £ Sterling (ooo omitted) |         |          |         |
|----------------|--------------------------|---------|----------|---------|
|                | Issue                    | Bullion | Deposits | Assets  |
| 1890 . . .     | 5,500                    | 20,200  | 111,100  | 168,500 |
| 1893 . . .     | 4,500                    | 22,100  | 101,300  | 158,700 |
| 1895 . . .     | 3,700                    | 25,200  | 99,200   | 146,500 |
| 1897 . . .     | 4,100                    | 24,600  | 101,600  | 144,100 |
| 1890-97, av. . | 4,400                    | 22,600  | 104,700  | 157,000 |

The returns for June 1897 showed as follows (ooo omitted):—

|                    | Issue | Bullion | Deposits | Assets  |
|--------------------|-------|---------|----------|---------|
| N. S. Wales . . .  | 1,200 | 6,500   | 30,300   | 45,500  |
| Victoria . . . .   | 1,000 | 7,400   | 30,600   | 45,700  |
| N. Zealand . . .   | 1,000 | 3,100   | 14,600   | 17,300  |
| Queensland . . .   | ...   | 2,100   | 11,800   | 18,500  |
| S. Australia . . . | 400   | 2,300   | 7,200    | 7,800   |
| W. Australia . .   | 400   | 2,400   | 4,100    | 6,100   |
| Tasmania . . . .   | 100   | 800     | 3,000    | 3,200   |
| Total . . . . .    | 4,100 | 24,600  | 101,600  | 144,100 |

## CANADA

Aggregate returns for the several provinces show as follows:—

| Year           | £ Sterling (ooo omitted) |         |          |        |
|----------------|--------------------------|---------|----------|--------|
|                | Issue                    | Bullion | Deposits | Assets |
| 1890 . . . . . | 6,600                    | 1,300   | 28,100   | 52,400 |
| 1893 . . . . . | 6,900                    | 1,300   | 36,500   | 62,600 |
| 1896 . . . . . | 6,400                    | 1,600   | 39,200   | 65,400 |

The returns for 1896, distinguishing Old Canada (Quebec and Ontario) from the provinces added to the Dominion, show as follow (ooo omitted):—

|                   | Issue | Bullion | Deposits | Assets |
|-------------------|-------|---------|----------|--------|
| Old Canada . . .  | 5,100 | 1,300   | 33,100   | 55,100 |
| Nova Scotia . . . | 800   | 200     | 4,400    | 7,400  |
| Other Provinces . | 500   | 100     | 1,700    | 2,900  |
| Dominion . . . .  | 6,400 | 1,600   | 39,200   | 65,400 |

Canadian banks have a paid-up capital of £13,000,000. Banking power is about 52 millions sterling, or £10 per inhabitant.

## SOUTH AFRICA

Collectively, the returns for Cape Colony and Natal showed thus:—

|                   | £ Sterling (ooo omitted). |         |          |        |
|-------------------|---------------------------|---------|----------|--------|
|                   | Issue                     | Bullion | Deposits | Assets |
| 1890 . . . . .    | 1,000                     | 3,000   | 7,900    | 9,300  |
| 1893 . . . . .    | 700                       | 2,000   | 7,100    | 9,500  |
| 1895 . . . . .    | 800                       | 3,800   | 10,600   | 10,700 |
| Average, '90-95 . | 700                       | 2,700   | 8,100    | 9,500  |

Banking power is about 12 millions sterling, equal to £5 per inhabitant.

## INDIA

The amount of paper money in circulation, and its value in sterling, were:—

| Year | Millions Rupees | £ Sterling | Year | Millions Rupees | £ Sterling |
|------|-----------------|------------|------|-----------------|------------|
| 1891 | 257             | 19,300,000 | 1894 | 304             | 20,300,000 |
| 1892 | 241             | 16,100,000 | 1895 | 307             | 20,500,000 |
| 1893 | 264             | 17,600,000 | 1896 | 259             | 17,300,000 |

## WEST INDIES

There are banks in Jamaica, Trinidad, and Barbadoes whose aggregate issue is about £800,000, and assets about 8 millions.

## UNITED STATES

In October 1890 there were 3540 National Banks, and in October 1896 there were 3676. The principal features are shown as follows :—

|                       | Millions \$ |       | Millions £ |       |
|-----------------------|-------------|-------|------------|-------|
|                       | 1890        | 1896  | 1890       | 1896  |
| Issue . . . . .       | 123         | 210   | 25.6       | 43.6  |
| Capital . . . . .     | 650         | 648   | 135.2      | 134.8 |
| Deposits . . . . .    | 1,759       | 1,799 | 366.0      | 374.4 |
| Sundries . . . . .    | 610         | 607   | 126.8      | 126.0 |
| Liabilities . . . . . | 3,142       | 3,264 | 653.6      | 678.8 |
| Bullion . . . . .     | 196         | 201   | 40.8       | 41.8  |
| U. S. notes . . . . . | 87          | 142   | 18.0       | 29.6  |
| Discounts . . . . .   | 1,970       | 1,893 | 410.0      | 394.0 |
| Sundries . . . . .    | 889         | 1,028 | 184.8      | 213.4 |
| Assets . . . . .      | 3,142       | 3,264 | 653.6      | 678.8 |

The capital and dividends of the above banks showed thus :—

| Year              | Millions \$ |            |      |
|-------------------|-------------|------------|------|
|                   | Capital     | Dividend * | Rate |
| 1891 . . . . .    | 660         | 50.8       | 7.7  |
| 1894 . . . . .    | 673         | 45.3       | 6.7  |
| 1896 . . . . .    | 653         | 45.5       | 7.0  |
| Average . . . . . | 668         | 48.0       | 7.2  |

The National Banks of New York city showed as follows :—

|                     | Millions \$ |      | Millions £ |      |
|---------------------|-------------|------|------------|------|
|                     | 1890        | 1896 | 1890       | 1896 |
| Discounts . . . . . | 297         | 314  | 62.0       | 65.2 |
| Deposits . . . . .  | 333         | 373  | 69.2       | 77.6 |
| Bullion . . . . .   | 79          | 50   | 16.4       | 10.4 |

The returns for all National Banks of the United States were :—

|                   | Millions \$ |          |               |
|-------------------|-------------|----------|---------------|
|                   | Discounts   | Deposits | Bullion, res. |
| 1891 . . . . .    | 1,989       | 1,759    | 184           |
| 1894 . . . . .    | 2,007       | 2,019    | 237           |
| 1896 . . . . .    | 1,893       | 1,799    | 201           |
| Average . . . . . | 1,953       | 1,860    | 209           |

National Bank discounts in the principal States in October 1896 were as follows :—

|                         | Millions \$ |       |       |
|-------------------------|-------------|-------|-------|
|                         | City        | Rural | Total |
| New York . . . . .      | 314         | 112   | 426   |
| Massachusetts . . . . . | 141         | 104   | 245   |
| Pennsylvania . . . . .  | 87          | 156   | 243   |
| Illinois . . . . .      | 82          | 44    | 126   |
| Other States . . . . .  | 176         | 677   | 853   |
| Total . . . . .         | 800         | 1,093 | 1,893 |

In the above table "city" counts only for the capital, such as New York, Boston, or Philadelphia, the banks of minor cities being classed under heading "rural."

\* Note.—Dividends 50.8 signifies \$50,800,000.

*Clearing-houses.*—The *monthly* returns in the United States for the principal cities during the years 1890-91 were as follows :—

|                    | Millions<br>£ Sterling |                        | Millions<br>£ Sterling |
|--------------------|------------------------|------------------------|------------------------|
| New York . . . . . | 621                    | Philade.phia . . . . . | 62                     |
| Boston . . . . .   | 85                     | St. Louis . . . . .    | 19                     |
| Chicago . . . . .  | 72                     | S. Francisco . . . . . | 15                     |

New York clearing-house returns since 1854 showed thus, in *monthly* averages :—

| Year           | Millions<br>£ Sterling | Year           | Millions<br>£ Sterling |
|----------------|------------------------|----------------|------------------------|
| 1854 . . . . . | 100                    | 1884 . . . . . | 588                    |
| 1864 . . . . . | 416                    | 1894 . . . . . | 420                    |
| 1874 . . . . . | 395                    | 1897 . . . . . | 545                    |

London clearing-house showed monthly averages thus :—

| Year           | Millions £ | Year           | Millions £ |
|----------------|------------|----------------|------------|
| 1839 . . . . . | 82         | 1884 . . . . . | 483        |
| 1869 . . . . . | 302        | 1894 . . . . . | 528        |
| 1875 . . . . . | 474        | 1896 . . . . . | 631        |

Provincial clearing-houses showed for 1896 and 1897 as follows :—

|                      | Millions £ Monthly |      |
|----------------------|--------------------|------|
|                      | 1896               | 1897 |
| Manchester . . . . . | 16.1               | 16.1 |
| Liverpool . . . . .  | 12.0               | 12.0 |
| Newcastle . . . . .  | 4.6                | 5.1  |
| Birmingham . . . . . | 4.2                | 4.8  |
| Bristol . . . . .    | 2.0                | 2.1  |

The monthly average of the clearing-house of Paris rose from 88 millions sterling in 1876 to 157 millions in 1886, and 294 millions in 1896.

## SAVINGS-BANKS

Those of the United Kingdom show as follows :—

| Year           | Amount held, £ (000 omitted) |          |         |            |
|----------------|------------------------------|----------|---------|------------|
|                | England                      | Scotland | Ireland | U. Kingdom |
| 1890 . . . . . | 94,500                       | 11,100   | 5,800   | 111,400    |
| 1892 . . . . . | 100,200                      | 11,800   | 6,200   | 118,200    |
| 1894 . . . . . | 112,100                      | 13,700   | 7,000   | 132,800    |
| 1897 . . . . . | 136,600                      | 18,800   | 9,000   | 164,400    |

| Year           | Number of Depositors (000 omitted) |          |         |            |
|----------------|------------------------------------|----------|---------|------------|
|                | England                            | Scotland | Ireland | U. Kingdom |
| 1890 . . . . . | 5,570                              | 540      | 250     | 6,360      |
| 1892 . . . . . | 6,090                              | 590      | 270     | 6,950      |
| 1894 . . . . . | 6,650                              | 620      | 310     | 7,580      |
| 1897 . . . . . | 7,640                              | 760      | 370     | 8,770      |

The average sum held by each depositor is £18 in England, £24 in Scotland, and £24 in Ireland. The number of depositors compares with population as follows :—In England, 246 ; in Scotland, 180, and in Ireland, 80 per thousand inhabitants.

The earliest statement of savings-banks on the European continent is that of Malchus, in 1837, viz. :—

|              | Banks | Deposits<br>£ |                 | Banks | Deposits<br>£ |
|--------------|-------|---------------|-----------------|-------|---------------|
| France . .   | 250   | 4,980,000     | Belgium . .     | 5     | 650,000       |
| Prussia . .  | 80    | 950,000       | Holland . .     | 50    | 280,000       |
| Austria . .  | 8     | 3,030,000     | Switzerland . . | 58    | 790,000       |
| Bavaria, &c. | 201   | 2,390,000     | Italy . . .     | 2     | 150,000       |

Making a total of 654 banks, with deposits amounting to £13,220,000. Returns from 1840 to 1889 will be found at page 86.

The latest returns compare with those of 1889 as follows :—

|                | Amount,<br>Millions £ |         | Depositors<br>in<br>1896 | Do. per<br>100<br>Inhab. |
|----------------|-----------------------|---------|--------------------------|--------------------------|
|                | 1889                  | 1896    |                          |                          |
| U. Kingdom .   | 107.3                 | 154.8   | 8,350,000                | 21                       |
| France . . .   | 111.8                 | 165.8   | 9,120,000                | 24                       |
| Germany . .    | 144.6                 | 212.5   | 7,222,000                | 14                       |
| Russia . . .   | 7.2                   | 37.7    | 1,890,000                | 2                        |
| Austria . .    | 122.6                 | 178.4   | 4,670,000                | 11                       |
| Italy . . . .  | 56.5                  | 72.2    | 4,520,000                | 15                       |
| Spain . . . .  | 2.0                   | 3.2     | 70,000                   | ...                      |
| Portugal . .   | ...                   | 0.5     | 10,000                   | ...                      |
| Scandinavia .  | 44.1                  | 64.9    | 2,980,000                | 32                       |
| Finland . . .  | ...                   | 1.9     | ...                      | ...                      |
| Holland . . .  | 6.0                   | 9.5     | 840,000                  | 18                       |
| Belgium . . .  | 10.4                  | 18.1    | 1,150,000                | 19                       |
| Switzerland .  | 23.7                  | 35.8    | 1,190,000                | 40                       |
| Europe . . .   | 636.2                 | 955.3   | 42,010,000               | 13                       |
| U. States . .  | 284.0                 | 446.0   | 5,065,000                | 7                        |
| Canada . . .   | 10.7                  | 12.2    | 240,000                  | 5                        |
| Australia . .  | 15.5                  | 26.1    | 890,000                  | 22                       |
| India . . . .  | 6.0                   | 7.0     | 680,000                  | ...                      |
| W. Indies, &c. | 2.6                   | 4.2     | 175,000                  | 5                        |
| Japan . . . .  | ...                   | 3.0     | 1,220,000                | 3                        |
| Brazil . . . . | ...                   | 4.2     | ...                      | ...                      |
| The World . .  | 955.0                 | 1,458.0 | 50,280,000               | ...                      |

From the above figures it would appear that people who use savings-banks, mostly the working classes, have added 503 millions sterling to their accumulations in 7 years, or about 72 millions per annum.

*Australia.*—During the last six years the number of depositors has risen 30 per cent., the amount of deposits 49 per cent., viz. :—

|                   | Depositors |         | Amount, £  |            |
|-------------------|------------|---------|------------|------------|
|                   | 1891       | 1897    | 1891       | 1897       |
| New S. Wales .    | 158,000    | 214,000 | 5,340,000  | 8,520,000  |
| Victoria . . .    | 301,000    | 345,000 | 5,720,000  | 7,520,000  |
| New Zealand .     | 127,000    | 175,000 | 3,410,000  | 5,070,000  |
| South Australia . | 79,000     | 105,000 | 2,220,000  | 3,020,000  |
| Queensland . .    | 46,000     | 63,000  | 1,660,000  | 2,570,000  |
| West Australia .  | 4,000      | 26,000  | 50,000     | 860,000    |
| Tasmania . . .    | 27,000     | 33,000  | 550,000    | 700,000    |
| Total . . . .     | 742,000    | 962,000 | 18,950,000 | 28,260,000 |

No less than 22 per cent. of the population are depositors in Savings-Banks, the ratio in Victoria rising to 30 per cent., and falling in Queensland to 13 per cent. The average amount held by each depositor is £30, the ratio being as much as £40 in N.S. Wales, and only £21 in Tasmania.

*Canada.*—In 1894 there were 673 Post-Office savings-banks, with 115,000 depositors, who held £4,800,000 sterling.

*United States.*—The returns for 1896 show 988 savings-banks, against 638 in 1886 :—

|                   | Millions \$ |       | Millions £ |      |
|-------------------|-------------|-------|------------|------|
|                   | 1886        | 1896  | 1886       | 1896 |
| Deposits . . .    | 1,142       | 1,907 | 237        | 397  |
| Capital, &c. . .  | 119         | 236   | 25         | 49   |
| Liabilities . . . | 1,261       | 2,143 | 262        | 446  |
| Loans . . . .     | 128         | 255   | 27         | 53   |
| Mortgages . .     | 418         | 800   | 87         | 167  |
| U.S. bonds . .    | 197         | 149   | 41         | 31   |
| Railway „ . .     | 64          | 135   | 13         | 28   |
| State „ . . .     | 241         | 578   | 50         | 120  |
| Sundries . . .    | 213         | 226   | 44         | 47   |
| Assets . . . .    | 1,261       | 2,143 | 262        | 446  |

The various sections of the Union in 1896 showed as follows :—

| States          | Depositors | Millions \$ | \$ per Inhabitant |
|-----------------|------------|-------------|-------------------|
| New England . . | 2,210,000  | 803         | 150               |
| Middle . . . .  | 2,294,000  | 855         | 53                |
| Southern . . .  | 52,000     | 9           | ...               |
| Prairie . . . . | 322,000    | 104         | 4                 |
| Pacific . . . . | 187,000    | 136         | 31                |
| Union . . . .   | 5,065,000  | 1,907       | 27                |

The average amount held by each depositor was \$380, equal to £79 sterling. The principal states stood thus :—

| States           | Depositors | Millions \$ | \$ per Inhabitant |
|------------------|------------|-------------|-------------------|
| New York . . .   | 1,696,000  | 692         | 103               |
| Massachusetts .  | 1,302,000  | 439         | 176               |
| Connecticut . .  | 347,000    | 143         | 180               |
| California . . . | 160,000    | 132         | 88                |
| Pennsylvania . . | 283,000    | 74          | 12                |
| Other states . . | 1,277,000  | 427         | 8                 |
| Union . . . .    | 5,065,000  | 1,907       | 27                |

The increase in seven years is shown as follows :—

| Year           | Depositors | Millions \$ | \$ per Inhabitant |
|----------------|------------|-------------|-------------------|
| 1880 . . . .   | 4,022,000  | 1,363       | 22                |
| 1896 . . . .   | 5,065,000  | 1,907       | 27                |
| Increase . . . | 1,043,000  | 544         | 5                 |

*India.*—The progress of savings-banks down to 1894 (latest returns) is shown thus :—

| Year         | Depositors | Rupees, Millions | Equivalent, £ |
|--------------|------------|------------------|---------------|
| 1881 . . . . | 115,000    | 32.7             | 2,720,000     |
| 1890 . . . . | 475,000    | 80.6             | 6,040,000     |
| 1896 . . . . | 717,000    | 111.2            | 7,400,000     |

The average amount of each deposit has declined from £24 to £10.

Ceylon shows deposits amounting to 3,200,000 rupees, or £200,000.

*Mauritius*.—There has been an increase of depositors in the past ten years, but the amount is stationary, viz. :—

|                    | 1885    | 1895    |
|--------------------|---------|---------|
| Depositors . . . . | 18,500  | 23,300  |
| Amount, £ . . . .  | 315,000 | 318,000 |

The average deposit has fallen from £17 to £14.

*South Africa*.—The progress made in ten years is shown as follows :—

|                 | Depositors |        | Amount, £ |           |
|-----------------|------------|--------|-----------|-----------|
|                 | 1885       | 1895   | 1885      | 1895      |
| Cape Colony . . | 17,600     | 50,200 | 520,000   | 1,700,000 |
| Natal . . . .   | 3,100      | 7,000  | 50,000    | 170,000   |
| Total . . . .   | 20,700     | 57,200 | 570,000   | 1,870,000 |

The average amount to each depositor is £27, as compared with £30 in Australia.

#### Various British Colonies.

|                  | Depositors |        | Amount, £ |           |
|------------------|------------|--------|-----------|-----------|
|                  | 1885       | 1895   | 1885      | 1895      |
| Malta . . . .    | 4,800      | 6,100  | 340,000   | 470,000   |
| Gibraltar . . .  | 1,100      | 3,600  | 20,000    | 180,000   |
| Newfoundland .   | 4,300      | 6,400  | 360,000   | 560,000   |
| British Guiana . | 13,000     | 19,900 | 190,000   | 260,000   |
| W. India Islands | 28,300     | 56,600 | 570,000   | 960,000   |
| Total . . . .    | 51,500     | 92,600 | 1,480,000 | 2,450,000 |

The collective average for these colonies is £26 to each depositor, against £29 in 1885.

## BANKRUPTCY

The returns for England and Wales show thus :—

| Year         | Number | Liabilities, £ | Average, £ | Assets, £ |
|--------------|--------|----------------|------------|-----------|
| 1885 . . . . | 4,354  | 9,060,000      | 2,100      | 3,100,000 |
| 1890 . . . . | 4,044  | 6,180,000      | 1,500      | 2,240,000 |
| 1897 . . . . | 4,098  | 5,770,000      | 1,400      | 2,800,000 |

The number of bankruptcies gazetted in England in ten years, 1885-94, was as follows :—

| Trades           | Number | Ratio |
|------------------|--------|-------|
| Grocers . . . .  | 3,202  | 7.0   |
| Publicans . . .  | 3,063  | 6.7   |
| Farmers . . . .  | 2,519  | 5.4   |
| Builders . . . . | 2,449  | 5.3   |
| Shoemakers . . . | 1,476  | 3.2   |
| Bakers . . . .   | 1,146  | 2.5   |
| Butchers . . . . | 1,132  | 2.5   |
| Various . . . .  | 30,845 | 67.4  |
| Total . . . .    | 45,832 | 100.0 |

## UNITED STATES

In 1897 the number and amount of failures were :—

| States           | Number | Liabilities, £ | Assets, £  | Ratio of Assets |
|------------------|--------|----------------|------------|-----------------|
| New England . .  | 1,722  | 5,600,000      | 3,700,000  | 66 p.c.         |
| Middle . . . .   | 3,723  | 10,500,000     | 5,800,000  | 55 "            |
| Southern . . . . | 2,799  | 5,000,000      | 3,500,000  | 70 "            |
| Prairie . . . .  | 3,682  | 9,200,000      | 7,900,000  | 86 "            |
| Pacific . . . .  | 1,425  | 1,700,000      | 900,000    | 53 "            |
| Union . . . .    | 13,351 | 32,000,000     | 21,800,000 | 68 "            |

The failures of recent years compare as follows :—

| Year            | Number | Liabilities, £ | Assets, £  | Ratio of Assets |
|-----------------|--------|----------------|------------|-----------------|
| 1893 . . . .    | 15,242 | 72,200,000     | 57,000,000 | 80 p.c.         |
| 1894 . . . .    | 13,885 | 36,000,000     | 25,200,000 | 70 "            |
| 1895 . . . .    | 13,197 | 36,000,000     | 25,200,000 | 70 "            |
| 1896 . . . .    | 15,088 | 47,000,000     | 32,500,000 | 69 "            |
| 1897 . . . .    | 13,351 | 32,000,000     | 21,800,000 | 68 "            |
| Average . . . . | 14,152 | 44,600,000     | 32,200,000 | 72 "            |

The figures for liabilities and assets in 1895 were the same as in the preceding year.

## FRANCE

The number of failures and amount of liabilities were :—

| Year         | Number | Liabilities, £ | Average, £ |
|--------------|--------|----------------|------------|
| 1870 . . . . | 3,987  | 5,550,000      | 1,400      |
| 1875 . . . . | 5,361  | 9,840,000      | 1,810      |
| 1880 . . . . | 6,295  | 9,500,000      | 1,510      |
| 1885 . . . . | 8,024  | 14,200,000     | 1,770      |
| 1890 . . . . | 14,004 | 26,900,000     | 1,920      |
| 1894 . . . . | 12,794 | 21,900,000     | 1,710      |

In 1893 and 1894 the ratios of assets to liabilities showed thus :—

| Year         | Liabilities, £ | Assets, £  | Ratio   |
|--------------|----------------|------------|---------|
| 1893 . . . . | 17,800,000     | 6,300,000  | 35 p.c. |
| 1894 . . . . | 21,900,000     | 11,900,000 | 54 "    |

In the liquidation of 1894 there were 95 estates wound up whose assets sufficed to pay all creditors in full.

## AUSTRIA

Official returns from 1880 to 1893 show as follows :—

| Year         | Bankruptcies | Liabilities, £ | Average, £ |
|--------------|--------------|----------------|------------|
| 1880 . . . . | 972          | 2,630,000      | 2,710      |
| 1885 . . . . | 1,083        | 1,550,000      | 1,430      |
| 1890 . . . . | 1,089        | 2,150,000      | 1,980      |
| 1892 . . . . | 1,073        | 1,540,000      | 1,440      |

## GERMANY

Nothing is published further than the number of failures, viz. :—

| Year         | Number | Year         | Number |
|--------------|--------|--------------|--------|
| 1881 . . . . | 5,252  | 1890 . . . . | 5,936  |
| 1885 . . . . | 4,627  | 1894 . . . . | 7,411  |

## AUSTRALIA

The returns of bankruptcy for 1894 show thus:—

|                           | Number | Liabilities, £ | Assets, £ |
|---------------------------|--------|----------------|-----------|
| New South Wales . . . . . | 1,465  | 1,850,000      | 995,000   |
| Victoria . . . . .        | 1,067  | 5,240,000      | 2,100,000 |
| New Zealand . . . . .     | 626    | 500,000        | 400,000   |
| Queensland . . . . .      | 254    | 190,000        | 40,000    |
| South Australia . . . . . | 80     | 120,000        | 100,000   |
| Tasmania . . . . .        | 168    | 50,000         | 25,000    |
| West Australia . . . . .  | 32     | 20,000         | 40,000    |
| Total . . . . .           | 3,692  | 7,970,000      | 3,700,000 |

Assets were estimated at 46 per cent. of liabilities, as compared with 72 per cent. in the United States.

## CANADA

Liabilities of bankrupts in 1896 reached £3,250,000 against £2,250,000 in 1886. The estimates for 1896 were:—

|                           | Number | Liabilities, £ | Assets, £ |
|---------------------------|--------|----------------|-----------|
| Ontario . . . . .         | 1,072  | 1,200,000      | 860,000   |
| Quebec . . . . .          | 718    | 1,720,000      | 1,250,000 |
| Other Provinces . . . . . | 328    | 510,000        | 420,000   |
| Total . . . . .           | 2,118  | 3,430,000      | 2,530,000 |

## BARLEY

The area and production of this grain are shown thus:—

|                         | Acres      | Tons       | Bushels | Per In-<br>per Acce | Per In-<br>per habitant |
|-------------------------|------------|------------|---------|---------------------|-------------------------|
| United Kingdom          | 2,200,000  | 1,800,000  | 33      | 1.8                 |                         |
| France . . . . .        | 2,200,000  | 1,100,000  | 20      | 1.2                 |                         |
| Germany . . . . .       | 4,200,000  | 2,600,000  | 25      | 2.0                 |                         |
| Russia . . . . .        | 16,800,000 | 5,900,000  | 14      | 2.2                 |                         |
| Austria . . . . .       | 5,700,000  | 2,800,000  | 19      | 2.5                 |                         |
| Spain . . . . .         | 4,000,000  | 1,500,000  | 15      | 3.3                 |                         |
| Danub. States . . . . . | 3,200,000  | 1,200,000  | 15      | 4.4                 |                         |
| Scandinavia . . . . .   | 1,400,000  | 950,000    | 28      | 4.0                 |                         |
| Italy, &c. . . . .      | 2,000,000  | 600,000    | 12      | ...                 |                         |
| Europe . . . . .        | 41,700,000 | 18,450,000 | 18      | 2.0                 |                         |
| United States . . . . . | 3,000,000  | 2,200,000  | 29      | 1.2                 |                         |
| Canada . . . . .        | 900,000    | 450,000    | 20      | 3.6                 |                         |
| Total . . . . .         | 45,600,000 | 21,100,000 | 19      | 1.9                 |                         |

## BATTLES

Besides the list at page 89 there were the following:—

| Date. | Place           | Won by    | Force  | Lost by   | Force   |
|-------|-----------------|-----------|--------|-----------|---------|
| B.C.  |                 |           |        |           |         |
| 334   | Arbela . .      | Alexander | 35,000 | Persians  | 950,000 |
| 31    | Actium . .      | Augustus  | 92,000 | Anthony   | 112,000 |
| A.D.  |                 |           |        |           |         |
| 1513  | Flodden . .     | English   | 32,000 | Scotch .  | 30,000  |
| 1704  | Blenheim . .    | "         | 52,000 | French .  | 56,000  |
| 1745  | Fontenoy . .    | French    | 60,000 | English   | 60,000  |
| 1800  | Hohenlinden . . | "         | 70,000 | Austrians | 60,000  |

## BEER

See *Alcohol*, page 533, also page 89.

## BEES

Maraldi says that an ordinary hive has 18,000 bees, but forest hives in Russia range from 60,000 to 110,000. In France 1600 bees weigh a pound, but the wild bees of Russia are so light that 5000 go to a pound. Hives in Europe produce from 20 to 50 lb. of honey yearly. A bee sucks 219,000 flowers for every ounce of honey. See Part I., page 50.

## BIRTHS

The following table shows the number of births in each country in 1896, the birth-rate to population, the ratio of illegitimate births in 1000, and the number of births to women of 15 to 50 years of age.

|                            | No. of Births | Rate per 1000 Inhabitants | Illegitimate Per 1000 | Births to 1000 Women (15-50) |
|----------------------------|---------------|---------------------------|-----------------------|------------------------------|
| England . . . . .          | 917,000       | 29.9                      | 42                    | 121                          |
| Scotland . . . . .         | 129,000       | 30.8                      | 72                    | 121                          |
| Ireland . . . . .          | 108,000       | 23.7                      | 26                    | 92                           |
| U. Kingdom . . . . .       | 1,154,000     | 29.2                      | 44                    | 117                          |
| France . . . . .           | 866,000       | 22.7                      | 88                    | 89                           |
| Germany . . . . .          | 1,942,000     | 37.3                      | 91                    | 157                          |
| Russia . . . . .           | 4,916,000     | 47.1                      | 31                    | ...                          |
| Austria . . . . .          | 975,000       | 39.0                      | 145                   | 161                          |
| Hungary . . . . .          | 761,000       | 41.1                      | 85                    | 176                          |
| Italy . . . . .            | 1,096,000     | 35.1                      | 64                    | 154                          |
| Sweden . . . . .           | 135,000       | 27.5                      | 107                   | 117                          |
| Norway . . . . .           | 63,000        | 30.0                      | 71                    | 131                          |
| Denmark . . . . .          | 70,000        | 30.4                      | 101                   | 131                          |
| Holland . . . . .          | 160,000       | 32.0                      | 29                    | 148                          |

| Europe . . . . .           | 13,034,000    | 35.2                      | 55                    | ...                          |
| U. States (1880) . . . . . | 1,577,000     | 31.5 *                    | ...                   | 128                          |
| Canada . . . . .           | 125,000       | 25.0                      | 15                    | 101                          |
| Australia . . . . .        | 124,000       | 29.4                      | 51                    | 130                          |

The birth-rates of Russia, Servia, and Hungary are the highest in Europe, those of France and Ireland the lowest. The ratio of illegitimacy is highest in Austria and Portugal, lowest in Roumania, Ireland, and Holland.

The number of legitimate births, compared with the number of marriages, gives the following results:—

## Births to 10 Marriages

|                          |                       |                       |
|--------------------------|-----------------------|-----------------------|
| France . . . . . 27      | Sweden . . . . . 42   | Norway . . . . . 44   |
| England . . . . . 36     | Portugal . . . . . 42 | Italy . . . . . 46    |
| Belgium . . . . . 36     | Europe . . . . . 43   | Ireland . . . . . 46  |
| Switzerland . . . . . 37 | Germany . . . . . 43  | Hungary . . . . . 47  |
| Denmark . . . . . 38     | Holland . . . . . 43  | Roumania . . . . . 49 |
| Scotland . . . . . 40    | Austria . . . . . 44  | Russia . . . . . 65   |

It may be that the early age of marrying in Russia accounts for such large families, although Dr. Ogle asserts

\* The census report was evidently incomplete, as Dr. Billings shows: the birth-rate was really 35.0.

that a woman marrying at 25 is likely to have more children than one who marries at 20.

The number of illegitimate births in 1896, compared with that of women of 15 to 50 years of age in the various countries, is shown thus:—

|                   | Women      | Illeg. Births | Per 10,000 Women |
|-------------------|------------|---------------|------------------|
| England . . . .   | 7,622,000  | 38,700        | 50               |
| Scotland . . . .  | 1,068,000  | 9,300         | 87               |
| Ireland . . . .   | 1,174,000  | 2,800         | 24               |
| U. Kingdom . . .  | 9,864,000  | 50,800        | 52               |
| France . . . . .  | 9,701,000  | 76,300        | 79               |
| Germany . . . . . | 12,380,000 | 93,400        | 75               |
| Austria . . . . . | 6,071,000  | 141,600       | 239              |
| Hungary . . . . . | 4,321,000  | 65,400        | 151              |
| Italy . . . . .   | 7,160,000  | 70,300        | 98               |
| Switzerland . . . | 746,000    | 4,000         | 53               |
| Sweden . . . . .  | 1,155,000  | 14,400        | 125              |
| Norway . . . . .  | 489,000    | 4,500         | 92               |
| Denmark . . . . . | 534,000    | 7,100         | 133              |
| Holland . . . . . | 1,084,000  | 4,600         | 42               |
| Belgium . . . . . | 1,483,000  | 16,500        | 111              |

The highest ratios are in Austria and Hungary, the lowest in Ireland.

The following table shows the numbers and ratios of still births:—

|                   | Still Births |         | Per 1000 Births |      |
|-------------------|--------------|---------|-----------------|------|
|                   | 1885         | 1895    | 1885            | 1895 |
| France . . . . .  | 44,000       | 41,600  | 50              | 50   |
| Germany . . . . . | 68,700       | 64,400  | 41              | 33   |
| Austria . . . . . | 24,500       | 27,300  | 29              | 30   |
| Hungary . . . . . | 13,100       | 17,700  | 18              | 24   |
| Italy . . . . .   | 39,300       | 45,900  | 36              | 43   |
| Sweden . . . . .  | 4,010        | 3,460   | 31              | 26   |
| Norway . . . . .  | 1,840        | 1,720   | 28              | 29   |
| Denmark . . . . . | 2,050        | 1,730   | 31              | 26   |
| Holland . . . . . | 7,790        | 7,610   | 52              | 49   |
| Belgium . . . . . | 8,520        | 8,630   | 50              | 45   |
| Switzerland . . . | 3,230        | 3,210   | 40              | 40   |
| Roumania . . . .  | 2,200        | 2,640   | ...             | ...  |
| Japan . . . . .   | 58,400       | 117,200 | 55              | 95   |

The above shows an ascending ratio in 5 countries, and a descending in 5 others, the former being especially noticeable in Japan.

The number and ratio of illegitimate births in 1890 and 1896 are shown thus:—

|                   | Illegitimate Births |         | Per 1000 Births |      |
|-------------------|---------------------|---------|-----------------|------|
|                   | 1890                | 1896    | 1890            | 1896 |
| U. Kingdom . . .  | 50,400              | 50,800  | 46              | 44   |
| France . . . . .  | 71,100              | 76,300  | 85              | 88   |
| Germany . . . . . | 165,700             | 176,300 | 94              | 91   |
| Austria . . . . . | 128,700             | 141,600 | 148             | 145  |
| Hungary . . . . . | 60,000              | 65,400  | 86              | 85   |
| Italy . . . . .   | 78,800              | 70,300  | 73              | 64   |
| Scandinavia . . . | 24,700              | 26,000  | 95              | 97   |
| Switzerland . . . | 4,100               | 4,000   | 52              | 45   |
| Holland . . . . . | 4,760               | 4,600   | 32              | 29   |
| Belgium . . . . . | 15,250              | 16,500  | 86              | 87   |

There is a decline of illegitimacy in all countries except France, Belgium, and Scandinavia.

Illegitimate births are more numerous in cities than in

rural districts; returns for the following cities in 1888-89 showed:—

*Illegitimates in 1000 Births*

|                     |                     |                     |
|---------------------|---------------------|---------------------|
| Rotterdam . . . 70  | Berlin . . . . 154  | Leipzig . . . . 211 |
| Naples . . . . . 86 | Christiania . 162   | St. Petersburg 236  |
| Hague . . . . . 99  | Liege . . . . . 174 | Paris . . . . . 268 |
| Palermo . . . . 101 | Bucharest . . 175   | Copenhagen . 279    |
| Cologne . . . . 124 | Breslau . . . . 186 | Buda-Pesth . 299    |
| Antwerp . . . . 129 | Venice . . . . 189  | Moscow . . . 300    |
| Frankfort . . . 132 | Rome . . . . . 194  | Stockholm . 396     |
| Turin . . . . . 132 | Milan . . . . . 204 | Prague . . . 439    |
| Hamburg . . . . 138 | Dresden . . . 208   | Munich . . . 439    |
| Ghent . . . . . 144 | Trieste . . . . 211 | Vienna . . . 449    |

The following table shows the rates of births and deaths per thousand inhabitants in the last 12 years as compared with 20 years down to 1880, in various countries:—

|                   | Births  |         | Deaths  |         | Nat. Increase |         |
|-------------------|---------|---------|---------|---------|---------------|---------|
|                   | 1861-80 | 1885-96 | 1861-80 | 1885-96 | 1861-80       | 1885-96 |
| England . . . . . | 35.4    | 31.1    | 22.0    | 18.7    | 13.4          | 12.7    |
| France . . . . .  | 25.8    | 22.8    | 24.0    | 22.0    | 1.8           | 0.8     |
| Prussia . . . . . | 39.1    | 37.4    | 27.1    | 23.6    | 12.0          | 13.8    |
| Scandinavia . . . | 31.4    | 29.4    | 19.0    | 17.3    | 12.4          | 12.1    |
| Austria . . . . . | 38.9    | 37.7    | 30.8    | 28.3    | 8.1           | 9.4     |
| Hungary . . . . . | 42.6    | 42.7    | 39.4    | 31.8    | 3.2           | 10.9    |
| Italy . . . . .   | 37.2    | 37.0    | 29.9    | 26.4    | 7.3           | 10.6    |
| Holland . . . . . | 36.3    | 33.3    | 24.6    | 19.9    | 11.7          | 13.4    |
| Belgium . . . . . | 31.9    | 29.4    | 22.7    | 20.3    | 9.2           | 9.1     |
| Mean . . . . .    | 35.4    | 33.1    | 26.6    | 22.9    | 8.8           | 10.2    |

The mean birth-rate of Europe has declined 6 per cent. from what it was 30 years ago, but at the same time the death-rate has declined 14 per cent., so that it comes to pass that population is now increasing more rapidly. Thus the surplus of births over deaths 30 years ago was 8.8 per thousand inhabitants, and at present it is 10.2, equal to an improvement of 16 per cent. This decline of birth-rate and death-rate is progressive, as will be seen if we divide the last period into two of 6 years each, viz.:—

|                    | Births  |         | Deaths  |         | Nat. Increase |         |
|--------------------|---------|---------|---------|---------|---------------|---------|
|                    | 1885-90 | 1891-96 | 1885-90 | 1891-96 | 1885-90       | 1891-96 |
| England . . . . .  | 31.7    | 30.4    | 18.9    | 18.5    | 12.8          | 11.9    |
| Scotland . . . . . | 31.6    | 30.7    | 18.9    | 18.7    | 12.7          | 12.0    |
| Ireland . . . . .  | 22.8    | 22.9    | 18.0    | 18.1    | 4.8           | 4.8     |
| U. Kingdom . . .   | 30.5    | 29.6    | 18.8    | 18.4    | 11.7          | 11.2    |
| France . . . . .   | 23.3    | 22.4    | 21.9    | 22.1    | 1.4           | 0.3     |
| Prussia . . . . .  | 37.5    | 37.3    | 24.3    | 22.9    | 13.2          | 14.4    |
| Scandinavia . . .  | 30.0    | 28.8    | 17.2    | 17.3    | 12.8          | 11.5    |
| Austria . . . . .  | 37.7    | 37.7    | 29.0    | 27.6    | 8.7           | 10.1    |
| Hungary . . . . .  | 43.8    | 41.6    | 32.3    | 31.4    | 11.6          | 10.2    |
| Italy . . . . .    | 37.8    | 36.2    | 27.3    | 25.5    | 10.5          | 10.7    |
| Holland . . . . .  | 33.7    | 33.0    | 20.6    | 19.2    | 13.1          | 13.8    |
| Belgium . . . . .  | 29.7    | 29.2    | 20.7    | 19.9    | 9.0           | 9.3     |
| Mean . . . . .     | 33.8    | 32.9    | 23.6    | 22.7    | 10.2          | 10.2    |

The natality or annual offspring to be expected from 100 husbands according to age is:—

| Age             | Nat. p. c. | Age           | Nat. p. c. | Age           | Nat. p. c. |
|-----------------|------------|---------------|------------|---------------|------------|
| 23-25 . . . . . | 33         | 35-37 . . . . | 23         | 47-49 . . . . | 7          |
| 26-28 . . . . . | 35         | 38-40 . . . . | 19         | 50-51 . . . . | 5          |
| 29-31 . . . . . | 32         | 41-43 . . . . | 15         | 52-54 . . . . | 3          |
| 32-34 . . . . . | 28         | 44-46 . . . . | 11         | 55-60 . . . . | 2          |

The following table of natality by Körösi shows the ratio of births that may be expected yearly to 100 wives according to age :—

| Mother's Age    | Sweden | Norway | Alsace | Brunswick | Berlin | Buda-Pesth | Edinburgh | Average |
|-----------------|--------|--------|--------|-----------|--------|------------|-----------|---------|
| 15-19 . . . . . | 52     | 41     | 47     | 58        | 50     | 43         | 50        | 49      |
| 20-24 . . . . . | 45     | 58     | 56     | 45        | 46     | 36         | 42        | 47      |
| 25-29 . . . . . | 38     | 43     | 46     | 35        | 34     | 29         | 35        | 37      |
| 30-34 . . . . . | 31     | 36     | 39     | 27        | 23     | 21         | 27        | 29      |
| 35-39 . . . . . | 25     | 30     | 28     | 20        | 15     | 15         | 20        | 22      |
| 40-44 . . . . . | 14     | 18     | ...    | 8         | 6      | 6          | 8         | 10      |
| 45-49 . . . . . | 2      | 3      | ...    | 1         | 1      | 1          | 1         | 1       |

The most productive age for mothers is from 15 to 24, for fathers from 23 to 31: of 100 mothers, 48 of the said age will have children yearly; of 100 fathers, only 34. The reason that these numbers are not equal is because parents of those ages are not equal; for example, the number of fathers over 40 is much greater than that of mothers. The reproductive age with men may be said to cease at 60, although at 65 the chance of paternity is 3 in 1000, and it is 2 in 1000 at 69. Bertillon shows that birth-rate is much higher among the poor than the rich, and that 1000 women between 15 and 50 years of age will have the following number of children yearly :—

| Quarters               | Births Yearly per 1000 Women |        |        |        |         |
|------------------------|------------------------------|--------|--------|--------|---------|
|                        | Paris                        | London | Berlin | Vienna | Average |
| Rich . . . . .         | 44                           | 55     | 55     | 89     | 61      |
| Comfortable . . . . .  | 68                           | 107    | 105    | 154    | 108     |
| Poor . . . . .         | 102                          | 143    | 143    | 182    | 142     |
| General rate . . . . . | 80                           | 109    | 102    | 153    | 111     |

The annals of Berlin from 1826 to 1896 record the following multiple births :—

147,000 births of twins.  
7,733 " of 3 children.  
106 " of 4 children.  
3 " of 5 children.

(See page 93, where a case of 6 children at a birth is mentioned, in 1888.)

From the evidence of demographic tables it would appear that multiple births average as follows :—

Twins . . . . . 1,280 in 100,000 births.  
Triplets . . . . . 16 in " "  
4 or more children . . . . . 2 in a million births.

Twins and triplets are most frequent in Bavaria. Twins are less frequent in Spain, triplets in England, than in other countries (see page 93).

In Paris the returns for 4 years ending December 1895 gave the ratios of twins as to sex thus :—

| Sex                 | Mother's Age |       |         |
|---------------------|--------------|-------|---------|
|                     | 18-25        | 26-35 | Over 35 |
| 2 males . . . . .   | 348          | 343   | 348     |
| 2 females . . . . . | 382          | 302   | 320     |
| Mixed . . . . .     | 270          | 355   | 332     |
|                     | 1,000        | 1,000 | 1,000   |

In St. Petersburg the number of twins to 1000 births was :—

| Mother's Age    |    | Mother's Age    |    |
|-----------------|----|-----------------|----|
| 16-20 . . . . . | 6  | 31-40 . . . . . | 22 |
| 20-30 . . . . . | 12 | 41-50 . . . . . | 17 |

The general ratio all round was 14 twin births to 1000 births.

In Canada 100,000 births give 850 twin births and 29 births of triplets, twins being less, triplets more, frequent than in Europe.

The sexes of children born in 1895 were :—

|                            | Number  |         | Ratio |         |
|----------------------------|---------|---------|-------|---------|
|                            | Males   | Females | Males | Females |
| England . . . . .          | 469,000 | 453,000 | 1,034 | 1,000   |
| Scotland . . . . .         | 64,900  | 61,600  | 1,054 | 1,000   |
| Ireland . . . . .          | 54,500  | 51,600  | 1,058 | 1,000   |
| U. Kingdom . . . . .       | 588,400 | 566,200 | 1,039 | 1,000   |
| Germany . . . . .          | 999,000 | 943,000 | 1,064 | 1,000   |
| Italy . . . . .            | 561,000 | 531,000 | 1,060 | 1,000   |
| Canada . . . . .           | 64,000  | 61,000  | 1,050 | 1,000   |
| Australia . . . . .        | 63,400  | 60,200  | 1,054 | 1,000   |
| U. States (1880) . . . . . | 807,000 | 770,000 | 1,048 | 1,000   |

### UNITED KINGDOM

The following table shows the births and deaths and the natural increase from surplus of births in the United Kingdom in 1897 :—

|                      | ooo omitted |        |          | Per 1000 Pop. |        |          |
|----------------------|-------------|--------|----------|---------------|--------|----------|
|                      | Births      | Deaths | Increase | Births        | Deaths | Increase |
| England . . . . .    | 921         | 541    | 380      | 29.7          | 17.5   | 12.2     |
| Scotland . . . . .   | 129         | 79     | 50       | 30.6          | 18.7   | 11.9     |
| Ireland . . . . .    | 107         | 84     | 23       | 23.5          | 18.5   | 5.0      |
| U. Kingdom . . . . . | 1,157       | 704    | 453      | 29.0          | 17.7   | 11.3     |

The following table shows the population, birth and death rates of the largest cities in England :—

|                      | Population (1897) | Per 1000 Inhabitants |        |          |
|----------------------|-------------------|----------------------|--------|----------|
|                      |                   | Births               | Deaths | Increase |
| London . . . . .     | 4,463,000         | 30.7                 | 19.0   | 11.7     |
| Liverpool . . . . .  | 633,000           | 35.3                 | 24.4   | 10.9     |
| Manchester . . . . . | 534,000           | 33.3                 | 23.1   | 10.2     |
| Birmingham . . . . . | 506,000           | 33.3                 | 21.6   | 11.7     |
| Leeds . . . . .      | 409,000           | 31.6                 | 19.9   | 11.7     |
| Sheffield . . . . .  | 352,000           | 34.4                 | 21.2   | 13.2     |
| Bristol . . . . .    | 232,000           | 27.8                 | 17.2   | 10.6     |

A statement was published in 1891 on an average of five years, showing the birth-rates and death-rates of London and of the Peabody Buildings, to 31st December 1890, with the natural increase of population, as follows :—

|                   | Per 10,000 Inhabitants |        |          |
|-------------------|------------------------|--------|----------|
|                   | Births                 | Deaths | Increase |
| London . . . . .  | 308                    | 191    | 117      |
| Peabody . . . . . | 402                    | 188    | 214      |

The surplus of births over deaths in the Peabody Buildings was almost in twice the ratio of London.

## FRANCE

Turquand shows that the fecundity of men and women in France (1892-95) is as follows, men being taken from 18 years of age, women from 15 years upwards :—

| Age                   | Children Yearly to 1000 |       | Number of |          |
|-----------------------|-------------------------|-------|-----------|----------|
|                       | Husbands                | Wives | Wives     | Children |
| Under 24 . . . . .    | 318                     | 299   | 705,000   | 210,500  |
| 25-34 . . . . .       | 259                     | 213   | 1,931,100 | 410,400  |
| 35-44 . . . . .       | 247                     | 81    | 1,864,000 | 152,000  |
| 45-50 . . . . .       | 46                      | 8     | 832,100   | 6,300    |
| Over 50 . . . . .     | 7                       | ...   | 2,324,500 | 900      |
| Of all ages . . . . . | 102                     | 102   | 7,656,700 | 780,100  |

The above regards only married persons, the ages of widows and unmarried girls having children being as follows :—

| Age               | Unmarried Women | Children | In 10,000 Women |
|-------------------|-----------------|----------|-----------------|
| 0-20 . . . . .    | 1,928,900       | 14,592   | 75              |
| 20-24 . . . . .   | 1,066,000       | 27,370   | 257             |
| 25-34 . . . . .   | 854,500         | 24,980   | 292             |
| 35-44 . . . . .   | 612,000         | 5,596    | 91              |
| Over 44 . . . . . | 3,533,470       | 1,272    | 4               |
| Total . . . . .   | 7,994,870       | 73,810   | 92              |

Thus 10,000 married women of all ages will have 1020 children yearly, and the same number of unmarried will have 92. If we take only women under 44 years the yearly birth-rate will be as follows :—

|                     | Women     | Births  | Per 10,000 |
|---------------------|-----------|---------|------------|
| Married . . . . .   | 4,500,000 | 773,000 | 172        |
| Unmarried . . . . . | 4,462,000 | 73,800  | 17         |

## GERMANY

Official returns for sixteen years (1875-90) show that birth-rate differs remarkably according to the religion of the parents, Roman Catholics being much above par, and mixed marriages no less below it. The table also gives the ratio of still births to each religion, viz :—

| Parents                            | Children to 100 Families | Still Births in 10,000 Births |
|------------------------------------|--------------------------|-------------------------------|
| Roman Catholic . . . . .           | 524                      | 356                           |
| Evangelical . . . . .              | 435                      | 405                           |
| R. Cath. and Evangelical . . . . . | 332                      | 335                           |
| Jewish . . . . .                   | 421                      | 329                           |
| Jewish and Evangelical . . . . .   | 168                      | 337                           |

## HUNGARY

Körösi shows that 1000 married couples will have the following number of children yearly :—

## Children Yearly to 1000 Wives

| Father's Age    | Mother's Age |     |     |
|-----------------|--------------|-----|-----|
|                 | 25-          | 30- | 35- |
| 25-29 . . . . . | 356          | 250 | 212 |
| 30-34 . . . . . | 312          | 236 | 199 |
| 35-39 . . . . . | 275          | 218 | 194 |
| 40-50 . . . . . | 275          | 153 | 125 |

## Mother's Age

## Father's Age

|                 | 25- | 35- | 45- |
|-----------------|-----|-----|-----|
| 20-24 . . . . . | 430 | 313 | 160 |
| 25-29 . . . . . | 308 | 273 | 185 |
| 30-34 . . . . . | 335 | 277 | 144 |
| 35-39 . . . . . | ... | 189 | 118 |

The maximum age of fecundity is as follows :—

| For Men |      | For Women |         |
|---------|------|-----------|---------|
| Husband | Wife | Wife      | Husband |
| 25      | 19   | 18        | 25      |
| 35      | 21   | 25        | 28      |
| 40      | 24   | 30        | 30      |
| 45      | 29   | 35        | 29      |

## CANADA

The number of all births compared to marriages in 1895 was :—

|                           | Marriages | Births  | Ratio of Births |
|---------------------------|-----------|---------|-----------------|
| Ontario . . . . .         | 13,990    | 41,630  | 3.0             |
| Quebec . . . . .          | 10,170    | 58,650  | 5.8             |
| Other Provinces . . . . . | 3,910     | 13,160  | 3.4             |
| Total . . . . .           | 28,070    | 113,440 | 4.1             |

The above, however, does not include Nova Scotia or the North-West Territories, for which there are no returns. As illegitimate births constitute 1½ per cent., the ratio of lawful births to a marriage is found to be 4.0, the above table including bastards.

## AUSTRALIA

The following table shows the birth-rate of the colonies, the ratio of males born to 100 females, and the ratio of illegitimacy :—

|                           | Births per 1000 Pop. | Male to 100 Fem. Births | Illegitimate per Cent. |
|---------------------------|----------------------|-------------------------|------------------------|
| New South Wales . . . . . | 32.8                 | 105                     | 5.7                    |
| Victoria . . . . .        | 31.0                 | 106                     | 5.0                    |
| New Zealand . . . . .     | 27.7                 | 105                     | 3.2                    |
| Queensland . . . . .      | 34.1                 | 104                     | 4.8                    |
| South Australia . . . . . | 31.5                 | 106                     | 2.5                    |
| Tasmania . . . . .        | 32.2                 | 103                     | 4.2                    |
| West Australia . . . . .  | 31.2                 | 101                     | 4.3                    |
| Total . . . . .           | 31.3                 | 105                     | 4.8                    |

## UNITED STATES

The section on Births for the census of 1890 is not yet published. The figures for 1880 showed as follows, the column of Women indicating those between 15 and 50 years of age, to compare the number of births :—

|                    | Number (ooo omitted) |        |       |                       | Births<br>to<br>1000<br>Women |
|--------------------|----------------------|--------|-------|-----------------------|-------------------------------|
|                    | Births               |        |       | Number<br>of<br>Women |                               |
|                    | Male                 | Female | Total |                       |                               |
| White . . . . .    | 372                  | 352    | 724   | 5,696                 | 127                           |
| Coloured . . . . . | 120                  | 120    | 240   | 1,469                 | 164                           |
| Doubtful . . . . . | 315                  | 298    | 613   | 5,208                 | 118                           |
| Total . . . . .    | 807                  | 770    | 1,577 | 12,373                | 127                           |

The sexes of coloured children were equal, but those of white or doubtful classification showed male births ½ per cent. in excess of female, as occurs also in Europe.

The birth-rate to the above three sections of population was as follows :—

|                | Population | Births    | Per 1000 |
|----------------|------------|-----------|----------|
| Whites . . .   | 22,599,000 | 724,000   | 32.0     |
| Coloured . . . | 6,233,000  | 240,000   | 38.6     |
| Doubtful . . . | 21,324,000 | 613,000   | 28.7     |
| Total . . .    | 50,156,000 | 1,577,000 | 31.4     |

The ratio of women of child-bearing age to the above classes was :—

|                | Population | Women      | Per 1000 |
|----------------|------------|------------|----------|
| Whites . . .   | 22,599,000 | 5,696,000  | 252      |
| Coloured . . . | 6,233,000  | 1,469,000  | 236      |
| Doubtful . . . | 21,324,000 | 5,208,000  | 244      |
| Total . . .    | 50,156,000 | 12,373,000 | 247      |

The highest and lowest birth-rates were as follows :—

*Highest*

| State          | Per 1000 Pop. | Per 1000 Women |
|----------------|---------------|----------------|
| Arkansas . . . | 42.7          | 190            |
| Utah . . .     | 41.9          | 199            |
| Texas . . .    | 41.3          | 187            |

*Lowest*

|                   | Per 1000 Pop. | Per 1000 Women |
|-------------------|---------------|----------------|
| New Hampshire . . | 19.1          | 72             |
| Arizona . . .     | 19.3          | 114            |
| Maine . . .       | 20.9          | 81             |

**CABS**

The number of cabs and omnibuses in various cities in 1890 was :—

|                  | Number |        | Per 10,000 Pop. |        |
|------------------|--------|--------|-----------------|--------|
|                  | Cabs   | Busses | Cabs            | Busses |
| London . . .     | 11,300 | 2,210  | 27              | 5      |
| Paris . . .      | 11,700 | 840    | 48              | 2      |
| Berlin . . .     | 5,700  | 240    | 40              | 2      |
| Vienna . . .     | 2,200  | 620    | 17              | 5      |
| Buda-Pesth . . . | 1,000  | 100    | 20              | 2      |
| Bordeaux . . .   | 1,200  | 140    | 48              | 5      |
| Rome . . .       | 2,400  | 130    | 53              | 3      |
| Naples . . .     | 2,900  | 110    | 55              | 2      |
| Genoa . . .      | 300    | 220    | 14              | 10     |
| Florence . . .   | 900    | 70     | 45              | 3      |

The above 10 cities show an average of 37 cabs and 4 busses to every 10,000 souls. London is below the average in cabs, but above it in busses. See *Tramways*, page 814, also *Cabs*, page 100.

The Omnibus Company of Paris has 16,000 horses and 1,100 busses or tramcars, some of the latter being horse-cars, others drawn by locomotives (tramways 105 miles long), the development of this Company having been as follows :—

|            | Carriages | Horses | Passengers, Millions | Tax Paid, £ | Dividend, Francs |
|------------|-----------|--------|----------------------|-------------|------------------|
| 1865 . . . | 732       | 8,230  | 107                  | 88,000      | 60               |
| 1875 . . . | 736       | 9,760  | 123                  | 102,000     | 50               |
| 1885 . . . | 896       | 12,980 | 191                  | 148,000     | 55               |
| 1896 . . . | 1,091     | 16,330 | 246                  | 194,000     | 45               |

**BOUNTIES**

See page 494.

**BULLION**

The following table shows the average annual imports and exports of bullion in ten years to December 1895 :—

|                   | Imported, £ per An. |             | Exported, £ |             |
|-------------------|---------------------|-------------|-------------|-------------|
|                   | 1886-90             | 1891-95     | 1886-90     | 1891-95     |
| U. Kingdom        | 24,400,000          | 38,800,000  | 22,200,000  | 31,800,000  |
| France . . .      | 16,600,000          | 22,600,000  | 15,800,000  | 14,000,000  |
| Germany . . .     | 5,600,000           | 11,200,000  | 5,600,000   | 7,200,000   |
| Russia . . .      | 2,600,000           | 12,000,000  | 3,800,000   | 1,090,000   |
| Austria . . .     | 2,000,000           | 6,200,000   | 500,000     | 1,600,000   |

| Various . . .     | 1,800,000           | 1,400,000   | 10,700,000  | 28,400,000  |
| Total . . .       | 107,000,000         | 152,000,000 | 107,000,000 | 152,000,000 |

See *Gold and Silver*, pages 308 and 741.

**C**

The statement for 1896 was as follows :—

|                | Cars  | Horses | Passengers  | Miles Run  |
|----------------|-------|--------|-------------|------------|
| Busses . . .   | 670   | 10,550 | 135,400,000 | 14,400,000 |
| Tramcars . . . | 410   | 5,750  | 110,700,000 | 8,800,000  |
| Total . . .    | 1,080 | 16,300 | 246,100,000 | 23,200,000 |

|                | Daily Average |        | Receipts, Pence per |           |
|----------------|---------------|--------|---------------------|-----------|
|                | Passengers    | Miles  | Mile                | Passenger |
| Busses . . .   | 370,000       | 40,000 | 16.7                | 1.78      |
| Tramcars . . . | 301,000       | 25,000 | 20.5                | 1.66      |
| Total . . .    | 671,000       | 65,000 | 18.2                | 1.73      |

Bus passengers were 57 per cent. inside, 43 out ; tram-cars carried 55 per cent. inside, 45 out. Busses had 10 passengers, tramcars 12, per mile run. Each horse on active service ran 10 miles daily, carried 100 passengers, and earned 178 pence. Gross receipts, £1,760,000, say £4800 daily.

**CANALS**

Exclusive of the Manchester Ship Canal, those of the United Kingdom show the following traffic :—

|                    | Worked by |            |            |
|--------------------|-----------|------------|------------|
|                    | Railways  | Companies  | Total      |
| Tons carried . . . | 8,030,000 | 28,270,000 | 36,300,000 |
| Receipts, £ . . .  | 500,000   | 1,540,000  | 2,040,000  |
| Expenses, £ . . .  | 370,000   | 950,000    | 1,320,000  |
| Profit, £ . . .    | 130,000   | 590,000    | 720,000    |

|                | Miles in Traffic by |           |       |
|----------------|---------------------|-----------|-------|
|                | Railways            | Companies | Total |
| England . . .  | 1,024               | 2,026     | 3,050 |
| Scotland . . . | 84                  | 69        | 153   |
| Ireland . . .  | 96                  | 513       | 609   |
| Total . .      | 1,204               | 2,608     | 3,812 |

The above includes 1070 miles of canals no longer used, but nominally belonging to Companies. The mileage traffic returns for canals owned by Railways and Companies show :—

|                     | Railway Canals | Company Canals | Total |
|---------------------|----------------|----------------|-------|
| Tons per mile . . . | 670            | 1,080          | 950   |
| Receipts, £ . . .   | 420            | 600            | 535   |
| Expenses, £ . . .   | 300            | 360            | 350   |
| Profit, £ . . .     | 120            | 240            | 185   |

|                            | England | Scotland | Ireland |
|----------------------------|---------|----------|---------|
| Receipts, £ per mile . . . | 625     | 460      | 160     |
| Expenses . . . . .         | 400     | 280      | 120     |
| Profit . . . . .           | 225     | 180      | 40      |

The Manchester Ship Canal, opened in 1894, is 36 miles long, 26 feet deep, and 120 wide, having cost £15,400,000, or £425,000 per mile; traffic returns showed 2,100,000 tons in 1897, an increase of 13 per cent. over 1896, and 53 per cent. over 1895. This canal cost per mile more than twice as much as the Suez Canal.

*Suez Canal.*—Traffic returns for 1896 compare with those of previous years thus :—

| Year         | Ships | Tons       | Average Tonnage | Fees, £   |
|--------------|-------|------------|-----------------|-----------|
| 1886 . . . . | 3,100 | 8,180,000  | 2,640           | 2,260,000 |
| 1891 . . . . | 4,207 | 12,220,000 | 2,500           | 3,340,000 |
| 1897 . . . . | 2,986 | 11,120,000 | 3,720           | 2,840,000 |

Net profits in 1896 amounted to £1,690,000, equal to 7 per cent. on capital.

The various flags of vessels passing through in 1886 and in 1896 showed thus :—

|               | Tonnage   |            | Percentage of Increase | Ratio in 1896 |
|---------------|-----------|------------|------------------------|---------------|
|               | 1886      | 1896       |                        |               |
| British . . . | 6,260,000 | 8,060,000  | 29                     | 67.0          |
| German . . .  | 320,000   | 1,120,000  | 250                    | 9.3           |
| French . . .  | 700,000   | 820,000    | 17                     | 6.8           |
| Italian . . . | 190,000   | 590,000    | 210                    | 4.9           |
| Dutch . . .   | 310,000   | 520,000    | 70                     | 4.3           |
| Various . . . | 400,000   | 930,000    | 132                    | 7.7           |
| Total . . .   | 8,180,000 | 12,040,000 | 47                     | 100.0         |

The preponderance of British shipping in the Suez Canal traffic is declining, having fallen from 76½ per cent. of the total in 1886 to 67 per cent. in 1896. At the same time it will be observed that the increase of tonnage in the 10 years was 3,860,000, and of this the British increase amounted to 1,800,000 tons, or nearly half the total. The average size of ships (gross tonnage) passing through the canal in 1896 was :—

| Flag          | Tons  | Flag          | Tons  |
|---------------|-------|---------------|-------|
| British . . . | 3,730 | Italian . . . | 2,600 |
| German . . .  | 3,480 | Dutch . . .   | 2,600 |
| French . . .  | 3,760 | Various . . . | 3,340 |

For further particulars about this canal see page 102.

## GERMANY

*Germany.*—According to statements published in 1878 and 1886, the navigable rivers had a length of 15,000 miles, canals 1320 miles, but the *Statesman's Year-Book* (1898) publishes an official statement as follows :—

| Draft                | Miles  |        |       |
|----------------------|--------|--------|-------|
|                      | Rivers | Canals | Total |
| Under 5 feet . . . . | 6,170  | 1,304  | 7,474 |
| Over „ . . . .       | 1,030  | 150    | 1,180 |
| Total . .            | 7,200  | 1,454  | 8,654 |

The Kiel Canal, from the German Ocean to the Baltic, is 61 miles long, 30 feet deep, and 213 wide; it was opened, after eight years of work, in June 1895, having cost £7,800,000, equal to £128,000 per mile. Traffic returns for 1897 show that 16,960 vessels passed through in the year, paying £51,000, or an average of £3 each. Working expenses amounted to £100,000, or double the receipts. This canal shortens the route to the Baltic by 44 hours for vessels from Hamburg, and 32 from London.

## FRANCE

Canal and river traffic in 1896 compare with previous years in tons carried 100 miles as follows :—

| Year         | Tons by    |            |            |
|--------------|------------|------------|------------|
|              | Canal      | River      | Total      |
| 1870 . . . . | 5,500,000  | 3,400,000  | 8,900,000  |
| 1880 . . . . | 6,800,000  | 5,500,000  | 12,300,000 |
| 1892 . . . . | 12,800,000 | 9,400,000  | 22,200,000 |
| 1896 . . . . | 15,200,000 | 10,600,000 | 25,800,000 |

The above, of course, does not express the actual number of tons carried, but the number which results from giving 100 miles to each ton. The tonnage carried one mile to each mile of canal and river at the above dates was :—

| Year         | Canal   | River   | Total   |
|--------------|---------|---------|---------|
| 1870 . . . . | 192,000 | 81,000  | 273,000 |
| 1880 . . . . | 249,000 | 132,000 | 381,000 |
| 1892 . . . . | 423,000 | 214,000 | 637,000 |
| 1896 . . . . | 502,000 | 263,000 | 765,000 |

Traffic has doubled since 1880, and trebled since 1870. The length of canals and navigable rivers used for traffic varies every year. In 1896 it was :—

|                       | In Use | Unused | Total |
|-----------------------|--------|--------|-------|
| Canals, miles . . . . | 3,030  | 50     | 3,080 |
| Rivers, „ . . . .     | 4,030  | 1,390  | 5,420 |
| Total miles . . . .   | 7,060  | 1,440  | 8,500 |

It is proposed to make a ship canal from Bordeaux to the Mediterranean, 330 miles long and 70 feet wide: estimated cost £22,400,000, say £68,000 per mile. The canals are State property, and the traffic is carried on by 16,000 boats, which give employment to 41,000 men and women. In 1896 agricultural products formed 3,500,000 tons, and building materials 8,700,000 tons of merchandise carried.

## AUSTRIA

The goods traffic on Danube and Elbe by steamer was as follows:—

| On              | Tons Carried |           |           |
|-----------------|--------------|-----------|-----------|
|                 | 1891         | 1893      | 1895      |
| Danube . . . .  | 1,980,000    | 2,180,000 | 1,960,000 |
| Elbe . . . . .  | 650,000      | 550,000   | 640,000   |
| Total . . . . . | 2,630,000    | 2,730,000 | 2,600,000 |

## RUSSIA

There are 2200 steamboats and 345,000 vessels and rafts on the inland waters of Russia in Europe, carrying 24 million tons of merchandise, valued at 28 millions sterling. The length of navigable rivers and canals is 47,500 miles, and traffic returns show thus:—

|                    | Tons       |            |
|--------------------|------------|------------|
|                    | 1890       | 1894       |
| Timber . . . . .   | 7,820,000  | 9,210,000  |
| Grain . . . . .    | 2,230,000  | 3,680,000  |
| Naphtha . . . . .  | 710,000    | 2,020,000  |
| Sundries . . . . . | 5,900,000  | 8,420,000  |
| Total . . . . .    | 16,660,000 | 23,300,000 |

## UNITED STATES

The coast and internal water traffic at last census were reported as follows for 1889:—

| Line               | Vessels | Tonnage   | Tons Carried | Passengers  |
|--------------------|---------|-----------|--------------|-------------|
| Mississippi        | 7,453   | 3,390,000 | 29,400,000   | 10,900,000  |
| Lakes . . . . .    | 2,784   | 930,000   | 53,400,000   | 2,300,000   |
| Pfc. coast         | 1,842   | 440,000   | 8,800,000    | 4,000,000   |
| Atlantic . . . . . | 13,466  | 2,860,000 | 80,700,000   | 152,700,000 |
| Total . . . . .    | 25,545  | 7,620,000 | 172,300,000  | 169,900,000 |

The above is exclusive of canals, of which there are 270 miles in active use:—

| State                  | Miles | Cost, £    | Tons Carried | Fees, £ |
|------------------------|-------|------------|--------------|---------|
| New York . . . . .     | 650   | 15,400,000 | 6,800,000    | 190,000 |
| Pennsylvania . . . . . | 465   | 6,600,000  | 1,400,000    | 500,000 |
| Ohio . . . . .         | 660   | 3,000,000  | 1,100,000    | 20,000  |
| New Jersey . . . . .   | 170   | 2,300,000  | 1,700,000    | 70,000  |
| Various . . . . .      | 325   | 4,100,000  | 2,200,000    | 120,000 |
| Total . . . . .        | 2,270 | 31,400,000 | 13,200,000   | 900,000 |

Besides the above there are 2200 miles of abandoned canals, which represent a sum of £13,000,000 spent in their construction. There is, moreover, a short canal made in 1855 to connect Lakes Huron and Superior, of which the traffic returns show as follows:—

|                    | Tons      |            |
|--------------------|-----------|------------|
|                    | 1885      | 1895       |
| Grain . . . . .    | 570,000   | 2,480,000  |
| Coal . . . . .     | 890,000   | 2,570,000  |
| Iron ore . . . . . | 1,240,000 | 8,060,000  |
| Sundries . . . . . | 560,000   | 1,950,000  |
| Total . . . . .    | 3,260,000 | 15,060,000 |

The value of merchandise in 1894 reached £30,100,000, an average of 45 shillings per ton.

## CANADA

There is an unbroken length of 2260 miles of canalised river and canals from the Straits of Belleisle on the Atlantic to Port Arthur at the head of Lake Superior, which lake is 602 feet over sea-level. The whole system was originally intended for 9 feet draught, but is now available for vessels drawing 12 feet, and as high as Montreal for 27 feet draught, that is 980 miles from the sea. The canals have a total length of 70 miles, besides which there are forty miles of the St. Lawrence river between Montreal and Quebec dredged as a deep-water channel. These works have cost £13,400,000, of which £9,200,000 since the Dominion was established, in 1867. Traffic returns for 1885 and 1895 compare thus:—

|                        | Welland Canal |           | All       |           |
|------------------------|---------------|-----------|-----------|-----------|
|                        | 1885          | 1895      | 1885      | 1895      |
| Tonnage . . . . .      | 680,000       | 1,070,000 | 3,230,000 | 3,870,000 |
| Tons carried . . . . . | 780,000       | 870,000   | 2,670,000 | 2,740,000 |
| Passengers . . . . .   | 4,000         | 34,000    | 70,000    | 154,000   |
| Tolls, £ . . . . .     | 30,000        | 29,000    | 300,000   | 265,000   |

The goods carried in 1895 were of the following kinds:—

|                         | Tons    |              |           |
|-------------------------|---------|--------------|-----------|
|                         | Welland | Other Canals | Total     |
| Timber . . . . .        | 120,000 | 950,000      | 1,070,000 |
| Farm products . . . . . | 490,000 | 350,000      | 840,000   |
| Merchandise . . . . .   | 260,000 | 570,000      | 830,000   |
| Total . . . . .         | 870,000 | 1,870,000    | 2,740,000 |

The net revenue which the Government receives from the canals averages £70,000 a year, which is about the half of 1 per cent., say £5 per thousand, on the cost of their construction.

## GREECE

The Corinth Canal, 4 miles long, 72 feet wide, and 27 feet deep, was opened to traffic in 1893. It shortens the route from Marseilles to Constantinople by 95 miles, and from Trieste to Athens by 185 miles.

## CAPITAL

New capital called up in 1897 in Europe was:—

|                            | Millions £ Sterling * |           |       |
|----------------------------|-----------------------|-----------|-------|
|                            | Loans                 | Companies | Total |
| United Kingdom . . . . .   | 21.8                  | 114.2     | 136.0 |
| France . . . . .           | 0.6                   | 15.2      | 15.8  |
| Germany . . . . .          | 18.3                  | 76.0      | 94.3  |
| Russia . . . . .           | 4.8                   | 25.2      | 30.0  |
| Austria . . . . .          | 6.7                   | 4.2       | 10.9  |
| Italy . . . . .            | 0.1                   | 1.9       | 2.0   |
| Spain . . . . .            | 7.4                   | 1.6       | 9.0   |
| Scandinavia . . . . .      | 4.0                   | 0.3       | 4.3   |
| Holland . . . . .          | 0.6                   | 5.6       | 6.2   |
| Belgium . . . . .          | 3.1                   | 2.9       | 6.0   |
| Switzerland . . . . .      | 3.4                   | 2.1       | 5.5   |
| Turkey, &c. . . . .        | 1.9                   | 1.3       | 3.2   |
| Europe . . . . .           | 72.7                  | 250.5     | 323.2 |
| Average, 1881-85 . . . . . | 73.6                  | 121.0     | 194.6 |
| „ 1871-82 . . . . .        | 157.0                 | 206.0     | 363.0 |

For details before 1882 see Part I., page 106.

\* Note.—The table reads thus: Loans 21.8 signifies £21,800,000.

## GREAT BRITAIN

The amount of British capital invested abroad in 1893 was estimated (Dict. Polit. Econ.) as follows:—

| Loans         | Ml. £ | Railways  | Ml. £ | Sundries   | Ml. £ |
|---------------|-------|-----------|-------|------------|-------|
| Foreign       | 525   | U. States | 120   | Banks      | 50    |
| Colonial      | 225   | Colonial  | 140   | Lands      | 100   |
| Municipal do. | 20    | Various   | 128   | Mines, &c. | 390   |
| Total         | 770   | Total     | 388   | Total      | 540   |

This makes a total of 1698 millions, which compares with previous estimates thus:—

| Year | Millions £ |                 |
|------|------------|-----------------|
|      | Amount     | Annual Increase |
| 1862 | 144        | ...             |
| 1872 | 600        | 45.6            |
| 1882 | 875        | 27.5            |
| 1893 | 1,698      | 74.8            |

The amount of British capital invested abroad in 1893 was equal to 15 per cent. of the total wealth of the United Kingdom.

The registered paid-up capital of joint-stock companies in the United Kingdom was:—

|                | Millions £ Sterling |      |       |
|----------------|---------------------|------|-------|
|                | 1884                | 1890 | 1896  |
| England        | 428                 | 706  | 1,036 |
| Scotland       | 36                  | 52   | 83    |
| Ireland        | 12                  | 17   | 27    |
| United Kingdom | 476                 | 775  | 1,146 |

The average amount of capital (paid-up) to each company was as follows:—

|                    | 1884   | 1890   | 1896   |
|--------------------|--------|--------|--------|
| England, £         | 56,000 | 61,000 | 56,000 |
| Scotland, ..       | 50,000 | 47,000 | 46,000 |
| Ireland, ..        | 31,000 | 28,000 | 31,000 |
| United Kingdom, .. | 54,000 | 58,100 | 54,000 |

The paid-up joint-stock capital of the three kingdoms has more than doubled in twelve years. The average to each company is unchanged, except a fall in Scotland.

The new capital actually called up in Great Britain was:—

| Year     | Millions Sterling | Per Annum |
|----------|-------------------|-----------|
| 1879-85  | 581               | 83        |
| 1886-89  | 507               | 127       |
| 1890-97  | 643               | 80        |
| 19 years | 1,731             | 91        |

In 1897 the new capital nominally created was £157,300,000, but the amount actually paid up was only £81,700,000, or 52 per cent. of the former sum. The nominal new capital may be summed up thus:—

|                | £          |                  | £          |
|----------------|------------|------------------|------------|
| Foreign loans  | 10,600,000 | Breweries        | 18,000,000 |
| Colonial ..    | 14,100,000 | Factories        | 15,400,000 |
| Foreign rails  | 5,500,000  | Municipal loans  | 7,700,000  |
| Colonial ..    | 4,400,000  | Railways         | 7,500,000  |
| Foreign mines  | 4,900,000  | Cycle companies  | 7,200,000  |
| Colonial ..    | 8,100,000  | Stores           | 9,000,000  |
| For. companies | 10,100,000 | Hotels, gas, &c. | 34,800,000 |
| Foreign        | 57,700,000 | British          | 99,600,000 |

The *Bankers' Magazine* (1898) gave the aggregate value of 325 descriptions of investments at the close of each year as follows:—

| Year | Millions £ |
|------|------------|
| 1891 | 2,777      |
| 1894 | 2,882      |
| 1896 | 3,198      |
| 1897 | 3,276      |

The par value of the above stocks was 2869 millions: the increase of value since 1894 was 394 millions, say 131 millions yearly.

## FRANCE

In 1895 Neymarck set down the floating capital of France as follows:—

|                | Millions £ | Holders    | £ per Holder |
|----------------|------------|------------|--------------|
| French stock   | 1,120      | 2,080,000  | 540          |
| Bank of France | 20         | 28,500     | 700          |
| Railway shares | 800        | 700,000    | 1,140        |
| Credit Foncier | 10         | 40,500     | 250          |
| Bank deposits  | 60         | 300,000    | 200          |
| Savings banks  | 155        | 8,600,000  | 18           |
| Total          | 2,165      | 11,749,000 | 180          |

Another estimate makes the floating capital 2400 millions sterling; Government stocks 1040, municipal stocks 200, railway scrip 800, factories and companies 200, banks and insurance 200, millions sterling. The following table shows the number and amount of securities lodged with the Bank of France for collection of coupons:—

| Year | Depositors, No. | Securities, Millions £ | Govt. Stocks, Dividend, £ |
|------|-----------------|------------------------|---------------------------|
| 1860 | 15,360          | 32                     | 400,000                   |
| 1869 | 23,486          | 52                     | 900,000                   |
| 1880 | 21,567          | 63                     | 1,200,000                 |
| 1895 | 45,500          | 131                    | 2,600,000                 |

The average market value of Bank of France stock belonging to each shareholder, and the interest gained in dividends on such stock, was as follows:—

| Period  | Stock, £ | Interest |
|---------|----------|----------|
| 1856-60 | 2,600    | 4.0      |
| 1876-80 | 2,550    | 3.7      |
| 1891-95 | 2,880    | 3.4      |

Notwithstanding the declining interest, the average stock to each holder is increasing.

According to Neymarck, the emissions of new capital in Europe in 22 years, ending December 1892, were as follows:—

|         | Millions £ | France took |
|---------|------------|-------------|
| 1871-85 | 4,020      | 824         |
| 1886-92 | 2,020      | 280         |
| Total   | 6,040      | 1,104       |

French capital invested in foreign countries in 1893 was as follows:—

| In      | Millions £ |           |       |
|---------|------------|-----------|-------|
|         | Loans      | Companies | Total |
| Russia  | 200        | ...       | 200   |
| Spain   | 40         | 70        | 110   |
| Austria | 50         | 56        | 106   |
| Italy   | 38         | 14        | 52    |
| Total   | 328        | 140       | 468   |

French capitalists draw dividends amounting to 160 millions sterling per annum, of which, as Neymarck computes, about 31 per cent. comes from investments in foreign countries, 38 per cent. from joint-stock companies in France, and the rest from French State or municipal securities. In 1887 the joint-stock companies in France paid income-tax on a capital of 1360 millions: adding to this the amount of French Rentes or stock (1100 millions sterling), the floating capital would reach 2460 millions sterling.

## ITALY

In 1897 the Italian Government paid coupons on Italian stock held in foreign countries representing the following capital value:—

| In                | Coupons, £ | Capital, £  |
|-------------------|------------|-------------|
| England . . . . . | 600,000    | 12,600,000  |
| France . . . . .  | 4,200,000  | 88,200,000  |
| Germany . . . . . | 2,300,000  | 48,300,000  |
| Total . . . . .   | 7,100,000  | 149,100,000 |

## BELGIUM

The amount of floating capital in Belgium in March 1898 was as follows:—

|                          | Millns. £ |                    | Millns. £ |
|--------------------------|-----------|--------------------|-----------|
| Belgian stocks . . . . . | 143.2     | Railways . . . . . | 12.5      |
| Foreign „ . . . . .      | 12.4      | Tramways . . . . . | 9.0       |
| Debentures . . . . .     | 40.8      | Mines . . . . .    | 27.2      |
| Banks . . . . .          | 21.0      | Sundries . . . . . | 17.4      |

making a total of 284 millions sterling, which is an increase of 12 millions in 1897.

## SUMMARY

In 1897 *L'Economiste* estimated the amounts held in stocks and shares in various countries as follows, between national and foreign:—

|                          | Millns. £ |                    | Millns. £ |
|--------------------------|-----------|--------------------|-----------|
| United Kingdom . . . . . | 2,922     | Italy . . . . .    | 281       |
| France . . . . .         | 1,280     | Holland . . . . .  | 218       |
| Germany . . . . .        | 1,472     | Belgium . . . . .  | 99        |
| Russia . . . . .         | 406       | Denmark . . . . .  | 43        |
| Austria . . . . .        | 392       | Roumania . . . . . | 19        |

This makes a total for Europe alone of 7132 millions sterling, of which the United Kingdom holds 45 per cent.

M. Georges Martin, of the Paris Statistical Society, sums up the different kinds of investments, such as loans, railway stocks, banks, mines, and other joint-stock enterprises held in certain countries and belonging to other countries, as follows:—

| Securities              | Held in |            |         |         |         |             |         |
|-------------------------|---------|------------|---------|---------|---------|-------------|---------|
|                         | France  | G. Britain | Germany | Belgium | Holland | Switzerland | Various |
| French . . . . .        | ...     | 24         | ...     | 37      | 4       | 10          | ...     |
| German . . . . .        | ...     | 8          | ...     | 15      | 5       | 9           | 5       |
| Spanish . . . . .       | 44      | 29         | 4       | 25      | 5       | 12          | ...     |
| Austrian . . . . .      | 25      | 10         | 183     | 24      | 39      | 15          | 2       |
| Russian . . . . .       | 17      | 30         | 79      | 31      | 69      | 4           | ...     |
| Brazilian . . . . .     | 8       | 81         | 5       | 12      | 8       | 5           | ...     |
| Argentine . . . . .     | 14      | 123        | 9       | 37      | 3       | 7           | ...     |
| Canadian . . . . .      | 8       | 140        | ...     | ...     | 10      | 2           | ...     |
| Australian . . . . .    | ...     | 230        | ...     | ...     | ...     | ...         | ...     |
| United States . . . . . | 3       | 341        | 94      | 2       | 128     | 9           | ...     |
| Turkish . . . . .       | 14      | 26         | 15      | 4       | 7       | 4           | 8       |
| Indian . . . . .        | ...     | 103        | ...     | ...     | ...     | ...         | ...     |

| Egyptian . . . . .      | 20      | 20         | 6       | ...     | ...     | ...         | ...     |
| Mexican . . . . .       | 4       | 26         | ...     | ...     | ...     | ...         | 4       |
| Various . . . . .       | 161     | 402        | 161     | 85      | 98      | 30          | ...     |
| Total . . . . .         | 334     | 1,613      | 591     | 312     | 386     | 143         | 25      |
| Public loans . . . . .  | 113     | 365        | 214     | 114     | 112     | 33          | 13      |
| Companies . . . . .     | 221     | 1,248      | 377     | 198     | 274     | 110         | 12      |

Great Britain stands for nearly half the total, and as our investments abroad appear to exceed 1700 millions sterling, it may be roughly estimated that the above stocks represent altogether 3400 millions which the creditor countries have lent outside their own frontiers for investment.

## CATTLE

The following table shows the number of live stock and value:—

|                             | Horses     | Cattle      | Sheep       | Pigs       | Goats      | Value, Millions £ |
|-----------------------------|------------|-------------|-------------|------------|------------|-------------------|
| United Kingdom . . . . .    | 2,070,000  | 11,000,000  | 30,570,000  | 3,680,000  | 600,000    | 202               |
| France . . . . .            | 3,030,000  | 13,300,000  | 21,200,000  | 6,400,000  | 1,500,000  | 232               |
| Germany . . . . .           | 3,800,000  | 17,600,000  | 13,600,000  | 12,200,000 | 3,100,000  | 303               |
| Russia . . . . .            | 21,700,000 | 27,600,000  | 48,200,000  | 10,700,000 | 1,300,000  | 350               |

| Canada . . . . .            | 1,400,000  | 4,200,000   | 3,500,000   | 1,800,000  | ...        | 43                |
| Australia . . . . .         | 1,900,000  | 12,700,000  | 110,500,000 | 1,000,000  | ...        | 120               |
| Argentina . . . . .         | 4,400,000  | 22,900,000  | 80,200,000  | 300,000    | ...        | 51                |
| South Africa . . . . .      | 400,000    | 2,700,000   | 17,800,000  | 300,000    | 6,200,000  | 23                |
| Algeria . . . . .           | 400,000    | 1,100,000   | 7,900,000   | ...        | 3,500,000  | 21                |
| Uruguay . . . . .           | 400,000    | 5,200,000   | 14,300,000  | 100,000    | ...        | 15                |
| Total . . . . .             | 64,700,000 | 200,000,000 | 446,700,000 | 97,000,000 | 31,000,000 | 2,196             |

The value of live stock in the United States fell from 451 millions sterling in 1894 to 344 millions in 1897, the number of head in the same interval (big and little) having declined from 162 millions to 140 millions, a fall of 13½ per cent. in 3 years.

The live stock of each country compared with population shows as follows :—

|               | Per 100 Inhabitants |      |       |      | Value, £ per Inhab. |
|---------------|---------------------|------|-------|------|---------------------|
|               | Horses              | Cows | Sheep | Pigs |                     |
| U. Kingdom    | 5                   | 27   | 78    | 10   | 5.1                 |
| France . .    | 8                   | 33   | 55    | 15   | 6.0                 |
| Germany . .   | 7                   | 34   | 34    | 23   | 5.7                 |
| Russia . .    | 20                  | 27   | 48    | 10   | 3.0                 |
| Austria . .   | 9                   | 34   | 38    | 22   | 3.8                 |
| Italy . .     | 4                   | 16   | 28    | 6    | 3.0                 |
| Spain . .     | 5                   | 12   | 105   | 11   | 2.7                 |
| Denmark . .   | 20                  | 85   | 65    | 40   | 11.5                |
| Sweden . .    | 10                  | 50   | 28    | 15   | 6.0                 |
| Holland . .   | 6                   | 32   | 18    | 23   | 6.0                 |
| Belgium . .   | 5                   | 24   | 10    | 11   | 3.4                 |
| Switzerland . | 3                   | 40   | 22    | 12   | 6.0                 |
| Europe . .    | 10                  | 28   | 52    | 15   | 4.2                 |
| U. States . . | 23                  | 65   | 51    | 56   | 4.8                 |
| Canada . .    | 28                  | 84   | 70    | 34   | 8.6                 |
| Australia . . | 45                  | 320  | 2,900 | 25   | 27.0                |
| Argentina . . | 110                 | 570  | 4,050 | 7    | 13.0                |

In the above table horses include mules, and goats are counted with sheep.

#### UNITED STATES

The live stock suffers frequent changes, being now less numerous than 10 years ago, viz. :—

| Year       | Number (000 omitted) |        |        |        |
|------------|----------------------|--------|--------|--------|
|            | Horses               | Cattle | Sheep  | Pigs   |
| 1876 . . . | 11,100               | 27,900 | 35,900 | 25,700 |
| 1880 . . . | 12,900               | 33,200 | 40,800 | 34,100 |
| 1886 . . . | 14,100               | 45,500 | 48,300 | 46,100 |
| 1890 . . . | 16,500               | 52,800 | 44,300 | 51,600 |
| 1897 . . . | 16,600               | 46,500 | 36,800 | 40,600 |

If we reduce all live stock to a common denominator as cattle (six sheep or pigs counting as one), the number compares with population at the above dates thus :—

|            | Cattle     | Population | Cattle per 100 Inhabit. |
|------------|------------|------------|-------------------------|
| 1876 . . . | 49,300,000 | 43,100,000 | 114                     |
| 1880 . . . | 58,600,000 | 50,200,000 | 117                     |
| 1886 . . . | 75,300,000 | 57,400,000 | 131                     |
| 1890 . . . | 85,300,000 | 62,600,000 | 136                     |
| 1897 . . . | 75,900,000 | 72,800,000 | 104                     |

The ratio of cattle to population has fallen nearly 23 per cent. since 1890, but is not much below the level of 20 years ago, when population was 40 per cent. less than at present. The area devoted to pasture could easily carry 150 million head of cattle, that is double the actual amount of stock, and as we have already seen an increase of 30 per cent. in 6 years, from 1880 to 1886, it is quite possible that the number may rise to 100 million

head in the early years of the 20th century. In 1894 the richest States in live stock were :—

|                | Number (000 omitted) |        |        |        |
|----------------|----------------------|--------|--------|--------|
|                | Cattle               | Horses | Sheep  | Pigs   |
| Texas . . .    | 7,400                | 1,440  | 3,810  | 2,560  |
| Iowa . . .     | 4,010                | 1,410  | 780    | 6,000  |
| Missouri . .   | 2,630                | 1,200  | 1,000  | 3,710  |
| Kansas . . .   | 2,650                | 1,050  | 320    | 2,250  |
| Illinois . . . | 2,550                | 1,410  | 1,030  | 3,420  |
| Nebraska . .   | 2,150                | 760    | 280    | 2,090  |
| New York . .   | 2,280                | 710    | 1,390  | 660    |
| Ohio . . .     | 1,580                | 880    | 3,770  | 2,350  |
| Indiana . . .  | 1,570                | 820    | 970    | 1,820  |
| Pennsylvania . | 1,680                | 690    | 1,470  | 1,030  |
| Ten States . . | 28,540               | 10,430 | 14,820 | 25,890 |

These ten States possessed 55 per cent. of the cattle, 56 of the horses, 33 of the sheep, and 60 per cent. of the pigs, of the Union; that is to say, more than half the total live stock. Their farm area, tillage, and pasture covered 280 million acres, or 15 per cent. of the total area of the Union (excluding Alaska).

The following table shows the number of horses, cattle, sheep, and pigs to every thousand acres of farm area :—

|                 | Horses | Cattle | Sheep | Pigs |
|-----------------|--------|--------|-------|------|
| New England . . | 20     | 65     | 35    | 15   |
| Middle . . .    | 33     | 84     | 53    | 43   |
| South . . .     | 18     | 58     | 30    | 66   |
| West . . .      | 36     | 93     | 90    | 80   |
| Union . . .     | 28     | 78     | 62    | 69   |

In the foregoing tables no account is taken of the unoccupied area. Supposing that one-half of such area consists of mountains, deserts, or swamps, there is still a residue of 650 million acres available for pasture. Reducing all stock to horned cattle, and allowing 3 acres per head, the United States could carry as follows, on actual farms and unoccupied lands :—

|                 | On Farms    | Unoccupied  | Total       |
|-----------------|-------------|-------------|-------------|
| New England . . | 5,400,000   | 4,000,000   | 9,400,000   |
| Middle . . .    | 11,300,000  | 4,000,000   | 15,300,000  |
| South . . .     | 62,700,000  | 46,000,000  | 108,700,000 |
| West . . .      | 67,600,000  | 163,000,000 | 230,600,000 |
| Total . . .     | 147,000,000 | 217,000,000 | 364,000,000 |

It may, therefore, be reasonably anticipated that the United States will at no distant day possess three times the present amount of live stock, equivalent altogether to 228 million head of large cattle, and distributed approximately thus :—

|                 | Number (000 omitted) |         |         |         |
|-----------------|----------------------|---------|---------|---------|
|                 | Horses               | Cattle  | Sheep   | Pigs    |
| New England . . | 1,100                | 3,700   | 2,800   | 3,000   |
| Middle . . .    | 1,700                | 6,300   | 4,600   | 5,100   |
| South . . .     | 12,200               | 43,000  | 33,000  | 37,400  |
| West . . .      | 27,000               | 95,000  | 69,600  | 74,500  |
| Union . . .     | 42,000               | 148,000 | 110,000 | 120,000 |

## AUSTRALIA

Live stock has been as follows :—

|             | Horses    | Cattle     | Sheep       |
|-------------|-----------|------------|-------------|
| 861 . . . . | 460,000   | 4,040,000  | 23,700,000  |
| 871 . . . . | 780,000   | 4,710,000  | 49,800,000  |
| 881 . . . . | 1,250,000 | 8,710,000  | 78,100,000  |
| 891 . . . . | 1,790,000 | 11,860,000 | 124,500,000 |
| 896 . . . . | 1,920,000 | 12,700,000 | 110,500,000 |

In 1896 the several colonies stood thus :—

|                      | Horses    | Cattle     | Sheep       |
|----------------------|-----------|------------|-------------|
| New South Wales . .  | 510,000   | 2,230,000  | 48,300,000  |
| Queensland . . . .   | 450,000   | 6,510,000  | 19,600,000  |
| New Zealand . . . .  | 250,000   | 1,140,000  | 19,100,000  |
| Victoria . . . . .   | 430,000   | 1,830,000  | 13,200,000  |
| South Australia . .  | 190,000   | 640,000    | 6,400,000   |
| West Australia . . . | 60,000    | 200,000    | 2,300,000   |
| Tasmania . . . . .   | 30,000    | 160,000    | 1,600,000   |
| Total . . . . .      | 1,920,000 | 12,710,000 | 110,500,000 |

For other countries see *Agriculture*.

## CEMETERIES

The area of cemeteries attached to the principal cities of Europe compared with population gives the following results :—

| Square Yards per 100 Inhabitants |     |                    |     |
|----------------------------------|-----|--------------------|-----|
| London . . . . .                 | 71  | Dresden . . . . .  | 155 |
| Paris . . . . .                  | 140 | Bordeaux . . . . . | 125 |
| Vienna . . . . .                 | 108 | Brussels . . . . . | 270 |
| Buda-Pesth . . . . .             | 360 | Rome . . . . .     | 155 |
| Hamburg . . . . .                | 206 | Naples . . . . .   | 47  |
| Leipzig . . . . .                | 136 | Milan . . . . .    | 95  |
|                                  |     | Turin . . . . .    | 75  |
|                                  |     | Genoa . . . . .    | 90  |
|                                  |     | Florence . . . . . | 90  |
|                                  |     | Venice . . . . .   | 130 |
|                                  |     | Bologna . . . . .  | 285 |
|                                  |     | Palermo . . . . .  | 146 |

This gives an average of 150 sq. yards to 100 inhabitants, say 1½ yards each. London, Vienna, and some Italian cities are much below the average. See *Cemeteries* in Part I., p. 100.

## CHARITIES

The number of charitable institutions in London rose from 1024 in 1889 to 1153 in 1897, expenditure showing as follows :—

|                       | 1889      | 1897      | Increase, £ |
|-----------------------|-----------|-----------|-------------|
| Hospitals, . . . . .  | 650,000   | 830,000   | 180,000     |
| Bible Missions, . . . | 1,980,000 | 2,490,000 | 510,000     |
| Asylums, . . . . .    | 2,050,000 | 2,320,000 | 270,000     |
| Total . . . . .       | 4,680,000 | 5,640,000 | 960,000     |

The sum for Bible missions in 1897 included £1,430,000 for converting infidels, and £1,060,000 spent in the United Kingdom. Charitable bequests in the United Kingdom in 1894 amounted to £3,000,000, or three times as much as in 1889.

## ITALY

There are 21,866 charitable institutions, holding endowments to the value of £75,900,000, with a gross income of £5,400,000, of which more than 50 per cent. goes in administration, the balance spent on the poor

amounting to £2,660,000. The endowments are held thus :—

|                         | £          |
|-------------------------|------------|
| Italian consols . . . . | 18,300,000 |
| Landed estates . . . .  | 24,900,000 |
| House property . . . .  | 10,700,000 |
| Sundries . . . . .      | 22,000,000 |
| Total . . . . .         | 75,900,000 |

For mode of distribution of charities see page 113. The legacies left for charitable purposes were :—

| Years            | No. of Legacies | Amount<br>£ Sterling | Average Yearly |         |
|------------------|-----------------|----------------------|----------------|---------|
|                  |                 |                      | Legacies       | £       |
| 1881-85 . . . .  | 4,817           | 3,600,000            | 963            | 720,000 |
| 1886-90 . . . .  | 5,900           | 3,400,000            | 1,180          | 680,000 |
| 1891-97 . . . .  | 9,444           | 4,100,000            | 1,350          | 580,000 |
| 17 years . . . . | 20,251          | 11,100,000           | 1,190          | 660,000 |

## FRANCE

The amount of charitable donations by legacy in France to religious institutions, hospitals, schools, &c., was as follows :—

| Years           | Religious<br>£ | Hospitals<br>£ | Schools, &c<br>£ | Total<br>£ |
|-----------------|----------------|----------------|------------------|------------|
| 1836-55 . . . . | 880,000        | 3,320,000      | 1,360,000        | 5,560,000  |
| 1856-65 . . . . | 1,720,000      | 2,920,000      | 1,120,000        | 5,760,000  |
| 1871-80 . . . . | 3,560,000      | 4,640,000      | 2,440,000        | 10,640,000 |
| 1881-90 . . . . | 2,200,000      | 6,400,000      | 3,560,000        | 12,160,000 |
| 1891-93 . . . . | 800,000        | 2,040,000      | 1,240,000        | 4,080,000  |
| 53 yrs. . . . . | 9,160,000      | 19,320,000     | 9,720,000        | 38,200,000 |

The records from 1866-70 have been lost. The average number of donors and the amounts given yearly were :—

| Years           | Annual Average |           |            | Pence<br>per<br>Inhab. |
|-----------------|----------------|-----------|------------|------------------------|
|                 | Donors         | Amount, £ | Average, £ |                        |
| 1856-65 . . . . | 3,309          | 576,000   | 174        | 3.8                    |
| 1871-80 . . . . | 4,006          | 1,064,000 | 266        | 6.9                    |
| 1881-90 . . . . | 3,315          | 1,216,000 | 366        | 7.7                    |
| 1891-93 . . . . | 3,708          | 1,360,000 | 367        | 8.6                    |

Donations were made in the following form :—

|                     | 1871-80<br>£ | 1881-90<br>£ | 20 Years<br>£ | Average<br>£ |
|---------------------|--------------|--------------|---------------|--------------|
| Real estate . . . . | 3,560,000    | 2,560,000    | 6,120,000     | 306,000      |
| Money . . . . .     | 5,640,000    | 7,400,000    | 13,040,000    | 652,000      |
| Stocks . . . . .    | 1,080,000    | 1,440,000    | 2,520,000     | 126,000      |
| Shares . . . . .    | 360,000      | 760,000      | 1,120,000     | 56,000       |
| Total . . . . .     | 10,640,000   | 12,160,000   | 22,800,000    | 1,140,000    |

## BELGIUM

The amount of charitable legacies was :—

| Year           | £ Sterling | Pence per<br>Inhab. |
|----------------|------------|---------------------|
| 1887 . . . . . | 105,000    | 4                   |
| 1894 . . . . . | 126,000    | 5                   |

For particulars respecting other countries, see page 114.

## CHEESE

See *Dairy*, page 683, also page 114.

## CHURCHES

## UNITED STATES

The census of 1890 gave the following :—

|                      | Churches | Pews       | Clergy  | Communi-<br>cants |
|----------------------|----------|------------|---------|-------------------|
| R. Catholics . .     | 8,816    | 3,375,000  | 9,196   | 6,258,000         |
| Methodists . .       | 46,138   | 12,863,000 | 30,000  | 4,590,000         |
| Baptists . . .       | 36,671   | 11,568,000 | 25,646  | 3,712,000         |
| Presbyterians . .    | 12,469   | 4,040,000  | 10,448  | 1,278,000         |
| Lutherans . . .      | 6,701    | 2,206,000  | 4,591   | 1,231,000         |
| Christ-Disciples .   | 5,324    | 1,610,000  | 3,773   | 641,000           |
| Episcopalians . .    | 5,103    | 1,360,000  | 4,244   | 540,000           |
| Congregationalists . | 4,736    | 1,553,000  | 5,058   | 512,000           |
| Evangelicals . .     | 2,737    | 760,000    | 1,960   | 357,000           |
| Jews . . . . .       | 301      | 139,000    | 200     | 130,000           |
| Quakers . . . .      | 995      | 302,000    | 1,277   | 107,000           |
| Various . . . . .    | 12,529   | 3,789,000  | 14,647  | 1,257,000         |
| Total . . . . .      | 142,520  | 43,565,000 | 111,040 | 20,613,000        |

The value of church property increased in 20 years as follows :—

|                    | £ Sterling |             |            |
|--------------------|------------|-------------|------------|
|                    | 1870       | 1890        | Increase   |
| Methodists . . .   | 14,100,000 | 27,400,000  | 13,300,000 |
| R. Catholics . .   | 12,200,000 | 24,600,000  | 12,400,000 |
| Presbyterians . .  | 10,600,000 | 19,700,000  | 9,100,000  |
| Episcopalians . .  | 7,200,000  | 17,200,000  | 10,000,000 |
| Baptists . . . .   | 8,400,000  | 17,100,000  | 8,700,000  |
| Congregationalists | 5,100,000  | 9,000,000   | 3,900,000  |
| Lutherans . . . .  | 1,200,000  | 7,300,000   | 6,100,000  |
| Christ-Disciples . | 1,200,000  | 2,500,000   | 1,300,000  |
| Evangelicals, &c.  | 10,800,000 | 16,600,000  | 5,800,000  |
| Total . . . . .    | 70,800,000 | 141,400,000 | 70,600,000 |

The value of church property compared with population thus :—

| States           | Amount, £   | Population | £ per Head |
|------------------|-------------|------------|------------|
| N. England . . . | 18,200,000  | 4,690,000  | 3.9        |
| Middle . . . . . | 58,300,000  | 14,110,000 | 4.2        |
| South . . . . .  | 18,100,000  | 18,280,000 | 1.0        |
| West . . . . .   | 46,800,000  | 25,540,000 | 1.8        |
| Union . . . . .  | 141,400,000 | 62,620,000 | 2.3        |

In 1870 the average to the whole population was only £1.8 (or 36 shillings) per inhabitant, the ratio in 1890 being 46 shillings.

## CANADA

The number of churches and laity is shown thus :—

|                   | Laity     | Churches  |       |
|-------------------|-----------|-----------|-------|
|                   | 1881      | 1891      | 1891  |
| R. Catholics . .  | 1,790,000 | 1,990,000 | 1,492 |
| Methodists . . .  | 740,000   | 850,000   | 3,038 |
| Presbyterians . . | 675,000   | 755,000   | 1,356 |
| Ch. of England .  | 575,000   | 645,000   | 1,259 |
| Baptists . . . .  | 295,000   | 305,000   | 936   |
| Various . . . . . | 145,000   | 195,000   | 571   |
| Total . . . . .   | 4,220,000 | 4,740,000 | 8,652 |

The laity are found to be distributed thus :—

|                   | Quebec    | Ontario   | Other Provs. | Total     |
|-------------------|-----------|-----------|--------------|-----------|
| R. Catholics . .  | 1,292,000 | 358,000   | 340,000      | 1,990,000 |
| Methodists . . .  | 40,000    | 655,000   | 155,000      | 850,000   |
| Presbyterians . . | 52,000    | 453,000   | 250,000      | 755,000   |
| Ch. of England .  | 75,000    | 385,000   | 185,000      | 645,000   |
| Baptists . . . .  | 8,000     | 106,000   | 191,000      | 305,000   |
| Various . . . . . | 14,000    | 104,000   | 77,000       | 195,000   |
| Total . . . . .   | 1,481,000 | 2,061,000 | 1,198,000    | 4,740,000 |

## AUSTRALIA

The census of 1891 showed the increase of congregations since 1871 thus :—

|                        | 1871      | 1891      | Increase  |
|------------------------|-----------|-----------|-----------|
| Church of England . .  | 752,000   | 1,485,000 | 733,000   |
| Roman Catholics . . .  | 444,000   | 801,000   | 357,000   |
| Presbyterians . . . .  | 263,000   | 493,000   | 230,000   |
| Methodists . . . . .   | 203,000   | 434,000   | 231,000   |
| Baptists . . . . .     | 38,000    | 87,000    | 49,000    |
| Congregationalists . . | 45,000    | 79,000    | 34,000    |
| Lutherans, &c. . . .   | 137,000   | 341,000   | 204,000   |
| Total . . . . .        | 1,882,000 | 3,720,000 | 1,838,000 |

See *Religion*, page 799, and page 513.

## CITIES

See *Population*, page 788, and *Local Finance*, page 764.

## COAL

Production has increased 70 per cent. since 1880, viz. :—

|                       | Millions of Tons |      |      |
|-----------------------|------------------|------|------|
|                       | 1880             | 1889 | 1897 |
| Great Britain . . . . | 147              | 177  | 202  |
| United States . . . . | 70               | 142  | 176  |
| Germany . . . . .     | 59               | 85   | 120  |
| Austria . . . . .     | 16               | 24   | 34   |
| France . . . . .      | 19               | 25   | 29   |
| Belgium . . . . .     | 17               | 20   | 22   |
| Various . . . . .     | 11               | 13   | 27   |
| Total . . . . .       | 340              | 485  | 610  |

The chief countries importing coal were as follows :—

|                        | Tons       |            |
|------------------------|------------|------------|
|                        | 1885       | 1895       |
| France . . . . .       | 9,900,000  | 10,200,000 |
| Holland . . . . .      | 3,600,000  | 4,400,000  |
| Italy . . . . .        | 3,000,000  | 4,300,000  |
| Scandinavia . . . .    | 2,900,000  | 4,200,000  |
| Canada . . . . .       | 2,100,000  | 3,400,000  |
| Russia . . . . .       | 1,800,000  | 2,200,000  |
| Spain and Portugal . . | 1,700,000  | 2,300,000  |
| Switzerland . . . .    | 800,000    | 1,400,000  |
| The East . . . . .     | 1,200,000  | 2,600,000  |
| Total . . . . .        | 27,000,000 | 35,000,000 |

Factory engines usually consume 2 lbs. of coal per horse-power per hour; that is, a 10-horse engine 30 tons yearly. Coke is produced from coal, three tons of the latter giving two of the former.

In 1897 Great Britain produced 202 millions tons, and exported 37 millions. Exports of coal from Great Britain were as follows :—

| Year         | Tons       | Value, £   | Shillings per Ton |
|--------------|------------|------------|-------------------|
| 1870 . . . . | 11,700,000 | 5,600,000  | 9.6               |
| 1880 . . . . | 18,700,000 | 8,400,000  | 9.0               |
| 1890 . . . . | 30,100,000 | 19,000,000 | 12.6              |
| 1896 . . . . | 34,300,000 | 15,200,000 | 9.0               |

According to a statement published in 1895, the output and number of miners during the previous year were as follows :—

|                       | Tons Coal   | Miners    | Tons per Man |
|-----------------------|-------------|-----------|--------------|
| Great Britain . . . . | 188,000,000 | 666,000   | 282          |
| United States . . . . | 152,000,000 | 363,000   | 420          |
| Germany . . . .       | 77,000,000  | 300,000   | 257          |
| France . . . .        | 27,000,000  | 132,000   | 205          |
| Belgium . . . .       | 21,000,000  | 117,000   | 180          |
| Austria . . . .       | 10,000,000  | 50,000    | 200          |
| Canada . . . .        | 4,000,000   | 10,000    | 400          |
| India . . . .         | 4,000,000   | 43,000    | 90           |
| Japan . . . .         | 4,000,000   | 30,000    | 130          |
| Total . . . .         | 487,000,000 | 1,711,000 | 283          |

It will be observed that this table omits Russia, Spain, and Australia, the aggregate of whose production would be 16 million tons, bringing up the total production in 1894 to 501 million tons. The above table takes no account of "brown coal," or lignite, in Germany and Austria, although it is usually counted as coal.

The annual consumption of coal is as follows :—

|                            | Tons        | Cwts. per Inhabitant |
|----------------------------|-------------|----------------------|
| United Kingdom . . . .     | 165,000,000 | 82                   |
| United States . . . .      | 177,000,000 | 48                   |
| Germany . . . .            | 104,000,000 | 40                   |
| Belgium . . . .            | 17,000,000  | 54                   |
| France . . . .             | 39,000,000  | 20                   |
| Holland . . . .            | 4,700,000   | 20                   |
| Canada . . . .             | 5,200,000   | 20                   |
| Australia . . . .          | 4,200,000   | 19                   |
| Italy . . . .              | 4,600,000   | 3                    |
| Scandinavia . . . .        | 4,400,000   | 10                   |
| Austria . . . .            | 30,300,000  | 14                   |
| Russia . . . .             | 11,100,000  | 2                    |
| Spain and Portugal . . . . | 4,100,000   | 4                    |
| Switzerland . . . .        | 1,400,000   | 9                    |
| Other nations . . . .      | 38,000,000  | ...                  |
| Total . . . .              | 610,000,000 | ...                  |

Consumption in Europe in 1897 averaged 22 cwts. per inhabitant, against 18 in 1888 (see page 120).

#### GREAT BRITAIN

Production and export have been as follows :—

|              | Tons Raised | Value, £   | Tons Exported | Value, £   |
|--------------|-------------|------------|---------------|------------|
| 1886 . . . . | 157,500,000 | 38,200,000 | 23,300,000    | 9,800,000  |
| 1890 . . . . | 181,600,000 | 74,900,000 | 39,100,000    | 19,000,000 |
| 1896 . . . . | 195,400,000 | 57,200,000 | 34,300,000    | 15,200,000 |

The average output per coal-miner in 1896 was 282 tons, being equal to 22 cwt. daily for each working day (256 days). The value at pit's mouth was 86 pence per ton, or 20 per cent. less than at port of shipment. England produces 76 per cent., Wales 13, Scotland 11 per cent. of the total. For Royalties, &c., see *Mining*, page 774.

#### UNITED STATES

Production has progressed as follows :—

|                      | Tons Raised |             |             |
|----------------------|-------------|-------------|-------------|
|                      | 1880        | 1890        | 1896        |
| Pennsylvania . . . . | 46,700,000  | 79,300,000  | 92,800,000  |
| Illinois . . . .     | 6,100,000   | 13,700,000  | 17,700,000  |
| Virginia . . . .     | 1,800,000   | 7,300,000   | 12,600,000  |
| Ohio . . . .         | 5,900,000   | 10,300,000  | 11,500,000  |
| Alabama . . . .      | 300,000     | 3,700,000   | 5,100,000   |
| Maryland . . . .     | 2,200,000   | 3,000,000   | 3,700,000   |
| Iowa . . . .         | 1,400,000   | 3,600,000   | 3,500,000   |
| Indiana . . . .      | 1,400,000   | 3,000,000   | 3,500,000   |
| Kentucky . . . .     | 900,000     | 2,400,000   | 3,000,000   |
| Other states . . . . | 3,800,000   | 14,600,000  | 18,000,000  |
| Total . . . .        | 70,500,000  | 140,900,000 | 171,400,000 |
| Anthracite . . . .   | 28,600,000  | 41,500,000  | 48,600,000  |
| Bituminous . . . .   | 41,900,000  | 99,400,000  | 122,800,000 |

Anthracite is found only in Pennsylvania. The value of the two kinds of coal is shown thus for 1896 :—

|                    | Tons        | £ Sterling | Shillings per Ton |
|--------------------|-------------|------------|-------------------|
| Anthracite . . . . | 48,600,000  | 17,000,000 | 7.0               |
| Bituminous . . . . | 122,800,000 | 23,900,000 | 3.9               |
| Total . . . .      | 171,400,000 | 40,900,000 | 4.8               |

The increase in coal production has been much more rapid than in Great Britain, viz. :—

| Year         | Tons Raised |             | Value, £   |            |
|--------------|-------------|-------------|------------|------------|
|              | G. Britain  | U. States   | G. Britain | U. States  |
| 1870 . . . . | 110,000,000 | 33,000,000  | 27,600,000 | 20,600,000 |
| 1896 . . . . | 195,400,000 | 171,400,000 | 57,200,000 | 40,800,000 |

Thus in 26 years British coal has increased 78 per cent., American 420 per cent. Moreover in 1870 American coal was 2½ times as dear as British, whereas now the latter is dearer than American, viz. :—

|                  | Value, Pence per Ton |      |
|------------------|----------------------|------|
|                  | 1870                 | 1896 |
| British . . . .  | 60                   | 70   |
| American . . . . | 150                  | 57   |

In 26 years British coal has risen 17 per cent. in price, American fallen 62 per cent.

The following table shows the production and value, as also the consumption per inhabitant, at various dates :—

| Year         | Tons Raised | Value, £   | Pence per Ton | Cwts. per In. ab. |
|--------------|-------------|------------|---------------|-------------------|
| 1870 . . . . | 32,900,000  | 20,600,000 | 150           | 17.5              |
| 1880 . . . . | 70,500,000  | 19,700,000 | 67            | 28.0              |
| 1890 . . . . | 140,900,000 | 30,200,000 | 51            | 45.0              |
| 1897 . . . . | 176,000,000 | 41,200,000 | 57            | 48.0              |

Improved machinery enables mine-owners to sell coal now at 38 per cent. of the price that ruled in 1870, and as a consequence the consumption per inhabitant has nearly trebled. The value of the coal (at pit's mouth) which is now consumed per inhabitant is 137 pence, as compared with 131 pence in 1870 for one-third of the quantity.

## GERMANY

The production of coal and lignite, and the imports and exports, are shown as follows:—

|                  | Tons       |            |             |
|------------------|------------|------------|-------------|
|                  | 1876       | 1886       | 1896        |
| Coal raised . .  | 38,500,000 | 58,100,000 | 85,700,000  |
| Lignite raised . | 11,100,000 | 15,600,000 | 26,800,000  |
| Coal imported .  | 2,100,000  | 2,600,000  | 5,500,000   |
| Total . . . .    | 51,700,000 | 76,300,000 | 118,000,000 |
| Exported . . .   | 5,300,000  | 8,700,000  | 13,800,000  |
| Consumption .    | 46,400,000 | 67,600,000 | 104,200,000 |

Germany consumes two tons per inhabitant. There are 341,000 coal-miners, who average 330 tons each. The value of coal and lignite raised was as follows:—

| Year         | Coal, £    | Lignite, £ | Total, £   |
|--------------|------------|------------|------------|
| 1876 . . . . | 13,200,000 | 1,900,000  | 15,100,000 |
| 1886 . . . . | 15,000,000 | 2,000,000  | 17,000,000 |
| 1896 . . . . | 29,600,000 | 3,000,000  | 32,600,000 |

The production in 1895 was equal to £88 per miner

## FRANCE

The product of the collieries was as follows:—

| Year         | Tons       | Value, £   | Pence per Ton |
|--------------|------------|------------|---------------|
| 1880 . . . . | 19,400,000 | 9,860,000  | 122           |
| 1890 . . . . | 26,100,000 | 12,460,000 | 114           |
| 1896 . . . . | 29,200,000 | 12,600,000 | 103           |

France imports 10 million tons, bringing up consumption to 38 millions, or a ton per inhabitant.

## RUSSIA

The consumption of coal has been as follows:—

| Year         | Tons      |           |            |
|--------------|-----------|-----------|------------|
|              | Native    | Imported  | Total      |
| 1876 . . . . | 2,050,000 | 1,450,000 | 3,500,000  |
| 1887 . . . . | 4,450,000 | 1,550,000 | 6,000,000  |
| 1896 . . . . | 9,100,000 | 2,300,000 | 11,400,000 |

The output of coal in Russia averages 140 tons yearly per miner.

## AUSTRIA

The production and consumption of coal and lignite in 1895 were as follows:—

|               | Tons       |           |            | Value, £  |
|---------------|------------|-----------|------------|-----------|
|               | Austria    | Hungary   | Total      |           |
| Coal . . . .  | 9,700,000  | 1,100,000 | 10,800,000 | 3,300,000 |
| Lignite . . . | 18,300,000 | 4,000,000 | 22,300,000 | 3,800,000 |
| Coal imptd. . | 5,000,000  | ...       | 5,000,000  | 2,800,000 |
| Total . . . . | 33,000,000 | 5,100,000 | 38,100,000 | 9,900,000 |
| Exported . .  | 7,800,000  | ...       | 7,800,000  | 2,400,000 |
| Consumption   | 25,200,000 | 5,100,000 | 30,300,000 | 7,500,000 |

Production and consumption in the Austrian Empire have been as follows:—

| Year         | Production Tons | Consumption Tons | Cwts. per Inhab. |
|--------------|-----------------|------------------|------------------|
| 1880 . . . . | 16,100,000      | 14,500,000       | 7.6              |
| 1889 . . . . | 24,000,000      | 22,000,000       | 10.6             |
| 1895 . . . . | 33,100,000      | 30,300,000       | 14.1             |

Austria-Hungary stands sixth among European nations in the consumption of coal per inhabitant.

## ITALY

There are 28 coal-mines, employing 2360 miners, who raise 300,000 tons yearly, being an average of 127 tons each. Consumption has been as follows:—

| Year         | Tons    |           |           | Cwts. per Inhab. |
|--------------|---------|-----------|-----------|------------------|
|              | Native  | Imported  | Total     |                  |
| 1875 . . . . | 120,000 | 1,060,000 | 1,180,000 | 0.9              |
| 1885 . . . . | 190,000 | 3,000,000 | 3,190,000 | 2.2              |
| 1895 . . . . | 300,000 | 4,300,000 | 4,600,000 | 3.0              |

The consumption per head is lower than in other countries, except Russia.

## SPAIN

The coalfields are estimated by Zehden to contain 13,000 millions of tons, which is equal to 65 years' output of the coalfields of Great Britain; they are, however, little worked, employing only 16,200 miners. Consumption has been as follows:—

|              | Tons      |           |           | Cwts. per Inhabitant |
|--------------|-----------|-----------|-----------|----------------------|
|              | Native    | Imported  | Total     |                      |
| 1886 . . . . | 800,000   | 1,410,000 | 2,210,000 | 2.6                  |
| 1892 . . . . | 1,460,000 | 1,870,000 | 3,330,000 | 3.6                  |
| 1896 . . . . | 1,900,000 | 1,900,000 | 3,800,000 | 4.0                  |

The output of the mines gives an average of 110,000 tons per miner.

## SCANDINAVIA

The only coalfield is in Sweden, which gives usually 200,000 tons a year. Consumption in the three kingdoms is as follows:—

|               | Tons      |           | Cwts. per Inhab. |      |
|---------------|-----------|-----------|------------------|------|
|               | 1885      | 1896      | 1885             | 1896 |
| Sweden . . .  | 1,650,000 | 2,200,000 | 7                | 9    |
| Norway . . .  | 600,000   | 1,050,000 | 6                | 10   |
| Denmark . . . | 850,000   | 1,150,000 | 8                | 11   |
| Total . . . . | 3,100,000 | 4,400,000 | 7                | 10   |

## HOLLAND

There is but one coalfield, which belongs to the State, producing 100,000 tons yearly, worth £30,000 sterling. Consumption depends chiefly on imports, viz:—

|              | Tons Imported | Cwts. per Inhabitant |
|--------------|---------------|----------------------|
| 1875 . . . . | 2,150,000     | 11                   |
| 1885 . . . . | 3,560,000     | 16                   |
| 1896 . . . . | 4,700,000     | 20                   |

The consumption per inhabitant is almost the same as in France.

## BELGIUM

A report published in 1894 showed that in the preceding year the production was 19,400,000 tons, raised at a cost of £7,260,000, and sold for £7,550,000, which left a profit of £290,000, or 3½d. per ton. The weight and value were as follows:—

| Year       | Tons       | Value, £   | Pence per Ton |
|------------|------------|------------|---------------|
| 1880 . . . | 16,900,000 | 6,800,000  | 96            |
| 1890 . . . | 20,400,000 | 10,800,000 | 127           |
| 1896 . . . | 21,300,000 | 8,100,000  | 90            |

There are 119,000 coal-miners, who averaged 172 tons each in 1895, being a product of £64 per miner.

## CANADA

The production has quadrupled in twenty years, viz:—

| Year       | Tons        |                  |           |
|------------|-------------|------------------|-----------|
|            | Nova Scotia | Brit. Colum. &c. | Total     |
| 1876 . . . | 710,000     | 120,000          | 830,000   |
| 1886 . . . | 1,490,000   | 370,000          | 1,860,000 |
| 1896 . . . | 2,230,000   | 1,100,000        | 3,330,000 |

Imports and exports were as follows:—

| Year       | Tons      |          |            |
|------------|-----------|----------|------------|
|            | Imported  | Exported | Net Import |
| 1876 . . . | 710,000   | 250,000  | 460,000    |
| 1886 . . . | 1,720,000 | 430,000  | 1,290,000  |
| 1896 . . . | 2,770,000 | 910,000  | 1,860,000  |

Consumption compared with population gave as follows:—

| Year       | Tons      | Cwts. per Inhab. |
|------------|-----------|------------------|
| 1876 . . . | 1,290,000 | 6.5              |
| 1886 . . . | 3,150,000 | 13.5             |
| 1896 . . . | 5,190,000 | 20.0             |

The consumption per head is higher than in Australia.

## AUSTRALIA

The monopoly was abolished in 1847, and the product from that time to December 1894 was as follows:—

|                 | Tons Raised | Value, £   | Pence per Ton |
|-----------------|-------------|------------|---------------|
| N. S. Wales . . | 64,600,000  | 29,600,000 | 110           |
| New Zealand . . | 9,200,000   | 4,900,000  | 128           |
| Queensland . .  | 3,700,000   | 1,700,000  | 110           |
| Tasmania . . .  | 500,000     | 300,000    | 144           |
| Victoria, &c. . | 400,000     | 200,000    | 120           |
| Total . . .     | 78,400,000  | 36,700,000 | 113           |

Production in 1888 and 1896 compares as follows:—

|                 | Tons      |           | Value, £  |           |
|-----------------|-----------|-----------|-----------|-----------|
|                 | 1888      | 1896      | 1888      | 1896      |
| N. S. Wales . . | 3,200,000 | 3,910,000 | 1,460,000 | 1,120,000 |
| New Zealand . . | 610,000   | 800,000   | 340,000   | 430,000   |
| Queensland, &c. | 360,000   | 490,000   | 140,000   | 230,000   |
| Total . . .     | 4,170,000 | 5,200,000 | 1,940,000 | 1,780,000 |

Australia exports one million tons yearly; consumption does not reach a ton per inhabitant.

## COFFEE

Production has been as follows:—

|            | Tons    |                 |         |
|------------|---------|-----------------|---------|
|            | Brazil  | Other Countries | Total   |
| 1880 . . . | 330,000 | 280,000         | 610,000 |
| 1892 . . . | 440,000 | 260,000         | 700,000 |
| 1897 . . . | 590,000 | 250,000         | 840,000 |

Consumption has been as follows, "native" signifying what is used in the countries where coffee is grown:—

|            | Tons    |           |         |         |
|------------|---------|-----------|---------|---------|
|            | Europe  | U. States | Native  | Total   |
| 1893 . . . | 270,000 | 250,000   | 180,000 | 700,000 |
| 1897 . . . | 310,000 | 320,000   | 210,000 | 840,000 |

Consumption in Europe is as follows:—

|                      | Tons    | Lbs. per Inhab. |
|----------------------|---------|-----------------|
| United Kingdom . . . | 12,000  | 0.7             |
| France . . .         | 77,000  | 4.5             |
| Germany . . .        | 136,000 | 5.8             |
| Belgium . . .        | 25,000  | 8.8             |
| Austria . . .        | 40,000  | 2.0             |
| Italy . . .          | 13,000  | 0.9             |

In the United States the average is 10 lbs. per inhabitant, a ratio which is surpassed only in Brazil. The consumption in Great Britain is now 25 per cent. less per head than it was in 1885.

## COLONIES

Pebrer's estimate of the British Colonies in 1830 was as follows:—

|                 | Population | Products, £ | Commerce, £ | Wealth, £   |
|-----------------|------------|-------------|-------------|-------------|
| Canada . . .    | 910,000    | 17,600,000  | 3,200,000   | 62,000,000  |
| W. Indies . . . | 730,000    | 22,500,000  | 14,600,000  | 131,000,000 |
| S. Africa . . . | 154,000    | 1,100,000   | 1,100,000   | 6,000,000   |
| Australia . . . | 81,000     | 500,000     | 200,000     | 3,000,000   |
| Total . . .     | 1,875,000  | 41,700,000  | 19,400,000  | 202,000,000 |

The same Colonies in 1896 showed as follows:—

|                 | Population | Millions £ Sterling |             |           |
|-----------------|------------|---------------------|-------------|-----------|
|                 |            | Products, £         | Commerce, £ | Wealth, £ |
| Canada . . .    | 5,200,000  | 181                 | 48          | 1,009     |
| W. Indies . . . | 1,470,000  | 21                  | 14          | 110       |
| S. Africa . . . | 2,350,000  | 17                  | 29          | 150       |
| Australia . . . | 4,280,000  | 174                 | 76          | 1,076     |
| Total . . .     | 13,300,000 | 393                 | 167         | 2,339     |

It would appear that Pebrer's estimate of the wealth of the West Indies in 1830 was too high.

See *Colonies* of all nations, p. 123.

## COMMERCE

The actual trade of the world compares with Juraschek's table of averages for five years ending 1890 thus:—

|                       | Millions £ Sterling |       |         |       |         |       |
|-----------------------|---------------------|-------|---------|-------|---------|-------|
|                       | Imports             |       | Exports |       | Total   |       |
|                       | 1886-90             | 1890  | 1886-90 | 1890  | 1886-90 | 1890  |
| U. Kingdom . . .      | 398                 | 442   | 241     | 240   | 639     | 682   |
| France . . .          | 171                 | 152   | 139     | 136   | 310     | 288   |
| Germany . . .         | 174                 | 228   | 158     | 188   | 332     | 416   |
| Russia . . .          | 40                  | 59    | 62      | 69    | 102     | 128   |
| Austria . . .         | 48                  | 59    | 62      | 65    | 110     | 124   |
| Italy . . .           | 57                  | 47    | 39      | 42    | 96      | 89    |
| Spain . . .           | 33                  | 36    | 31      | 41    | 64      | 77    |
| Portugal . . .        | 9                   | 9     | 5       | 6     | 14      | 15    |
| Scandinavia . . .     | 43                  | 54    | 31      | 43    | 74      | 97    |
| Holland . . .         | 101                 | 136   | 88      | 112   | 189     | 248   |
| Belgium . . .         | 61                  | 71    | 53      | 59    | 114     | 130   |
| Switzerland . . .     | 34                  | 42    | 28      | 37    | 62      | 72    |
| Danub. States . . .   | 18                  | 18    | 15      | 19    | 33      | 37    |
| Greece . . .          | 5                   | 5     | 4       | 3     | 9       | 8     |
| Turkey . . .          | 18                  | 15    | 12      | 17    | 30      | 32    |
| Europe . . .          | 1,210               | 1,373 | 968     | 1,070 | 2,178   | 2,443 |
| United States . . .   | 155                 | 162   | 157     | 180   | 312     | 342   |
| Canada . . .          | 25                  | 22    | 20      | 25    | 45      | 47    |
| Mexico . . .          | 7                   | 8     | 8       | 11    | 15      | 19    |
| Cent. America . . .   | 3                   | 3     | 5       | 5     | 8       | 8     |
| West Indies . . .     | 20                  | 20    | 30      | 28    | 50      | 48    |
| South America . . .   | 58                  | 65    | 57      | 74    | 115     | 139   |
| America . . .         | 268                 | 280   | 277     | 323   | 545     | 603   |
| India . . .           | 52                  | 48    | 70      | 65    | 122     | 113   |
| Singapore . . .       | 19                  | 28    | 16      | 25    | 35      | 53    |

| Tonquin . . .         | 3                   | 3     | 3       | 3     | 6       | 6     |
| Siam . . .            | 2                   | 2     | 3       | 3     | 5       | 5     |
| Java . . .            | 11                  | 13    | 16      | 19    | 27      | 32    |
| Japan . . .           | 9                   | 19    | 10      | 13    | 19      | 32    |
| China . . .           | 28                  | 34    | 22      | 22    | 50      | 56    |
| Siberia . . .         | 4                   | 6     | 5       | 9     | 9       | 15    |
| Philippines . . .     | 4                   | 2     | 5       | 4     | 9       | 6     |
| Persia . . .          | 2                   | 3     | 2       | 3     | 4       | 6     |
| Other states . . .    | 10                  | 10    | 8       | 8     | 18      | 18    |
| Asia . . .            | 143                 | 174   | 163     | 180   | 311     | 354   |
| Egypt . . .           | 8                   | 10    | 12      | 13    | 20      | 23    |
| Algeria & Tunis . . . | 11                  | 13    | 10      | 11    | 21      | 24    |
| Cape Colony . . .     | 7                   | 17    | 8       | 17    | 15      | 34    |
| Transvaal . . .       | 5                   | 14    | 2       | 9     | 7       | 23    |
| Mauritius . . .       | 2                   | 2     | 2       | 2     | 4       | 4     |
| Morocco . . .         | 2                   | 2     | 1       | 2     | 3       | 4     |
| East Africa . . .     | 4                   | 4     | 2       | 2     | 6       | 6     |
| Senegal, &c. . .      | 5                   | 5     | 4       | 4     | 9       | 9     |
| Africa . . .          | 44                  | 67    | 41      | 60    | 85      | 127   |
| Australia . . .       | 63                  | 63    | 50      | 66    | 113     | 129   |
| Hawaii . . .          | 1                   | 1     | 2       | 3     | 3       | 4     |
| Oceania . . .         | 64                  | 64    | 52      | 69    | 116     | 133   |
| The World . . .       | 1,734               | 1,958 | 1,501   | 1,702 | 3,235   | 3,660 |

It will be observed that, notwithstanding the fall of prices since 1886, the trade of the world in 1896 showed an increase of value amounting to 13 per cent., or 425 millions sterling over the average given by Juraschek for five years ending 1890, viz. :—

|                 | Millions £ |       |          | Per Cent. |
|-----------------|------------|-------|----------|-----------|
|                 | 1886-90    | 1896  | Increase |           |
| Europe . . .    | 2,178      | 2,443 | 265      | 12.2      |
| America . . .   | 545        | 603   | 58       | 10.7      |
| Asia . . .      | 311        | 354   | 43       | 13.8      |
| Africa . . .    | 85         | 127   | 42       | 49.0      |
| Australia . . . | 116        | 133   | 17       | 14.7      |
| The World . . . | 3,235      | 3,660 | 425      | 13.0      |

Levasseur's table of European commerce shows:—

|                          | Millions £ Sterling |      |       |
|--------------------------|---------------------|------|-------|
|                          | 1830                | 1850 | 1894  |
| United Kingdom . . .     | 88                  | 168  | 682   |
| France . . .             | 36                  | 76   | 277   |
| Germany . . .            | 32                  | 104  | 346   |
| Austria . . .            | 16                  | 28   | 124   |
| Russia . . .             | 20                  | 32   | 124   |
| Italy . . .              | 12                  | 24   | 85    |
| Spain and Portugal . . . | 12                  | 16   | 73    |
| Scandinavia . . .        | 8                   | 20   | 89    |
| Holland . . .            | 16                  | 48   | 214   |
| Belgium . . .            | 12                  | 36   | 115   |
| Other states . . .       | 8                   | 30   | 111   |
| Europe . . .             | 260                 | 582  | 2,240 |

Commerce increased 124 per cent. between 1830 and 1850, that is about 6 per cent. yearly; and 286 per cent. between 1850 and 1894, or about 6½ per cent. yearly, say six times as fast as population. In the foregoing table the trade of the United Kingdom appears larger than it is, as it includes foreign and colonial merchandise imported to be forwarded to other countries (tea, wool, &c.).

Juraschek gives the following table of imports and exports of all nations:—

| Year          | Millions £ Sterling, Yearly |         |       | Excess of Imports |
|---------------|-----------------------------|---------|-------|-------------------|
|               | Imports                     | Exports | Total |                   |
| 1875-80 . . . | 1,547                       | 1,356   | 2,903 | 14 p. c.          |
| 1881-85 . . . | 1,732                       | 1,510   | 3,242 | 15 "              |
| 1886-90 . . . | 1,737                       | 1,507   | 3,244 | 15 "              |
| 1891-94 . . . | 1,876                       | 1,619   | 3,495 | 16 "              |

## UNITED KINGDOM

In the following table imports include not only merchandise for consumption but also goods that are afterwards exported as foreign (and colonial) produce. The gross trade exceeds the real trade by double the amount of such foreign produce. Thus the gross trade of 1888 would be 128 millions over the net figure, which would be 558 millions. The returns for 10 years stand thus:—

| Year          | Millions £ |                 |                 |       |
|---------------|------------|-----------------|-----------------|-------|
|               | Imports    | British Exports | Foreign Exports | Total |
| 1888 . . .    | 388        | 234             | 64              | 686   |
| 1889 . . .    | 428        | 249             | 67              | 744   |
| 1890 . . .    | 421        | 263             | 65              | 749   |
| 1891 . . .    | 435        | 247             | 62              | 744   |
| 1892 . . .    | 424        | 227             | 64              | 715   |
| 1893 . . .    | 405        | 218             | 59              | 682   |
| 1894 . . .    | 408        | 216             | 58              | 682   |
| 1895 . . .    | 417        | 226             | 60              | 703   |
| 1896 . . .    | 442        | 240             | 56              | 738   |
| 1897 . . .    | 451        | 234             | 60              | 745   |
| Average . . . | 422        | 235             | 62              | 719   |

The principal items of imports were as follows :—

|                    | Millions £ |      | Shillings per Head |      |
|--------------------|------------|------|--------------------|------|
|                    | 1888       | 1897 | 1888               | 1897 |
| Food . . .         | 157        | 172  | 86                 | 86   |

| Hardware . . . | 50   | 64   | 27   | 32   |
| Sundries . . . | 139  | 130  | 75   | 65   |
| Total . . .    | 298  | 294  | 160  | 147  |

The countries from which we received our imports were :—

|                     | Millions £ |      | Ratio |       |
|---------------------|------------|------|-------|-------|
|                     | 1887       | 1897 | 1887  | 1897  |
| United States . . . | 83         | 113  | 23.0  | 25.0  |
| France . . .        | 37         | 53   | 10.2  | 11.8  |
| India . . .         | 31         | 25   | 8.5   | 5.6   |
| Holland . . .       | 25         | 29   | 6.9   | 6.4   |
| Germany . . .       | 25         | 26   | 6.9   | 5.8   |
| Australia . . .     | 23         | 29   | 6.4   | 6.4   |
| Russia . . .        | 16         | 22   | 4.4   | 4.9   |
| Belgium . . .       | 15         | 21   | 4.1   | 4.7   |
| Canada . . .        | 11         | 20   | 3.1   | 4.4   |
| Various . . .       | 96         | 113  | 26.5  | 25.0  |
| Total . . .         | 362        | 451  | 100.0 | 100.0 |

The trade of the United Kingdom in 1897 showed an increase of 5 per cent. over the average of ten years ending 1896, and of 16 per cent. over 1887, as to value. The principal increase has been in imports, which rose 25 per cent. in ten years, while exports rose only 4 per cent. Taking imports and exports together our trade with other countries has increased since 1887 in the

following ratios :—with Scandinavia 63 per cent., Russia 48 per cent., Canada 30 per cent., Egypt 27 per cent., France 26 per cent., United States 23 per cent., Argentina 22 per cent., Spain 21 per cent., Belgium 21 per cent., Australia 15 per cent., Germany 12 per cent., Holland 5 per cent.

The countries to which we sent our exports were :—

|                     | Millions £ |      | Ratio |       |
|---------------------|------------|------|-------|-------|
|                     | 1887       | 1897 | 1887  | 1897  |
| United States . . . | 40         | 38   | 14.2  | 12.9  |
| India . . .         | 32         | 28   | 11.4  | 9.5   |
| Germany . . .       | 27         | 32   | 9.6   | 11.0  |
| Australia . . .     | 22         | 24   | 7.8   | 8.2   |
| France . . .        | 21         | 20   | 7.5   | 6.8   |
| Holland . . .       | 15         | 13   | 5.4   | 4.4   |
| Belgium . . .       | 13         | 13   | 4.6   | 4.4   |
| Italy . . .         | 9          | 6    | 3.2   | 2.0   |
| Canada . . .        | 9          | 6    | 3.2   | 2.0   |
| Various . . .       | 93         | 114  | 33.1  | 38.8  |
| Total . . .         | 281        | 294  | 100.0 | 100.0 |

Comparing 1897 with 1887, the nations with which trade is carried on show :—

|                         | Millions £ Sterling |      |          |
|-------------------------|---------------------|------|----------|
|                         | 1887                | 1897 | Increase |
| United States . . .     | 123                 | 151  | 28       |

| Total . . .         | 168.3               | 130.0      | 298.3 | 158.2        | 143.9      | 302.1 |

\* Note.—This table reads thus : Imports from Great Britain 21.0, that is, £21,000,000.

While the trade of the world is rapidly increasing that of France is stationary, having risen only 1 per cent. in 11 years, as shown in the above table. Imports have declined 10 millions; while exports have risen 14 millions in the said interval.

The principal items of German trade (exclusive of Hamburg) for 1886 and 1897 were as follows :—

|                | Imports, £  |             |                     | Exports, £  |             |
|----------------|-------------|-------------|---------------------|-------------|-------------|
|                | 1886        | 1897        |                     | 1886        | 1897        |
|                |             |             |                     |             |             |
| Grain . . .    | 10,300,000  | 21,100,000  | Hardware . . .      | 10,500,000  | 23,000,000  |
| Wool . . .     | 10,900,000  | 10,700,000  | Cottons . . .       | 5,900,000   | 8,900,000   |
| Cotton . . .   | 8,800,000   | 9,700,000   | Sugar . . .         | 7,100,000   | 11,600,000  |
| Coffee . . .   | 6,900,000   | 6,400,000   | Woolens . . .       | 10,900,000  | 10,500,000  |
| Cattle . . .   | 8,200,000   | 6,100,000   | Coal . . .          | 4,400,000   | 8,700,000   |

| Switzerland . . .      | 7.8                 | 7.6        | 15.4  | 7.0          | 11.9       | 18.9  |
| Belgium . . .          | 13.9                | 7.7        | 21.6  | 8.7          | 8.4        | 17.1  |
| Italy . . .            | 4.5                 | 4.2        | 8.7   | 6.6          | 4.2        | 10.8  |
| Other countries . . .  | 33.6                | 50.8       | 84.4  | 45.3         | 35.6       | 80.9  |
| Total . . .            | 144.4               | 149.3      | 293.7 | 215.4        | 176.3      | 391.7 |

The following table compares French trade in 1897 with the average for 5 years ending December 1892 :—

| Trade with            | Millions £ Sterling |      | Ratio   |       |
|-----------------------|---------------------|------|---------|-------|
|                       | 1888-92             | 1897 | 1888-92 | 1897  |
| Great Britain . . .   | 62                  | 65   | 19.6    | 21.5  |
| Belgium . . .         | 39                  | 32   | 12.3    | 10.6  |
| Germany . . .         | 28                  | 28   | 8.7     | 9.2   |
| United States . . .   | 26                  | 27   | 8.2     | 9.0   |
| Spain . . .           | 21                  | 14   | 6.6     | 4.6   |
| Other countries . . . | 140                 | 136  | 44.6    | 45.1  |
| Total . . .           | 316                 | 302  | 100.0   | 100.0 |

There is a visible increase of ratio in dealings with Great Britain and Germany, while trade with Belgium and Spain is declining.

#### GERMANY

Trade has increased very notably in recent years, viz :—

| Year       | Value, Millions £ |         |       | Weight, Tons, Millions |         |       |
|------------|-------------------|---------|-------|------------------------|---------|-------|
|            | Imports           | Exports | Total | Imports                | Exports | Total |
| 1887 . . . | 159               | 160     | 319   | 19.4                   | 19.5    | 38.9  |
| 1891 . . . | 220               | 167     | 387   | 29.0                   | 20.1    | 49.1  |
| 1897 . . . | 232               | 183     | 415   | 40.2                   | 28.0    | 68.2  |

The following table compares German trade in 1896 with the average of five years ending December 1892 :—

| Trade with            | Millions £ Stg. |      | Ratio   |       |
|-----------------------|-----------------|------|---------|-------|
|                       | 1888-92         | 1896 | 1888-92 | 1896  |
| Great Britain . . .   | 60              | 63   | 16.9    | 16.0  |
| Austria . . .         | 43              | 47   | 12.1    | 12.0  |
| United States . . .   | 36              | 46   | 10.0    | 11.7  |
| Russia . . .          | 32              | 43   | 8.9     | 11.0  |
| Holland . . .         | 26              | 21   | 7.3     | 5.4   |
| France . . .          | 23              | 22   | 6.6     | 5.6   |
| Belgium . . .         | 22              | 17   | 6.3     | 4.3   |
| Other countries . . . | 114             | 133  | 31.9    | 34.0  |
| Total . . .           | 356             | 392  | 100.0   | 100.0 |

Trade relations with Belgium, France, and Holland have declined remarkably, while they have increased with Russia and United States.

In 10 years trade has increased 30 per cent. in value, and 75 per cent. in weight.

## RUSSIA

Returns of imports and exports of Russia, including Poland, for 1886 and 1896 compare thus :—

|                     | Imports, £ |            |                     | Exports, £ |            |
|---------------------|------------|------------|---------------------|------------|------------|
|                     | 1886       | 1896       |                     | 1886       | 1896       |
| Cotton . . . . .    | 7,300,000  | 7,600,000  | Grain . . . . .     | 23,300,000 | 32,200,000 |
| Tea . . . . .       | 6,500,000  | 4,200,000  | Flax . . . . .      | 5,400,000  | 7,900,000  |
| Hardware . . . . .  | 4,100,000  | 8,300,000  | Timber . . . . .    | 2,400,000  | 4,700,000  |
| Yarns . . . . .     | 3,300,000  | 2,100,000  | Wool . . . . .      | 2,200,000  | 800,000    |
| Metals . . . . .    | 2,500,000  | 4,800,000  | Seeds . . . . .     | 1,900,000  | 4,200,000  |
| Chemicals . . . . . | 1,300,000  | 1,400,000  | Sugar . . . . .     | 1,300,000  | 2,900,000  |
| Coal . . . . .      | 1,300,000  | 1,700,000  | Petroleum . . . . . | 1,300,000  | 2,900,000  |
| Textiles . . . . .  | 1,100,000  | 1,400,000  | Eggs . . . . .      | 500,000    | 2,200,000  |
| Sundries . . . . .  | 16,400,000 | 27,500,000 | Sundries . . . . .  | 10,100,000 | 11,200,000 |
| Total . . . . .     | 43,800,000 | 59,000,000 | Total . . . . .     | 48,400,000 | 69,000,000 |

The countries with which Russia traded in 1886 and 1896 were :—

|                           | Millions £ Sterling |            |       |              |            |       |
|---------------------------|---------------------|------------|-------|--------------|------------|-------|
|                           | 1886                |            |       | 1896         |            |       |
|                           | Imports from        | Exports to | Total | Imports from | Exports to | Total |
| Great Britain . . . . .   | 11.0                | 14.4       | 25.4  | 11.2         | 16.1       | 27.3  |
| Germany . . . . .         | 13.5                | 11.9       | 25.4  | 19.0         | 18.6       | 37.6  |
| France . . . . .          | 1.2                 | 3.0        | 4.2   | 2.3          | 5.8        | 8.1   |
| Austria . . . . .         | 1.7                 | 2.5        | 4.2   | 2.3          | 3.0        | 5.3   |
| Holland . . . . .         | 0.4                 | 3.7        | 4.1   | 0.6          | 7.1        | 7.7   |
| United States . . . . .   | 2.7                 | 0.0        | 2.7   | 6.6          | 0.2        | 6.8   |
| China . . . . .           | 3.0                 | 0.2        | 3.2   | 4.2          | 0.5        | 4.7   |
| Italy . . . . .           | 0.8                 | 2.2        | 3.0   | 1.0          | 3.6        | 4.6   |
| Other countries . . . . . | 9.5                 | 10.5       | 20.0  | 11.8         | 14.1       | 25.9  |
| Total . . . . .           | 43.8                | 48.4       | 92.2  | 59.0         | 69.0       | 128.0 |

The trade of 1896 compares with that of five years ending 1892 as follows :—

| Trade with                | Millions £ Stg. |      | Ratio   |       |
|---------------------------|-----------------|------|---------|-------|
|                           | 1888-92         | 1896 | 1888-92 | 1896  |
| Great Britain . . . . .   | 29              | 27   | 30.2    | 21.3  |
| Germany . . . . .         | 29              | 38   | 30.2    | 29.5  |
| France . . . . .          | 6               | 8    | 6.2     | 6.4   |
| Other countries . . . . . | 32              | 55   | 33.4    | 42.8  |
| Total . . . . .           | 96              | 128  | 100.0   | 100.0 |

There has been a relative diminution of trade with Germany and Great Britain, which is accounted for by the rapid increase of dealings with China, Austria, and Italy. In the interval between 1886 and 1896 we find an increase of 34 per cent. in imports and 42 per cent. in exports. The shipments of eggs, petroleum, and sugar have increased prodigiously.

## AUSTRIA-HUNGARY

Imports and exports of the whole empire for 1886 and 1897 compare thus :—

|                    | Imports, £ |            |                         | Exports, £ |            |
|--------------------|------------|------------|-------------------------|------------|------------|
|                    | 1886       | 1897       |                         | 1886       | 1897       |
| Cotton . . . . .   | 3,800,000  | 4,200,000  | Sugar . . . . .         | 4,000,000  | 5,100,000  |
| Wool . . . . .     | 2,600,000  | 3,200,000  | Cattle . . . . .        | 3,900,000  | 3,800,000  |
| Yarns . . . . .    | 2,400,000  | 2,500,000  | Timber . . . . .        | 4,500,000  | 7,000,000  |
| Textiles . . . . . | 2,700,000  | 2,200,000  | Grain . . . . .         | 3,500,000  | 3,500,000  |
| Coffee . . . . .   | 2,600,000  | 2,200,000  | Eggs . . . . .          | 900,000    | 3,700,000  |
| Coal . . . . .     | 1,100,000  | 3,100,000  | Leather goods . . . . . | 1,800,000  | 2,200,000  |
| Hardware . . . . . | 900,000    | 2,600,000  | Coal . . . . .          | 1,400,000  | 2,900,000  |
| Tobacco . . . . .  | 2,700,000  | 2,200,000  | Glass . . . . .         | 1,600,000  | 1,900,000  |
| Hides . . . . .    | 1,900,000  | 1,900,000  | Malt . . . . .          | 1,200,000  | 2,000,000  |
| Flax . . . . .     | 1,500,000  | 800,000    | Wool . . . . .          | 2,000,000  | 900,000    |
| Sundries . . . . . | 22,800,000 | 38,100,000 | Sundries . . . . .      | 33,400,000 | 31,000,000 |
| Total . . . . .    | 45,000,000 | 63,000,000 | Total . . . . .         | 58,200,000 | 64,000,000 |

Austria including Hungary has usually 500,000 tons of grain for exportation, but in 1897, on the contrary, she had to import 100,000 tons. Her exports of sugar and eggs have increased remarkably in ten years, viz :—

|                | Sugar, Tons | Eggs, Millions |
|----------------|-------------|----------------|
| 1887 . . . . . | 220,000     | 880            |
| 1897 . . . . . | 480,000     | 1,510          |

The trade of 1896 compares with the average for 4 years ending 1894 thus :—

| Trade with                | Millions £ Stg. |      | Ratio   |       |
|---------------------------|-----------------|------|---------|-------|
|                           | 1891-94         | 1896 | 1891-94 | 1896  |
| Germany . . . . .         | 55              | 55   | 46.3    | 44.8  |
| Great Britain . . . . .   | 10              | 12   | 8.4     | 9.7   |
| Italy . . . . .           | 8               | 9    | 6.7     | 7.3   |
| Other countries . . . . . | 46              | 47   | 38.6    | 38.2  |
| Total . . . . .           | 119             | 123  | 100.0   | 100.0 |

Trade with Germany is stationary, while it increases with Great Britain and Italy.

The countries trading with Austria were as follows :—

|                   | Millions £ Sterling |            |       |              |            |       |
|-------------------|---------------------|------------|-------|--------------|------------|-------|

The trade of the Austro-Hungarian monarchy shows an increase of 30 per cent. in imports, and 11 per cent. in exports between 1886 and 1896. There has been a great development of manufacturing industry, the value of imported coal having risen 135 per cent., and that of raw material (fibre) imported 25 per cent. At the same time certain exports show enormous increase, viz., eggs 260 per cent., sugar 60 per cent., leather goods 50 per cent.

## ITALY

Imports and exports have been as follows :—

| Year           | Millions £ Sterling |         |       | £ per Inhab. |
|----------------|---------------------|---------|-------|--------------|
|                | Imports             | Exports | Total |              |
| 1885 . . . . . | 58.4                | 38.0    | 96.4  | 3.3          |
| 1890 . . . . . | 52.8                | 35.8    | 88.6  | 2.9          |
| 1897 . . . . . | 48.1                | 44.6    | 92.7  | 2.9          |

The principal items of the trade of Italy for 1886 and 1896 compare as follows :—

|                    | Imports, £ |            |                    | Exports, £ |            |
|--------------------|------------|------------|--------------------|------------|------------|
|                    | 1886       | 1896       |                    | 1886       | 1896       |
| Cotton . . . . .   | 3,000,000  | 4,500,000  | Silk . . . . .     | 12,600,000 | 11,500,000 |
| Grain . . . . .    | 7,600,000  | 4,400,000  | Wine . . . . .     | 3,500,000  | 2,700,000  |
| Coal . . . . .     | 2,700,000  | 3,600,000  | Oil . . . . .      | 3,200,000  | 2,200,000  |
| Silk . . . . .     | 2,600,000  | 2,100,000  | Fruit . . . . .    | 1,500,000  | 2,100,000  |
| Hardware . . . .   | 1,700,000  | 1,900,000  | Flax . . . . .     | 1,000,000  | 1,500,000  |
| Timber . . . . .   | 2,400,000  | 1,300,000  | Eggs . . . . .     | 1,200,000  | 1,200,000  |
| Wool . . . . .     | 1,300,000  | 1,300,000  | Coral . . . . .    | 900,000    | 1,100,000  |
| Hides . . . . .    | 1,400,000  | 1,500,000  | Sulphur . . . . .  | 1,000,000  | 1,100,000  |
| Fish . . . . .     | 1,300,000  | 1,200,000  | Meat . . . . .     | 1,200,000  | 1,800,000  |
| Coffee . . . . .   | 700,000    | 1,100,000  | Ores . . . . .     | 200,000    | 400,000    |
| Sundries . . . . . | 33,600,000 | 24,000,000 | Sundries . . . . . | 14,800,000 | 17,700,000 |
| Total . . . . .    | 58,300,000 | 46,900,000 | Total . . . . .    | 41,100,000 | 42,100,000 |

As regards imports, there has been on the whole a fall of 20 per cent. Nevertheless some items show a remarkable increase, for example, raw cotton 50 per cent., and coal 33 per cent., from which it is evident that textile and other manufactures have been developed considerably in the last ten years. As for exports, if we except wine and oil, the quantities show a marked increase, but this is somewhat counteracted as regards value by the fall in prices. Trade on the whole shows an upward tendency.

The quantities of principal exports were as follows :—

| Year           | Gallons    |            | Millions Eggs | Tons Fruit |
|----------------|------------|------------|---------------|------------|
|                | Wine       | Oil        |               |            |
| 1887 . . . . . | 80,000,000 | 14,000,000 | 388           | 240,000    |
| 1897 . . . . . | 52,000,000 | 12,000,000 | 592           | 290,000    |

The decline in wine and oil has been very serious.

The trade of 1896 compares with the average of 5 years ending 1892 thus :—

| Trade with          | Millions £ Stg. |      | Ratio   |       |
|---------------------|-----------------|------|---------|-------|
|                     | 1888-92         | 1896 | 1888-92 | 1896  |
| Great Britain . . . | 16              | 14   | 17.6    | 16.2  |
| France . . . . .    | 16              | 12   | 17.6    | 13.5  |
| Germany . . . . .   | 11              | 12   | 12.0    | 13.5  |
| Other countries . . | 48              | 51   | 52.8    | 56.8  |
| Total . . . . .     | 91              | 89   | 100.0   | 100.0 |

The countries trading with Italy in 1886 and 1896 were :—

|                     | Millions £   |            |       |              |            |       |
|---------------------|--------------|------------|-------|--------------|------------|-------|
|                     | 1886         |            |       | 1896         |            |       |
|                     | Imports from | Exports to | Total | Imports from | Exports to | Total |
| Great Britain . . . | 11.0         | 2.8        | 13.8  | 9.2          | 4.4        | 13.6  |
| Germany . . . . .   | 5.2          | 4.3        | 9.5   | 5.8          | 6.6        | 12.4  |
| France . . . . .    | 12.4         | 17.8       | 30.2  | 5.5          | 6.3        | 11.8  |
| Austria . . . . .   | 8.9          | 3.7        | 12.6  | 5.4          | 5.0        | 10.4  |
| Switzerland . . . . | 3.2          | 3.5        | 6.7   | 1.8          | 6.9        | 8.7   |
| United States . . . | 2.2          | 2.1        | 4.3   | 4.8          | 3.4        | 8.2   |
| Russia . . . . .    | 3.8          | 0.7        | 4.5   | 4.7          | 0.5        | 5.2   |
| Other countries     | 11.6         | 6.2        | 17.8  | 9.7          | 9.0        | 18.7  |
| Total . . . . .     | 58.3         | 41.1       | 99.4  | 46.9         | 42.1       | 89.0  |

Trade with Germany is increasing, and with France is declining.

\* To be read thus: Imports £15,700,000.

## SPAIN

The foreign trade has risen 70 per cent. in 20 years, viz. :—

| Year       | Millions £ Sterling |         |       | £ per Inhab. |
|------------|---------------------|---------|-------|--------------|
|            | Imports             | Exports | Total |              |
| 1877 . . . | 19.6                | 20.5    | 40.1  | 2.4          |
| 1887 . . . | 32.4                | 28.9    | 61.3  | 3.5          |
| 1897 . . . | 31.7                | 37.0    | 68.7  | 3.9          |

The trade of 1896 compares with the average for 5 years, down to 1892, thus :—

| Trade with            | Millions £ Stg. |      | Ratio   |       |
|-----------------------|-----------------|------|---------|-------|
|                       | 1888-92         | 1896 | 1888-92 | 1896  |
| France . . .          | 21              | 20   | 36.8    | 26.0  |
| Great Britain . . .   | 11              | 15   | 19.4    | 19.5  |
| Cuba . . .            | 4               | 14   | 7.0     | 18.2  |
| Other countries . . . | 21              | 28   | 36.8    | 36.3  |
| Total . . .           | 57              | 77   | 100.0   | 100.0 |

The principal imports and exports of Spain in 1886 and 1896 were as follows :—

|                | Imports, £ |            |                   | Exports, £ |            |
|----------------|------------|------------|-------------------|------------|------------|
|                | 1886       | 1896       |                   | 1886       | 1896       |
| Cotton . . .   | 2,400,000  | 2,800,000  | Wine . . .        | 13,400,000 | 5,800,000  |
| Hardware . . . | 2,300,000  | 2,600,000  | Fruit . . .       | 2,100,000  | 3,200,000  |
| Coal . . .     | 1,000,000  | 2,000,000  | Minerals . . .    | 2,500,000  | 4,100,000  |
| Timber . . .   | 1,500,000  | 1,500,000  | Metals . . .      | 2,200,000  | 3,100,000  |
| Tobacco . . .  | 1,700,000  | 1,300,000  | Cottons . . .     | 500,000    | 2,100,000  |
| Textiles . . . | 2,200,000  | 1,100,000  | Cattle . . .      | 900,000    | 1,100,000  |
| Grain . . .    | 1,200,000  | 1,400,000  | Cork . . .        | 700,000    | 1,300,000  |
| Fish . . .     | 1,100,000  | 1,000,000  | Oil . . .         | 600,000    | 1,000,000  |
| Hides . . .    | 1,000,000  | 900,000    | Wool . . .        | 600,000    | 700,000    |
| Sugar . . .    | 1,300,000  | 700,000    | Quicksilver . . . | 100,000    | 300,000    |
| Sundries . . . | 16,000,000 | 21,100,000 | Sundries . . .    | 5,400,000  | 18,200,000 |
| Total . . .    | 31,700,000 | 36,400,000 | Total . . .       | 29,000,000 | 40,900,000 |

Spanish trade in the above interval of ten years showed a rise of 15 per cent. in imports, and 40 per cent. in exports. Wine has, indeed, fallen nearly 60 per cent., but minerals, metals, fruit, cotton manufactures, &c., have increased very remarkably.

The countries with which Spain traded were as follows :—

|                       | Millions £ Sterling |            |       |              |            |       |
|-----------------------|---------------------|------------|-------|--------------|------------|-------|
|                       | 1886                |            |       | 1896         |            |       |
|                       | Imports from*       | Exports to | Total | Imports from | Exports to | Total |
| France . . .          | 9.8                 | 13.5       | 23.3  | 8.7          | 11.3       | 20.0  |
| Great Britain . . .   | 4.5                 | 6.2        | 10.7  | 6.2          | 9.0        | 15.2  |
| Cuba . . .            | 1.6                 | 2.8        | 4.4   | 3.3          | 10.2       | 13.5  |
| United States . . .   | 3.8                 | 0.8        | 4.6   | 2.9          | 0.4        | 3.3   |

| Other countries . . . | 11.7                | 4.4        | 16.1  | 13.7         | 8.3        | 22.0  |
| Total . . .           | 31.7                | 29.0       | 60.7  | 36.4         | 40.9       | 77.3  |

## PORTUGAL

The countries trading with Portugal in 1886 and 1896 were :—

|                   | 1886       |            | 1896       |            |
|-------------------|------------|------------|------------|------------|
|                   | Imports, £ | Exports, £ | Imports, £ | Exports, £ |
| Gt. Britain . . . | 2,700,000  | 1,500,000  | 2,700,000  | 1,600,000  |
| France . . .      | 1,100,000  | 2,100,000  | 900,000    | 150,000    |
| Brazil . . .      | 400,000    | 1,000,000  | 400,000    | 1,450,000  |
| Various . . .     | 4,200,000  | 1,300,000  | 4,900,000  | 2,700,000  |
| Total . . .       | 8,400,000  | 5,900,000  | 8,900,000  | 5,900,000  |

Trade with France has declined very much, while it has increased with Brazil.

Trade returns for the kingdom of Portugal in 1886 and 1896 compare as follows :—

|                | Imports, £ |           |                | Exports, £ |           |
|----------------|------------|-----------|----------------|------------|-----------|
|                | 1886       | 1896      |                | 1886       | 1896      |
| Grain . . .    | 990,000    | 890,000   | Wine . . .     | 3,800,000  | 2,500,000 |
| Textiles . . . | 1,320,000  | 980,000   | Cork . . .     | 550,000    | 800,000   |
| Cotton . . .   | 290,000    | 250,000   | Cattle . . .   | 180,000    | 550,000   |
| Sugar . . .    | 380,000    | 440,000   | Copper . . .   | 160,000    | 250,000   |
| Fish . . .     | 400,000    | 510,000   | Sardines . . . | 220,000    | 220,000   |
| Sundries . . . | 5,020,000  | 5,830,000 | Sundries . . . | 990,000    | 1,580,000 |
| Total . . .    | 8,400,000  | 8,900,000 | Total . . .    | 5,900,000  | 5,900,000 |

\* To be read thus : Imports from France £9,800,000.

## SWEDEN

In the decade ending December 1896 imports rose 20 per cent., exports 50 per cent., viz :—

|                    | Imports, £ |            |                    | Exports, £ |            |
|--------------------|------------|------------|--------------------|------------|------------|
|                    | 1886       | 1896       |                    | 1886       | 1896       |
| Coal . . . . .     | 900,000    | 1,800,000  | Timber . . . . .   | 4,200,000  | 7,300,000  |
| Textiles . . . . . | 1,900,000  | 1,500,000  | Iron . . . . .     | 1,900,000  | 2,800,000  |
| Coffee . . . . .   | 1,000,000  | 1,500,000  | Butter . . . . .   | 1,100,000  | 2,500,000  |
| Hardware . . . . . | 1,200,000  | 1,800,000  | Fish . . . . .     | 200,000    | 400,000    |
| Grain . . . . .    | 1,600,000  | 1,300,000  | Matches . . . . .  | 600,000    | 300,000    |
| Sundries . . . . . | 9,800,000  | 12,000,000 | Sundries . . . . . | 4,700,000  | 5,600,000  |
| Total . . . . .    | 16,400,000 | 19,900,000 | Total . . . . .    | 12,700,000 | 18,900,000 |

The countries trading with Sweden were :—

|                   | Millions £    |            |       |              |            |       |
|-------------------|---------------|------------|-------|--------------|------------|-------|
|                   | 1886          |            |       | 1896         |            |       |
|                   | Imports from* | Exports to | Total | Imports from | Exports to | Total |
| Great Britain . . | 4.3           | 6.1        | 10.4  | 5.5          | 8.0        | 13.5  |
| Germany . . . .   | 5.1           | 1.1        | 6.2   | 6.5          | 2.4        | 8.9   |
| Denmark . . . .   | 2.4           | 1.4        | 3.8   | 2.5          | 2.3        | 4.8   |
| Various . . . . . | 4.6           | 4.1        | 8.7   | 5.4          | 6.2        | 11.6  |
| Total . . . . .   | 16.4          | 12.7       | 29.1  | 19.9         | 18.9       | 38.8  |

The principal Swedish exports which have risen (in value) are : timber 75 per cent., iron 48 per cent., butter 130 per cent., fish 100 per cent., over 1886. We see, moreover, that trade with Great Britain has risen 30 per cent.

## NORWAY

It is probably in a great measure due to her merchant fleet that the trade of Norway has grown so much in ten years, viz :—

| Year           | Imports, £ | Exports, £ | Total, £   |
|----------------|------------|------------|------------|
| 1886 . . . . . | 7,500,000  | 5,700,000  | 13,200,000 |
| 1896 . . . . . | 13,300,000 | 8,200,000  | 21,500,000 |

The countries trading with Norway were :—

|                   | Imports from, £ |            | Exports to, £ |           |
|-------------------|-----------------|------------|---------------|-----------|
|                   | 1886            | 1896       | 1886          | 1896      |
| G. Britain . . .  | 1,900,000       | 3,500,000  | 1,900,000     | 3,100,000 |
| Germany . . . .   | 2,100,000       | 3,500,000  | 700,000       | 1,000,000 |
| Sweden . . . . .  | 900,000         | 2,100,000  | 800,000       | 1,300,000 |
| Various . . . . . | 2,600,000       | 4,200,000  | 2,300,000     | 2,800,000 |
| Total . . . . .   | 7,500,000       | 13,300,000 | 5,700,000     | 8,200,000 |

The principal items of Norwegian trade in 1886 and 1896 were :—

|                    | Imports, £ |            |                    | Exports, £ |           |
|--------------------|------------|------------|--------------------|------------|-----------|
|                    | 1886       | 1896       |                    | 1886       | 1896      |
| Grain . . . . .    | 1,400,000  | 2,000,000  | Fish . . . . .     | 1,700,000  | 1,900,000 |
| Textiles . . . . . | 800,000    | 1,400,000  | Timber . . . . .   | 1,600,000  | 1,900,000 |
| Sundries . . . . . | 5,300,000  | 9,900,000  | Sundries . . . . . | 2,400,000  | 4,400,000 |
| Total . . . . .    | 7,500,000  | 13,300,000 | Total . . . . .    | 5,700,000  | 8,200,000 |

## DENMARK

The principal imports and exports of the trade of Denmark in 1886 and 1896 were :—

|                    | Imports, £ |            |                    | Exports, £ |            |
|--------------------|------------|------------|--------------------|------------|------------|
|                    | 1886       | 1896       |                    | 1886       | 1896       |
| Hardware . . . .   | 1,000,000  | 2,400,000  | Butter . . . . .   | 1,800,000  | 5,200,000  |
| Grain . . . . .    | 1,000,000  | 1,900,000  | Meat . . . . .     | 600,000    | 2,500,000  |
| Textiles . . . . . | 1,600,000  | 1,800,000  | Cattle . . . . .   | 2,200,000  | 1,300,000  |
| Coal . . . . .     | 800,000    | 1,200,000  | Eggs . . . . .     | 200,000    | 600,000    |
| Sundries . . . . . | 7,400,000  | 14,000,000 | Sundries . . . . . | 4,300,000  | 6,200,000  |
| Total . . . . .    | 11,800,000 | 21,300,000 | Total . . . . .    | 9,100,000  | 15,800,000 |

\* This table to read thus : Imports from Great Britain £4,300,000.

Trade has increased 80 per cent. in ten years, viz. :—

| Year       | Imports, £ | Exports, £ | Total, £   |
|------------|------------|------------|------------|
| 1886 . . . | 11,800,000 | 9,100,000  | 20,900,000 |
| 1896 . . . | 21,300,000 | 15,800,000 | 37,100,000 |

The principal trade is with Great Britain and Germany, viz. :—

|                     | Imports from,<br>Millions £ |      | Exports to,<br>Millions £ |      | Total |      |
|---------------------|-----------------------------|------|---------------------------|------|-------|------|
|                     | 1886                        | 1896 | 1886                      | 1896 | 1886  | 1896 |
| Great Britain . . . | 2.7                         | 4.3  | 3.8                       | 9.5  | 6.5   | 13.8 |
| Germany . . .       | 4.2                         | 7.0  | 2.8                       | 3.2  | 7.0   | 10.2 |
| Sweden . . .        | 1.7                         | 3.1  | 1.2                       | 1.7  | 2.9   | 4.8  |
| Various . . .       | 3.2                         | 6.9  | 1.3                       | 1.4  | 4.5   | 8.3  |
| Total . . .         | 11.8                        | 21.3 | 9.1                       | 15.8 | 20.9  | 37.1 |

Trade with Great Britain has more than doubled, while that with Germany has risen only 45 per cent. Thus in

The principal items of Dutch imports and exports in 1886 and 1896 were :—

|                | Imports, £ |             |                | Exports, £ |             |
|----------------|------------|-------------|----------------|------------|-------------|
|                | 1886       | 1896        |                | 1886       | 1896        |
| Grain . . .    | 12,400,000 | 26,500,000  | Drugs . . .    | 9,800,000  | 16,300,000  |
| Hardware . . . | 8,800,000  | 8,100,000   | Butter . . .   | 4,700,000  | 4,600,000   |
| Metals . . .   | 7,100,000  | 12,800,000  | Sugar . . .    | 2,500,000  | 2,500,000   |
| Cotton . . .   | 3,800,000  | 3,900,000   | Textiles . . . | 2,400,000  | 3,400,000   |
| Rice . . .     | 3,000,000  | 3,300,000   | Paper . . .    | 900,000    | 2,300,000   |
| Coal . . .     | 3,000,000  | 3,900,000   | Fish . . .     | 1,000,000  | 1,200,000   |
| Coffee . . .   | 3,100,000  | 3,500,000   | Hides . . .    | 1,000,000  | 1,300,000   |
| Timber . . .   | 1,400,000  | 3,000,000   | Cheese . . .   | 900,000    | 1,000,000   |
| Sundries . . . | 49,300,000 | 71,300,000  | Sundries . . . | 55,900,000 | 79,100,000  |
| Total . . .    | 91,900,000 | 136,300,000 | Total . . .    | 79,100,000 | 111,700,000 |

The countries trading with Holland were as follow :—

|                     | Imports from,<br>Millions £ |       | Exports to,<br>Millions £ |       | Total |       |
|---------------------|-----------------------------|-------|---------------------------|-------|-------|-------|
|                     | 1886                        | 1896  | 1886                      | 1896  | 1886  | 1896  |
| Germany . . .       | 26.3                        | 25.0  | 34.5                      | 58.3  | 60.8  | 83.3  |
| Great Britain . . . | 21.8                        | 21.3  | 21.3                      | 24.2  | 43.1  | 45.5  |
| Belgium . . .       | 13.2                        | 14.5  | 11.5                      | 13.7  | 24.7  | 28.2  |
| Java . . .          | 7.5                         | 20.0  | 3.8                       | 4.4   | 11.3  | 24.4  |
| Various . . .       | 20.6                        | 55.5  | 7.9                       | 11.1  | 28.5  | 66.6  |
| Total . . .         | 89.4                        | 136.3 | 79.0                      | 111.7 | 168.4 | 248.0 |

The following table compares Dutch trade in 1896 with the average for five years ending December 1892 :—

| Trade with          | Millions £ |      | Ratio   |       |
|---------------------|------------|------|---------|-------|
|                     | 1888-92    | 1896 | 1888-92 | 1896  |
| Germany . . .       | 66         | 83   | 33.0    | 33.5  |
| Great Britain . . . | 49         | 46   | 24.5    | 18.5  |
| Belgium . . .       | 27         | 28   | 13.5    | 11.3  |
| Java . . .          | 19         | 24   | 9.5     | 9.7   |
| Various . . .       | 39         | 67   | 19.5    | 27.0  |
| Total . . .         | 200        | 248  | 100.0   | 100.0 |

There is a decline in trade with Great Britain.

1886 Germany stood ahead of Great Britain in the trade of Denmark, whereas now Great Britain is 36 per cent. ahead of Germany.

#### HOLLAND

Exclusive of trade in transit the commerce of Holland has advanced by leaps and bounds, viz. :—

|            | Imports, £  | Exports, £  | Total, £    |
|------------|-------------|-------------|-------------|
| 1876 . . . | 58,000,000  | 44,100,000  | 102,100,000 |
| 1886 . . . | 91,900,000  | 79,100,000  | 171,000,000 |
| 1896 . . . | 136,300,000 | 111,700,000 | 248,000,000 |

As Holland is the only free-trade country of Continental Europe, the growth of its trade offers an important lesson. In twenty years the imports have risen 135 per cent., exports 154 per cent. The increased importation of coal and metals, as well as of timber, points to a development of home manufactures, while the increase of exports shows a great activity in the colonial trade and in Dutch products generally.

#### BELGIUM

Reviewing the trade of the last two decades we find it was stationary in the first, but has greatly expanded in the second, viz. :—

|            | Imports, £ | Exports, £ | Total, £    |
|------------|------------|------------|-------------|
| 1876 . . . | 57,900,000 | 42,600,000 | 100,500,000 |
| 1886 . . . | 53,400,000 | 47,300,000 | 100,700,000 |
| 1896 . . . | 71,100,000 | 58,700,000 | 129,800,000 |

The countries trading with Belgium were as follow :—

|                     | Millions £ Sterling |            |       |              |            |       |
|---------------------|---------------------|------------|-------|--------------|------------|-------|
|                     | 1886                |            |       | 1896         |            |       |
|                     | Imports from        | Exports to | Total | Imports from | Exports to | Total |
| France . . .        | 10.1                | 13.2       | 23.3  | 12.4         | 11.5       | 23.9  |
| Germany . . .       | 6.1                 | 7.8        | 13.9  | 8.6          | 13.1       | 21.7  |
| Great Britain . . . | 6.9                 | 9.4        | 16.3  | 8.2          | 12.7       | 19.9  |
| Holland . . .       | 8.0                 | 7.0        | 15.0  | 7.1          | 6.9        | 14.0  |
| United States . . . | 6.4                 | 1.6        | 8.0   | 6.9          | 2.0        | 8.9   |
| Various . . .       | 15.9                | 8.3        | 24.2  | 27.9         | 13.5       | 41.4  |
| Total . . .         | 53.4                | 47.3       | 100.7 | 71.1         | 58.7       | 129.8 |

The above is exclusive of transit trade, which exceeds 50 millions sterling. The chief items of imports and exports were :—

|                     | Imports, £ |            |                     | Exports, £ |            |
|---------------------|------------|------------|---------------------|------------|------------|
|                     | 1886       | 1896       |                     | 1886       | 1896       |
| Grain . . . . .     | 8,300,000  | 11,600,000 | Yarn . . . . .      | 5,200,000  | 4,100,000  |
| Fibre . . . . .     | 6,400,000  | 6,600,000  | Coal . . . . .      | 2,800,000  | 3,500,000  |
| Minerals . . . . .  | 2,800,000  | 5,700,000  | Hardware . . . . .  | 2,500,000  | 5,200,000  |
| Chemicals . . . . . | 2,700,000  | 4,400,000  | Textiles . . . . .  | 2,600,000  | 3,200,000  |
| Timber . . . . .    | 1,700,000  | 3,600,000  | Glass . . . . .     | 2,000,000  | 3,100,000  |
| Cattle . . . . .    | 2,900,000  | 2,300,000  | Machinery . . . . . | 2,000,000  | 2,600,000  |
| Coffee . . . . .    | 1,300,000  | 2,100,000  | Sugar . . . . .     | 1,200,000  | 2,200,000  |
| Sundries . . . . .  | 27,400,000 | 34,900,000 | Sundries . . . . .  | 29,000,000 | 34,800,000 |
| Total . . . . .     | 53,400,000 | 71,100,000 | Total . . . . .     | 47,300,000 | 58,700,000 |

Comparing the trade of Belgium in 1896 with the average of 5 years ending December 1892, we find as follows :—

| Trade with              | Millions £ Stg. |      | Ratio   |       |
|-------------------------|-----------------|------|---------|-------|
|                         | 1888-92         | 1896 | 1888-92 | 1896  |
| France . . . . .        | 26              | 24   | 21.5    | 18.5  |
| Germany . . . . .       | 18              | 22   | 14.8    | 16.9  |
| Great Britain . . . . . | 18              | 20   | 14.8    | 15.4  |
| Holland . . . . .       | 16              | 14   | 13.2    | 10.8  |
| Various . . . . .       | 43              | 50   | 35.7    | 38.4  |
| Total . . . . .         | 121             | 130  | 100.0   | 100.0 |

Germany and Great Britain are gaining ground, while France and Holland are receding.

#### SWITZERLAND

Comparing the trade of 1896 with the average of 5 years ending 1892 shows as follows :—

| Trade with              | Millions £ Stg. |      | Ratio   |       |
|-------------------------|-----------------|------|---------|-------|
|                         | 1888-92         | 1896 | 1888-92 | 1896  |
| Germany . . . . .       | 18              | 20   | 27.3    | 27.5  |
| France . . . . .        | 15              | 14   | 22.7    | 19.5  |
| Great Britain . . . . . | 6               | 8    | 9.1     | 11.3  |
| Italy . . . . .         | 7               | 7    | 10.6    | 9.7   |
| Various . . . . .       | 20              | 23   | 30.3    | 32.0  |
| Total . . . . .         | 66              | 72   | 100.0   | 100.0 |

Great Britain and Germany are gaining ground, while France has lost heavily in the ratio of Swiss trade.

The principal items of imports and exports of Switzerland were as follow :—

|                    | Imports, £ |            |                     | Exports, £ |            |
|--------------------|------------|------------|---------------------|------------|------------|
|                    | 1886       | 1896       |                     | 1886       | 1896       |
| Silk . . . . .     | 5,300,000  | 4,300,000  | Textiles . . . . .  | 10,200,000 | 10,200,000 |
| Grain . . . . .    | 3,400,000  | 4,400,000  | Watches . . . . .   | 3,200,000  | 3,900,000  |
| Cattle . . . . .   | 2,100,000  | 2,100,000  | Cheese . . . . .    | 1,500,000  | 1,500,000  |
| Hardware . . . . . | 1,200,000  | 3,200,000  | Yarn . . . . .      | 1,200,000  | 1,100,000  |
| Coal . . . . .     | 700,000    | 2,900,000  | Machinery . . . . . | 700,000    | 1,200,000  |
| Cotton . . . . .   | 1,400,000  | 1,400,000  | Milk . . . . .      | 500,000    | 800,000    |
| Sundries . . . . . | 16,900,000 | 24,200,000 | Sundries . . . . .  | 9,500,000  | 10,000,000 |
| Total . . . . .    | 31,000,000 | 42,500,000 | Total . . . . .     | 26,800,000 | 29,600,000 |

Trade increased 25 per cent. in 10 years, viz. :—

| Year           | Imports, £ | Exports, £ | Total, £   |
|----------------|------------|------------|------------|
| 1886 . . . . . | 31,000,000 | 26,800,000 | 57,800,000 |
| 1896 . . . . . | 42,500,000 | 29,600,000 | 72,100,000 |

The principal countries trading with Switzerland were :

|                         | Millions £ Sterling |            |       |              |            |       |
|-------------------------|---------------------|------------|-------|--------------|------------|-------|
|                         | 1886                |            |       | 1896         |            |       |
|                         | Imports from*       | Exports to | Total | Imports from | Exports to | Total |
| Germany . . . . .       | 10.4                | 6.4        | 16.8  | 12.3         | 7.2        | 19.5  |
| France . . . . .        | 7.5                 | 5.6        | 13.1  | 9.2          | 4.7        | 13.9  |
| Great Britain . . . . . | 1.8                 | 4.2        | 6.0   | 2.1          | 5.9        | 8.0   |
| Italy . . . . .         | 4.8                 | 2.3        | 7.1   | 5.7          | 1.6        | 7.3   |
| Austria . . . . .       | 3.7                 | 1.4        | 5.1   | 3.1          | 1.7        | 4.8   |
| Various . . . . .       | 2.8                 | 6.9        | 9.7   | 10.1         | 8.5        | 18.6  |
| Total . . . . .         | 31.0                | 26.8       | 57.8  | 42.5         | 29.6       | 72.1  |

#### ROUMANIA

The nations trading with Roumania were as follow :—

|                         | Millions £ Sterling |            |       |              |            |       |
|-------------------------|---------------------|------------|-------|--------------|------------|-------|
|                         | 1886                |            |       | 1896         |            |       |
|                         | Imports from        | Exports to | Total | Imports from | Exports to | Total |
| Great Britain . . . . . | 2.1                 | 2.5        | 4.6   | 2.9          | 4.5        | 7.4   |
| Austria . . . . .       | 4.8                 | 2.8        | 7.6   | 3.7          | 1.3        | 5.0   |
| Belgium . . . . .       | 0.2                 | 0.1        | 0.3   | 0.4          | 4.6        | 5.0   |
| Germany . . . . .       | 1.7                 | 0.3        | 2.0   | 3.8          | 0.7        | 4.5   |
| Various . . . . .       | 1.9                 | 4.2        | 6.1   | 2.7          | 1.9        | 4.6   |
| Total . . . . .         | 10.7                | 9.9        | 20.6  | 13.5         | 13.0       | 26.5  |

The only country with which dealings have fallen off is Austria. It is to be observed that Great Britain, instead of second as in 1886, now holds the foremost place in Roumanian trade, beyond all competitors.

\* To be read thus : Imports from Germany £10,400,000.

The country was impoverished in 1876, and hence exports exceeded imports. Since 1886 things are better, and imports are over exports. The principal items of trade were as follow :—

|                    | Imports, £        |                   |                    | Exports, £       |                   |
|--------------------|-------------------|-------------------|--------------------|------------------|-------------------|
|                    | 1886              | 1896              |                    | 1886             | 1896              |
| Textiles . . .     | 3,200,000         | 6,000,000         | Grain . . .        | 6,200,000        | 11,100,000        |
| Hardware . . .     | 600,000           | 2,500,000         | Cattle . . .       | ...              | 400,000           |
| Sundries . . .     | 6,900,000         | 5,000,000         | Sundries . . .     | 3,700,000        | 1,500,000         |
| <b>Total . . .</b> | <b>10,700,000</b> | <b>13,500,000</b> | <b>Total . . .</b> | <b>9,900,000</b> | <b>13,000,000</b> |

The trade of Roumania has risen 60 per cent. since 1876, viz :—

| Year       | Imports, £ | Exports, £ | Total, £   |
|------------|------------|------------|------------|
| 1876 . . . | 6,600,000  | 9,400,000  | 16,000,000 |
| 1886 . . . | 10,700,000 | 9,900,000  | 20,600,000 |
| 1896 . . . | 13,500,000 | 13,000,000 | 26,500,000 |

## SERVIA

The trade of this kingdom has been as follows :—

| Year       | Imports, £ | Exports, £ | Total, £  |
|------------|------------|------------|-----------|
| 1876 . . . | 900,000    | 1,100,000  | 2,000,000 |
| 1886 . . . | 2,200,000  | 1,900,000  | 4,100,000 |
| 1896 . . . | 1,300,000  | 2,100,000  | 3,400,000 |

The trade of 1896 was as follows :—

| Imports            | £                | Exports            | £                |
|--------------------|------------------|--------------------|------------------|
| Textiles . . .     | 400,000          | Grain . . .        | 900,000          |
| Hardware . . .     | 100,000          | Cattle . . .       | 900,000          |
| Sundries . . .     | 800,000          | Sundries . . .     | 300,000          |
| <b>Total . . .</b> | <b>1,300,000</b> | <b>Total . . .</b> | <b>2,100,000</b> |

The countries trading with Servia are shown thus :—

|                       | Imports from     | Exports to       | Total, £         | Ratio        |
|-----------------------|------------------|------------------|------------------|--------------|
| Austria . . .         | 780,000          | 1,900,000        | 2,680,000        | 78.8         |
| Other countries . . . | 520,000          | 200,000          | 720,000          | 21.2         |
| <b>Total . . .</b>    | <b>1,300,000</b> | <b>2,100,000</b> | <b>3,400,000</b> | <b>100.0</b> |

## BULGARIA

The countries trading with Bulgaria in 1886 and 1896 showed thus :—

|                    | Imports, £       |                  | Exports, £       |                  |
|--------------------|------------------|------------------|------------------|------------------|
|                    | 1886             | 1896             | 1886             | 1896             |
| G. Britain . . .   | 740,000          | 720,000          | 200,000          | 1,300,000        |
| Austria . . .      | 680,000          | 900,000          | 100,000          | 100,000          |
| Turkey . . .       | 450,000          | 400,000          | 1,200,000        | 900,000          |
| Various . . .      | 730,000          | 1,080,000        | 500,000          | 2,000,000        |
| <b>Total . . .</b> | <b>2,600,000</b> | <b>3,100,000</b> | <b>2,000,000</b> | <b>4,300,000</b> |

Trade with Great Britain has more than doubled in ten years, while it has notably declined with Turkey.

The principal imports and exports in 1887 and 1896 were :—

|                    | Imports, £       |                  |
|--------------------|------------------|------------------|
|                    | 1887             | 1896             |
| Textiles . . .     | 800,000          | 800,000          |
| Hardware . . .     | 200,000          | 200,000          |
| Sundries . . .     | 1,600,000        | 2,100,000        |
| <b>Total . . .</b> | <b>2,600,000</b> | <b>3,100,000</b> |

|                    | Exports, £       |                  |
|--------------------|------------------|------------------|
|                    | 1887             | 1896             |
| Grain . . .        | 900,000          | 3,800,000        |
| Cattle . . .       | 200,000          | 150,000          |
| Sundries . . .     | 700,000          | 350,000          |
| <b>Total . . .</b> | <b>1,800,000</b> | <b>4,300,000</b> |

The trade of the principality has grown thus in ten years :—

| Year           | Imports, £ | Exports, £ | Total, £  |
|----------------|------------|------------|-----------|
| 1886 . . . . . | 2,600,000  | 2,000,000  | 4,600,000 |
| 1896 . . . . . | 3,100,000  | 4,300,000  | 7,400,000 |

## GREECE

Official returns for 1888 and 1896 compare as follows :—

| Year           | Imports, £ | Exports, £ | Total, £  |
|----------------|------------|------------|-----------|
| 1888 . . . . . | 4,400,000  | 3,800,000  | 8,200,000 |
| 1896 . . . . . | 4,700,000  | 2,900,000  | 7,600,000 |

The countries trading with Greece were :—

|                    | Imports, £       |                  | Exports, £       |                  |
|--------------------|------------------|------------------|------------------|------------------|
|                    | 1888             | 1896             | 1888             | 1896             |
| G. Britain . . .   | 1,200,000        | 1,200,000        | 1,600,000        | 700,000          |
| Russia . . .       | 1,000,000        | 1,000,000        | ...              | 300,000          |
| Turkey . . .       | 500,000          | 600,000          | 200,000          | 300,000          |
| Various . . .      | 1,700,000        | 1,900,000        | 1,600,000        | 1,600,000        |
| <b>Total . . .</b> | <b>4,400,000</b> | <b>4,700,000</b> | <b>3,800,000</b> | <b>2,900,000</b> |

The fall in the price of currants, from £27 a ton in 1888 to £15 in 1896, has injuriously affected Greek commerce.

The principal items of imports and exports of Greece were :—

|                  | Imports, £ |           |                  | Exports, £ |           |
|------------------|------------|-----------|------------------|------------|-----------|
|                  | 1888       | 1896      |                  | 1888       | 1896      |
| Grain . . . .    | 1,400,000  | 1,200,000 | Fruit . . . .    | 1,900,000  | 1,100,000 |
| Textiles . . . . | 800,000    | 900,000   | Oil . . . .      | 100,000    | 100,000   |
| Sundries . . . . | 2,200,000  | 2,600,000 | Sundries . . . . | 1,800,000  | 1,700,000 |
| Total . . . .    | 4,400,000  | 4,700,000 | Total . . . .    | 3,800,000  | 2,900,000 |

### TURKEY

The chief items of Turkish imports and exports were the following :—

|                  | Imports, £ |            |                  | Exports, £ |            |
|------------------|------------|------------|------------------|------------|------------|
|                  | 1889       | 1894       |                  | 1889       | 1894       |
| Coal . . . .     | 200,000    | 2,300,000  | Fruit . . . .    | 2,200,000  | 2,300,000  |
| Sugar . . . .    | 1,400,000  | 1,600,000  | Grain . . . .    | 2,000,000  | 1,500,000  |
| Linens . . . .   | 1,600,000  | 1,400,000  | Silk . . . .     | 1,400,000  | 1,500,000  |
| Quilts . . . .   | 1,100,000  | 1,200,000  | Mohair . . . .   | 600,000    | 600,000    |
| Coffee . . . .   | 700,000    | 800,000    | Opium . . . .    | 600,000    | 500,000    |
| Woollens . . . . | 700,000    | 700,000    | Oil . . . .      | 600,000    | 300,000    |
| Sundries . . . . | 13,200,000 | 13,700,000 | Sundries . . . . | 6,300,000  | 5,300,000  |
| Total . . . .    | 18,900,000 | 21,700,000 | Total . . . .    | 13,700,000 | 12,000,000 |

The returns for 1896 compare with 1882 as follows :—

| Year         | Imports, £ | Exports, £ | Total, £   |
|--------------|------------|------------|------------|
| 1882 . . . . | 17,500,000 | 10,200,000 | 27,700,000 |
| 1896 . . . . | 15,400,000 | 16,600,000 | 32,000,000 |

The countries trading with Turkey were as follow :—

|                  | Millions £ Sterling |            |       |              |            |       |
|------------------|---------------------|------------|-------|--------------|------------|-------|
|                  | 1889                |            |       | 1894         |            |       |
|                  | Imports from *      | Exports to | Total | Imports from | Exports to | Total |
| G. Britain . . . | 8.2                 | 5.2        | 13.4  | 8.2          | 5.1        | 13.3  |
| Austria . . . .  | 3.7                 | 1.2        | 4.9   | 4.7          | 1.2        | 5.9   |
| France . . . .   | 2.3                 | 3.9        | 6.2   | 2.5          | 3.2        | 5.7   |
| Russia . . . .   | 1.6                 | 0.3        | 1.9   | 1.3          | 0.3        | 1.6   |
| Bulgaria . . . . | 1.0                 | 0.3        | 1.3   | 1.1          | 0.3        | 1.4   |
| Various . . . .  | 2.1                 | 2.8        | 4.9   | 3.9          | 1.9        | 5.8   |
| Total . . . .    | 18.9                | 13.7       | 32.6  | 21.7         | 12.0       | 33.7  |

The only country that shows any remarkable increase in its dealings with Turkey is Austria.

### UNITED STATES

The trade of 1897 compares with that of thirty years preceding as follows :—

| Period        | Annual Average. £ Sterling |             |             | £ per Inhab. |
|---------------|----------------------------|-------------|-------------|--------------|
|               | Imports                    | Exports     | Total       |              |
| 1867-71 . . . | 88,400,000                 | 70,700,000  | 159,100,000 | 4.2          |
| 1872-81 . . . | 114,000,000                | 132,000,000 | 246,000,000 | 5.4          |
| 1882-91 . . . | 148,000,000                | 158,600,000 | 306,600,000 | 5.3          |
| 1892-96 . . . | 160,600,000                | 185,600,000 | 346,200,000 | 5.1          |
| 1897 . . . .  | 159,000,000                | 214,800,000 | 373,800,000 | 5.1          |

It appears that since 1872 trade has not kept pace with population. Textile goods form a great part of imports, and show as follows :—

|                 | Annual Average, £ Sterling |            |            |            |
|-----------------|----------------------------|------------|------------|------------|
|                 | 1867-76                    | 1877-86    | 1887-96    | 1897       |
| Cottons . . .   | 4,800,000                  | 5,800,000  | 5,900,000  | 7,200,000  |
| Woollens . . .  | 8,500,000                  | 7,100,000  | 8,900,000  | 10,200,000 |
| Silks . . . .   | 5,200,000                  | 6,300,000  | 6,900,000  | 5,200,000  |
| Linens, &c. . . | 3,700,000                  | 4,200,000  | 5,200,000  | 6,800,000  |
| Total . . . .   | 22,200,000                 | 23,400,000 | 26,900,000 | 29,400,000 |

The importation of fibre is best understood by comparing its weight with that of native fibre, since 1867, thus :—

| Period        | Tons of Fibre Yearly |         |             |
|---------------|----------------------|---------|-------------|
|               | Imported             | Native  | Consumption |
| 1867-71 . . . | 60,000               | 280,000 | 340,000     |
| 1872-81 . . . | 102,000              | 403,000 | 505,000     |
| 1882-91 . . . | 220,000              | 600,000 | 820,000     |
| 1892-96 . . . | 280,000              | 740,000 | 1,020,000   |
| 1897 . . . .  | 345,000              | 790,000 | 1,135,000   |

The value of imported fibres was as follows :—

|               | Annual Average £ Sterling |            |            |
|---------------|---------------------------|------------|------------|
|               | 1867-81                   | 1882-96    | 1897       |
| Wool . . . .  | 2,300,000                 | 3,400,000  | 11,000,000 |
| Silk . . . .  | 1,200,000                 | 4,200,000  | 4,000,000  |
| Flax, &c. . . | 1,000,000                 | 3,200,000  | 2,500,000  |
| Total . . . . | 4,500,000                 | 10,800,000 | 17,500,000 |

\* Note.—To be read thus: Imports from Great Britain, £8,200,000.

As regards exports the increase has been much greater than that of imports, viz. :—

|                | Annual Average, £ Sterling |             |             |             |
|----------------|----------------------------|-------------|-------------|-------------|
|                | 1867-76                    | 1877-86     | 1887-96     | 1897        |
| Food . . .     | 29,400,000                 | 64,600,000  | 63,400,000  | 84,100,000  |
| Cotton . . .   | 40,800,000                 | 42,200,000  | 47,200,000  | 48,000,000  |
| Sundries . . . | 19,400,000                 | 48,800,000  | 63,000,000  | 82,700,000  |
| Exports . . .  | 89,600,000                 | 155,600,000 | 173,600,000 | 214,800,000 |

The increase in weight of exports has been even greater than in value, taking for example four items, viz. :—

|                 | Tons Yearly |            |            |
|-----------------|-------------|------------|------------|
|                 | 1872-76     | 1892-96    | 1897       |
| Meat . . .      | 190,000     | 590,000    | 650,000    |
| Grain . . .     | 2,660,000   | 6,220,000  | 9,700,000  |
| Cotton . . .    | 560,000     | 1,210,000  | 1,410,000  |
| Petroleum . . . | 920,000     | 3,850,000  | 4,410,000  |
| Total . . .     | 4,320,000   | 11,870,000 | 16,170,000 |

The trade of the United States with the several quarters of the globe was as follows :—

|                 | Millions £ Sterling |            |       |              |            |       |
|-----------------|---------------------|------------|-------|--------------|------------|-------|
|                 | 1887                |            |       | 1897         |            |       |
|                 | Imports from        | Exports to | Total | Imports from | Exports to | Total |
| Europe . . .    | 81                  | 117        | 198   | 89           | 167        | 256   |
| Asia . . .      | 17                  | 5          | 22    | 23           | 9          | 32    |
| Australia . . . | 1                   | 2          | 3     | 1            | 4          | 5     |
| Africa . . .    | 1                   | 1          | 2     | 2            | 3          | 5     |
| America . . .   | 44                  | 22         | 66    | 44           | 32         | 76    |
| Total . . .     | 144                 | 147        | 291   | 159          | 215        | 374   |

Comparing the returns for 1897 with the average of 5 years to June 1894 we find the currents of trade, imports and exports together, as follows :—

| Trade with          | Millions £ Stg. |      | Ratio   |       |
|---------------------|-----------------|------|---------|-------|
|                     | 1890-94         | 1897 | 1890-94 | 1897  |
| Great Britain . . . | 128             | 134  | 36.2    | 35.8  |
| Germany . . .       | 37              | 49   | 10.4    | 13.1  |
| France . . .        | 27              | 26   | 7.6     | 7.0   |
| Cuba . . .          | 18              | 6    | 5.1     | 1.6   |
| Canada . . .        | 18              | 22   | 5.1     | 5.9   |
| Various . . .       | 126             | 137  | 35.6    | 36.6  |
| Total . . .         | 354             | 374  | 100.0   | 100.0 |

There is a marked increase of trade with Germany and Canada, while the ratios of other countries are declining. Since 1894 transactions with Germany have risen 33, with Canada 22, per cent. The trade of the United States with South America in the years 1892-96 as compared with 1882-86 showed an advance of 48 per cent., while British trade with that part of the world increased 20 per cent. in the same interval. In regard to the British West Indies, their trade with the United States rose 50 per cent. in 10 years, while their dealings with Great Britain fell off 15 per cent.

## CANADA

Trade since 1881 may be summed up thus, in yearly average :—

| Period        | Imports, £ | Exports, £ | Total, £   |
|---------------|------------|------------|------------|
| 1881-90 . . . | 23,100,000 | 20,100,000 | 43,200,000 |
| 1891-95 . . . | 24,200,000 | 23,800,000 | 48,000,000 |
| 1897 . . .    | 23,000,000 | 25,800,000 | 48,800,000 |

The importation of fibre has multiplied five-fold in twenty years, viz. :—

|              | Tons  |        |        |
|--------------|-------|--------|--------|
|              | 1876  | 1886   | 1896   |
| Cotton . . . | 3,000 | 16,000 | 20,000 |
| Hemp . . .   | 2,000 | 5,000  | 10,000 |
| Wool . . .   | 2,000 | 6,000  | 4,000  |
| Total . . .  | 7,000 | 27,000 | 34,000 |

The trade of Canada may be said to be equally shared between the United States and Great Britain, the dealings with other countries being very small.

The returns for 1896 show thus, in comparison with 1886 :—

|                  | Trade of 1896 |            |            | 1886       |
|------------------|---------------|------------|------------|------------|
|                  | Imp. from     | Exp. to    | Total, £   |            |
| G. Britain . . . | 6,900,000     | 13,800,000 | 20,700,000 | 16,900,000 |
| U. States . . .  | 12,200,000    | 7,600,000  | 19,800,000 | 16,700,000 |
| Various . . .    | 2,800,000     | 3,800,000  | 6,600,000  | 4,600,000  |
| Total . . .      | 21,900,000    | 25,200,000 | 47,100,000 | 38,200,000 |

In ten years the trade with the United States has risen 18, with Great Britain 22, per cent.

The imports and exports of 1896 compare with 1886 as to value thus :—

|                | Imports, £ |            |
|----------------|------------|------------|
|                | 1886       | 1896       |
| Textiles . . . | 3,800,000  | 3,500,000  |
| Hardware . . . | 2,600,000  | 2,900,000  |
| Coal . . .     | 1,400,000  | 1,900,000  |
| Sugar . . .    | 900,000    | 1,200,000  |
| Tea . . .      | 900,000    | 700,000    |
| Sundries . . . | 11,100,000 | 11,700,000 |
| Total . . .    | 20,700,000 | 21,900,000 |

|                 | Exports, £ |            |
|-----------------|------------|------------|
|                 | 1886       | 1896       |
| Timber . . .    | 3,900,000  | 5,100,000  |
| Cheese, &c. . . | 2,100,000  | 3,300,000  |
| Meat . . .      | 1,600,000  | 3,000,000  |
| Fish . . .      | 1,000,000  | 2,100,000  |
| Grain . . .     | 3,800,000  | 2,000,000  |
| Sundries . . .  | 5,100,000  | 9,700,000  |
| Total . . .     | 17,500,000 | 25,200,000 |

## MEXICO

Imports are not classified. The trade returns of 1897 compare with previous dates thus:—

| Year       | Imports, £ | Exports, £ | Total, £   |
|------------|------------|------------|------------|
| 1880 . . . | 5,000,000  | 6,800,000  | 11,800,000 |
| 1889 . . . | 8,100,000  | 8,300,000  | 16,400,000 |
| 1897 . . . | 8,400,000  | 11,100,000 | 19,500,000 |

Exports were as follows:—

| Year       | Silver, £  | Sundries, £ | Total, £   |
|------------|------------|-------------|------------|
| 1889 . . . | 5,800,000  | 6,700,000   | 12,500,000 |
| 1897 . . . | 11,400,000 | 10,800,000  | 22,200,000 |

Import and export trade in 1897 stood thus:—

|                   | Imp. from | Exp. to    | Total, £   | Ratio |
|-------------------|-----------|------------|------------|-------|
| United States . . | 4,500,000 | 8,700,000  | 13,200,000 | 67.6  |
| Great Britain . . | 1,400,000 | 1,400,000  | 2,800,000  | 14.4  |
| Various . . .     | 2,500,000 | 1,000,000  | 3,500,000  | 18.0  |
| Total . . .       | 8,400,000 | 11,100,000 | 19,500,000 | 100.0 |

## CENTRAL AMERICA

This term embraces five small republics, Guatemala, Salvador, Nicaragua, Costa Rica, and Honduras, the trade in 1896 showing thus:—

|                  | Imports, £ | Exports, £ | Total, £   |
|------------------|------------|------------|------------|
| Guatemala . . .  | 2,200,000  | 1,900,000  | 4,100,000  |
| Salvador . . .   | 1,900,000  | 1,700,000  | 3,600,000  |
| Nicaragua, &c. . | 2,500,000  | 2,800,000  | 5,300,000  |
| Total . . .      | 6,600,000  | 6,400,000  | 13,000,000 |

These states export 70,000 tons of coffee, valued at £4,700,000, besides a large quantity of bananas. Their trade with other nations stands thus:—

|                   | Imp. from | Exp. to   | Total, £   | Ratio |
|-------------------|-----------|-----------|------------|-------|
| United States . . | 1,400,000 | 2,200,000 | 3,600,000  | 27.7  |
| Great Britain . . | 1,500,000 | 800,000   | 2,300,000  | 17.7  |
| Various . . .     | 3,700,000 | 3,400,000 | 7,100,000  | 54.6  |
| Total . . .       | 6,600,000 | 6,400,000 | 13,000,000 | 100.0 |

## ARGENTINA

The imports and exports of the Argentine Republic in 1890 and 1896 compared thus:—

|                 | Imports, £ |            |                | Exports, £ |            |
|-----------------|------------|------------|----------------|------------|------------|
|                 | 1890       | 1896       |                | 1890       | 1896       |
| Textiles . . .  | 5,600,000  | 7,700,000  | Wool . . .     | 7,100,000  | 6,700,000  |
| Hardware . . .  | 9,400,000  | 3,500,000  | Grain . . .    | 4,800,000  | 6,200,000  |
| Comestibles . . | 2,500,000  | 2,800,000  | Hides . . .    | 4,100,000  | 2,100,000  |
| Wine . . .      | 2,000,000  | 1,700,000  | Meat . . .     | 2,200,000  | 2,000,000  |
| Coal . . .      | 1,100,000  | 1,200,000  | Linseed . . .  | 200,000    | 1,400,000  |
| Sundries . . .  | 7,800,000  | 5,500,000  | Sundries . . . | 1,800,000  | 4,900,000  |
| Total . . .     | 28,400,000 | 22,400,000 | Total . . .    | 20,200,000 | 23,300,000 |

\* To be read thus: Colombia, £2,800,000.

## SOUTH AMERICA

The commerce of these ten republics showed as follows:—

|                 | Millions £ Sterling |            |       |              |            |       |
|-----------------|---------------------|------------|-------|--------------|------------|-------|
|                 | 1886                |            |       | 1896         |            |       |
|                 | Imports from*       | Exports to | Total | Imports from | Exports to | Total |
| Colombia . . .  | 2.8                 | 1.6        | 4.4   | 2.0          | 3.0        | 5.0   |
| Venezuela . . . | 2.5                 | 3.3        | 5.8   | 3.3          | 4.4        | 7.7   |
| Ecuador . . .   | 2.2                 | 2.0        | 4.2   | 1.2          | 1.7        | 2.9   |
| Peru . . .      | 1.8                 | 1.3        | 3.1   | 1.7          | 2.5        | 4.2   |
| Chile . . .     | 6.6                 | 7.5        | 14.1  | 11.7         | 11.7       | 23.4  |
| Bolivia . . .   | 0.9                 | 1.5        | 2.4   | 0.6          | 1.3        | 1.9   |
| Paraguay . . .  | 0.3                 | 0.2        | 0.5   | 0.5          | 0.5        | 1.0   |
| Argentina . . . | 19.1                | 14.0       | 33.1  | 22.4         | 23.0       | 45.4  |
| Uruguay . . .   | 4.2                 | 5.0        | 9.2   | 5.5          | 6.5        | 12.0  |
| Brazil . . .    | 13.7                | 15.3       | 29.0  | 16.0         | 19.0       | 35.0  |
| Total . . .     | 54.1                | 51.7       | 105.8 | 64.9         | 73.6       | 138.5 |

Venezuela exports yearly 1 ton of gold in bars, value £140,000, besides 70,000 tons of coffee, worth £3,500,000. Colombia also exports 20,000 tons of coffee. The trade of Peru, Bolivia, and Paraguay is insignificant.

## CHILE

Imports are of a mixed character, and not precisely classified. Exports in 1890 and 1895 were as follows:—

|                | Value, £  |            | Tons      |
|----------------|-----------|------------|-----------|
|                | 1890      | 1895       | 1895      |
| Nitre . . .    | 4,500,000 | 7,200,000  | 1,200,000 |
| Minerals . . . | 1,800,000 | 2,100,000  | 250,000   |
| Grain . . .    | 200,000   | 300,000    | 80,000    |
| Sundries . . . | 2,000,000 | 1,400,000  | —         |
| Total . . .    | 8,500,000 | 11,000,000 | —         |

The countries trading with Chile in 1890 and 1895 were:—

|                   | Millions £ |      | Ratio |       |
|-------------------|------------|------|-------|-------|
|                   | 1890       | 1895 | 1890  | 1895  |
| Great Britain . . | 9.1        | 12.8 | 53.5  | 58.2  |
| Germany . . .     | 2.6        | 3.8  | 15.3  | 17.3  |
| Various . . .     | 5.3        | 5.4  | 31.2  | 24.5  |
| Total . . .       | 17.0       | 22.0 | 100.0 | 100.0 |

The countries trading with Argentina were :—

|                        | Millions £ Sterling |             |             |              |             |             |
|------------------------|---------------------|-------------|-------------|--------------|-------------|-------------|
|                        | 1886                |             |             | 1896         |             |             |
|                        | Imports from        | Exports to  | Total       | Imports from | Exports to  | Total       |
| Great Britain . . .    | 6.7                 | 2.0         | 8.7         | 8.9          | 2.9         | 11.8        |
| France . . . . .       | 3.4                 | 4.5         | 7.9         | 2.4          | 4.7         | 7.1         |
| Germany . . . . .      | 1.6                 | 1.4         | 3.0         | 2.8          | 2.7         | 5.5         |
| Belgium . . . . .      | 1.5                 | 2.2         | 3.7         | 1.7          | 2.4         | 4.1         |
| Italy . . . . .        | 0.9                 | 0.5         | 1.4         | 2.3          | 0.8         | 3.1         |
| Various . . . . .      | 5.0                 | 3.4         | 8.4         | 4.3          | 9.5         | 13.8        |
| <b>Total . . . . .</b> | <b>19.1</b>         | <b>14.0</b> | <b>33.1</b> | <b>22.4</b>  | <b>23.0</b> | <b>45.4</b> |

The ratios of trade corresponding to the various countries show thus :—

| Trade with             | Millions £  |             | Ratio        |              |
|------------------------|-------------|-------------|--------------|--------------|
|                        | 1886        | 1896        | 1886         | 1896         |
| Great Britain . . .    | 8.7         | 11.8        | 26.3         | 26.0         |
| France . . . . .       | 7.9         | 7.1         | 23.9         | 15.7         |
| Germany . . . . .      | 3.0         | 5.5         | 9.1          | 12.1         |
| Belgium . . . . .      | 3.7         | 4.1         | 11.2         | 9.0          |
| Italy . . . . .        | 1.4         | 3.1         | 4.2          | 6.8          |
| Various . . . . .      | 8.4         | 13.8        | 25.3         | 30.4         |
| <b>Total . . . . .</b> | <b>33.1</b> | <b>45.4</b> | <b>100.0</b> | <b>100.0</b> |

France and Belgium have lost ground, while Germany and Italy have gained exceedingly, and Great Britain holds the same ratio as ten years ago.

Trade returns of the republic of Uruguay for 1890 and 1896 compare as follows :—

|                        | Imports, £       |                  |                        | Exports, £       |                  |
|------------------------|------------------|------------------|------------------------|------------------|------------------|
|                        | 1890             | 1896             |                        | 1890             | 1896             |
| Comestibles . . . .    | 2,400,000        | 1,500,000        | Wool . . . . .         | 1,700,000        | 2,200,000        |
| Hardware . . . . .     | 1,800,000        | 1,400,000        | Meat . . . . .         | 1,300,000        | 1,700,000        |
| Textiles . . . . .     | 1,200,000        | 1,300,000        | Hides . . . . .        | 2,000,000        | 1,500,000        |
| Sundries . . . . .     | 1,600,000        | 1,300,000        | Sundries . . . . .     | 1,200,000        | 1,100,000        |

#### URUGUAY

The total trade, imports and exports, with the various nations in 1886 and 1896 was as follows :—

|                        | £ Sterling       |                   | Ratio        |              |
|------------------------|------------------|-------------------|--------------|--------------|
|                        | 1886             | 1896              | 1886         | 1896         |
| G. Britain . . . . .   | 2,300,000        | 2,000,000         | 25.0         | 16.7         |
| Brazil . . . . .       | 1,300,000        | 1,600,000         | 14.1         | 15.8         |
| Argentina . . . . .    | 400,000          | 1,800,000         | 4.4          | 15.0         |
| France . . . . .       | 1,300,000        | 1,600,000         | 14.1         | 13.3         |
| Germany . . . . .      | 500,000          | 1,100,000         | 5.4          | 9.2          |
| Various . . . . .      | 3,400,000        | 3,600,000         | 37.0         | 30.0         |
| <b>Total . . . . .</b> | <b>9,200,000</b> | <b>12,000,000</b> | <b>100.0</b> | <b>100.0</b> |

There has been a great increase of trade with Germany, Brazil, and Argentina, while Great Britain has lost ground.

#### EGYPT

Trade returns show an increase of 27 per cent. in ten years, viz. :—

| Year           | Imports, £ | Exports, £ | Total, £   |
|----------------|------------|------------|------------|
| 1886 . . . . . | 8,100,000  | 10,400,000 | 18,500,000 |
| 1896 . . . . . | 10,100,000 | 13,500,000 | 23,600,000 |

Imports were as follows :—

| Year           | Textiles, £ | Sundries, £ | Total, £   |
|----------------|-------------|-------------|------------|
| 1886 . . . . . | 1,300,000   | 6,800,000   | 8,100,000  |
| 1896 . . . . . | 2,700,000   | 7,400,000   | 10,100,000 |

Exports showed as follows :—

| Year           | Cotton, £  | Sundries, £ | Total, £   |
|----------------|------------|-------------|------------|
| 1886 . . . . . | 7,100,000  | 3,300,000   | 10,400,000 |
| 1896 . . . . . | 10,200,000 | 3,300,000   | 13,500,000 |

The nations trading with Egypt were :—

|              | Imports, £ |            | Exports, £ |            |
|--------------|------------|------------|------------|------------|
|              | 1886       | 1896       | 1886       | 1896       |
| G. Britain . | 3,200,000  | 3,200,000  | 6,600,000  | 7,200,000  |
| France .     | 900,000    | 1,400,000  | 900,000    | 1,300,000  |
| Turkey .     | 1,300,000  | 2,100,000  | 400,000    | 400,000    |
| Various .    | 2,700,000  | 3,400,000  | 2,500,000  | 4,600,000  |
| Total .      | 8,100,000  | 10,100,000 | 10,400,000 | 13,500,000 |

The ratios of trade for the principal countries were :—

|                 | Millions £ |      | Ratio |       |
|-----------------|------------|------|-------|-------|
|                 | 1886       | 1896 | 1886  | 1896  |
| Great Britain . | 9.8        | 10.4 | 53.0  | 44.0  |
| France .        | 1.8        | 2.7  | 9.7   | 11.5  |
| Turkey .        | 1.7        | 2.5  | 9.2   | 10.6  |
| Various .       | 5.2        | 8.0  | 28.1  | 33.9  |
| Total .         | 18.5       | 23.6 | 100.0 | 100.0 |

There is a relative decline in trade with Great Britain, and an increase with France and Turkey.

#### INDIA

The trade of India, excluding precious metals, shows thus :—

| Year       | Imports, £ | Exports, £ | Total, £    |
|------------|------------|------------|-------------|
| 1877 . . . | 33,700,000 | 55,000,000 | 88,700,000  |
| 1887 . . . | 48,800,000 | 68,000,000 | 116,800,000 |
| 1897 . . . | 47,500,000 | 65,000,000 | 112,500,000 |

|                 | Imports, £ |            |
|-----------------|------------|------------|
|                 | 1887       | 1897       |
| Textiles . . .  | 2,200,000  | 20,100,000 |
| Hardware . . .  | 6,100,000  | 8,200,000  |
| Sugar . . .     | 1,600,000  | 2,100,000  |
| Petroleum . . . | 900,000    | 2,100,000  |
| Silk . . .      | 600,000    | 1,400,000  |
| Sundries . . .  | 17,400,000 | 13,600,000 |
| Total . . .     | 48,800,000 | 47,500,000 |

The various countries trading with India were :—

|              | Imports, £ |            | Exports, £ |            |
|--------------|------------|------------|------------|------------|
|              | 1887       | 1897       | 1887       | 1897       |
| G. Britain . | 41,900,000 | 31,500,000 | 26,300,000 | 19,800,000 |
| China .      | 600,000    | 1,400,000  | 2,000,000  | 8,500,000  |
| Germany .    | 100,000    | 1,500,000  | 600,000    | 4,800,000  |
| U. States .  | 1,400,000  | 1,000,000  | 2,500,000  | 3,000,000  |
| Various .    | 4,800,000  | 12,100,000 | 36,600,000 | 28,900,000 |
| Total .      | 48,800,000 | 47,500,000 | 68,000,000 | 65,000,000 |

The ratios of trade for the above countries are shown thus :—

|                 | Millions £ Stg. |      | Ratio |       |
|-----------------|-----------------|------|-------|-------|
|                 | 1887            | 1897 | 1887  | 1897  |
| Great Britain . | 68              | 51   | 58.2  | 45.5  |
| China .         | 3               | 10   | 2.5   | 8.9   |
| Germany .       | 1               | 6    | 0.8   | 5.4   |
| United States . | 4               | 4    | 3.4   | 3.6   |
| Various .       | 41              | 41   | 35.1  | 36.6  |
| Total .         | 117             | 112  | 100.0 | 100.0 |

Trade with Great Britain has declined remarkably, while there has been a prodigious increase in dealings with China and Germany.

The value of both imports and exports has declined in the last ten years, although the Board of Trade Report shows an enormous increase, by fictitiously valuing the rupee at 24, instead of 15, pence. The following table shows the imports and exports for 1887 and 1897 at their real value :—

|                | Exports, £ |            |
|----------------|------------|------------|
|                | 1887       | 1897       |
| Jute . . .     | 4,500,000  | 9,900,000  |
| Cotton . . .   | 10,200,000 | 8,100,000  |
| Rice . . .     | 6,600,000  | 7,500,000  |
| Opium . . .    | 8,400,000  | 5,000,000  |
| Tea . . .      | 3,600,000  | 5,000,000  |
| Sundries . . . | 34,700,000 | 29,500,000 |
| Total . . .    | 68,000,000 | 65,000,000 |

#### CHINA

The principal items of Chinese trade are shown thus :—

|                    | Imports, £ |            |                | Exports, £ |            |
|--------------------|------------|------------|----------------|------------|------------|
|                    | 1886       | 1896       |                | 1886       | 1896       |
| Cotton goods . . . | 7,300,000  | 13,200,000 | Silk . . .     | 7,200,000  | 7,000,000  |
| Opium . . .        | 6,200,000  | 4,800,000  | Tea . . .      | 8,400,000  | 5,000,000  |
| Sundries . . .     | 8,600,000  | 15,700,000 | Sundries . . . | 3,700,000  | 9,800,000  |
| Total . . .        | 22,100,000 | 33,700,000 | Total . . .    | 19,300,000 | 21,800,000 |

Official returns show as follows :—

| Year       | Imports, £ | Exports, £ | Total, £   |
|------------|------------|------------|------------|
| 1876 . . . | 21,600,000 | 24,100,000 | 45,700,000 |
| 1886 . . . | 22,100,000 | 19,300,000 | 41,400,000 |
| 1896 . . . | 33,700,000 | 21,800,000 | 55,500,000 |

There has been no decline of trade with Great Britain, as most of the Hong-Kong trade is British : both together form 60 per cent. of the total, the same as ten years ago.

Adding together imports and exports, the countries trading with China show thus :—

| Trade with          | Millions £ |      | Ratio |       |
|---------------------|------------|------|-------|-------|
|                     | 1886       | 1896 | 1886  | 1896  |
| Hong-Kong . . .     | 14.5       | 24.1 | 35.3  | 43.4  |
| Great Britain . . . | 10.5       | 9.3  | 25.2  | 16.8  |
| Japan . . .         | 1.8        | 4.8  | 4.3   | 8.6   |
| India . . .         | 4.3        | 4.2  | 10.4  | 7.6   |
| United States . . . | 3.5        | 3.8  | 8.4   | 6.8   |
| Various . . .       | 6.8        | 9.3  | 16.4  | 16.8  |
| Total . . .         | 41.4       | 55.5 | 100.0 | 100.0 |

## JAPAN

The principal items of trade of the Japanese empire were :—

|                   | Imports, £ |            |                  | Exports, £ |            |
|-------------------|------------|------------|------------------|------------|------------|
|                   | 1886       | 1896       |                  | 1886       | 1896       |
| Textiles . . . .  | 2,000,000  | 4,100,000  | Silk . . . . .   | 3,300,000  | 3,500,000  |
| Cotton, raw . . . | 100,000    | 3,600,000  | Silk goods . . . | 100,000    | 1,400,000  |
| Sugar . . . . .   | 900,000    | 1,500,000  | Fancy goods . .  | 500,000    | 1,100,000  |
| Hardware . . . .  | 500,000    | 1,300,000  | Coal . . . . .   | 400,000    | 1,000,000  |
| Sundries . . . .  | 2,600,000  | 8,400,000  | Sundries . . . . | 3,600,000  | 6,000,000  |
| Total . . . . .   | 6,100,000  | 18,900,000 | Total . . . . .  | 7,900,000  | 13,000,000 |

Trade has doubled in ten years, viz. :—

|                  | Imports, £ | Exports, £ | Total, £   |
|------------------|------------|------------|------------|
| 1886 . . . . .   | 6,100,000  | 7,900,000  | 14,000,000 |
| 1896 . . . . .   | 18,900,000 | 13,000,000 | 31,900,000 |
| Increase . . . . | 12,800,000 | 5,100,000  | 17,900,000 |

The total trade between Japan and various countries stands thus :—

|                   | £ Sterling |            | Ratio |       |
|-------------------|------------|------------|-------|-------|
|                   | 1886       | 1896       | 1886  | 1896  |
| Great Britain . . | 3,500,000  | 7,500,000  | 25.0  | 23.4  |
| United States . . | 4,000,000  | 5,300,000  | 28.6  | 16.6  |
| China . . . . .   | 1,700,000  | 3,900,000  | 12.1  | 12.2  |
| Hong-Kong . . .   | 1,100,000  | 3,200,000  | 7.8   | 10.0  |
| France . . . . .  | 1,900,000  | 3,000,000  | 13.6  | 9.4   |
| India . . . . .   | 600,000    | 2,900,000  | 4.3   | 9.1   |
| Germany . . . .   | 600,000    | 2,200,000  | 4.3   | 7.1   |
| Various . . . . . | 600,000    | 3,900,000  | 4.3   | 12.2  |
| Total . . . . .   | 14,000,000 | 31,900,000 | 100.0 | 100.0 |

Great Britain and Hong-Kong taken together represent one-third of the whole trade of Japan, the same as ten years ago.

## AUSTRALIA

The nominal amount of trade has been as follows :—

| Year           | Imports, £ | Exports, £ | Total, £    | £ per Inhab. |
|----------------|------------|------------|-------------|--------------|
| 1871 . . . . . | 31,100,000 | 38,400,000 | 69,500,000  | 35.9         |
| 1881 . . . . . | 53,000,000 | 48,700,000 | 101,700,000 | 36.6         |
| 1891 . . . . . | 72,100,000 | 72,700,000 | 144,800,000 | 37.7         |
| 1896 . . . . . | 62,600,000 | 66,600,000 | 129,200,000 | 30.2         |

The above, however, includes local trade, such as between Sydney and Melbourne, and if this were excluded the real transmarine trade of Australia would stand thus :—

| Year           | Imports, £ | Exports, £ | Total, £   | £ per Inhab. |
|----------------|------------|------------|------------|--------------|
| 1871 . . . . . | 16,800,000 | 23,300,000 | 40,100,000 | 20.6         |
| 1881 . . . . . | 33,800,000 | 31,100,000 | 64,900,000 | 23.2         |
| 1891 . . . . . | 41,400,000 | 43,300,000 | 84,700,000 | 21.7         |
| 1896 . . . . . | 34,200,000 | 40,100,000 | 74,300,000 | 17.5         |

The following table shows the ultramarine and inter-colonial trade for 1896 thus :—

|                   | Number (000 omitted) |            |          |                   |          |
|-------------------|----------------------|------------|----------|-------------------|----------|
|                   | Ultramarine          |            |          | Inter-colonial, £ | Total, £ |
|                   | Imports, £           | Exports, £ | Total, £ |                   |          |
| N. S. Wales . . . | 11,000               | 14,600     | 25,600   | 18,000            | 43,600   |
| Victoria . . . .  | 8,300                | 8,800      | 17,100   | 11,700            | 28,800   |
| N. Zealand . . .  | 6,000                | 8,100      | 14,100   | 2,400             | 16,500   |
| Queensland . . .  | 2,800                | 3,700      | 6,500    | 8,100             | 14,600   |
| S. Australia . .  | 3,300                | 4,000      | 7,300    | 7,500             | 14,800   |
| Tasmania . . . .  | 400                  | 200        | 600      | 2,100             | 2,700    |
| W. Australia . .  | 2,400                | 700        | 3,100    | 5,100             | 8,200    |
| Total . . . . .   | 34,200               | 40,100     | 74,300   | 54,900            | 129,200  |

The total foreign trade of 20 years ending December 1893 summed up 1336 millions sterling, the several colonies holding the following order :—

|                   | Millions £ Sterling |         |       | Ratio |
|-------------------|---------------------|---------|-------|-------|
|                   | Imports             | Exports | Total |       |
| Victoria . . . .  | 233                 | 201     | 434   | 32.5  |
| N. S. Wales . . . | 220                 | 191     | 411   | 30.8  |
| New Zealand . .   | 112                 | 116     | 228   | 17.1  |
| S. Australia . .  | 67                  | 76      | 143   | 10.7  |
| Queensland . . .  | 46                  | 40      | 86    | 6.4   |
| Tasmania . . . .  | 11                  | 8       | 19    | 1.4   |
| W. Australia . .  | 7                   | 8       | 15    | 1.1   |
| Total . . . . .   | 696                 | 640     | 1,336 | 100.0 |

The total trade, imports and exports, between Australia and other countries was as follows :—

| With                | £ Sterling Yearly |            | Ratio   |         |
|---------------------|-------------------|------------|---------|---------|
|                     | 1881-85           | 1891-95    | 1881-85 | 1891-95 |
| Great Britain . .   | 56,800,000        | 54,800,000 | 79.4    | 77.1    |
| British Colonies .  | 6,200,000         | 3,500,000  | 8.7     | 4.9     |
| Other countries . . | 8,500,000         | 12,900,000 | 11.9    | 18.0    |
| Total . . . . .     | 71,500,000        | 71,200,000 | 100.0   | 100.0   |

The trade with foreign countries increases rapidly, while that with British colonies declines.

Imports cannot be classified, as they are mixed up with local or intercolonial trade. The principal exports are wool and gold, which averaged yearly as follows:—

| Year        | Wool,<br>Million<br>Lbs. | Value, £   | Gold,<br>Tons | £         |
|-------------|--------------------------|------------|---------------|-----------|
| 1871-80 . . | 282                      | 14,900,000 | 52            | 7,300,000 |
| 1881-90 . . | 422                      | 17,900,000 | 43            | 6,100,000 |
| 1891-95 . . | 658                      | 22,600,000 | 56            | 7,800,000 |
| 1896 . . .  | 678                      | 20,600,000 | 63            | 8,800,000 |

## SOUTH AFRICA

The aggregate trade, imports and exports, showed:—

| With                | £ Sterling |            | Ratio |       |
|---------------------|------------|------------|-------|-------|
|                     | 1885       | 1896       | 1885  | 1896  |
| Great Britain . .   | 11,500,000 | 18,200,000 | 91.0  | 82.7  |
| Other countries . . | 1,100,000  | 3,700,000  | 9.0   | 17.3  |
| Total . . .         | 12,600,000 | 21,900,000 | 100.0 | 100.0 |

Trade between South Africa and the United States has quadrupled in 10 years.

The nominal trade returns of Cape Colony and Natal show thus:—

|                   | Cape, £    | Natal, £  | Total, £   |
|-------------------|------------|-----------|------------|
| Imports, 1876 . . | 5,500,000  | 1,000,000 | 6,500,000  |
| " 1886 . . .      | 3,800,000  | 1,300,000 | 5,100,000  |
| " 1896 . . .      | 16,900,000 | 5,400,000 | 22,300,000 |
| Exports, 1876 . . | 3,500,000  | 700,000   | 4,200,000  |
| " 1886 . . .      | 3,600,000  | 800,000   | 4,400,000  |
| " 1896 . . .      | 16,700,000 | 1,800,000 | 18,500,000 |

Thus it would appear that the aggregate imports and exports of 1896 were 41 millions sterling, against 9½ in 1886. This is, however, a deception, which arises from the transit trade of the Transvaal or South African Republic being included. The real trade in 1895 was as follows:—

|                 | Imports, £ | Exports, £ | Total, £   |
|-----------------|------------|------------|------------|
| Cape . . . . .  | 8,300,000  | 8,900,000  | 17,200,000 |
| Natal . . . . . | 3,600,000  | 1,100,000  | 4,700,000  |
| Total . . . . . | 11,900,000 | 10,000,000 | 21,900,000 |

Considering both these colonies as one, the principal items of South African trade may be summed up thus:—

|                    | Imports, £ |            |                    | Exports, £ |            |
|--------------------|------------|------------|--------------------|------------|------------|
|                    | 1885       | 1896       |                    | 1885       | 1896       |
| Textiles . . . . . | 1,800,000  | 3,600,000  | Diamonds . . . . . | 2,500,000  | 4,800,000  |
| Hardware . . . . . | 500,000    | 2,800,000  | Wool . . . . .     | 1,900,000  | 2,900,000  |
| Sundries . . . . . | 3,900,000  | 5,500,000  | Sundries . . . . . | 2,000,000  | 2,300,000  |
| Total . . . . .    | 6,200,000  | 11,900,000 | Total . . . . .    | 6,400,000  | 10,000,000 |

## ALGERIA

Returns for 1896 compare with those of 1883 thus:—

| Year           | Imports, £ | Exports, £ | Total £    |
|----------------|------------|------------|------------|
| 1883 . . . . . | 9,400,000  | 6,400,000  | 15,800,000 |
| 1896 . . . . . | 10,800,000 | 9,200,000  | 20,000,000 |

The trade of 1895 was as follows:—

| Imports, £         |            | Exports, £         |            |
|--------------------|------------|--------------------|------------|
| Textiles . . . . . | 2,500,000  | Wine . . . . .     | 3,500,000  |
| Hardware . . . . . | 700,000    | Grain . . . . .    | 2,200,000  |
| Coffee . . . . .   | 400,000    | Meat . . . . .     | 2,100,000  |
| Sundries . . . . . | 6,600,000  | Sundries . . . . . | 3,600,000  |
| Total . . . . .    | 10,200,000 | Total . . . . .    | 11,400,000 |

The countries trading with Algeria in 1896 were:—

|                     | Imports<br>from | Exports<br>to | Total,<br>£ | Ratio |
|---------------------|-----------------|---------------|-------------|-------|
| France . . . . .    | 8,700,000       | 7,800,000     | 16,500,000  | 82.5  |
| Great Britain . . . | 200,000         | 500,000       | 700,000     | 3.5   |
| Various . . . . .   | 1,900,000       | 900,000       | 2,800,000   | 14.0  |
| Total . . . . .     | 10,800,000      | 9,200,000     | 20,000,000  | 100.0 |

## BRITISH WEST INDIES

This group of minor colonies includes British Guiana, Jamaica, Trinidad, Barbadoes and several small islands. The average trade of 5 years ending December 1895 compares with that of the period ending 1885 thus:—

|                   | £ Sterling yearly |           |            |
|-------------------|-------------------|-----------|------------|
|                   | Imports           | Exports   | Total      |
| 1881-85 . . . . . | 6,700,000         | 7,400,000 | 14,100,000 |
| 1891-95 . . . . . | 6,900,000         | 6,900,000 | 13,800,000 |

A valuable trade has sprung up to supply American cities with tropical fruit, Jamaica alone exporting bananas and oranges worth £500,000 yearly to the United States. The countries trading with this group of colonies show thus:—

| Trade with          | £ Sterling |            | Ratio |       |
|---------------------|------------|------------|-------|-------|
|                     | 1886       | 1896       | 1886  | 1896  |
| Great Britain . . . | 5,800,000  | 6,700,000  | 43.6  | 41.9  |
| United States . . . | 4,400,000  | 5,800,000  | 33.1  | 36.2  |
| Various . . . . .   | 3,100,000  | 3,500,000  | 23.3  | 21.9  |
| Total . . . . .     | 13,300,000 | 16,000,000 | 100.0 | 100.0 |

The tendency is towards an increase of trade with the United States, and a decline in dealings with Great

Britain and the rest of the world. For the trade of other islands see *Colonies*.

The principal export is sugar, viz. :—

|                | Annual Average, £ |           |
|----------------|-------------------|-----------|
|                | 1881-85           | 1891-95   |
| Sugar . . .    | 4,730,000         | 3,430,000 |
| Sundries . . . | 2,670,000         | 3,470,000 |
| Total . . .    | 7,400,000         | 6,900,000 |

The decline as regards sugar is mainly owing to the fall in price, the average in the second term having been £13 per ton, against £16½ in the first. Shipments of sugar have been as follows :—

|                     | Tons    |         |         |
|---------------------|---------|---------|---------|
|                     | 1885    | 1890    | 1895    |
| Guiana . . .        | 96,000  | 105,000 | 101,000 |
| Trinidad . . .      | 64,000  | 51,000  | 55,000  |
| Barbadoes . . .     | 57,000  | 74,000  | 33,000  |
| Jamaica . . .       | 25,000  | 19,000  | 19,000  |
| Small islands . . . | 48,000  | 49,000  | 29,000  |
| Total . . .         | 290,000 | 298,000 | 237,000 |

### CONSOLS

Quotations since 1880 have been as follows :—

| Year          | Highest | Lowest | Average |
|---------------|---------|--------|---------|
| 1881-85 . . . | 102.4   | 96.3   | 100.4   |
| 1886-90 . . . | 103.2   | 94.6   | 99.6    |
| 1891 . . .    | 97.6    | 94.8   | 95.7    |
| 1892 . . .    | 97.5    | 95.7   | 96.7    |
| 1893 . . .    | 99.0    | 98.0   | 98.5    |
| 1894 . . .    | 103.1   | 98.8   | 101.1   |
| 1895 . . .    | 107.4   | 104.4  | 106.2   |
| 1896 . . .    | 113.5   | 107.0  | 110.7   |
| 1897 . . .    | 114.0   | 112.1  | 112.4   |

In 1889 the interest was reduced from 3 per cent. to 2½ per cent., which caused quotations to fall from 101 to 98. Allowing for difference of interest, the quotations of 1897 would be equivalent to 122½ for the old Three per Cents.

For quotations from 1740 to 1881 see page 262.

### CO-OPERATION

The number of co-operative societies in the United Kingdom rose from 1273 in 1885 to 1695 in 1895, and their figures compared thus :—

|                  | 1885       | 1895       |
|------------------|------------|------------|
| Members . . .    | 802,000    | 1,440,000  |
| Capital, £ . . . | 10,600,000 | 21,700,000 |
| Sales, £ . . .   | 29,900,000 | 56,600,000 |

Building societies have declined in the same interval, viz. :—

|                   | 1885       | 1895       |
|-------------------|------------|------------|
| Shares, £ . . .   | 34,900,000 | 31,900,000 |
| Deposits, £ . . . | 17,800,000 | 13,100,000 |
| Total . . .       | 52,700,000 | 45,000,000 |

Horace Plunkett began co-operative dairies in Ireland in 1893; their number now reaches 243, with 27,000 members, and the sales of butter in 1897 amounted to a value of £346,000 sterling.

### GERMANY

In May 1897 there were 14,842 societies, viz. : People's banks 9417, agricultural societies 3315, and supply associations 2110. This showed an increase of 1837 societies upon the preceding year. The Popular Banks had 1,430,000 members, of whom 950,000 belonged to Schultz-Delitzsch and 480,000 to Raffeisen societies. Agricultural societies showed an increase of 360 on 1896.

### FRANCE

In 1895 the mutual societies counted 1,540,000 members, with assets £8,700,000, investments £4,200,000, and cash £2,600,000. There were 280 Raffeisen banks.

### ITALY

There are 720 Popular Banks, with 405,000 shareholders, capital £4,600,000, deposits £14,900,000, and discounts £39,700,000.

### BELGIUM

In 1896 there were 417 rural co-operative societies, including 37 Raffeisen banks and 64 joint-stock dairies.

### SWITZERLAND

There are 77 co-operative cattle associations, besides joint-stock dairies in every village.

### AUSTRIA

There are 1250 Raffeisen banks between Austria and Hungary, and 3100 co-operative societies of other kinds, with 1,220,000 members.

### UNITED STATES

In 1893 there were 5840 building societies, with 1,745,000 members, holding a capital of £93,600,000 sterling.

See *Friendly Societies*, p. 737, and *Societies*, p. 542.

### COPPER

Production has more than trebled in 16 years :—

|                     | Tons    |         |         |
|---------------------|---------|---------|---------|
|                     | 1880    | 1890    | 1896    |
| United States . . . | 20,300  | 104,000 | 210,000 |
| Great Britain . . . | 40,000  | 76,000  | 100,000 |
| Spain . . .         | 21,300  | 71,000  | 60,000  |
| Chili . . .         | 20,000  | 20,000  | 20,000  |
| Germany . . .       | 10,100  | 15,000  | 25,000  |
| France . . .        | 5,100   | 8,000   | 10,000  |
| Russia, &c. . .     | 25,200  | 76,000  | 65,000  |
| Total . . .         | 142,000 | 370,000 | 490,000 |

Most of what is produced in Great Britain is from Chilian and other foreign ores or regulus, the quantity of native copper not exceeding 600 tons. The price of bar copper has been as follows per ton :—

|                |      |                |      |                |      |
|----------------|------|----------------|------|----------------|------|
| 1882 . . . . . | £ 72 | 1888 . . . . . | £ 78 | 1893 . . . . . | £ 48 |
| 1885 . . . . . | 48   | 1890 . . . . . | 58   | 1896 . . . . . | 49   |

Great Britain exports 50,000 tons yearly. The copper mines of Spain give employment to 8600 men, who raise 2,700,000 tons of ore, valued at £560,000, being an average of 315 tons per miner, of the value of £65.

See *Metals*, page 773.

### COTTON

Production has been approximately as follows :—

|              | Million Lbs. |            |           |
|--------------|--------------|------------|-----------|
|              | U. States    | India, &c. | The World |
| 1881 . . . . | 3,200        | 900        | 4,100     |
| 1886 . . . . | 3,180        | 1,020      | 4,300     |
| 1891 . . . . | 4,310        | 1,290      | 5,600     |
| 1897 . . . . | 4,400        | 1,500      | 5,900     |

The United States crop was disposed of as follows :—

|              | Million Lbs. |          |          |
|--------------|--------------|----------|----------|
|              | Crop         | Exported | Home Use |
| 1881 . . . . | 3,200        | 2,190    | 1,010    |
| 1886 . . . . | 3,180        | 2,050    | 1,130    |
| 1891 . . . . | 4,310        | 2,880    | 1,430    |
| 1897 . . . . | 4,400        | 3,060    | 1,340    |

Since 1881 the crop has increased 37 per cent., home consumption 33 per cent.

The consumption by latest accounts was as follows :—

|                       | Mil. Lbs. |                       | Mil. Lbs. |
|-----------------------|-----------|-----------------------|-----------|
| Great Britain . . . . | 1,570     | Spain . . . .         | 160       |
| France . . . .        | 400       | India . . . .         | 480       |
| Germany . . . .       | 620       | Japan . . . .         | 160       |
| Russia . . . .        | 430       | Brazil . . . .        | 120       |
| Austria . . . .       | 270       | United States . . . . | 1,340     |
| Italy . . . .         | 240       | Various . . . .       | 110       |

Making a total of 5900 million lbs., or 2,650,000 tons, representing a value of 130 millions sterling. The value of cotton goods manufactured in 1896 reached 360 millions sterling.

### GREAT BRITAIN

The consumption of cotton and the value of exported goods were :—

|                 | Million Lbs. Yearly | Exports Yearly, £ |
|-----------------|---------------------|-------------------|
| 1882-86 . . . . | 1,450               | 72,400,000        |
| 1887-91 . . . . | 1,600               | 71,800,000        |
| 1892-96 . . . . | 1,480               | 65,800,000        |
| 1897 . . . .    | 1,570               | 64,000,000        |

The exports of cotton goods and yarn were as follows :—

| Year         | Yarn, Million Lbs. | Cotton Cloth, Million Yds. | Total Value, £ Sterling |
|--------------|--------------------|----------------------------|-------------------------|
| 1840 . . . . | 118                | 791                        | 24,700,000              |
| 1860 . . . . | 197                | 2,776                      | 52,000,000              |
| 1880 . . . . | 216                | 4,496                      | 75,600,000              |
| 1890 . . . . | 258                | 5,125                      | 74,300,000              |
| 1897 . . . . | 252                | 4,800                      | 64,000,000              |

In 1894 the following estimate of consumption was published :—

|                       | Million Lbs. |         |       |
|-----------------------|--------------|---------|-------|
|                       | 1880         | 1890-93 | 1894  |
| Great Britain . . . . | 1,400        | 1,530   | 1,550 |
| Continent . . . .     | 1,150        | 1,800   | 2,010 |
| United States . . . . | 830          | 1,340   | 1,110 |
| India . . . .         | 120          | 460     | 480   |
| Total . . . .         | 3,500        | 5,220   | 5,150 |

Countries exporting cotton goods (and yarn) were :—

|                       | Millions £ Sterling |      |      |
|-----------------------|---------------------|------|------|
|                       | 1885                | 1890 | 1896 |
| Great Britain . . . . | 67.0                | 74.4 | 63.8 |
| France . . . .        | 4.1                 | 4.4  | 4.7  |
| Germany . . . .       | 4.9                 | 9.4  | 10.0 |
| Switzerland . . . .   | 6.4                 | 6.3  | 5.2  |
| Spain . . . .         | 0.3                 | 1.0  | 1.7  |
| Total . . . .         | 82.7                | 95.5 | 85.4 |

Production and consumption of cotton goods were :—

|                        | Output, Millions £ | Consumption |                    |
|------------------------|--------------------|-------------|--------------------|
|                        |                    | Millions £  | Shillings per Head |
| United Kingdom . . . . | 92.1               | 40.1        | 21                 |
| France . . . .         | 22.4               | 19.8        | 10                 |
| Germany . . . .        | 35.4               | 29.0        | 11                 |
| Russia . . . .         | 20.4               | 20.5        | 4                  |
| Austria . . . .        | 18.4               | 18.3        | 9                  |
| Italy . . . .          | 12.9               | 13.5        | 9                  |
| Spain . . . .          | 8.8                | 7.1         | 8                  |
| Other States . . . .   | 19.6               | 20.7        | 9                  |
| Europe . . . .         | 230.0              | 169.0       | 9                  |
| United States . . . .  | 68.0               | 64.0        | 18                 |
| Total . . . .          | 298.0              | 233.0       | 11                 |

Cotton manufacture in the United Kingdom advanced as follows :—

| Year         | Spindles   | Power-Looms | Operatives |
|--------------|------------|-------------|------------|
| 1870 . . . . | 37,700,000 | 440,000     | 450,000    |
| 1890 . . . . | 44,500,000 | 620,000     | 530,000    |

There was an increase of 18 per cent. both in spindles and operatives. The consumption of raw cotton rose from 450,000 tons in 1870 to 710,000 tons in 1896.

The *Bremen Exchange* publishes the following on the growth of cotton manufacture in five European countries :—

|                     | Spindles  |            | Bales Cotton used |           |
|---------------------|-----------|------------|-------------------|-----------|
|                     | 1887      | 1898       | 1887              | 1898      |
| Germany . . . .     | 5,060,000 | 7,880,000  | 1,010,000         | 1,580,000 |
| Austria . . . .     | 2,070,000 | 3,140,000  | 500,000           | 600,000   |
| Switzerland . . . . | 1,710,000 | 1,710,000  | 100,000           | 100,000   |
| Poland . . . .      | 510,000   | 960,000    | 120,000           | 290,000   |
| Belgium . . . .     | 610,000   | 880,000    | 70,000            | 120,000   |
| Total . . . .       | 9,960,000 | 14,570,000 | 1,800,000         | 2,690,000 |

## CRIME

Tables compiled by Rev. W. D. Morrison (1897) show the ratio of sexes among criminals in various countries thus:—

|                 | Males | Females | Total |
|-----------------|-------|---------|-------|
| England . . . . | 820   | 180     | 1,000 |
| France . . . .  | 850   | 150     | 1,000 |
| Germany . . . . | 819   | 181     | 1,000 |
| Austria . . . . | 848   | 152     | 1,000 |
| Spain . . . .   | 890   | 110     | 1,000 |
| Sweden . . . .  | 864   | 136     | 1,000 |
| Norway . . . .  | 791   | 209     | 1,000 |
| Denmark . . . . | 736   | 264     | 1,000 |
| Mexico . . . .  | 858   | 142     | 1,000 |
| Japan . . . .   | 913   | 87      | 1,000 |
| Average . . . . | 839   | 161     | 1,000 |

The number of persons in prison on a given day in various countries, compared with population, was as follows:—

|                        | Prison Population | Per 100,000 Inhabitants |
|------------------------|-------------------|-------------------------|
| United Kingdom . . . . | 17,800            | 46                      |
| Russia . . . .         | 155,020           | 155                     |
| Finland . . . .        | 2,120             | 85                      |
| Holland . . . .        | 4,010             | 84                      |
| Belgium . . . .        | 4,440             | 70                      |
| Switzerland . . . .    | 3,200             | 107                     |
| Italy . . . .          | 67,420            | 217                     |
| United States . . . .  | 82,330            | 132                     |
| Canada . . . .         | 4,034             | 85                      |
| Australia . . . .      | 6,001             | 150                     |
| India . . . .          | 101,180           | 44                      |
| Cape Colony . . . .    | 3,260             | 310                     |
| Jamaica . . . .        | 1,150             | 164                     |

For France and some other countries there are no returns since 1888. See page 163.

## UNITED KINGDOM

The annual average of committals has been as follows:—

|         | Number Yearly |          |         |            | Per Million Inhab. |          |         |            |
|---------|---------------|----------|---------|------------|--------------------|----------|---------|------------|
|         | England       | Scotland | Ireland | U. Kingdom | England            | Scotland | Ireland | U. Kingdom |
| 1880-89 | 14,100        | 2,450    | 3,320   | 19,870     | 522                | 647      | 665     | 555        |
| 1890-94 | 12,070        | 2,330    | 2,190   | 16,590     | 410                | 574      | 470     | 435        |
| 1895-96 | 11,480        | 2,070    | 1,920   | 15,470     | 374                | 496      | 480     | 392        |

*Convicted.*

|         |        |       |       |        |     |     |     |     |
|---------|--------|-------|-------|--------|-----|-----|-----|-----|
| 1880-89 | 10,800 | 1,910 | 1,760 | 14,470 | 401 | 248 | 348 | 404 |
| 1890-94 | 9,470  | 1,860 | 1,300 | 12,630 | 322 | 460 | 280 | 331 |
| 1895-96 | 8,860  | 1,680 | 1,205 | 11,745 | 290 | 403 | 264 | 299 |

In 1895-96 the ratio of convictions to committals was 77 per cent. in England, 81 in Scotland, and 63 per cent. in Ireland.

The prison population of the three kingdoms has been as follows:—

|                        | Number |        | Per 100,000 Pop. |      |
|------------------------|--------|--------|------------------|------|
|                        | 1880   | 1893   | 1880             | 1893 |
| England . . . .        | 19,835 | 13,178 | 76               | 44   |
| Scotland . . . .       | 2,616  | 2,196  | 71               | 54   |
| Ireland . . . .        | 2,620  | 2,428  | 50               | 53   |
| United Kingdom . . . . | 25,071 | 17,802 | 71               | 46   |

The diminution of crime is in great measure attributed to the action of reformatories (see page 799).

## FRANCE

The number of convictions yearly, assize and correctional, was as follows:—

|                 | Annual Average |          |         | Per 100,000 Inhab. |
|-----------------|----------------|----------|---------|--------------------|
|                 | Crimes         | Offences | Total   |                    |
| 1871-80 . . . . | 3,650          | 128,850  | 132,500 | 358                |
| 1883-87 . . . . | 3,105          | 203,295  | 206,400 | 543                |
| 1889-94 . . . . | 2,916          | 218,854  | 221,770 | 576                |

The above does not include misdemeanours tried at the police courts, which averaged 440,200 convictions yearly in 1889-94. It is observed that professional criminals of the worst type, such as murderers and burglars, show an increasing ratio: they are termed "recidivists," and their ratio in the records of crime has risen from 41 per cent. in 1870 to 48 in 1880, to 57 in 1889, and to 58 per cent. of all criminals tried at assize in 1893.

## GERMANY

The returns for 1895 compare with those of 1886 as follows:—

|               | Convicted |         | Per 100,000 Inh. |      |
|---------------|-----------|---------|------------------|------|
|               | 1886      | 1895    | 1886             | 1895 |
| Men . . . .   | 291,400   | 377,200 | 612              | 725  |
| Women . . . . | 61,600    | 77,000  | 129              | 148  |
| Total . . . . | 353,000   | 454,200 | 741              | 873  |

The number of recidivists, or professional criminals, and of juvenile offenders (under 18) are shown thus:—

|                     | Number  |         | Per 1000 Convicts |      |
|---------------------|---------|---------|-------------------|------|
|                     | 1886    | 1895    | 1886              | 1895 |
| Recidivists . . . . | 102,800 | 172,200 | 290               | 378  |
| Juveniles . . . .   | 31,510  | 44,380  | 89                | 98   |

Both these classes are rapidly increasing: the former have increased 70 per cent., the latter 40 per cent., in 9 years, while population has risen only 10 per cent.

## RUSSIA

The prison population in 1893 compared with that of 1887 thus:—

|                   | In Jail |         | Per 100,000 Pop. |      |
|-------------------|---------|---------|------------------|------|
|                   | 1887    | 1893    | 1887             | 1893 |
| In Russia . . . . | 75,350  | 116,380 | 84               | 116  |
| „ Siberia . . . . | 33,490  | 38,640  | 37               | 39   |
| Total . . . .     | 108,840 | 155,020 | 121              | 155  |

About 30,000 persons are exiled yearly to Siberia, some of whom are put in chain-gangs for working the gold mines, others are sent to the island of Saghalien, north of China, and established as farmers. Of the prisoners in Russia, 90 per cent. are males, 10 per cent. females; 80 per cent. convicts, 20 per cent. untried.

## AUSTRIA

The record for 1894 (Austria proper) compares with that of 1886 thus:—

|                | Convictions |         | Per 100,000 Pop. |       |
|----------------|-------------|---------|------------------|-------|
|                | 1886        | 1894    | 1886             | 1894  |
| Crimes . . .   | 29,710      | 30,130  | 129              | 123   |
| Offences . . . | 558,440     | 532,770 | 2,428            | 2,174 |
| Total . . .    | 588,150     | 562,900 | 2,557            | 2,297 |

The number of criminals undergoing penal servitude in 1894 was 10,270, or 420 per million of the population, against 490 in 1886. There are 4000 juvenile offenders in reformatories.

## HUNGARY

The returns for 1886 and 1896 were as follows:—

| Court              | Convictions |        | Per 100,000 Pop. |      |
|--------------------|-------------|--------|------------------|------|
|                    | 1886        | 1896   | 1886             | 1896 |
| Assize . . .       | 20,210      | 10,580 | 125              | 57   |
| Correctional . . . | 95,090      | 78,760 | 595              | 426  |
| Total . . .        | 115,300     | 89,340 | 720              | 483  |

This does not include cases tried at the police courts, which number about 250,000 per annum.

## ITALY

The returns for 1885 and 1895 showed as follows:—

| Court              | Convictions |         | Per 100,000 Pop. |       |
|--------------------|-------------|---------|------------------|-------|
|                    | 1885        | 1895    | 1885             | 1895  |
| Assize . . .       | 5,140       | 3,604   | 17               | 12    |
| Correctional . . . | 53,100      | 78,030  | 177              | 252   |
| Police . . .       | 273,470     | 278,656 | 934              | 898   |
| Total . . .        | 331,710     | 360,290 | 1,128            | 1,162 |

The crimes on which convictions were obtained were:—

|                      | Number  |         | Per 1000 Convicts |       |
|----------------------|---------|---------|-------------------|-------|
|                      | 1885    | 1895    | 1885              | 1895  |
| Homicide . . .       | 2,445   | 2,286   | 8                 | 6     |
| Assault . . .        | 61,400  | 62,730  | 185               | 174   |
| Robbery, &c. . .     | 52,520  | 55,390  | 160               | 154   |
| Minor offences . . . | 215,345 | 239,884 | 647               | 666   |
| Total . . .          | 331,710 | 360,290 | 1,000             | 1,000 |

Prison population, including reformatories, showed:—

| In                    | Number |        | Per 100,000 Pop. |      |
|-----------------------|--------|--------|------------------|------|
|                       | 1885   | 1895   | 1885             | 1895 |
| Prison . . .          | 30,130 | 34,790 | 102              | 112  |
| Reformatories . . .   | 5,520  | 6,320  | 19               | 20   |
| Penal servitude . . . | 34,720 | 32,630 | 119              | 105  |
| Total . . .           | 70,370 | 73,740 | 240              | 237  |

Of the prison population 91 per cent. are males, and of those in penal servitude 95 per cent.

## NORWAY

The returns for 1887 and 1894 compare thus:—

|                | Convictions |        | Per 100,000 Pop. |       |
|----------------|-------------|--------|------------------|-------|
|                | 1887        | 1894   | 1887             | 1894  |
| Crimes . . .   | 2,930       | 2,950  | 150              | 145   |
| Offences . . . | 22,660      | 28,820 | 1,155            | 1,415 |
| Total . . .    | 25,590      | 31,770 | 1,305            | 1,560 |

## DENMARK

The returns for 1890 and 1885 compare as follows:—

| Year           | Convictions | Per 100,000 Pop. |
|----------------|-------------|------------------|
| 1885 . . . . . | 3,525       | 168              |
| 1890 . . . . . | 3,897       | 177              |

In 1890 there were 73 per cent. of the convicts males, against 75 per cent. in 1885.

## HOLLAND

The number of convictions was as follows:—

| Court                  | Convictions |         | Per 100,000 Pop. |       |
|------------------------|-------------|---------|------------------|-------|
|                        | 1885        | 1895    | 1885             | 1895  |
| Assize . . . . .       | 727         | 1,330   | 17               | 28    |
| Correctional . . . . . | 15,080      | 16,070  | 351              | 338   |
| Local . . . . .        | 67,583      | 86,990  | 1,572            | 1,824 |
| Total . . . . .        | 83,390      | 104,390 | 1,940            | 2,190 |

The convictions showed 90 per cent. males. The prison population, including reformatories, in December 1896 was 4010, equal to 84 per 100,000 population, exclusive of asylums for drunkards and vagrants, which had 3600 inmates.

## BELGIUM

Excluding police courts and reformatories, the records show:—

| Year       | Convictions | Per 100,000 Population | In Prison | Per 100,000 Population |
|------------|-------------|------------------------|-----------|------------------------|
| 1870 . . . | 22,360      | 447                    | 4,700     | 94                     |
| 1880 . . . | 34,245      | 623                    | 3,705     | 67                     |
| 1890 . . . | 40,370      | 666                    | 4,280     | 71                     |
| 1894 . . . | 44,910      | 713                    | 4,440     | 70                     |

## SWITZERLAND

In 1895 the prison population was 3200, equal to 107 per 100,000 of the population, 85 per cent. being males.

## SERVIA

The returns for 1894 compare with 1887 as follows:—

|                 | Number |        | Per 100,000 Pop. |      |
|-----------------|--------|--------|------------------|------|
|                 | 1887   | 1894   | 1887             | 1894 |
| Accused . . .   | 7,540  | 12,590 | 360              | 550  |
| Acquitted . . . | 1,840  | 9,010  | 88               | 392  |
| Convicted . . . | 5,700  | 3,580  | 272              | 158  |

## FINLAND

The records for 1892 show as follows:—

|                  | Convictions | Per 100,000 Pop. |
|------------------|-------------|------------------|
| Crimes . . . .   | 2,710       | 113              |
| Offences . . . . | 14,740      | 614              |
| Total . . . .    | 17,450      | 727              |

The prison population in December 1894 was 2120, equal to 85 per 100,000 inhabitants.

## UNITED STATES

The prison population was as follows:—

|                | Number | Per 100,000 Inhabitants |
|----------------|--------|-------------------------|
| 1870 . . . . . | 32,900 | 88                      |
| 1880 . . . . . | 59,260 | 118                     |
| 1890 . . . . . | 82,330 | 132                     |

The ratio of criminals and offenders is higher among foreigners than American whites, viz:—

|                      | Number |        | Per 100,000 |      |
|----------------------|--------|--------|-------------|------|
|                      | 1880   | 1890   | 1880        | 1890 |
| Amer. Whites . . . . | 29,370 | 39,730 | 80          | 87   |
| Coloured . . . . .   | 16,980 | 25,020 | 255         | 334  |
| Foreigners . . . . . | 12,910 | 17,580 | 193         | 190  |
| Total . . . . .      | 59,260 | 82,330 | 118         | 132  |
| Males . . . . .      | 54,190 | 75,920 | 213         | 237  |
| Females . . . . .    | 5,070  | 6,410  | 21          | 21   |

The increase of crime among the coloured population is remarkable. If we deduct from the population all children under 10, the comparison as regards criminals will stand thus for 1890:—

|                         | Pop. over 10 | Criminals | Per 100,000 |
|-------------------------|--------------|-----------|-------------|
| American Whites . . . . | 33,150,000   | 39,730    | 120         |
| Coloured . . . . .      | 5,480,000    | 25,020    | 455         |
| Foreigners . . . . .    | 8,780,000    | 17,580    | 200         |
| Total . . . . .         | 47,410,000   | 82,330    | 173         |

The prison population of the United States is higher than in most European countries. The number of prisoners charged with homicide was as follows:—

| States              | Number |       | Per Million Pop. |      |
|---------------------|--------|-------|------------------|------|
|                     | 1880   | 1890  | 1880             | 1890 |
| New England . . . . | 197    | 248   | 49               | 53   |
| Middle . . . . .    | 636    | 939   | 54               | 66   |
| South . . . . .     | 2,023  | 3,532 | 132              | 193  |
| Prairie . . . . .   | 1,269  | 1,796 | 73               | 80   |
| Pacific . . . . .   | 483    | 836   | 273              | 276  |
| Union . . . . .     | 4,608  | 7,351 | 92               | 117  |

Homicide, compared with population, is three times as frequent in the Southern, and four times as frequent in the Pacific, as in the Eastern States, which shows that Prof. Lombroso's theory of civilisation causing an increase of murder is unfounded.

## JAVA

The returns for 1882 and 1894 compared as follows:—

| Year         | Convictions |          |        | Per 100,000 Pop. |
|--------------|-------------|----------|--------|------------------|
|              | Crimes      | Offences | Total  |                  |
| 1882 . . . . | 11,700      | 6,670    | 18,370 | 810              |
| 1894 . . . . | 11,170      | 8,470    | 19,640 | 780              |

## AUSTRALIA

The records for 1894 show as follows:—

|                      | Convictions |        |         | Per 10,000 Pop. |
|----------------------|-------------|--------|---------|-----------------|
|                      | Grave       | Slight | Total   |                 |
| N. S. Wales . . . .  | 10,120      | 36,090 | 46,210  | 361             |
| Victoria . . . . .   | 6,020       | 21,100 | 27,120  | 230             |
| N. Zealand . . . .   | 3,910       | 8,700  | 12,610  | 180             |
| Queensland . . . .   | 4,280       | 7,530  | 11,810  | 257             |
| S. Australia . . . . | 1,235       | 4,745  | 5,980   | 168             |
| Tasmania . . . . .   | 1,275       | 2,465  | 3,740   | 234             |
| W. Australia . . . . | 1,540       | 2,860  | 4,400   | 440             |
| Total . . . . .      | 28,380      | 83,490 | 111,870 | 266             |

The number of crimes for which convictions were obtained before the Superior Courts were for all seven colonies in the aggregate thus:—

|                | Number | Per 100,000 Pop. |
|----------------|--------|------------------|
| 1871 . . . . . | 1,622  | 86               |
| 1881 . . . . . | 2,085  | 76               |
| 1894 . . . . . | 2,110  | 50               |

This shows a progressive and healthy decline in the ratio of crime of a grave character.

## CANADA

The returns of crimes and offences were as follows:—

| Year         | Convictions |          |        | Per 100,000 Pop. |
|--------------|-------------|----------|--------|------------------|
|              | Crimes      | Offences | Total  |                  |
| 1884 . . . . | 2,506       | 27,044   | 29,550 | 634              |
| 1888 . . . . | 3,747       | 33,903   | 37,650 | 800              |
| 1892 . . . . | 4,030       | 30,970   | 35,000 | 714              |
| 1896 . . . . | 5,204       | 32,076   | 37,280 | 730              |

The provinces showed as follows in 1886 and 1896:—

|                       | Convictions |        | Per 100,000 Souls |      |
|-----------------------|-------------|--------|-------------------|------|
|                       | 1886        | 1896   | 1886              | 1896 |
| Ontario . . . . .     | 19,170      | 16,890 | 960               | 767  |
| Quebec . . . . .      | 7,850       | 10,740 | 555               | 786  |
| Nova Scotia . . . .   | 1,540       | 3,500  | 350               | 777  |
| New Brunswick . . .   | 2,180       | 2,300  | 680               | 720  |
| Other provinces . . . | 3,130       | 3,850  | 870               | 710  |
| Total . . . . .       | 33,870      | 37,280 | 736               | 730  |

Convictions were for the following crimes and offences:

|                        | Number |        | Ratio |       |
|------------------------|--------|--------|-------|-------|
|                        | 1886   | 1896   | 1886  | 1896  |
| Homicide . . . . .     | 33     | 13     | 1     | ...   |
| Assault . . . . .      | 704    | 1,105  | 21    | 29    |
| Robbery . . . . .      | 281    | 527    | 8     | 14    |
| Larceny, &c. . . . .   | 2,238  | 3,460  | 66    | 92    |
| Drunkenness . . . .    | 11,160 | 11,160 | 330   | 297   |
| Minor offences . . . . | 19,454 | 21,325 | 574   | 568   |
| Total . . . . .        | 33,870 | 37,590 | 1,000 | 1,000 |

The nationality of criminals and their proportion to the number of each nationality residing in Canada, during 12 years ending December 1895, averaged as follows :—

|                     | Whole No. | Annual Average | Per 100,000 Souls |
|---------------------|-----------|----------------|-------------------|
| Canadians . . .     | 32,950    | 2,746          | 65                |
| English . . .       | 4,210     | 350            | 160               |
| Irish . . .         | 3,245     | 270            | 180               |
| Americans . . .     | 2,655     | 221            | 276               |
| Scotch . . .        | 1,010     | 84             | 80                |
| Foreigners, &c. . . | 4,340     | 363            | ...               |
| Total . . .         | 48,410    | 4,034          | 85                |

If children under 10 were excluded, the ratios would be approximately :—

|                 | Pop. over 10 | Criminals | Per 100,000 |
|-----------------|--------------|-----------|-------------|
| Canadians . . . | 3,020,000    | 2,746     | 91          |
| English . . .   | 210,000      | 350       | 167         |
| Irish . . .     | 142,000      | 270       | 190         |
| Americans . . . | 77,000       | 221       | 287         |
| Scotch . . .    | 102,000      | 84        | 82          |

The ratio for the whole population over 10 years of age would be 111 per 100,000; that for foreigners cannot be ascertained, as 2660 criminals were not classified in the whole period of 12 years. The high ratio of American criminals would indicate that many outlaws from the United States cross into Canada.

#### INDIA

The returns for 1881 and 1895 compare as follows :—

|            | Convictions |          |         | Per 100,000 Pop. |
|------------|-------------|----------|---------|------------------|
|            | Crimes      | Offences | Total   |                  |
| 1881 . . . | 177,000     | 468,000  | 645,000 | 323              |
| 1895 . . . | 178,000     | 667,000  | 845,000 | 367              |

The prison population was as follows :—

|            | Males  | Females | Total   | Per 100,000 Pop. |
|------------|--------|---------|---------|------------------|
| 1881 . . . | 83,430 | 3,890   | 87,320  | 44               |
| 1890 . . . | 86,730 | 3,050   | 89,780  | 41               |
| 1895 . . . | 97,990 | 3,190   | 101,180 | 44               |

In 1895, of convicts for grave crimes, 14 per cent. were recidivists or old offenders.

#### CAPE COLONY

The returns for 1888 and 1896 compared thus :—

|            | Convictions |          |        | Per 100,000 Pop. |
|------------|-------------|----------|--------|------------------|
|            | Crimes      | Offences | Total  |                  |
| 1888 . . . | 1,408       | 39,172   | 40,580 | 4,660            |
| 1896 . . . | 2,400       | 48,810   | 51,210 | 4,860            |

The prison population was as follows :—

|            | Males | Females | Total | Per 100,000 Pop. |
|------------|-------|---------|-------|------------------|
| 1888 . . . | 2,032 | 200     | 2,232 | 260              |
| 1896 . . . | 2,924 | 336     | 3,260 | 310              |

The ratio of persons in jail to population is remarkably high.

#### ALGERIA

The records for 1893 compare with 1886 as follows :—

|            | Convictions |          |        | Per 100,000 Pop. |
|------------|-------------|----------|--------|------------------|
|            | Crimes      | Offences | Total  |                  |
| 1886 . . . | 12,410      | 59,980   | 72,390 | 1,910            |
| 1893 . . . | 22,750      | 60,660   | 83,410 | 1,980            |

Under the head of offences are included minor police court cases.

#### JAMAICA

Returns for 1887 and 1897 were as follows :—

|            | Convictions |          |        | Per 100,000 Pop. |
|------------|-------------|----------|--------|------------------|
|            | Crimes      | Offences | Total  |                  |
| 1887 . . . | 2,410       | 8,120    | 10,530 | 1,720            |
| 1897 . . . | 4,490       | 11,400   | 15,890 | 2,270            |

The prison population in March 1897 was 1150, equal to 164 per 100,000 inhabitants.

#### CURIOSITIES

A collection of Australian postage stamps, begun in 1872 by Mr. M. Castle, of London, was purchased by Stanley Gibbons in 1897 for £10,000, being £2000 more than the price of the Galliera collection (1880). At a sale in London in 1895, four Mauritius stamps were sold for £210, and one blue Mauritius twopenny stamp for £140. A sale of coins in London in June 1896 realised among others the following prices : farthing of Henry IV., £17; a silver groat, £28; a half-noble, £45; and a half-groat of Edward III., £23. Besides the 35 autographs recorded with their prices at page 172, the following have since been sold :—

The Pretender . £8 | Q. Elizabeth . £6 | Henry VII. . £18  
Henry VIII. . 8 | Wesley . . . 3 | Paul Veronese 19

In March 1898 the bugle used for the Balaklava charge (1855) was sold in London for £750.

#### CURRENTS

The *Times* of December 8, 1896, mentions that on October 9, 1894, the s.s. *Hunter* threw overboard a box containing a letter in

S. lat. 45° 19' 32" : E. long. 63° 59' 15",

which was picked up in July 1896 in

S. lat. 44° 0' 0" ; W. long. 176° 30' 0",

having drifted in a straight line 4791 miles in 20 months 26 days, being at the rate of 7½ miles per day.

In June 1881 was picked up in the Feejee Islands a bottle containing a letter which had been thrown overboard in March 1880 in 4° S. lat. and 119° W. long., having been carried 6700 miles in 455 days, that is, 15 miles a day.

#### CUSTOMS

See *Taxes*, page 811, and page 172.

## D

## DAIRY

The following table shows the production and consumption of butter and cheese, and the approximate number of milch cows:—

|               | Production,<br>Tons | Consumption |                    | Milch<br>Cows |
|---------------|---------------------|-------------|--------------------|---------------|
|               |                     | Tons        | Lbs. per<br>Inhab. |               |
| U. Kingdom    | 200,000             | 510,000     | 28                 | 3,950,000     |
| France . .    | 200,000             | 270,000     | 16                 | 5,020,000     |
| Germany . .   | 300,000             | 440,000     | 17                 | 8,950,000     |
| Russia . .    | 350,000             | 345,000     | 7                  | 10,000,000    |
| Austria . .   | 170,000             | 170,000     | 9                  | 6,000,000     |
| Italy . .     | 145,000             | 85,000      | 6                  | 2,400,000     |
| Spain & Port. | 50,000              | 50,000      | 6                  | 1,200,000     |
| Swed. & Nor.  | 80,000              | 55,000      | 18                 | 2,300,000     |
| Denmark . .   | 60,000              | 20,000      | 20                 | 1,050,000     |
| Holland . .   | 120,000             | 20,000      | 10                 | 900,000       |
| Belgium . .   | 60,000              | 65,000      | 23                 | 800,000       |
| Switzerland   | 70,000              | 30,000      | 22                 | 500,000       |
| Europe . .    | 1,805,000           | 2,060,000   | 13                 | 43,070,000    |
| U. States . . | 610,000             | 580,000     | 18                 | 15,940,000    |
| Canada . .    | 130,000             | 50,000      | 22                 | 1,990,000     |
| Australia . . | 55,000              | 50,000      | 24                 | 1,100,000     |
| Total . .     | 2,600,000           | 2,740,000   | 15                 | 62,100,000    |

The consumption in Holland is probably double what it appears to be, as margarine is largely mixed with what is exported as butter. For the same reason it appears in the above table that the consumption of butter and cheese in the world is 140,000 tons more than production, the difference being evidently ascribable to margarine.

Great Britain consumes more butter and cheese for population than any other country; the consumption (exclusive of Ireland) being over 30 pounds per inhabitant, or nearly twice as much as in France or Germany. See *Food*, page 715.

Bodio's tables for five years ending December 1891 give the annual average death-rate of various countries as follows:—

|                       | Deaths Yearly per 100,000 Population |                   |                  |          |            |         |         |            |           |                   |         |
|-----------------------|--------------------------------------|-------------------|------------------|----------|------------|---------|---------|------------|-----------|-------------------|---------|
|                       | Bronchitis,<br>&c.                   | Diarrhoea,<br>&c. | Consump-<br>tion | Apoplexy | Diphtheria | Measles | Typhoid | Scarlatina | Small-pox | Whooping<br>Cough | Various |
| England . . . . .     | 382                                  | 76                | 229              | 101      | 29         | 47      | 20      | 23         | 1         | 44                | 954     |

| Sweden . . . . .      | ...                                  | 38                | ...              | ...      | 52         | 23      | 22      | 37         | 0         | 17                | 1,447   |
| Italy . . . . .       | 509                                  | 334               | 196              | 107      | 71         | 62      | 78      | 30         | 39        | 35                | 1,214   |
| Average . . . . .     | 375                                  | 119               | 261              | 89       | 63         | 41      | 35      | 24         | 11        | 42                | 1,125   |

The statistics for France refer to the urban population. In the above table Bronchitis includes Pneumonia and similar complaints, Consumption comprises all tubercular diseases, and Diarrhoea includes Cholera and Dysentery, while Diphtheria includes Croup.

## DEATHS

The death-rate of the principal countries, and the saving of life yearly by the reduction of mortality since 1880, owing to improved sanitation and other causes, are shown briefly thus:—

|                        | Deaths per 1000 Pop.<br>Yearly |         |         | Lives<br>Saved<br>Yearly |
|------------------------|--------------------------------|---------|---------|--------------------------|
|                        | 1861-80                        | 1885-90 | 1891-96 |                          |
| England . . . .        | 22.0                           | 18.9    | 18.5    | 103,000                  |
| Scotland . . . .       | ...                            | 18.9    | 18.7    | ...                      |
| Ireland . . . .        | ...                            | 18.0    | 18.1    | ...                      |
| United Kingdom . . . . | ...                            | 18.8    | 18.4    | ...                      |
| France . . . .         | 24.0                           | 21.9    | 22.1    | 73,000                   |
| Prussia . . . .        | 27.1                           | 24.3    | 22.9    | 124,000                  |
| Scandinavia . . . .    | 19.0                           | 17.2    | 17.3    | 16,000                   |
| Austria . . . .        | 30.8                           | 29.0    | 27.6    | 79,000                   |
| Hungary . . . .        | 39.4                           | 32.2    | 31.4    | 145,000                  |
| Italy . . . .          | 29.9                           | 27.3    | 25.5    | 131,000                  |
| Holland . . . .        | 24.6                           | 20.6    | 19.2    | 26,000                   |
| Belgium . . . .        | 22.7                           | 20.7    | 19.9    | 18,000                   |
| Bavaria . . . .        | ...                            | 27.8    | 26.0    | ...                      |
| Wurtemberg . . . .     | ...                            | 24.9    | 25.0    | ...                      |
| Saxony . . . .         | ...                            | 27.7    | 25.2    | ...                      |
| Baden . . . .          | ...                            | 23.5    | 23.0    | ...                      |
| Switzerland . . . .    | ...                            | 20.6    | 20.0    | ...                      |
| Bulgaria . . . .       | ...                            | 18.5    | 28.7    | ...                      |
| Japan . . . .          | ...                            | 21.1    | 21.1    | ...                      |
| Australia . . . .      | 15.6                           | 14.0    | 12.7    | 11,000                   |

Thus in ten countries, of which we can compare death-rates in the last thirty-six years, the diminution of mortality yearly amounts to 726,000 lives; that is to say, the number of deaths in those countries is now 4,712,000, whereas at the rates prevalent down to 1880 they would have been 5,438,000. In other words, taking the ten countries collectively, the span of life has been lengthened 15 per cent.—say 6 years.

The following table shows the number of deaths from certain diseases in 10,000 deaths from all causes :—

|                          | England | Scotland | Ireland | France | Austria | Belgium | Holland | Italy  | Average |
|--------------------------|---------|----------|---------|--------|---------|---------|---------|--------|---------|
| Bronchitis . . . . .     | 2,001   | 1,888    | 1,643   | 1,714  | 1,070   | 2,220   | 1,390   | 1,905  | 1,730   |

| Breslau . . . . .    | 1,600                   | 7,500   | 9,100   | 53                     | 239   | 292   | 18.2                |
| Naples . . . . .     | 2,400                   | 12,800  | 15,200  | 46                     | 255   | 301   | 15.3                |
| Milan . . . . .      | 2,400                   | 8,100   | 10,500  | 64                     | 217   | 281   | 22.7                |
| Turin . . . . .      | 1,600                   | 5,700   | 7,300   | 56                     | 206   | 262   | 21.3                |
| Genoa . . . . .      | 800                     | 4,200   | 5,000   | 44                     | 212   | 256   | 17.2                |
| Florence . . . . .   | 1,100                   | 3,800   | 4,900   | 61                     | 204   | 265   | 23.0                |
| Palermo . . . . .    | 1,400                   | 5,100   | 6,500   | 52                     | 201   | 253   | 20.6                |
| Venice . . . . .     | 900                     | 3,300   | 4,200   | 61                     | 248   | 309   | 19.7                |
| Bologna . . . . .    | 700                     | 3,000   | 3,700   | 54                     | 226   | 280   | 19.3                |
| Trieste . . . . .    | 1,300                   | 3,400   | 4,700   | 82                     | 230   | 312   | 26.2                |
| Brussels . . . . .   | 900                     | 3,200   | 4,100   | 52                     | 192   | 244   | 21.3                |
| Total . . . . .      | 79,500                  | 233,900 | 313,400 | Av. 59                 | 198   | 257   | 23.0                |

It appears that during the said ten years Leipzig, London, and Vienna were the cities of lowest death-rate, while Trieste, Venice, Buda-Pesth, and Naples were the most unhealthy.

## FRIENDLY SOCIETIES

Bertillon's table of death-rates among Friendly Societies published in 1892 shows as follows:—

| Age             | Deaths Yearly per 1,000 |        |       |         |
|-----------------|-------------------------|--------|-------|---------|
|                 | England                 | France | Italy | Average |
| 20-25 . . . .   | 7.4                     | 13.0   | 6.3   | 8.9     |
| 25-30 . . . .   | 7.3                     | 5.4    | 5.9   | 6.2     |
| 30-35 . . . .   | 8.9                     | 6.4    | 6.8   | 7.2     |
| 35-40 . . . .   | 10.9                    | 6.4    | 7.8   | 8.4     |
| 40-45 . . . .   | 12.8                    | 10.2   | 9.2   | 10.7    |
| 45-50 . . . .   | 16.6                    | 11.8   | 11.6  | 13.3    |
| 50-55 . . . .   | 20.5                    | 20.2   | 14.9  | 18.5    |
| 55-60 . . . .   | 29.7                    | 19.5   | 22.2  | 23.8    |
| 60-65 . . . .   | 38.0                    | 40.7   | 32.5  | 37.1    |
| 65-70 . . . .   | 58.4                    | 67.0   | 50.4  | 58.6    |
| General . . . . | 12.1                    | 23.5   | 11.7  | 15.8    |

The table was compiled from observations by Neison, Bertillon, and Bodio, between 1871 and 1889.

## INFANT MORTALITY

The *Statistical Journal* of Paris gives a table of infant mortality in 1895, which compares with one for 1876-80 as follows:—

## Percentage of Infants who Die under Twelve Months.

| 1876-80          |      | 1895 | 1876-80       |      | 1895 |
|------------------|------|------|---------------|------|------|
| Ireland . . . .  | 10.0 | 10.0 | Switzerland   | 18.9 | 19.0 |
| Sweden . . . .   | 12.6 | 10.0 | Roumania . .  | ...  | 20.0 |
| Denmark . . . .  | 15.0 | 14.0 | Holland . . . | 21.1 | 20.0 |
| Greece . . . .   | ...  | 15.0 | Prussia . . . | 20.5 | 21.0 |
| G. Britain . . . | 14.5 | 15.0 | Wurtemberg    | 30.2 | 25.0 |
| France . . . .   | 16.3 | 17.0 | Austria . . . | 24.9 | 25.0 |
| Belgium . . . .  | 17.4 | 17.0 | Bavaria . . . | 29.8 | 27.0 |
| Italy . . . .    | 22.3 | 19.0 | Russia . . .  | 31.2 | 30.0 |

There is an increase of infant mortality in Great Britain, France, and Prussia, but a decline in most other countries. In Great Britain the death-rate of infants is 50 per cent. higher than in Ireland. Official returns in Prussia, for twelve years ending December 1888, show that infant mortality increases as we descend in the social scale; thus of 1000 children born in various classes we find:—

| Class             | Die First Year | Survive |
|-------------------|----------------|---------|
| Affluent . . . .  | 211            | 789     |
| Labourers . . . . | 251            | 749     |
| Servants . . . .  | 332            | 668     |
| Paupers . . . .   | 422            | 578     |

Drysdale (see page 178) gives the rates in England as 110 per thousand in the West-End of London, and 380 among the "slum" population.

The principal causes of death among infants showed the following averages in England and Wales during ten years to December 31, 1890:—

|                     | Deaths Yearly | Ratio |
|---------------------|---------------|-------|
| Inanition . . . .   | 19,490        | 15.6  |
| Convulsions . . . . | 18,140        | 14.5  |
| Bronchitis . . . .  | 16,160        | 13.0  |
| Diarrhoea . . . .   | 11,930        | 9.5   |
| Pneumonia . . . .   | 5,950         | 4.7   |
| Whooping-cough . .  | 5,340         | 4.3   |
| Suffocation . . . . | 1,490         | 1.2   |
| Infanticide . . . . | 103           | 0.1   |
| Various . . . .     | 46,417        | 37.1  |
| Total . . . .       | 125,020       | 100.0 |

As a rule the death-rate of infants under twelve months is eight times as much as that of the general public, in England, viz:—

|                    | Deaths Yearly per 1000 Living. |         |
|--------------------|--------------------------------|---------|
|                    | All Ages                       | Infants |
| Brighton . . . .   | 17                             | 149     |
| Hull . . . .       | 19                             | 165     |
| London . . . .     | 20                             | 158     |
| Birmingham . . .   | 20                             | 176     |
| Bristol . . . .    | 20                             | 149     |
| Leeds . . . .      | 21                             | 172     |
| Sheffield . . . .  | 22                             | 177     |
| Liverpool . . . .  | 24                             | 186     |
| Newcastle . . . .  | 25                             | 174     |
| Manchester . . . . | 29                             | 191     |
| Average . . . .    | 22                             | 170     |

## ENGLAND

The following table shows the death-rate for males and females in England and Wales at various ages in 1891-95 as compared with 1881-85.

| Ages             | Deaths Yearly per 1000 Living |         |         |         |
|------------------|-------------------------------|---------|---------|---------|
|                  | Males                         |         | Females |         |
|                  | 1881-85                       | 1891-95 | 1881-85 | 1891-95 |
| Under 5 . . . .  | 61.3                          | 62.1    | 51.9    | 52.0    |
| 5-10 . . . .     | 5.8                           | 4.5     | 5.7     | 4.5     |
| 10-15 . . . .    | 3.2                           | 2.5     | 3.3     | 2.7     |
| 15-20 . . . .    | 4.5                           | 4.0     | 4.7     | 4.0     |
| 20-25 . . . .    | 6.0                           | 5.3     | 5.9     | 4.8     |
| 25-35 . . . .    | 8.2                           | 7.2     | 7.9     | 6.7     |
| 35-45 . . . .    | 12.8                          | 12.2    | 11.0    | 10.3    |
| 45-55 . . . .    | 19.3                          | 19.8    | 15.2    | 15.3    |
| 55-65 . . . .    | 34.2                          | 36.3    | 28.1    | 29.8    |
| 65-75 . . . .    | 68.7                          | 71.9    | 59.0    | 62.8    |
| 75-85 . . . .    | 145.0                         | 150.0   | 129.0   | 136.0   |
| All ages . . . . | 20.5                          | 19.8    | 18.3    | 17.7    |

As regards infants under 5 years there is not much change. The rates for ages between 5 and 45 show a notable decline, which accounts for the increased death-rates between 55 and 85. A woman's life is much better than a man's at all ages, except from 10 to 15. The death-rate both for males and females in 1891-95 was 3 per cent. less than in 1881-85.

Death-rates for age in English cities during 10 years ending December 1890, gave the following averages per 1000 living:—

| Age             | London     |         | Liverpool |         | Bristol   |         |
|-----------------|------------|---------|-----------|---------|-----------|---------|
|                 | Males      | Females | Males     | Females | Males     | Females |
| Under 5 . . . . | 68.5       | 59.0    | 84.3      | 74.9    | 59.7      | 48.3    |
| 5-15 . . . .    | 4.3        | 4.2     | 6.1       | 5.8     | 3.9       | 3.8     |
| 15-25 . . . .   | 4.6        | 3.9     | 6.0       | 5.2     | 4.8       | 4.3     |
| 25-35 . . . .   | 8.2        | 6.5     | 10.9      | 9.8     | 7.7       | 6.2     |
| 35-45 . . . .   | 14.0       | 10.8    | 17.9      | 15.8    | 12.4      | 10.3    |
| 45-55 . . . .   | 22.2       | 16.3    | 28.5      | 24.0    | 19.6      | 15.1    |
| 55-65 . . . .   | 39.1       | 29.4    | 50.8      | 42.5    | 34.7      | 26.9    |
| 65-75 . . . .   | 74.4       | 60.7    | 94.3      | 80.0    | 72.3      | 57.6    |
|                 | Birmingham |         | Leeds     |         | Sheffield |         |
|                 | Males      | Females | Males     | Females | Males     | Females |
| Under 5 . . . . | 68.2       | 58.7    | 78.0      | 65.2    | 78.6      | 67.2    |
| 5-15 . . . .    | 3.7        | 3.7     | 5.3       | 5.5     | 5.3       | 5.3     |
| 15-25 . . . .   | 4.2        | 4.0     | 5.8       | 5.2     | 5.3       | 5.1     |
| 25-35 . . . .   | 7.7        | 7.0     | 7.7       | 8.1     | 8.4       | 7.7     |
| 35-45 . . . .   | 13.7       | 11.4    | 13.2      | 11.5    | 14.7      | 11.7    |
| 45-55 . . . .   | 21.7       | 17.4    | 23.3      | 18.5    | 25.0      | 17.4    |
| 55-65 . . . .   | 40.9       | 32.0    | 45.5      | 37.0    | 46.8      | 34.8    |
| 65-75 . . . .   | 81.6       | 67.2    | 94.0      | 77.0    | 94.9      | 74.1    |

The following table for England and Wales shows death-rate of males according to professions :—

|                    | Deaths Yearly per 1,000 Living |         |           |         |                       | Deaths Yearly per 1,000 Living |         |           |         |
|--------------------|--------------------------------|---------|-----------|---------|-----------------------|--------------------------------|---------|-----------|---------|
|                    | Age 25-45                      |         | Age 45-65 |         |                       | Age 25-45                      |         | Age 45-65 |         |
|                    | 1860-71                        | 1880-82 | 1860-71   | 1880-82 |                       | 1860-71                        | 1880-82 | 1860-71   | 1880-82 |
| Clergyman . . .    | 6.0                            | 4.6     | 17.3      | 15.9    | Printer . . .         | 13.0                           | 11.1    | 29.4      | 26.6    |
| Farmer . . .       | 7.7                            | 6.1     | 17.3      | 16.5    | Dyer . . .            | 11.2                           | 9.5     | 26.0      | 27.1    |
| Grocer . . .       | 9.5                            | 8.0     | 17.2      | 19.2    | Wool-spinner . . .    | 9.4                            | 9.7     | 23.3      | 27.5    |
| Fisherman . . .    | 11.3                           | 8.3     | 15.8      | 19.7    | Physician . . .       | 13.8                           | 11.6    | 24.6      | 28.0    |
| Schoolmaster . . . | 9.8                            | 6.4     | 23.6      | 19.8    | Cooper . . .          | 11.8                           | 10.6    | 26.1      | 28.6    |
| Bookseller . . .   | 10.8                           | 8.5     | 21.4      | 20.6    | Butcher . . .         | 13.2                           | 12.2    | 28.4      | 29.1    |
| Carpenter . . .    | 9.4                            | 7.8     | 21.4      | 21.7    | Cotton-spinner . . .  | 10.7                           | 10.0    | 27.9      | 29.4    |
| Watchmaker . . .   | 10.8                           | 9.3     | 24.9      | 22.6    | Stone-cutter . . .    | 10.9                           | 10.0    | 28.7      | 31.0    |

#### ACCIDENTAL DEATHS

In England and Wales there are 16,800 persons killed by accident yearly, 70 per cent. being males, 30 females. Considering only males between 25 and 65 years of age, we find:—

##### *Accidental Deaths of 1000 Men who Die*

|                   |                      |                    |
|-------------------|----------------------|--------------------|
| Shoemakers . . 17 | Cotton-spinners . 30 | Blacksmiths . . 49 |
| Tailors . . . 18  | Ploughmen . . 33     | Costermongers . 53 |
| Bakers . . . 21   | Butchers . . 35      | Brewers . . . 64   |
| Printers . . . 24 | C. travellers . 36   | Painters . . . 73  |
| Gardeners . . 24  | Carpenters . 38      | Cab-drivers . . 84 |
| Potters . . . 24  | Publicans . . 45     | Fishermen . . 152  |
| Farmers . . . 30  | Bricklayers . 45     | Miners . . . 190   |

The general average for all males between 25 and 65 is 67 per thousand, from which it appears that miners, fishermen, and cab-drivers have extra hazardous occupations. Accidental deaths in 1891-95 averaged yearly as follows (England and Wales):—

| By                    | Males  | Females | Total  | Per Million |
|-----------------------|--------|---------|--------|-------------|
| Drowning . . . . .    | 2,282  | 414     | 2,696  | 91          |
| Fire . . . . .        | 1,078  | 1,324   | 2,402  | 81          |
| Suffocation . . . . . | 1,160  | 1,034   | 2,194  | 74          |
| Vehicles . . . . .    | 2,122  | 312     | 2,434  | 82          |
| Mines . . . . .       | 1,023  | 1       | 1,024  | 34          |
| Sundry . . . . .      | 4,107  | 1,908   | 6,015  | 202         |
| Total . . . . .       | 11,772 | 4,993   | 16,765 | 564         |

Accidental deaths in Italy during ten years to end of 1896 averaged 10,140 per annum, or 13 per thousand.

As regards Germany and Austria see *Insurance*, page 755. For other countries see page 180.

#### IRELAND AND SCOTLAND

Some of the causes of death in Ireland during ten years ending 1895, and in Scotland for the year 1893, were:—

|                          | Per 100,000 Inhabitants Yearly |          |
|--------------------------|--------------------------------|----------|
|                          | Ireland                        | Scotland |
| Diphtheria . . . . .     | 8                              | 24       |
| Influenza . . . . .      | 25                             | 30       |
| Typhoid . . . . .        | 17                             | 37       |
| Whooping-cough . . . . . | 27                             | 50       |
| Diarrhoea . . . . .      | 32                             | 65       |
| Violent . . . . .        | 40                             | 68       |
| Cancer . . . . .         | 46                             | 69       |
| Measles . . . . .        | 19                             | 90       |
| Phthisis . . . . .       | 213                            | 170      |
| Bronchitis . . . . .     | 314                            | 309      |

Under the last title is also included Pneumonia.

#### WORKMEN'S DWELLINGS

In 1891 was published a table comparing the death-rates of London with those of the Peabody and the Metropolitan Dwellings for Workmen, averaging two years previous, viz.:—

| Disease                  | Deaths Yearly per 100,000 Persons |         |              |
|--------------------------|-----------------------------------|---------|--------------|
|                          | London                            | Peabody | Metropolitan |
| Scarlatina . . . . .     | 23                                | 34      | 22           |
| Measles . . . . .        | 55                                | 104     | 59           |
| Whooping-cough . . . . . | 55                                | 86      | 48           |
| Diarrhoea . . . . .      | 57                                | 56      | 56           |
| Diphtheria . . . . .     | 34                                | 54      | 37           |
| Typhoid . . . . .        | 14                                | 7       | 7            |
| Tubercular . . . . .     | 254                               | 263     | 236          |
| Various . . . . .        | 1,304                             | 1,168   | 1,109        |
| Total . . . . .          | 1,796                             | 1,772   | 1,574        |

Infant mortality under twelve months was 153 per 1000 births in London, 136 in Peabody Buildings, and 121 in the Metropolitan Dwellings, during five years to December 1890.

#### FRANCE

In the years 1890-93 the mortality in France was 40,000 more than in preceding years, apparently due to influenza. The returns were as follows:—

| Period            | Deaths Yearly | Per 1000 Pop. |
|-------------------|---------------|---------------|
| 1885-89 . . . . . | 835,000       | 21.7          |
| 1890-93 . . . . . | 875,000       | 22.8          |

In 1890 there were recorded 38,000 deaths from influenza.

The death-rate of the French army is as follows:—

| <i>Per 1000 Men</i> |                 |                 |  |
|---------------------|-----------------|-----------------|--|
| France . . . 7      | Senegal . . 74  | Tonkin . . 77   |  |
| Algeria . . . 11    | Madagascar . 75 | Cayenne . . 237 |  |

Bertillon's table of male mortality (1892) is as follows for the city of Paris:—

|                     | Deaths Yearly for 1000 Living |       |       |       |
|---------------------|-------------------------------|-------|-------|-------|
|                     | 20-30                         | 30-40 | 40-50 | 50-60 |
| Grocers . . .       | 6.6                           | 7.0   | 8.7   | 11.4  |
| Druggists . . .     | 7.8                           | 9.2   | 11.1  | 15.7  |
| Schoolmasters . . . | 7.0                           | 8.5   | 5.8   | 17.0  |
| Dairymen . . .      | 5.7                           | 9.9   | 11.8  | 17.4  |
| Physicians . . .    | 9.9                           | 11.3  | 9.8   | 21.9  |
| Lawyers . . .       | 9.8                           | 11.6  | 11.1  | 22.8  |
| Watchmakers . . .   | 9.7                           | 14.0  | 14.9  | 24.7  |
| Tanners . . .       | 9.1                           | 10.5  | 15.9  | 26.4  |
| Butchers . . .      | 10.6                          | 14.0  | 22.2  | 27.5  |
| Waggoners . . .     | 17.6                          | 21.5  | 26.7  | 30.4  |
| Clergymen . . .     | 5.0                           | 8.2   | 9.0   | 30.5  |
| Carpenters . . .    | 10.5                          | 18.8  | 24.3  | 30.7  |
| Masons . . .        | 9.5                           | 16.0  | 23.7  | 31.4  |
| Hairdressers . . .  | 14.8                          | 14.2  | 18.1  | 33.2  |
| Shoemakers . . .    | 13.4                          | 19.2  | 20.4  | 35.3  |
| Bakers . . .        | 12.4                          | 16.2  | 24.4  | 39.0  |
| Tailors . . .       | 9.1                           | 11.3  | 23.4  | 39.8  |
| Printers . . .      | 17.8                          | 23.7  | 26.7  | 40.6  |
| Painters . . .      | 14.8                          | 23.0  | 28.8  | 42.0  |
| Cab-drivers . . .   | 16.4                          | 20.5  | 32.0  | 58.0  |
| Average . . .       | 11.1                          | 14.9  | 21.2  | 31.2  |

The heaviest death-rate falls to cab-drivers, painters, printers, tailors, and bakers, and of these classes only cab-drivers and painters are in the same position in the death-rate of England.

#### SWITZERLAND

Tables for four years ending December 1882 show male death-rates thus:—

|                       | Deaths Yearly per 1,000 Living |       |       |       |
|-----------------------|--------------------------------|-------|-------|-------|
|                       | 20-30                          | 30-40 | 40-50 | 50-60 |
| Farmers . . .         | 5.7                            | 7.9   | 12.1  | 21.7  |
| Clergymen . . .       | 7.2                            | 8.2   | 13.1  | 23.0  |
| Schoolmasters . . .   | 6.4                            | 8.7   | 14.8  | 24.3  |
| Cotton-spinners . . . | 8.0                            | 9.3   | 13.3  | 24.9  |
| Printers . . .        | 10.2                           | 14.3  | 16.2  | 27.0  |
| Bakers . . .          | 6.8                            | 11.4  | 15.9  | 28.9  |
| Merchants . . .       | 11.1                           | 14.1  | 18.7  | 29.2  |
| Butchers . . .        | 5.3                            | 17.9  | 21.5  | 29.9  |
| Tailors . . .         | 10.6                           | 11.9  | 17.9  | 30.0  |
| Shoemakers . . .      | 7.7                            | 10.0  | 14.2  | 30.0  |
| Physicians . . .      | 10.9                           | 12.3  | 20.7  | 30.4  |
| Carpenters . . .      | 6.5                            | 10.1  | 16.8  | 30.7  |
| Blacksmiths . . .     | 6.5                            | 11.3  | 16.6  | 32.5  |
| Innkeepers . . .      | 7.8                            | 16.9  | 24.2  | 32.8  |
| Masons . . .          | 9.5                            | 13.1  | 18.9  | 34.9  |
| Cab-drivers . . .     | 10.8                           | 18.3  | 26.0  | 51.0  |
| General average . . . | 7.9                            | 10.7  | 15.3  | 26.3  |

The most unhealthy occupations were cab-drivers, masons, innkeepers, and blacksmiths, and of these only cab-drivers stand in the same position in Bertillon's tables for Paris and in the official death-rates for England and Wales.

The following table shows the annual rate of mortality

of males from phthisis only, in Switzerland, according to occupation:—

|                       | Deaths Yearly per 1,000 Living |       |       |       |
|-----------------------|--------------------------------|-------|-------|-------|
|                       | 20-30                          | 30-40 | 40-50 | 50-60 |
| Farmers . . .         | 1.5                            | 2.0   | 2.0   | 2.4   |
| Physicians . . .      | 4.8                            | 4.7   | 5.3   | 3.2   |
| Clergymen . . .       | 3.9                            | 3.7   | 3.7   | 3.3   |
| Schoolmasters . . .   | 3.4                            | 3.8   | 4.6   | 3.3   |
| Cotton-spinners . . . | 4.0                            | 3.4   | 2.7   | 3.9   |
| Innkeepers . . .      | 4.4                            | 6.9   | 6.1   | 4.0   |
| Bakers . . .          | 2.9                            | 4.1   | 3.8   | 4.2   |
| Merchants . . .       | 5.8                            | 6.6   | 4.8   | 4.4   |
| Cab-drivers . . .     | 2.7                            | 4.8   | 5.8   | 4.5   |
| Carpenters . . .      | 1.9                            | 3.8   | 3.4   | 4.8   |
| Shoemakers . . .      | 3.0                            | 4.4   | 3.7   | 5.0   |
| Blacksmiths . . .     | 2.3                            | 4.1   | 5.6   | 5.3   |
| Tailors . . .         | 4.9                            | 5.6   | 5.5   | 5.5   |
| Masons . . .          | 2.8                            | 3.5   | 4.1   | 5.6   |
| Butchers . . .        | 5.6                            | 6.8   | 5.9   | 6.3   |
| Printers . . .        | 6.5                            | 7.9   | 6.6   | 6.7   |
| General average . . . | 3.1                            | 4.0   | 3.5   | 3.7   |

The worst trades are printers, butchers, and masons, whose rates of death from phthisis are double those of farmers, clergymen, and schoolmasters.

#### ITALY

Public health has improved in the last ten years, as shown by the diminished death-rate, viz.:—

|                     | Deaths Yearly per 1,000 Population |      |
|---------------------|------------------------------------|------|
|                     | 1887                               | 1896 |
| Cities . . . . .    | 28.9                               | 23.7 |
| All Italy . . . . . | 28.1                               | 24.3 |

In 1896 the urban death-rate was lower than that of the nation. The causes of death in the kingdom were:—

|                       | Per 100,000 Inhabitants |       |
|-----------------------|-------------------------|-------|
|                       | 1887                    | 1896  |
| Bronchitis . . . . .  | 217                     | 233   |
| Diarrhoea . . . . .   | 316                     | 346   |
| Consumption . . . . . | 212                     | 192   |
| Diphtheria . . . . .  | 84                      | 21    |
| Measles . . . . .     | 81                      | 37    |
| Malaria . . . . .     | 71                      | 45    |
| Various . . . . .     | 1,829                   | 1,556 |
| Total . . . . .       | 2,810                   | 2,430 |

In the northern provinces the death-rate is 30 per cent. less than in the southern, viz.:—

| <i>Per 10,000 Yearly</i> |     |                   |     |
|--------------------------|-----|-------------------|-----|
| Venetia . . . . .        | 198 | Umbria . . . . .  | 240 |
| Piedmont . . . . .       | 202 | Sicily . . . . .  | 252 |
| Tuscany . . . . .        | 229 | Romagna . . . . . | 256 |
| Lombardy . . . . .       | 236 | Naples . . . . .  | 288 |

Deaths from malaria and phthisis are as follows:—

| <i>Per 100,000 Inhabitants</i> |     |                    |     |
|--------------------------------|-----|--------------------|-----|
| <i>Malaria</i>                 |     | <i>Phthisis</i>    |     |
| Romagna . . . . .              | 66  | Lombardy . . . . . | 224 |
| Sicily . . . . .               | 99  | Tuscany . . . . .  | 236 |
| Sardinia . . . . .             | 171 | Liguria . . . . .  | 267 |
| Basilicata . . . . .           | 199 | Romagna . . . . .  | 283 |

## UNITED STATES

The census of 1890 showed the death-rate of certain cities thus :—

|                         | Per 1000 Persons |          |
|-------------------------|------------------|----------|
|                         | White            | Coloured |
| New York . . . . .      | 28.5             | 37.4     |
| Chicago . . . . .       | 21.0             | 23.3     |
| Philadelphia . . . . .  | 22.3             | 32.4     |
| St. Louis . . . . .     | 18.2             | 34.6     |
| Boston . . . . .        | 24.6             | 33.3     |
| Baltimore . . . . .     | 22.6             | 36.4     |
| San Francisco . . . . . | 23.6             | 24.1     |
| Cincinnati . . . . .    | 21.9             | 33.0     |
| New Orleans . . . . .   | 25.4             | 36.6     |
| Washington . . . . .    | 19.8             | 38.2     |
| Average . . . . .       | 22.8             | 32.9     |

The death-rate of the Union being, as Dr. Billings shows, 15.0 per thousand, it appears that the whites in the above 10 cities collectively have a death-rate which is relatively 52 per cent. higher. Moreover, in the same cities the death-rate of coloured persons is 44 per cent. higher than that of whites. The total number of deaths recorded in 1890 was :—

|                        | No.            | Ratio        | Per 100,000 Pop. |
|------------------------|----------------|--------------|------------------|
| Consumption . . . . .  | 102,199        | 11.6         | 164              |
| Pneumonia . . . . .    | 76,496         | 8.8          | 122              |
| Diarrhoea . . . . .    | 74,711         | 8.6          | 119              |
| Diphtheria . . . . .   | 41,677         | 4.7          | 67               |
| Typhoid . . . . .      | 27,058         | 3.1          | 43               |
| Cancer . . . . .       | 20,984         | 2.4          | 33               |
| Various . . . . .      | 532,395        | 60.8         | 852              |
| <b>Total . . . . .</b> | <b>875,520</b> | <b>100.0</b> | <b>1,400</b>     |

The above would show an annual death-rate of 14 per 1000, but the returns are supposed to be incomplete, and Dr. Billings considers the real death-rate to be 15.1 per thousand. In his report already mentioned (1886) he states the death-rates, urban and rural, from certain diseases as follows :—

|                              | Deaths Yearly per 100,000 Pop. |              | No. in 1000 Deaths |              |
|------------------------------|--------------------------------|--------------|--------------------|--------------|
|                              | Rural                          | Cities       | Rural              | Cities       |
| Consumption . . . . .        | 163                            | 286          | 124                | 138          |
| Nervous affections . . . . . | 146                            | 257          | 111                | 124          |
| Diarrhoea . . . . .          | 114                            | 199          | 87                 | 97           |
| Pneumonia . . . . .          | 123                            | 143          | 93                 | 69           |
| Heart disease . . . . .      | 79                             | 96           | 60                 | 46           |
| Accidents . . . . .          | 65                             | 85           | 50                 | 41           |
| Diphtheria . . . . .         | 75                             | 80           | 57                 | 39           |
| Apoplexy . . . . .           | 45                             | 51           | 34                 | 25           |
| Bronchitis . . . . .         | 16                             | 56           | 12                 | 28           |
| Croup . . . . .              | 35                             | 41           | 26                 | 20           |
| Cancer . . . . .             | 23                             | 40           | 17                 | 20           |
| Typhoid . . . . .            | 48                             | 35           | 36                 | 17           |
| Malarial fever . . . . .     | 43                             | 25           | 32                 | 12           |
| Scarlatina . . . . .         | 28                             | 55           | 21                 | 27           |
| Whooping-cough . . . . .     | 22                             | 20           | 16                 | 10           |
| Measles . . . . .            | 16                             | 15           | 12                 | 7            |
| Various diseases . . . . .   | 279                            | 576          | 212                | 280          |
| <b>Total . . . . .</b>       | <b>1,320</b>                   | <b>2,060</b> | <b>1,000</b>       | <b>1,000</b> |

## AUSTRALIA

The death-rates of the several colonies have been :—

|                           | Per 1000 of Population Yearly. |         |         |         |
|---------------------------|--------------------------------|---------|---------|---------|
|                           | 1861-70                        | 1871-80 | 1881-90 | 1891-95 |
| New South Wales . . . . . | 16.4                           | 15.3    | 14.7    | 12.8    |
| Victoria . . . . .        | 16.9                           | 15.5    | 15.3    | 14.1    |
| New Zealand . . . . .     | 13.0                           | 12.2    | 10.4    | 10.2    |
| Queensland . . . . .      | 19.4                           | 17.3    | 17.0    | 12.5    |
| South Australia . . . . . | 15.4                           | 15.4    | 13.6    | 12.2    |
| Tasmania . . . . .        | 14.7                           | 16.1    | 15.6    | 13.2    |
| West Australia . . . . .  | 16.3                           | 15.2    | 16.6    | 16.1    |
| General . . . . .         | 16.2                           | 14.9    | 14.4    | 12.7    |

In 1895 the ratio of sexes as to deaths showed as follows :—

|                           | Deaths        |               | Male Deaths to 1000 Female |
|---------------------------|---------------|---------------|----------------------------|
|                           | Males         | Females       |                            |
| New South Wales . . . . . | 8,671         | 6,243         | 1,383                      |
| Victoria . . . . .        | 8,801         | 6,758         | 1,314                      |
| New Zealand . . . . .     | 3,666         | 2,897         | 1,370                      |
| Queensland . . . . .      | 3,237         | 1,915         | 1,690                      |
| South Australia . . . . . | 2,203         | 1,760         | 1,252                      |
| Tasmania . . . . .        | 1,047         | 764           | 1,373                      |
| West Australia . . . . .  | 1,201         | 403           | 2,980                      |
| <b>Total . . . . .</b>    | <b>29,216</b> | <b>20,740</b> | <b>1,408</b>               |

The census of 1891 showed the number of males to 1000 females was 1150, that is to say, the male surplus was 15 per cent. ; as the above table shows the mortality of males to be almost 41 per cent. over that of females, it is evident that the death-rate of males is excessive. If it were in the same ratio as that of females, the deaths of males in 1895 would have reached only 23,850.

For Canada see *Vital Statistics*, page 815.

## DEATH-DUTIES

The total amount of property assessed for death-duties in the United Kingdom has been as follows :—

|                       | Annual Averages, £ |                    |                    |
|-----------------------|--------------------|--------------------|--------------------|
|                       | 1883-87            | 1888-92            | 1893-97            |
| England . . . . .     | 150,020,000        | 178,600,000        | 184,900,000        |
| Scotland . . . . .    | 18,010,000         | 19,400,000         | 21,300,000         |
| Ireland . . . . .     | 12,100,000         | 11,900,000         | 11,600,000         |
| <b>United Kingdom</b> | <b>180,130,000</b> | <b>209,900,000</b> | <b>217,800,000</b> |

Dividing the above amounts among the number of deaths, it would appear that the average fortune of each in the said periods was as follows :—

|                       | £ per Decree |            |            |
|-----------------------|--------------|------------|------------|
|                       | 1883-87      | 1888-92    | 1893-97    |
| England . . . . .     | 285          | 330        | 340        |
| Scotland . . . . .    | 240          | 255        | 260        |
| Ireland . . . . .     | 134          | 138        | 140        |
| <b>United Kingdom</b> | <b>261</b>   | <b>298</b> | <b>310</b> |

The ratios of property assessed to death-dues were as follows :—

|                           | No. of Estates |       | Value of Estates |       |
|---------------------------|----------------|-------|------------------|-------|
|                           | 1887           | 1897  | 1887             | 1897  |
| Over £100,000 . . .       | 3              | 5     | 221              | 273   |
| £10,000 to £100,000 . . . | 53             | 59    | 446              | 423   |
| £1,000 to £10,000 . . .   | 256            | 246   | 261              | 227   |
| Under £1,000 . . .        | 688            | 690   | 72               | 77    |
| Total . . .               | 1,000          | 1,000 | 1,000            | 1,000 |

The value of estates in 1897 was as follows :—

|                           | (000 omitted) |               |              |               |
|---------------------------|---------------|---------------|--------------|---------------|
|                           | England<br>£  | Scotland<br>£ | Ireland<br>£ | U. King.<br>£ |
| Over £100,000 . . .       | 53,000        | 5,100         | 2,200        | 60,300        |
| £10,000 to £100,000 . . . | 78,700        | 8,800         | 5,200        | 92,700        |
| £1,000 to £10,000 . . .   | 41,800        | 5,600         | 3,200        | 50,600        |
| Under £1,000 . . .        | 13,400        | 1,700         | 1,600        | 16,700        |
| Total . . .               | 186,900       | 21,200        | 12,200       | 220,300       |

The deaths among the wealthy classes in the three kingdoms in 1896-97 were as follows :—

|                | Number | Amount, £   | Average, £ |
|----------------|--------|-------------|------------|
| England . . .  | 2,886  | 131,800,000 | 47,700     |
| Scotland . . . | 348    | 13,900,000  | 40,000     |
| Ireland . . .  | 219    | 7,400,000   | 33,600     |
| Total . . .    | 3,453  | 153,100,000 | 44,400     |

Those among the middle classes were as follows :—

|                | Number | Amount, £  | Average, £ |
|----------------|--------|------------|------------|
| England . . .  | 10,916 | 41,800,000 | 3,830      |
| Scotland . . . | 1,554  | 5,600,000  | 3,600      |
| Ireland . . .  | 955    | 3,200,000  | 3,360      |
| Total . . .    | 13,425 | 50,600,000 | 3,770      |

Those among the artisan and tradesmen classes were as follows :—

|                | Number | Amount, £  | Average, £ |
|----------------|--------|------------|------------|
| England . . .  | 11,463 | 8,900,000  | 77         |
| Scotland . . . | 1,530  | 1,100,000  | 72         |
| Ireland . . .  | 1,440  | 900,000    | 63         |
| United Kingdom | 14,433 | 10,900,000 | 75         |

The rest of the wealth divided among the rest of the deaths of adults shows :—

|                | Number  | Amount, £ | Average, £ |
|----------------|---------|-----------|------------|
| England . . .  | 270,415 | 4,500,000 | 17         |
| Scotland . . . | 38,928  | 610,000   | 15         |
| Ireland . . .  | 53,406  | 720,000   | 14         |
| United Kingdom | 362,749 | 5,830,000 | 16         |

The total property which changed owners at death, divided among the number of adults who died in 1896, showed as follows :—

|                  | Number  | Amount, £   | Average, £ |
|------------------|---------|-------------|------------|
| England . . .    | 295,680 | 186,900,000 | 633        |
| Scotland . . .   | 42,360  | 21,200,000  | 501        |
| Ireland . . .    | 56,020  | 12,200,000  | 218        |
| U. Kingdom . . . | 394,060 | 220,300,000 | 558        |

The distribution of wealth in the three kingdoms shows the following ratios :—

| Class | Population to Wealth |             |             |             |
|-------|----------------------|-------------|-------------|-------------|
|       | England              | Scotland    | Ireland     | U. Kingdom  |
|       | Pop. = Wth.          | Pop. = Wth. | Pop. = Wth. | Pop. = Wth. |
| No. 1 | 1.0 70.5             | 0.8 65.6    | 0.4 60.5    | 0.9 69.4    |
| " 2   | 3.7 22.4             | 3.7 26.4    | 1.7 26.2    | 3.4 23.0    |
| " 3   | 3.9 4.7              | 5.2 2.5     | 7.4 3.6     | 5.0         |
| " 4   | 91.4 2.4             | 91.9 2.8    | 95.4 5.9    | 92.1 2.6    |
| Total | 100.0 100.0          | 100.0 100.0 | 100.0 100.0 | 100.0       |

The first and second classes in the United Kingdom combined form  $4\frac{1}{2}$  per cent. of the population, and possess  $92\frac{1}{2}$  per cent. of the wealth; the third and fourth classes combined represent  $95\frac{1}{2}$  per cent. of population and  $7\frac{1}{2}$  per cent. of wealth. The distribution of wealth is much more uneven in Ireland than in Great Britain; the second and third classes combined compare as follows :—

| Percentage          | England | Scotland | Ireland |
|---------------------|---------|----------|---------|
| In population . . . | 7.6     | 7.3      | 4.2     |
| In wealth . . .     | 27.1    | 31.6     | 33.6    |

At the same time the percentage of people of the poorest class is much greater in Ireland than in the sister kingdoms.

See pages 193-216.

## DIVORCES

The average of divorces to 10,000 marriages shows increasing ratios, viz. :—

|                   | Per 10,000 Marriages |         |          |
|-------------------|----------------------|---------|----------|
|                   | 1877-86              | 1890-96 | Increase |
| England . . .     | 19                   | 16      | ...      |
| France . . .      | 121                  | 229     | 108      |
| Germany . . .     | 152                  | 170     | 18       |
| Austria . . .     | 10                   | 48      | 38       |
| Italy . . .       | 24                   | 28      | 4        |
| Belgium . . .     | 69                   | 110     | 41       |
| Holland . . .     | 91                   | 120     | 29       |
| Sweden . . .      | 73                   | 106     | 33       |
| Switzerland . . . | 468                  | 400     | ...      |
| Roumania . . .    | 106                  | 200     | 94       |

In Germany the ratio is by no means even: it is 100 in Wurtemberg, 140 in Bavaria, and 180 in Prussia, to

10,000 marriages. In Russia the rates are: among Roman Catholics 2, Greeks 17, Protestants 67, to 10,000 marriages. In Switzerland, 7 among Catholic, 27 among Protestant, and 40 among mixed marriages, per 10,000.

The following table shows the number of divorced persons in various countries, and their ratio to adult population:—

|                    | Men    | Women   | Total   | Per 100,000 |
|--------------------|--------|---------|---------|-------------|
| France . . .       | 16,680 | 19,920  | 36,600  | 131         |
| Germany . . .      | 25,270 | 49,600  | 74,870  | 234         |
| Austria . . .      | 7,590  | 9,730   | 17,320  | 110         |
| Hungary . . .      | 4,870  | 7,620   | 12,490  | 113         |
| Switzerland . . .  | 4,010  | 7,600   | 11,610  | 586         |
| Sweden . . .       | 1,300  | 2,590   | 3,890   | 122         |
| Norway . . .       | 310    | 440     | 750     | 57          |
| Denmark . . .      | 2,380  | 3,500   | 5,880   | 412         |
| Holland . . .      | 2,130  | 3,400   | 5,530   | 188         |
| Belgium . . .      | 1,550  | 2,140   | 3,690   | 90          |
| Bulgaria . . .     | 1,190  | 1,320   | 2,510   | 130         |
| 11 countries . . . | 67,280 | 107,860 | 175,140 | ...         |

## FRANCE

The number of divorces since 1887 compares with marriages thus:—

| Period        | Annual Average |           | Divorces in 10,000 marriages |
|---------------|----------------|-----------|------------------------------|
|               | Divorces       | Marriages |                              |
| 1887-90 . . . | 4,647          | 274,000   | 170                          |
| 1891-93 . . . | 5,903          | 287,000   | 205                          |
| 1894-96 . . . | 6,740          | 286,500   | 235                          |

The ratio of divorces has increased 40 per cent. in ten years.

See *Divorce*, pages 217-225.

## DOCKS AND HARBOURS

See page 226.

## DOGS

The number of dog-licences issued in 1897 was:—

|                |           |
|----------------|-----------|
| England . . .  | 1,270,000 |
| Scotland . . . | 110,000   |

Sheep-dogs go free of tax, as also those belonging to blind persons.

The number of dogs which paid tax in France in 1895 was 3,005,000.

For dogs in other countries see *Animals*, page 61, also page 35.

## DRAINAGE

The length of sewers in the principal cities is:—

|               | Length, Miles | Inches per Inhab. |                  | Length, Miles | Inches per Inhab. |
|---------------|---------------|-------------------|------------------|---------------|-------------------|
| London . . .  | 1,420         | 20                | Buda-Pesth . . . | 140           | 16                |
| Paris . . .   | 570           | 16                | Brussels . . .   | 78            | 10                |
| Vienna . . .  | 490           | 24                | Bordeaux . . .   | 46            | 11                |
| Berlin . . .  | 395           | 15                | Leipzig . . .    | 60            | 10                |
| Hamburg . . . | 190           | 20                | Rome . . .       | 51            | 7                 |
| Breslau . . . | 156           | 26                | Genoa . . .      | 51            | 15                |
| Dresden . . . | 100           | 19                | Palermo . . .    | 53            | 12                |

The above fourteen cities have an average of 16 inches of sewers per inhabitant. Rome, Brussels, and Leipzig have the lowest ratios.

## DRUGS

The following table shows the weight and value of all drugs, chemicals, and spices imported into the United Kingdom at certain dates:—

|                   | Tons Weight |         |           | Value £ (000 omitted) |        |        |
|-------------------|-------------|---------|-----------|-----------------------|--------|--------|
|                   | 1876        | 1886    | 1896      | 1876                  | 1886   | 1896   |
| Bones . . .       | 96,000      | 67,000  | 74,000    | 620                   | 370    | 280    |
| Caoutchouc . . .  | 7,900       | 9,700   | 21,600    | 1,540                 | 2,220  | 4,990  |
| Chinchona . . .   | 1,300       | 7,300   | 1,800     | 270                   | 800    | 60     |
| Cochineal . . .   | 1,500       | 700     | 300       | 340                   | 100    | 40     |
| Cutch . . .       | 26,000      | 28,000  | 27,000    | 610                   | 650    | 550    |
| Dye-woods . . .   | 89,000      | 78,000  | 91,000    | 590                   | 420    | 590    |
| Esparto . . .     | 148,000     | 195,000 | 187,000   | 1,210                 | 1,000  | 800    |
| Guano . . .       | 199,000     | 69,000  | 20,000    | 2,300                 | 540    | 100    |
| Gum . . .         | 13,000      | 16,000  | 24,000    | 1,030                 | 1,050  | 1,590  |
| Guttapercha . . . | 1,100       | 2,000   | 2,200     | 160                   | 270    | 400    |
| Indigo . . .      | 4,400       | 4,300   | 4,500     | 2,130                 | 1,910  | 1,530  |
| Nitre . . .       | 165,000     | 75,000  | 106,000   | 1,890                 | 750    | 840    |
| Opium . . .       | 180         | 230     | 220       | 390                   | 310    | 250    |
| Paints . . .      | ...         | ...     | ...       | 730                   | 780    | 990    |
| Pepper . . .      | 12,000      | 12,000  | 12,000    | 460                   | 870    | 300    |
| Rosin . . .       | 49,000      | 58,000  | 83,000    | 310                   | 290    | 420    |
| Saltpetre . . .   | 13,000      | 14,000  | 17,000    | 240                   | 240    | 280    |
| Sumach . . .      | 13,000      | 13,000  | 15,000    | 220                   | 180    | 150    |
| Sulphur . . .     | 44,000      | 32,000  | 23,000    | 280                   | 160    | 90     |
| Turpentine . . .  | 12,000      | 15,000  | 25,000    | 270                   | 390    | 490    |
| Valonia . . .     | 35,000      | 34,000  | 33,000    | 630                   | 480    | 330    |
| Wood-pulp . . .   | ...         | 80,000  | 330,000   | ...                   | 510    | 1,680  |
| Yeast . . .       | 8,000       | 15,000  | 9,000     | 410                   | 820    | 430    |
| Sundries . . .    | 65,000      | 127,000 | 74,000    | 1,690                 | 1,780  | 1,570  |
| Total . . .       | 1,003,380   | 952,230 | 1,180,620 | 18,320                | 16,890 | 18,750 |

The average value of imported drugs and chemicals was £18.3 per ton in 1876, and £15.8 in 1896.

Exports of drugs and chemicals were as follow:—

|                  | Tons Weight |         |         | Value £ (000 omitted) |        |        |
|------------------|-------------|---------|---------|-----------------------|--------|--------|
|                  | 1876        | 1886    | 1896    | 1876                  | 1886   | 1896   |
| Alkali . . .     | 270,000     | 310,000 | 240,000 | 2,220                 | 1,790  | 1,240  |

| Sundries . . .   | ...         | ...     | ...     | 2,330                 | 2,490  | 3,670  |
| Total . . .      | 556,250     | 744,610 | 692,810 | 13,030                | 13,710 | 14,880 |

## DRUNKENNESS

The number of persons tried for drunkenness in England from 1874 to 1894 was as follows:—

| Period         | No. Yearly | Per 100,000 Inhabitants |
|----------------|------------|-------------------------|
| 1874-78 . . .  | 196,500    | 812                     |
| 1879-83 . . .  | 181,800    | 698                     |
| 1884-88 . . .  | 174,900    | 636                     |
| 1889-94 . . .  | 176,400    | 604                     |
| 21 years . . . | 182,100    | 683                     |

In Scotland the Royal Commission of 1896 found that 72 per cent. of crime proceeded from drink.

Deaths from alcoholism of men between 25 and 65 years average 10 per thousand, or 1 per cent. of the total, in England and Wales, but vary exceedingly according to profession, viz. :—

*Deaths from Drink of 1000 Men who Die*

|                    |                   |                     |
|--------------------|-------------------|---------------------|
| Ploughman . . . 1  | Miner . . . 4     | Baker . . . 15      |
| Gardener . . . 2   | Stonecutter . . 5 | Costermonger . 19   |
| Printer . . . 3    | Farmer . . . 6    | Butcher . . . 23    |
| Cotton-spinner . 3 | Blacksmith . . 8  | Com. traveller . 23 |
| Cutler . . . 3     | Draper . . . 8    | Brewer . . . 25     |
| Carpenter . . . 4  | Grocer . . . 10   | Cab-driver . . 33   |
| Shoemaker . . . 4  | Tailor . . . 11   | Publican . . . 55   |
| Fisherman . . . 4  | Painter . . . 12  | Average . . . 10    |

**AUSTRALIA**

The following table shows the arrests for drunkenness and the average consumption of alcohol in the several colonies :—

|                       | Arrests for Drunkenness | Per 10,000 Pop. | Alcohol, Galls. per Head |
|-----------------------|-------------------------|-----------------|--------------------------|
| New South Wales . .   | 20,670                  | 170             | 2.7                      |
| Victoria . . . . .    | 15,890                  | 140             | 3.2                      |
| New Zealand . . . .   | 5,350                   | 80              | 1.8                      |
| Queensland . . . . .  | 4,915                   | 120             | 2.5                      |
| South Australia . . . | 2,715                   | 75              | 2.5                      |
| Tasmania . . . . .    | 920                     | 60              | 2.0                      |
| Total . . . . .       | 50,460                  | 125             | 2.6                      |

**CANADA**

Convictions for drunkenness in ten years ending 1894 averaged 12,026 yearly. In 1895 they were 11,558, that is 468 below the average, viz. :—

|                      | Convictions | Per 10,000 Pop. |
|----------------------|-------------|-----------------|
| Quebec . . . . .     | 4,307       | 28              |
| Ontario . . . . .    | 3,132       | 14              |
| Acadia . . . . .     | 2,934       | 33              |
| North-West . . . . . | 1,185       | 34              |
| Total . . . . .      | 11,558      | 24              |

From 1884 to 1890 the convictions for drunkenness rose 40 per cent. by a steady increase, but since 1890 there has been a continuous fall, and 1895 shows 17 per cent. less than 1890.

**DUELS**

A return of Italian duels for ten years down to 1890 shows that there were 2760, which resulted in 50 men killed, 1066 wounded, and 1644 unhurt. The percentage of combatants showed 30 military, 29 editors, 12 lawyers, and 29 per cent. various. The duels were influenced by the seasons in the following ratio :—

| Par being 230       |       |                    |       |
|---------------------|-------|--------------------|-------|
| Warm Months         |       | Cold Months        |       |
| May . . . . .       | 273   | November . . . .   | 92    |
| June . . . . .      | 319   | December . . . . . | 67    |
| July . . . . .      | 330   | January . . . . .  | 220   |
| August . . . . .    | 326   | February . . . . . | 263   |
| September . . . . . | 271   | March . . . . .    | 291   |
| October . . . . .   | 121   | April . . . . .    | 107   |
| Total . . . . .     | 1,640 | Total . . . . .    | 1,120 |

**E**

**EARTH**

Ravenstein estimates the fertile and the unproductive areas as follows :—

|                     | Square Miles |              |            |
|---------------------|--------------|--------------|------------|
|                     | Fertile      | Unproductive | Total      |
| Europe . . . . .    | 2,888,000    | 667,000      | 3,555,000  |
| Asia . . . . .      | 9,280,000    | 5,430,000    | 14,710,000 |
| Africa . . . . .    | 5,760,000    | 5,754,000    | 11,514,000 |
| Australia . . . . . | 1,167,000    | 2,121,000    | 3,288,000  |
| North America . . . | 4,946,000    | 1,500,000    | 6,446,000  |
| South America . . . | 4,228,000    | 2,609,000    | 6,837,000  |
| Total . . . . .     | 28,269,000   | 18,081,000   | 46,350,000 |

The actual population is 1420 millions, equal to 50 persons per square mile of fertile area, or one-fourth of the number that can conveniently be supported, allowing 15 acres to each family.

**EARTHQUAKES**

Careful records are kept at Tokio, Japan, of the occurrence of earthquakes. In eleven years ending

December 1886 there were 658, and the ratios, according to months, to barometer and thermometer showed thus :—

| Months              | Barometer |                 | Fahrenheit |                 |
|---------------------|-----------|-----------------|------------|-----------------|
| January . . . . .   | 96        | 29.9            | 13         | 0-32 88         |
| February . . . . .  | 94        | 30.0            | 21         | 32-37 129       |
| March . . . . .     | 128       | 30.1            | 23         | 37-42 124       |
| April . . . . .     | 75        | 30.2            | 91         | 42-47 112       |
| May . . . . .       | 94        | 30.3            | 144        | 47-52 85        |
| June . . . . .      | 76        | 30.4            | 146        | 52-57 78        |
| July . . . . .      | 53        | 30.5            | 155        | 57-62 114       |
| August . . . . .    | 58        | 30.6            | 181        | 62-67 53        |
| September . . . . . | 42        | 30.7            | 91         | 67-72 82        |
| October . . . . .   | 84        | 30.8            | 85         | 72-77 63        |
| November . . . . .  | 79        | 30.9            | 40         | 77-82 42        |
| December . . . . .  | 121       | 31.0            | 10         | Over 82 30      |
| Total . . . . .     | 1,000     | Total . . . . . | 1,000      | Total . . . . . |

The above shows that in Japan earthquakes are most frequent from December to March inclusive, that they occur mostly when the barometer stands between 30.2 and 30.7, and the thermometer between 32 and 47 Fahrenheit, the ordinary temperature at Tokio (Jeddo) being 58.

## EDUCATION

The educational condition of nations in 1896 was approximately as follows :—

|                           | Schools, No. | Pupils, No. | Percentage of Pop. | Expenditure, £ | Pence per Inhab. | Percentage Adults can Write |
|---------------------------|--------------|-------------|--------------------|----------------|------------------|-----------------------------|
| England . . . . .         | 19,850       | 4,420,000   | 14.4               | 10,500,000     | 82               | 96                          |
| Scotland . . . . .        | 3,080        | 590,000     | 14.1               | 2,400,000      | 134              | 97                          |
| Ireland . . . . .         | 8,610        | 540,000     | 11.7               | 1,300,000      | 70               | 85                          |
| United Kingdom . . . . .  | 31,540       | 5,550,000   | 14.0               | 14,200,000     | 86               | 94                          |
| France . . . . .          | 89,110       | 6,250,000   | 16.0               | 8,000,000      | 50               | 95                          |
| Germany . . . . .         | 56,560       | 7,930,000   | 15.5               | 12,100,000     | 54               | 99                          |
| Russia . . . . .          | 66,040       | 3,130,000   | 3.0                | 5,000,000      | 11               | 22                          |
| Austria . . . . .         | 37,510       | 5,910,000   | 14.5               | 3,000,000      | 17               | 69                          |
| Italy . . . . .           | 64,200       | 2,720,000   | 8.8                | 4,900,000      | 36               | 56                          |
| Spain . . . . .           | 30,100       | 1,840,000   | 10.5               | 1,200,000      | 16               | 42                          |
| Portugal . . . . .        | 5,340        | 240,000     | 5.0                | 400,000        | 20               | 30                          |
| Holland . . . . .         | 4,220        | 650,000     | 13.6               | 1,600,000      | 80               | 90                          |

| Total . . . . .           | 922,090      | 57,780,000  | 7.5                | 103,500,000    | 30               | ...                         |

## UNITED KINGDOM

The progress of instruction in the three kingdoms is very satisfactory :—

|                    | Schools |        | Pupils    |           |
|--------------------|---------|--------|-----------|-----------|
|                    | 1888    | 1897   | 1888      | 1897      |
| England . . . . .  | 19,221  | 19,958 | 3,615,000 | 4,489,000 |
| Scotland . . . . . | 3,105   | 3,086  | 496,000   | 605,000   |
| Ireland . . . . .  | 8,156   | 8,631  | 494,000   | 521,000   |
| Total . . . . .    | 30,522  | 31,675 | 4,605,000 | 5,615,000 |

The number of school-children on the registers is much greater than what is shown above, namely the average attendance, which is 82 per cent. of enrolled pupils in England, 84 per cent. in Scotland, and 66 per cent. in Ireland. The following table shows the percentage of school-children to population, and the percentage of adults who can write :—

|                      | Pupils per 100 Pop. |      | Adults can Write |      |
|----------------------|---------------------|------|------------------|------|
|                      | 1888                | 1896 | 1888             | 1896 |
| England . . . . .    | 12.7                | 14.4 | 91               | 96   |
| Scotland . . . . .   | 12.3                | 14.1 | 94               | 97   |
| Ireland . . . . .    | 10.4                | 11.7 | 77               | 85   |
| U. Kingdom . . . . . | 12.3                | 14.0 | 90               | 94   |

In England and Scotland the proportion of male adults who can write, as shown by signatures to the marriage

register, is greater than that of females : in Ireland the reverse takes place, women being 2 per cent. better instructed than men. School expenditure compared with population in the above years shows as follows :—

|                    | £ Sterling |            | Pence per Inhab. |      |
|--------------------|------------|------------|------------------|------|
|                    | 1888       | 1896       | 1888             | 1896 |
| England . . . . .  | 7,440,000  | 10,450,000 | 64               | 82   |
| Scotland . . . . . | 1,160,000  | 2,350,000  | 70               | 134  |
| Ireland . . . . .  | 1,090,000  | 1,330,000  | 54               | 70   |
| Total . . . . .    | 9,690,000  | 14,130,000 | 63               | 86   |

In Great Britain, without Ireland, the schools can accommodate 6,900,000 pupils, or 38 per cent. more than the average attendance.

Statistics for England and Wales in 1896 and 1890 compare thus :—

|                          | Average Attendance |           |          |
|--------------------------|--------------------|-----------|----------|
|                          | 1890               | 1896      | Increase |
| Board schools . . . . .  | 1,457,000          | 1,957,000 | 500,000  |
| Anglican . . . . .       | 1,681,000          | 1,872,000 | 191,000  |
| Roman Catholic . . . . . | 193,000            | 236,000   | 43,000   |
| Wesleyan . . . . .       | 132,000            | 126,000   | 0        |
| Various . . . . .        | 255,000            | 233,000   | 0        |
| Total . . . . .          | 3,718,000          | 4,424,000 | 706,000  |

## UNITED STATES

The returns for 1896 as regards average attendance at the schools compare with 1885 thus:—

|                 | School-children |           | Per 100 Pop. |      |
|-----------------|-----------------|-----------|--------------|------|
|                 | 1885            | 1896      | 1885         | 1896 |
| New England .   | 564,000         | 645,000   | 13.1         | 12.4 |
| Middle States . | 1,505,000       | 1,930,000 | 11.7         | 12.3 |
| Southern „ .    | 1,852,000       | 2,865,000 | 11.0         | 14.0 |
| Western „ .     | 3,099,000       | 4,310,000 | 13.9         | 14.5 |
| The Union . .   | 7,020,000       | 9,750,000 | 12.5         | 13.7 |

The number of children on the rolls in the above years was as follows:—

|                 | On Rolls   |            | Per 100 Pop. |      |
|-----------------|------------|------------|--------------|------|
|                 | 1885       | 1896       | 1885         | 1896 |
| New England .   | 800,000    | 890,000    | 18.6         | 17.1 |
| Middle States . | 2,460,000  | 2,860,000  | 19.1         | 18.2 |
| Southern „ .    | 2,980,000  | 4,390,000  | 17.7         | 21.4 |
| Western „ .     | 4,930,000  | 6,240,000  | 22.1         | 21.0 |
| The Union . .   | 11,170,000 | 14,380,000 | 19.8         | 20.2 |

Of the numbers on the rolls in 1896 the average attendance was 73 per cent. in New England, 68 in the Middle States, 65 in the Southern, and 69 per cent. in the Western States. The average for the whole Union was 68 per cent., against 63 in 1885. The expenditure, compared with population and the number of children on the rolls, was:—

|                 | £ Sterling | Shillings per Inhabitant | Shillings per Child |
|-----------------|------------|--------------------------|---------------------|
| New England .   | 4,100,000  | 16                       | 91                  |
| Middle States . | 10,700,000 | 14                       | 75                  |
| Southern „ .    | 4,300,000  | 4                        | 20                  |
| Western „ .     | 19,300,000 | 13                       | 62                  |
| The Union . .   | 38,400,000 | 11                       | 53                  |

The United States spend the same amount yearly on education as all the nations of the European Continent collectively. The contribution for schools is equal to 11 shillings per inhabitant, against 7 shillings in the United Kingdom and a little over 2 shillings on the European Continent in the aggregate.

## FRANCE

The expenditure on public schools is shown thus:—

|            | State, £  | Local, £  | Total, £  | Pence per Inhab. |
|------------|-----------|-----------|-----------|------------------|
| 1860 . . . | 200,000   | 1,200,000 | 1,400,000 | 9                |
| 1870 . . . | 440,000   | 2,060,000 | 2,500,000 | 16               |
| 1880 . . . | 800,000   | 2,500,000 | 3,300,000 | 21               |
| 1892 . . . | 5,000,000 | 2,400,000 | 7,400,000 | 46               |

## ITALY

The ratio of persons able to sign the marriage register in Italy in 1891 was as follows per 100:—

|              |      |                |      |               |      |
|--------------|------|----------------|------|---------------|------|
| Rome . . .   | 81.8 | Turin . . .    | 94.4 | Bologna . . . | 82.3 |
| Naples . . . | 63.9 | Genoa . . .    | 89.5 | Venice . . .  | 70.8 |
| Milan . . .  | 93.6 | Florence . . . | 88.1 | Palermo . . . | 63.4 |

The amount spent yearly on schools is £4,900,000, of which £1,700,000 is expended by the State, and £3,200,000 by local authorities.

## INDIA

In 1893 the sum expended for education was as follows:—

|                | Amount, £ |           |           |
|----------------|-----------|-----------|-----------|
|                | Grants    | Fees, &c. | Total     |
| University . . | 100,000   | 100,000   | 200,000   |
| High Schools . | 280,000   | 520,000   | 800,000   |
| Primary „ . .  | 360,000   | 340,000   | 700,000   |
| Staff, &c. „ . | 320,000   | 100,000   | 420,000   |
| Total . . .    | 1,060,000 | 1,060,000 | 2,120,000 |

See *Education*, in Part I., pages 231-243.

## EGGS

Production and consumption yearly in some countries are approximately as follows:—

|                   | Millions   |             | Consumption per Inhab. |
|-------------------|------------|-------------|------------------------|
|                   | Production | Consumption |                        |
| United Kingdom .  | 2,120      | 3,810       | 95                     |
| France . . .      | 3,500      | 3,220       | 84                     |
| Germany . . .     | 3,000      | 4,400       | 84                     |
| United States . . | 9,810      | 9,820       | 140                    |

Importing and exporting countries show approximately as follows:—

| Importers           | Millions | Exporters        | Millions |
|---------------------|----------|------------------|----------|
| Great Britain . .   | 1,690    | Russia . . . .   | 1,480    |
| Germany . . . .     | 1,400    | Austria . . . .  | 1,150    |
| Switzerland . . .   | 120      | Italy . . . . .  | 520      |
| United States . .   | 10       | France . . . . . | 280      |
| Other countries . . | 450      | Denmark . . . .  | 160      |
|                     |          | Canada . . . . . | 80       |
| Total . . .         | 3,670    | Total . . .      | 3,670    |

The value of eggs exported in the above table is about 7 millions sterling, say 10 million eggs daily, worth £20,000.

## ELECTIONS

There have been sixteen in the United Kingdom since the Reform Law of 1832, which resulted as follows (Home-Rulers being counted as Liberals since 1886):—

| Year | Won by        | Maj. | Year | Won by        | Maj. |
|------|---------------|------|------|---------------|------|
| 1832 | Liberals      | 370  | 1865 | Liberals      | 78   |
| 1835 | „             | 112  | 1868 | „             | 116  |
| 1837 | „             | 18   | 1874 | Conservatives | 98   |
| 1841 | Conservatives | 76   | 1880 | Liberals      | 115  |
| 1847 | Liberals      | 18   | 1885 | „             | 86   |
| 1852 | Conservatives | 20   | 1886 | Conservatives | 114  |
| 1857 | Liberals      | 80   | 1892 | Liberals      | 40   |
| 1859 | „             | 50   | 1895 | Conservatives | 152  |

The election of 1895 resulted as follows :—

|                    | Conservatives | Liberals   | Total      |
|--------------------|---------------|------------|------------|
| England . . .      | 349           | 116        | 465        |
| Wales . . .        | 8             | 22         | 30         |
| Scotland . . .     | 33            | 39         | 72         |
| Ireland . . .      | 21            | 82         | 103        |
| <b>Total . . .</b> | <b>411</b>    | <b>259</b> | <b>670</b> |
| Boroughs . . .     | 200           | 84         | 284        |
| Counties . . .     | 202           | 175        | 377        |
| Universities . . . | 9             | ...        | 9          |
| <b>Total . . .</b> | <b>411</b>    | <b>259</b> | <b>670</b> |

The number of electors and that of voters, and the ratios to population at the election of 1895, were as follows (England including also Wales) :—

|                       | Electors,<br>Number | Voters,<br>Number | Per 100 Inhab. |           |
|-----------------------|---------------------|-------------------|----------------|-----------|
|                       |                     |                   | Electors       | Voters    |
| England . . .         | 4,956,000           | 3,726,000         | 16             | 12        |
| Scotland . . .        | 638,000             | 466,000           | 16             | 11        |
| Ireland . . .         | 737,000             | 395,000           | 16             | 9         |
| <b>United Kingdom</b> | <b>6,331,000</b>    | <b>4,587,000</b>  | <b>16</b>      | <b>11</b> |

Of the total number of electors on the roll only 72 per cent. voted.

The franchise in 1895 was held as follows :—

|                             | Counties         | Boroughs         | Total            |
|-----------------------------|------------------|------------------|------------------|
| England . . .               | 2,820,000        | 2,136,000        | 4,956,000        |
| Scotland . . .              | 352,000          | 286,000          | 638,000          |
| Ireland . . .               | 623,000          | 114,000          | 737,000          |
| <b>United Kingdom . . .</b> | <b>3,795,000</b> | <b>2,534,000</b> | <b>6,331,000</b> |

Of 1000 voters, in Scotland 9 were unable to write their names, in England 12, in Ireland 214, the ratio for the whole United Kingdom being 29 per 1000.

#### FRANCE

The number of names on the lists of franchise, and that of persons who voted at five general elections, were :—

| Date           | On Lists   | Voted     | Ratio |
|----------------|------------|-----------|-------|
| 1877 . . . . . | 9,948,000  | 8,013,000 | 80.5  |
| 1881 . . . . . | 10,125,000 | 6,945,000 | 68.8  |
| 1885 . . . . . | 10,181,000 | 7,896,000 | 77.4  |
| 1889 . . . . . | 10,387,000 | 7,953,000 | 76.5  |
| 1893 . . . . . | 10,446,000 | 7,427,000 | 71.0  |

#### GERMANY

The growth of the Socialist party is shown by the number of votes it polled, viz. :—

|                |           |
|----------------|-----------|
| 1881 . . . . . | 550,000   |
| 1891 . . . . . | 1,342,000 |
| 1893 . . . . . | 1,734,000 |

Thus in twelve years this party trebled its strength.

#### UNITED STATES

The election of 1896 resulted thus :—

| States             | Voters           |                  | Electors   |            |
|--------------------|------------------|------------------|------------|------------|
|                    | M'Kinley         | Bryan            | M'Kinley   | Bryan      |
| New England . . .  | 613,000          | 235,000          | 39         | ...        |
| Middle . . .       | 1,901,000        | 1,233,000        | 89         | ...        |
| South . . .        | 1,127,000        | 1,740,000        | 18         | 113        |
| West . . .         | 3,482,000        | 3,291,000        | 126        | 62         |
| <b>Union . . .</b> | <b>7,123,000</b> | <b>6,499,000</b> | <b>272</b> | <b>175</b> |

See *Electors*, page 243.

#### EMIGRATION

The following table shows the emigration that has taken place from 1890 to the end of 1896 : \*—

| From               | Destination      |                |                  |                  |
|--------------------|------------------|----------------|------------------|------------------|
|                    | U. States        | S. America     | Various          | Total            |
| U. Kingdom         | 938,000          | ..             | 1,082,000        | 2,020,000        |
| France . . .       | 12,000           | 25,000         | 166,000          | 203,000          |
| Germany . . .      | 491,000          | 35,000         | 7,000            | 533,000          |
| Austria . . .      | 409,000          | 16,000         | 31,000           | 456,000          |
| Russia . . .       | 407,000          | ...            | ...              | 407,000          |
| Italy . . .        | 308,000          | 737,000        | 762,000          | 1,807,000        |
| Portugal . . .     | 10,000           | 163,000        | 14,000           | 187,000          |
| Holland . . .      | 17,000           | ...            | ...              | 17,000           |
| Denmark . . .      | 46,000           | ...            | 5,000            | 51,000           |
| Sweden . . .       | 169,000          | ...            | 26,000           | 195,000          |
| Norway . . .       | 78,000           | ...            | ...              | 78,000           |
| Switzerland . . .  | 39,000           | 2,000          | ...              | 41,000           |
| <b>Total . . .</b> | <b>2,924,000</b> | <b>978,000</b> | <b>2,093,000</b> | <b>5,995,000</b> |

There were also about 60,000 yearly from Spain (mostly to South America), that is 420,000 in the above period, which would bring up the total to 6,400,000, that is, an average of 910,000 yearly. Italian emigration to South America appears in the above table to have averaged 105,000 yearly, but in reality it reached double the figure given above, as the majority of those marked "various" proceeded to French or other ports to embark for Brazil, &c. In the above 7 years South America absorbed about 1,400,000 Italians, 400,000 Spaniards, and 350,000 Portuguese, Germans, &c.

Emigrants, as a rule, are of the age when their labour is likely to be most productive. Thus the returns of United States records during 31 years show that 53 per cent. of those who arrived were between 20 and 40, whereas the proportions of persons of that age in the United Kingdom, France, Germany, and Austria, averaged only 29½ per cent. Emigration, in a word, drew nearly double its proportion of persons in the prime of life.

Comparing the foreign element in each country with the whole population, we find the ratio stands thus :—

#### Foreigners per Thousand Inhabitants

|                  |                  |                  |
|------------------|------------------|------------------|
| England . . . 8  | Germany . . . 9  | Belgium . . . 24 |
| Scotland . . . 4 | Austria . . . 5  | Italy . . . 2    |
| Ireland . . . 3  | Switzerland . 77 | Russia . . . 1   |
| France . . . 30  | Holland . . . 10 | Scandinavia . 3  |

\* At pages 245-254 there are tables of European emigration during 70 years.

The following table shows the numbers of foreign settlers in various countries of Europe (Irish being included with British):—

|                         | U. Kingdom | France    | Germany | Austria | Italy  | Switzerland | Holland | Belgium | Various | Total     |
|-------------------------|------------|-----------|---------|---------|--------|-------------|---------|---------|---------|-----------|
| British . . . . .       | ...        | 40,000    | 16,000  | 2,000   | 7,000  | 3,000       | 1,000   | 4,000   | 13,000  | 86,000    |
| French . . . . .        | 23,000     | ...       | 32,000  | 3,000   | 11,000 | 54,000      | 1,000   | 51,000  | 8,000   | 183,000   |
| Germans . . . . .       | 54,000     | 114,000   | ...     | 103,000 | 5,000  | 112,000     | 29,000  | 34,000  | 97,000  | 548,000   |

| Scandinavia . . . . .    | 62,000      | 1,130,000     | 17,000     | 32,000         | 4,000   | 1,245,000  |
| Holland . . . . .        | 73,000      | 90,000        | 3,000      | ...            | 14,000  | 180,000    |
| Belgium . . . . .        | 434,000     | 30,000        | 7,000      | ...            | 4,000   | 525,000    |
| Switzerland . . . . .    | 154,000     | 110,000       | 53,000     | ...            | 13,000  | 330,000    |
| Greece . . . . .         | 106,000     | 10,000        | 12,000     | 38,000         | 44,000  | 210,000    |
| Various . . . . .        | 181,000     | 50,000        | 95,000     | 111,000        | 28,000  | 465,000    |
| Europe . . . . .         | 2,880,000   | 9,890,000     | 3,340,000  | 2,100,000      | 610,000 | 18,820,000 |
| United States . . . . .  | 72,000      | ...           | 12,000     | 115,000        | 11,000  | 210,000    |
| Canada . . . . .         | 2,000       | 980,000       | 1,000      | 5,000          | 2,000   | 990,000    |
| Total . . . . .          | 2,954,000   | 10,870,000    | 3,353,000  | 2,220,000      | 623,000 | 20,020,000 |

The total number of foreign settlers in the various countries of Europe, as shown in the first table, is 3,090,000, of whom 2,880,000 are Europeans; the rest are Americans, Asiatics, &c.

It appears from the above table that there are (exclusive of Asiatics) no fewer than 20 million persons living out of their native country, made up thus:—

| From                        | Number     | Ratio |
|-----------------------------|------------|-------|
| United Kingdom . . . . .    | 5,450,000  | 27.2  |
| Germany . . . . .           | 3,790,000  | 19.0  |
| Italy . . . . .             | 2,750,000  | 13.7  |
| Scandinavia . . . . .       | 1,245,000  | 6.2   |
| France . . . . .            | 910,000    | 4.5   |
| Spain . . . . .             | 880,000    | 4.4   |
| Various countries . . . . . | 4,995,000  | 25.0  |
| Total . . . . .             | 20,020,000 | 100.0 |

The foreign-born (including British) in the British possessions are:—

| Born in               | Canada  | Australia | Egypt   | India, &c. | Total     |
|-----------------------|---------|-----------|---------|------------|-----------|
| U. Kingdom . . . . .  | 480,000 | 1,040,000 | 20,000  | 210,000    | 1,750,000 |
| France . . . . .      | 5,000   | 5,000     | 14,000  | 2,000      | 26,000    |
| Germany . . . . .     | 28,000  | 50,000    | 1,000   | 8,000      | 87,000    |
| Russia . . . . .      | 10,000  | 3,000     | 3,000   | ...        | 16,000    |
| Austria . . . . .     | ...     | ...       | 7,000   | ...        | 7,000     |
| Italy . . . . .       | 1,000   | 4,000     | 25,000  | 1,000      | 31,000    |
| Scandinavia . . . . . | 8,000   | 21,000    | ...     | 3,000      | 32,000    |
| Greece . . . . .      | ...     | ...       | 38,000  | ...        | 38,000    |
| U. States . . . . .   | 81,000  | 10,000    | ...     | 24,000     | 115,000   |
| Canada . . . . .      | ...     | 4,000     | ...     | 1,000      | 5,000     |
| Various . . . . .     | 27,000  | 73,000    | 5,000   | 8,000      | 113,000   |
| Total . . . . .       | 640,000 | 1,210,000 | 113,000 | 257,000    | 2,220,000 |

The purport of the foregoing tables may be summed up by saying that there are at present 16 million European settlers living beyond the seas, of whom the United States possess 10 millions, due in great measure to liberal land laws, especially the Homestead Law of 1862 (see page 347). On the other hand, the total number of emigrants from the European Continent now resident in British Colonies is barely 160,000, or if we include Egypt, 250,000. The failure of our colonies to attract European settlers is chiefly the result of Crown lands having been leased for long terms of years at nominal rents (one penny per acre) to squatters and other men of large fortunes. In Australia 2 per cent. of the population is made up of Germans and Scandinavians. In Canada only 1 per cent. of the inhabitants are natives of Continental Europe.

If we take each nationality, adding together those at home and abroad, we shall find the proportion that live abroad as in the following table:—

|                  | At Home     | Abroad     | Total       | Ratio<br>Abroad |
|------------------|-------------|------------|-------------|-----------------|
| British . . .    | 35,050,000  | 2,890,000  | 37,940,000  | 7.5             |
| Irish . . .      | 4,540,000   | 2,560,000  | 7,100,000   | 36.0            |
| Brit. Islands    | 39,590,000  | 5,450,000  | 45,040,000  | 12.0            |
| French . . .     | 37,400,000  | 910,000    | 38,310,000  | 2.4             |
| Germans . . .    | 51,970,000  | 3,790,000  | 55,760,000  | 6.8             |
| Russians . . .   | 106,000,000 | 810,000    | 106,810,000 | 0.8             |
| Austrians . . .  | 41,400,000  | 955,000    | 42,355,000  | 2.3             |
| Italians . . .   | 31,200,000  | 2,750,000  | 33,950,000  | 8.0             |
| Spaniards . . .  | 17,900,000  | 880,000    | 18,780,000  | 4.6             |
| Portuguese . . . | 5,000,000   | 290,000    | 5,290,000   | 5.5             |
| Scandinavians    | 9,300,000   | 1,245,000  | 10,545,000  | 11.8            |
| Hollanders . . . | 4,880,000   | 180,000    | 5,060,000   | 3.6             |
| Belgians . . .   | 6,300,000   | 525,000    | 6,825,000   | 7.8             |
| Swiss . . .      | 2,800,000   | 330,000    | 3,130,000   | 10.5            |
| Various . . .    | 13,460,000  | 705,000    | 14,165,000  | 5.0             |
| Europe . . .     | 367,200,000 | 18,820,000 | 386,020,000 | 4.7             |
| United States    | 61,000,000  | 210,000    | 61,210,000  | 0.3             |
| Canadians . . .  | 3,600,000   | 990,000    | 4,590,000   | 21.5            |
| Total . . .      | 431,800,000 | 20,020,000 | 451,820,000 | 4.3             |

The Canadians can hardly be considered living out of their own country, as they are mostly in the New England States, just over the border. The nations which have the largest proportion of their people abroad are the Irish, Scandinavians, and Swiss.

The returns for 1897 of emigrants sailing from the United Kingdom were:—

| To                  | British | Irish  | Foreign | Total   |
|---------------------|---------|--------|---------|---------|
| United States . . . | 52,000  | 33,000 | 47,000  | 132,000 |
| Canada . . .        | 15,000  | 1,000  | 7,000   | 23,000  |
| Cape Colony . . .   | 20,000  | 1,000  | 8,000   | 29,000  |
| Australia . . .     | 11,000  | 1,000  | ...     | 12,000  |
| Other parts . . .   | 13,000  | ...    | 5,000   | 18,000  |
| Total . . .         | 111,000 | 36,000 | 67,000  | 214,000 |

The aggregate returns for ten years (1888-97) show as follows:—

|               | Total Emi-<br>gration |                    | British<br>and Irish |
|---------------|-----------------------|--------------------|----------------------|
| English . . . | 1,290,000             | To United States   | 1,388,000            |
| Scotch . . .  | 216,000               | .. Canada . . .    | 321,000              |
| Irish . . .   | 534,000               | .. Australia . . . | 172,000              |
| Foreign . . . | 937,000               | .. Cape, &c. . .   | 259,000              |
| Total . . .   | 2,977,000             | Total . . .        | 2,040,000            |

For emigration from 1815-88 see page 248.

#### SOUTH AMERICA

The Argentine Republic shows as follows:—

|                    | Immigrants | Per Annum |
|--------------------|------------|-----------|
| 1873-82 . . . . .  | 493,000    | 49,300    |
| 1883-92 . . . . .  | 1,110,000  | 111,500   |
| 1893-97 . . . . .  | 343,000    | 68,600    |
| 25 years . . . . . | 1,952,000  | 78,000    |

About one-third of the above returned to Europe. The

last five years showed: immigrants, 343,000; returned to Europe, 117,000; net immigration, 226,000—say 45,000 per annum.

#### UNITED STATES

In the last seven years the arrivals of immigrants were:—

|                         | Number    | Annual<br>Average | Ratio |
|-------------------------|-----------|-------------------|-------|
| British . . . . .       | 344,000   | 49,100            | 11.8  |
| Irish . . . . .         | 270,000   | 38,600            | 9.4   |
| Germans . . . . .       | 491,000   | 70,100            | 17.4  |
| Russians . . . . .      | 407,000   | 58,200            | 14.3  |
| Italians . . . . .      | 419,000   | 59,800            | 14.7  |
| Austrians . . . . .     | 382,000   | 54,600            | 13.4  |
| Scandinavians . . . . . | 305,000   | 43,600            | 10.7  |
| Various . . . . .       | 237,000   | 33,800            | 8.3   |
| Total . . . . .         | 2,855,000 | 407,800           | 100.0 |

The increase of foreign population during the decade ending 1890 was equal to 60 per cent. of the number of immigrants; as the current decade promises 4,000,000 immigrants, we may expect an increase of 2,400,000 in the number of foreign residents over last census, wherefore that of 1900 ought to show 11,650,000 foreigners in a population of 77,000,000 souls. This would give a ratio of 15 per cent. for the foreign population, the same as it was in 1890.

#### ITALY

An unofficial statement (1898) gives the number of Italian emigrants in 22 years, from 1875, as 625,000 to North America, and 1,350,000 to South America. The *Journal de Commercio* of Rio Janeiro estimates the number of Italian settlers in Brazil at 1,374,000. The Argentine census of 1895 shows 610,000 Italians in Argentina; there are also 70,000 in Uruguay, and 20,000 in Paraguay.

#### ALGERIA

The European population (including children born in the colony) has increased 80 per cent. in 10 years, viz.:—

|                        | 1888    | 1898    | Increase |
|------------------------|---------|---------|----------|
| French . . . . .       | 220,000 | 318,000 | 98,000   |
| Spaniards, &c. . . . . | 206,000 | 446,000 | 240,000  |
| Total . . . . .        | 426,000 | 764,000 | 338,000  |

#### CANADA.

The census of 1891 compares the number of foreign settlers with the same in 1881 thus:—

|                      | Number    |           | Ratio |       |
|----------------------|-----------|-----------|-------|-------|
|                      | 1881      | 1891      | 1881  | 1891  |
| English . . . . .    | 170,000   | 220,000   | 3.9   | 4.6   |
| Scotch . . . . .     | 115,000   | 108,000   | 2.7   | 2.2   |
| Irish . . . . .      | 186,000   | 149,000   | 4.3   | 3.1   |
| Germans . . . . .    | 25,000    | 28,000    | 0.6   | 0.6   |
| Russians . . . . .   | 6,000     | 10,000    | 0.1   | 0.2   |
| Scands . . . . .     | 8,000     | 8,000     | 0.2   | 0.2   |
| Various . . . . .    | 99,000    | 124,000   | 2.3   | 2.5   |
| Foreigners . . . . . | 609,000   | 647,000   | 14.1  | 13.4  |
| Natives . . . . .    | 3,716,000 | 4,186,000 | 85.9  | 86.6  |
| Total pop. . . . .   | 4,325,000 | 4,833,000 | 100.0 | 100.0 |

Except English, all foreign-born settlers have relatively lost ground: the foreign population is only 13½ per cent.

of the total, whereas it is 15 per cent. in the United States, and 29 per cent. in Australia. The foreign settlers in the several provinces showed as follows :—

|                | 1881    | 1891    | Increase |
|----------------|---------|---------|----------|
| Quebec . . .   | 77,000  | 82,000  | 5,000    |
| Ontario . . .  | 430,000 | 406,000 | ...      |
| Acadia . . .   | 69,000  | 55,000  | ...      |
| North-West . . | 33,000  | 104,000 | 71,000   |
| Total . . .    | 609,000 | 647,000 | 38,000   |

Taking the old provinces collectively, the foreign population has diminished by 33,000, but the new North-West, including Manitoba, British Columbia, &c., shows an increase of 71,000, so that, on the whole, the decade shows a gain of 38,000, or 6 per cent. on the foreign population of 1881.

#### AUSTRALIA.

In 25 years, ending December 1895, the net immigration into the colonies was as follows :—

|                      | Number  | Per Annum | Ratio |
|----------------------|---------|-----------|-------|
| New S. Wales . . .   | 309,000 | 12,300    | 38.4  |
| Victoria . . .       | 49,000  | 2,000     | 6.2   |
| New Zealand . . .    | 157,000 | 6,300     | 19.8  |
| Queensland . . .     | 197,000 | 7,900     | 24.7  |
| South Australia . .  | 23,000  | 900       | 2.8   |
| West Australia . . . | 60,000  | 2,400     | 7.5   |
| Tasmania . . .       | 5,000   | 200       | 0.6   |
| Total . . .          | 800,000 | 32,000    | 100.0 |

The following table shows the number of foreign settlers (including British) according to census returns for 1881 and 1891, and an estimate of the existing number in 1896 :—

|                    | 1881      | 1891      | 1896      |
|--------------------|-----------|-----------|-----------|
| New S. Wales . . . | 240,000   | 315,000   | 325,000   |
| Victoria . . .     | 323,000   | 350,000   | 275,000   |
| New Zealand . . .  | 311,000   | 244,000   | 240,000   |
| Queensland . . .   | 133,000   | 189,000   | 196,000   |
| S. Australia . . . | 83,000    | 92,000    | 90,000    |
| Tasmania . . .     | 32,000    | 32,000    | 31,000    |
| W. Australia . . . | 6,000     | 19,000    | 68,000    |
| Total . . .        | 1,128,000 | 1,241,000 | 1,225,000 |

Between 1891 and 1896 there was a net immigration of 77,000 persons, but a mean death-rate of 15 per 1000 in the same period would amount to 93,000, so that the foreign population in 1896 would not exceed 1,225,000. Comparing native and foreign born we find as follows :—

|                  | Number    |           | Ratio |       |
|------------------|-----------|-----------|-------|-------|
|                  | 1881      | 1896      | 1881  | 1896  |
| Australian . . . | 1,688,000 | 3,015,000 | 60.0  | 71.0  |
| Foreign . . .    | 1,128,000 | 1,225,000 | 40.0  | 29.0  |
| Total pop. . .   | 2,816,000 | 4,240,000 | 100.0 | 100.0 |

The foreign element is diminishing rapidly, whereas in most new countries it is on the increase. The colony of Victoria lost 50,000 by emigration between 1891 and 1896.

#### ENERGY

The energy or working-power of a nation consists of: (1) human, which is computed at 300 foot-tons daily for a man between 15 and 60 years of age, 200 foot-tons for

a woman, and 100 foot-tons for a child of 10 to 15 years; (2) the force of animals, that of a full-grown horse being 5000 foot-tons daily; (3) steam-power of three kinds, fixed, railway, and steamboats; (4) water-power; (5) the force represented by wind-mills; (6) the amount of power now exercised by electricity. The following table shows the first three powers, subject to these reservations: the power of women and children is not taken into account; that of horses is estimated at 3000 foot-tons, because statistics of same include horses of all ages; mules are counted as horses, but no account is taken of asses, oxen, or other animals. Water-power is added to steam whenever it can be ascertained; wind-mills and electricity are omitted.

|                     | Millions of Foot-Tons Daily |         |         |         |
|---------------------|-----------------------------|---------|---------|---------|
|                     | Hand                        | Horse   | Steam   | Total   |
| United Kingdom . .  | 3,200                       | 6,330   | 54,800  | 64,330  |
| France . . .        | 3,500                       | 9,300   | 23,680  | 36,480  |
| Germany . . .       | 4,200                       | 11,500  | 32,320  | 48,020  |
| Russia . . .        | 9,100                       | 62,700  | 12,400  | 84,200  |
| Austria . . .       | 3,530                       | 10,700  | 10,080  | 24,310  |
| Italy . . .         | 2,940                       | 3,800   | 7,080   | 13,820  |
| Spain . . .         | 1,590                       | 2,640   | 4,720   | 8,950   |
| Portugal . . .      | 350                         | 420     | 680     | 1,450   |
| Sweden . . .        | 420                         | 1,500   | 2,040   | 3,960   |
| Norway . . .        | 180                         | 450     | 1,640   | 2,270   |
| Denmark . . .       | 200                         | 1,240   | 1,020   | 2,460   |
| Holland . . .       | 420                         | 810     | 2,400   | 3,630   |
| Belgium . . .       | 560                         | 810     | 4,720   | 6,090   |
| Switzerland . . .   | 270                         | 300     | 2,320   | 2,890   |
| Roumania, &c. . .   | 1,620                       | 3,500   | 2,280   | 7,400   |
| Europe . . .        | 32,080                      | 116,000 | 162,180 | 310,260 |
| United States . . . | 6,400                       | 54,600  | 72,240  | 133,240 |
| Canada . . .        | 420                         | 4,200   | 5,560   | 10,180  |
| Australia . . .     | 340                         | 5,700   | 3,360   | 9,400   |
| Total . . .         | 39,240                      | 180,500 | 243,340 | 463,080 |

Energy may be classified as productive and distributive, the first including all that is human, all the power of fixed engines, and half that of horses. The account will then stand thus for 1896 :—

|                     | Millions of Foot-Tons Daily |               |         | Foot-Tons per Inhab. |
|---------------------|-----------------------------|---------------|---------|----------------------|
|                     | Pro-ductive                 | Distri-butive | Total   |                      |
| United Kingdom . .  | 15,570                      | 48,760        | 64,330  | 1,620                |
| France . . .        | 12,670                      | 23,810        | 36,480  | 950                  |
| Germany . . .       | 19,550                      | 28,470        | 48,020  | 920                  |
| Russia . . .        | 42,170                      | 42,030        | 84,200  | 750                  |
| Austria . . .       | 10,800                      | 13,510        | 24,310  | 560                  |
| Italy . . .         | 5,560                       | 8,260         | 13,820  | 440                  |
| Spain . . .         | 3,110                       | 5,840         | 8,950   | 520                  |
| Portugal . . .      | 600                         | 850           | 1,450   | 310                  |
| Sweden . . .        | 1,290                       | 2,670         | 3,960   | 800                  |
| Norway . . .        | 450                         | 1,820         | 2,270   | 1,130                |
| Denmark . . .       | 860                         | 1,600         | 2,460   | 1,100                |
| Holland . . .       | 1,150                       | 2,480         | 3,630   | 760                  |
| Belgium . . .       | 2,530                       | 3,560         | 6,090   | 950                  |
| Switzerland . . .   | 780                         | 2,110         | 2,890   | 960                  |
| Roumania, &c. . .   | 4,170                       | 3,230         | 7,400   | 450                  |
| Europe . . .        | 121,260                     | 189,000       | 310,260 | 810                  |
| United States . . . | 49,460                      | 83,780        | 133,240 | 1,880                |
| Canada . . .        | 3,800                       | 6,380         | 10,180  | 1,990                |
| Australia . . .     | 4,230                       | 5,170         | 9,400   | 2,240                |
| Total . . .         | 178,750                     | 284,330       | 463,080 | 1,020                |

Productive energy stands for 38 per cent., distributive

62 per cent. of the total. The latter has increased much more rapidly than the former, viz. :—

|                    | Millions of Foot-Tons Daily |         |          | Rate of Increase per Cent. |
|--------------------|-----------------------------|---------|----------|----------------------------|
|                    | 1840                        | 1896    | Increase |                            |
| Productive . . .   | 73,700                      | 178,750 | 105,050  | 142                        |
| Distributive . . . | 50,300                      | 284,330 | 234,030  | 465                        |
| Total . . .        | 124,000                     | 463,080 | 339,080  | 273                        |

See *Steam*, page 807.

## ENGINEERING

Blackwall tunnel under the Thames, at London, was completed in May 1897, having occupied 800 men during 5 years: length 2100 yards, diameter 27 feet, with central road and foot-walk on each side. It is ventilated by 4 shafts of 48 feet diameter, and lit with 700 electric lights of 32-candle power. It comprises 3 sections :—

North side, 900 yards, incline 1 in 34.

Central, 400 yards, level.

South side, 800 yards, incline 1 in 36.

In mid-river the works are 5 feet below water; the men were protected by a steel shield and progressed 4 feet

daily. They excavated 500,000 tons, and the materials for the tunnel comprised 7,000,000 bricks, 1,000,000 tiles, 110,000 tons concrete, 20,000 tons cement, and 17,000 tons cast iron. Total cost £871,000, equal to £410 per lineal yard, whereas Brunel's tunnel cost £1300 per yard.

In Holland the pumping-out of Lake Haarlem, area 45,000 acres, depth 15 feet, was completed in 1852, after 11 years of labour: the land was sold at £17 per acre, and the work cost £1,080,000, that is £300,000 over the price of the land. In 1894 a project was laid before the Dutch Parliament to pump out the Zuyder Zee, area 480,000 acres, depth 12 feet, at an estimated cost of £26,000,000, or £54 for each acre of land reclaimed, the work to be finished in 33 years. The principal work would be a wall 25 miles long, 200 feet thick, and 18 feet over sea-level, to take 9 years in construction.

## EXPLORATION

Nansen returned to Norway, after 3 years' absence, in August 1896, having reached 86.15 N. Lat., in 102 E. Long., in 1895, only 260 English miles from the North Pole. The furthest previous expedition was the United States schooner *Jeannette*, in September 1893, which reached Sanrikoft, 458 English miles from the Pole.

## F

## FAMINES

Besides those mentioned at page 256, an Indian blue-book states that in the famines of 1866-68-78 no fewer than 11,300,000 persons perished, viz. :—

|              |           |               |           |
|--------------|-----------|---------------|-----------|
| Orissa . . . | 1,300,000 | Madras . . .  | 4,085,000 |
| Punjab . . . | 1,450,000 | Oude, &c. . . | 4,486,000 |

No returns are yet published as to the famine of 1896.

## FINANCES

The finances of European States at four periods in the 19th century are shown as follows :—

|                   | Revenue, Millions £ |      |      |      | Debt, Millions £ |       |       |       |
|-------------------|---------------------|------|------|------|------------------|-------|-------|-------|
|                   | 1816                | 1830 | 1869 | 1898 | 1816             | 1830  | 1869  | 1898  |
| U. Kingdom        | 61.3                | 63   | 72   | 116  | 902              | 838   | 803   | 638   |
| France . . .      | 35.2                | 41   | 84   | 134  | 140              | 191   | 504   | 1,244 |
| Germany . . .     | 18.1                | 20   | 41   | 187  | 39               | 58    | 128   | 620   |
| Russia . . .      | 14.1                | 17   | 70   | 138  | 145              | 56    | 342   | 692   |
| Austria . . .     | 12.7                | 15   | 43   | 101  | 99               | 60    | 340   | 555   |
| Italy . . .       | 7.2                 | 9    | 33   | 67   | 25               | 50    | 333   | 516   |
| Spain . . .       | 7.7                 | 6    | 22   | 31   | 117              | 167   | 285   | 283   |
| Portugal . . .    | 1.9                 | 2    | 4    | 11   | 7                | 14    | 59    | 134   |
| Sweden . . .      | 1.2                 | 2    | 2    | 6    | 3                | 6     | 4     | 16    |
| Norway . . .      | 0.5                 | 1    | 1    | 4    | 1                | 2     | 2     | 9     |
| Denmark . . .     | 1.1                 | 2    | 3    | 4    | 4                | 11    | 13    | 11    |
| Holland . . .     | 6.4                 | 7    | 9    | 11   | 110              | 157   | 76    | 92    |
| Belgium . . .     | ...                 | ...  | 7    | 16   | ...              | ...   | 28    | 93    |
| Switzerland . . . | 0.4                 | 1    | 2    | 4    | ...              | ...   | 2     | 13    |
| Turkey . . .      | 2.3                 | 4    | 14   | 19   | 3                | 8     | 92    | 162   |
| Roumania . . .    | ...                 | ...  | 2    | 9    | ...              | ...   | ...   | 50    |
| Servia . . .      | ...                 | ...  | ...  | 3    | ...              | ...   | ...   | 16    |
| Bulgaria . . .    | ...                 | ...  | ...  | 3    | ...              | ...   | ...   | 7     |
| Greece . . .      | ...                 | 1    | 1    | 4    | ...              | ...   | 18    | 37    |
| Total . . .       | 170.1               | 190  | 410  | 868  | 1,595            | 1,618 | 3,029 | 5,188 |

In many of the above States a considerable portion of revenue arises from Government railways, and these also represent a great share of national debt. Deducting railways from both accounts, we find in 1898 as follows :—

|                   | Revenue, Millions £ | Debt, Millions £ | £ per Inhab. |      |
|-------------------|---------------------|------------------|--------------|------|
|                   |                     |                  | Revenue      | Debt |
| United Kingdom    | 116                 | 638              | 2.9          | 16.0 |
| France . . .      | 134                 | 1,214            | 3.5          | 31.8 |
| Germany . . .     | 124                 | 115              | 2.4          | 2.3  |
| Russia . . .      | 109                 | 326              | 1.0          | 3.0  |
| Austria . . .     | 83                  | 324              | 1.9          | 8.0  |
| Italy . . .       | 64                  | 386              | 2.1          | 12.5 |
| Spain . . .       | 31                  | 283              | 1.8          | 15.5 |
| Portugal . . .    | 11                  | 120              | 2.3          | 28.0 |
| Sweden & Norway   | 9                   | ...              | 1.3          | ...  |
| Denmark . . .     | 4                   | ...              | 1.8          | ...  |
| Holland . . .     | 11                  | 70               | 2.3          | 14.5 |
| Belgium . . .     | 9                   | 36               | 1.5          | 5.7  |
| Switzerland . . . | 4                   | 13               | 2.3          | 4.3  |
| Roumania . . .    | 9                   | 24               | 1.5          | 4.2  |
| Servia . . .      | 3                   | 8                | 1.2          | 3.5  |
| Bulgaria . . .    | 3                   | 5                | 1.0          | 1.5  |
| Greece . . .      | 4                   | 37               | 1.8          | 16.5 |
| Turkey . . .      | 18                  | 162              | 1.0          | 8.5  |
| Total . . .       | 746                 | 3,775            | 2.0          | 10.1 |

See *Taxes*, page 810.

In the subjoined table are shown the amount raised by taxes, the income of State Railways, and the item of Sundries, which include postal service, crown lands, and the receipts from all Government properties or services, except lotteries and monopolies, which are put under taxes. It is to be observed that Germany and most countries count the gross receipts of State railways, while Holland and some others count only the net income

from same. As regards France, there are 1700 miles of recently made State railways, but they seem to produce nothing.

|                         | Revenue, £ (000 omitted) |          |          |           |
|-------------------------|--------------------------|----------|----------|-----------|
|                         | Taxes                    | Railways | Sundries | Total     |

## DEBT.

Considering only national debt, that is, excluding communal, county, and municipal, and deducting the value of State railways, we can compare the same with the wealth of nations thus :—

|                         | Millions £ Sterling |       | Ratio of Debt | £ Debt per Inhab. |
|-------------------------|---------------------|-------|---------------|-------------------|
|                         | Wealth              | Debt  |               |                   |
| United Kingdom . . .    | 11,806              | 638   | 5.3           | 16.0              |
| France . . . . .        | 9,690               | 1,214 | 12.5          | 31.5              |
| Germany . . . . .       | 8,052               | 115   | 1.4           | 2.2               |
| Russia . . . . .        | 6,425               | 326   | 5.0           | 3.0               |
| Austria . . . . .       | 4,512               | 324   | 7.2           | 7.5               |
| Italy . . . . .         | 3,160               | 386   | 12.2          | 12.2              |
| Spain . . . . .         | 2,380               | 283   | 11.9          | 16.1              |
| Portugal . . . . .      | 411                 | 120   | 29.0          | 24.0              |

| Australia . . . . .     | 1,076               | 96    | 8.9           | 22.0              |
| Argentina . . . . .     | 616                 | 88    | 14.3          | 22.0              |
| Total . . . . .         | 70,385              | 4,232 | 6.0           | 9.5               |

## UNITED KINGDOM

The revenue of the United Kingdom for the year ending March 31, 1898, and the estimates for 1899, compare with the revenue of 1897 as follows :—

|                       | £ Sterling  |             |             |
|-----------------------|-------------|-------------|-------------|
|                       | 1897        | 1898        | 1899        |
| Customs . . . . .     | 21,460,000  | 22,010,000  | 21,290,000  |
| Excise . . . . .      | 32,370,000  | 33,270,000  | 33,810,000  |
| Income-tax . . . . .  | 16,650,000  | 17,250,000  | 17,700,000  |
| Stamps . . . . .      | 7,350,000   | 7,650,000   | 7,600,000   |
| Duties . . . . .      | 16,390,000  | 17,780,000  | 16,310,000  |
| All taxes . . . . .   | 94,220,000  | 97,960,000  | 96,710,000  |
| Post-Office . . . . . | 14,770,000  | 15,180,000  | 15,740,000  |
| Sundries . . . . .    | 3,210,000   | 2,880,000   | 2,880,000   |
| Total . . . . .       | 112,200,000 | 116,020,000 | 115,330,000 |

A portion of the above was given in aid of Local Taxation accounts, viz :—

|                             | 1897        | 1898        |
|-----------------------------|-------------|-------------|
| Local subsidies . . . . .   | 8,250,000   | 9,400,000   |
| Imperial Treasury . . . . . | 103,950,000 | 106,620,000 |
| Total . . . . .             | 112,200,000 | 116,020,000 |

The average revenue and expenditure for five years ending March 1896 were :—

| Revenue               | £           | Expenditure             | £           |
|-----------------------|-------------|-------------------------|-------------|
| Customs . . . . .     | 20,200,000  | National Debt           | 25,100,000  |
| Excise . . . . .      | 29,300,000  | Civil Service . . . . . | 20,000,000  |
| Income-tax . . . . .  | 14,800,000  | Local grants . . . . .  | 7,400,000   |
| Duties, &c. . . . .   | 17,300,000  | Army & Navy . . . . .   | 34,800,000  |
| Post-Office . . . . . | 13,200,000  | Post-Office . . . . .   | 10,000,000  |
| Sundries . . . . .    | 6,400,000   | Sundries . . . . .      | 4,300,000   |
| Total . . . . .       | 101,200,000 | Total . . . . .         | 101,600,000 |

Expenditure for 1896 and 1897 was as follows :—

|                         | £ Sterling  |             |           |
|-------------------------|-------------|-------------|-----------|
|                         | 1896        | 1897        | Increase  |
| National Debt . . . . . | 25,000,000  | 25,000,000  | ...       |
| Civil Service . . . . . | 21,250,000  | 21,470,000  | 220,000   |
| Local grants . . . . .  | 7,400,000   | 8,200,000   | 800,000   |
| Army and Navy . . . . . | 38,330,000  | 41,460,000  | 3,130,000 |
| Post-Office . . . . .   | 10,480,000  | 10,830,000  | 350,000   |
| Sundries . . . . .      | 4,790,000   | 4,540,000   | ...       |
| Total . . . . .         | 107,250,000 | 111,500,000 | 4,250,000 |

While other nations, with few exceptions, have increased their debt in the last fifty years, ours has been reduced, viz :—

| Year           | Debt, £     | Interest, £ | Per Inhabitant |          |
|----------------|-------------|-------------|----------------|----------|
|                |             |             | Debt, £        | Interest |
| 1848 . . . . . | 773,000,000 | 27,700,000  | 28.4           | 215.     |
| 1857 . . . . . | 808,100,000 | 28,500,000  | 28.8           | 205.     |
| 1870 . . . . . | 798,000,000 | 27,100,000  | 25.5           | 185.     |
| 1889 . . . . . | 694,400,000 | 24,800,000  | 18.2           | 135.     |
| 1898 . . . . . | 615,000,000 | 23,500,000  | 15.5           | 125.     |

The nominal amount of debt on March 31st, 1898, was £638,300,000, from which deducting the value of Suez

Canal shares, the actual debt was as stated above. National debt is at present equal to 5½ per cent. of the estimated wealth of the nation, whereas in the year of Queen Victoria's accession (1837) it was over 20 per cent. of wealth.

An official return of the imperial revenue, showing the portions furnished by Great Britain and Ireland, is as follows:—

| Year       | Millions £ Sterling |         |            |
|------------|---------------------|---------|------------|
|            | G. Britain          | Ireland | U. Kingdom |
| 1840 . . . | 46.3*               | 5.4     | 51.7       |
| 1860 . . . | 61.4                | 7.7     | 69.1       |
| 1880 . . . | 69.8                | 7.3     | 77.1       |
| 1890 . . . | 84.9                | 7.9     | 92.8       |
| 1897 . . . | 101.9               | 8.2     | 110.1      |

The above, compared with population, shows per head as follows:—

| Year       | Shillings per Head |         |            |
|------------|--------------------|---------|------------|
|            | G. Britain         | Ireland | U. Kingdom |
| 1840 . . . | 50                 | 13      | 39         |
| 1860 . . . | 53                 | 27      | 48         |
| 1880 . . . | 48                 | 28      | 44         |
| 1890 . . . | 51                 | 34      | 49         |
| 1897 . . . | 57                 | 36      | 55         |

Comparing 1897 with 1840, we find that revenue in Great Britain has increased 7 shillings, in Ireland 23 shillings per head. The ratio of increase has been 14 per cent. in Great Britain, 177 per cent. in Ireland. The receipts from the three kingdoms in 1897 were as follows:—

| £ Sterling (000 omitted) |         |          |         |          |
|--------------------------|---------|----------|---------|----------|
|                          | England | Scotland | Ireland | U. King. |
| Customs . .              | 17,030  | 2,110    | 2,330   | 21,470   |
| Excise . .               | 24,830  | 4,330    | 3,140   | 32,300   |
| Taxes . .                | 34,690  | 3,690    | 1,700   | 40,080   |
| Post-Office .            | 12,540  | 1,450    | 810     | 14,800   |
| Sundries . .             | 1,150   | 110      | 170     | 1,430    |
| Total . .                | 90,240  | 11,690   | 8,150   | 110,080  |

See *Taxation*, page 810.

#### FRANCE

Revenue and expenditure accounts show as follows:—

| Revenue          | Millions £ Sterling |       |       |       |
|------------------|---------------------|-------|-------|-------|
|                  | 1880                | 1890  | 1894  | 1898  |
| Direct tax . .   | 15.2                | 19.2  | 20.6  | 19.3  |
| Customs . .      | 14.7                | 15.0  | 19.2  | 16.5  |
| Stamp-duties . . | 27.9                | 28.5  | 28.4  | 29.9  |
| Post-Office . .  | 5.5                 | 8.1   | 8.8   | 9.2   |
| Excise . .       | 43.1                | 47.8  | 48.0  | 43.2  |
| Sundries . .     | 30.8                | 34.7  | 13.4  | 16.4  |
| Total . .        | 137.2               | 153.3 | 138.4 | 134.5 |

\* To read thus: 46.3 signifies £46,300,000.

| Expenditure      | Millions £ Sterling |       |       |       |
|------------------|---------------------|-------|-------|-------|
|                  | 1880                | 1890  | 1894  | 1898  |
| Debt . . .       | 49.7                | 50.7  | 49.4  | 50.0  |
| Army . . .       | 22.4                | 23.2  | 25.9  | 25.2  |
| Navy . . .       | 7.8                 | 8.0   | 14.2  | 10.3  |
| Public works . . | 26.2                | 14.4  | 13.0  | 7.8   |
| Commerce . .     | 1.7                 | 9.6   | 8.1   | 8.2   |
| Instruction . .  | 4.4                 | 7.6   | 8.2   | 8.5   |
| Local grants . . | 1.1                 | 8.6   | 1.6   | 1.6   |
| Sundries . .     | 37.1                | 27.7  | 18.8  | 22.1  |
| Total . .        | 150.4               | 149.8 | 139.2 | 133.7 |

In 1890 the amount of revenue refunded to Communes was 7 millions sterling more than at present, which accounts in some measure for the reduction of expenditure. The ratio of revenue per head of population at various dates shows thus:—

| Year       | £           | £ per Inhab. |
|------------|-------------|--------------|
| 1860 . . . | 68,500,000  | 1.8          |
| 1880 . . . | 135,700,000 | 3.5          |
| 1898 . . . | 134,500,000 | 3.4          |

National debt has more than doubled since the year preceding the Franco-German war, as the following table shows:—

| Year       | Millions £ |          |       | £ per Inhabitant |
|------------|------------|----------|-------|------------------|
|            | Funded     | Floating | Total |                  |
| 1869 . . . | 468        | 36       | 504   | 13.2             |
| 1887 . . . | 828        | 118      | 946   | 24.8             |
| 1890 . . . | 1,040      | 204      | 1,244 | 32.4             |

The floating debt properly so called is only 46 millions, but the "annuity" and other unfunded debts being added make a total of 204 millions. Interest on funded debt amounts to £32,500,000, being 3½ per cent. on principal, and the other expenses, especially those of floating debt, bring up the annual burthen of this department to a total of 50 millions, equal to 26 shillings per inhabitant, against 12 shillings in the United Kingdom.

#### GERMANY

The revenue of the States composing the Empire has grown as follows:—

|                  | 1867<br>£  | 1890<br>£   | 1897<br>£   |
|------------------|------------|-------------|-------------|
| Prussia . . .    | 25,300,000 | 79,300,000  | 97,000,000  |
| Bavaria . . .    | 5,900,000  | 12,200,000  | 17,200,000  |
| Saxony . . .     | 2,200,000  | 3,900,000   | 7,500,000   |
| Wurtemberg . .   | 1,300,000  | 2,800,000   | 3,700,000   |
| Small States . . | 5,800,000  | 9,500,000   | 18,000,000  |
| Imperial tax . . | ...        | 47,000,000  | 44,000,000  |
| Total . .        | 40,500,000 | 154,700,000 | 187,400,000 |

The imperial revenue is in reality £65,000,000, but this includes £21,000,000 contributed by the various States as "matriculas" and already included in the revenues raised by those States. If we exclude railway

## FINANCES

702

## FINANCES

receipts, and apportion imperial taxes according to population, the revenue shows thus :—

|                        | £           | £ per Inhab. |
|------------------------|-------------|--------------|
| Prussia . . . . .      | 74,400,000  | 2.4          |
| Bavaria . . . . .      | 16,100,000  | 2.7          |
| Saxony . . . . .       | 8,500,000   | 2.3          |
| Wurtemberg . . . . .   | 4,800,000   | 2.3          |
| Other States . . . . . | 20,200,000  | 2.3          |
| Total . . . . .        | 124,000,000 | 2.4          |

The average budget for the empire in five years ending 1897 showed thus :—

| Revenue              | Millions £ | Expenses                | Millions £ |
|----------------------|------------|-------------------------|------------|
| Customs . . . . .    | 17.6       | Debt . . . . .          | 3.5        |
| Excise . . . . .     | 13.6       | Army . . . . .          | 29.0       |
| Matriculas . . . . . | 19.1       | Navy . . . . .          | 4.2        |
| Stamps . . . . .     | 2.3        | Civil Service . . . . . | 18.8       |
| Sundries . . . . .   | 9.8        | Sundries . . . . .      | 7.9        |
| Total . . . . .      | 62.4       | Total . . . . .         | 63.4       |

Matriculas in the above table represent the contributions of the several States to defray imperial expenses, that of Prussia amounting to £12,800,000, of Bavaria to £2,600,000, and the other States making up between them £3,700,000 sterling.

National debt has grown as follows :—

|                        | Millions £ |      |      |
|------------------------|------------|------|------|
|                        | 1867       | 1890 | 1897 |
| Prussia . . . . .      | 49         | 230  | 325  |
| Bavaria . . . . .      | 30         | 68   | 71   |
| Other States . . . . . | 49         | 105  | 118  |
| Total . . . . .        | 128        | 403  | 514  |
| Imperial . . . . .     | ...        | 62   | 106  |
| Grand total . . . . .  | 128        | 465  | 620  |

The increase of debt since 1867 has been caused by the purchase or construction of railways for the State, which have at present a length of 26,440 miles, representing a cost of 505 millions sterling. Deducting this from the above sum it will be seen that the real debt of Germany is only 115 millions sterling, or a fraction over £2 per inhabitant, against £16 in the United Kingdom and £32 in France.

## RUSSIA

The growth of revenue and debt in late years has been as follows :—

|                | Millions £ |      | Shillings per Inhab. |      |
|----------------|------------|------|----------------------|------|
|                | Revenue    | Debt | Revenue              | Debt |
| 1875 . . . . . | 74         | 370  | 18                   | 90   |
| 1889 . . . . . | 90         | 610  | 19                   | 128  |
| 1898 . . . . . | 138        | 692  | 27                   | 133  |

Excluding State railways, the revenue and debt in 1896 were :—

|                   | £ Sterling  | Shillings per Inhabitant |
|-------------------|-------------|--------------------------|
| Revenue . . . . . | 112,000,000 | 21                       |
| Debt . . . . .    | 326,000,000 | 61                       |

Revenue and expenditure during five years to December 1896 averaged as follows :—

| Revenue               | Millions £ | Expenses                | Millions £ |
|-----------------------|------------|-------------------------|------------|
| Customs . . . . .     | 15.8*      | Debt . . . . .          | 26.1       |
| Excise . . . . .      | 38.0       | Army . . . . .          | 27.0       |
| Railways . . . . .    | 15.2       | Navy . . . . .          | 5.4        |
| Land-tax . . . . .    | 14.0       | Public works . . . . .  | 11.0       |
| Stamps . . . . .      | 7.1        | Civil Service . . . . . | 8.3        |
| Post Office . . . . . | 3.7        | Schools . . . . .       | 2.2        |
| Sundries . . . . .    | 21.2       | Sundries . . . . .      | 45.7       |
| Total . . . . .       | 115.0      | Total . . . . .         | 126.0      |

Excess of expenditure from 1892 to 1897 was caused by the purchase or construction of 9000 miles of railway for the State, at a cost of 135 millions sterling, which amount was obtained by loans: thus the national debt rose from 540 millions in 1885 to 700 millions sterling in 1895, an average increase of 16 millions per annum. The Government has expended 366 millions sterling on railways, of which 284 millions are represented by 17,000 miles of State Railways, and 82 millions by shares on lines built by companies. Deducting this from the imperial debt, the latter is reduced to 326 millions, say 61 shillings per inhabitant.

## FINLAND

The finances of this duchy are kept distinct from those of Russia; the budget for 1896 was as follows :—

| Revenue              | £         | Expenses             | £         |
|----------------------|-----------|----------------------|-----------|
| Customs, &c. . . . . | 1,200,000 | Debt . . . . .       | 240,000   |
| Land-tax . . . . .   | 300,000   | Army . . . . .       | 400,000   |
| Sundries . . . . .   | 1,700,000 | Government . . . . . | 2,560,000 |
| Total . . . . .      | 3,200,000 | Total . . . . .      | 3,200,000 |

Public debt amounts to £4,400,000 sterling.

## AUSTRIA-HUNGARY

The total revenue of the monarchy is shown as follows :—

|                            | Millions £ Sterling |       |                  |
|----------------------------|---------------------|-------|------------------|
|                            | 1893                | 1897  | Average, 5 Years |
| Imperial customs . . . . . | 4.6                 | 4.3   | 4.3              |
| Austrian budget . . . . .  | 55.0                | 57.5  | 54.4             |
| Hungarian budget . . . . . | 38.8                | 39.2  | 39.3             |
| Total . . . . .            | 98.4                | 101.0 | 98.0             |

From the budgets of Austria and Hungary an annual quota is drawn, to defray the expenses common to the monarchy, the dual revenue showing thus :—

|                            | Millions £ Sterling |      |                  |
|----------------------------|---------------------|------|------------------|
|                            | 1893                | 1897 | Average, 5 Years |
| Imperial customs . . . . . | 4.6                 | 4.3  | 4.3              |
| Austrian quota . . . . .   | 5.4                 | 6.1  | 5.7              |
| Hungarian quota . . . . .  | 2.5                 | 2.8  | 2.6              |
| Total . . . . .            | 12.5                | 13.2 | 12.6             |

\* To read thus: Customs, £15,800,000.

Joint expenditure for 1898 is estimated at £13,400,000, of which £11,700,000 for the army, £1,200,000 for the navy, and £400,000 for diplomatic agents.

The Austrian budgets for five years ending 1895 averaged as follows:—

| Revenue            | Millions<br>£ | Expenses             | Millions<br>£ |
|--------------------|---------------|----------------------|---------------|
| Customs . . .      | 3.7           | Imperial quota . . . | 5.7           |
| Excise . . .       | 18.5          | Debt . . .           | 12.8          |
| Income-tax . . .   | 9.3           | Public works . . .   | 9.4           |
| Stamps . . .       | 5.0           | Agriculture . . .    | 1.5           |
| Railways . . .     | 6.7           | Militia . . .        | 1.6           |
| Post-Office . . .  | 3.0           | Worship . . .        | 2.0           |
| Sundries . . .     | 6.3           | Sundries . . .       | 18.6          |
| <b>Total . . .</b> | <b>52.5</b>   | <b>Total . . .</b>   | <b>51.6</b>   |

Hungarian budgets for five years averaged as follows:—

| Revenue            | Millions<br>£ | Expenses             | Millions<br>£ |
|--------------------|---------------|----------------------|---------------|
| Excise . . .       | 12.2          | Imperial quota . . . | 2.6           |
| Income-tax . . .   | 8.2           | Debt . . .           | 10.9          |
| Stamps . . .       | 2.8           | Public works . . .   | 6.3           |
| Railways . . .     | 6.7           | Agriculture . . .    | 1.2           |
| Post-Office . . .  | 1.3           | Militia . . .        | 1.1           |
| Sundries . . .     | 6.5           | Sundries . . .       | 15.3          |
| <b>Total . . .</b> | <b>37.7</b>   | <b>Total . . .</b>   | <b>37.4</b>   |

If we exclude railways, Post-Office, and other public services, in order to arrive at the precise amount of taxation, we find, for the whole monarchy:—

|                        |                   |
|------------------------|-------------------|
| Excise . . . . .       | £ 30,700,000      |
| Customs . . . . .      | 8,500,000         |
| Income-tax . . . . .   | 17,500,000        |
| Stamps, &c. . . . .    | 11,300,000        |
| <b>Total . . . . .</b> | <b>68,000,000</b> |

National debt is as follows:—

|                        | Millions of Florins |              |              | Millions<br>£ Sterling |
|------------------------|---------------------|--------------|--------------|------------------------|
|                        | Gold                | Silver       | Paper        |                        |
| General . . . . .      | 500                 | 400          | 2,170        | 264                    |
| Austrian . . . . .     | ...                 | 1,000        | 270          | 106                    |
| Hungarian . . . . .    | 710                 | 1,200        | 170          | 185                    |
| <b>Total . . . . .</b> | <b>1,210</b>        | <b>2,600</b> | <b>2,080</b> | <b>555</b>             |

In apportioning the general debt Austria took 70, Hungary 30, per cent., which makes the total debt of the former 291, that of the latter 264 millions sterling. But if the value of State railways be deducted the net debt of Austria will be 184, that of Hungary 140, millions sterling. The total service of debt costs 24 millions sterling, or nearly 4½ per cent. on the capital sum: it averages not quite 12 shillings per inhabitant, against 26 shillings in France, and 12 in the United Kingdom.

#### ITALY

The revenue and debt of the kingdom are shown as follows:—

|                | Millions £ |      | £ per Head |      |
|----------------|------------|------|------------|------|
|                | Revenue    | Debt | Revenue    | Debt |
| 1880 . . . . . | 55         | 393  | 2.0        | 14.0 |
| 1891 . . . . . | 64         | 489  | 2.1        | 16.3 |
| 1898 . . . . . | 67         | 516  | 2.2        | 16.6 |

The budgets of revenue and expenditure for five years ending 1896 give the following averages:—

| Revenue                | Millions<br>£ | Expenses                | Millions<br>£ |
|------------------------|---------------|-------------------------|---------------|
| Customs . . . . .      | 11.9          | Debt . . . . .          | 23.6          |
| Excise . . . . .       | 10.3          | Army . . . . .          | 11.1          |
| Income-tax . . . . .   | 17.9          | Navy . . . . .          | 4.2           |
| Stamps . . . . .       | 7.4           | Schools . . . . .       | 1.7           |
| Railways . . . . .     | 2.8           | Public works . . . . .  | 4.2           |
| Post-Office . . . . .  | 2.6           | Civil service . . . . . | 10.6          |
| Sundries . . . . .     | 12.3          | Sundries . . . . .      | 18.1          |
| <b>Total . . . . .</b> | <b>65.2</b>   | <b>Total . . . . .</b>  | <b>73.5</b>   |

There was a nominal deficit of 41 millions in the above five years, which was covered by 25 millions increase of debt, and 16 millions from sale of properties, &c.

If we deduct the cost of State railways (130 millions sterling), the national debt will amount to 386 millions sterling, equal to 12 per cent. of national wealth, being the same ratio as in France.

#### SPAIN

Revenue and national debt have been as follows:—

| Year           | Millions £ |      | £ per Inhabitant |      |
|----------------|------------|------|------------------|------|
|                | Revenue    | Debt | Revenue          | Debt |
| 1878 . . . . . | 30         | 550  | 1.8              | 32.0 |
| 1888 . . . . . | 35         | 260  | 2.0              | 15.0 |
| 1898 . . . . . | 31         | 283  | 1.8              | 16.2 |

The debt was repudiated in 1882, when bondholders were compelled to take new bonds of £40, for £100 old. Revenue and expenditure in the last five years averaged:—

|                       |             |
|-----------------------|-------------|
| Revenue . . . . .     | £29,200,000 |
| Expenditure . . . . . | 31,200,000  |

The average deficit in the past ten years has been £2,300,000. The budget for 1898 shows as follows:—

| Revenue                 | Millions<br>£ | Expenses               | Millions<br>£ |
|-------------------------|---------------|------------------------|---------------|
| Excise, &c. . . . .     | 12.3          | Debt . . . . .         | 13.0          |
| Property tax . . . . .  | 11.9          | Army . . . . .         | 9.6           |
| Monopolies, &c. . . . . | 6.8           | Sundries . . . . .     | 12.4          |
| <b>Total . . . . .</b>  | <b>31.0</b>   | <b>Total . . . . .</b> | <b>35.0</b>   |

In 1840 the debt was repudiated, bondholders receiving 30 per cent. in new scrip: this operation was repeated in 1882, bondholders being forced to accept 40 per cent. Thus the holder of a bond of £1000 in 1840 received new scrip for £300, and in 1882 this was again exchanged for £120 of newer scrip, so that 88 per cent. of the money due by Spain was thus wiped out, the actual debt representing only 12 per cent. of what should be the capital sum. This is exclusive of Cuban debt, amounting to 80 millions sterling, secured by revenues of that island.

#### PORTUGAL

Revenue and national debt were as follows:—

| Year           | Millions £ |       | £ per Inhabitant |      |
|----------------|------------|-------|------------------|------|
|                | Revenue    | Debt  | Revenue          | Debt |
| 1878 . . . . . | 5.7        | 94.0  | 1.3              | 22.5 |
| 1888 . . . . . | 8.4        | 113.0 | 1.8              | 25.0 |
| 1898 . . . . . | 11.5       | 134.0 | 2.4              | 27.2 |

The budgets of five years ending 1896 gave the following average :—

|                       |             |
|-----------------------|-------------|
| Revenue . . . . .     | £10,100,000 |
| Expenditure . . . . . | 11,200,000  |

The average deficit from 1888 to 1897 was 2 millions sterling per annum, and consequently the debt, as shown above, rose 21 millions in that interval.

The budget for 1898 showed as follows :—

| Revenue               | £          | Expenses                | £          |
|-----------------------|------------|-------------------------|------------|
| Customs . . . . .     | 5,500,000  | Debt . . . . .          | 4,000,000  |
| Income-tax . . . . .  | 2,600,000  | Army . . . . .          | 1,300,000  |
| Stamps . . . . .      | 1,100,000  | Public works . . . . .  | 1,300,000  |
| Railways . . . . .    | 400,000    | Civil Service . . . . . | 1,400,000  |
| Post-Office . . . . . | 300,000    | Colonies . . . . .      | 900,000    |
| Sundries . . . . .    | 1,600,000  | Sundries . . . . .      | 3,500,000  |
| Total . . . . .       | 11,500,000 | Total . . . . .         | 12,400,000 |

The amount raised by taxation is £9,600,000, equal to 40 shillings per inhabitant or 15 per cent. of national earnings. In 1893 the finances were so distracted that the Government compelled bondholders to accept a new arrangement whereby the interest on internal bonds was reduced to 70 per cent., that on the foreign or external debt to 33 per cent. of the interest previously paid. State railways stand for one-tenth of the national debt.

#### SWEDEN

Revenue and debt are shown as follows :—

| Year           | Revenue<br>£ | Debt<br>£  | £ per Head |      |
|----------------|--------------|------------|------------|------|
|                |              |            | Revenue    | Debt |
| 1878 . . . . . | 4,100,000    | 9,800,000  | 1.0        | 2.4  |
| 1888 . . . . . | 4,800,000    | 13,700,000 | 1.1        | 3.0  |
| 1897 . . . . . | 6,200,000    | 16,100,000 | 1.2        | 3.2  |

Budgets for the last five years give the following averages :—

| Revenue               | £         | Expenses                | £         |
|-----------------------|-----------|-------------------------|-----------|
| Customs . . . . .     | 2,100,000 | Debt . . . . .          | 600,000   |
| Excise . . . . .      | 1,200,000 | Army . . . . .          | 1,600,000 |
| Income-tax . . . . .  | 600,000   | Navy . . . . .          | 600,000   |
| Railways . . . . .    | 800,000   | Schools . . . . .       | 800,000   |
| Post-Office . . . . . | 600,000   | Civil Service . . . . . | 1,400,000 |
| Sundries . . . . .    | 1,200,000 | Sundries . . . . .      | 1,200,000 |
| Total . . . . .       | 6,500,000 | Total . . . . .         | 6,200,000 |

The amount raised by taxation is £4,800,000. The national debt is represented by State railways, which give a net profit of £500,000, or 3 per cent. on their cost of construction.

#### NORWAY

Revenue and debt have been as follows :—

| Year           | Revenue<br>£ | Debt<br>£ | £ per Head |      |
|----------------|--------------|-----------|------------|------|
|                |              |           | Revenue    | Debt |
| 1878 . . . . . | 2,400,000    | 4,000,000 | 1.3        | 2.2  |
| 1888 . . . . . | 2,400,000    | 5,900,000 | 1.2        | 3.0  |
| 1898 . . . . . | 3,800,000    | 8,800,000 | 1.8        | 4.2  |

Budgets of the last five years give the following averages :—

| Revenue               | £         | Expenses               | £         |
|-----------------------|-----------|------------------------|-----------|
| Customs . . . . .     | 1,300,000 | Debt . . . . .         | 300,000   |
| Excise . . . . .      | 400,000   | Army . . . . .         | 500,000   |
| Taxes . . . . .       | 500,000   | Navy . . . . .         | 200,000   |
| Railways . . . . .    | 400,000   | Public works . . . . . | 600,000   |
| Post-Office . . . . . | 300,000   | Schools . . . . .      | 300,000   |
| Sundries . . . . .    | 300,000   | Sundries . . . . .     | 1,400,000 |
| Total . . . . .       | 3,200,000 | Total . . . . .        | 3,300,000 |

The amount of revenue raised by taxation is £2,500,000. National debt is represented by a complete network of more than 1000 miles of railway, but the earnings do not suffice to pay the interest on the debt.

#### DENMARK

Notwithstanding the loss of Sleswig-Holstein in 1864, the Danish finances have improved in the last thirty years, viz. :—

| Year           | Revenue<br>£ | Debt<br>£  | £ per Head |      |
|----------------|--------------|------------|------------|------|
|                |              |            | Revenue    | Debt |
| 1866 . . . . . | 2,000,000    | 14,800,000 | 1.2        | 8.4  |
| 1889 . . . . . | 3,000,000    | 10,400,000 | 1.4        | 4.8  |
| 1898 . . . . . | 3,800,000    | 10,900,000 | 1.7        | 4.9  |

Budgets of the last five years give the following averages :—

| Revenue              | £         | Expenses               | £         |
|----------------------|-----------|------------------------|-----------|
| Customs . . . . .    | 1,400,000 | Debt . . . . .         | 400,000   |
| Excise . . . . .     | 300,000   | Army . . . . .         | 800,000   |
| Income-tax . . . . . | 500,000   | Navy . . . . .         | 400,000   |
| Stamps . . . . .     | 400,000   | Public works . . . . . | 300,000   |
| Sundries . . . . .   | 700,000   | Sundries . . . . .     | 1,700,000 |
| Total . . . . .      | 3,300,000 | Total . . . . .        | 3,600,000 |

The debt is fully represented by the State railways, besides which the Treasury has always a reserve of 5½ millions sterling to provide against sudden emergency.

#### HOLLAND

Revenue and debt have progressed as follows :—

| Year           | Revenue<br>£ | Debt<br>£  | £ per Head |      |
|----------------|--------------|------------|------------|------|
|                |              |            | Revenue    | Debt |
| 1879 . . . . . | 9,400,000    | 80,500,000 | 2.4        | 20.1 |
| 1888 . . . . . | 10,000,000   | 89,200,000 | 2.2        | 19.8 |
| 1898 . . . . . | 11,200,000   | 92,200,000 | 2.3        | 18.4 |

The budgets of the last five years gave the following averages :—

| Revenue              | £          | Expenses               | £          |
|----------------------|------------|------------------------|------------|
| Customs . . . . .    | 500,000    | Debt . . . . .         | 3,200,000  |
| Excise . . . . .     | 3,700,000  | Army . . . . .         | 3,100,000  |
| Direct tax . . . . . | 2,800,000  | Public works . . . . . | 900,000    |
| Sundries . . . . .   | 4,000,000  | Sundries . . . . .     | 4,100,000  |
| Total . . . . .      | 11,000,000 | Total . . . . .        | 11,300,000 |

The revenue raised by taxation was £9,500,000. National debt is 92 millions, of which 22 millions stand for State railways, leaving a real debt of 70 millions sterling.

## BELGIUM

Revenue and debt have grown as follows :—

|            | Millions £ |      | £ per Head |      |
|------------|------------|------|------------|------|
|            | Revenue    | Debt | Revenue    | Debt |
| 1878 . . . | 10.2       | 42.0 | 2.0        | 8.0  |
| 1890 . . . | 12.9       | 77.4 | 2.1        | 12.8 |
| 1898 . . . | 15.5       | 93.1 | 2.4        | 14.4 |

The budgets of five years ending December 1895 gave the following averages :—

| Revenue       | £          | Expenses     | £          |
|---------------|------------|--------------|------------|
| Taxes . . .   | 6,900,000  | Debt . . .   | 4,200,000  |
| Railways . .  | 6,600,000  | Army . . .   | 2,100,000  |
| Post-Office . | 500,000    | Railways . . | 4,200,000  |
| Sundries . .  | 200,000    | Sundries . . | 5,600,000  |
| Total . . .   | 14,200,000 | Total . . .  | 16,100,000 |

Surplus expenditure since 1890 has averaged two millions sterling per annum, caused by the construction of railways, which give a net profit of 4 per cent. on their cost. The State possesses 2050 miles of railway, which have cost 57 millions sterling, and if this be deducted the national debt will be reduced to 36 millions sterling.

## SWITZERLAND

The Federal Government has an annual revenue of £3,400,000, and a public debt of £3,200,000, but if the finances of the 22 Cantons be taken into account the figures will stand thus—

|                | Revenue £ | Debt, £    |
|----------------|-----------|------------|
| Federal . . .  | 3,600,000 | 3,200,000  |
| Cantonal . . . | 3,200,000 | 10,400,000 |
| Total . . .    | 6,800,000 | 13,600,000 |

The federal budget for 1898 is made up thus :—

| Revenue         | £         | Expenses        | £         |
|-----------------|-----------|-----------------|-----------|
| Customs . . .   | 1,800,000 | Army . . .      | 1,000,000 |
| Post-Office . . | 1,500,000 | Post-Office . . | 1,500,000 |
| Sundries . . .  | 300,000   | Sundries . . .  | 1,100,000 |
| Total . . .     | 3,600,000 | Total . . .     | 3,600,000 |

Between federal and local taxes the total is about 6 millions sterling, or 40 shillings per inhabitant, or 9 per cent. of national earnings. The total of federal and cantonal debts is hardly 3 per cent. of national wealth.

## DANUBIAN STATES.

The finances of these States may be briefly summed up thus :—

|                | Revenue, £ (000 omitted). |        |          |
|----------------|---------------------------|--------|----------|
|                | Roumania                  | Servia | Bulgaria |
| Customs . . .  | 2,500                     | 200    | 900      |
| Taxes . . .    | 1,500                     | 1,100  | 1,700    |
| Sundries . . . | 4,600                     | 1,200  | 1,000    |
| Total . . .    | 8,600                     | 2,500  | 3,600    |

Expenditure, £ (000 omitted).

|                | Roumania | Servia | Bulgaria |
|----------------|----------|--------|----------|
| Debt . . .     | 3,200    | 700    | 800      |
| Army . . .     | 1,800    | 600    | 900      |
| Sundries . . . | 3,600    | 1,200  | 1,600    |
| Total . . .    | 8,600    | 2,500  | 3,300    |

The following shows public debt and how much of it is accounted for by State railways :—

|                | Millions £ |          |           |
|----------------|------------|----------|-----------|
|                | Debt       | Railways | Real Debt |
| Roumania . . . | 50         | 26       | 24        |
| Servia . . .   | 16         | 8        | 8         |
| Bulgaria . . . | 7          | 2        | 5         |
| Total . . .    | 73         | 36       | 37        |

## GREECE

Revenue and debt have grown as follows :—

| Year       | Revenue, £ | Debt, £    | £ per Head |      |
|------------|------------|------------|------------|------|
|            |            |            | Revenue    | Debt |
| 1879 . . . | 1,600,000  | 19,400,000 | 1.0        | 12.0 |
| 1889 . . . | 3,400,000  | 22,700,000 | 1.5        | 10.3 |
| 1893 . . . | 3,800,000  | 37,000,000 | 1.6        | 15.0 |

Expenditure exceeded revenue, the aggregate for the past ten years showing as follows :—

|                         |             |
|-------------------------|-------------|
| Revenues, 1888-97 . . . | £34,800,000 |
| Expenses, „ . . .       | 43,600,000  |

The annual deficit has been close on a million sterling, and the debt now reaches 37 millions, this sum including the indemnity of 4 millions sterling payable to Turkey. Debt is equal to 17 per cent. of national wealth.

## TURKEY

The financial position of the Ottoman empire is shown thus :—

| Year       | Revenue, £ | Debt, £     |
|------------|------------|-------------|
| 1878 . . . | 15,000,000 | 245,000,000 |
| 1887 . . . | 16,200,000 | 180,000,000 |
| 1898 . . . | 18,500,000 | 162,000,000 |

The budget of 1898 is made up as follows :—

| Revenue         | £          | Expenses       | £          |
|-----------------|------------|----------------|------------|
| Customs . . .   | 2,000,000  | Debt . . .     | 6,500,000  |
| Excise . . .    | 2,600,000  | Army . . .     | 6,000,000  |
| Rural taxes . . | 8,600,000  | Sultan . . .   | 900,000    |
| Sundries . . .  | 5,300,000  | Sundries . . . | 5,100,000  |
| Total . . .     | 18,500,000 | Total . . .    | 18,500,000 |

In five years down to 1896 the expenditure averaged one million sterling over revenue. No fewer than 26 loans have been issued since 1854, amounting as follows :—

| Period        | No. of Loans | Millions £ |
|---------------|--------------|------------|
| 1854-64 . . . | 6            | 31         |
| 1865-80 . . . | 10           | 207        |
| 1881-96 . . . | 10           | 40         |
| Total . . .   | 26           | 278        |

Fifteen of the above loans were converted by new  
2 Y

issues in 1881-90-91-94. On the 8th December 1881, the empire was declared bankrupt, when loans and arrears of interest, amounting to 240 millions sterling, were reduced by 90 millions by an issue of new stock to foreign bondholders, leaving also an internal debt of 40 millions, besides 32 millions of war indemnity due to Russia, which made a total of 162 millions. Since then there have been loans and lottery bonds to the amount of 50 millions, and the funded debt in July 1897 amounted to £130,500,000, to which must be added £31,500,000 for Russian indemnity, making a total of 162 millions sterling.

## EGYPT

The finances were rearranged in 1885: revenue and debt are shown thus:—

| Year           | Revenue, £ | Debt, £     |
|----------------|------------|-------------|
| 1878 . . . . . | 7,400,000  | 85,000,000  |
| 1889 . . . . . | 9,700,000  | 103,400,000 |
| 1897 . . . . . | 10,500,000 | 104,600,000 |

The revenue of 1897 compares with that of 1889 as follows:—

|                    | 1889      | 1897       |
|--------------------|-----------|------------|
| Customs . . . . .  | 1,000,000 | 800,000    |
| Land tax . . . . . | 4,000,000 | 5,000,000  |
| Railways . . . . . | 1,300,000 | 1,800,000  |
| Sundries . . . . . | 2,500,000 | 2,900,000  |
| Total . . . . .    | 9,700,000 | 10,500,000 |

The expenditure of the same years compares thus:—

|                      | 1889      | 1897      |
|----------------------|-----------|-----------|
| Debt . . . . .       | 4,100,000 | 4,200,000 |
| Police . . . . .     | 700,000   | 800,000   |
| Government . . . . . | 4,600,000 | 4,900,000 |
| Total . . . . .      | 9,400,000 | 9,900,000 |

The railways are State property, and give a net profit of £1,030,000 a year, equal to 6½ per cent. on their cost. The actual debt of £104,600,000 is accounted for thus: canals, £19,400,000; railways, £16,200,000; mills, harbours, &c., £13,500,000; discount on loans, £26,400,000; ballet-dancers, palaces, &c., £47,300,000. The actual sum realised by the loans was 78 millions sterling, and the service of the debt is nearly 5½ per cent. on same. It is impossible to say what were the profits of Messrs. Goschen, Oppenheim, Bischoffsheim, and Rothschild in the loans.

## UNITED STATES

Finances compared with population at various dates show thus:—

| Year           | Millions £ |      | £ per Inhabitant |      |
|----------------|------------|------|------------------|------|
|                | Revenue    | Debt | Revenue          | Debt |
| 1870 . . . . . | 71.5       | 490  | 1.9              | 12.6 |
| 1880 . . . . . | 69.2       | 441  | 1.4              | 8.8  |
| 1890 . . . . . | 96.5       | 323  | 1.5              | 5.1  |
| 1897 . . . . . | 89.4       | 378  | 1.2              | 5.4  |

The budgets of the last eight years give the following averages of revenue:—

|                       | 1880-83<br>Millions £ | 1894-97<br>Millions £ | 1890-97<br>Millions £ |
|-----------------------|-----------------------|-----------------------|-----------------------|
| Customs . . . . .     | 43.2                  | 32.2                  | 37.7                  |
| Excise . . . . .      | 31.2                  | 30.2                  | 30.7                  |
| Post-Office . . . . . | 14.1                  | 16.5                  | 15.3                  |
| Sundries . . . . .    | 5.5                   | 4.3                   | 4.9                   |
| Total . . . . .       | 94.0                  | 83.2                  | 88.6                  |

Expenditure averaged as follows:—

|                       | 1890-93 | 1894-97 | 1890-97 |
|-----------------------|---------|---------|---------|
| Debt . . . . .        | 6.4     | 6.8     | 6.6     |
| Army . . . . .        | 10.4    | 11.0    | 10.7    |
| Navy . . . . .        | 5.6     | 6.4     | 6.0     |
| Post-Office . . . . . | 15.8    | 19.0    | 17.4    |
| Interior . . . . .    | 31.2    | 33.2    | 32.2    |
| Sundries . . . . .    | 16.6    | 15.0    | 15.8    |
| Total . . . . .       | 86.0    | 91.4    | 88.7    |

The first four years showed an average surplus of 8 millions sterling of revenue over expenditure, but the second four years showed the reverse, so that revenue and expenditure for the whole eight years were even. The budget of 1897 was as follows:—

| Revenue               | £          | Expenses             | £          |
|-----------------------|------------|----------------------|------------|
| Customs . . . . .     | 36,700,000 | Debt . . . . .       | 7,900,000  |
| Excise . . . . .      | 30,500,000 | Army . . . . .       | 10,600,000 |
| Post-Office . . . . . | 17,200,000 | Navy . . . . .       | 7,300,000  |
| Sundries . . . . .    | 5,000,000  | Government . . . . . | 67,500,000 |
| Total . . . . .       | 89,400,000 | Total . . . . .      | 93,300,000 |

The national debt has varied between 1880 and 1897 as follows:—

| Debt                       | Millions £ Sterling |      |      |
|----------------------------|---------------------|------|------|
|                            | 1880                | 1890 | 1897 |
| Bearing interest . . . . . | 358                 | 150  | 176  |
| No interest . . . . .      | 82                  | 172  | 202  |
| Total . . . . .            | 440                 | 322  | 378  |
| Cash in Treasury . . . . . | 41                  | 137  | 172  |
| Net debt . . . . .         | 399                 | 185  | 206  |

Local taxation exceeds national: the former almost doubled between 1870 and 1890. See *Local Finance*.

## CANADA

Revenue and debt have grown as follows:—

|                | Millions £ |      | £ per Head |      |
|----------------|------------|------|------------|------|
|                | Revenue    | Debt | Revenue    | Debt |
| 1880 . . . . . | 5.1*       | 32.1 | 1.1        | 7.0  |
| 1889 . . . . . | 7.8        | 49.2 | 1.6        | 10.2 |
| 1897 . . . . . | 7.8        | 69.0 | 1.5        | 13.8 |

\* To read thus: Revenue, £5,100,000.

The budget for 1897 was as follows :—

| Revenue            | £                | Expenses           | £                |
|--------------------|------------------|--------------------|------------------|
| Customs . . .      | 4,000,000        | Debt . . .         | 2,600,000        |
| Excise . . .       | 1,900,000        | Subsidies . . .    | 900,000          |
| Post-Office . . .  | 700,000          | Militia . . .      | 400,000          |
| Sundries . . .     | 1,200,000        | Government . . .   | 4,000,000        |
| <b>Total . . .</b> | <b>7,800,000</b> | <b>Total . . .</b> | <b>7,900,000</b> |

The subsidies are grants to the several Provinces for local affairs, averaging 3 shillings per inhabitant. Each Province has also its own budget. See *Local Finance*.

Debt amounts to 69 millions, of which 59 have been expended on public works. The Intercolonial railway, belonging to Government, cost 12 millions sterling, deducting which the debt would be reduced to 57 millions. The Treasury is said to possess assets altogether worth 15 millions, and the real debt is officially put down at 54 millions sterling.

#### AUSTRALIA

Revenue has trebled since 1871, viz. :—

|                    | £ Sterling (ooo omitted) |               |               |               |
|--------------------|--------------------------|---------------|---------------|---------------|
|                    | 1871                     | 1881          | 1891          | 1897          |
| N. S. Wales . . .  | 2,240                    | 6,710         | 10,040        | 9,310         |
| Victoria . . .     | 3,730                    | 5,190         | 8,340         | 6,630         |
| New Zealand . . .  | 1,340                    | 3,760         | 4,190         | 4,800         |
| Queensland . . .   | 800                      | 1,970         | 3,350         | 3,610         |
| W. Australia . . . | 110                      | 210           | 500           | 2,840         |
| S. Australia . . . | 780                      | 2,170         | 2,730         | 2,700         |
| Tasmania . . .     | 270                      | 510           | 760           | 800           |
| <b>Total . . .</b> | <b>9,270</b>             | <b>20,520</b> | <b>29,910</b> | <b>30,690</b> |

The above revenues gave the following averages per inhabitant :—

|                    | Shillings per Head |      |      |      |
|--------------------|--------------------|------|------|------|
|                    | 1871               | 1881 | 1891 | 1897 |
| N. S. Wales . . .  | 88                 | 175  | 182  | 144  |
| Victoria . . .     | 101                | 119  | 147  | 113  |

The following table shows the growth of public debt since 1871 :—

|                    | £ Sterling (ooo omitted) |               |                |                |
|--------------------|--------------------------|---------------|----------------|----------------|
|                    | 1871                     | 1881          | 1891           | 1897           |
| N. S. Wales . . .  | 10,600                   | 16,900        | 53,000         | 61,000         |
| Victoria . . .     | 12,000                   | 22,400        | 43,600         | 47,500         |
| New Zealand . . .  | 8,900                    | 29,700        | 38,800         | 44,400         |
| Queensland . . .   | 4,000                    | 13,300        | 29,500         | 34,500         |
| W. Australia . . . | ...                      | 500           | 1,600          | 7,300          |
| S. Australia . . . | 2,200                    | 11,200        | 20,400         | 24,400         |
| Tasmania . . .     | 1,300                    | 2,000         | 7,100          | 8,300          |
| <b>Total . . .</b> | <b>39,000</b>            | <b>96,000</b> | <b>194,000</b> | <b>227,500</b> |

Public works represent 94 per cent. of the actual debt, namely, 213 millions sterling, including 156 millions spent on railways, telegraphs, water-supply, &c., which bring in a gross annual income of 12 millions sterling, or 40 per cent. of the total revenue. The remaining 57 millions were expended on roads, bridges, parks, public

buildings, &c., which produce no income, though of equal utility. The expenditure has been as follows :—

| £ Sterling (000 omitted) |          |                  |            |         |
|--------------------------|----------|------------------|------------|---------|
|                          | Railways | Water-works, &c. | Roads, &c. | Total   |
| N. S. Wales . .          | 40,300   | 8,700            | 9,500      | 58,500  |
| Victoria . . .           | 35,700   | 8,100            | 2,600      | 46,400  |
| New Zealand . .          | 15,300   | 1,400            | 24,900     | 41,600  |
| Queensland . .           | 19,500   | 1,200            | 9,200      | 29,900  |
| W. Australia . .         | 4,500    | 300              | 1,800      | 6,600   |
| S. Australia . .         | 12,800   | 4,900            | 4,700      | 22,400  |
| Tasmania . . .           | 3,700    | 100              | 3,800      | 7,600   |
| Total . . .              | 131,800  | 24,700           | 56,500     | 213,000 |

The following table shows the net profit yearly on railways, the net burthen of public debt after deducting the railway profits, and the ratio of the latter to population :—

|                  | Railway Profits, £ | Net Debt Charge, £ | Shillings per Head of Interest |
|------------------|--------------------|--------------------|--------------------------------|
| N. S. Wales . .  | 1,540,000          | 770,000            | 12                             |
| Victoria . . .   | 1,090,000          | 800,000            | 14                             |
| New Zealand . .  | 510,000            | 1,200,000          | 33                             |
| Queensland . .   | 460,000            | 800,000            | 34                             |
| W. Australia . . | 360,000            | ...                | ...                            |
| S. Australia . . | 400,000            | 570,000            | 32                             |
| Tasmania . . .   | 40,000             | 270,000            | 32                             |
| Total . . .      | 4,400,000          | 4,300,000          | 20                             |

This shows that the annual charge for public debt, after deducting the net profits of railways, is exactly 20 shillings per inhabitant; if we deduct from this the revenue received from public lands (17 shillings), it appears that the debt of Australasia imposes a burthen of only 3 shillings per inhabitant out of ordinary revenue.

#### SOUTH AFRICA

The revenue and debt of Cape Colony and Natal have been as follows :—

|                 | Revenue, £ |           | Debt, £    |            |
|-----------------|------------|-----------|------------|------------|
|                 | 1887       | 1896      | 1887       | 1896       |
| Cape Colony . . | 3,160,000  | 6,800,000 | 22,500,000 | 27,400,000 |
| Natal . . . .   | 820,000    | 1,460,000 | 4,000,000  | 8,100,000  |
| Total . . . .   | 3,980,000  | 8,260,000 | 26,500,000 | 35,500,000 |

The finances of Cape Colony in 1896 were as follows :—

| Revenue        | £         | Expenses       | £         |
|----------------|-----------|----------------|-----------|
| Taxes . . . .  | 2,420,000 | Debt . . . .   | 1,240,000 |
| Railways . . . | 4,080,000 | Railways . . . | 1,920,000 |
| Sundries . . . | 300,000   | Government . . | 3,200,000 |
| Total . . . .  | 6,800,000 | Total . . . .  | 6,360,000 |

The finances of Natal in 1896 showed thus :—

| Revenue        | £         | Expenses       | £         |
|----------------|-----------|----------------|-----------|
| Railways . . . | 750,000   | Railways . . . | 400,000   |
| Customs, &c. . | 710,000   | Government . . | 880,000   |
| Total . . . .  | 1,460,000 | Total . . . .  | 1,280,000 |

The aggregate debt of the two colonies is 35½ millions sterling, the whole expended on railways and other public works. The State railways cost 24½ millions, leaving the net debt only 11 millions sterling; the railways give a net profit of £2,500,000 per annum, or 10 per cent. on capital.

#### INDIA

Revenue and debt have progressed as follows :—

| Year         | Millions of Rupees |       | Millions £ Sterling |       |
|--------------|--------------------|-------|---------------------|-------|
|              | Revenue            | Debt  | Revenue             | Debt  |
| 1880 . . . . | 684                | 1,530 | 57.0                | 127.5 |
| 1890 . . . . | 857                | 2,185 | 64.3                | 163.8 |
| 1897 . . . . | 957                | 2,323 | 59.9                | 145.0 |

Rupees were worth 20 pence in 1880, 18 pence in 1890, and 15 pence in 1897. The budgets of 1890 and 1897, reduced to English money, compared thus :—

|                  | Revenue, £ |            |
|------------------|------------|------------|
|                  | 1890       | 1897       |
| Land tax . . .   | 17,600,000 | 16,000,000 |
| Railways . . .   | 12,600,000 | 12,900,000 |
| Opium . . . .    | 6,200,000  | 3,600,000  |
| Salt tax . . . . | 6,000,000  | 5,500,000  |
| Post-Office . .  | 1,700,000  | 1,500,000  |
| Irrigation . . . | 1,400,000  | 2,000,000  |
| Sundries . . . . | 18,800,000 | 18,000,000 |
| Total . . . .    | 64,300,000 | 59,500,000 |

|                  | Expenditure, £ |            |
|------------------|----------------|------------|
|                  | 1890           | 1897       |
| Debt . . . . .   | 4,400,000      | 3,600,000  |
| Army . . . . .   | 16,600,000     | 15,200,000 |
| Railways . . . . | 14,100,000     | 14,700,000 |
| Roads . . . . .  | 4,100,000      | 3,600,000  |
| Canals . . . . . | 1,900,000      | 2,000,000  |
| Sundries . . . . | 21,000,000     | 22,300,000 |
| Total . . . . .  | 62,100,000     | 61,400,000 |

Expenditure, counted in rupees, has risen 26 per cent. in ten years, viz. :—

| Expended           | Millions of Rupees |      |      |
|--------------------|--------------------|------|------|
|                    | 1886               | 1891 | 1896 |
| In India . . . .   | 558                | 614  | 694  |
| In Great Britain . | 184                | 206  | 275  |
| Total . . . . .    | 772                | 820  | 969  |

#### WEST INDIES, BRITISH

Revenue and debt have progressed as follows :—

| Year         | £ Sterling |           | Shillings per Inhab. |      |
|--------------|------------|-----------|----------------------|------|
|              | Revenue    | Debt      | Revenue              | Debt |
| 1881 . . . . | 1,850,000  | 2,020,000 | 24                   | 27   |
| 1890 . . . . | 2,340,000  | 3,600,000 | 28                   | 43   |
| 1896 . . . . | 2,440,000  | 4,900,000 | 30                   | 58   |

The various islands and British Guiana showed in 1896 as follows :—

|                  | Revenue, £ | Debt, £   | Shillings per Head |      |
|------------------|------------|-----------|--------------------|------|
|                  |            |           | Revenue            | Debt |
| Jamaica . . .    | 780,000    | 2,200,000 | 22                 | 63   |
| Trinidad . . .   | 580,000    | 600,000   | 50                 | 52   |
| Barbados . . .   | 180,000    | 400,000   | 19                 | 42   |
| Small Islands .  | 350,000    | 800,000   | 23                 | 52   |
| British Guiana . | 550,000    | 900,000   | 40                 | 66   |
| West Indies . .  | 2,440,000  | 4,900,000 | 30                 | 58   |

Although debt has risen 150 per cent. in fifteen years it is still light, being under £3 per inhabitant, against £12 in Canada.

#### ALGERIA

Revenue rose from £1,700,000 in 1885 to £2,100,000 in 1897, the budget for last year showing as follows :—

| Revenue        | £         | Expenses         | £         |
|----------------|-----------|------------------|-----------|
| Customs . . .  | 520,000   | Public works . . | 1,250,000 |
| Land tax . . . | 480,000   | Gov. farms . . . | 620,000   |
| Stamps . . .   | 550,000   | Schools . . .    | 300,000   |
| Sundries . . . | 550,000   | Sundries . . .   | 630,000   |
| Total . . .    | 2,100,000 | Total . . .      | 2,800,000 |

Interest on debt, as well as army and navy expenses, are charged to the Colonial Department of the budget of France.

#### SPANISH WEST INDIES

In 1894 the revenue of these islands showed :—

|                  | £         | Shillings per Head |
|------------------|-----------|--------------------|
| Cuba . . .       | 4,900,000 | 60                 |
| Porto Rico . . . | 800,000   | 20                 |
| Total . . .      | 5,700,000 | 47                 |

The Cuban budget was made up thus :—

| Revenue        | £         | Expenses      | £         |
|----------------|-----------|---------------|-----------|
| Customs . . .  | 2,300,000 | Debt . . .    | 2,500,000 |
| Sundries . . . | 2,600,000 | Army, &c. . . | 2,700,000 |
| Total . . .    | 4,900,000 | Total . . .   | 5,200,000 |

That of Porto Rico was as follows :—

| Revenue        | £       | Expenses       | £       |
|----------------|---------|----------------|---------|
| Customs . . .  | 460,000 | Garrison . . . | 200,000 |
| Sundries . . . | 340,000 | Sundries . . . | 600,000 |
| Total . . .    | 800,000 | Total . . .    | 800,000 |

The debt of Cuba rose from 25 millions sterling in 1889 to 40 millions in 1894. Since the present revolution began Spain has piled up debt on Cuba, the amount in December 1897 reaching 91 millions sterling.

#### JAVA

Revenue and expenditure have been as follows :—

| Year       | Revenue, £ | Expenditure, £ |
|------------|------------|----------------|
| 1870 . . . | 10,300,000 | 9,600,000      |
| 1880 . . . | 12,200,000 | 12,200,000     |
| 1890 . . . | 11,500,000 | 10,600,000     |
| 1896 . . . | 11,000,000 | 12,000,000     |

The following table shows the annual average revenues for six years :—

|                | £ Sterling |            |            |
|----------------|------------|------------|------------|
|                | 1892-93    | 1894-95    | 1896-97    |
| Taxes . . .    | 4,100,000  | 3,900,000  | 4,100,000  |
| Products . . . | 5,500,000  | 5,200,000  | 5,100,000  |
| Sundries . . . | 1,500,000  | 1,700,000  | 1,900,000  |
| Total . . .    | 11,100,000 | 10,800,000 | 11,100,000 |

The revenue from products includes monopolies on opium and salt, as well as the profits from Government coffee-farms, &c.

#### CEYLON

Revenue and debt have progressed as follows :—

| Year       | Revenue, £ | Debt, £   | Shillings per Head |      |
|------------|------------|-----------|--------------------|------|
|            |            |           | Revenue            | Debt |
| 1881 . . . | 1,140,000  | 1,940,000 | 8                  | 14   |
| 1890 . . . | 1,220,000  | 2,520,000 | 8                  | 17   |
| 1896 . . . | 1,300,000  | 3,700,000 | 8                  | 23   |

The budget for 1896 was made up as follows :—

| Revenues       | £         | Expenses         | £         |
|----------------|-----------|------------------|-----------|
| Customs . . .  | 300,000   | Debt . . .       | 180,000   |
| Railway . . .  | 400,000   | Public works . . | 150,000   |
| Excise . . .   | 250,000   | Garrison . . .   | 100,000   |
| Sundries . . . | 350,000   | Government . .   | 870,000   |
| Total . . .    | 1,300,000 | Total . . .      | 1,300,000 |

The debt, amounting to £3,700,000, is represented by productive works, including piers, waterworks, and a railway of 300 miles.

#### ARGENTINA

Revenue and debt have grown as follows :—

| Year       | Millions £ |      | £ per Head |      |
|------------|------------|------|------------|------|
|            | Revenue    | Debt | Revenue    | Debt |
| 1870 . . . | 3.0        | 10.1 | 1.5        | 5.0  |
| 1880 . . . | 3.9        | 23.0 | 1.3        | 8.0  |
| 1890 . . . | 5.4        | 46.5 | 1.5        | 13.0 |
| 1897 . . . | 9.4        | 88.0 | 2.3        | 22.0 |

The returns for five years, ending December 1896, gave the following averages :—

|                   |            |
|-------------------|------------|
| Revenue . . .     | £7,700,000 |
| Expenditure . . . | 10,200,000 |

The budget for 1898 showed as follows :—

| Revenue        | £         | Expenses        | £          |
|----------------|-----------|-----------------|------------|
| Customs . . .  | 6,400,000 | Debt . . .      | 4,600,000  |
| Excise . . .   | 1,200,000 | Army and navy . | 2,000,000  |
| Sundries . . . | 1,800,000 | Sundries . . .  | 4,200,000  |
| Total . . .    | 9,400,000 | Total . . .     | 10,800,000 |

Each of the 14 provinces has also its budget, the aggregate revenue amounting to £2,300,000. The total taxation amounts to £11,500,000, or £3 per inhabitant, as compared with £2 in Canada and £2½ in the United States.

Debt rose more than 40 millions between 1890 and

1897, because the Federal Government took over the debts of the provinces, amounting to 37 millions, besides redeeming the guarantees given to certain railway companies. There are still municipal debts to the sum of 5 millions sterling, bringing up the total to 93 millions sterling, or 15 per cent. of the wealth of the nation.

## URUGUAY

Revenue and debt have grown as follows :—

| Year       | Revenue, £ | Debt, £    | £ per Inhabitant |      |
|------------|------------|------------|------------------|------|
|            |            |            | Revenue          | Debt |
| 1870 . . . | 900,000    | 8,000,000  | 2.2              | 20.0 |
| 1880 . . . | 1,600,000  | 11,000,000 | 3.5              | 24.0 |
| 1890 . . . | 2,400,000  | 15,000,000 | 3.2              | 20.0 |
| 1897 . . . | 3,400,000  | 25,300,000 | 4.0              | 30.0 |

The budget of 1897 showed as follows :—

| Revenue        |           | Expenses       |           |
|----------------|-----------|----------------|-----------|
|                | £         |                | £         |
| Customs . . .  | 1,900,000 | Debt . . .     | 1,100,000 |
| Sundries . . . | 1,500,000 | Sundries . . . | 2,300,000 |
| Total . . .    | 3,400,000 | Total . . .    | 3,400,000 |

Taxation, national and local, including £200,000 for the city of Monte Video, is about 4 millions sterling, or nearly £5 per inhabitant, against £3 in Argentina. Debt is equal to 21 per cent. of national wealth, against 15 per cent. in Argentina.

## CHILE

The budgets of five years to December 1896 give the following averages :—

|                       |            |
|-----------------------|------------|
| Revenue . . . . .     | £5,800,000 |
| Expenditure . . . . . | 5,500,000  |

The budget for 1897 was as follows :—

| Revenue          |           | Expenses      |           |
|------------------|-----------|---------------|-----------|
|                  | £         |               | £         |
| Customs . . .    | 1,700,000 | Debt . . .    | 900,000   |
| Nitrate dues . . | 2,900,000 | Army and Navy | 1,500,000 |
| Sundries . . .   | 1,300,000 | Government .  | 3,500,000 |
| Total . . .      | 5,900,000 | Total . . .   | 5,900,000 |

The debt of Chile amounts to £19,800,000, or £7 per inhabitant, against £13 in Argentina. The annual service of debt costs 7 shillings per inhabitant in Chile.

## PERU

Revenue and expenditure during five years to end of 1896 averaged thus :—

|                       |          |
|-----------------------|----------|
| Revenue . . . . .     | £800,000 |
| Expenditure . . . . . | 800,000  |

The budget for 1897 was as follows :—

| Revenue        |           | Expenses       |           |
|----------------|-----------|----------------|-----------|
|                | £         |                | £         |
| Customs . . .  | 630,000   | Army . . .     | 300,000   |
| Taxes . . .    | 250,000   | Interior . . . | 260,000   |
| Sundries . . . | 190,000   | Sundries . . . | 570,000   |
| Total . . .    | 1,070,000 | Total . . .    | 1,130,000 |

Peru borrowed 32 millions sterling in England in 1870-72, and soon after became bankrupt; in 1890 she handed over the State railways and mines to the bondholders, who agreed to cancel the debt. There is still an internal debt of 4 millions sterling.

## VENEZUELA

The budget of 1896 shows as follows :—

| Revenue        |           | Expenses     |           |
|----------------|-----------|--------------|-----------|
|                | £         |              | £         |
| Customs . . .  | 1,100,000 | Debt . . .   | 400,000   |
| Sundries . . . | 1,000,000 | Government . | 2,200,000 |
| Total . . .    | 2,100,000 | Total . . .  | 2,600,000 |

Debt amounts to 8 millions sterling, or £3½ per inhabitant.

## MEXICO

Budgets of the last five years give the following averages :—

|                       |            |
|-----------------------|------------|
| Revenue . . . . .     | £5,200,000 |
| Expenditure . . . . . | 4,900,000  |

The budget for 1898 was made up thus :—

| Revenue        |           | Expenses     |           |
|----------------|-----------|--------------|-----------|
|                | £         |              | £         |
| Customs . . .  | 2,500,000 | Debt . . .   | 1,900,000 |
| Excise . . .   | 2,200,000 | Army . . .   | 1,200,000 |
| Sundries . . . | 500,000   | Government . | 2,100,000 |
| Total . . .    | 5,200,000 | Total . . .  | 5,200,000 |

Public debt amounts to 30 millions sterling. There is local taxation, between States and municipalities, which sums up £3,000,000 per annum. Thus the total taxation is about 8 millions sterling, or 14 shillings per inhabitant.

## BRAZIL

The budgets of five years to end of 1897 gave the following averages :—

|                       |             |
|-----------------------|-------------|
| Revenue . . . . .     | £12,600,000 |
| Expenditure . . . . . | 13,800,000  |

The budget for 1898 showed as follows :—

| Revenue        |           | Expenses       |           |
|----------------|-----------|----------------|-----------|
|                | £         |                | £         |
| Customs . . .  | 6,800,000 | Debt . . .     | 3,500,000 |
| Railways . . . | 900,000   | Army and Navy  | 2,200,000 |
| Sundries . . . | 1,800,000 | Sundries . . . | 3,200,000 |
| Total . . .    | 9,500,000 | Total . . .    | 8,900,000 |

The budget is unreliable as regards expenditure, which always exceeds revenue. The foreign debt amounts to 39 millions sterling, the internal to 1600 millions of milreis, nominally worth 176 millions sterling, but at the present rate of exchange, only 44 millions sterling. This includes 700 million milreis of paper-money, which bears no interest. The national debt, excluding this paper-money, may be set down at 63 millions sterling, besides local debts amounting to £2,500,000 sterling.

## CHINA

The revenues of 1889 and 1893 showed as follows :—

|                | £ Sterling |            |
|----------------|------------|------------|
|                | 1889       | 1893       |
| Land tax . . . | 4,800,000  | 7,500,000  |
| Customs . . .  | 5,500,000  | 3,500,000  |
| Salt tax . . . | 2,300,000  | 2,200,000  |
| Sundries . . . | 6,400,000  | 1,800,000  |
| Total . . .    | 19,000,000 | 15,000,000 |

Foreign debt amounts to 55, internal to 5 millions, making altogether 60 millions sterling, the whole originating out of the war with Japan.

# FIRES

711

# FISH

## JAPAN

Budgets of the last five years give the following averages :—

|                       |             |
|-----------------------|-------------|
| Revenue . . . . .     | £16,200,000 |
| Expenditure . . . . . | 15,600,000  |

Estimates for 1898 are as follows :—

| Revenue               | £          | Expenses               | £          |
|-----------------------|------------|------------------------|------------|
| Land Tax . . . . .    | 5,800,000  | Debt . . . . .         | 4,400,000  |
| Excise . . . . .      | 6,300,000  | Army . . . . .         | 4,400,000  |
| Customs . . . . .     | 1,000,000  | Navy . . . . .         | 1,500,000  |
| Post-Office . . . . . | 1,800,000  | Public works . . . . . | 1,800,000  |
| Sundries . . . . .    | 3,300,000  | Sundries . . . . .     | 5,000,000  |
| Total . . . . .       | 18,200,000 | Total . . . . .        | 17,100,000 |

The above does not include an extraordinary expenditure of 20 millions sterling, probably a result of the late war. There are provincial taxes for local purposes, averaging 8 millions sterling per annum. Public debt 62 millions sterling.

## TRANSAAL.

Revenue has quadrupled in five years, viz. :—

|                       | £ Sterling |           |
|-----------------------|------------|-----------|
|                       | 1892       | 1897      |
| Revenue . . . . .     | 1,260,000  | 4,900,000 |
| Expenditure . . . . . | 1,190,000  | 4,700,000 |

Public debt is £2,700,000, which is fully covered by the value of public lands.

## FIRES

In 1891 the fires and fire-brigades showed as follows :—

|                      | Fires | Firemen | Cost, £ | Pence per Inhab. |
|----------------------|-------|---------|---------|------------------|
| London . . . . .     | 2,427 | 820     | 123,000 | 7.0              |
| Paris . . . . .      | 2,708 | 1,750   | 104,000 | 10.0             |
| Berlin . . . . .     | 3,290 | 780     | 70,000  | 11.5             |
| Vienna . . . . .     | 540   | 270     | 12,000  | 2.5              |
| Hamburg . . . . .    | 840   | 180     | 40,000  | 16.0             |
| Dresden . . . . .    | 330   | 130     | 11,000  | 8.0              |
| Leipzig . . . . .    | 290   | 130     | 15,000  | 10.0             |
| Buda-Pesth . . . . . | 406   | 150     | 12,000  | 5.5              |
| Breslau . . . . .    | 140   | 190     | 15,000  | 9.5              |
| Brussels . . . . .   | 120   | 170     | 11,000  | 5.2              |
| Bordeaux . . . . .   | 640   | 100     | 8,500   | 8.0              |
| Rome . . . . .       | 345   | 300     | 9,000   | 4.8              |
| Naples . . . . .     | 90    | 200     | 12,000  | 5.0              |
| Milan . . . . .      | 260   | 160     | 7,000   | 4.0              |
| Genoa . . . . .      | 120   | 120     | 6,000   | 6.6              |
| Florence . . . . .   | 150   | 130     | 3,000   | 4.0              |

The average cost of the fire-brigade in the above 16 cities is 7 pence per inhabitant yearly. Hamburg, Berlin, and Paris are much higher.

Fires in London since 1870 show thus :—

|                   | Annual Average | Inhab. to a Fire |
|-------------------|----------------|------------------|
| 1870-80 . . . . . | 1,795          | 2,150            |
| 1881-89 . . . . . | 2,160          | 1,780            |
| 1893-97 . . . . . | 3,444          | 1,320            |

The number of lives endangered, rescued, and lost, is shown as follows :—

| Lives                | Yearly Average |         |
|----------------------|----------------|---------|
|                      | 1888-92        | 1893-97 |
| Endangered . . . . . | 202            | 232     |
| Rescued . . . . .    | 146            | 142     |
| Lost . . . . .       | 56             | 90      |

Loss of life in the second period shows an increase of 60 per cent. over the quinquennium 1888-92, although the number of fires had risen only 15 per cent.

The following table shows the nature of the premises for an average of four years ending December 1897, and the causes as far as ascertained in the year 1897 :—

| Premises                 | No.   | Causes                 | No.   |
|--------------------------|-------|------------------------|-------|
| Private houses . . . . . | 926   | Lamps . . . . .        | 758   |
| Lodgings . . . . .       | 712   | Gas . . . . .          | 268   |
| Liquor shops . . . . .   | 82    | Candles . . . . .      | 253   |
| Drug stores . . . . .    | 44    | Children . . . . .     | 190   |
| Shoemakers . . . . .     | 41    | Ovens . . . . .        | 88    |
| Cabinetmakers . . . . .  | 30    | Hot ashes . . . . .    | 87    |
| Bakers . . . . .         | 27    | Airing linen . . . . . | 72    |
| Various . . . . .        | 1,590 | Various . . . . .      | 1,784 |
| Total . . . . .          | 3,452 | Total . . . . .        | 3,500 |

The London fire brigade has 999 men, 67 engines, 115 hose-carts, 36 miles of hose, 235 fire-escapes, 159 horses, 8 steam-tugs, and 592 fire-alarm call points.

## FRANCE

Fires in the city of Paris in 1890 destroyed property to the value of £360,000, being most numerous in December and January.

## FISH

The fisheries of the world may be set down approximately as follows :—

|                              | Fishermen | Tons Fish | Tons per Man |
|------------------------------|-----------|-----------|--------------|
| Great Britain . . . . .      | 93,000    | 670,000   | 7.2          |
| Ireland . . . . .            | 27,000    | 30,000    | 1.1          |
| United Kingdom . . . . .     | 120,000   | 700,000   | 5.8          |
| France . . . . .             | 85,000    | 150,000   | 1.8          |
| Germany . . . . .            | 20,000    | 60,000    | 3.0          |
| Russia . . . . .             | 75,000    | 220,000   | 3.0          |
| Italy . . . . .              | 70,000    | 100,000   | 1.5          |
| Spain and Portugal . . . . . | 50,000    | 90,000    | 1.8          |
| Scandinavia . . . . .        | 165,000   | 510,000   | 3.1          |
| Holland . . . . .            | 18,000    | 120,000   | 6.6          |
| Europe . . . . .             | 603,000   | 1,950,000 | 3.3          |
| United States . . . . .      | 192,000   | 880,000   | 4.6          |
| Canada . . . . .             | 71,000    | 240,000   | 3.4          |
| Total . . . . .              | 866,000   | 3,070,000 | 3.5          |

## FRANCE

France produced 1170 millions of oysters in 1890, of which 350 millions were exported and 820 millions retained for home consumption—that is, 43 per inhabitant.

Production multiplied twenty-fold in sixteen years, viz. :—

| Year           | Million Oysters | Value, £ |
|----------------|-----------------|----------|
| 1874 . . . . . | 64              | 74,000   |
| 1876 . . . . . | 259             | ...      |
| 1890 . . . . . | 1,170           | 440,000  |

## RUSSIA

Caviare is produced in large quantities, the export showing thus :—

| Year           | Tons  | Value, £ | £ per Ton |
|----------------|-------|----------|-----------|
| 1874 . . . . . | 1,800 | 180,000  | 100       |
| 1884 . . . . . | 5,100 | 340,000  | 67        |
| 1894 . . . . . | 2,400 | 180,000  | 75        |

A sturgeon weighing 200 lbs. will give 40 lbs. of caviare.

## UNITED KINGDOM

Since 1888 the weight of fish taken has increased 25 per cent., the value 27 per cent., viz. :—

|                    | Tons    |         | Value, £  |           |
|--------------------|---------|---------|-----------|-----------|
|                    | 1888    | 1896    | 1888      | 1896      |
| Herrings . . . . . | 230,000 | 280,000 | 1,090,000 | 1,090,000 |
| Haddock . . . . .  | 120,000 | 180,000 | 940,000   | 1,660,000 |
| Various . . . . .  | 230,000 | 270,000 | 3,490,000 | 4,250,000 |
| Total . . . . .    | 580,000 | 730,000 | 5,520,000 | 7,000,000 |

The above is exclusive of salmon and shell-fish worth £1,300,000, making a total value of £8,300,000.

In 1890 London consumed 50,000 tons of oysters.

## UNITED STATES

The figures for 1892 compare with those of 1880 thus :—

|                         | 1880      | 1892      | Increase     |
|-------------------------|-----------|-----------|--------------|
| Fishermen . . . . .     | 131,000   | 192,000   | 45 per cent. |
| Fish, value £ . . . . . | 8,600,000 | 9,400,000 | 10 "         |

The average value of fish taken per man was £66 in 1880, and only £49 in 1892.

## CANADA

The fisheries of 1895 show a value of £500,000 more than in 1885, viz. :—

|                               | Value, £  |           |
|-------------------------------|-----------|-----------|
|                               | 1885      | 1895      |
| Nova Scotia . . . . .         | 1,660,000 | 1,240,000 |
| New Brunswick . . . . .       | 800,000   | 880,000   |
| British Columbia, &c. . . . . | 1,080,000 | 1,920,000 |
| Total . . . . .               | 3,540,000 | 4,040,000 |

The principal fish taken in 1895 were :—

|                    | Tons    | Value, £  |
|--------------------|---------|-----------|
| Herring . . . . .  | 60,000  | 560,000   |
| Salmon . . . . .   | 10,000  | 740,000   |
| Sardines . . . . . | 12,000  | 80,000    |
| Various . . . . .  | 156,000 | 2,660,000 |
| Total . . . . .    | 238,000 | 4,040,000 |

## FLAX AND LINEN

The production of flax has been approximately as follows :—

|                         | Acres     |           | Tons Flax |         |
|-------------------------|-----------|-----------|-----------|---------|
|                         | 1885      | 1895      | 1885      | 1895    |
| U. Kingdom . . . . .    | 111,000   | 97,000    | 21,000    | 13,000  |
| France . . . . .        | 109,000   | 83,000    | 28,000    | 22,000  |
| Germany . . . . .       | 270,000   | 270,000   | 44,000    | 44,000  |
| Russia . . . . .        | 3,250,000 | 5,480,000 | 330,000   | 670,000 |
| Austria . . . . .       | 240,000   | 250,000   | 47,000    | 48,000  |
| Italy . . . . .         | 170,000   | 130,000   | 20,000    | 20,000  |
| Belgium . . . . .       | 98,000    | 100,000   | 21,000    | 24,000  |
| Other States . . . . .  | 102,000   | 120,000   | 15,000    | 19,000  |
| Europe . . . . .        | 4,350,000 | 6,530,000 | 526,000   | 860,000 |
| United States . . . . . | 400,000   | 1,320,000 | 40,000    | 80,000  |
| Total . . . . .         | 4,750,000 | 7,850,000 | 566,000   | 940,000 |

In the above interval of ten years the price of flax declined 15 per cent., that of linen 20 per cent. : the fall in price has naturally led to a great increase of consumption. The flax factories of Europe now consume nearly 3000 tons daily, or 50 per cent. more than they did ten years ago.

The production and consumption of linen goods show approximately thus :—

|                          | Production, Millions £ | Consumption |                    |
|--------------------------|------------------------|-------------|--------------------|
|                          |                        | Millions £  | Shillings per Head |
| United Kingdom . . . . . | 13.0                   | 7.0         | 3.5                |
| France . . . . .         | 10.5                   | 10.0        | 5.2                |
| Germany . . . . .        | 9.0                    | 9.0         | 3.5                |
| Russia . . . . .         | 20.0                   | 20.0        | 3.5                |
| Austria . . . . .        | 8.0                    | 7.0         | 3.3                |
| Italy . . . . .          | 5.0                    | 5.0         | 3.2                |
| Belgium . . . . .        | 5.5                    | 2.0         | 6.0                |
| Other States . . . . .   | 4.0                    | 8.0         | 3.0                |
| Europe . . . . .         | 75.0                   | 68.0        | 3.5                |
| United States . . . . .  | 15.0                   | 20.0        | 5.5                |
| Total . . . . .          | 90.0                   | 88.0        | 4.0                |

This industry has declined as follows in the United Kingdom :—

| Year           | Spindles  | Power-Looms | Operatives |
|----------------|-----------|-------------|------------|
| 1870 . . . . . | 1,550,000 | 35,000      | 125,000    |
| 1895 . . . . . | 1,200,000 | 49,000      | 108,000    |

The consumption of flax is about 100,000 tons, against 120,000 in 1870. Exports of linen goods from United Kingdom have been as follows :—

| Year           | Linen Exports, Millions of Yards | Value £ Exported |            |           |
|----------------|----------------------------------|------------------|------------|-----------|
|                |                                  | Linen            | Yarns, &c. | Total     |
| 1860 . . . . . | 144                              | 4,800,000        | 1,800,000  | 6,600,000 |
| 1870 . . . . . | 226                              | 7,300,000        | 2,200,000  | 9,500,000 |
| 1880 . . . . . | 165                              | 5,800,000        | 1,000,000  | 6,800,000 |
| 1890 . . . . . | 184                              | 5,700,000        | 900,000    | 6,600,000 |
| 1897 . . . . . | 165                              | 4,800,000        | 1,000,000  | 5,800,000 |

Flax-mills in Ireland consume 46,000 tons of flax, and turn out 200 million yards of linen; that is, half the output of the United Kingdom.

## FOOD

The principal items of food are grain, potatoes, and meat, which may be reduced to a common denominator if we consider one ton of meat equal to eight tons of grain, and three of potatoes to one of grain.

| Year       | Production, Millions Tons |      |          | Equivalent in Grain |
|------------|---------------------------|------|----------|---------------------|
|            | Grain                     | Meat | Potatoes |                     |
| 1880 . . . | 204                       | 13.3 | 80       | 337                 |
| 1895 . . . | 232                       | 15.2 | 96       | 386                 |

In order to estimate the total food production of countries, we may adopt the following scale for arriving at a common denominator:—

*Equivalents to a Ton of Grain*

Meat, 280 lbs.      Sugar,  $\frac{1}{2}$  ton      Wine, 100 galls.  
Butter, 224 lbs.      Fish,  $\frac{1}{2}$  ton      Potatoes, 3 tons

All kinds of food being reduced as above to a common denominator of grain, we find the production compared with population gives the following averages:—

*Tons of Food produced per 100 Inhabitants*

|                        |                   |                         |
|------------------------|-------------------|-------------------------|
| Great Britain . . . 45 | Spain . . . 83    | Switzerland . . . 75    |
| Ireland . . . 126      | Portugal . . . 54 | Danub. States . . . 110 |
| France . . . 115       | Sweden . . . 112  | Greece . . . 60         |
| Germany . . . 90       | Norway . . . 99   | U. States . . . 172     |
| Russia . . . 80        | Denmark . . . 180 | Canada . . . 190        |
| Austria . . . 86       | Holland . . . 94  | Australia . . . 178     |
| Italy . . . 58         | Belgium . . . 81  | Argentina . . . 170     |

Denmark, Ireland, and France, among European nations, produce the highest ratios of food to population, while

Great Britain, Portugal, Italy, and Switzerland occupy the lowest places in the above scale. The average for Europe is considerably less than one ton per inhabitant, whereas in the United States and the colonies above cited it is nearly two. The production and consumption of grain average as follows:—

|                     | Wheat, Millions Bushels |          | All grain, Millions Bushels |          |
|---------------------|-------------------------|----------|-----------------------------|----------|
|                     | Produc.                 | Consump. | Produc.                     | Consump. |
| Great Britain . . . | 57                      | 220      | 245                         | 530      |
| Ireland . . .       | 1                       | 20       | 55                          | 120      |
| France . . .        | 304                     | 340      | 725                         | 760      |
| Germany . . .       | 120                     | 180      | 680                         | 820      |
| Russia . . .        | 330                     | 210      | 2,210                       | 1,880    |

There is a deficit of 30 million bushels in the above table, which is covered by imports from India, Chile, and other countries.

The following table shows the weight of each kind of food produced, and the equivalent of all in grain (butter and cheese are under the head of butter):—

|                       | Tons (000 omitted) |          |        |       |        |       | Wine, Millions Gallons | Equivalent in Tons of Grain |
|-----------------------|--------------------|----------|--------|-------|--------|-------|------------------------|-----------------------------|

| Total . . .           | 229,000            | 104,100  | 15,200 | 5,300 | 2,680  | 3,150 | 2,500                  | 454,000,000                 |

It appears that the United States produce one-fourth of the food of Christendom. The total weight of food (for human beings) consumed yearly is 370 million tons, containing nutriment equal to 454 million tons of grain.

The grain crops of the world have increased 18 per cent. in 20 years, viz. :—

|                | Annual Average, Tons |             |             |
|----------------|----------------------|-------------|-------------|
|                | 1871-80              | 1883-88     | 1890-96     |
| Wheat . . . .  | 48,600,000           | 54,500,000  | 56,400,000  |
| Maize . . . .  | 38,400,000           | 50,200,000  | 52,500,000  |
| Rye . . . . .  | 31,400,000           | 34,500,000  | 32,900,000  |
| Oats . . . . . | 46,400,000           | 52,000,000  | 56,900,000  |
| Barley . . . . | 19,400,000           | 20,500,000  | 19,500,000  |
| Total . . . .  | 184,400,000          | 211,700,000 | 218,200,000 |

Beerbohm's return of the world's wheat crop in the last four years was as follows :—

| Year           | Tons Produced |               |            |
|----------------|---------------|---------------|------------|
|                | In Europe     | Out of Europe | Total      |
| 1894 . . . . . | 38,200,000    | 25,800,000    | 64,000,000 |
| 1895 . . . . . | 37,300,000    | 25,300,000    | 62,600,000 |
| 1896 . . . . . | 37,800,000    | 22,200,000    | 60,000,000 |
| 1897 . . . . . | 30,000,000    | 26,000,000    | 56,000,000 |

The wheat crop of 1898 was the largest on record, reaching 62,800,000 tons. Exports of wheat from various countries in twenty years, ending 1895, were :—

| From                | Annual Export, Millions of Bushels |         |         |         |
|---------------------|------------------------------------|---------|---------|---------|
|                     | 1876-80                            | 1881-90 | 1891-95 | Average |
| United States . . . | 116                                | 124     | 179     | 136     |
| Russia . . . . .    | 72                                 | 90      | 80      | 83      |
| India . . . . .     | 7                                  | 34      | 32      | 27      |
| Roumania . . . . .  | 17                                 | 21      | 29      | 22      |
| Austria . . . . .   | 15                                 | 15      | 6       | 13      |
| Argentina . . . . . | 1                                  | 5       | 38      | 12      |
| Canada . . . . .    | 4                                  | 5       | 9       | 6       |
| Uruguay . . . . .   | ...                                | 1       | 4       | 1       |
| Total . . . . .     | 232                                | 295     | 377     | 300     |

It appears from the foregoing that in the last period of five years, 1891-95, the annual weight of wheat carried from one to another country was 9½ million tons, to which adding maize, oats, &c., the total international grain trade will be found to exceed 12 million tons, or about 5 per cent. of the grain crops of the world. Thus, however enormous the grain trade between nations may seem, it is evident that 95 per cent. of grain is consumed in the country of its production. The wheat crop of Europe in the last two years showed as follows :—

|                      | Millions Bushels |       |         |
|----------------------|------------------|-------|---------|
|                      | 1896             | 1897  | Average |
| United Kingdom . .   | 58               | 56    | 57      |
| France . . . . .     | 344              | 288   | 316     |

Frankland says that a man requires any one of the following items to support life, daily:—

|                 |              |                 |
|-----------------|--------------|-----------------|
| 12 lbs. cabbage | 3½ lbs. beef | 1½ lbs. rice    |
| 10 lbs. carrots | 2 lbs. bread | 1 lb. cheese    |
| 6 lbs. fish     | 2 lbs. eggs  | 7 bottles stout |

This subject is set forth at great length under *Diet*, p. 191.

The consumption of food is approximately as follows:—

|                           | Tons (ooo omitted) |        |          |       |                |       | Wine,<br>Million<br>Gallons | Equivalent in<br>Tons of Grain |
|---------------------------|--------------------|--------|----------|-------|----------------|-------|-----------------------------|--------------------------------|
|                           | Grain              | Meat   | Potatoes | Sugar | Butter,<br>&c. | Fish  |                             |                                |
| United Kingdom . . . . .  | 16,100             | 1,880  | 6,200    | 1,500 | 510            | 700   | 16                          | 42,900,000                     |

**UNITED KINGDOM**

Production and consumption of wheat and of all grain, in terms of two years averaged as follows, in millions of bushels:—

|                   | Wheat   |         | All Grain |         |
|-------------------|---------|---------|-----------|---------|
|                   | Produc. | Consum. | Produc.   | Consum. |
| 1887-88 . . . . . | 75      | 235     | 302       | 591     |
| 1889-90 . . . . . | 76      | 238     | 322       | 628     |
| 1891-92 . . . . . | 68      | 253     | 314       | 627     |
| 1893-94 . . . . . | 56      | 247     | 308       | 653     |
| 1895-96 . . . . . | 48      | 255     | 293       | 668     |

The production of grain has not declined much in the last ten years, viz.:—

| Year           | Millions Bushels |        |      |       |
|----------------|------------------|--------|------|-------|
|                | Wheat            | Barley | Oats | Total |
| 1887 . . . . . | 76               | 70     | 151  | 297   |
| 1888 . . . . . | 74               | 75     | 158  | 307   |
| 1889 . . . . . | 76               | 75     | 164  | 315   |
| 1890 . . . . . | 76               | 81     | 171  | 328   |
| 1891 . . . . . | 75               | 80     | 166  | 321   |
| 1892 . . . . . | 61               | 77     | 168  | 306   |
| 1893 . . . . . | 51               | 66     | 169  | 286   |
| 1894 . . . . . | 61               | 79     | 191  | 331   |
| 1895 . . . . . | 38               | 75     | 174  | 287   |
| 1896 . . . . . | 58               | 78     | 163  | 299   |
| 1897 . . . . . | 56               | 73     | 164  | 293   |

The quantities imported in the same period were:—

| Year           | Millions Bushels |        |           |       |
|----------------|------------------|--------|-----------|-------|
|                | Wheat            | Barley | Oats, &c. | Total |
| 1887 . . . . . | 160              | 29     | 93        | 282   |
| 1888 . . . . . | 161              | 43     | 91        | 295   |
| 1889 . . . . . | 158              | 35     | 106       | 299   |
| 1890 . . . . . | 165              | 34     | 114       | 313   |
| 1891 . . . . . | 179              | 35     | 88        | 302   |
| 1892 . . . . . | 191              | 29     | 103       | 323   |
| 1893 . . . . . | 188              | 46     | 96        | 330   |
| 1894 . . . . . | 194              | 63     | 103       | 360   |
| 1895 . . . . . | 215              | 47     | 103       | 365   |
| 1896 . . . . . | 199              | 45     | 141       | 385   |
| 1897 . . . . . | 177              | 38     | 142       | 357   |

The importation of wheat from different parts of the world has been as follows:—

| Year           | Millions of Bushels from |        |       |         |       |
|----------------|--------------------------|--------|-------|---------|-------|
|                | U. States                | Russia | India | Various | Total |
| 1887 . . . . . | 101                      | 11     | 17    | 31      | 160   |
| 1888 . . . . . | 64                       | 44     | 16    | 37      | 161   |
| 1889 . . . . . | 62                       | 43     | 18    | 35      | 158   |
| 1890 . . . . . | 68                       | 40     | 18    | 39      | 165   |
| 1891 . . . . . | 86                       | 30     | 26    | 37      | 179   |
| 1892 . . . . . | 122                      | 9      | 25    | 35      | 191   |
| 1893 . . . . . | 114                      | 20     | 12    | 42      | 188   |
| 1894 . . . . . | 94                       | 34     | 11    | 55      | 194   |
| 1895 . . . . . | 90                       | 40     | 17    | 62      | 215   |
| 1896 . . . . . | 106                      | 34     | 4     | 55      | 199   |
| 1897 . . . . . | 108                      | 30     | 1     | 38      | 177   |

The importation of all grain was as follows, in millions of bushels, from the following countries :—

| Year           | U.States | Russia | Roumania | Various | Total |
|----------------|----------|--------|----------|---------|-------|
| 1887 . . . . . | 124      | 56     | 28       | 74      | 282   |
| 1888 . . . . . | 84       | 108    | 24       | 79      | 295   |
| 1889 . . . . . | 108      | 93     | 22       | 76      | 299   |
| 1890 . . . . . | 120      | 78     | 30       | 85      | 313   |
| 1891 . . . . . | 104      | 74     | 30       | 94      | 302   |
| 1892 . . . . . | 164      | 37     | 20       | 102     | 323   |
| 1893 . . . . . | 138      | 70     | 34       | 88      | 330   |
| 1894 . . . . . | 116      | 116    | 35       | 93      | 360   |
| 1895 . . . . . | 123      | 107    | 17       | 118     | 365   |
| 1896 . . . . . | 177      | 76     | 24       | 108     | 385   |
| 1897 . . . . . | 211      | 59     | 19       | 68      | 357   |

If wheat had remained at the same price as in 1887, the cost to the nation would have been 479 millions sterling in the decade, viz. :—

|                    | Tons       | Cost, £ sterling |
|--------------------|------------|------------------|
| British . . . . .  | 16,300,000 | 133,000,000      |
| Imported . . . . . | 45,200,000 | 346,000,000      |
| Total . . . . .    | 61,500,000 | 479,000,000      |

The actual cost has been only 438 millions, which shows a saving of 41 millions in the said period of ten years.

The total weight of grain consumed and value were as follows :—

| Year              | Tons (ooo omitted) |          |        | Value, Millions £ |          |       |
|-------------------|--------------------|----------|--------|-------------------|----------|-------|
|                   | British            | Imported | Total  | British           | Imported | Total |
| 1887 . . . . .    | 7,400              | 7,050    | 14,450 | 41.8              | 48.3     | 90.1  |
| 1888 . . . . .    | 7,700              | 7,400    | 15,100 | 44.4              | 51.3     | 95.7  |
| 1889 . . . . .    | 7,900              | 7,500    | 15,400 | 44.5              | 51.2     | 95.7  |
| 1890 . . . . .    | 8,200              | 7,800    | 16,000 | 49.6              | 53.5     | 103.1 |
| 1891 . . . . .    | 8,050              | 7,550    | 15,600 | 52.3              | 62.0     | 114.3 |
| 1892 . . . . .    | 7,650              | 8,100    | 15,750 | 44.9              | 58.7     | 103.6 |
| 1893 . . . . .    | 7,150              | 8,250    | 15,400 | 38.9              | 51.2     | 90.1  |
| 1894 . . . . .    | 8,300              | 9,000    | 17,300 | 41.1              | 48.2     | 89.3  |
| 1895 . . . . .    | 7,200              | 9,100    | 16,300 | 31.7              | 49.7     | 81.4  |
| 1896 . . . . .    | 7,500              | 9,600    | 17,100 | 35.9              | 52.8     | 88.7  |
| Average . . . . . | 7,700              | 8,150    | 15,850 | 42.5              | 52.7     | 95.2  |

The following table shows the weight and value of wheat consumed in the United Kingdom in ten years :—

| Year              | Tons (ooo omitted) |          |       | Value, Millions £ |          |       | Price, Shillings per Ton |          |         |
|-------------------|--------------------|----------|-------|-------------------|----------|-------|--------------------------|----------|---------|

The total weight of grain consumed in the United Kingdom in ten years was 158½ million tons, which cost 952 millions sterling.

Not quite 60 per cent. of the above grain was used for human food, the rest being given to animals, the account standing approximately thus :—

|                    | Tons (ooo omitted) |             |         | Cost, Millions £ |             |       |
|--------------------|--------------------|-------------|---------|------------------|-------------|-------|
|                    | Wheat              | Barley, &c. | Total   | Wheat            | Barley, &c. | Total |

The production and consumption of grain and meat since 1861 was as follows :—

|             | Tons Yearly (ooo omitted) |          |          |          |
|-------------|---------------------------|----------|----------|----------|
|             | Grain                     |          | Meat     |          |
|             | Produced                  | Consumed | Produced | Consumed |
| 1861-70 . . | 9,700                     | 13,000   | 1,040    | 1,170    |
| 1871-80 . . | 8,500                     | 14,200   | 1,050    | 1,340    |
| 1881-90 . . | 7,820                     | 14,970   | 1,080    | 1,650    |
| 1891-96 . . | 7,650                     | 16,500   | 1,100    | 1,800    |

The consumption of meat in the United Kingdom, native and imported, showed as follows :—

|              | 1875      |          |           | 1885      |          |           | 1895      |          |           |
|--------------|-----------|----------|-----------|-----------|----------|-----------|-----------|----------|-----------|
|              | Native    | Imported | Total     | Native    | Imported | Total     | Native    | Imported | Total     |
| Beef . . . . | 490,000   | 100,000  | 590,000   | 570,000   | 180,000  | 750,000   | 590,000   | 260,000  | 850,000   |
| Mutton . . . | 370,000   | 55,000   | 425,000   | 320,000   | 90,000   | 410,000   | 320,000   | 230,000  | 550,000   |
| Pork . . . . | 190,000   | 145,000  | 335,000   | 190,000   | 220,000  | 410,000   | 190,000   | 290,000  | 480,000   |
| Total . . .  | 1,050,000 | 300,000  | 1,350,000 | 1,080,000 | 490,000  | 1,570,000 | 1,100,000 | 780,000  | 1,880,000 |

The average consumption of meat was 108 pounds per inhabitant in 1895, as compared with 93 pounds in 1875. Meantime the average is much higher in Great Britain, considering apart from Ireland, the consumption in 1895 showed approximately as follows :—

|              | Tons (ooo omitted) |        |      |       |
|--------------|--------------------|--------|------|-------|
|              | Beef               | Mutton | Pork | Total |
| Native . . . | 350                | 280    | 130  | 760   |
| Irish . . .  | 220                | 30     | 30   | 280   |
| Imported . . | 260                | 210    | 290  | 760   |
| Total . . .  | 830                | 520    | 450  | 1,800 |

This gives an average of 115 pounds per inhabitant, the above figures showing that Great Britain is fed during five months on native meat, two months on Irish, and five months on what is imported from foreign countries. As regards Ireland, the consumption is approximately 80,000 tons (one-fourth imported), being equal to no more than 40 pounds per inhabitant, the lowest ratio of all countries in Europe except Italy.

Importations of Irish and foreign live stock into Great Britain in 1896 were as follows :—

|              | Irish   | Foreign | Total     |
|--------------|---------|---------|-----------|
| Horses . . . | 40,000  | 40,000  | 80,000    |
| Cows . . .   | 690,000 | 560,000 | 1,250,000 |
| Sheep . . .  | 750,000 | 770,000 | 1,520,000 |
| Pigs . . .   | 610,000 | ...     | 610,000   |

The production of meat has risen 6 per cent., consumption 54 per cent., since 1861, the former showing as follows :—

|              | Tons Yearly |          |          |           |
|--------------|-------------|----------|----------|-----------|
|              | 1861-70     |          |          |           |
|              | England     | Scotland | Ireland  | Total     |
| Beef . . . . | 230,000     | 50,000   | 200,000  | 480,000   |
| Mutton . . . | 265,000     | 65,000   | 40,000   | 370,000   |
| Pork . . . . | 120,000     | 10,000   | 60,000   | 190,000   |
| Total . . .  | 615,000     | 125,000  | 300,000  | 1,040,000 |
|              | 1891-96     |          |          |           |
|              | England     | Scotland | Ireland  | Total     |
|              | Produced    | Consumed | Produced | Consumed  |
| Beef . . . . | 285,000     | 65,000   | 240,000  | 590,000   |
| Mutton . . . | 200,000     | 80,000   | 40,000   | 320,000   |
| Pork . . . . | 125,000     | 5,000    | 60,000   | 190,000   |
| Total . . .  | 610,000     | 150,000  | 340,000  | 1,100,000 |

Production has increased 60,000 tons in 30 years, while imports of foreign meat rose from 100,000 tons in 1865 to 780,000 tons in 1895.

The imports of food for human use, retained for consumption, were as follows, per annum :—

|                | 1861-70    | 1871-80    | 1881-90    | 1891-96    |
|----------------|------------|------------|------------|------------|
| Wheat, tons    | 1,800,000  | 2,850,000  | 3,850,000  | 4,830,000  |
| Meat, ..       | 130,000    | 290,000    | 570,000    | 700,000    |
| Potatoes, ..   | 60,000     | 330,000    | 150,000    | 150,000    |
| Rice, ..       | 90,000     | 170,000    | 180,000    | 140,000    |
| Sugar, ..      | 520,000    | 860,000    | 1,150,000  | 1,420,000  |
| Butter, ..     | 60,000     | 80,000     | 130,000    | 190,000    |
| Cheese, ..     | 45,000     | 75,000     | 90,000     | 105,000    |
| Tea, ..        | 45,000     | 65,000     | 80,000     | 95,000     |
| Coffee, ..     | 15,000     | 15,000     | 14,000     | 12,000     |
| Cocoa, ..      | 2,000      | 4,000      | 7,000      | 10,000     |
| Eggs, mill..   | 560        | 690        | 910        | 1,420      |
| Wine, gals.    | 12,500,000 | 16,500,000 | 14,200,000 | 14,600,000 |
| Spirits, gals. | 6,500,000  | 10,200,000 | 8,300,000  | 8,000,000  |

Compared with population, the imports were as follows, per inhabitant :—

|                 | 1861-70 | 1871-80 | 1881-90 | 1891-96 |
|-----------------|---------|---------|---------|---------|
| Wheat, lbs. . . | 135     | 192     | 240     | 282     |
| Meat, .. . .    | 10      | 19      | 36      | 40      |
| Potatoes, .. .  | 4       | 22      | 9       | 9       |
| Rice, .. . .    | 6       | 11      | 11      | 8       |
| Sugar, .. . .   | 39      | 58      | 72      | 82      |
| Butter, .. . .  | 4       | 5       | 8       | 11      |
| Cheese, .. . .  | 3       | 5       | 6       | 6       |
| Tea, ozs. . . . | 53      | 70      | 78      | 88      |
| Coffee, .. . .  | 18      | 16      | 14      | 11      |
| Cocoa, .. . .   | 3       | 5       | 7       | 10      |
| Eggs, No. . . . | 12      | 21      | 28      | 37      |
| Wine, gals. . . | 0.42    | 0.51    | 0.39    | 0.38    |
| Spirits, .. . . | 0.23    | 0.31    | 0.23    | 0.21    |

Among the items of food consumed in 1896 were the following:—

|                    | Native    | Imported  | Total     |
|--------------------|-----------|-----------|-----------|
| Butter, tons . . . | 90,000    | 200,000   | 290,000   |
| Cheese, " . . .    | 110,000   | 110,000   | 220,000   |
| Rice, " . . .      | ...       | 120,000   | 120,000   |
| Potatoes, " . . .  | 6,260,000 | 110,000   | 6,370,000 |
| Sugar, " . . .     | ...       | 1,510,000 | 1,510,000 |
| Tea, " . . .       | ...       | 100,000   | 100,000   |
| Coffee, " . . .    | ...       | 12,000    | 12,000    |
| Cocoa, " . . .     | ...       | 11,000    | 11,000    |
| Eggs, millions . . | 2,100     | 1,600     | 3,700     |

Food imports into the United Kingdom for the last three years (exclusive of wines, tea, &c.) were of the following value:—

|                     | £ (000 omitted) |         |         |         |
|---------------------|-----------------|---------|---------|---------|
|                     | 1895            | 1896    | 1897    | Average |
| Wheat . . . . .     | 30,200          | 30,900  | 32,900  | 31,300  |
| Maize . . . . .     | 7,800           | 9,400   | 9,200   | 8,800   |
| Barley . . . . .    | 5,500           | 5,700   | 4,700   | 5,300   |
| Oats, &c. . . . .   | 5,500           | 5,900   | 5,600   | 5,700   |
| All grain . . . . . | 49,000          | 51,900  | 52,400  | 51,100  |
| Butter . . . . .    | 16,800          | 17,800  | 18,400  | 17,700  |
| Cheese . . . . .    | 4,700           | 4,900   | 5,900   | 5,200   |
| Lard . . . . .      | 2,900           | 2,300   | 2,000   | 2,400   |
| Milk . . . . .      | 1,100           | 1,200   | 1,400   | 1,200   |
| Meat, dead . . . .  | 24,400          | 25,400  | 28,100  | 26,000  |
| Cattle . . . . .    | 9,000           | 10,400  | 11,400  | 10,300  |
| Vegetables . . . .  | 4,100           | 4,500   | 4,600   | 4,400   |
| Total . . . . .     | 112,000         | 118,400 | 124,200 | 118,300 |

Distinguishing what food was received from the British Colonies and from foreign countries (including sugar, tea, wines, &c.) the values in 1896 were:—

|                     | £ Sterling |                   |             |
|---------------------|------------|-------------------|-------------|
|                     | Colonies   | Foreign Countries | Total       |
| Grain . . . . .     | 3,600,000  | 48,300,000        | 51,900,000  |
| Meat . . . . .      | 7,500,000  | 28,300,000        | 35,800,000  |
| Butter, &c. . . . . | 4,000,000  | 21,700,000        | 25,700,000  |
| Sugar, . . . . .    | 1,700,000  | 17,500,000        | 19,200,000  |
| Vegetables, &c. . . | 2,200,000  | 41,600,000        | 43,800,000  |
| Total . . . . .     | 19,000,000 | 157,400,000       | 176,400,000 |

Imports of butter, margarine, and cheese in the last five years were:—

| Year              | Tons    |        |         |         |
|-------------------|---------|--------|---------|---------|
|                   | Butter  | Marg.  | Cheese  | Total   |
| 1893 . . . . .    | 117,000 | 64,000 | 104,000 | 285,000 |
| 1894 . . . . .    | 129,000 | 55,000 | 114,000 | 298,000 |
| 1895 . . . . .    | 141,000 | 47,000 | 107,000 | 295,000 |
| 1896 . . . . .    | 152,000 | 46,000 | 112,000 | 310,000 |
| 1897 . . . . .    | 161,090 | 47,000 | 130,000 | 338,000 |
| Average . . . . . | 140,000 | 52,000 | 113,000 | 305,000 |

Excluding margarine the importation of butter and cheese was together as follows:—

| Tons from           | 1894    | 1895    | 1896    | 1897    |
|---------------------|---------|---------|---------|---------|
| Canada . . . . .    | 58,000  | 60,000  | 66,000  | 81,000  |
| Denmark . . . . .   | 55,000  | 58,000  | 61,000  | 67,000  |
| United States . . . | 35,000  | 29,000  | 36,000  | 40,000  |
| Holland . . . . .   | 23,000  | 25,000  | 27,000  | 29,000  |
| France . . . . .    | 24,000  | 26,000  | 25,000  | 24,000  |
| Australia . . . . . | 18,000  | 21,000  | 14,000  | 17,000  |
| Various . . . . .   | 30,000  | 29,000  | 35,000  | 33,000  |
| Total . . . . .     | 243,000 | 248,000 | 264,000 | 291,000 |

The importation of cattle from Ireland into Great Britain has been as follows:—

| Year              | Number  |           |         |
|-------------------|---------|-----------|---------|
|                   | Cattle  | Sheep     | Pigs    |
| 1893 . . . . .    | 689,000 | 1,108,000 | 457,000 |
| 1894 . . . . .    | 827,000 | 957,000   | 585,000 |
| 1895 . . . . .    | 781,000 | 650,000   | 550,000 |
| 1896 . . . . .    | 689,000 | 750,000   | 613,000 |
| 1897 . . . . .    | 745,000 | 811,000   | 684,000 |
| Average . . . . . | 746,000 | 855,000   | 580,000 |

The importation of poultry and eggs in 1896 was as follows:—

|                     | Poultry, Tons | Eggs, Millions | Total Value, £ |
|---------------------|---------------|----------------|----------------|
| France . . . . .    | 6,000         | 394            | 1,600,000      |
| Denmark . . . . .   | ...           | 188            | 500,000        |
| Canada . . . . .    | 3,000         | 63             | 300,000        |
| Other countries . . | 14,000        | 945            | 2,900,000      |
| Total . . . . .     | 23,000        | 1,590          | 5,300,000      |

Importations of meat in 1896 were as follows (the equivalent being taken for live stock):—

| From                 | Tons    |         |         | Value, £   |
|----------------------|---------|---------|---------|------------|
|                      | Dead    | Live    | Total   |            |
| United States . . .  | 340,000 | 130,000 | 470,000 | 19,500,000 |
| British Colonies . . | 170,000 | 40,000  | 210,000 | 7,300,000  |
| Denmark . . . . .    | 70,000  | ...     | 70,000  | 3,000,000  |
| Argentina . . . . .  | 50,000  | 20,000  | 70,000  | 2,700,000  |
| Various . . . . .    | 50,000  | ...     | 50,000  | 2,300,000  |
| Total . . . . .      | 680,000 | 190,000 | 870,000 | 34,800,000 |

The above is exclusive of 120,000 tons of lard and poultry, worth £3,400,000.

Imports of sugar in 1896 were as follows:—

| From                | Tons      | Value, £   | £ per Ton |
|---------------------|-----------|------------|-----------|
|                     |           |            |           |
| Germany . . . . .   | 760,000   | 9,300,000  | 12.2      |
| W. Indies . . . . . | 160,000   | 1,700,000  | 10.6      |
| France . . . . .    | 140,000   | 1,800,000  | 12.8      |
| Holland . . . . .   | 110,000   | 1,500,000  | 13.6      |
| Various . . . . .   | 480,000   | 4,900,000  | 10.2      |
| Total . . . . .     | 1,650,000 | 19,200,000 | 11.6      |

Imports of dairy products, &c., including butter,

margarine, cheese, condensed milk, eggs, and poultry, in the same year were :—

| From                    | Tons           | Value, £          | £ per Ton |
|-------------------------|----------------|-------------------|-----------|
| France . . . . .        | 80,000         | 4,900,000         | 61        |
| Holland . . . . .       | 83,000         | 4,700,000         | 57        |
| Denmark . . . . .       | 76,000         | 6,800,000         | 90        |
| Canada . . . . .        | 86,000         | 3,700,000         | 42        |
| United States . . . . . | 36,000         | 1,800,000         | 50        |
| Germany . . . . .       | 35,000         | 1,400,000         | 40        |
| Various . . . . .       | 116,000        | 6,000,000         | 52        |
| <b>Total . . . . .</b>  | <b>505,000</b> | <b>29,300,000</b> | <b>59</b> |

Food imports of all kinds from the principal countries in 1896 were :—

| From                    | £                  | Ratio        |
|-------------------------|--------------------|--------------|
| United States . . . . . | 35,600,000         | 20.2         |
| Russia . . . . .        | 25,000,000         | 14.4         |
| France . . . . .        | 15,400,000         | 8.7          |
| Germany . . . . .       | 12,300,000         | 7.0          |
| Canada . . . . .        | 10,600,000         | 6.0          |
| Denmark . . . . .       | 10,300,000         | 5.8          |
| Holland . . . . .       | 8,600,000          | 4.8          |
| Various . . . . .       | 58,600,000         | 33.1         |
| <b>Total . . . . .</b>  | <b>176,400,000</b> | <b>100.0</b> |

This includes grain used for cattle.

The annual consumption of food per inhabitant has been approximately as follows :—

|                         | 1861-70 | 1871-80 | 1881-90 | 1891-96 |
|-------------------------|---------|---------|---------|---------|
| Grain, lbs. . . . .     | 358     | 380     | 385     | 390     |
| Meat, „ . . . .         | 88      | 91      | 103     | 105     |
| Potatoes, „ . . . .     | 530     | 460     | 385     | 360     |
| Butter, „ . . . .       | 10      | 11      | 14      | 16      |
| Cheese, „ . . . .       | 10      | 12      | 13      | 12      |
| Eggs, No. . . . .       | 80      | 85      | 83      | 91      |
| Beer, gallons . . . . . | 31      | 32      | 29      | 30      |
| Spirits, „ . . . .      | 0.9     | 1.2     | 1.0     | 1.0     |
| Wine, „ . . . .         | 0.4     | 0.5     | 0.4     | 0.4     |

The above table shows that the people are now much better fed than they were 30 years ago, consumption per inhabitant having risen 20 per cent. for meat, 60 per cent. for butter, 20 per cent. for cheese, 14 per cent. for eggs. But this is not true of Ireland, and hence the increase of consumption, per head, in Great Britain is even higher than stated.

The quantity of each article consumed was approximately as follows, yearly :—

|                         | 1861-70    | 1871-80    | 1881-90    | 1891-96    |
|-------------------------|------------|------------|------------|------------|
| Grain, tons . . . . .   | 4,800,000  | 5,600,000  | 6,200,000  | 6,700,000  |
| Meat, „ . . . .         | 1,170,000  | 1,340,000  | 1,650,000  | 1,800,000  |
| Potatoes, „ . . . .     | 7,100,000  | 6,800,000  | 6,200,000  | 6,200,000  |
| Butter, „ . . . .       | 140,000    | 160,000    | 220,000    | 280,000    |
| Cheese, „ . . . .       | 140,000    | 180,000    | 200,000    | 215,000    |
| Eggs, mill. . . . .     | 2,400      | 2,800      | 3,010      | 3,520      |
| Beer, barrels . . . . . | 25,500,000 | 29,500,000 | 28,600,000 | 32,000,000 |
| Wine, gall. . . . .     | 28,000,000 | 39,600,000 | 36,000,000 | 38,800,000 |
| Spirits, „ . . . .      | 12,600,000 | 16,800,000 | 14,100,000 | 14,600,000 |

As regards tea, coffee, sugar, rice, cocoa, and wine, see page 717.

In the above table the item of grain does not include what is used in breweries and distilleries, nor of course what is consumed by animals.

The value of food consumed (including the grain for breweries and distilleries, but excluding what was used by animals) during 1896 was approximately as follows :—

|                            | Native, £          | Imported, £        | Total, £           |
|----------------------------|--------------------|--------------------|--------------------|
| Grain . . . . .            | 21,700,000         | 36,400,000         | 58,100,000         |
| Meat . . . . .             | 55,000,000         | 35,400,000         | 90,400,000         |
| Dairy . . . . .            | 33,000,000         | 23,800,000         | 56,800,000         |
| Potatoes . . . . .         | 25,100,000         | 900,000            | 26,000,000         |
| Poultry and eggs . . . . . | 9,700,000          | 5,300,000          | 15,000,000         |
| Veget. and fruit . . . . . | 8,000,000          | 10,300,000         | 18,300,000         |
| Sugar . . . . .            | ...                | 19,000,000         | 19,200,000         |
| Tea, coffee, &c. . . . .   | ...                | 11,400,000         | 11,400,000         |
| Fish . . . . .             | 7,500,000          | 3,200,000          | 10,700,000         |
| Sundries . . . . .         | 7,000,000          | 6,800,000          | 13,800,000         |
| <b>Total . . . . .</b>     | <b>167,000,000</b> | <b>153,000,000</b> | <b>320,000,000</b> |

The above is exclusive of liquor, which stands approximately as follows :—

|                        | Native, £         | Imported, £      | Total, £          |
|------------------------|-------------------|------------------|-------------------|
| Beer . . . . .         | 72,000,000        | ...              | 72,000,000        |
| Spirits . . . . .      | 7,300,000         | 2,100,000        | 9,400,000         |
| Wine . . . . .         | ...               | 6,000,000        | 6,000,000         |
| Cider . . . . .        | 600,000           | ...              | 600,000           |
| <b>Total . . . . .</b> | <b>79,900,000</b> | <b>8,100,000</b> | <b>88,000,000</b> |

Adding together food and liquor would give a total of 408 millions sterling, but the grain used for liquor having been counted in the first table there is a repetition, and if allowance be made accordingly, the total cost of food and liquor will be found to reach 390 millions sterling, viz. :—

|                         | £                  | Population        | Shillings per Head |
|-------------------------|--------------------|-------------------|--------------------|
| Great Britain . . . . . | 365,000,000        | 34,900,000        | 210                |
| Ireland . . . . .       | 25,000,000         | 4,550,000         | 110                |
| <b>United Kingdom</b>   | <b>390,000,000</b> | <b>39,450,000</b> | <b>198</b>         |

There is no country in the world where the sum spent on food, per head of the population, is so high as in Great Britain, but on the other hand Ireland is among the lowest in the scale of nations in this respect.

Besides food imported for human use Great Britain receives large quantities of grain to feed cattle and horses, which causes the item of food to figure for a much larger sum in our imports than is shown above. The following table shows the total amount paid to foreign nations for food in recent years, exclusive of wines :—

|                        | Millions £   |              |              |              |
|------------------------|--------------|--------------|--------------|--------------|
|                        | 1892         | 1894         | 1896         | 1897         |
| Grain . . . . .        | 58.7         | 48.2         | 52.8         | 53.6         |
| Meat . . . . .         | 32.1         | 32.3         | 35.9         | 39.5         |
| Dairy . . . . .        | 22.0         | 23.1         | 23.9         | 25.7         |
| Sundries . . . . .     | 55.8         | 53.2         | 54.8         | 55.3         |
| <b>Total . . . . .</b> | <b>168.6</b> | <b>156.8</b> | <b>167.4</b> | <b>174.1</b> |

The value of imported food, compared with population, has been as follows :—

| Year       | Millions £ |           |       | Shillings per Head |
|------------|------------|-----------|-------|--------------------|
|            | Grain      | Meat, &c. | Total |                    |
| 1854 . . . | 23         | 25        | 48    | 35                 |
| 1860 . . . | 33         | 34        | 67    | 46                 |
| 1870 . . . | 37         | 53        | 90    | 58                 |
| 1880 . . . | 70         | 90        | 160   | 92                 |
| 1889 . . . | 54         | 91        | 145   | 78                 |
| 1892 . . . | 59         | 110       | 169   | 89                 |
| 1894 . . . | 48         | 109       | 157   | 81                 |
| 1896 . . . | 53         | 114       | 167   | 84                 |
| 1897 . . . | 54         | 120       | 174   | 87                 |

If wines were included the total for 1897 would be 182 millions, that is, 91 shillings per inhabitant, equal to threepence a day per head, and as the earnings of the

nation (*vide* "Wealth and Industries of Nations," p. 95) averaged £36 per head, it appears that one-eighth of the earnings of the people is expended on imported food which cannot be produced at so low a cost in Great Britain.

In case it were ever deemed expedient to produce within the British Isles all the grain required for consumption, it would be necessary to double the area under corn of all kinds. The following table shows the actual and the required areas :—

|             | Acres      |           |           | Required   |
|-------------|------------|-----------|-----------|------------|
|             | G. Britain | Ireland   | Total     |            |
| Wheat . .   | 1,690,000  | 40,000    | 1,730,000 | 8,200,000  |
| Barley . .  | 2,160,000  | 180,000   | 2,340,000 | 8,800,000  |
| Oats, &c. . | 3,590,000  | 1,200,000 | 4,790,000 | 7,500,000  |
| Total . .   | 7,440,000  | 1,420,000 | 8,860,000 | 19,100,000 |

The actual yearly deficit of grain is 9,000,000 tons in Great Britain, 500,000 tons in Ireland, in all 9½ million tons, to produce which would need 10,200,000 acres, an area equal to the aggregate of Lincolnshire, Norfolk, Suffolk, Essex, and Devonshire.

The production and consumption of the principal items of food in Great Britain and Ireland, reduced to a grain denominator, show as follows :—

#### Production

|                       | Quantity, Tons |           |            | Grain Equivalent |           |            |
|-----------------------|----------------|-----------|------------|------------------|-----------|------------|
|                       | Great Britain  | Ireland   | U. Kingdom | Great Britain    | Ireland   | U. Kingdom |
| Grain . . .           | 6,200,000      | 1,400,000 | 7,600,000  | 6,200,000        | 1,400,000 | 7,600,000  |
| Meat . . .            | 760,000        | 340,000   | 1,100,000  | 6,100,000        | 2,700,000 | 8,800,000  |
| Potatoes . .          | 3,500,000      | 2,700,000 | 6,200,000  | 1,200,000        | 500,000   | 2,100,000  |
| Butter and cheese . . | 140,000        | 60,000    | 200,000    | 1,400,000        | 600,000   | 2,000,000  |
| Fish . . .            | 670,000        | 30,000    | 700,000    | 2,000,000        | 100,000   | 2,100,000  |
| Total . . .           | 11,070,000     | 4,530,000 | 15,600,000 | 16,900,000       | 5,700,000 | 22,600,000 |

#### Consumption

|                       |            |           |            |            |           |            |
|-----------------------|------------|-----------|------------|------------|-----------|------------|
| Grain . . .           | 15,200,000 | 1,900,000 | 17,100,000 | 15,200,000 | 1,900,000 | 17,100,000 |
| Meat . . .            | 1,800,000  | 80,000    | 1,880,000  | 14,400,000 | 600,000   | 15,000,000 |
| Potatoes . .          | 3,600,000  | 2,700,000 | 6,300,000  | 1,200,000  | 900,000   | 2,100,000  |
| Butter and cheese . . | 480,000    | 30,000    | 510,000    | 4,800,000  | 300,000   | 5,100,000  |
| Fish . . .            | 670,000    | 40,000    | 710,000    | 2,000,000  | 100,000   | 2,100,000  |
| Total . . .           | 21,750,000 | 4,750,000 | 26,500,000 | 37,600,000 | 3,800,000 | 41,400,000 |

Reducing all to a grain denominator, we find that Great Britain raises food for 45 per cent. of her population, while Ireland consumes only two-thirds of her production. Taking the whole United Kingdom collectively, the home production is equal to 55 per cent., imported food 45 per cent., of the total consumption.

#### FRANCE

The production and consumption of grain in four years ending 1895 were :—

| Year       | Tons       |             |           |
|------------|------------|-------------|-----------|
|            | Production | Consumption | Deficit   |
| 1892 . . . | 17,700,000 | 19,300,000  | 1,600,000 |
| 1893 . . . | 14,900,000 | 16,800,000  | 1,900,000 |
| 1894 . . . | 19,400,000 | 20,600,000  | 1,200,000 |
| 1895 . . . | 19,300,000 | 19,700,000  | 400,000   |
| 1896 . . . | 19,000,000 | 19,100,000  | 100,000   |

Although the production averages almost half a ton per inhabitant, France has to import about 100,000 tons monthly. The crops of 1896 compared with those of four preceding years thus :—

|                | 1892-93    | 1894-95    | 1896       |
|----------------|------------|------------|------------|
| Wheat, tons .  | 7,100,000  | 8,300,000  | 8,200,000  |
| Oats, " .      | 5,000,000  | 6,400,000  | 6,300,000  |
| Rye, " .       | 1,600,000  | 1,800,000  | 1,700,000  |
| Barley, " .    | 1,000,000  | 1,200,000  | 1,100,000  |
| Maize, &c. " . | 1,600,000  | 1,650,000  | 1,700,000  |
| Total . .      | 16,300,000 | 19,350,000 | 19,000,000 |

The production and consumption of wheat in the last thirty-six years has been as follows :—

| Period        | Tons Yearly |             | Bushels per Inhab. |
|---------------|-------------|-------------|--------------------|
|               | Production  | Consumption |                    |
| 1861-64 . . . | 6,900,000   | 7,200,000   | 7.7                |
| 1865-68 . . . | 6,600,000   | 6,700,000   | 7.1                |
| 1869-72 . . . | 6,400,000   | 6,700,000   | 7.3                |
| 1873-76 . . . | 7,250,000   | 7,500,000   | 8.0                |
| 1877-80 . . . | 6,500,000   | 7,900,000   | 8.5                |
| 1881-84 . . . | 7,600,000   | 9,100,000   | 9.6                |
| 1885-88 . . . | 7,350,000   | 8,100,000   | 8.5                |
| 1889-92 . . . | 7,100,000   | 8,500,000   | 8.9                |
| 1893-96 . . . | 7,900,000   | 8,700,000   | 9.0                |
| Average . . . | 7,100,000   | 7,800,000   | 8.3                |

In the last eight years the net imports of wheat averaged 1,100,000 tons yearly, from which it appears that (after deducting what is necessary for seed) the consumption in the form of food is 7,900,000 tons, equal to 8½ bushels per inhabitant, and that France subsists on imported wheat almost two months in the year.

Although France is still the greatest wine-producing country in the world, she has had in this respect a constant deficit since 1880, the heaviest losses from Phylloxera having been felt in the preceding year. Production and consumption are shown as follows :—

| Year          | Millions of Gallons Yearly |         |         |             |
|---------------|----------------------------|---------|---------|-------------|
|               | Vintage                    | Imports | Exports | Consumption |
| 1861-64 . . . | 930                        | 3       | 45      | 888         |
| 1865-68 . . . | 1,230                      | 4       | 64      | 1,170       |
| 1869-72 . . . | 1,320                      | 7       | 70      | 1,257       |
| 1873-76 . . . | 1,250                      | 13      | 78      | 1,185       |
| 1877-80 . . . | 910                        | 68      | 63      | 915         |
| 1881-84 . . . | 880                        | 178     | 56      | 1,002       |
| 1885-88 . . . | 650                        | 240     | 54      | 836         |
| 1889-92 . . . | 610                        | 235     | 45      | 800         |
| 1893-96 . . . | 890                        | 120     | 40      | 970         |
| Average . . . | 963                        | 97      | 57      | 1,003       |

The consumption of meat is less than in the United Kingdom, amounting to no more than 1,300,000 tons, viz. :—

|                         | Tons      | Pounds per Head |
|-------------------------|-----------|-----------------|
| Beef . . . . .          | 700,000   | 40              |
| Mutton . . . . .        | 210,000   | 12              |
| Pork . . . . .          | 290,000   | 17              |
| Imported meat . . . . . | 100,000   | 6               |
| Total . . . . .         | 1,300,000 | 75              |

France imports cheese, and exports butter. Net exports of dairy products compare with those of ten years ago thus :—

|                  | Tons   |        | Value, £  |           |
|------------------|--------|--------|-----------|-----------|
|                  | 1885   | 1896   | 1885      | 1896      |
| Butter . . . . . | 32,000 | 25,000 | 3,400,000 | 1,800,000 |
| Eggs . . . . .   | 22,000 | 17,500 | 1,200,000 | 900,000   |
| Total . . . . .  | 54,000 | 42,500 | 4,600,000 | 2,700,000 |

The value of food imports in last three years was :—

|                  | £ Sterling |            |            |
|------------------|------------|------------|------------|
|                  | 1895       | 1896       | 1897       |
| Grain . . . . .  | 3,100,000  | 1,500,000  | 9,900,000  |
| Meat . . . . .   | 5,800,000  | 3,200,000  | 4,000,000  |
| Cheese . . . . . | 600,000    | 600,000    | 600,000    |
| Fruit . . . . .  | 1,000,000  | 1,000,000  | 1,400,000  |
| Coffee . . . . . | 7,100,000  | 7,000,000  | 4,200,000  |
| Total . . . . .  | 17,600,000 | 13,300,000 | 20,100,000 |

The value of food consumed may be summed up approximately as follows :—

| Millions £ Sterling  |       |
|----------------------|-------|
| Grain . . . . .      | 77.0  |
| Potatoes . . . . .   | 36.0  |
| Meat . . . . .       | 62.0  |
| Dairy . . . . .      | 44.5  |
| Poultry . . . . .    | 14.0  |
| Vegetables . . . . . | 12.0  |
| Coffee . . . . .     | 7.1   |
| Sugar . . . . .      | 6.5   |
| Fish . . . . .       | 4.8   |
| Wine, &c. . . . .    | 46.1  |
| Sundries . . . . .   | 15.0  |
| Total . . . . .      | 325.0 |

The value of imported food is only 5 per cent. of the total, whereas in the United Kingdom it is 45 per cent.

The production and consumption of sugar have been as follows :—

| Year           | Production, Tons | Consumption, Tons | Lbs. per Inhabitant |
|----------------|------------------|-------------------|---------------------|
| 1885 . . . . . | 460,000          | 390,000           | 23                  |
| 1895 . . . . . | 700,000          | 480,000           | 28                  |

The annual expenditure on food averages 166 shillings per inhabitant.

The production of food, reduced to a grain denominator, shows as follows :—

|                         | Quantity   | Equivalent in Tons Grain |
|-------------------------|------------|--------------------------|
| Grain, tons . . . . .   | 17,800,000 | 17,800,000               |
| Potatoes, " . . . . .   | 12,600,000 | 4,200,000                |
| Meat, " . . . . .       | 1,200,000  | 9,600,000                |
| Sugar, " . . . . .      | 700,000    | 1,400,000                |
| Butter, &c. " . . . .   | 200,000    | 2,000,000                |
| Fish, " . . . . .       | 150,000    | 300,000                  |
| Wine, gallons . . . . . | 890,000    | 8,900,000                |
| Total . . . . .         |            | 44,200,000               |

This is equal to 23 cwt. per inhabitant, or 6 tons to each hand engaged in agriculture.

#### GERMANY

The weight of grain produced is far short of the requirements for the empire: the average crops for four years ending 1896 showed :—

| Tons            |           | Tons             |           |
|-----------------|-----------|------------------|-----------|
| Wheat . . . . . | 3,090,000 | Barley . . . . . | 2,550,000 |
| Rye . . . . .   | 6,870,000 | Oats . . . . .   | 4,620,000 |

making a total of 17,130,000 tons. Two-thirds of the population live on rye. If we deduct the grain used for seed or given to cattle, the balance left for human food is about 11 million tons, to which we must add 4 million tons imported, making a total of 15 millions. This includes about 3 million tons converted into liquor, leaving 12 million tons used in the form of bread. From this it would appear that Germany subsists during eight

months of the year on native, during four months on imported, grain. The consumption of grain for bread has been approximately as follows :—

| Year        | Tons per Annum |           |            | Bushels Per Head |
|-------------|----------------|-----------|------------|------------------|
|             | Native         | Imported  | Total      |                  |
| 1885-87 . . | 8,400,000      | 1,800,000 | 10,200,000 | 8.5              |
| 1890-92 . . | 8,000,000      | 3,400,000 | 11,400,000 | 9.1              |
| 1894-96 . . | 8,200,000      | 4,300,000 | 12,500,000 | 9.5              |

The deficit of grain increases rapidly with the growth of population, the weight imported having more than doubled in ten years. Germany has 250 inhabitants to the square mile, France only 188, and we find that one-third of the German population (as compared with one-sixth of the French) subsists on imported grain. There would be a greater deficit of grain in Germany but for the production of potatoes on a great scale, the crop rarely falling below 30 million tons, equivalent in sustenance to 10 million tons of grain. Germany grows one-third of all the potatoes produced in the world, the crop averaging 24 bushels per inhabitant, not all being used as food, but a large portion made into cheap brandy.

Meat production has increased, but not so fast as population :—

|                | 1883      | 1895      |
|----------------|-----------|-----------|
| Beef, tons . . | 790,000   | 880,000   |
| Mutton, „ . .  | 200,000   | 150,000   |
| Pork, „ . .    | 370,000   | 490,000   |
| Total . .      | 1,360,000 | 1,520,000 |

Down to the year 1888 no meat was imported, but the imports have grown so rapidly of late that they now exceed 200,000 tons yearly (mostly in the form of live cattle), the consumption reaching 74 lbs. per inhabitant, against 66 lbs. in 1883.

There is likewise a deficit as regards poultry and eggs : the imports of the latter show thus :—

| Year            | Eggs Yearly   | Per Inhabitant |
|-----------------|---------------|----------------|
| 1885-86 . . . . | 510,000,000   | 11             |
| 1890-91 . . . . | 1,110,000,000 | 22             |
| 1894-96 . . . . | 1,630,000,000 | 32             |

Reducing grain, potatoes, and meat to a common denominator as grain, we find an increase of 6,900,000 tons, say 21 per cent., since 1882, viz :—

|              | Tons       |            | Grain Equivalent, Tons |            |
|--------------|------------|------------|------------------------|------------|
|              | 1880-82    | 1893-96    | 1880-82                | 1893-96    |
| Grain . .    | 14,800,000 | 17,100,000 | 14,800,000             | 17,100,000 |
| Potatoes . . | 21,100,000 | 31,000,000 | 7,000,000              | 10,300,000 |
| Meat . .     | 1,360,000  | 1,520,000  | 10,900,000             | 12,200,000 |
| Total . .    | 37,260,000 | 49,620,000 | 32,700,000             | 39,600,000 |

The grain equivalent is now 15 cwt. per inhabitant, against 14 cwt. in 1880-82.

The number of milch cows is 500,000 less than that requisite (one to five inhabitants) in view of population. Nevertheless, about 8000 tons of butter are exported yearly, but there is, on the other hand, a considerable importation of margarine.

The production at present is as follows, in tons :—

|                  | Grain      | Potatoes   | Meat      |
|------------------|------------|------------|-----------|
| Prussia . . . .  | 9,700,000  | 20,000,000 | 920,000   |
| Bavaria . . . .  | 2,100,000  | 4,300,000  | 220,000   |
| Other States . . | 5,300,000  | 6,700,000  | 380,000   |
| Total . .        | 17,100,000 | 31,000,000 | 1,520,000 |

More than half of the fish consumed is imported ; the annual take by German fishermen is about 100,000 tons : imports show as follows :—

| Year            | Barrels Yearly | Value, £  |
|-----------------|----------------|-----------|
| 1885-86 . . . . | 1,070,000      | 1,500,000 |
| 1894-96 . . . . | 1,330,000      | 1,500,000 |

The consumption of coffee per inhabitant has declined, which is explained by the rise in price, viz :—

| Year            | Tons Yearly | Value, £   | Lbs. per Inhab. |
|-----------------|-------------|------------|-----------------|
| 1885-86 . . . . | 121,000     | 6,200,000  | 6.0             |
| 1894-95 . . . . | 122,000     | 10,100,000 | 5.1             |

Sugar is the only article of food of which there is a surplus, about 60 per cent. of the annual output being exported, viz :—

|                 | Tons    |           | Lbs. per Inhab. |      |
|-----------------|---------|-----------|-----------------|------|
|                 | 1886    | 1896      | 1886            | 1896 |
| Production . .  | 810,000 | 1,620,000 | 39              | 70   |
| Consumption . . | 240,000 | 720,000   | 12              | 31   |
| Export . . . .  | 570,000 | 900,000   | 27              | 39   |

Germany does not grow enough wine for her requirements, the annual consumption showing thus :—

|                 | Gallons    |            |            |
|-----------------|------------|------------|------------|
|                 | Native     | Imported   | Total      |
| 1885-86 . . . . | 60,000,000 | 12,000,000 | 72,000,000 |
| 1894-96 . . . . | 65,000,000 | 15,000,000 | 80,000,000 |

Consumption averages 1½ gallon per inhabitant, wine being little in use, and beer the principal beverage of the people.

If we reduce food of all kinds to a grain denominator, the production will be found as follows :—

|                          | Quantity   | Equivalent in Grain Tons |
|--------------------------|------------|--------------------------|
| Grain, tons . .          | 17,100,000 | 17,100,000               |
| Potatoes, „ . .          | 31,800,000 | 10,600,000               |
| Meat, „ . .              | 1,520,000  | 12,160,000               |
| Sugar, „ . .             | 1,800,000  | 3,600,000                |
| Butter and cheese, „ . . | 300,000    | 3,000,000                |
| Fish, „ . .              | 60,000     | 120,000                  |
| Wine, gallons . . . .    | 70,000,000 | 700,000                  |
| Total . . . . .          |            | 47,280,000               |

This gives an average of 18 cwt. per inhabitant, or 5 tons to each hand engaged in agriculture.

The value of imported food shows as follows:—

|                | £ Sterling |            |            |
|----------------|------------|------------|------------|
|                | 1885       | 1890       | 1897       |
| Grain . . . .  | 12,800,000 | 19,800,000 | 26,400,000 |
| Coffee . . . . | 5,600,000  | 11,000,000 | 8,100,000  |
| Meat . . . .   | ...        | 6,100,000  | 7,600,000  |
| Eggs . . . .   | 1,100,000  | 2,800,000  | 3,400,000  |
| Wine . . . .   | 1,900,000  | 2,200,000  | 2,100,000  |
| Fish . . . .   | 1,500,000  | 1,700,000  | 2,900,000  |
| Sundries . . . | 1,900,000  | 4,100,000  | 5,500,000  |
| Total . . . .  | 24,800,000 | 47,700,000 | 56,000,000 |

The value of food consumed for human use is approximately as follows:—

|                    | Millions £ Sterling |          |       |
|--------------------|---------------------|----------|-------|
|                    | Native              | Imported | Total |
| Grain . . . .      | 61                  | 19       | 80    |
| Meat . . . .       | 63                  | 5        | 68    |
| Potatoes, &c. .    | 73                  | ...      | 73    |
| Dairy and eggs .   | 74                  | 4        | 78    |
| Wine and beer .    | 53                  | 2        | 55    |
| Sugar, coffee, &c. | 10                  | 11       | 21    |
| Sundries . . . .   | 6                   | 6        | 12    |
| Total . . . .      | 340                 | 47       | 387   |

The value of imported food is 12 per cent. of the total, against 5 per cent. in France. The average food expenditure is 148 shillings per inhabitant, against 166 in France.

#### RUSSIA

Although Russia has to feed a population of 103 millions, she has usually a large excess of grain for exportation, besides eggs and a varying quantity of butter, fish, and meat. Deducting the amount of grain required for seed, the home consumption and exportation during three years averaged:—

|                 | Tons        |           |            |
|-----------------|-------------|-----------|------------|
|                 | Consumption | Export    | Total      |
| Wheat . . . .   | 3,400,000   | 3,400,000 | 6,800,000  |
| Rye . . . .     | 15,100,000  | 1,100,000 | 16,200,000 |
| Oats . . . .    | 12,300,000  | 1,200,000 | 13,500,000 |
| Various . . . . | 6,400,000   | 3,100,000 | 9,500,000  |
| Total . . . .   | 37,200,000  | 8,800,000 | 46,000,000 |

There is great fluctuation in the crops; the wheat surplus for exportation in 1897 hardly reached 2,600,000 tons. The bulk of the population subsists on rye, and about 20 per cent. on wheat, the total weight of grain used as bread being about 20 million tons, equal to 8 bushels per head, exclusive of what is made into brandy. Potatoes were long viewed with such aversion that they are still little used, the crop averaging 20 million tons, or 8 bushels per inhabitant, against 24 bushels in Germany. The production of meat is approximately as follows:—

|                | Russia    | Poland  | Total, Tons |
|----------------|-----------|---------|-------------|
| Beef . . . .   | 1,230,000 | 150,000 | 1,380,000   |
| Mutton . . . . | 440,000   | 40,000  | 480,000     |
| Pork . . . .   | 370,000   | 60,000  | 430,000     |
| Total . . . .  | 2,040,000 | 250,000 | 2,290,000   |

The above gives an average of 50 lbs. of meat per inhabitant in Russia Proper and 62 lbs. in Poland, and the consumption is about the same, the export of cattle being equivalent to no more than 10,000 tons of dead meat. The production of butter and cheese is not known, but cannot exceed 350,000 tons, of which 5000 tons are exported, leaving for home consumption nearly 8 lbs. per inhabitant, as compared with 14 lbs. in Germany. The export of eggs has increased prodigiously in 11 years, viz. :—

| Year         | Millions | Value, £  |
|--------------|----------|-----------|
| 1885 . . . . | 235      | 340,000   |
| 1891 . . . . | 850      | 1,290,000 |
| 1896 . . . . | 1,480    | 2,200,000 |

Russia is now one of the largest exporters of eggs in the world, sending out 4 millions daily, for the most part to Germany. She also exports 10 million poultry per annum, and 3000 tons of caviare. Down to 1884 the production of sugar was hardly sufficient for the requirements of home consumption, but now there is a large surplus exported, viz. :—

|                     | Tons    |         |
|---------------------|---------|---------|
|                     | 1886    | 1896    |
| Production . . . .  | 350,000 | 780,000 |
| Consumption . . . . | 290,000 | 680,000 |
| Exported . . . .    | 60,000  | 100,000 |

The consumption of sugar has risen in the above interval from 6 lbs. to 15 lbs. per inhabitant, but is still very low (as compared with 28 lbs. per head in Germany), owing to the extreme poverty of the rural population of Russia. Vodka brandy is the chief drink, of which 160 million gallons are consumed, according to official returns, but it is believed that the real consumption is double, illicit distilling being very common. The vintage varies from 40 to 70 million gallons, besides which 3 million gallons of wine are imported, the total consumption being less than three-quarters of a gallon per inhabitant. Fisheries yield 220,000 tons, besides which 150,000 tons of dried fish are imported, making a total of 370,000 tons, equal to 8 lbs. per inhabitant. About 70,000 tons of fruit are imported yearly, and 40,000 tons of rice. The consumption of coffee is declining, that of tea increasing, viz. :—

| Year         | Tons   |        |        | Value, £  |
|--------------|--------|--------|--------|-----------|
|              | Coffee | Tea    | Total  |           |
| 1885 . . . . | 8,000  | 29,000 | 37,000 | 6,300,000 |
| 1890 . . . . | 6,500  | 32,000 | 38,500 | 3,800,000 |
| 1896 . . . . | 6,400  | 41,000 | 47,400 | 4,500,000 |

Taking tea and coffee in the aggregate the consumption is now 17 oz. per inhabitant, against 14 oz. in 1885, the increase being the result of fall in price, the expenditure on these items being now 11 pence per inhabitant, as compared with 16 pence in 1885. The total imports and exports of food in the following years stood thus:—

| Year         | Imports, £ | Exports, £ | Surplus, £ |
|--------------|------------|------------|------------|
| 1893 . . . . | 6,100,000  | 32,200,000 | 26,100,000 |
| 1894 . . . . | 6,900,000  | 44,100,000 | 37,200,000 |
| 1895 . . . . | 6,900,000  | 40,100,000 | 33,200,000 |
| 1896 . . . . | 6,600,000  | 38,800,000 | 32,200,000 |

The value of food consumed yearly for human use is approximately 394 millions sterling, or about ten times

as much as that of food exported. Reducing all food to a grain denominator, we find the production as follows :—

|                        | Quantity   | Equivalent in Tons Grain |
|------------------------|------------|--------------------------|
| Grain, tons . . . .    | 55,100,000 | 55,100,000               |
| Potatoes, " . . . .    | 20,700,000 | 6,900,000                |
| Meat, " . . . .        | 2,200,000  | 18,320,000               |
| Sugar, " . . . .       | 800,000    | 1,600,000                |
| Butter, &c., " . . . . | 350,000    | 3,500,000                |
| Fish, " . . . .        | 220,000    | 440,000                  |
| Wine, gallons . . . .  | 60,000,000 | 600,000                  |
| Total . . . . .        |            | 86,460,000               |

This is an average of only 16 cwt. per inhabitant, a very poor return, when we consider that two-thirds of the population are engaged in agriculture.

#### AUSTRIA-HUNGARY

The dual monarchy, like Russia, has always a surplus of food, which is not surprising, since 63 per cent. of the population is agricultural. The production is as follows :—

|                       | Austria    | Hungary    | Total       |
|-----------------------|------------|------------|-------------|
| Grain, tons . . . .   | 7,900,000  | 11,600,000 | 19,500,000  |
| Potatoes, " . . . .   | 9,500,000  | 3,500,000  | 13,000,000  |
| Meat, " . . . .       | 600,000    | 610,000    | 1,210,000   |
| Wine, gallons . . . . | 90,000,000 | 40,000,000 | 130,000,000 |

Hungary has usually a surplus of three million tons of grain, Austria a deficit of nearly 2½ million tons, whereby it comes to pass that the whole monarchy has a normal surplus of 550,000 tons for exportation. Hungary has, moreover, a surplus of 150,000 tons of meat, one-third of which goes to cover the deficit in Austria, leaving 100,000 tons for exportation in the form of live cattle. The ordinary grain crops are as follows :—

|                    | Tons      |            |            |
|--------------------|-----------|------------|------------|
|                    | Austria   | Hungary    | Total      |
| Wheat . . . . .    | 1,200,000 | 3,800,000  | 5,000,000  |
| Rye . . . . .      | 1,850,000 | 1,450,000  | 3,300,000  |
| Oats . . . . .     | 2,700,000 | 1,800,000  | 4,500,000  |
| Barley . . . . .   | 1,450,000 | 1,450,000  | 2,900,000  |
| Maize, &c. . . . . | 700,000   | 3,100,000  | 3,800,000  |
| Total . . . . .    | 7,900,000 | 11,600,000 | 19,500,000 |

The production of grain compared with population is equal to 13 bushels per inhabitant in Austria, 26 bushels in Hungary. The quantity used for bread in the whole monarchy is about 9 million tons, equal to 8 bushels per head, one half of the population subsisting on wheat, the other half on rye, maize, &c. The consumption of potatoes is equal to 16 bushels per head in Austria, 8 bushels in Hungary. The production of meat is as follows :—

|                  | Tons    |         |           |
|------------------|---------|---------|-----------|
|                  | Austria | Hungary | Total     |
| Beef . . . . .   | 430,000 | 280,000 | 710,000   |
| Mutton . . . . . | 30,000  | 110,000 | 140,000   |
| Pork . . . . .   | 140,000 | 220,000 | 360,000   |
| Total . . . . .  | 600,000 | 610,000 | 1,210,000 |

More than half of the sugar produced is exported, viz. :—

|                          | 1886    | 1886    |
|--------------------------|---------|---------|
| Production, tons . . . . | 430,000 | 830,000 |
| Consumption, " . . . .   | 190,000 | 320,000 |
| Exported, " . . . .      | 240,000 | 510,000 |

Consumption averages 17 lbs. sugar per inhabitant, against 11 lbs. in 1886. On the other hand coffee is declining, due to the rise in price, viz. :—

| Year           | Tons   | Value, £  | Oz. per Inhab. |
|----------------|--------|-----------|----------------|
| 1885 . . . . . | 37,000 | 2,200,000 | 32             |
| 1895 . . . . . | 38,000 | 3,100,000 | 30             |

The value of food imported is 6 millions sterling, of exported 20 millions, leaving a surplus of food exports worth 14 millions. Among the chief exports are eggs.

| Year           | Millions | Value, £  |
|----------------|----------|-----------|
| 1885 . . . . . | 760      | 730,000   |
| 1890 . . . . . | 1,220    | 1,350,000 |
| 1896 . . . . . | 1,780    | 3,300,000 |

About 140,000 tons of malt, valued at £1,500,000, are exported yearly.

Reducing all to a grain denominator, we find the production as follows :—

|                        | Quantity    | Equivalent in Grain Tons |
|------------------------|-------------|--------------------------|
| Grain, tons . . . .    | 19,500,000  | 19,500,000               |
| Potatoes, " . . . .    | 13,000,000  | 4,300,000                |
| Meat, " . . . .        | 1,210,000   | 9,700,000                |
| Sugar, " . . . .       | 900,000     | 1,800,000                |
| Butter, &c., " . . . . | 170,000     | 1,700,000                |
| Wine, gallons . . . .  | 130,000,000 | 1,300,000                |
| Total . . . . .        |             | 38,300,000               |

This is equivalent to 18 cwt. per inhabitant, or 3 tons for each hand engaged in agriculture, the ratio of the latter being 6 tons in France.

The value of food consumed in Austria-Hungary for human use is approximately as follows :—

|                     |            |                |             |
|---------------------|------------|----------------|-------------|
| Grain . . . . .     | 58,000,000 | Liquor . . . . | 35,000,000  |
| Meat . . . . .      | 45,000,000 | Sugar . . . .  | 4,000,000   |
| Potatoes, &c. . . . | 36,000,000 | Sundries . . . | 15,000,000  |
| Dairy, &c. . . . .  | 47,000,000 | Total . . . .  | 240,000,000 |

This gives an average of 114 shillings yearly per inhabitant, against 166 in France and 148 in Germany.

#### ITALY

Although 60 per cent. of the population are engaged in agriculture, the production of food falls very much short. Reducing all to a grain denominator, we find :—

|                        | Quantity    | Equivalent in Tons Grain |
|------------------------|-------------|--------------------------|
| Grain, tons . . . .    | 5,800,000   | 5,800,000                |
| Rice, " . . . .        | 480,000     | 650,000                  |
| Potatoes, " . . . .    | 700,000     | 230,000                  |
| Meat, " . . . .        | 390,000     | 3,120,000                |
| Butter, &c., " . . . . | 145,000     | 1,450,000                |
| Chestnuts, " . . . .   | 200,000     | 200,000                  |
| Fish, " . . . .        | 100,000     | 200,000                  |
| Oil, gallons . . . .   | 50,000,000  | 500,000                  |
| Wine, " . . . .        | 605,000,000 | 6,050,000                |
| Total . . . . .        |             | 18,800,000               |

This gives an average of 12 cwt. per inhabitant, or 2 tons to each hand engaged in farming, the ratio of the latter in France being 6 tons. The ordinary grain crops are as follows :—

| Provinces  | Tons      |           |           |           |
|------------|-----------|-----------|-----------|-----------|
|            | Wheat     | Maize     | Oats, &c. | Total     |
| Northern . | 600,000   | 850,000   | 300,000   | 1,750,000 |
| Middle .   | 1,000,000 | 550,000   | 200,000   | 1,750,000 |
| Southern . | 1,400,000 | 350,000   | 550,000   | 2,300,000 |
| Total .    | 3,000,000 | 1,750,000 | 1,050,000 | 5,800,000 |

Northern Italy comprises Venice, Lombardy, and Piedmont; Southern includes Naples and Sicily; all the rest is grouped under the Middle provinces. Deducting grain used for seed and cattle, the annual consumption averages 4,500,000 tons home-grown and 700,000 imported, to which adding rice the total will reach 5,700,000 tons, equal to 7 bushels per inhabitant.

Italy is so very poor as regards live stock that the supply of meat is the lowest in Europe, and yet the poverty of the people compels them to export some, viz. :—

|                | Tons    |        |             |
|----------------|---------|--------|-------------|
|                | Supply  | Export | Consumption |
| Beef . . . .   | 250,000 | 20,000 | 230,000     |
| Mutton . . . . | 70,000  | 2,000  | 68,000      |
| Pork . . . .   | 70,000  | 3,000  | 67,000      |
| Total . .      | 390,000 | 25,000 | 365,000     |

A portion of what is exported is in the form of live animals. The consumption of meat is only 27 lbs. per inhabitant. In compensation for meat exported Italy imports 50,000 tons of dried fish. The consumption of wine is about 570 million gallons, which gives an average of 18 gallons per inhabitant, the same as in Spain.

Here, as in some other countries, the rise in the price of coffee has been attended with diminished consumption, viz. :—

| Year            | Tons, Coffee | Price, £ per Ton |
|-----------------|--------------|------------------|
| 1885-87 . . . . | 16,000       | 68               |
| 1893-95 . . . . | 12,000       | 100              |

Ten years ago the consumption of coffee averaged 20 ounces per inhabitant, whereas at present it does not exceed 14 ounces. The imports of sugar have likewise declined very notably, viz. :—

| Year            | Tons    | Lbs. per Inhabitant |
|-----------------|---------|---------------------|
| 1885-87 . . . . | 116,000 | 9                   |
| 1893-95 . . . . | 76,000  | 6                   |

Dairy farming has progressed so favourably that whereas down to 1888 the imports of butter and cheese exceeded the exports, Italy now sends out yearly about 6000 tons more than she imports. In 1895 the output of the dairies was 29,000 tons of butter and 116,000 of cheese, together 145,000 tons, an average of 140 pounds per cow. The

value of food imported and exported may be summed up thus :—

| Imports        | £         | Exports        | £          |
|----------------|-----------|----------------|------------|
| Grain . . . .  | 4,000,000 | Wine . . . .   | 2,100,000  |
| Fish . . . .   | 1,300,000 | Oil . . . .    | 2,000,000  |
| Coffee . . . . | 1,200,000 | Meat . . . .   | 1,400,000  |
| Sugar . . . .  | 900,000   | Eggs . . . .   | 1,400,000  |
| Sundries . . . | 600,000   | Fruit . . . .  | 1,900,000  |
|                |           | Sundries . . . | 1,800,000  |
| Total . .      | 8,000,000 | Total . .      | 10,600,000 |

The above shows that although Italy does not produce enough food for her population she is still an exporter rather than an importer.

Exports of fruit have increased 50 per cent. in ten years, viz. :—

| Year            | Tons    | Value, £  | £ per Ton |
|-----------------|---------|-----------|-----------|
| 1885-86 . . . . | 141,000 | 1,600,000 | 11.3      |
| 1894-95 . . . . | 228,000 | 1,900,000 | 8.3       |

The fall in price has indirectly stimulated production, by extending the markets and increasing the demand in foreign countries for Italian fruit. Eggs are nearly stationary, exports showing as follows :—

| Year            | Millions | Value, £  | Pence per Doz |
|-----------------|----------|-----------|---------------|
| 1885-87 . . . . | 480      | 1,200,000 | 6.2           |
| 1893-95 . . . . | 520      | 1,360,000 | 6.5           |

The value of food consumed yearly is approximately as follows :—

|                 | £          |                | £           |
|-----------------|------------|----------------|-------------|
| Grain . . . .   | 45,000,000 | Fruit, &c. . . | 13,000,000  |
| Meat . . . .    | 18,000,000 | Dairy, &c. . . | 28,000,000  |
| Wine . . . .    | 35,000,000 | Sundries . . . | 8,000,000   |
| Fish, &c. . . . | 6,000,000  | Total . . . .  | 153,000,000 |

This is an average of only 99 shillings per inhabitant, which is even lower than in Ireland.

#### SPAIN

Putting aside the unreliable official statements, the production and consumption of grain, meat, wine, &c., appear to be approximately as follows :—

|                   | Production | Consumption |
|-------------------|------------|-------------|
| Grain, tons . . . | 5,800,000  | 6,100,000   |
| Meat, " . . . .   | 430,000    | 430,000     |
| Potatoes, " . . . | 1,500,000  | 1,500,000   |
| Fish, " . . . .   | 50,000     | 100,000     |
| Wine, gallons . . | 420,000    | 310,000,000 |

Deducting what is used for seed and cattle, the consumption of grain by the inhabitants is about 3,600,000 tons, one-tenth imported, the average consumption being 8 bushels per head. Before the year 1880 there was always a surplus of grain for exportation,\* and it is worthy of note that Neumann Spallart's estimate in 1876 of the grain crops was 60 per cent. higher than Jurasscheck's in 1893. The following table compares what

\* Note.—In fifteen years, down to 1878, Spain exported 1,350,000 tons of wheat, being an average of 90,000 tons per annum.

may be considered the actual production with Spallart's estimate in 1876 :—

|                     | 1876      | 1897      |
|---------------------|-----------|-----------|
| Wheat, tons . . .   | 4,000,000 | 2,200,000 |
| Barley, " . . .     | 1,900,000 | 1,500,000 |
| Maize, &c., " . . . | 2,000,000 | 2,100,000 |
| Total . . .         | 8,100,000 | 5,800,000 |

Jurascheck's estimate (1893) is no higher than 5 million tons, but is perhaps too low.

Reducing all food to a grain denominator, the production is approximately as follows :—

|                         | Quantity    | Equivalent in Grain Tons |
|-------------------------|-------------|--------------------------|
| Grain, tons . . .       | 5,800,000   | 5,800,000                |
| Potatoes, " . . .       | 1,500,000   | 500,000                  |
| Meat, " . . .           | 430,000     | 3,400,000                |
| Fish, " . . .           | 50,000      | 100,000                  |
| Butter and ch., " . . . | 40,000      | 400,000                  |
| Wine, gallons . . .     | 420,000,000 | 4,200,000                |
| Total . . .             |             | 14,400,000               |

The importation of wheat has almost doubled in ten years, viz. :—

|               | Tons Yearly | Lbs. per Inhab. |
|---------------|-------------|-----------------|
| 1885-86 . . . | 130,000     | 16              |
| 1890-91 . . . | 160,000     | 19              |
| 1893-96 . . . | 300,000     | 36              |

Two-thirds of the population subsist on wheat, the remainder on maize, rye, &c. The decline in the production of grain has been perhaps partly due to civil wars, but still more to the fact that Spanish peasants find it more profitable to devote their attention to fruit than to cereals.

Exports of fruit show thus :—

|               | Tons Yearly | Value, £  | £ per Ton |
|---------------|-------------|-----------|-----------|
| 1885-86 . . . | 136,000     | 1,950,000 | 14.4      |
| 1890-91 . . . | 160,000     | 2,350,000 | 14.7      |
| 1894-96 . . . | 280,000     | 3,200,000 | 11.7      |

Fall of price has greatly stimulated production, by increased demand, the same as observed in Italy in the above period. At the same time there has been a decline in exports of wine, viz. :—

|               | Gallons Yearly | Value, £   | Pence per Gallon |
|---------------|----------------|------------|------------------|
| 1885-86 . . . | 160,000,000    | 13,000,000 | 20               |
| 1890-91 . . . | 230,000,000    | 12,800,000 | 13               |
| 1894-96 . . . | 120,000,000    | 4,700,000  | 9                |

In this case the fall of price (55 per cent.) has been tremendous, without any extension of markets or increase of demand. Hence vineyards are neglected, and the vintage, which had risen a few years ago to more than 600 million gallons, has now fallen to 420 millions. Home consumption is 310 millions, being an average of 18 gallons per inhabitant.

Imports and exports of food may be summed up thus :—

| Imports        | £         | Exports        | £         |
|----------------|-----------|----------------|-----------|
| Wheat . . .    | 2,400,000 | Wine . . .     | 4,100,000 |
| Fish . . .     | 1,100,000 | Fruit . . .    | 3,100,000 |
| Sugar . . .    | 800,000   | Oil . . .      | 600,000   |
| Sundries . . . | 1,200,000 | Sundries . . . | 400,000   |
| Total . . .    | 5,500,000 | Total . . .    | 8,200,000 |

The value of food consumed for human use is approximately as follows :—

|               | £          |                | £           |
|---------------|------------|----------------|-------------|
| Grain . . .   | 27,000,000 | Fruit, &c. . . | 8,000,000   |
| Meat . . .    | 20,000,000 | Dairy, &c. . . | 17,000,000  |
| Wine . . .    | 25,000,000 | Sundries . . . | 5,000,000   |
| Fish, &c. . . | 5,000,000  | Total . . .    | 107,000,000 |

This gives an average of 120 shillings per inhabitant, as compared with 99 in Italy and 166 in France.

As regards colonial articles of food imports have not much varied, except sugar, viz. :—

|               | Tons Yearly |       |        |        |
|---------------|-------------|-------|--------|--------|
|               | Coffee      | Cocoa | Sugar  | Fish   |
| 1885-86 . . . | 5,100       | 7,000 | 55,000 | 46,000 |
| 1890-91 . . . | 5,600       | 6,300 | 63,000 | 45,000 |
| 1894-95 . . . | 5,500       | 6,600 | 45,000 | 45,000 |

The value of all imports and exports of food at various dates is shown thus :—

|               | Yearly Average |            |                    |
|---------------|----------------|------------|--------------------|
|               | Imports, £     | Exports, £ | Surplus Exports, £ |
| 1885-86 . . . | 4,200,000      | 16,500,000 | 12,300,000         |
| 1890-91 . . . | 5,200,000      | 16,200,000 | 11,000,000         |
| 1894-95 . . . | 5,500,000      | 8,200,000  | 2,700,000          |
| Average . . . | 5,000,000      | 13,600,000 | 8,600,000          |

#### PORTUGAL

This kingdom, which is a little larger than Ireland, is for the most part fertile, and yet unable to produce enough food for its scanty population, having only 142 souls to the square mile. This miserable state of things is due to the nobles, who possess vast estates uncultivated, compelling the peasants to emigrate to Brazil. The production of food is declining, viz. :—

|                     | 1876        | 1896       |
|---------------------|-------------|------------|
| Grain, tons . . .   | 930,000     | 750,000    |
| Wine, gallons . . . | 110,000,000 | 70,000,000 |

The grain crop comprises 350,000 tons of maize, 200,000 of wheat, and 200,000 of rye, barley, &c. Deducting what is used for seed and cattle, the consumption of grain is about 700,000 tons, or 7 bushels per inhabitant. Only 40 per cent. of the population subsist on wheat, the rest on maize and other grain. Small as is the consumption of wheat, no less than one-third of it is imported, the native crop being hardly equal to the requirements of eight months in the year. The items of imported food are :—

|               | Tons Yearly |        |        |        |
|---------------|-------------|--------|--------|--------|
|               | Grain       | Coffee | Sugar  | Fish   |
| 1885-88 . . . | 140,000     | 2,500  | 24,000 | 22,000 |
| 1892-95 . . . | 140,000     | 2,000  | 25,000 | 22,000 |

Exports of food show as follows :—

|                 | Annual Averages |            |           |           |
|-----------------|-----------------|------------|-----------|-----------|
|                 | Quantity        |            | Value, £  |           |
|                 | 1885-87         | 1893-96    | 1885-87   | 1893-96   |
| Wine, galls.    | 37,000,000      | 15,000,000 | 3,100,000 | 2,400,000 |
| Fruit, tons     | 27,000          | 30,000     | 200,000   | 230,000   |
| Sardines, ..    | 14,000          | 19,000     | 200,000   | 270,000   |
| Sundries. .     | ...             | ...        | 100,000   | 100,000   |
| Total . . . . . |                 |            | 3,500,000 | 3,000,000 |

Home consumption of wine averages 55 million gallons, or 12 gallons per inhabitant, as compared with 18 gallons in Italy and in Spain. The total production of food, reduced to a grain denominator, is as follows :—

|                         | Quantity   | Equivalent in Grain Tons |
|-------------------------|------------|--------------------------|
| Grain, tons .           | 750,000    | 750,000                  |
| Potatoes, ..            | 300,000    | 100,000                  |
| Meat, ..                | 100,000    | 800,000                  |
| Fish, ..                | 40,000     | 100,000                  |
| Butter and cheese, tons | 10,000     | 100,000                  |
| Wine, gallons .         | 70,000,000 | 700,000                  |
| Total . . . . .         |            | 2,550,000                |

This is only 11 cwt. per inhabitant, a very low average for a nation essentially agricultural: the average in Spain is 16 cwt.

#### SWEDEN AND NORWAY

These kingdoms do not raise sufficient grain for their requirements. It is true that Sweden had a large surplus down to 1882, exporting usually 300,000 tons, but at present she has a yearly deficit of 200,000 tons, covered by importation. Norway has always been short of grain. The position stands thus :—

|                       | Sweden    | Norway  | Total     |
|-----------------------|-----------|---------|-----------|
| Production, tons. . . | 2,750,000 | 450,000 | 3,200,000 |
| Imports, .. .         | 200,000   | 370,000 | 570,000   |

Deducting what is used for seed and cattle, the consumption in the two kingdoms is about 2 million tons, or 11 bushels per inhabitant, including what is used for making liquor. The grain used for bread is approximately as follows :—

|                     | Tons      | Lbs. per Inhabitant |
|---------------------|-----------|---------------------|
| Wheat . . . . .     | 300,000   | 96                  |
| Rye, &c., . . . . . | 1,200,000 | 384                 |
| Total . . . . .     | 1,500,000 | 480                 |

It appears that only one-fifth of the population subsist on wheat, the rest mostly on rye: two-thirds of the wheat is imported, and one-third of the rye. Net imports of grain have averaged as follows, yearly :—

| Years       | Tons    |         |         | Value, £ Sterling |
|-------------|---------|---------|---------|-------------------|
|             | Sweden  | Norway  | Total   |                   |
| 1885-87 . . | 10,000  | 250,000 | 260,000 | 1,600,000         |
| 1890-92 . . | 100,000 | 280,000 | 380,000 | 3,100,000         |
| 1894-96 . . | 200,000 | 370,000 | 570,000 | 2,900,000         |

The production of meat is as follows :—

|                 | Sweden  | Norway | Total   |
|-----------------|---------|--------|---------|
| Beef, tons . .  | 120,000 | 50,000 | 170,000 |
| Mutton, .. .    | 15,000  | 15,000 | 30,000  |
| Pork, .. .      | 25,000  | 5,000  | 30,000  |
| Total . . . . . | 160,000 | 70,000 | 230,000 |

Sweden exports live cattle equivalent to 6000 tons of meat yearly, but imports a corresponding quantity of pork: the consumption of meat therefore averages 74 lbs. per inhabitant, and the same in Norway. There is a slight deficit of butter in the latter country, which imports yearly about 18 oz. per inhabitant, but Sweden has a surplus, exporting 25,000 tons, which is equal to 11 lbs. per inhabitant. Taking the two kingdoms collectively, the net imports and exports of food show as follows :—

| Imports      | £         | Exports    | £         |
|--------------|-----------|------------|-----------|
| Grain . . .  | 2,900,000 | Fish . . . | 3,300,000 |
| Coffee . . . | 2,300,000 | Butter . . | 2,300,000 |
| Wine, &c. .  | 800,000   | Sundries . | 400,000   |
| Total . . .  | 6,000,000 | Total . .  | 6,000,000 |

Exports of fish have increased prodigiously. Ten years ago Sweden imported more than she exported, whereas now her net exports of fish average from 80,000 to 90,000 tons yearly. Net exports of both countries show :—

|            | Tons Fish Yearly |         | Value, £  |           |
|------------|------------------|---------|-----------|-----------|
|            | 1885-87          | 1894-96 | 1885-87   | 1894-96   |
| Sweden . . | ...              | 80,000  | ...       | 1,100,000 |
| Norway . . | 140,000          | 160,000 | 1,800,000 | 2,100,000 |
| Total . .  | 140,000          | 240,000 | 1,800,000 | 3,200,000 |

Exports of Swedish butter have exactly doubled since 1886.

Reducing all kinds of food to grain equivalent, the production is approximately :—

| Tons          | Quantity  |           |           | Equiv. in Grain Tons |
|---------------|-----------|-----------|-----------|----------------------|
|               | Sweden    | Norway    | Total     |                      |
| Grain . . .   | 2,750,000 | 450,000   | 3,200,000 | 3,200,000            |
| Potatoes . .  | 1,500,000 | 600,000   | 2,100,000 | 700,000              |
| Meat . . .    | 160,000   | 70,000    | 230,000   | 1,840,000            |
| Butter, &c. . | 60,000    | 20,000    | 80,000    | 800,000              |
| Fish . . .    | 200,000   | 260,000   | 460,000   | 920,000              |
| Total . .     | 4,670,000 | 1,400,000 | 6,070,000 | 7,460,000            |

This gives an average of more than one ton (22 cwt.) per inhabitant, being one of the highest ratios of food production in Europe, notwithstanding the disadvantages of climate and soil under which these northern kingdoms labour. The value of food consumed is approximately :—

|                  | Sweden, £  | Norway, £  | Total      |
|------------------|------------|------------|------------|
| Grain . . . . .  | 10,000,000 | 3,000,000  | 13,000,000 |
| Meat . . . . .   | 8,000,000  | 3,000,000  | 11,000,000 |
| Dairy . . . . .  | 5,000,000  | 2,000,000  | 7,000,000  |
| Sundries . . . . | 7,000,000  | 3,000,000  | 10,000,000 |
| Total . . . . .  | 30,000,000 | 11,000,000 | 41,000,000 |

This gives an average of £6 per inhabitant in Sweden, 110 shillings in Norway, and 116 shillings for the two kingdoms collectively.

## DENMARK

There is no country in Europe that produces so much food as Denmark in reference to population or to area. Reducing all to a grain denominator, we find :—

|                                | Quantity  | Equivalent in Grain Tons |
|--------------------------------|-----------|--------------------------|
| Grain, tons . . . . .          | 2,300,000 | 2,300,000                |
| Potatoes, " . . . . .          | 450,000   | 150,000                  |
| Meat, " . . . . .              | 130,000   | 1,040,000                |
| Butter and cheese, " . . . . . | 60,000    | 600,000                  |
| Fish " . . . . .               | 50,000    | 100,000                  |
| Total . . . . .                |           | 4,190,000                |

This is equal to 2 tons per inhabitant, or 10 per cent. more than the ratio in the United States, and more than double the general European ratio. Down to 1884 Denmark used to export about 200,000 tons of grain, but so large is now the consumption in the fattening of cattle that there is a constant importation of grain, net imports showing :—

|                  | Tons    |         |         |         |
|------------------|---------|---------|---------|---------|
|                  | 1893    | 1894    | 1895    | 1896    |
| Wheat . . . . .  | 32,000  | 56,000  | 64,000  | 48,000  |
| Rye . . . . .    | 49,000  | 115,000 | 140,000 | 96,000  |
| Barley . . . . . | 8,000   | 15,000  | 160,000 | 6,000   |
| Maize . . . . .  | 84,000  | 60,000  | 50,000  | 220,000 |
| Oats . . . . .   | 17,000  | 19,000  | 26,000  | 25,000  |
| Total . . . . .  | 190,000 | 405,000 | 440,000 | 395,000 |

Deducting what is used for seed, the consumption of grain is as follows :—

|                        | Home-grown | Imported | Total     |
|------------------------|------------|----------|-----------|
| Wheat, tons . . . . .  | 100,000    | 50,000   | 150,000   |
| Rye, " . . . . .       | 400,000    | 100,000  | 500,000   |
| Barley, " . . . . .    | 500,000    | 50,000   | 550,000   |
| Oats, &c., " . . . . . | 1,050,000  | 150,000  | 1,200,000 |
| Total . . . . .        | 2,050,000  | 350,000  | 2,400,000 |

About one-fourth of the population subsists on wheat, the rest on rye. The value of imported grain is two millions sterling.

Exports of a pastoral character are shown thus :—

| Years             | Tons Yearly |        | Millions of Eggs | Total Value, £ |
|-------------------|-------------|--------|------------------|----------------|
|                   | Meat        | Butter |                  |                |
| 1886-88 . . . . . | 50,000      | 20,000 | 102              | 4,500,000      |
| 1890-92 . . . . . | 70,000      | 35,000 | 145              | 7,100,000      |
| 1894-96 . . . . . | 80,000      | 40,000 | 166              | 7,900,000      |

Home consumption averages 65 lbs. of meat and 20 lbs. of butter and cheese per inhabitant.

Imports of colonial merchandise are as follows :—

| Years             | Sugar, Tons | Coffee, Tons |
|-------------------|-------------|--------------|
| 1886-88 . . . . . | 15,000      | 5,000        |
| 1894-96 . . . . . | 20,000      | 9,000        |

This gives an average yearly consumption of 20 lbs. of sugar and 9 lbs. of coffee per inhabitant.

The value of food consumed for human use is approximately :—

|                    |             |                     |             |
|--------------------|-------------|---------------------|-------------|
| Grain . . . . .    | £ 5,500,000 | Coffee, &c. . . . . | £ 1,500,000 |
| Meat . . . . .     | 3,000,000   | Liquor, &c. . . . . | 3,500,000   |
| Dairy, &c. . . . . | 2,500,000   | Total . . . . .     | 16,000,000  |

This gives an average of 144 shillings per inhabitant, against 120 in Sweden.

## HOLLAND

Although Holland surpasses Denmark in productive area and has twice the population, the production of food, reduced to a grain denominator, is equal in the two countries. The ordinary production in Holland is :—

|                             | Tons      | Equivalent in Grain Tons |
|-----------------------------|-----------|--------------------------|
| Grain . . . . .             | 1,000,000 | 1,000,000                |
| Potatoes . . . . .          | 2,100,000 | 700,000                  |
| Meat . . . . .              | 130,000   | 1,040,000                |
| Butter and cheese . . . . . | 120,000   | 1,200,000                |
| Sugar . . . . .             | 200,000   | 400,000                  |
| Fish . . . . .              | 120,000   | 240,000                  |
| Total . . . . .             |           | 4,580,000                |

This gives an average of 1 ton per inhabitant, against 2 tons in Denmark.

The consumption of grain, after deducting for seed and exportation, averages as follows :—

|                        | Home-grown | Imported  | Total     |
|------------------------|------------|-----------|-----------|
| Wheat, tons . . . . .  | 120,000    | 430,000   | 550,000   |
| Rye, " . . . . .       | 230,000    | 220,000   | 450,000   |
| Barley, " . . . . .    | 100,000    | 350,000   | 450,000   |
| Oats, &c., " . . . . . | 250,000    | ...       | 250,000   |
| Total . . . . .        | 700,000    | 1,000,000 | 1,700,000 |

There is an ordinary exportation of 200,000 tons of oats, and if this be taken into account it may be said that Holland consumes 900,000 tons of native, and 800,000 of imported, grain. Rather more than half the population subsists on wheat, the rest on rye. The net value of grain imports was as follows :—

| Year           | Wheat, £  | Rye, &c., £ | Total, £   |
|----------------|-----------|-------------|------------|
| 1893 . . . . . | 5,400,000 | 4,600,000   | 10,000,000 |
| 1894 . . . . . | 6,700,000 | 5,800,000   | 12,500,000 |
| 1895 . . . . . | 6,500,000 | 5,200,000   | 11,700,000 |
| 1896 . . . . . | 7,000,000 | 6,200,000   | 13,200,000 |

As regards colonial products, the net annual imports show as follows :—

| Years             | Tons   |           |        |       |
|-------------------|--------|-----------|--------|-------|
|                   | Rice   | Margarine | Coffee | Tea   |
| 1885-87 . . . . . | 75,000 | ...       | 27,000 | 2,300 |
| 1893-96 . . . . . | 90,000 | 30,000    | 36,000 | 2,900 |

At present, consumption averages 40 lbs. rice, 15 lbs. coffee, and 21 oz. tea per inhabitant.

Exports of food show as follows :—

| Years             | Tons Yearly |         |        |            |
|-------------------|-------------|---------|--------|------------|
|                   | Meat        | Butter  | Fish   | Vegetables |
| 1885-87 . . . . . | 25,000      | 103,000 | 70,000 | 68,000     |
| 1893-96 . . . . . | 20,000      | 98,000  | 90,000 | 83,000     |

In the above table, Butter includes also cheese and margarine. The rapid increase of population in Holland checks the exportation of meat and of dairy products. Home consumption averages 55 lbs. meat, 15 lbs. butter and cheese, 25 lbs. fish. The value of food imports and exports is as follows:—

| Imports      | £          | Exports       | £          |
|--------------|------------|---------------|------------|
| Grain . . .  | 12,000,000 | Butter, &c. . | 5,300,000  |
| Rice . . .   | 2,200,000  | Vegetables .  | 2,200,000  |
| Coffee . . . | 2,200,000  | Fish . . .    | 1,500,000  |
| Tea, &c. .   | 1,600,000  | Meat, &c. .   | 1,000,000  |
| Total . . .  | 18,000,000 | Total . . .   | 10,000,000 |

Holland is debtor to foreign countries for food to the amount of 8 millions sterling, say 36 shillings per inhabitant, against 73 shillings in the United Kingdom and 18 in Germany. The value of food consumed for human use is approximately:—

|              |              |                |             |
|--------------|--------------|----------------|-------------|
| Grain . . .  | £ 11,500,000 | Sundries . . . | £ 2,500,000 |
| Meat . . .   | 5,500,000    | Rice, &c. .    | 6,000,000   |
| Dairy . . .  | 6,000,000    | Potatoes . .   | 2,500,000   |
| Liquor . . . | 4,000,000    | Total . . .    | 38,000,000  |

This gives an average of 160 shillings per inhabitant, as compared with 148 in Germany.

#### BELGIUM

The production and consumption of the principal articles of food are:—

|                        | Production | Consumption |
|------------------------|------------|-------------|
| Grain, tons .          | 1,800,000  | 3,200,000   |
| Meat, " .              | 110,000    | 140,000     |
| Butter and cheese, " . | 60,000     | 70,000      |

The population is so dense that there is a deficit in the above items. Deducting what is used for seed, the consumption is approximately as follows:—

|               | Home-grown | Imported  | Total     |
|---------------|------------|-----------|-----------|
| Wheat, tons . | 400,000    | 400,000   | 800,000   |
| Rye, &c., " . | 1,200,000  | 1,000,000 | 2,200,000 |
| Total . . .   | 1,600,000  | 1,400,000 | 3,000,000 |

About one-half of the grain is used in breweries and by cattle, the remainder giving an average of 9 bushels per inhabitant. Belgium may be said to depend on imported grain for six months in the year, and on foreign meat and butter for two months. The net value of imported food is shown thus:—

|              | £ Sterling |            |            |
|--------------|------------|------------|------------|
|              | 1894       | 1895       | 1896       |
| Grain . . .  | 7,600,000  | 8,100,000  | 9,000,000  |
| Meat . . .   | 1,000,000  | 800,000    | 1,000,000  |
| Butter . . . | 600,000    | 400,000    | 300,000    |
| Fish . . .   | 900,000    | 900,000    | 900,000    |
| Coffee . . . | 2,200,000  | 2,200,000  | 2,100,000  |
| Wine . . .   | 1,100,000  | 1,300,000  | 1,200,000  |
| Total . . .  | 13,400,000 | 13,700,000 | 14,500,000 |

The people of Belgium pay 42 shillings per head for imported food, against which there is a set-off of 2 millions sterling yearly for exports of sugar, which brings down the net cost of imported food to 12½ millions sterling,

or 40 shillings per inhabitant. The production of beet-sugar has doubled in ten years, and now reaches 240,000 tons, of which 180,000 are exported, the balance sufficing to give each inhabitant 25 lbs. per annum. Reducing all food to a grain denominator, the production is as follows:—

|              | Tons      | Equivalent in Tons Grain |
|--------------|-----------|--------------------------|
| Grain . . .  | 1,800,000 | 1,800,000                |
| Potatoes . . | 3,600,000 | 1,200,000                |
| Meat . . .   | 110,000   | 900,000                  |
| Butter . . . | 60,000    | 600,000                  |
| Sugar . . .  | 240,000   | 500,000                  |
| Total . . .  |           | 5,000,000                |

This is no more than 16 cwt. per inhabitant, which is not surprising, as the agricultural population is only one-fourth of the total. The value of food consumed for human use is approximately as follows:—

|              |              |               |             |
|--------------|--------------|---------------|-------------|
| Grain . . .  | £ 14,000,000 | Coffee, &c. . | £ 5,000,000 |
| Meat . . .   | 7,000,000    | Potatoes . .  | 7,000,000   |
| Liquor . . . | 9,000,000    | Sundries . .  | 2,000,000   |
| Dairy, &c. . | 8,000,000    | Total . . .   | 52,000,000  |

This gives an average of 160 shillings per inhabitant, the same as in France and Holland.

#### SWITZERLAND

The productive area is so small that Switzerland subsists on imported grain during eight months, imported meat four months, of the year. Deducting what is used for seed, the consumption of grain is as follows:—

|               | Home-grown | Imported | Total   |
|---------------|------------|----------|---------|
| Wheat, tons . | 50,000     | 390,000  | 440,000 |
| Oats, " .     | 60,000     | 70,000   | 130,000 |
| Barley, " .   | 50,000     | 20,000   | 70,000  |
| Rye, &c., " . | 60,000     | 30,000   | 90,000  |
| Total . . .   | 220,000    | 510,000  | 730,000 |

The amount used for human food is about 600,000 tons, equal to 8 bushels per inhabitant. Reducing all kinds of food to a grain equivalent, the production is as follows:—

|                        | Quantity   | Equivalent in Grain Tons |
|------------------------|------------|--------------------------|
| Grain, tons .          | 250,000    | 250,000                  |
| Potatoes, " .          | 1,200,000  | 400,000                  |
| Meat, " .              | 80,000     | 640,000                  |
| Butter and cheese, " . | 70,000     | 700,000                  |
| Wine, gallons .        | 30,000,000 | 300,000                  |
| Total . . .            |            | 2,290,000                |

This is only 14 cwt. per inhabitant. The principal articles of imported food show as follows:—

|              | Quantity Yearly |            | Value, £  |           |
|--------------|-----------------|------------|-----------|-----------|
|              | 1886-88         | 1892-96    | 1886-88   | 1892-96   |
| Grain, tons  | 370,000         | 540,000    | 3,400,000 | 3,700,000 |
| Meat, " .    | 25,000          | 30,000     | 1,000,000 | 1,400,000 |
| Sugar, " .   | 35,000          | 50,000     | 600,000   | 700,000   |
| Coffee, " .  | 8,000           | 9,000      | 600,000   | 700,000   |
| Wine, galls. | 15,000,000      | 20,000,000 | 1,000,000 | 1,100,000 |
| Sundries .   | ...             | ...        | 800,000   | 1,100,000 |
| Total . . .  |                 |            | 7,400,000 | 8,700,000 |

The average consumption per inhabitant is: meat, 75 lbs.; sugar, 35 lbs.; butter and cheese, 20 lbs.; coffee, 6 lbs.; wine, 13 gallons. There is a deficit of poultry, the importation of eggs averaging 120 millions yearly, or 40 per inhabitant. Exports of food are limited to cheese and condensed milk, viz. :—

|              | Tons Yearly |         | Value, £  |           |
|--------------|-------------|---------|-----------|-----------|
|              | 1886-88     | 1893-96 | 1886-88   | 1893-96   |
| Cheese . . . | 27,000      | 22,000  | 1,500,000 | 1,500,000 |
| Milk . . .   | 13,000      | 18,000  | 500,000   | 700,000   |
| Total . . .  | 40,000      | 40,000  | 2,000,000 | 2,200,000 |

The net sum paid yearly for imported food, therefore, is £6,500,000, equal to 42 shillings per inhabitant, against 18 shillings in Germany and 40 in Belgium. The value of food consumed yearly is approximately as follows :—

|                     | £ Sterling |           |            |
|---------------------|------------|-----------|------------|
|                     | Home-grown | Imported  | Total      |
| Grain . . .         | 1,200,000  | 3,700,000 | 4,900,000  |
| Meat . . .          | 4,000,000  | 1,400,000 | 5,400,000  |
| Wine . . .          | 1,000,000  | 1,100,000 | 2,100,000  |
| Dairy produce . . . | 4,000,000  | ...       | 4,000,000  |
| Sundries . . .      | 2,400,000  | 2,500,000 | 4,900,000  |
| Total . . .         | 12,600,000 | 8,700,000 | 21,300,000 |

This gives an average of 140 shillings per inhabitant, against 160 in France.

#### THE DANUBIAN STATES

These countries produce food much in excess of their requirements, and have always a considerable surplus for exportation. The production of grain, meat, and wine is approximately as follows :—

|                | Grain, Tons | Meat, Tons | Wine, Gallons |
|----------------|-------------|------------|---------------|
| Roumania . . . | 4,200,000   | 200,000    | 100,000,000   |
| Servia . . .   | 900,000     | 100,000    | 35,000,000    |
| Bulgaria . . . | 1,800,000   | 100,000    | 35,000,000    |
| Total . . .    | 6,900,000   | 400,000    | 170,000,000   |

Wheat constitutes 40 per cent. of the total grain crop, maize 40 per cent., the remainder being made up of barley, rye, &c. The ordinary consumption and export are shown thus :—

|                | Tons      |             |           |
|----------------|-----------|-------------|-----------|
|                | Crop      | Consumption | Export    |
| Wheat . . .    | 2,500,000 | 1,300,000   | 1,200,000 |
| Maize . . .    | 2,500,000 | 1,700,000   | 800,000   |
| Barley . . .   | 1,200,000 | 800,000     | 400,000   |
| Rye, &c. . .   | 700,000   | 500,000     | 200,000   |
| Total . . .    | 6,900,000 | 4,300,000   | 2,600,000 |
| Roumania . . . | 4,200,000 | 2,200,000   | 2,000,000 |
| Bulgaria . . . | 1,800,000 | 1,200,000   | 600,000   |
| Servia . . .   | 900,000   | 900,000     | ...       |
| Total . . .    | 6,900,000 | 4,300,000   | 2,600,000 |

Deducting what is used for seed and cattle, the consumption of grain is about 3 million tons, or 10 bushels per inhabitant. The average consumption of wine is 12

gallons per inhabitant, the surplus for exportation seldom reaching 25 million gallons. The production of meat may be stated thus: beef, 170,000; mutton, 150,000; pork, 80,000; total, 400,000 tons. Consumption averages 75 lbs. per inhabitant, leaving a small surplus for exportation, in the form of live cattle. Items of food imported average yearly as follows :—

|                          |           | Value, £  |
|--------------------------|-----------|-----------|
| Coffee, tons . . .       | 3,200     | 280,000   |
| Sugar, „ . . .           | 32,000    | 480,000   |
| Olive oil, gallons . . . | 1,400,000 | 300,000   |
| Total . . .              |           | 1,000,000 |

On the other hand the value of exported food is very great, viz. :—

|             | 1893       | 1894       | 1896       |
|-------------|------------|------------|------------|
|             | £          | £          | £          |
| Grain . . . | 15,400,000 | 12,200,000 | 10,000,000 |
| Meat . . .  | 200,000    | 200,000    | 200,000    |
| Total . . . | 15,600,000 | 12,400,000 | 10,200,000 |

The value of food consumed for human use is approximately as follows :—

|                | £ Sterling |            |            |            |
|----------------|------------|------------|------------|------------|
|                | Roumania   | Servia     | Bulgaria   | Total      |
| Grain . . .    | 9,000,000  | 3,500,000  | 5,500,000  | 18,000,000 |
| Meat . . .     | 8,000,000  | 4,000,000  | 4,000,000  | 16,000,000 |
| Wine, &c. . .  | 3,500,000  | 1,000,000  | 1,500,000  | 6,000,000  |
| Dairy . . .    | 3,000,000  | 1,000,000  | 1,500,000  | 5,500,000  |
| Sundries . . . | 4,000,000  | 1,500,000  | 2,000,000  | 7,500,000  |
| Total . . .    | 27,500,000 | 11,000,000 | 14,500,000 | 53,000,000 |

This gives an average of 90 shillings per head, against 114 in Austria.

#### GREECE

Even before the recent war the production of grain hardly sufficed for two-thirds of the population. Deducting what was used for seed, the normal consumption was as follows :—

|                     | Home-grown | Imported | Total   |
|---------------------|------------|----------|---------|
| Wheat, tons . . .   | 150,000    | 100,000  | 250,000 |
| Maize, &c., „ . . . | 250,000    | 100,000  | 350,000 |
| Total . . .         | 400,000    | 200,000  | 600,000 |

The production of meat is close on 60,000 tons, and about 3000 tons are imported yearly, the consumption averaging 64 lbs. per inhabitant.

The ordinary vintage is 36 million gallons, of which quantity one-tenth is exported, home consumption averaging 15 gallons per inhabitant. Reducing all food to a grain denominator, the production is approximately :—

|                     | Quantity   | Equiv. in Grain Tons |
|---------------------|------------|----------------------|
| Grain, tons . . .   | 450,000    | 450,000              |
| Meat, „ . . .       | 60,000     | 480,000              |
| Butter, „ . . .     | 10,000     | 100,000              |
| Fish, „ . . .       | 10,000     | 20,000               |
| Wine, gallons . . . | 36,000,000 | 360,000              |
| Total . . .         |            | 1,410,000            |

This gives an average of only 12 cwt. per inhabitant, being even less than in Switzerland. Imports and exports of food show as follows:—

| Imports        | £         | Exports        | £         |
|----------------|-----------|----------------|-----------|
| Grain . . . .  | 1,100,000 | Currants . . . | 900,000   |
| Fish . . . .   | 200,000   | Wine . . . .   | 200,000   |
| Sundries . . . | 400,000   | Sundries . . . | 400,000   |
| Total . . . .  | 1,700,000 | Total . . . .  | 1,500,000 |

The net sum which Greece has to pay in ordinary years for imported food is, therefore, no more than £200,000, equal to two shillings per inhabitant. The value of food consumed for human use is approximately £11,000,000, equal to £5 per inhabitant.

#### UNITED STATES

This country produces food for more than 100 millions of people, or about 50 per cent. over its population. The normal production of the principal items, reduced to grain equivalent, is as follows:—

|                   | Quantity   | Equiv. in Grain |
|-------------------|------------|-----------------|
| Grain, tons . . . | 74,000,000 | 74,000,000      |
| Potatoes, „ . . . | 6,300,000  | 2,100,000       |
| Meat, „ . . . .   | 4,500,000  | 36,000,000      |
| Sugar, „ . . . .  | 400,000    | 800,000         |
| Butter, &c. „ . . | 610,000    | 6,100,000       |
| Fish, „ . . . .   | 900,000    | 1,800,000       |
| Wine, gallons . . | 25,000,000 | 250,000         |
| Total . . . . .   |            | 121,050,000     |

This is equal to 35 cwt. per inhabitant. The average crops of the last six years, 1892-97, were as follows:—

|                  | Tons       | Value, £    | Shillings per Ton |
|------------------|------------|-------------|-------------------|
| Maize . . . . .  | 41,200,000 | 117,000,000 | 57                |
| Wheat . . . . .  | 12,500,000 | 54,000,000  | 86                |
| Oats . . . . .   | 17,600,000 | 38,000,000  | 43                |
| Rye, &c. . . . . | 2,700,000  | 10,000,000  | 74                |
| Total . . . . .  | 74,000,000 | 219,000,000 | 59                |

About 8 per cent. of the total grain crop is exported, the average of consumption and exports in five years ending December 1896 showing as follows:—

|                   | Tons       |            |           | Value Export. Millions £ |
|-------------------|------------|------------|-----------|--------------------------|
|                   | Produc.    | Consump.   | Export    |                          |
| Wheat . . . . .   | 12,300,000 | 7,800,000  | 4,500,000 | 30.2                     |
| Maize . . . . .   | 43,400,000 | 41,800,000 | 1,600,000 | 6.2                      |
| Oats, &c. . . . . | 20,300,000 | 19,900,000 | 400,000   | 1.6                      |
| Total . . . . .   | 76,000,000 | 69,500,000 | 6,500,000 | 38.0                     |

Production and consumption in the various sections of the Union show thus:—

| States            | Tons       |             | Surplus + Deficit — |
|-------------------|------------|-------------|---------------------|
|                   | Production | Consumption |                     |
| New England . .   | 500,000    | 2,400,000   | — 1,900,000         |
| Middle . . . . .  | 5,500,000  | 8,200,000   | — 2,700,000         |
| South . . . . .   | 15,000,000 | 19,700,000  | — 4,700,000         |
| Prairie . . . . . | 52,000,000 | 31,400,000  | + 20,600,000        |
| Pacific . . . . . | 3,000,000  | 7,800,000   | — 4,800,000         |
| Total . . . . .   | 76,000,000 | 69,500,000  | + 6,500,000         |

Consumption is accounted for approximately as follows:—

| States            | Tons       |               |            |
|-------------------|------------|---------------|------------|
|                   | For People | Cattle & Seed | Total      |
| New England . .   | 1,300,000  | 1,100,000     | 2,400,000  |
| Middle . . . . .  | 4,000,000  | 4,200,000     | 8,200,000  |
| South . . . . .   | 5,000,000  | 14,700,000    | 19,700,000 |
| Prairie . . . . . | 6,500,000  | 24,800,000    | 31,400,000 |
| Pacific . . . . . | 1,100,000  | 6,700,000     | 7,800,000  |
| Total . . . . .   | 18,000,000 | 51,500,000    | 69,500,000 |

The Prairie States have a surplus of about 20 million tons, of which two-thirds go to meet the deficits in the rest of the Union, and one-third is exported.

Potatoes do not enter largely into American diet, the average consumption in the United States being only 3½ bushels per inhabitant, against 7 in the United Kingdom, 13 in France, and 24 in Germany. The crop compares with population as follows:—

| States             | Tons      | Busbels per Inhab. |
|--------------------|-----------|--------------------|
| Eastern . . . . .  | 2,400,000 | 4.5                |
| Southern . . . . . | 400,000   | 1.0                |
| Western . . . . .  | 3,500,000 | 4.7                |
| Union . . . . .    | 6,300,000 | 3.5                |

The annual production of meat at various dates was approximately as follows:—

| Year           | Tons (000 omitted) |        |       |       |
|----------------|--------------------|--------|-------|-------|
|                | Beef               | Mutton | Pork  | Total |
| 1876 . . . . . | 1,340              | 360    | 1,030 | 2,730 |
| 1886 . . . . . | 2,310              | 480    | 1,840 | 4,630 |
| 1890 . . . . . | 2,690              | 440    | 2,060 | 5,190 |
| 1896 . . . . . | 2,410              | 380    | 1,710 | 4,500 |

This gives an average at present of 142 pounds per inhabitant, against 180 pounds in 1886. The production is short in the Eastern States, but the South and West have a large surplus, viz:—

| States           | Tons (000 omitted) |        |       |       |
|------------------|--------------------|--------|-------|-------|
|                  | Beef               | Mutton | Pork  | Total |
| New England . .  | 60                 | 10     | 10    | 80    |
| Middle . . . . . | 170                | 30     | 80    | 280   |
| South . . . . .  | 760                | 80     | 650   | 1,490 |
| West . . . . .   | 1,420              | 260    | 970   | 2,650 |
| Union . . . . .  | 2,410              | 380    | 1,710 | 4,500 |

Consumption and production in the above divisions are approximately thus:—

| States           | Tons       |             |
|------------------|------------|-------------|
|                  | Production | Consumption |
| New England . .  | 80,000     | 280,000     |
| Middle . . . . . | 280,000    | 1,010,000   |
| South . . . . .  | 1,490,000  | 880,000     |
| West . . . . .   | 2,650,000  | 1,780,000 * |
| Total . . . . .  | 4,500,000  | 3,950,000   |

\* Note.—Foremost in the production of food is the State of Iowa, which raises 500 pounds of meat and 5 tons of grain per inhabitant, being nearly five times as much grain and three times as much meat as the average for the whole Union.

There is usually a surplus of 550,000 tons for exportation, of which Great Britain takes 450,000 tons.

The available pasture lands are of sufficient extent (as already shown under *Cattle*, page 634) to carry almost three times the present number of live stock, and the production of meat may hereafter, without difficulty, be raised to the following quantity :—

| States     | Tons      |         |           |            |
|------------|-----------|---------|-----------|------------|
|            | Beef      | Mutton  | Pork      | Total      |
| N. England | 100,000   | 20,000  | 20,000    | 140,000    |
| Middle . . | 230,000   | 40,000  | 100,000   | 370,000    |
| South . .  | 1,250,000 | 140,000 | 1,050,000 | 2,440,000  |
| West . .   | 4,320,000 | 700,000 | 3,030,000 | 8,050,000  |
| Total . .  | 5,900,000 | 900,000 | 4,200,000 | 11,000,000 |

If this should come to pass the Eastern States (New England and Middle States) would have still only one-third of the meat necessary for their own population, while the South and West would have a surplus of 8 million tons over their present consumption.

Dairy-farming is so unevenly distributed that most parts of the Union have a deficit of butter and cheese. The following table shows the actual number of milch cows, and also the proper number required for the population :—

| States          | Milch Cows | Required Number | Surplus + Deficit — |
|-----------------|------------|-----------------|---------------------|
| New England . . | 820,000    | 1,040,000       | — 220,000           |
| Middle . . . .  | 2,880,000  | 3,200,000       | — 320,000           |
| Southern . . .  | 4,000,000  | 4,100,000       | — 100,000           |
| Western . . . . | 8,500,000  | 6,060,000       | + 2,440,000         |
| Total . . . .   | 16,200,000 | 14,400,000      | + 1,800,000         |

According to latest estimates the total output of butter and cheese reaches 610,000 tons yearly, of which 40,000 are exported. Home consumption therefore averages 18 lbs. per inhabitant, as compared with 22 lbs. in the United Kingdom.

The production of butter, honey, and eggs, according to census reports, was :—

| Year         | Butter, Tons | Honey, Tons | Eggs, Millions |
|--------------|--------------|-------------|----------------|
| 1870 . . . . | 230,000      | 7,000       | ...            |
| 1880 . . . . | 345,000      | 12,000      | 5,484          |
| 1890 . . . . | 455,000      | 28,000      | 9,804          |

Poultry increased 130 per cent. in 10 years, viz. : from 126 millions in 1880 to 285 millions in 1890, the average production of eggs being 44 to each bird in the former and 35 in the latter year.

There is a deficit of poultry in some parts of the Union, the following table showing the yearly production of eggs in 1890 compared with population :—

| States           | Millions of Eggs | Eggs per Inhabitant |
|------------------|------------------|---------------------|
| Eastern . . . .  | 2,804            | 148                 |
| Southern . . . . | 2,090            | 114                 |
| Western . . . .  | 4,910            | 195                 |
| Union . . . . .  | 9,804            | 157                 |

In the year of the above census, and for many years preceding, the United States imported annually 180

million eggs; this would bring up the consumption to 160 per inhabitant. On this basis the Eastern States would appear to show a deficit of 220 millions, the South 840 millions, while the Western States had a surplus of 880 millions. In other words, the South and West balanced one another, and all the imported eggs were used in the Eastern States. But in 1891 a duty was imposed on foreign eggs, and since then the importation has rapidly declined, not exceeding 11 million eggs in 1896.

The consumption of sugar is five times greater than the production, as the following table shows :—

| Year         | Tons Consumed |           |           | Lbs. per Inhabitant |
|--------------|---------------|-----------|-----------|---------------------|
|              | Native        | Imported  | Total     |                     |
| 1875 . . . . | 60,000        | 820,000   | 880,000   | 44                  |
| 1885 . . . . | 130,000       | 1,170,000 | 1,300,000 | 52                  |
| 1890 . . . . | 170,000       | 1,310,000 | 1,480,000 | 53                  |
| 1897 . . . . | 330,000       | 1,760,000 | 2,090,000 | 65                  |

The increase of duties on foreign sugar in 1894 was followed by greater production in Louisiana and other States; nevertheless, the quantity imported is double what it was in 1875. Americans consume more sugar per head than any other nation except Great Britain.

United States fisheries stand for almost one-third of all the fish caught in the world, the latest returns showing 880,000 tons yearly. Imports and exports balance, being each about 50,000 tons. Consumption, therefore, averages 28 lbs. per inhabitant, whereas the average in Europe is only 11 lbs., but in the United Kingdom it is 40 lbs.

The consumption of wines and liquors of all descriptions may be set down as follows :—

|                 | Gallons, Millions |          |       | Gals. per Inhab. |
|-----------------|-------------------|----------|-------|------------------|
|                 | Native            | Imported | Total |                  |
| Beer . . . .    | 865               | 5        | 870   | 12.0             |
| Spirits . . . . | 72                | 1        | 73    | 1.0              |
| Wine . . . .    | 25                | 3        | 28    | 0.4              |
| Total . . . .   | 962               | 9        | 971   | 13.4             |

Reducing the above to alcohol, the amount stands thus :—

|                 | Gallons, Millions |            | Gallons per Head |
|-----------------|-------------------|------------|------------------|
|                 | Quantity          | In Alcohol |                  |
| Beer . . . .    | 870               | 44         | 0.6              |
| Spirits . . . . | 73                | 36         | 0.5              |
| Wine . . . .    | 28                | 6          | 0.1              |
| Total . . . .   | 971               | 86         | 1.2              |

The following table shows the consumption per head of various articles :—

|                    | 1870 | 1880 | 1890 | 1896 |
|--------------------|------|------|------|------|
| Wheat, bushels . . | 5.4  | 5.4  | 6.1  | 4.8  |
| Sugar, lbs. . . .  | 33.0 | 43.0 | 53.0 | 63.0 |
| Coffee, „ . . .    | 6.0  | 8.8  | 7.8  | 8.0  |
| Tea, „ . . . .     | 1.1  | 1.4  | 1.3  | 1.3  |
| Beer, gallons . .  | 5.3  | 8.3  | 13.7 | 15.2 |
| Spirits, „ . . .   | 2.1  | 1.3  | 1.4  | 1.0  |
| Wine, „ . . . .    | 0.3  | 0.6  | 0.5  | 0.3  |

The value of exported food is shown as follows :—

|             | £ Sterling Yearly |            |            |            |
|-------------|-------------------|------------|------------|------------|
|             | 1887-90           | 1891-95    | 1896       | 1897       |
| Cattle . .  | 3,800,000         | 6,800,000  | 7,900,000  | 9,000,000  |
| Grain . .   | 29,800,000        | 37,400,000 | 29,400,000 | 41,200,000 |
| Meat . .    | 18,900,000        | 25,000,000 | 24,400,000 | 25,000,000 |
| Butter, &c. | 3,300,000         | 4,000,000  | 3,100,000  | 3,200,000  |
| Sundries .  | 3,800,000         | 4,000,000  | 3,700,000  | 3,600,000  |
| Total . .   | 59,600,000        | 77,200,000 | 68,500,000 | 82,000,000 |

The value of food imports in the same period was as follows :—

|            | £ Sterling Yearly |            |            |            |
|------------|-------------------|------------|------------|------------|
|            | 1887-90           | 1891-95    | 1896       | 1897       |
| Coffee . . | 14,000,000        | 20,400,000 | 17,700,000 | 17,000,000 |
| Sugar . .  | 18,600,000        | 22,500,000 | 18,700,000 | 20,700,000 |
| Fruit . .  | 4,200,000         | 4,500,000  | 4,000,000  | 3,500,000  |
| Tea . .    | 2,900,000         | 2,900,000  | 2,600,000  | 3,100,000  |
| Wines . .  | 2,300,000         | 2,500,000  | 2,300,000  | 2,300,000  |
| Sundries . | 7,300,000         | 6,200,000  | 5,300,000  | 5,400,000  |
| Total . .  | 49,300,000        | 59,000,000 | 50,600,000 | 52,000,000 |

The surplus value of exported food over imported during the last 10 years averaged 16 millions sterling, or less than 5 shillings per inhabitant.

The value of food consumed for human use is approximately as follows :—

|               | £           | £                          |
|---------------|-------------|----------------------------|
| Grain . . .   | 90,000,000  | Dairy and eggs 106,000,000 |
| Meat . . .    | 132,000,000 | Fruit, &c. . . 40,000,000  |
| Liquor . . .  | 72,000,000  | Sundries . . . 26,000,000  |
| Imports . . . | 54,000,000  | Total . . . 520,000,000    |

This gives an average of 150 shillings per inhabitant, as compared with 166 in France and 206 in Great Britain.

#### CANADA

There is always a large surplus of grain, meat, cheese, and eggs, which items are exported chiefly to Great Britain. The ordinary production and net shipments of grain are :—

|                | Production | Consumption | Export  |
|----------------|------------|-------------|---------|
| Wheat,* tons   | 1,200,000  | 1,000,000   | 200,000 |
| Oats, "        | 2,600,000  | 2,600,000   | ...     |
| Maize, "       | 600,000    | 500,000     | 100,000 |
| Barley, &c., " | 700,000    | 700,000     | ...     |
| Total .        | 5,100,000  | 4,800,000   | 300,000 |

The production and consumption of meat are approximately as follows :—

|                | Production | Consumption | Export |
|----------------|------------|-------------|--------|
| Beef, tons . . | 210,000    | 180,000     | 30,000 |
| Mutton, " . .  | 35,000     | 25,000      | 10,000 |
| Pork, " . .    | 65,000     | 45,000      | 20,000 |
| Total . .      | 310,000    | 250,000     | 60,000 |

\* The crops of 1896-97-98 averaged 1,320,000 tons: see *Wheat*, p. 820.

The net annual value of food exports, and their weight, have been as follows :—

|             | Tons Yearly |         | Value, £  |            |
|-------------|-------------|---------|-----------|------------|
|             | 1884-86     | 1897    | 1884-86   | 1897       |
| Grain . .   | 300,000     | 560,000 | 1,800,000 | 2,600,000  |
| Meat . .    | 50,000      | 90,000  | 1,500,000 | 3,100,000  |
| Fish . .    | 80,000      | 80,000  | 1,200,000 | 2,100,000  |
| Butter, &c. | 40,000      | 80,000  | 1,900,000 | 3,400,000  |
| Eggs, &c. . | ...         | ...     | 500,000   | 300,000    |
| Total . .   |             |         | 6,900,000 | 11,500,000 |

Shipments of eggs have declined 40 per cent., namely, from 150 millions in 1886 to 90 millions at present. Potatoes have also fallen, exports being now 20,000 tons per annum.

Items of imported food show as follows :—

|                 | Quantity Yearly |         | Value, £  |           |
|-----------------|-----------------|---------|-----------|-----------|
|                 | 1884-86         | 1894-97 | 1884-86   | 1894-97   |
| Sugar, tons . . | 110,000         | 190,000 | 1,200,000 | 1,900,000 |
| Tea, " . .      | 8,000           | 9,000   | 700,000   | 600,000   |
| Wine, gallons . | 650,000         | 700,000 | 200,000   | 150,000   |
| Total . . . . . |                 |         | 2,100,000 | 2,650,000 |

Consumption averages 80 lbs. sugar, 4 lbs. tea, per inhabitant.

Reducing all food to a grain equivalent, the production is as follows :—

|                       | Tons      | Equivalent in Grain |
|-----------------------|-----------|---------------------|
| Grain . . . . .       | 5,100,000 | 5,100,000           |
| Potatoes . . . . .    | 1,200,000 | 400,000             |
| Meat . . . . .        | 310,000   | 2,500,000           |
| Fish . . . . .        | 200,000   | 600,000             |
| Butter and cheese . . | 130,000   | 1,300,000           |
| Total . . . . .       |           | 9,900,000           |

This is equivalent to almost 2 tons per inhabitant, the ratio being 5 per cent. higher than in the United States. The value of food consumed for human use is approximately :—

|             | £         | £                      |
|-------------|-----------|------------------------|
| Grain . . . | 8,000,000 | Imports . . 2,700,000  |
| Meat . . .  | 8,000,000 | Sundries . . 4,300,000 |
| Dairy . . . | 4,000,000 | Total . . 27,000,000   |

This is about 105 shillings per inhabitant.

#### AUSTRALIA

The production and consumption of grain in ordinary years are as follows :—

|                | Production | Consumption | Export  |
|----------------|------------|-------------|---------|
| Wheat, tons .  | 700,000    | 400,000     | 300,000 |
| Oats, &c., " . | 740,000    | 740,000     | ...     |
| Total . .      | 1,440,000  | 1,140,000   | 300,000 |

South Australia, Victoria, and New Zealand have collectively a surplus of 450,000 tons of grain yearly, but New South Wales, Queensland, and Western Australia have an aggregate deficit of 150,000, so that the surplus

left for exportation to Europe is only 300,000 tons. As regards meat, the production is only one-third of what might be expected from the numbers of live stock, which is partly explained by the fact that sheep are bred not for the market but for growing wool: home consumption is estimated at 400,000 tons, equal to 208 lbs. per inhabitant, and the shipments of all kinds sum up 200,000 tons yearly. The time may come when Australian meat will be more in request. With the present numbers of stock the possible output of meat yearly would be:—

|                   | Tons    |           |        |           |
|-------------------|---------|-----------|--------|-----------|
|                   | Beef    | Mutton    | Pork   | Total     |
| N. S. Wales . .   | 90,000  | 470,000   | 10,000 | 570,000   |
| Queensland . .    | 270,000 | 200,000   | ...    | 470,000   |
| New Zealand . .   | 40,000  | 200,000   | 10,000 | 250,000   |
| Victoria . . .    | 70,000  | 135,000   | 15,000 | 220,000   |
| S. Australia, &c. | 40,000  | 105,000   | 5,000  | 150,000   |
| Seven Colonies .  | 510,000 | 1,110,000 | 40,000 | 1,660,000 |

Reducing all food to a grain denominator, the production at present is:—

|                          | Quantity  | Equivalent in Grain |
|--------------------------|-----------|---------------------|
| Grain, tons . .          | 1,500,000 | 1,500,000           |
| Potatoes, " . .          | 600,000   | 200,000             |
| Meat, " . . .            | 600,000   | 4,800,000           |
| Sugar, " . . .           | 80,000    | 160,000             |
| Butter and cheese, " . . | 55,000    | 550,000             |
| Wine, fish, &c. . .      | ...       | 70,000              |
| Total . . . . .          |           | 7,280,000           |

This gives an average of 35 cwt. per inhabitant, the same as in the United States. The value of food imported and exported is shown as follows:—

| Imports          | £         | Exports         | £         |
|------------------|-----------|-----------------|-----------|
| Liquors . . . .  | 1,600,000 | Meat . . . . .  | 3,800,000 |
| Tea . . . . .    | 1,200,000 | Grain . . . . . | 1,500,000 |
| Sundries . . . . | 1,200,000 | Butter, &c. . . | 1,700,000 |
| Total . . . . .  | 4,000,000 | Total . . . . . | 7,000,000 |

The value of food consumed for human use is approximately as follows:—

|                 | £         |                  | £          |
|-----------------|-----------|------------------|------------|
| Grain . . . . . | 5,000,000 | Imports . . . .  | 4,000,000  |
| Meat . . . . .  | 5,000,000 | Sundries . . . . | 3,000,000  |
| Dairy . . . . . | 4,000,000 | Total . . . . .  | 21,000,000 |

This is equal to 96 shillings per inhabitant, as compared with 105 in Canada.

#### ARGENTINA

This country ought to have a large surplus of grain, meat, and dairy products for the European markets, seeing the vastness of its fertile Pampas, the millions of its sheep and cattle, and the mildness and salubrity of its climate. Tillage is, nevertheless, at a considerable disadvantage owing to the constant danger of drought and locusts. The area under grain is about 9 million acres, yielding in good years  $4\frac{1}{2}$  million tons, but in bad years the crop hardly reaches one-third of that quantity.

Thus the surplus available for exportation varies as follows:—

|                 | Tons      |         | Average   |
|-----------------|-----------|---------|-----------|
|                 | 1895      | 1896    | 1893-96   |
| Wheat . . . . . | 990,000   | 550,000 | 1,050,000 |
| Maize . . . . . | 770,000   | 180,000 | 270,000   |
| Total . . . . . | 1,760,000 | 730,000 | 1,320,000 |

The production of meat (including cattle exported) is about 450,000 tons yearly, of which 200,000 are exported, the home consumption averaging 140 lbs. per inhabitant. The possible production would be as follows, if sheep-farmers were to grow less for wool than for meat:—

| Provinces         | Tons    |         |           |
|-------------------|---------|---------|-----------|
|                   | Beef    | Mutton  | Total     |
| Buenos Ayres . .  | 380,000 | 640,000 | 1,020,000 |
| Entre Rios . . .  | 160,000 | 50,000  | 210,000   |
| Santa Fé . . . .  | 90,000  | 30,000  | 120,000   |
| Cordoba . . . . . | 80,000  | 30,000  | 110,000   |
| Corrientes, &c. . | 210,000 | 50,000  | 260,000   |
| Total . . . . .   | 920,000 | 800,000 | 1,720,000 |

Reducing all kinds of food to a grain denominator, the production is as follows:—

|                     | Quantity   | Equivalent in Grain |
|---------------------|------------|---------------------|
| Grain, tons . . . . | 3,000,000  | 3,000,000           |
| Meat, " . . . . .   | 450,000    | 3,600,000           |
| Sugar, " . . . . .  | 130,000    | 400,000             |
| Butter, " . . . . . | 20,000     | 200,000             |
| Wine, gallons . . . | 35,000,000 | 350,000             |
| Total . . . . .     |            | 7,550,000           |

This is almost the same quantity of food as produced in Australia, and the average per inhabitant is 35 cwt., the same ratio as in the United States or Australia. The value of food produced, consumed, and exported, may be set down approximately thus:—

|                    | Production<br>£ | Consumption<br>£ | Export<br>£ |
|--------------------|-----------------|------------------|-------------|
| Grain . . . . .    | 15,000,000      | 9,000,000        | 6,000,000   |
| Meat . . . . .     | 8,400,000       | 5,000,000        | 3,400,000   |
| Wine . . . . .     | 2,500,000       | 2,500,000        | ...         |
| Dairy, &c. . . . . | 5,500,000       | 4,700,000        | 800,000     |
| Total . . . . .    | 31,400,000      | 21,200,000       | 10,200,000  |

The value of imported food is 4 millions sterling: hence the sum total of food consumed reaches £25,000,000, but we must deduct 3 millions for grain used for cattle and seed, leaving a balance of 22 millions, equal to 110 shillings per inhabitant.

#### URUGUAY

Production and consumption of grain and meat are shown as follows:—

|                 | Tons       |             |         |
|-----------------|------------|-------------|---------|
|                 | Production | Consumption | Export  |
| Grain . . . . . | 200,000    | 160,000     | 40,000  |
| Meat . . . . .  | 200,000    | 60,000      | 140,000 |

The actual amount of live stock is capable of producing from 300,000 to 350,000 tons of meat yearly. Climate and soil are, moreover, favourable to tillage, and as soon as a settled government be established, so as to admit a million of industrious European settlers, the Republic of Uruguay may easily produce five or six million tons of grain yearly.

## FOREST

The Foreign Office Report of 1893 was as follows:—

|             | Acres of Forest |             |               | P.c. of Area |
|-------------|-----------------|-------------|---------------|--------------|
|             | Public          | Private     | Total         |              |
| U. Kingdom  | ...             | 2,700,000   | 2,700,000     | 4.0          |
| France      | 7,400,000       | 16,000,000  | 23,400,000    | 17.9         |
| Germany     | 17,900,000      | 16,500,000  | 34,400,000    | 25.7         |
| Russia      | 299,000,000     | 199,200,000 | 498,200,000   | 37.2         |
| Austria Pr. | 5,900,000       | 18,300,000  | 24,200,000    | 32.6         |
| Hungary     | 9,400,000       | 9,400,000   | 18,800,000    | 23.5         |
| Italy       | 400,000         | 9,700,000   | 10,100,000    | 14.3         |
| Spain       | 16,400,000      | ...         | 16,400,000    | 13.0         |
| Portugal    | 100,000         | 1,100,000   | 1,200,000     | 5.2          |
| Sweden      | 14,300,000      | 30,200,000  | 44,500,000    | 40.7         |
| Norway      | 2,900,000       | 16,400,000  | 19,300,000    | 24.5         |
| Denmark     | ...             | 500,000     | 500,000       | 4.8          |
| Holland     | ...             | 600,000     | 600,000       | 6.9          |
| Belgium     | 500,000         | 700,000     | 1,200,000     | 17.1         |
| Switzerland | 1,500,000       | 600,000     | 2,100,000     | 20.1         |
| Roumania    | 2,300,000       | 2,600,000   | 4,900,000     | 15.2         |
| Servia      | 5,800,000       | ...         | 5,800,000     | 48.0         |
| Bulgaria    | 1,100,000       | ...         | 1,100,000     | 4.6          |
| Bosnia      | ...             | 6,700,000   | 6,700,000     | 45.0         |
| Greece      | 1,600,000       | 400,000     | 2,000,000     | 12.6         |
| Turkey      | ...             | 3,500,000   | 3,500,000     | 8.9          |
| Europe      | 386,500,000     | 335,100,000 | 721,600,000   | 30.3         |
| U. States   | ...             | 450,000,000 | 450,000,000   | 23.3         |
| India       | 70,000,000      | 70,000,000  | 140,000,000   | 25.0         |
| Algeria     | 5,100,000       | 700,000     | 5,800,000     | 5.5          |
| N.S. Wales  | 5,400,000       | 13,800,000  | 19,200,000    | 10.0         |
| Total       | 467,000,000     | 869,600,000 | 1,336,600,000 |              |

For Forests of Brazil, Canada, &c., see page 298.

The cutting of lumber is computed either by cubic foot or board measure, 8 feet of the latter being equal to 1 cubic foot, and 50 cubic feet to 1 ton.

## GERMANY

Nearly half of the public forests belong to local authorities. The State forests in 1894 gave the following result:—

|            | Acres     | Product<br>£ | Net do.<br>£ | Pence per<br>Acre |
|------------|-----------|--------------|--------------|-------------------|
| Prussia    | 6,000,000 | 2,900,000    | 1,250,000    | 50                |
| Bavaria    | 2,300,000 | 1,230,000    | 570,000      | 60                |
| Baden, &c. | 1,120,000 | 1,270,000    | 760,000      | 163               |
| Germany    | 9,420,000 | 5,400,000    | 2,580,000    | 66                |

In 14 years, from 1880, the felling of timber averaged 55 cubic feet per acre, including 15 cubic feet of lumber, the rest being firewood, &c. The cost of felling and conveying to the road is 17 pence per ton. In 1894 the Prussian Government paid £410,000 for the delivery of 6 million tons of lumber cut in Crown forests. There are 34½ million acres of forest in Germany, in which 380,000 wood-cutters earn a living, that is, one wood-cutter for 90 acres. The ordinary prices of timber per

ton and the stipend paid by the State to its wood-cutters are shown as follows:—

|          | Shills.<br>per Ton. | Woodman's<br>Fee.      |
|----------|---------------------|------------------------|
| Oak      | 25-29               | 1850 . . 80 pence, ton |
| Beech    | 15-17               | 1860 . . 90 " "        |
| Pine     | 12-13               | 1870-80 . 110 " "      |
| Firewood | 2                   | 1890-95 . 110 " "      |

In the Harz Mountains timber fetches 25 shillings, poles, &c., 6 to 8 shillings a ton.

## AUSTRIA

Export of timber exceeds 2 million tons yearly, value 5 millions sterling.

## UNITED STATES

In 1894 the forest area was defined thus:—

| State       | Acres       | Per Cent. of<br>Area | Forest Acres<br>per Inhab. |
|-------------|-------------|----------------------|----------------------------|
| New England | 20,700,000  | 52.0                 | 4.0                        |
| Middle      | 20,000,000  | 28.0                 | 1.4                        |
| South       | 212,300,000 | 42.0                 | 11.0                       |
| Prairie     | 89,500,000  | 18.0                 | 3.5                        |
| Pacific     | 116,000,000 | 16.0                 | 4.0                        |
| Union       | 458,500,000 | 25.0                 | 6.6                        |

Four States have nearly a quarter of all the forest area, viz:—

| State      | Acres Forest | Do. per Inhab. |
|------------|--------------|----------------|
| Texas      | 38,700,000   | 17.0           |
| Washington | 23,500,000   | 60.0           |
| Arkansas   | 20,400,000   | 18.0           |
| Florida    | 20,300,000   | 52.0           |

On the other hand the Prairie States have less than 4 acres of forest per inhabitant, and the cutting is so excessive that Congress must take measures in the matter. The Prairie States, as shown in a previous table, have only 89½ million acres of forest, that is, one-fifth of the forest area of the Union, and yet the census of 1890 showed that they stood for 51 per cent. of the sawn timber produced in the United States. The States in which the forest area is relatively largest are:—

| State          | Acres Area | Acres Forest | Percentage |
|----------------|------------|--------------|------------|
| Maine          | 19,100,000 | 12,300,000   | 64         |
| New Hampshire  | 5,800,000  | 3,600,000    | 62         |
| Arkansas       | 33,500,000 | 20,400,000   | 60         |
| Florida        | 34,700,000 | 20,300,000   | 58         |
| North Carolina | 31,100,000 | 16,800,000   | 54         |
| Tennessee      | 26,700,000 | 14,700,000   | 55         |
| Washington     | 42,800,000 | 23,500,000   | 55         |
| Alabama        | 32,700,000 | 17,400,000   | 53         |

The census report estimates the consumption yearly at 475 million tons, and the value of output at 215 millions sterling, which is about 9 shillings per acre of forest. This would be, however, more than a ton of timber per forest acre, which appears too high. The figures show:—

|               | Census      |             | Better Estimate |             |
|---------------|-------------|-------------|-----------------|-------------|
|               | Tons        | Value, £    | Tons            | Value, £    |
| Lumber        | 93,600,000  | 72,800,000  | 84,000,000      | 66,000,000  |
| Firewood, &c. | 360,000,000 | 93,600,000  | 240,000,000     | 62,400,000  |
| Sundries      | 21,400,000  | 48,600,000  | 16,000,000      | 11,600,000  |
| Total         | 475,000,000 | 215,000,000 | 340,000,000     | 140,000,000 |

## FREIGHT

The earnings of nations under this heading consist of: 1st, goods traffic by rail; 2nd, by canal or river; 3rd, by highroad; 4th, by shipping: the first three taken collectively may be estimated at 6 per cent. on all products in countries not exceeding 100,000 sq. miles, and 10 per cent. in those of greater area.

The following table also includes passenger traffic by rail, so as to give the total transport earnings. Shipping is supposed to earn £2 a year per ton of carrying power.

|                           | Millions £ Sterling    |       |       |       |                   |                   |         |
|---------------------------|------------------------|-------|-------|-------|-------------------|-------------------|---------|
|                           | Internal Goods Traffic |       |       |       | Passenger Traffic | Shipping Earnings | Total   |
|                           | Rail                   | River | Road  | Total |                   |                   |         |
| Great Britain . . . . .   | 44.6                   | 3.1   | 18.3  | 66.0  | 37.2              | 54.5              | 157.7   |
| Ireland . . . . .         | 1.6                    | 0.2   | 3.8   | 5.6   | 1.9               | 1.3               | 8.8     |
| United Kingdom . . . . .  | 46.2                   | 3.3   | 22.1  | 71.6  | 39.1              | 55.8              | 166.5   |
| France . . . . .          | 28.0                   | 3.9   | 71.7  | 103.6 | 22.5              | 4.8               | 130.9   |
| Germany . . . . .         | 54.9                   | 4.5   | 55.0  | 114.4 | 20.3              | 8.3               | 143.0   |
| Russia . . . . .          | 33.0                   | 14.4  | 49.1  | 96.5  | 8.4               | 3.0               | 107.9   |
| Austria . . . . .         | 22.2                   | 2.2   | 42.5  | 66.9  | 7.0               | 1.4               | 75.3    |
| Italy . . . . .           | 6.3                    | 0.3   | 33.6  | 40.2  | 4.0               | 2.9               | 47.1    |

## UNITED KINGDOM

The number of persons employed in transport in 1891 was:—

|                      | Rail    | Highroad | Water   | Total     |
|----------------------|---------|----------|---------|-----------|
| England . . . . .    | 187,000 | 367,000  | 430,000 | 984,000   |
| Scotland . . . . .   | 26,000  | 42,000   | 54,000  | 122,000   |
| Ireland . . . . .    | 10,000  | 27,000   | 29,000  | 66,000    |
| U. Kingdom . . . . . | 223,000 | 436,000  | 513,000 | 1,172,000 |

The product of their labour, according to the preceding table, was 166½ millions sterling, equal to £140 per man; of this sum wages would take about £80, while coal, fodder, and other raw material would stand for £20, leaving a balance of £40 per man or £47,000,000 for profit and dividends, on railways, shipping, express companies, and all other carrying enterprises. Secretary Morton, Minister of Agriculture in the United States, estimates charges in England for carts to or from shipping at 30 pence per ton, but this is too high: the estimate above given of £22,100,000 for the United Kingdom is only 10 pence a ton for cartage of 360 million tons carried by rail, and 150 millions to and from seaports.

## UNITED STATES

In 1896 the railways had 874,000 employees, and the census of 1890 showed 488,000 waggons, and 78,000 boatmen, in all 1,440,000. The product of their labour according to the preceding table would be equal to £247 per man. The railways average a net annual profit of 70 million pounds sterling, and the total transport service

yields probably 100 millions sterling net profit, that is £70 per man employed. The census of 1880 showed 419,000 railway employees, whose wages footed up £41,000,000, equal to £98 per man. See *Canals*, p. 649, and *Railways*, p. 795.

Rates of freight from Chicago for provisions per ton, to various European ports, by all rail to seaboard and thence by steamers, were as follows:—

| To                   | Shillings per ton |      |      |      |
|----------------------|-------------------|------|------|------|
|                      | 1888              | 1891 | 1894 | 1897 |
| Liverpool . . . . .  | 35                | 51   | 41   | 42   |
| Glasgow . . . . .    | 43                | 55   | 43   | 49   |
| London . . . . .     | 42                | 55   | 42   | 45   |
| Antwerp . . . . .    | 42                | 49   | 38   | 48   |
| Hamburg . . . . .    | 51                | 52   | 47   | 48   |
| Copenhagen . . . . . | 52                | 60   | 52   | 54   |
| Bordeaux . . . . .   | 55                | 70   | 59   | 60   |
| Average . . . . .    | 46                | 56   | 46   | 49   |

Rates on wheat per ton from St. Louis down the Mississippi to New Orleans, and to Liverpool via New Orleans; also from St. Louis by rail to New York and thence to Liverpool by steamer, were at various dates as follows:—

| St. Louis to                        | Shillings per ton |      |      |      |
|-------------------------------------|-------------------|------|------|------|
|                                     | 1882              | 1890 | 1894 | 1897 |
| New Orleans . . . . .               | 10.8              | 11.0 | 9.9  | 8.1  |
| Liverpool via New Orleans . . . . . | 37.4              | 24.0 | 19.5 | 21.4 |
| Liverpool via New York . . . . .    | 39.3              | 36.0 | 31.2 | 33.8 |

The distance from St. Louis to New Orleans is 1130 miles; freight therefore per ton of grain 100 miles is less than 9 pence (8.55), which is about the same as the charge for water-carriage of wheat from Chicago to New York (haulage nearly 1000 miles):—

| Shillings per ton |    |              |    |              |   |
|-------------------|----|--------------|----|--------------|---|
| 1860 . . . .      | 41 | 1880 . . . . | 20 | 1894 . . . . | 7 |
| 1870 . . . .      | 28 | 1890 . . . . | 10 | 1897 . . . . | 7 |

On 13 lines which stood for one-third of the goods traffic of the United States, the charge for carrying a ton 100 miles averaged as follows:—

| Year         | Pence | Year         | Pence | Year         | Pence |
|--------------|-------|--------------|-------|--------------|-------|
| 1870 . . . . | 154   | 1880 . . . . | 51    | 1890 . . . . | 39    |
| 1875 . . . . | 66    | 1885 . . . . | 42    | 1895 . . . . | 36    |

### FRICTION

Rennie's table is as follows:—

|                        |     |                        |     |
|------------------------|-----|------------------------|-----|
| Steel on ice . . . .   | 014 | Marble on marble . .   | 160 |
| Ice on ice . . . .     | 028 | Leather on iron . . .  | 250 |
| Brass on iron . . . .  | 135 | Granite on granite . . | 300 |
| Steel on steel . . . . | 146 | Iron on oak . . . .    | 620 |

### FRIENDLY SOCIETIES

There are three kinds of societies—co-operative, building, and friendly societies—and the aggregate membership and funds in the United Kingdom show thus:—

|             | 1886       | 1896        | Societies     | Funds, £   |
|-------------|------------|-------------|---------------|------------|
| No. of Soc. | 22,000     | 30,104      | Co-Operative  | 20,040,000 |
| Members     | 7,000,000  | 11,511,000  | Friendly      | 26,100,000 |
| Funds, £    | 79,000,000 | 107,470,000 | Building, &c. | 61,330,000 |

Excluding Co-operative and Building Societies, and considering only the Mutual Aid Societies of the working classes, their progress has been as follows:—

| Year | Members   | Funds, £   |
|------|-----------|------------|
| 1873 | 1,787,000 | 8,630,000  |
| 1880 | 4,802,000 | 13,003,000 |
| 1897 | 8,320,000 | 26,100,000 |

There are 1333 of these societies, averaging 6300 members each, but 9 of the principal societies average 250,000 each, having increased 32 per cent. in 10 years, viz.:—

| Societies           | ooo omitted |       |           |       |          |        |
|---------------------|-------------|-------|-----------|-------|----------|--------|
|                     | Members     |       | Income, £ |       | Funds, £ |        |
|                     | 1885        | 1895  | 1885      | 1895  | 1885     | 1895   |
| Oddfellows . . . .  | 676         | 906   | 1,060     | 1,320 | 5,780    | 8,500  |
| Foresters . . . .   | 582         | 655   | 860       | 1,090 | 3,390    | 4,820  |
| Hearts of Oak . . . | 109         | 205   | 250       | 460   | 770      | 1,610  |
| Shepherds . . . .   | 67          | 110   | 90        | 160   | 180      | 470    |
| 5 others . . . .    | 238         | 333   | 280       | 510   | 900      | 1,310  |
| 9 Societies . . . . | 1,672       | 2,210 | 2,540     | 3,540 | 11,020   | 16,710 |

See *Trade Unions*, page 570, and page 813. See also *Co-operation*, page 677, and *Societies*, page 542. For *Building Societies*, see *Co-operation*.

### CANADA

Friendly and Building Societies showed as follows:—

|                     | 1874<br>£ | 1884<br>£  | 1894<br>£  |
|---------------------|-----------|------------|------------|
| Capital, paid . . . | 1,600,000 | 6,150,000  | 7,830,000  |
| Reserve . . . .     | 270,000   | 1,360,000  | 2,290,000  |
| Deposits . . . .    | 920,000   | 2,780,000  | 4,160,000  |
| Debentures, &c. . . | 450,000   | 7,270,000  | 14,020,000 |
| Liabilities . . . . | 3,240,000 | 17,560,000 | 28,300,000 |
| Mortgages . . . .   | 3,100,000 | 14,800,000 | 23,400,000 |
| Cash, &c. . . .     | 140,000   | 2,720,000  | 5,100,000  |
| Assets . . . .      | 3,240,000 | 17,520,000 | 28,500,000 |

In 1894 the Provinces showed as follows:—

|                    | Capital, £ | Deposits, £ | Mortgages, £ |
|--------------------|------------|-------------|--------------|
| Ontario . . . .    | 6,050,000  | 4,050,000   | 21,300,000   |
| Quebec . . . .     | 470,000    | 80,000      | 1,840,000    |
| Nova Scotia, &c. . | 460,000    | 30,000      | 260,000      |
| Total . . . .      | 7,830,000  | 4,160,000   | 23,400,000   |

### AUSTRALIA

In January 1895 there were 149 Friendly Societies with 242,000 members, and funds approaching 3 millions sterling, viz.:—

|                      | Branches | Members | Funds, £  |
|----------------------|----------|---------|-----------|
| N. S. Wales . . . .  | 818      | 68,400  | 490,000   |
| Victoria . . . .     | 1,075    | 79,200  | 1,080,000 |
| New Zealand . . . .  | 367      | 30,000  | 550,000   |
| Queensland . . . .   | 243      | 17,100  | 150,000   |
| South Australia . .  | 422      | 35,900  | 420,000   |
| Tasmania . . . .     | 111      | 9,800   | 80,000    |
| West Australia . . . | 26       | 1,800   | 30,000    |
| Total . . . .        | 3,062    | 242,200 | 2,800,000 |

### FRUIT

The apple crop of the United States averages 5,500,000 tons, valued at 20 millions sterling. One ton of apples yields 150 gallons of cider. See *Cider*.

Imports of fruit into the United Kingdom in 1896 were:

|                    | Tons    | Value, £  |
|--------------------|---------|-----------|
| Almonds . . . .    | 7,400   | 430,000   |
| Apples . . . .     | 150,000 | 1,580,000 |
| Currants . . . .   | 49,000  | 750,000   |
| Raisins, &c. . . . | 80,000  | 2,340,000 |
| Oranges, &c. . . . | 260,000 | 4,200,000 |
| Total . . . .      | 546,400 | 9,300,000 |

Consumption averages 30 lbs., worth 65 pence, per inhabitant.

The countries which exported fruit were as follows:—

|                  | Tons    |         | Value, £  |           |
|------------------|---------|---------|-----------|-----------|
|                  | 1887    | 1895    | 1887      | 1895      |
| Italy . . . .    | 240,000 | 230,000 | 2,200,000 | 1,900,000 |
| Spain . . . .    | 160,000 | 300,000 | 2,200,000 | 3,300,000 |
| Portugal . . . . | 17,000  | 20,000  | 140,000   | 130,000   |
| Greece . . . .   | 107,000 | 140,000 | 1,900,000 | 1,100,000 |

The fruit crop of France in 1896 was valued at £7,500,000 sterling.

## G

## GAS

See *Light*, page 762, also page 304.

## GLASS

The annual output of glass in certain countries is represented approximately by the following values:—

|                |             |               |             |
|----------------|-------------|---------------|-------------|
| United Kingdom | £ 4,400,000 | Belgium       | £ 3,800,000 |
| France         | 7,200,000   | Russia        | 1,200,000   |
| Austria        | 4,500,000   | United States | 9,800,000   |

The United States census showed the growth of this industry thus:—

| Year       | Capital, £ | Operatives | Output, £ |
|------------|------------|------------|-----------|
| 1880 . . . | 4,400,000  | 26,000     | 4,900,000 |
| 1890 . . . | 9,100,000  | 49,500     | 9,800,000 |

See *Glass* in Part II., page 305.

## GOATS

See *Cattle*, page 635, also page 305.

## GOLD

The production of gold in forty-seven years has been as follows:—

| Year              | Value, £ Sterling (000 omitted) |           |        |         |        | Weight, Tons |           |        |         |       |
|-------------------|---------------------------------|-----------|--------|---------|--------|--------------|-----------|--------|---------|-------|
|                   | U. States                       | Australia | Russia | Various | Total  | U. States    | Australia | Russia | Various | Total |
| 1851 . . . . .    | 11,600                          | 1,400     | 3,600  | 2,200   | 18,800 | 83           | 10        | 26     | 15      | 134   |
| 1852 . . . . .    | 12,700                          | 12,200    | 3,600  | 2,200   | 30,700 | 91           | 87        | 26     | 15      | 219   |
| 1853 . . . . .    | 13,700                          | 13,000    | 3,400  | 2,200   | 32,300 | 98           | 93        | 25     | 15      | 231   |
| 1854 . . . . .    | 12,700                          | 9,600     | 3,400  | 2,200   | 27,900 | 91           | 69        | 25     | 15      | 200   |
| 1855 . . . . .    | 11,600                          | 12,000    | 3,500  | 2,200   | 29,300 | 83           | 86        | 25     | 15      | 209   |
| 1856 . . . . .    | 11,600                          | 13,200    | 3,500  | 2,300   | 30,600 | 83           | 94        | 25     | 16      | 218   |

In Australia the yield of gold averages as follows per ton of quartz: Victoria,  $\frac{1}{2}$  oz.; New South Wales, 1 oz.; New Zealand, 1.1 oz.; Queensland and Tasmania, 1.7 oz. The Transvaal goldfields began working in 1883, and their yield has been as follows :—

| Year       | £         | Year          | £          |
|------------|-----------|---------------|------------|
| 1889 . . . | 1,300,000 | 1894 . . .    | 8,500,000  |
| 1890 . . . | 1,750,000 | 1895 . . .    | 8,400,000  |
| 1891 . . . | 2,500,000 | 1896 . . .    | 8,400,000  |
| 1892 . . . | 4,200,000 | 1897 . . .    | 11,100,000 |
| 1893 . . . | 5,200,000 | 1898-97 . . . | 52,100,000 |

These mines have averaged less than half-an-oz (0.4) of gold per ton of quartz: yield, 32 shillings; expenses, 25; profit, 7 shillings per ton of quartz.

Klondyke, in Arctic America, produced £2,000,000 of gold in 1898, the world's production for this year reaching £58,100,000.

The stock of precious metals at various dates was :—

| Year       | Tons  |         | Tons of Silver<br>to 1 of Gold |
|------------|-------|---------|--------------------------------|
|            | Gold  | Silver  |                                |
| 1848 . . . | 3,575 | 113,000 | 31½                            |
| 1860 . . . | 5,299 | 118,250 | 22½                            |
| 1870 . . . | 6,583 | 126,360 | 19                             |
| 1880 . . . | 7,400 | 142,960 | 19½                            |
| 1890 . . . | 8,054 | 168,650 | 21                             |
| 1897 . . . | 9,165 | 194,000 | 21                             |

The world would require an increase of 97,000 tons in the present stock of silver, or exactly 50 per cent., in order to place it on the same footing as in 1848, with regard to the quantity of gold. If the relative stocks of the two metals determined the price of silver it would be now 90 pence per ounce; it has, on the contrary, fallen 55 per cent. from the normal price of 1851-60, which shows that it simply follows the cost of production. The following table shows the amount (see *Money*, page 777) of gold and silver used for coinage from 1851-1897, tons gross representing the actual weight of metal issued by the

mint of all nations, tons net the supposed weight of new metal after deducting what was reminted :—

| Period        | Tons Gold |       | Tons Silver |        |
|---------------|-----------|-------|-------------|--------|
|               | Gross     | Net   | Gross       | Net    |
| 1851-80 . . . | 7,500     | 3,900 | 65,000      | 33,000 |
| 1881-96 . . . | 3,500     | 1,500 | 39,000      | 19,000 |
| Total . . .   | 11,000    | 5,400 | 104,000     | 52,000 |

Coined and uncoined metals stood approximately :—

| Date       | Gold, Tons |          |       | Ratio<br>Coined |
|------------|------------|----------|-------|-----------------|
|            | Coined     | Uncoined | Total |                 |
| 1848 . . . | 1,125      | 2,450    | 3,575 | 31.5            |
| 1880 . . . | 5,025      | 2,375    | 7,400 | 68.0            |
| 1897 . . . | 6,525      | 2,640    | 9,165 | 71.3            |

|            | Silver, Tons |          |         |      |
|------------|--------------|----------|---------|------|
|            | Coined       | Uncoined | Total   |      |
| 1848 . . . | 45,200       | 67,800   | 113,000 | 40.0 |
| 1880 . . . | 78,200       | 64,760   | 142,960 | 54.7 |
| 1897 . . . | 97,200       | 96,800   | 194,000 | 50.1 |

In 1885 Newmann Spallart estimated the weight of coined money in the world thus :—

| Year       | Tons Gold | Tons Silver | Silver Ratio |
|------------|-----------|-------------|--------------|
| 1848 . . . | 1,125     | 45,200      | 40 to 1      |
| 1885 . . . | 5,925     | 88,100      | 15 .. 1      |

The total production of precious metals in 1894 was :—

|                 | Weight, Tons |        | Value, £   |            | Total, £   |
|-----------------|--------------|--------|------------|------------|------------|
|                 | Gold         | Silver | Gold       | Silver     |            |
| U. States . . . | 59           | 1,540  | 8,200,000  | 6,400,000  | 14,600,000 |
| Australia . . . | 63           | 560    | 8,700,000  | 2,300,000  | 11,000,000 |
| S. Africa . . . | 61           | ...    | 8,500,000  | ...        | 8,500,000  |
| Mexico . . .    | 7            | 1,460  | 1,000,000  | 6,100,000  | 7,100,000  |
| Russia . . .    | 42           | 10     | 5,800,000  | 50,000     | 5,850,000  |
| Bolivia . . .   | ...          | 680    | ...        | 2,800,000  | 2,800,000  |

| Canada . . .    | 1½           | 7      | 200,000    | 30,000     | 230,000    |
| Spain . . .     | ...          | 60     | ...        | 250,000    | 250,000    |
| Argentina . . . | ...          | 40     | ...        | 150,000    | 150,000    |
| Various . . .   | 5½           | 153    | 700,000    | 670,000    | 1,370,000  |
| The World . . . | 273          | 5,160  | 37,700,000 | 21,400,000 | 59,100,000 |

The production of silver has been as follows :—

| Years        | Tons      |         |         | Value, Millions £ |
|--------------|-----------|---------|---------|-------------------|
|              | U. States | Various | Total   |                   |
| 1851-60 . .  | 70        | 8,880   | 8,950   | 81.4              |
| 1861-70 . .  | 2,370     | 9,840   | 12,210  | 110.4             |
| 1871-80 . .  | 7,790     | 14,380  | 22,100  | 182.7             |
| 1881-90 . .  | 13,330    | 18,360  | 31,690  | 223.3             |
| 1891-94 . .  | 6,790     | 12,030  | 18,820  | 104.8             |
| 1895 . . .   | 1,640     | 3,500   | 5,140   | 21.8              |
| 1896 . . .   | 1,730     | 3,360   | 5,090   | 21.6              |
| 46 years . . | 33,650    | 70,350  | 104,000 | 746.0             |

Spanish America has produced 47,000 tons of silver since 1850, that is, almost half the total supply of the world, Mexico taking the lead :—

| Years        | Tons   |           |                 | Value, Millions £ |
|--------------|--------|-----------|-----------------|-------------------|
|              | Mexico | Peru, &c. | Spanish America |                   |
| 1851-70 . .  | 9,530  | 4,140     | 13,670          | 123.8             |
| 1871-90 . .  | 14,780 | 7,540     | 22,320          | 169.4             |
| 1891-96 . .  | 8,290  | 2,520     | 10,810          | 58.8              |
| 46 years . . | 32,600 | 14,200    | 46,800          | 352.0             |

The price of silver per ounce, and its ratio to gold in thirty years, have been as follows :—

| Year     | Pence | Ratio | Year     | Pence | Ratio |
|----------|-------|-------|----------|-------|-------|
| 1868 . . | 60.5  | 15.6  | 1883 . . | 50.6  | 18.6  |
| 1869 . . | 60.5  | 15.6  | 1884 . . | 50.6  | 18.6  |
| 1870 . . | 60.5  | 15.6  | 1885 . . | 48.6  | 19.4  |
| 1871 . . | 60.5  | 15.6  | 1886 . . | 45.4  | 20.8  |
| 1872 . . | 60.5  | 15.6  | 1887 . . | 44.6  | 21.1  |
| 1873 . . | 59.2  | 15.9  | 1888 . . | 42.9  | 22.0  |
| 1874 . . | 58.3  | 16.2  | 1889 . . | 41.7  | 22.1  |
| 1875 . . | 56.9  | 16.6  | 1890 . . | 47.7  | 19.8  |
| 1876 . . | 52.7  | 17.9  | 1891 . . | 45.1  | 20.9  |
| 1877 . . | 54.8  | 17.2  | 1892 . . | 39.7  | 23.7  |
| 1878 . . | 52.6  | 17.9  | 1893 . . | 35.6  | 26.5  |
| 1879 . . | 51.2  | 18.4  | 1894 . . | 28.9  | 32.6  |
| 1880 . . | 52.2  | 18.1  | 1895 . . | 29.8  | 31.7  |
| 1881 . . | 52.0  | 18.2  | 1896 . . | 30.7  | 30.7  |
| 1882 . . | 52.0  | 18.2  | 1897 . . | 27.0  | 35.0  |

In 1897 the silver money in use was 15½ times the weight of gold money.

According to the best authorities, the consumption yearly of gold and silver for manufactures has trebled since 1850, when Spallart estimated it at 25 tons of gold and 250 of silver. In recent years the estimates have been :—

|                | Tons of Gold |         |          | Value, £   |
|----------------|--------------|---------|----------|------------|
|                | Soetbeer     | Kimball | Molinari |            |
|                | 1871-80      | 1887    | 1896     | 1896       |
| U. States . .  | 13.5         | 18      | 15.7     | 2,200,000  |
| G. Britain . . | 17.0         | 16      | 17.0     | 2,400,000  |
| France . . .   | 16.9         | 12      | 12.0     | 1,700,000  |
| Germany . .    | 11.8         | 11      | 15.0     | 2,100,000  |
| Switzerland .  | 11.3         | 9       | 6.0      | 850,000    |
| Italy, &c. . . | ...          | 14      | 9.8      | 1,350,000  |
| Total . . .    | 83.8         | 80      | 75.5     | 10,600,000 |

|                | Tons of Silver |         |          | Value, £  |
|----------------|----------------|---------|----------|-----------|
|                | Soetbeer       | Kimball | Molinari |           |
|                | 1871-80        | 1887    | 1896     | 1896      |
| U. States . .  | 102            | 115     | 185      | 770,000   |
| G. Britain . . | 72             | 72      | 80       | 330,000   |
| France . . .   | 75             | 75      | 120      | 500,000   |
| Germany . .    | 75             | 82      | 100      | 420,000   |
| Switzerland .  | 24             | 24      | 50       | 210,000   |
| Russia . . .   | 32             | 32      | 32       | 130,000   |
| Austria . . .  | 32             | 32      | 30       | 120,000   |
| Italy, &c. . . | 59             | 83      | 66       | 280,000   |
| Total . . .    | 471            | 515     | 663      | 2,760,000 |

Moreover, the loss of money from wear-and-tear and shipwreck is 2 tons of gold, 100 of silver yearly. The following table, allowing for these deductions, shows the net increase of the world's stock of precious metals :—

| Years        | Gold, Tons |             |              |
|--------------|------------|-------------|--------------|
|              | Production | Consumption | Net Increase |
| 1851-60 . .  | 2,024      | 300         | 1,724        |
| 1861-70 . .  | 1,884      | 600         | 1,284        |
| 1871-80 . .  | 1,717      | 900         | 817          |
| 1881-90 . .  | 1,604      | 950         | 654          |
| 1891-97 . .  | 1,811      | 700         | 1,111        |
| 47 years . . | 9,040      | 3,450       | 5,590        |

|              | Silver, Tons |             |              |
|--------------|--------------|-------------|--------------|
|              | Production   | Consumption | Net Increase |
| 1851-60 . .  | 8,950        | 3,700       | 5,250        |
| 1861-70 . .  | 12,210       | 4,100       | 8,110        |
| 1871-80 . .  | 22,100       | 5,500       | 16,600       |
| 1881-90 . .  | 31,690       | 6,000       | 25,690       |
| 1891-96 . .  | 29,050       | 3,700       | 25,350       |
| 46 years . . | 104,000      | 23,000      | 81,000       |

The current of bullion to and from India, Straits, and Ceylon in thirty-six years was as follows :—

| Years        | Millions £ Sterling |          |          |
|--------------|---------------------|----------|----------|
|              | Imported            | Exported | Retained |
| 1861-70 . .  | 195                 | 26       | 169      |
| 1871-80 . .  | 110                 | 44       | 66       |
| 1881-90 . .  | 171                 | 39       | 132      |
| 1891-96 . .  | 104                 | 49       | 55       |
| 36 years . . | 580                 | 158      | 422      |

The bullion current may be summed up thus :—

|                   | Gold Imported, Millions £ |         |         |          |
|-------------------|---------------------------|---------|---------|----------|
|                   | 1861-80                   | 1881-88 | 1889-96 | 36 Years |
| Great Britain . . | 351                       | 96      | 205     | 652      |
| France . . .      | 340                       | 63      | 107     | 510      |
| United States . . | 73                        | 64      | 49      | 186      |

In the whole period of 36 years we find that Great Britain has had a net influx of precious metals averaging £3,300,000 per annum; France, 7,200,000; while the United States show an average outflow of £7,600,000 per annum over the same lapse of years.

The following table shows the net balance of imports and exports in 8 years down to end of 1896:—

|                     | Imports, Mill. £ |        | Exports, Mill. £ |        |
|---------------------|------------------|--------|------------------|--------|

See *Bullion*, page 649.

The following table shows the production, net imports and exports of gold, as regards the United States:—

| Years              | Gold, Millions \$ |         |         |         |
|--------------------|-------------------|---------|---------|---------|
|                    | Product           | Imports | Exports | Balance |
| 1847-51 . . . . .  | 156               | ...     | 7       | 149     |
| 1852-56 . . . . .  | 295               | ...     | 196     | 99      |
| 1857-61 . . . . .  | 244               | ...     | 196     | 48      |
| 1862-66 . . . . .  | 232               | ...     | 282     | ...     |
| 1867-71 . . . . .  | 243               | ...     | 189     | 54      |
| 1872-76 . . . . .  | 179               | ...     | 168     | 11      |
| 1877-81 . . . . .  | 208               | 179     | ...     | 387     |
| 1882-86 . . . . .  | 160               | ...     | 14      | 146     |
| 1887-91 . . . . .  | 165               | ...     | 63      | 102     |
| 1892-96 . . . . .  | 207               | ...     | 202     | 5       |
| 50 years . . . . . | 2,089             | 179     | 1,317   | 951     |

It appears that 45 per cent. of the gold produced in the United States remained in the country. The production, imports and exports of silver, at the nominal value of 60 pence per ounce, were as follows:—

| Years              | Silver, Millions \$ |         |         |         |
|--------------------|---------------------|---------|---------|---------|
|                    | Product             | Imports | Exports | Balance |
| 1847-51 . . . . .  | ...                 | ...     | 6       | ...     |
| 1852-56 . . . . .  | ...                 | 6       | ...     | 6       |
| 1857-61 . . . . .  | 3                   | 9       | ...     | 12      |
| 1862-66 . . . . .  | 45                  | ...     | 18      | 27      |
| 1867-71 . . . . .  | 77                  | ...     | 76      | 1       |
| 1872-76 . . . . .  | 172                 | ...     | 111     | 61      |
| 1877-81 . . . . .  | 209                 | ...     | 36      | 173     |
| 1882-86 . . . . .  | 245                 | ...     | 59      | 186     |
| 1887-91 . . . . .  | 321                 | ...     | 58      | 263     |
| 1892-96 . . . . .  | 372                 | ...     | 136     | 236     |
| 50 years . . . . . | 1,444               | 15      | 500     | 959     |

This shows that 60 per cent. of the production of silver remained in the country. The total value of precious metal which the above balances represent, as surplus of production over exports in 50 years, is 198 millions sterling for gold, and 67 millions for silver at its present depreciated value (27 pence per ounce).

The current of bullion to and from the United States is shown in American money as follows:—

| Years              | Millions \$ Gold |         |             |             |
|--------------------|------------------|---------|-------------|-------------|
|                    | Imports          | Exports | Net Imports | Net Exports |
| 1851-60 . . . . .  | 37               | 465     | ...         | 428         |
| 1861-70 . . . . .  | 140              | 536     | ...         | 396         |

| 1881-90 . . . . .  | 484             | 514     | ...         | 30          |
| 1891-96 . . . . .  | 343             | 755     | ...         | 412         |
| 46 years . . . . . | 1,398           | 3,035   | ...         | 1,637       |

The account for 6 years ending Dec. 1896 showed:—

|                       | Bullion, Millions \$ |            |
|-----------------------|----------------------|------------|
|                       | Imports from         | Exports to |
| Great Britain . . . . | 74                   | 330        |
| France . . . . .      | 45                   | 116        |
| Other countries . . . | 224                  | 309        |
| Total . . . . .       | 343                  | 755        |

Imports and exports in 1897 were even; each 115 million dollars.

The outflow of gold caused anxiety in 1895: the minimum of "free gold balance" in the Treasury was touched on the 11th of February 1895 (\$41,200,000).

The stock of gold in Great Britain was estimated in 1760 at £25,000,000; of gold and silver in 1799 at £44,000,000; and of gold alone in 1812 at £15,000,000. The stock of coined money in the United States was estimated at 7 million dollars in 1774, and at 17 millions (£3,500,000) in 1804. Humboldt calculated the coined money of the world in 1825 at 325 millions sterling; Jacob, a better authority, at 380 millions.

We have seen that the production of gold since 1850 has been as follows:—

| Period             | Millions £ Sterling | Per Annum |
|--------------------|---------------------|-----------|
| 1851-70 . . . . .  | 547                 | 27.4      |
| 1871-80 . . . . .  | 241                 | 24.1      |
| 1881-90 . . . . .  | 225                 | 22.5      |
| 1891-96 . . . . .  | 162                 | 27.0      |
| 46 years . . . . . | 1,175               | 25.1      |

The countries which absorbed the above quantities\* were as follows:—

|                     | Millions £ Sterling |         |         |         | Tons of Gold |
|---------------------|---------------------|---------|---------|---------|--------------|
|                     | 1851-70             | 1871-80 | 1881-90 | 46 yrs. |              |
| U. Kingdom . . .    | 103                 | 15      | 49      | 167     | 1,190        |
| France . . . . .    | 204                 | 53      | 33      | 290     | 2,060        |
| Germany . . . . .   | 3                   | 27      | 29      | 59      | 420          |

| Portugal . . . . .  | 3                   | 4       | 8       | 15      | 107          |
| Holland . . . . .   | 2                   | 5       | 10      | 17      | 120          |
| Belgium . . . . .   | 7                   | 3       | 8       | 18      | 128          |
| Switzerland . . .   | 2                   | 1       | 8       | 11      | 78           |
| Europe . . . . .    | 379                 | 154     | 286     | 819     | 5,820        |
| United States . .   | 49                  | 49      | 76      | 174     | 1,236        |
| Other countries . . | 119                 | 38      | 25      | 182     | 1,294        |
| The World . . . .   | 547                 | 241     | 387     | 1,175   | 8,350        |

The production of silver in the same period was as follows:—

| Period             | Value      |           | Weight  |           |
|--------------------|------------|-----------|---------|-----------|
|                    | Millions £ | Per Annum | Tons    | Per Annum |
| 1851-70 . . . . .  | 192        | 9.6       | 21,160  | 1,058     |
| 1871-80 . . . . .  | 183        | 18.3      | 22,100  | 2,210     |
| 1881-90 . . . . .  | 223        | 22.3      | 31,690  | 3,169     |
| 1891-96 . . . . .  | 148        | 24.7      | 29,050  | 4,842     |
| 46 years . . . . . | 746        | 16.2      | 104,000 | 2,261     |

The countries which absorbed the above quantities were as follows:—

|                     | Millions £ Sterling |         |         |         | Tons of Silver |
|---------------------|---------------------|---------|---------|---------|----------------|
|                     | 1851-70             | 1871-80 | 1881-90 | 46 yrs. |                |
| U. Kingdom . . .    | 4.3                 | 11.9    | ...     | 4.0     | 500            |
| Germany . . . . .   | 16.9                | 17.6    | 8.5     | 43.0    | 5,200          |
| Russia . . . . .    | 7.8                 | 7.8     | 13.5    | 29.1    | 3,600          |
| Spain . . . . .     | 4.3                 | 8.2     | 6.9     | 19.4    | 2,400          |
| Holland . . . . .   | 9.7                 | 2.0     | 1.1     | 12.8    | 1,500          |

### HEMP

The production and consumption of this fibre in 1895 were:—

|                     | Acres     | Produc. Tons | Consum. Tons | Manufacture Value, £ |
|---------------------|-----------|--------------|--------------|----------------------|
| Great Britain . . . | ...       | ...          | 70,000       | 5,200,000            |
| France . . . . .    | 90,000    | 27,000       | 50,000       | 3,500,000            |
| Germany . . . . .   | 30,000    | 10,000       | 30,000       | 2,100,000            |
| Russia . . . . .    | 2,010,000 | 247,000      | 177,000      | 9,000,000            |
| Austria . . . . .   | 290,000   | 70,000       | 70,000       | 5,000,000            |
| Italy . . . . .     | 260,000   | 78,000       | 30,000       | 2,000,000            |
| United States . . . | 60,000    | 18,000       | 140,000      | 10,000,000           |
| Manilla . . . . .   | 260,000   | 50,000       | ...          | ...                  |
| Various . . . . .   | 100,000   | 30,000       | 63,000       | 4,200,000            |
| Total . . . . .     | 3,100,000 | 530,000      | 530,000      | 41,000,000           |

Production has increased 20 per cent. since Neumann Spallart's estimate for 1885. See Part I., page 312.

Exports of hemp from Russia were as follows:—

| Year           | Tons   | Value, £  | £ per Ton |
|----------------|--------|-----------|-----------|
| 1885 . . . . . | 50,000 | 1,300,000 | 26        |
| 1890 . . . . . | 55,000 | 1,600,000 | 29        |
| 1896 . . . . . | 70,000 | 1,600,000 | 23        |

Imports into the United Kingdom and the United States were:—

| Year           | Tons       |           |
|----------------|------------|-----------|
|                | U. Kingdom | U. States |
| 1888 . . . . . | 50,000     | 90,000    |
| 1892 . . . . . | 50,000     | 120,000   |
| 1895 . . . . . | 70,000     | 120,000   |

The hemp factories of the United Kingdom had

\* See Atkinson's lecture to the Royal Statistical Society, in March 1898.

32,000 spindles in 1870, and 54,000 in 1890, being an increase of 70 per cent.

Exports of hemp from Italy rose from 32,000 tons in 1885 to 48,000 tons in 1895.

### HORSES

The United Kingdom is no longer able to raise a sufficient number of horses for its own requirements, but has to import some thousands yearly, as the trade returns show :—

| Year       | Number   |          | Value, £  |          |
|------------|----------|----------|-----------|----------|
|            | Imported | Exported | Imported  | Exported |
| 1887 . . . | 11,600   | 9,500    | 200,000   | 550,000  |
| 1892 . . . | 21,000   | 11,200   | 400,000   | 560,000  |
| 1897 . . . | 49,500   | 34,500   | 1,250,000 | 820,000  |

Respecting the losses of horses in war, Vet.-Capt. F. Smith in the *Journal of the United Service*, April 1894, gives 40 pages of statistics. The following table shows the records which exist as to losses in cavalry and artillery :—

| Battle             | Men, Loss | Horses, Loss | Observation |
|--------------------|-----------|--------------|-------------|
| Dettingen . . .    | 313       | 483          | 9 regiments |
| Fontenoy . . .     | 301       | 635          | 8 "         |
| Tourmay . . .      | 143       | 229          | 9 "         |
| Talavera . . .     | 244       | 288          | 2 "         |
| Waterloo . . .     | 4,727     | 5,572        | Allies      |
| Moodkee . . .      | 254       | 298          | Sikh war    |
| Feroeshah . . .    | 335       | 582          | "           |
| Aliwal . . .       | 265       | 351          | "           |
| Balaklava . . .    | 383       | 476          | Crimea      |
| Gettysburg . . .   | 1,255     | 1,629        | Amer. war   |
| Chickamauga . . .  | 303       | 406          | "           |
| Koenigsgratz . . . | 929       | 843          | Prussians   |
| " . . .            | 979       | 2,140        | Austrians   |
| Custoza . . .      | 464       | 566          | "           |
| Worth . . .        | 197       | 276          | Germans     |
| Vionville . . .    | 2,126     | 2,626        | "           |
| Gravelotte . . .   | 1,109     | 1,559        | "           |
| Sedan . . .        | 491       | 840          | "           |

In the war of 1812, Bonaparte crossed the Niemen in June with 187,000 horses, but on November 6 he had only 95,000 left; three days after the passage of the Beresina, on December 13, only 1600 horses came back from Russia.

At Corunna four British regiments landed with 2490 horses, and in two months lost 1210. In Massena's retreat from Portugal he had 8800 horses, of which he lost 1955 in ten days. In the Crimean war the British landed 7377 horses, and on April 1 only 3698 survived, showing a loss of 50 per cent. in six months, 2120 having died for want of food. At the siege of Plevna the Russians lost 22,000 horses out of 66,000, used only as draught, exclusive of horses killed in action.

See *Castle*.

### HOSPITALS

In 1891 London had 86 hospitals, with 8888 beds, but owing to want of funds 2510 beds were always kept vacant, the maximum never being allowed to exceed 6370 indoor patients, while outdoor patients in 1890 were 1,057,000. There are, meantime, 17,440 beds for the sick poor of London, in Poor-Law Infirmarys and Hospitals maintained by local authorities, which brings up the total accommodation to 23,800 beds, or 6 per thousand of the population of London. Dr. Steel's table (1891) shows the number of beds occupied and the cost

of 75 London hospitals, as well as the number of patients admitted, thus :—

| Hospital                 | Beds  | Expend. £ | Per Bed £ | Patients |
|--------------------------|-------|-----------|-----------|----------|
| London . . .             | 622   | 56,700    | 91        | 8,503    |
| Guy's . . .              | 418   | 34,300    | 82        | 5,385    |
| St. George's . . .       | 316   | 27,700    | 88        | 4,029    |
| St. Mary's . . .         | 251   | 21,200    | 84        | 3,451    |
| University College . . . | 179   | 19,700    | 110       | 3,007    |
| Middlesex . . .          | 254   | 26,400    | 104       | 2,948    |
| Westminster . . .        | 175   | 14,100    | 81        | 2,572    |
| Seamen's . . .           | 186   | 11,700    | 63        | 2,401    |
| Ophthalmic . . .         | 96    | 6,200     | 64        | 2,337    |
| King's College . . .     | 163   | 20,000    | 123       | 2,189    |
| Royal Free . . .         | 133   | 10,600    | 80        | 2,019    |
| Charing Cross . . .      | 143   | 14,300    | 100       | 1,948    |
| Brompton . . .           | 275   | 25,800    | 93        | 1,669    |
| West London . . .        | 87    | 5,600     | 64        | 1,283    |
| Shadwell . . .           | 78    | 6,800     | 86        | 1,074    |
| 15 principal . . .       | 3,376 | 301,100   | 90        | 44,815   |
| 60 others . . .          | 2,274 | 208,900   | 92        | 23,585   |
| Total . . .              | 5,650 | 510,000   | 91        | 68,400   |

In the larger hospitals each bed averaged 13 patients, in the smaller only 10, yearly: the average cost for each patient was 133 shillings in the large, 177 in the small, hospitals. The Poor-Law Infirmarys of London had 12,300 beds, with an annual expenditure of £440,000, equal to £36 per bed.

In Paris there are 30 hospitals, besides various asylums for aged persons: the returns for the year 1894 showed :—

|                            | Hospitals | Asylums | Total   |
|----------------------------|-----------|---------|---------|
| No. on January 1 . . .     | 11,566    | 10,125  | 21,691  |
| Admitted during year . . . | 163,817   | 7,993   | 171,810 |
| Left, cured . . .          | 148,173   | 6,380   | 154,553 |
| Died . . .                 | 15,667    | 1,508   | 17,175  |
| No. on December 31 . . .   | 11,543    | 10,230  | 21,773  |

Death-rate was 9½ per cent. in the hospitals, 15 per cent. in the aged asylums. The days of sickness in the hospitals averaged 26 to each patient admitted.

Switzerland is the country best supplied with hospitals, having 17,800 beds, or 6 to every thousand of population. See *Charities*, page 655.

### HOUSES

The following table gives an approximate statement of the number and value of houses in the principal countries.

|                          | Number of Houses | Value, Millions £ | Per House |        |
|--------------------------|------------------|-------------------|-----------|--------|
|                          |                  |                   | Value, £  | Inhab. |
| United Kingdom . . .     | 7,874,000        | 2,490             | 315       | 5.1    |
| France . . .             | 8,829,000        | 2,159             | 245       | 4.4    |
| Germany . . .            | 5,791,000        | 1,755             | 303       | 9.0    |
| Russia . . .             | 11,436,000       | 1,019             | 89        | 9.3    |
| Austria . . .            | 4,996,000        | 719               | 144       | 8.7    |
| Italy . . .              | 4,470,000        | 503               | 113       | 7.0    |
| Spain and Portugal . . . | 3,810,000        | 355               | 93        | 6.1    |
| Scandinavia . . .        | 1,200,000        | 221               | 184       | 7.7    |
| Belgium . . .            | 1,060,000        | 175               | 165       | 6.2    |
| Holland . . .            | 730,000          | 178               | 244       | 6.7    |
| Europe . . .             | 50,196,000       | 9,574             | 190       | 7.1    |
| United States . . .      | 12,690,000       | 3,889             | 306       | 4.9    |
| Australia . . .          | 804,000          | 174               | 216       | 4.8    |

The above is irrespective of public buildings, which in some countries are estimated at one-fifth of the value of houses, but includes all houses, whether occupied or not.

The last census of the United Kingdom showed as follows :—

| With Rooms     | England   | Scotland | Ireland | Total     |
|----------------|-----------|----------|---------|-----------|
| One or two . . | 985,000   | 536,000  | 472,000 | 1,993,000 |
| Three . . . .  | 757,000   | 143,000  | 361,000 | 1,261,000 |
| Four or more   | 4,389,000 | 194,000  | 37,000  | 4,620,000 |
| Total . . . .  | 6,131,000 | 873,000  | 870,000 | 7,874,000 |

The rateable annual value in 1896 was as follows :—

|                  | Houses    | Annual Value, £ | Average, £ |
|------------------|-----------|-----------------|------------|
| England . . . .  | 6,170,000 | 135,930,000     | 22.1       |
| Scotland . . . . | 930,000   | 14,600,000      | 15.7       |
| Ireland . . . .  | 870,000   | 4,010,000       | 4.6        |
| U. Kingdom . .   | 7,970,000 | 154,540,000     | 19.3       |

The capital value of house property compares with population as follows :—

|                    | Millions £ | £ per Inhab. |
|--------------------|------------|--------------|
| England . . . .    | 2,266      | 74           |
| Scotland . . . .   | 243        | 58           |
| Ireland . . . .    | 67         | 15           |
| United Kingdom . . | 2,576      | 65           |

In the following table is shown the increase in value of house property in ten years :—

|                    | Millions £ Sterling |       |          | £ per Inhab. |
|--------------------|---------------------|-------|----------|--------------|
|                    | 1886                | 1896  | Increase |              |
| England . . . .    | 1,924               | 2,266 | 342      | 11.8         |
| Scotland . . . .   | 209                 | 243   | 34       | 8.5          |
| Ireland . . . .    | 57                  | 67    | 10       | 2.1          |
| United Kingdom . . | 2,190               | 2,576 | 386      | 10.2         |

The annual increase averaged £38,600,000, which is equal to about one-fourth of the ordinary accumulation of wealth in the United Kingdom.

There are 490,000 uninhabited houses in the United Kingdom, or 6 per cent. of the total, but in Ireland the ratio is 8 per cent.

The number and value of houses in Great Britain increased in twelve years as follows :—

|                  | Number    |           | Valuation, £ |             |
|------------------|-----------|-----------|--------------|-------------|
|                  | 1884      | 1896      | 1884         | 1896        |
| England . . . .  | 5,272,000 | 6,166,000 | 111,600,000  | 136,700,000 |
| Scotland . . . . | 816,000   | 930,000   | 12,100,000   | 14,700,000  |
| Total . . . .    | 6,088,000 | 7,096,000 | 123,700,000  | 151,400,000 |

The number increased 17, the valuation rental 22, per cent. Those under £20 a year are exempt from house-duty. The total for Great Britain (there is no house-tax in Ireland) showed as follows :—

|                    | Houses    |           |           |
|--------------------|-----------|-----------|-----------|
|                    | 1884      | 1896      | Increase  |
| Under £20 . . . .  | 4,424,000 | 5,181,000 | 757,000   |
| Over £20 . . . .   | 1,172,000 | 1,380,000 | 208,000   |
| Pub. buildgs., &c. | 492,000   | 535,000   | 43,000    |
| Total . . . .      | 6,088,000 | 7,096,000 | 1,008,000 |

|                    | Valuation, £ |             |            |
|--------------------|--------------|-------------|------------|
|                    | 1884         | 1896        | Increase   |
| Under £20 . . . .  | 36,500,000   | 45,600,000  | 9,100,000  |
| Over £20 . . . .   | 60,800,000   | 70,200,000  | 9,400,000  |
| Pub. buildgs., &c. | 26,400,000   | 35,600,000  | 9,200,000  |
| Total . . . .      | 123,700,000  | 151,400,000 | 27,700,000 |

The rental valuation of houses in the three kingdoms compares with population as follows :—

|                    | £ Sterling  |             | £ per Inhab. |      |
|--------------------|-------------|-------------|--------------|------|
|                    | 1884        | 1896        | 1884         | 1896 |
| England . . . .    | 111,600,000 | 136,700,000 | 4.1          | 4.5  |
| Scotland . . . .   | 12,100,000  | 14,700,000  | 3.2          | 3.5  |
| Ireland . . . .    | 3,400,000   | 3,900,000   | 0.7          | 0.8  |
| U. Kingdom . . . . | 127,100,000 | 155,300,000 | 3.6          | 3.9  |

On the usual basis of computation that the rateable value represents 6 per cent. of the selling price of house property, it appears that the values compared with population result as follows :—

| <i>England</i>    |             |                   |              |
|-------------------|-------------|-------------------|--------------|
|                   | Assessed, £ | Value, Millions £ | £ per Inhab. |
| London . . .      | 35,820,000  | 597               | 133          |
| Manchester . . .  | 3,670,000   | 61                | 84           |
| Liverpool . . .   | 3,630,000   | 61                | 95           |
| Birmingham . .    | 2,080,000   | 35                | 70           |
| Leeds . . . . .   | 1,340,000   | 22                | 55           |
| Sheffield . . . . | 1,150,000   | 19                | 57           |
| Bradford . . . .  | 1,070,000   | 18                | 82           |
| Bristol . . . . . | 1,060,000   | 18                | 82           |
| Newcastle . . . . | 910,000     | 15                | 75           |
| Cardiff . . . . . | 830,000     | 14                | 90           |
| Hull . . . . .    | 760,000     | 13                | 62           |
| Brighton . . . .  | 710,000     | 12                | 101          |
| Portsmouth . . .  | 630,000     | 11                | 66           |
| Croydon . . . . . | 600,000     | 10                | 90           |
| Oldham . . . . .  | 600,000     | 10                | 70           |
| 15 Cities . . . . | 54,860,000  | 916               | 108          |

| Scotland         |           |     |     |
|------------------|-----------|-----|-----|
| Glasgow . . . .  | 3,730,000 | 62  | 90  |
| Edinburgh . . .  | 2,750,000 | 46  | 140 |
| Dundee . . . . . | 700,000   | 12  | 80  |
| Aberdeen . . . . | 600,000   | 10  | 75  |
| 4 Cities . . . . | 7,780,000 | 130 | 97  |

| Ireland           |             |            |            |
|-------------------|-------------|------------|------------|
|                   | Assessed, £ | Value, £   | £ per Head |
| Dublin . . . . .  | 1,170,000   | 19,500,000 | 55         |
| Belfast . . . . . | 910,000     | 15,200,000 | 61         |
| Cork . . . . .    | 165,000     | 2,700,000  | 36         |
| Derry . . . . .   | 90,000      | 1,500,000  | 45         |
| Limerick . . . .  | 69,000      | 1,150,000  | 28         |
| Waterford . . . . | 47,000      | 800,000    | 40         |
| 6 Cities . . . .  | 2,451,000   | 40,850,000 | 52         |

The average value of house property to inhabitant is higher in Edinburgh than elsewhere, London taking the

second, Brighton the third place. Building sites in London reach the highest price in the world, £2,000,000 per acre. In 1884 two sites were sold in Threadneedle Street and Cheapside at £30 and £44 respectively per square foot. In March 1898 an acre was sold in Edinburgh (for a new printing-office for the *Scotsman*) at the price of £120,000, or 53 shillings per square foot, which is perhaps the highest price recorded in that city. Outside of the large cities and in the rural districts the average of house property per inhabitant is much lower, viz. :—

*England*

|                 | Millions £<br>House-prop. | Number of<br>Inhabitants | £ per<br>Head |
|-----------------|---------------------------|--------------------------|---------------|
| 15 Cities . . . | 916                       | 8,500,000                | 108           |
| Outside . . .   | 1,350                     | 22,200,000               | 61            |
| Total . . .     | 2,266                     | 30,700,000               | 74            |

*Scotland*

|----------------|---------------------------|--------------------------|---------------|
| 4 Cities . . . | 130                       | 1,330,000                | 97            |
| Outside . . .  | 113                       | 2,850,000                | 40            |
| Total . . .    | 243                       | 4,180,000                | 58            |

*Ireland*

|                | Millions £<br>House-prop. | Number of<br>Inhabitants | £ per<br>Head |
|----------------|---------------------------|--------------------------|---------------|
| 6 Cities . . . | 41                        | 780,000                  | 52            |
| Outside . . .  | 26                        | 3,780,000                | 7             |
| Total . . .    | 67                        | 4,560,000                | 15            |

*U. Kingdom*

|                 | Millions £<br>House-prop. | Number of<br>Inhabitants | £ per<br>Head |
|-----------------|---------------------------|--------------------------|---------------|
| 25 Cities . . . | 1,087                     | 10,610,000               | 97            |
| Outside . . .   | 1,489                     | 28,830,000               | 53            |
| Total . . .     | 2,576                     | 39,440,000               | 65            |

The rural population of Ireland has almost the same ratio of house property per head as the Russian Moujiks. The ratio of house property to population is higher in Belfast than in Dublin, as already shown: Belfast built 49,000 new houses between 1862 and 1896.

There are five principal companies or trusts for the purpose of providing dwellings for the working-classes of London at a minimum rental, viz. :—

|                         | Capital<br>£ | Occupants | Pence per<br>Room<br>Weekly |
|-------------------------|--------------|-----------|-----------------------------|
| Artisans' Company . . . | 2,250,000    | 6,600     | 18                          |
| Peabody . . .           | 1,150,000    | 25,100    | 26                          |
| Industrial . . .        | 600,000      | 6,300     | 26                          |
| Guinness . . .          | 260,000      | 7,300     | 26                          |
| County Council . . .    | 390,000      | 6,600     | ...                         |
| Total . . .             | 4,650,000    | 51,900    | 27                          |

Miss Octavia Hill and Lord Rowton have also built blocks of workmen's dwellings to be let at 5 per cent. of cost. Lord Rowton's cost £50 per occupant, and the rent averages 1 shilling a week per head. The buildings of the County Council cost £60 per occupant. The Council cleared 15 acres, demolishing 20 streets and 730 houses, and erecting on the site blocks to admit 6600 persons, with rooms 12×8½ ft. The blocks are intersected by 7 avenues 60 ft. wide, and have a central

garden 270 ft. diameter. The Artisans' Company have 5000 cottages in the suburbs of London: average cost £400. See page 413.

## FRANCE

An official return by M. Boutin in 1890 shows the number and rental of houses thus :—

| Year       | Houses    | Rental, £   | £ per House |
|------------|-----------|-------------|-------------|
| 1851 . . . | 7,125,000 | 38,300,000  | 5.2         |
| 1890 . . . | 8,829,000 | 110,800,000 | 12.6        |

The value in 1890 was returned as 1942 millions sterling. Among the houses are 5650 castles, with an average rental of £160 each. The rental classification was :—

| Rental               | Number    | Ratio |
|----------------------|-----------|-------|
| Under £10 . . . . .  | 1,150,000 | 13.1  |
| £10 to £24 . . . . . | 2,633,000 | 29.8  |
| £24 to £48 . . . . . | 2,140,000 | 24.2  |
| £48 to £96 . . . . . | 1,390,000 | 15.6  |
| Over £96 . . . . .   | 1,516,000 | 17.3  |
| Total . . . . .      | 8,829,000 | 100.0 |

Boutin further shows that France built 835,000 houses between 1871 and 1881, of the value of £640 millions sterling.

There are various philanthropic associations in the large cities for providing cheap houses for workmen. That of Lyons has expended £150,000; those of Paris, Marseilles, &c., £280,000, in erecting buildings on the Peabody system.

## AUSTRIA

An official statement regarding the houses of Vienna shows the population to be lodged thus :—

| In                     | Tenements | Population |
|------------------------|-----------|------------|
| 1 room . . . . .       | 23,920    | 64,620     |
| 2 rooms . . . . .      | 103,430   | 411,310    |
| 3 rooms . . . . .      | 86,600    | 426,520    |
| Over 3 rooms . . . . . | 72,810    | 439,450    |
| Total . . . . .        | 286,760   | 1,341,900  |

Only the last class is properly housed, that is, one-third of the population. It appears that 902,000 persons live in 214,000 tenements, containing 490,000 rooms, being an average of 2 persons to each room.

## UNITED STATES

The estimated value of buildings, according to census commissioners, includes public buildings worth 17, and houses worth 83, per cent. of the total, which in 1890 stood thus :—

| States            | Millions £ Sterling |                     |       | Value of<br>Houses.<br>£ per<br>Inhabitant |
|-------------------|---------------------|---------------------|-------|--------------------------------------------|
|                   | Houses              | Public<br>Buildings | Total |                                            |
| New England . . . | 433                 | 86                  | 519   | 92                                         |
| Middle . . .      | 1,434               | 287                 | 1,721 | 101                                        |
| South . . .       | 428                 | 85                  | 513   | 23                                         |
| West . . .        | 1,594               | 319                 | 1,913 | 63                                         |
| Union . . .       | 3,889               | 777                 | 4,666 | 62                                         |

In 1897 the assessed value of houses and buildings in New York city was 513 millions sterling, equal to £205 per inhabitant.

The total number of houses in the Union is shown by census thus (1890):—

|             | Occupied by |           |            |
|-------------|-------------|-----------|------------|
|             | Owner       | Tenant    | Total      |
| Urban . . . | 1,074,000   | 2,625,000 | 3,699,000  |
| Rural . . . | 4,992,000   | 3,999,000 | 8,991,000  |
| Total . . . | 6,066,000   | 6,624,000 | 12,690,000 |

In the towns 30 per cent., and in the rural districts 55 per cent., of the people lived in their own houses.

Some of the largest cities showed as follows:—

|                     | Occupied by |           |           | Inhab. per House |
|---------------------|-------------|-----------|-----------|------------------|
|                     | Owner       | Tenant    | Total     |                  |
| New York . . .      | 20,000      | 293,000   | 313,000   | 5.2              |
| Philadelphia . . .  | 46,000      | 158,000   | 204,000   | 5.2              |
| Chicago . . .       | 63,000      | 157,000   | 220,000   | 5.0              |
| Brooklyn . . .      | 32,000      | 139,000   | 171,000   | 4.7              |
| St. Louis . . .     | 19,000      | 73,000    | 92,000    | 4.9              |
| Boston . . .        | 17,000      | 73,000    | 90,000    | 5.0              |
| Baltimore . . .     | 23,000      | 64,000    | 87,000    | 5.0              |
| Cincinnati . . .    | 12,000      | 51,000    | 63,000    | 4.8              |
| San Francisco . . . | 11,000      | 41,000    | 52,000    | 5.8              |
| New Orleans . . .   | 10,000      | 38,000    | 48,000    | 5.0              |
| 10 Cities . . .     | 253,000     | 1,087,000 | 1,340,000 | 4.9              |

In three years ending December 1893, New York built new houses to the value of £24,300,000, say £8,100,000 per annum, as compared with £6,400,000 in 1888.

AUSTRALIA

The census of 1891 gave only the number of houses, but the approximate value will be as in the following table:—

|                    | No. of Houses | Value, £    | £ per House | Inhab. per House |
|--------------------|---------------|-------------|-------------|------------------|
| N. S. Wales . . .  | 242,000       | 68,000,000  | 280         | 4.7              |
| Victoria . . .     | 242,000       | 53,000,000  | 218         | 4.7              |
| N. Zealand . . .   | 134,000       | 25,000,000  | 187         | 4.7              |
| Queensland . . .   | 81,000        | 8,000,000   | 90          | 4.8              |
| S. Australia . . . | 64,000        | 12,000,000  | 188         | 5.0              |
| Tasmania . . .     | 30,000        | 6,000,000   | 200         | 4.9              |
| W. Australia . . . | 11,000        | 2,000,000   | 180         | 4.5              |
| Total . . .        | 804,000       | 174,000,000 | 216         | 4.8              |

The material of the houses was as follows:—

|                      | Number  | Ratio |
|----------------------|---------|-------|
| Brick or stone . . . | 232,000 | 29.0  |
| Wood, &c. . .        | 572,000 | 71.0  |
| Total . . .          | 804,000 | 100.0 |

The two great cities have a high ratio of house-property per inhabitant, viz.:—

|                 | Value, £   | £ per Inhab. |
|-----------------|------------|--------------|
| Sydney . . .    | 30,600,000 | 124          |
| Melbourne . . . | 58,000,000 | 128          |

It would appear that the total value of house property in Australia is equal to £46 per inhabitant, against £62 in the United States, and £29 in Canada.

CANADA

Municipal assessments show an increase of 130 per cent. in house property in 20 years, viz.:—

|                  | £ Sterling |             |            |
|------------------|------------|-------------|------------|
|                  | 1873       | 1893        | Increase   |
| Quebec . . .     | 15,500,000 | 30,600,000  | 15,100,000 |
| Ontario . . .    | 22,300,000 | 57,600,000  | 35,300,000 |
| Acadia . . .     | 9,600,000  | 12,100,000  | 2,500,000  |
| North-West . . . | 1,200,000  | 11,700,000  | 10,500,000 |
| Total . . .      | 48,600,000 | 112,000,000 | 63,400,000 |

Bodio's tables of building sites and rents of houses in various cities (1888-91) may be condensed as follows: the rents shown are the average paid in those years for an unfurnished house or flat of 6 rooms:—

|                | Sites, Shillings per Sq. Foot | Rents, Shillings per Month |
|----------------|-------------------------------|----------------------------|
| Paris . . .    | 2-120                         | 268                        |
| Berlin . . .   | 4-10                          | 60                         |
| Brussels . . . | 16-75                         | 36                         |
| Vienna . . .   | 3-140                         | 130                        |
| Dresden . . .  | 1-7                           | 32                         |
| Rome . . .     | 4-60                          | 80                         |
| Genoa . . .    | 3-9                           | 53                         |
| Naples . . .   | 4-20                          | 80                         |

In the above table the rent for Paris probably refers to the better quarters. As regards building sites, 53 shillings per sq. foot was recently paid in Edinburgh, £20 in London.

HOUSE-TAX

This tax in certain cities shows as follows:—

|               | £ Stg.  | Pence per Inhab. |              | £ Stg.  | Pence per Inhab. |
|---------------|---------|------------------|--------------|---------|------------------|
| Berlin . . .  | 590,000 | 95               | Naples . . . | 420,000 | 190              |
| Breslau . . . | 85,000  | 60               | Milan . . .  | 420,000 | 230              |
| Rome . . .    | 490,000 | 270              | Genoa . . .  | 210,000 | 230              |

In London the Inhabited House-duty averages £400,000, or 20 pence per inhabitant yearly, whereas in Italy this tax is equivalent to 20 pence a month per inhabitant.

HUNTING

See page 319.

## I

## INCOME

The incomes or earnings of nations in 1895 were approximately as follows :—

|                           | Millions £ Sterling |          |       |           |            |           |            |             | Total  |
|---------------------------|---------------------|----------|-------|-----------|------------|-----------|------------|-------------|--------|
|                           | Agricul.            | Manufac. | Trade | Transport | Mines, &c. | Domestics | House-Rent | Professions |        |
| United Kingdom . . . . .  | 138                 | 438      | 161   | 167       | 87         | 100       | 150        | 180         | 1,421  |
| France . . . . .          | 250                 | 298      | 120   | 131       | 35         | 79        | 118        | 174         | 1,205  |
| Germany . . . . .         | 250                 | 345      | 135   | 143       | 48         | 61        | 92         | 211         | 1,285  |
| Russia . . . . .          | 324                 | 190      | 103   | 108       | 54         | 31        | 47         | 147         | 1,004  |
| Austria . . . . .         | 192                 | 164      | 73    | 76        | 28         | 25        | 37         | 112         | 707    |
| Italy . . . . .           | 122                 | 95       | 45    | 47        | 8          | 18        | 27         | 74          | 436    |
| Spain . . . . .           | 81                  | 60       | 30    | 35        | 8          | 9         | 14         | 40          | 277    |
| Portugal . . . . .        | 16                  | 14       | 7     | 4         | 2          | 3         | 4          | 11          | 61     |
| Scandinavia . . . . .     | 49                  | 41       | 23    | 22        | 20         | 8         | 12         | 25          | 200    |
| Holland . . . . .         | 22                  | 25       | 21    | 8         | 1          | 7         | 10         | 15          | 109    |
| Belgium . . . . .         | 26                  | 59       | 24    | 14        | 11         | 5         | 8          | 22          | 169    |
| Switzerland . . . . .     | 12                  | 20       | 10    | 6         | 1          | 3         | 5          | 9           | 66     |
| Danubian States . . . . . | 50                  | 28       | 16    | 10        | 5          | 4         | 7          | 20          | 140    |
| Greece . . . . .          | 8                   | 5        | 3     | 3         | 1          | 1         | 2          | 5           | 28     |
| Europe . . . . .          | 1,540               | 1,782    | 771   | 774       | 309        | 354       | 533        | 1,045       | 7,108  |
| United States . . . . .   | 488                 | 976      | 313   | 357       | 250        | 178       | 267        | 349         | 3,178  |
| Canada . . . . .          | 34                  | 49       | 20    | 25        | 25         | 5         | 7          | 21          | 186    |
| Australia . . . . .       | 42                  | 42       | 20    | 25        | 15         | 14        | 21         | 34          | 213    |
| Argentina . . . . .       | 28                  | 20       | 10    | 12        | ...        | 5         | 7          | 13          | 95     |
| Total . . . . .           | 2,132               | 2,869    | 1,134 | 1,193     | 599        | 556       | 835        | 1,462       | 10,780 |

In the above table the column of Mines, &c., comprises the aggregate earnings from mines, forests, and fisheries; that of Professions includes the income of army, navy, and civil service, and of all persons not engaged in any of the preceding employments.

## UNITED KINGDOM

Baxter's table for 1867, compared with the apparent earnings of the people of the United Kingdom in 1895, stands thus :—

| Class                    | 1867       |            |            | 1895       |            |            |
|--------------------------|------------|------------|------------|------------|------------|------------|
|                          | Number     | Millions £ | Average, £ | Number     | Millions £ | Average, £ |
| Over £5000 . . . . .     | 8,500      | 126        | 14,800     | 27,000     | 216        | 8,200      |
| £1000 to £5000 . . . . . | 48,800     | 83         | 1,700      | 103,000    | 165        | 1,600      |
| £300 to £1000 . . . . .  | 178,300    | 88         | 490        | 360,000    | 144        | 400        |
| £100 to £300 . . . . .   | 1,026,400  | 111        | 108        | 1,600,000  | 240        | 150        |
| Under £100 . . . . .     | 12,458,000 | 406        | 33         | 15,910,000 | 656        | 41         |
| Total . . . . .          | 13,720,000 | 814        | 59         | 18,000,000 | 1,421      | 79         |

The earnings of the people were certainly underestimated by Baxter in 1867. They were approximately as follows in 1895\* :—

|                             | Millions £ |          |         |          |
|-----------------------------|------------|----------|---------|----------|
|                             | England    | Scotland | Ireland | U. King. |
| Agricultural . . . . .      | 88         | 17       | 33      | 138      |
| Manufacturing . . . . .     | 351        | 68       | 19      | 438      |
| Mines, forests, &c. . . . . | 74         | 13       | ...     | 87       |
| Trade . . . . .             | 126        | 23       | 12      | 161      |
| Transport . . . . .         | 137        | 21       | 9       | 167      |
| House-rent . . . . .        | 132        | 14       | 4       | 150      |
| Domestics . . . . .         | 88         | 10       | 2       | 100      |
| Public service . . . . .    | 44         | 4        | 3       | 51       |
| Professions . . . . .       | 104        | 17       | 8       | 129      |
| Total . . . . .             | 1,144      | 187      | 90      | 1,421    |

The above gives an average income of £38 per inhabi-

tant in England, £45 in Scotland, and £20 in Ireland. If the above were divided among the number of persons of gainful occupation, according to census of 1891, it would give to each person in England £89, in Scotland £105, in Ireland £42, and for the whole United Kingdom £84, which is only 32 shillings a week.

## FRANCE

There were by last census 17,300,000 persons of gainful pursuits, and the gross earnings may be estimated to be apportioned thus :—

| Class             | Number     | Millions £ | Average, £ |
|-------------------|------------|------------|------------|
| Rich . . . . .    | 700,000    | 440        | 630        |
| Middle . . . . .  | 2,500,000  | 240        | 96         |
| Working . . . . . | 14,100,000 | 525        | 37         |
| Total . . . . .   | 17,300,000 | 1,205      | 70         |

\* See "Industries and Wealth of Nations," Longmans, 1896.

The Société Statistique de Paris in 1891 estimated the earnings of the French people at 944 millions sterling. Leroy Beaulieu says that there are in Paris 36,000 persons with incomes over £500 a year.

## GERMANY

The principal States stand in the following order of earnings :—

|                   | Millions £ Sterling |         |        |            |            | Total |
|-------------------|---------------------|---------|--------|------------|------------|-------|
|                   | Prussia             | Bavaria | Saxony | Wurtemberg | Baden, &c. |       |
| Agriculture . . . | 155                 | 35      | 10     | 10         | 40         | 250   |
| Manufacture . . . | 197                 | 34      | 38     | 16         | 60         | 345   |
| Mines, &c. . . .  | 36                  | 3       | 3      | 1          | 5          | 48    |
| Trade . . . . .   | 80                  | 15      | 11     | 6          | 23         | 135   |
| Transport . . . . | 86                  | 16      | 11     | 6          | 24         | 143   |
| House-rent . . .  | 55                  | 10      | 6      | 4          | 17         | 92    |
| Domestics . . . . | 36                  | 7       | 4      | 3          | 11         | 61    |
| Professions . . . | 125                 | 23      | 16     | 8          | 39         | 211   |
| Total . . . . .   | 770                 | 143     | 99     | 54         | 219        | 1,285 |

The census of 1895 gave 22,910,000 persons earning a livelihood, and judging by income-tax returns the earnings may be apportioned thus :—

|                     | Number     | Millions £ | Average, £ |
|---------------------|------------|------------|------------|
| Over £1100 . . . .  | 30,000     | 115        | 3,800      |
| £240 to £1100 . . . | 144,000    | 70         | 480        |
| £150 to £240 . . .  | 360,000    | 67         | 185        |
| Under £150 . . . .  | 22,376,000 | 1,033      | 46         |
| Total . . . . .     | 22,910,000 | 1,285      | 56         |

## SCANDINAVIA

The three northern kingdoms show thus :—

|                     | Millions £ |        |         |             |
|---------------------|------------|--------|---------|-------------|
|                     | Sweden     | Norway | Denmark | Scandinavia |
| Agriculture . . . . | 22         | 6      | 21      | 49          |
| Manufactures . . .  | 23         | 8      | 10      | 41          |
| Trade . . . . .     | 12         | 4      | 7       | 23          |
| Transport . . . . . | 10         | 7      | 5       | 22          |
| Forests, &c. . . .  | 13         | 6      | 1       | 20          |
| Domestics . . . .   | 4          | 1      | 3       | 8           |
| House-rent . . . .  | 6          | 2      | 4       | 12          |
| Professions . . . . | 12         | 6      | 7       | 25          |
| Total . . . . .     | 102        | 40     | 58      | 200         |

## DANUBIAN STATES

The earnings of these States are approximately as follows :—

|                      | Millions £ Sterling |        |          |       |
|----------------------|---------------------|--------|----------|-------|
|                      | Roumania            | Servia | Bulgaria | Total |
| Agriculture . . . .  | 27                  | 10     | 13       | 50    |
| Manufactures, &c. .  | 16                  | 7      | 10       | 33    |
| Trade, &c. . . . .   | 15                  | 5      | 6        | 26    |
| Professions, &c. . . | 17                  | 6      | 8        | 31    |
| Total . . . . .      | 75                  | 28     | 37       | 140   |

## AUSTRIA-HUNGARY

The earnings of Austrians and Hungarians seem to be:

|                      | Millions £ Sterling |         |       |
|----------------------|---------------------|---------|-------|
|                      | Austria             | Hungary | Total |
| Agriculture . . . .  | 99                  | 93      | 192   |
| Manufactures . . .   | 90                  | 74      | 164   |
| Trade . . . . .      | 39                  | 34      | 73    |
| Transport . . . . .  | 41                  | 35      | 76    |
| Mines, forests . . . | 17                  | 11      | 28    |
| House-rent . . . .   | 28                  | 9       | 37    |
| Domestics . . . . .  | 19                  | 6       | 25    |
| Professions . . . .  | 64                  | 48      | 112   |
| Total . . . . .      | 397                 | 310     | 707   |

The above, divided among the number of persons following gainful pursuits in 1890, gives :—

|                   | Earners    | Millions £ | Average, £ |
|-------------------|------------|------------|------------|
| Austria . . . . . | 13,570,000 | 397        | 29         |
| Hungary . . . . . | 7,390,000  | 310        | 42         |
| Total . . . . .   | 20,960,000 | 707        | 34         |

## UNITED STATES

The distribution of earnings is approximately :—

|                     | Millions £ Sterling |        |       |       |       |
|---------------------|---------------------|--------|-------|-------|-------|
|                     | N. Eng.             | Middle | South | West  | Union |
| Agriculture . . . . | 19                  | 65     | 124   | 280   | 488   |
| Manufactures . . .  | 156                 | 380    | 74    | 366   | 976   |
| Mining . . . . .    | 4                   | 32     | 8     | 57    | 101   |
| Forestry, &c. . . . | 12                  | 23     | 56    | 58    | 149   |
| Trade . . . . .     | 38                  | 96     | 43    | 130   | 313   |
| Transport . . . . . | 44                  | 109    | 49    | 155   | 357   |
| House-rent . . . .  | 30                  | 98     | 30    | 109   | 267   |
| Domestics . . . . . | 20                  | 65     | 20    | 73    | 178   |
| Professions . . . . | 40                  | 108    | 50    | 151   | 349   |
| Total . . . . .     | 363                 | 976    | 454   | 1,385 | 3,178 |

If we allow an increase of 10 per cent. on the number of persons earning livelihoods by census of 1890, the division of earnings will be thus :—

| States            | No. of Earners | Millions £ | Average, £ |
|-------------------|----------------|------------|------------|
| New England . . . | 2,200,000      | 363        | 165        |
| Middle . . . . .  | 6,080,000      | 976        | 160        |
| South . . . . .   | 6,820,000      | 454        | 67         |
| West . . . . .    | 9,900,000      | 1,385      | 140        |
| Union . . . . .   | 25,000,000     | 3,178      | 127        |

## CANADA

The earnings of Canada are approximately :—

|                     | £ Sterling (000 omitted) |        |        |                  |
|---------------------|--------------------------|--------|--------|------------------|
|                     | Ontario                  | Quebec | Acadia | N. West Dominion |
| Agriculture . . . . | 19,400                   | 5,800  | 3,100  | 5,700            |
| Manufac. . . . .    | 24,700                   | 15,600 | 5,600  | 3,100            |
| Trade, &c. . . . .  | 22,100                   | 11,900 | 6,600  | 4,400            |
| Sundries . . . . .  | 22,200                   | 15,900 | 13,400 | 6,500            |
| Total . . . . .     | 88,400                   | 49,200 | 28,700 | 19,700           |

Acadia comprises Nova Scotia, New Brunswick, and the other maritime provinces. The number of persons earning a livelihood in 1890 was 1,611,000, giving an average of £115 each, against £127 in the United States.

## AUSTRALIA

The earnings of the different colonies for 1895 may be distinguished thus :—

|                       | £ Sterling (ooo omitted) |        |              |        |            |          |         |
|-----------------------|--------------------------|--------|--------------|--------|------------|----------|---------|
|                       | Farming                  | Mining | Manufactures | Trade  | House-rent | Sundries | Total   |
| New South Wales . .   | 12,400                   | 4,900  | 13,000       | 14,000 | 6,800      | 15,400   | 66,500  |
| Victoria . . . . .    | 9,600                    | 2,800  | 17,000       | 14,200 | 7,300      | 13,900   | 64,800  |
| New Zealand . . . .   | 8,500                    | 1,700  | 6,700        | 7,800  | 2,300      | 7,200    | 34,200  |
| Queensland . . . . .  | 5,800                    | 2,700  | 2,400        | 4,800  | 1,900      | 5,300    | 22,900  |
| South Australia . . . | 3,900                    | 400    | 1,900        | 3,000  | 1,300      | 3,400    | 13,900  |
| Tasmania . . . . .    | 1,300                    | 700    | 800          | 1,200  | 1,000      | 1,800    | 6,800   |
| West Australia . . .  | 500                      | 800    | 300          | 700    | 400        | 1,200    | 3,900   |
| Total . . . . .       | 42,000                   | 14,000 | 42,100       | 45,700 | 21,000     | 48,200   | 213,000 |

Dividing the above among the earners, we find :—

|                       | Earners   | £ Sterling  | £ each |
|-----------------------|-----------|-------------|--------|
| New South Wales . .   | 465,000   | 66,500,000  | 143    |
| Victoria . . . . .    | 502,000   | 64,800,000  | 129    |
| New Zealand . . . .   | 253,000   | 34,200,000  | 135    |
| Queensland . . . . .  | 180,000   | 22,900,000  | 127    |
| South Australia . . . | 134,000   | 13,900,000  | 104    |
| Tasmania . . . . .    | 61,000    | 6,800,000   | 111    |
| West Australia . . .  | 25,000    | 3,900,000   | 156    |
| Total . . . . .       | 1,620,000 | 213,000,000 | 132    |

The general average per worker is £132, against £127 in the United States, £115 in Canada, and £84 in the United Kingdom.

## INCOME-TAX

The assessments have risen in twenty years as follows :

## England, £

|                       | 1876        | 1886        | 1896        | Increase in 20 Years |
|-----------------------|-------------|-------------|-------------|----------------------|
| Land . . . . .        | 50,200,000  | 46,000,000  | 39,400,000  | ...                  |
| Houses . . . . .      | 83,900,000  | 115,400,000 | 135,900,000 | 52,000,000           |
| Railways . . . . .    | 24,200,000  | 31,800,000  | 43,500,000  | 19,300,000           |

## Ireland, £

|                       | 1876       | 1886       | 1896       | Increase in 20 Years |
|-----------------------|------------|------------|------------|----------------------|
| Land . . . . .        | 9,300,000  | 10,000,000 | 9,900,000  | 600,000              |
| Houses . . . . .      | 3,600,000  | 3,400,000  | 3,900,000  | 300,000              |
| Railways . . . . .    | 1,100,000  | 1,300,000  | 1,600,000  | 500,000              |
| Professions . . . . . | 21,500,000 | 22,000,000 | 22,800,000 | 1,300,000            |
| Total . . . . .       | 35,500,000 | 36,700,000 | 38,200,000 | 2,700,000            |

## United Kingdom, £

|                       | 1876        | 1886        | 1896        | Increase in 20 Years |
|-----------------------|-------------|-------------|-------------|----------------------|
| Land . . . . .        | 67,000,000  | 63,300,000  | 55,400,000  | ...                  |
| Houses . . . . .      | 96,900,000  | 131,400,000 | 154,400,000 | 57,500,000           |
| Railways . . . . .    | 28,000,000  | 37,000,000  | 49,400,000  | 21,400,000           |
| Mines . . . . .       | 14,600,000  | 7,500,000   | 13,000,000  | ...                  |
| Professions . . . . . | 372,700,000 | 390,600,000 | 437,500,000 | 64,800,000           |
| Total . . . . .       | 579,200,000 | 629,800,000 | 709,700,000 | 130,500,000          |

The average annual increase of income since 1876 has been £5,800,000 in England, £590,000 in Scotland, and £130,000 in Ireland.

The assessments of Schedule D (for trades and professions only) in 1896, compared with 1876, show as follows, excluding all under £300 :—

## England

|                       | 1876   | 1896   | Decrease |

| Over £300 . . . . .   | 9,370 | 10,121 | 751      |

## Ireland

|                       | 1876  | 1896  | Decrease |
|-----------------------|-------|-------|----------|
| Over £10,000 . . . .  | 38    | 11    | 27       |
| £2,000 to £10,000 . . | 321   | 172   | 149      |
| £800 to £2,000 . . .  | 884   | 565   | 319      |
| £300 to £800 . . . .  | 3,719 | 2,850 | 869      |
| Over £300 . . . . .   | 4,962 | 3,598 | 1,364    |

## United Kingdom

|                       | 1876    | 1896    | Decrease |
|-----------------------|---------|---------|----------|
| Over £10,000 . . . .  | 1,266   | 954     | 312      |
| £2,000 to £10,000 . . | 8,887   | 7,797   | 1,090    |
| £800 to £2,000 . . .  | 18,556  | 17,576  | 980      |
| £300 to £800 . . . .  | 78,644  | 75,971  | 2,673    |
| Over £300 . . . . .   | 107,353 | 102,298 | 5,055    |

Although the number of assessed persons has diminished in twenty years, the profits under Schedule D have risen from 272 to 352 millions, that is, an increase of 80 millions, or 4 millions a year. This is partly explained by the fact that companies count only as one person, and small traders are diminishing, to make way for companies.

The assessments of Schedule D, for trades and pro-

essions only, were in 1896 as follows, excluding all under £300 :—

| Income, £         | Number of Persons |          |         |          |
|-------------------|-------------------|----------|---------|----------|
|                   | England           | Scotland | Ireland | U. King. |
| Over 10,000 . . . | 823               | 120      | 11      | 954      |
| 2000-10,000 . . . | 6,689             | 936      | 172     | 7,797    |
| 800-2000 . . .    | 15,268            | 1,743    | 565     | 17,576   |
| 300-800 . . .     | 65,799            | 7,322    | 2,850   | 75,971   |
| Total . . .       | 88,579            | 10,121   | 3,598   | 102,298  |

The ratio of such persons to population is :—

|                | Population | Over £300 | Ratio per 100,000 |
|----------------|------------|-----------|-------------------|
| England . . .  | 30,790,000 | 88,579    | 289               |
| Scotland . . . | 4,190,000  | 10,121    | 241               |
| Ireland . . .  | 4,560,000  | 3,598     | 79                |

### PRUSSIA

The assessments of income for 1897 compare with previous returns as follows :—

| £ Sterling       | Numbers Assessed |         |         |         |
|------------------|------------------|---------|---------|---------|
|                  | 1881             | 1886    | 1893    | 1897    |
| 150 to 480 . . . | 150,700          | 172,000 | 260,100 | 272,800 |
| Over 480 . . .   | 21,800           | 26,800  | 56,700  | 58,300  |
| Total . . .      | 172,500          | 198,800 | 316,800 | 331,100 |

The increase has been in the towns, while the rural districts show a decline in incomes over £480, viz. :—

| £ Sterling       | Urban   |         | Increase per Cent. |
|------------------|---------|---------|--------------------|
|                  | 1883    | 1897    |                    |
| 150 to 480 . . . | 190,800 | 203,200 | 6.0                |
| Over 480 . . .   | 46,940  | 48,800  | 4.0                |
| Total . . .      | 237,740 | 252,000 | 5.5                |

|                  | Rural  |        |     |
|------------------|--------|--------|-----|
|                  | 1883   | 1897   |     |
| 150 to 480 . . . | 69,300 | 69,600 | 1.0 |
| Over 480 . . .   | 9,810  | 9,490  | 0   |
| Total . . .      | 79,110 | 79,090 | 0   |

It will be observed that since 1881 the number of persons with moderate incomes, between £150 and £480, increased 80 per cent., but it appears, moreover, that incomes over £480 increased 167 per cent., which shows that a congestion of wealth is taking place, just as in Great Britain.

### INDIANS

The census of 1890 shows that the number of Indians in the United States was 248,000, against 332,000 in 1880, a decline of 25 per cent. They were classed as Civilised and Prairie, thus :—

| States            | Civilised | Prairie | Total   |
|-------------------|-----------|---------|---------|
| New England . . . | 1,400     | ...     | 1,400   |
| Middle . . .      | 1,800     | 5,400   | 7,200   |
| South . . .       | 6,800     | 64,900  | 71,700  |
| Prairie . . .     | 16,800    | 46,200  | 63,000  |
| Pacific . . .     | 32,000    | 72,900  | 104,900 |
| Union . . .       | 58,800    | 189,400 | 248,200 |

The Cherokees numbered 29,600, the Creeks 14,600, the Choctaws 14,400, and the rest was made up of a variety of tribes. The total was 125,700 males and 122,500 females. See *Indians*, p. 123.

### INFIRM

The proportions of insane, blind, and deaf mutes in the principal countries are as follows :—

|                     | Per 100,000 of Population |       |            |       |
|---------------------|---------------------------|-------|------------|-------|
|                     | Insane                    | Blind | Deaf Mutes | Total |
| England . . .       | 201                       | 81    | 49         | 331   |
| Scotland . . .      | 289                       | 69    | 53         | 411   |
| Ireland . . .       | 416                       | 114   | 72         | 602   |
| France . . .        | 250                       | 84    | 55         | 389   |
| Germany . . .       | 240                       | 88    | 92         | 420   |
| Russia . . .        | 110                       | 187   | 57         | 354   |
| Austria . . .       | 217                       | 81    | 129        | 427   |
| Hungary . . .       | 161                       | 105   | 109        | 375   |
| Italy . . .         | 170                       | 93    | 66         | 329   |
| Spain . . .         | 70                        | 120   | 63         | 253   |
| Sweden . . .        | 342                       | 82    | 111        | 535   |
| Norway . . .        | 387                       | 128   | 107        | 622   |
| Finland . . .       | 270                       | 155   | 116        | 541   |
| Belgium . . .       | 187                       | 81    | 41         | 309   |
| Switzerland . . .   | 110                       | 75    | 230        | 415   |
| Bulgaria . . .      | 213                       | 314   | 56         | 583   |
| United States . . . | 323                       | 81    | 65         | 469   |
| Canada . . .        | 276                       | 70    | 100        | 446   |
| Australia . . .     | 318                       | 70    | 36         | 424   |
| Average . . .       | 244                       | 109   | 85         | 438   |

It appears that  $4\frac{1}{2}$  persons per thousand, or one in 227 of all living, is mentally or bodily afflicted as in the above table. Meantime the average of 4.4 per thousand is exceeded in Norway, Ireland, Bulgaria, Finland, Sweden, and United States.

\* See "Industries and Wealth of Nations," Longmans, 1890.

## UNITED KINGDOM

The numbers of insane in 1895 were :—

|                      | Male   | Female | Total   | Per 100,000 Inhab. |
|----------------------|--------|--------|---------|--------------------|
| England . . .        | 42,796 | 51,285 | 94,081  | 310                |
| Scotland . . .       | 5,426  | 6,234  | 11,660  | 280                |
| Ireland . . .        | 9,121  | 8,534  | 17,655  | 390                |
| United Kingdom . . . | 57,343 | 66,053 | 123,396 | 316                |

Returns for 1896 are worse, viz. :—

|                      | Insane  | Per 100,000 Pop. |
|----------------------|---------|------------------|
| Great Britain . . .  | 109,930 | 314              |
| Ireland . . .        | 18,966  | 416              |
| United Kingdom . . . | 128,896 | 328              |

The number of insane in the United Kingdom has increased as follows :—

| Year           | Number  | Per 100,000 Inhab. |
|----------------|---------|--------------------|
| 1862 . . . . . | 55,525  | 181                |
| 1872 . . . . . | 77,013  | 241                |
| 1882 . . . . . | 98,871  | 294                |
| 1896 . . . . . | 128,896 | 328                |

The ratio of age among lunatics in 1851 and 1881 was as follows :—

|                    | Males |       | Females |       |
|--------------------|-------|-------|---------|-------|
|                    | 1851  | 1881  | 1851    | 1881  |
| Under 15 . . . . . | 13    | 2     | 6       | 1     |
| 15-25 . . . . .    | 86    | 60    | 66      | 52    |
| 25-45 . . . . .    | 497   | 462   | 436     | 399   |
| 45-65 . . . . .    | 333   | 376   | 399     | 417   |
| Over 65 . . . . .  | 71    | 100   | 93      | 131   |
| Total . . . . .    | 1,000 | 1,000 | 1,000   | 1,000 |

Dr. Humphreys maintains that the increased ratio of insane in England is due to kinder treatment, which of course diminishes the mortality. The death-rate yearly per thousand has been :—

| Years             | Males | Females | Total |
|-------------------|-------|---------|-------|
| 1871-75 . . . . . | 160   | 112     | 133   |
| 1876-80 . . . . . | 105   | 67      | 83    |
| 1881-85 . . . . . | 80    | 75      | 77    |
| 1886-88 . . . . . | 78    | 71      | 74    |

Dr. Tukey shows the ratio of recoveries has been at Wakefield thus :—

| Years             | Per 1000 |
|-------------------|----------|
| 1849-58 . . . . . | 451      |
| 1859-68 . . . . . | 405      |
| 1879-87 . . . . . | 407      |

Pauper lunatics in Ireland cost £22 per head yearly, the local rates contributing 60 per cent., the Government 40 per cent., of the cost (£330,000).

The number of blind in the United Kingdom was as follows :—

|                          | Number |        | Per Million Pop. |       |
|--------------------------|--------|--------|------------------|-------|
|                          | 1861   | 1891   | 1861             | 1891  |
| England . . . . .        | 19,352 | 23,467 | 957              | 809   |
| Scotland . . . . .       | 2,820  | 2,797  | 921              | 693   |
| Ireland . . . . .        | 6,879  | 5,341  | 1,184            | 1,140 |
| United Kingdom . . . . . | 29,051 | 31,605 | 999              | 836   |

The number of deaf mutes in the same years was :—

|                          | Number |        | Per Million Pop. |      |
|--------------------------|--------|--------|------------------|------|
|                          | 1861   | 1891   | 1861             | 1891 |
| England . . . . .        | 12,323 | 14,192 | 610              | 489  |
| Scotland . . . . .       | 2,335  | 2,125  | 762              | 527  |
| Ireland . . . . .        | 4,930  | 3,365  | 850              | 720  |
| United Kingdom . . . . . | 19,588 | 19,682 | 675              | 520  |

It will be seen that the numbers of blind and of deaf mutes to population have declined remarkably since 1861, the blind 16 per cent., and deaf mutes 22 per cent.

There are 50 institutions in the United Kingdom, including 8 in Scotland and 4 in Ireland, for instructing deaf and dumb persons, and the number of inmates was as follows :—

|                          | 1861  | 1896  |
|--------------------------|-------|-------|
| England . . . . .        | 1,001 | 2,755 |
| Scotland . . . . .       | 240   | 525   |
| Ireland . . . . .        | 399   | 555   |
| United Kingdom . . . . . | 1,640 | 3,835 |

The latest returns of schools for deaf mutes, in 1895, show thus :—

|                          | Schools | Teachers | Pupils |
|--------------------------|---------|----------|--------|
| United Kingdom . . . . . | 50      | 250      | 3,835  |
| France . . . . .         | 84      | 364      | 4,570  |
| Germany . . . . .        | 97      | 595      | 6,280  |
| Russia . . . . .         | 12      | ...      | 800    |
| Austria . . . . .        | 31      | ...      | 1,820  |
| Italy . . . . .          | 51      | ...      | 2,140  |
| Switzerland . . . . .    | 17      | ...      | 570    |
| Scandinavia, &c. . . . . | 30      | ...      | 2,010  |
| Europe . . . . .         | 372     | ...      | 22,025 |
| United States . . . . .  | 60      | 600      | 7,500  |
| South America . . . . .  | 43      | ...      | 2,700  |
| Australia . . . . .      | 4       | ...      | 160    |
| Asia, &c. . . . .        | 10      | ...      | 270    |
| Total . . . . .          | 489     | ...      | 32,655 |

## AUSTRIA

The census of Austria, without Hungary, for 1890 compares with that of 1880 as follows :—

|                      | Number |         | Per Million Pop. |       |
|----------------------|--------|---------|------------------|-------|
|                      | 1880   | 1890    | 1880             | 1890  |
| Insane . . . . .     | 45,140 | 51,880  | 2,050            | 2,170 |
| Blind . . . . .      | 20,150 | 19,360  | 910              | 810   |
| Deaf mutes . . . . . | 22,360 | 30,840  | 1,010            | 1,290 |
| Total . . . . .      | 87,650 | 102,080 | 3,970            | 4,270 |

The sexes in 1890 were as follows :—

|                  | Number |         | Per Mill. Persons |         |
|------------------|--------|---------|-------------------|---------|
|                  | Males  | Females | Males             | Females |
| Insane . . .     | 28,025 | 23,855  | 2,400             | 1,955   |
| Blind . . .      | 10,100 | 9,260   | 863               | 760     |
| Deaf mutes . . . | 16,960 | 13,880  | 1,450             | 1,138   |
| Total . . .      | 55,085 | 46,995  | 4,713             | 3,853   |

## HUNGARY

The census of 1890 showed as follows :—

|                  | Number |         | Per Mill. Persons |         |
|------------------|--------|---------|-------------------|---------|
|                  | Males  | Females | Males             | Females |
| Insane . . .     | 15,346 | 12,812  | 1,770             | 1,456   |
| Blind . . .      | 9,174  | 9,189   | 1,058             | 1,044   |
| Deaf mutes . . . | 10,310 | 8,714   | 1,190             | 990     |
| Total . . .      | 34,830 | 30,715  | 4,018             | 3,490   |

Compared with the whole population the number of afflicted persons is 3745 per million, against 4270 in Austria.

## SWEDEN

According to the census of 1890 we find as follows :—

|                  | Number |         | Per Mill. Persons |         |
|------------------|--------|---------|-------------------|---------|
|                  | Males  | Females | Males             | Females |
| Insane . . .     | 8,595  | 7,727   | 3,708             | 3,132   |
| Blind . . .      | 1,880  | 2,068   | 812               | 838     |
| Deaf mutes . . . | 2,952  | 2,355   | 1,274             | 955     |
| Total . . .      | 13,427 | 12,150  | 5,794             | 4,925   |

This gives an average for the whole Swedish people of 5330 afflicted persons per million, as compared with 4636 in the United Kingdom, and 4683 in the United States.

## NORWAY

The census of 1890 gives the infirm as follows :—

|                  | Number |         | Per Mill. Persons |         |
|------------------|--------|---------|-------------------|---------|
|                  | Males  | Females | Males             | Females |
| Insane . . .     | 3,846  | 3,903   | 4,018             | 3,755   |
| Blind . . .      | 1,287  | 1,278   | 1,351             | 1,230   |
| Deaf mutes . . . | 1,176  | 963     | 1,235             | 927     |
| Total . . .      | 6,309  | 6,144   | 6,604             | 5,912   |

The total number afflicted is equal to 6226 persons in a million of population, against 5330 in Sweden.

## FINLAND

According to the census of 1890 we find as follows :—

|                  | Number |         | Per Mill. Persons |         |
|------------------|--------|---------|-------------------|---------|
|                  | Males  | Females | Males             | Females |
| Insane . . .     | 3,505  | 2,950   | 2,998             | 2,442   |
| Blind . . .      | 1,328  | 2,374   | 1,135             | 1,966   |
| Deaf mutes . . . | 1,537  | 1,230   | 1,313             | 1,018   |
| Total . . .      | 6,370  | 6,554   | 5,446             | 5,426   |

The total number of afflicted persons is equal to 5432 in a million of population, which is a little higher than the ratio in Sweden.

## BULGARIA

The census of 1890 gave the following results :—

|                  | Number |         | Per Mill. Persons |         |
|------------------|--------|---------|-------------------|---------|
|                  | Males  | Females | Males             | Females |
| Insane . . .     | 2,006  | 1,168   | 1,250             | 753     |
| Blind . . .      | 5,520  | 4,411   | 3,440             | 2,846   |
| Deaf mutes . . . | 1,126  | 654     | 704               | 422     |
| Total . . .      | 8,652  | 6,233   | 5,394             | 4,021   |

The total gives a ratio of 4715 afflicted persons per million inhabitants.

## UNITED STATES

The census of 1890 compared with that of 1880 as follows :—

|                  | Number  |         | Per Million Pop. |       |
|------------------|---------|---------|------------------|-------|
|                  | 1880    | 1890    | 1880             | 1890  |
| Insane . . .     | 168,854 | 202,094 | 3,366            | 3,227 |
| Deaf mutes . . . | 33,878  | 40,592  | 675              | 648   |
| Blind . . .      | 48,928  | 50,568  | 976              | 808   |
| Total . . .      | 251,660 | 293,254 | 5,017            | 4,683 |

There is a decline in all three classes of infirmity, and it is to be observed that insanity and blindness are more frequent among foreign settlers than among the native-born population, the figures for 1890 showing these ratios :—

|                  | Per Million Persons |         |       |        |
|------------------|---------------------|---------|-------|--------|
|                  | Native              | Foreign | Male  | Female |
| Insane . . .     | 3,060               | 4,180   | 3,320 | 3,140  |
| Deaf mutes . . . | 680                 | 460     | 700   | 590    |
| Blind . . .      | 780                 | 990     | 880   | 740    |
| Total . . .      | 4,520               | 5,630   | 4,900 | 4,470  |

|                  | White | Coloured | Total Pop. |
|------------------|-------|----------|------------|
| Insane . . .     | 3,360 | 2,290    | 3,227      |
| Deaf mutes . . . | 680   | 420      | 648        |
| Blind . . .      | 790   | 950      | 808        |
| Total . . .      | 4,830 | 3,660    | 4,683      |

The coloured population suffers more from blindness, but less from other infirmities, than the white. The census further shows that the mothers of afflicted persons were born in the following countries :—

| Mothers Born in   | Insane  | Blind  | Dumb   | Total   |
|-------------------|---------|--------|--------|---------|
| U. States* . . .  | 145,557 | 37,842 | 30,013 | 213,412 |
| England . . .     | 4,188   | 1,562  | 1,056  | 6,806   |
| Scotland . . .    | 1,115   | 370    | 254    | 1,739   |
| Ireland . . .     | 22,118  | 4,290  | 2,229  | 28,637  |
| France . . .      | 653     | 206    | 146    | 1,005   |
| Germany . . .     | 15,408  | 3,509  | 3,833  | 22,750  |
| Russia . . .      | 684     | 127    | 241    | 1,052   |
| Austria . . .     | 837     | 152    | 218    | 1,207   |
| Italy . . .       | 407     | 54     | 52     | 513     |
| Scandinavia . . . | 4,001   | 566    | 665    | 5,232   |
| Canada . . .      | 1,986   | 730    | 925    | 3,641   |
| Various . . .     | 5,140   | 1,160  | 960    | 7,260   |
| Total . . .       | 202,094 | 50,568 | 40,592 | 293,254 |

\* The census makes the items of this line less, and leaves 30,841 mothers unaccounted for, who should be counted as Americans, and are included in this table.

Comparing the parentage of afflicted persons with the population of each nationality in the United States in 1890, we find as follows:—

|                          | In One Million Persons |       |       |        |
|--------------------------|------------------------|-------|-------|--------|
|                          | Insane                 | Blind | Dumb  | Total  |
| Americans . . .          | 2,726                  | 709   | 562   | 3,997  |
| English . . .            | 4,607                  | 1,718 | 1,162 | 7,487  |
| Scotch . . .             | 4,595                  | 1,525 | 1,046 | 7,166  |
| Irish . . .              | 11,830                 | 2,294 | 1,192 | 15,316 |
| Canadians . . .          | 2,026                  | 745   | 943   | 3,714  |
| French . . .             | 5,760                  | 1,817 | 1,288 | 8,865  |
| Germans . . .            | 5,495                  | 1,252 | 1,368 | 8,115  |
| Russians . . .           | 3,762                  | 608   | 1,325 | 5,785  |
| Austrians . . .          | 3,482                  | 632   | 905   | 5,020  |
| Italians . . .           | 2,140                  | 297   | 286   | 2,823  |
| Scandinavians . . .      | 4,280                  | 606   | 712   | 5,598  |
| Various . . .            | 6,120                  | 1,380 | 1,143 | 8,643  |
| General population . . . | 3,227                  | 808   | 618   | 4,683  |

Italians, Canadians, and Americans are much below the average as regards infirmities, while Irish, French, and Germans are greatly in excess. The ratio of insanity among Irish is extraordinary, and it is remarkable that in Ireland likewise the rate is higher than in any other nation of Europe. There is, of course, a difference between the rates of insane, &c., for persons native or foreign born, and for persons of native or foreign parentage (as regards the mother), as shown thus:—

|                  | Number  |            | Rate per Million |            |
|------------------|---------|------------|------------------|------------|
|                  | Natives | Foreigners | Natives          | Foreigners |
| Insane . . .     | 163,410 | 38,684     | 3,060            | 4,180      |
| Blind . . .      | 41,652  | 8,916      | 780              | 990        |
| Deaf mutes . . . | 36,337  | 4,255      | 680              | 460        |
| Total . . .      | 241,399 | 51,855     | 4,520            | 5,630      |

|                  | Of Mother |         | Rate per Million |         |
|------------------|-----------|---------|------------------|---------|
|                  | American  | Foreign | American         | Foreign |
| Insane . . .     | 145,557   | 56,537  | 2,726            | 6,106   |
| Blind . . .      | 37,842    | 12,726  | 709              | 1,374   |
| Deaf mutes . . . | 30,013    | 10,579  | 562              | 1,142   |
| Total . . .      | 213,412   | 79,842  | 3,997            | 8,622   |

The census makes a distinction of two classes; persons really insane, and those who are feeble-minded, viz:—

|                     | Number  |         | Per Million Pop. |       |
|---------------------|---------|---------|------------------|-------|
|                     | 1880    | 1890    | 1880             | 1890  |
| Insane . . .        | 91,959  | 106,485 | 1,833            | 1,700 |
| Feeble-minded . . . | 76,895  | 95,609  | 1,533            | 1,527 |
| Total . . .         | 168,854 | 202,094 | 3,366            | 3,227 |

As regards the former class, the following table shows the ratios according to age:—

|               | Male  | Female | White | Col.  | Total |
|---------------|-------|--------|-------|-------|-------|
| 0-20 . . .    | 21    | 18     | 17    | 53    | 19    |
| 21-30 . . .   | 150   | 119    | 131   | 195   | 135   |
| 31-40 . . .   | 260   | 226    | 242   | 258   | 243   |
| 41-50 . . .   | 238   | 245    | 243   | 221   | 241   |
| 51-60 . . .   | 166   | 193    | 182   | 134   | 180   |
| 61-70 . . .   | 101   | 118    | 111   | 76    | 109   |
| Over 70 . . . | 64    | 81     | 74    | 63    | 73    |
|               | 1,000 | 1,000  | 1,000 | 1,000 | 1,000 |

Under 40 the rate of insanity is heavier among males than females, also among coloured people than whites, but after 40 the tables are reversed. Nevertheless, taken altogether, insanity prevails much more among males than females, and also among whites than coloured people, viz:—

|                        | Insane per Million |         |       |
|------------------------|--------------------|---------|-------|
|                        | Males              | Females | Total |
| Whites . . .           | 3,450              | 3,260   | 3,360 |
| Coloured . . .         | 2,360              | 2,220   | 2,290 |
| Total population . . . | 3,320              | 3,140   | 3,227 |

## CANADA

The census of 1891 compares with that of 1881 thus:—

|                  | Number |        | Per 100,000 Pop. |      |
|------------------|--------|--------|------------------|------|
|                  | 1881   | 1891   | 1881             | 1891 |
| Insane . . .     | 9,940  | 13,355 | 230              | 276  |
| Blind . . .      | 3,020  | 3,380  | 70               | 70   |
| Deaf mutes . . . | 5,180  | 4,840  | 120              | 100  |
| Total . . .      | 18,140 | 21,575 | 420              | 446  |

In 1891 the statistics of insanity were as follows:—

|                 | Number |         | Per 100,000 Persons |         |
|-----------------|--------|---------|---------------------|---------|
|                 | Males  | Females | Males               | Females |
| Married . . .   | 1,239  | 1,576   | 156                 | 199     |
| Unmarried . . . | 5,441  | 4,065   | 340                 | 280     |
| Widowed . . .   | 482    | 552     | 768                 | 425     |
| Total . . .     | 7,162  | 6,193   | 291                 | 261     |

The nationality of the insane was as follows:—

|                            | Number | Ratio |
|----------------------------|--------|-------|
| Canadians . . .            | 6,906  | 51.7  |
| Foreigners . . .           | 3,044  | 22.8  |
| Of foreign parentage . . . | 3,405  | 25.5  |
| Total . . .                | 13,355 | 100.0 |

The rate of insanity among foreign (and British) settlers was 468 per 100,000 persons, whereas the native-born, including children of foreigners, had a rate of only 216 per 100,000. With regard to age the returns show:—

|                | Number | Per 100,000 Persons |
|----------------|--------|---------------------|
| Under 15 . . . | 762    | 43                  |
| 15-20 . . .    | 701    | 136                 |
| 20-30 . . .    | 2,429  | 282                 |
| 30-40 . . .    | 2,643  | 440                 |
| Over 40 . . .  | 6,820  | 575                 |
| Total . . .    | 13,355 | 276                 |

The rate of insanity, 276 per 100,000, compares favourably with 323 in the United States and 303 in Australia.

## AUSTRALIA

The census of 1891 gave the following results:—

|                     | Insane | Blind | Mutes | Total  | Per Mill. Pop. |
|---------------------|--------|-------|-------|--------|----------------|
| N. S. Wales . . .   | 3,415  | 741   | 383   | 4,539  | 4,040          |
| Victoria . . .      | 4,125  | 995   | 364   | 5,484  | 4,810          |
| New Zealand . . .   | 1,926  | 274   | 166   | 2,366  | 3,777          |
| Queensland . . .    | 1,104  | 199   | 154   | 1,457  | 3,696          |
| South Australia . . | 936    | 247   | 234   | 1,417  | 4,430          |
| Tasmania . . .      | 429    | 165   | 54    | 648    | 4,410          |
| West Australia . .  | 136    | 54    | 11    | 201    | 4,020          |
| Total . . .         | 12,071 | 2,675 | 1,366 | 16,112 | 4,240          |

Taking all the colonies in a group, the ratio of afflicted persons to population is 9 per cent. lower than in the United Kingdom, and nearly 10 per cent. lower than in the United States. In December 1894 the returns of lunatic asylums were as follows:—

|                     | Inmates<br>Number | Per Mill.<br>Inhab. | Expense<br>£ | £ per<br>Patient |
|---------------------|-------------------|---------------------|--------------|------------------|
| New South Wales . . | 3,587             | 2,870               | 85,000       | 23.6             |
| Victoria . . .      | 4,116             | 3,480               | 89,000       | 21.6             |
| New Zealand . . .   | 2,168             | 3,097               | 45,000       | 20.8             |
| Queensland . . .    | 1,340             | 2,910               | 32,000       | 24.0             |
| South Australia . . | 893               | 2,502               | 23,000       | 25.8             |
| Tasmania . . .      | 367               | 2,290               | 11,000       | 30.0             |
| West Australia . .  | 148               | 1,620               | 5,000        | 33.8             |
| Total . . .         | 12,619            | 3,030               | 290,000      | 23.0             |

The ratio of insane is 303 per 100,000 inhabitants, against 323 in the United States, 290 in Great Britain, and 416 in Ireland. It will be observed that although New Zealand has a higher rate of insanity than the Australian continent or Tasmania, its sum of afflicted persons of all kinds is only 378 per 100,000 of population, while the general average for Australasia is 424.

## INSANE

See *Infirm*, page 750, also *Insane*, page 327.

## INSURANCE

The number of Life Insurance Companies in the United Kingdom fell from 95 in 1886 to 82 in 1896, and the aggregate amount of business rose nearly 50 per cent, viz. :—

|                    | 1886        | 1896        | Increase    |
|--------------------|-------------|-------------|-------------|
| Number of Policies | 902,000     | 1,494,000   | 63 p. cent. |
| Amount, £ . . .    | 421,000,000 | 582,000,000 | 38 "        |
| Premiums, £ . . .  | 12,800,000  | 18,700,000  | 46 "        |
| Assets, £ . . .    | 143,000,000 | 204,400,000 | 43 "        |
| Paid-up Capital, £ | 11,300,000  | 12,300,000  | 9 "         |

Income and expenditure in 1896 were as follows:—

| Income, £         |            | Expenditure, £ |            |
|-------------------|------------|----------------|------------|
| Premiums . . .    | 18,700,000 | Policies . . . | 16,800,000 |
| Investments . . . | 10,400,000 | Sundries . . . | 4,000,000  |
| Total . . .       | 29,100,000 | Total . . .    | 20,800,000 |

Assets in 1896 were made up as follows:—

|                  | £           |
|------------------|-------------|
| Mortgages . . .  | 83,400,000  |
| Debentures . . . | 35,300,000  |
| Stocks, &c. . .  | 85,700,000  |
| Total . . .      | 204,400,000 |

The business of 1882 compared with 1896 showed the relative progress in 14 years as follows:—

|                    | 1882 | 1896 |
|--------------------|------|------|
| Premiums . . . . . | 100  | 160  |
| Claims . . . . .   | 100  | 138  |
| Assets . . . . .   | 100  | 159  |

The investments which constituted the assets of the Companies gave a net return of 4½ per cent. in 1882, and 3½ in 1896.

The following table shows how much of the money received as premiums in Ordinary Companies goes back to insured persons under the head of claims, and how much goes for management, out of the total income:—

| Year       | Premiums<br>£ | Claims<br>£ | Per-<br>centage |
|------------|---------------|-------------|-----------------|
| 1885 . . . | 12,850,000    | 11,350,000  | 88.3            |
| 1890 . . . | 14,830,000    | 11,780,000  | 79.6            |
| 1895 . . . | 18,660,000    | 13,610,000  | 73.0            |

|            | Income<br>£ | Management<br>£ |     |
|------------|-------------|-----------------|-----|
| 1885 . . . | 19,640,000  | 1,870,000       | 9.5 |
| 1890 . . . | 22,870,000  | 2,120,000       | 9.3 |
| 1895 . . . | 28,800,000  | 2,720,000       | 9.4 |

Turning to Industrial Companies the results to insured persons are less favourable:—

| Year       | Premiums<br>£ | Claims<br>£ | Per-<br>centage |
|------------|---------------|-------------|-----------------|
| 1885 . . . | 3,550,000     | 1,370,000   | 38.6            |
| 1890 . . . | 5,030,000     | 2,180,000   | 43.4            |
| 1895 . . . | 6,620,000     | 2,770,000   | 41.8            |

|            | Income<br>£ | Management<br>£ |      |
|------------|-------------|-----------------|------|
| 1885 . . . | 3,690,000   | 1,500,000       | 40.5 |
| 1890 . . . | 5,310,000   | 2,220,000       | 41.9 |
| 1895 . . . | 7,100,000   | 2,920,000       | 41.1 |

It is evident that State insurances would be more beneficial to the public than the present system.

There are also industrial assurances for the working classes, viz. :—

|                    | 1887       | 1893        | Increase   |
|--------------------|------------|-------------|------------|
| Policies . . . . . | 9,146,000  | 13,214,000  | 4,068,000  |
| Amount, £ . . .    | 83,200,000 | 127,300,000 | 44,100,000 |
| Premiums, £ . . .  | 5,040,000  | 5,930,000   | 890,000    |

The average amount of each policy is under £10, the object in most cases being to pay funeral expenses. Children are so often insured in this way that terrible abuses are at times reported in the police courts. Many eminent physicians regard these assurances as causes of child murder and wilful neglect or ill-treatment of the young.

The British Government issues insurances and annuities through the Post-Office and National Debt Office, the returns for 1896 comparing with 1887 thus:—

|                      | Number |       | Amount, £ |         |
|----------------------|--------|-------|-----------|---------|
|                      | 1887   | 1896  | 1887      | 1896    |
| Post-Office . . . .  | 1,416  | 3,633 | 53,400    | 130,800 |
| National Debt Office | 1,000  | 514   | 60,000    | 34,900  |
| Total . . . . .      | 2,416  | 4,147 | 113,400   | 165,700 |

|                      | Receipts, £ |           | Payments, £ |         |
|----------------------|-------------|-----------|-------------|---------|
|                      | 1886        | 1896      | 1886        | 1896    |
| Post-Office . . . .  | 235,000     | 868,000   | 163,000     | 365,000 |
| National Debt Office | 688,000     | 475,000   | ...         | ...     |
| Total . . . .        | 923,000     | 1,343,000 | ...         | ...     |

Annuities issued by the Post-Office in 1896 were for the average amount of £28 a year, say 11 shillings a week: the price paid by insurer averaged £375, so that the annuity averaged 7½ per cent. on the sum paid for it.

## GERMANY

There are three kinds of compulsory insurance, showing in 1894 as follows:—

| Against          | No. Insured | Premiums £ | Shillings per Head |
|------------------|-------------|------------|--------------------|
| Sickness . . . . | 7,107,000   | 5,240,000  | 15.0               |
| Accident . . . . | 18,191,000  | 3,260,000  | 3.6                |
| Old age . . . .  | 11,200,000  | 4,640,000  | 8.3                |

All the above persons were insured in two classes, the total numbers being only 18,200,000. The persons insured against sickness had 46,200,000 days of sickness in 1894, that is, 6½ days each. Those insured against accident had in the same year 6250 killed and 62,430 injured; that is to say, one operative in 3000 was killed, and one in 300 injured or disabled. In a period of twelve years to December 1896, there were 349,000 operatives killed or disabled, which was equivalent to 48 per 10,000, the ratio being higher in manufactures than in agriculture, viz:—

|                                 |                 |
|---------------------------------|-----------------|
| In agricultural labours . . . . | 38.4 per 10,000 |
| In manufactures . . . .         | 67.2 „          |

The number of killed or disabled during the last two years showed thus:—

| Year         | Insured    | Injured | Per 10,000 |
|--------------|------------|---------|------------|
| 1895 . . . . | 18,380,000 | 74,467  | 40.5       |
| 1896 . . . . | 17,620,000 | 85,272  | 48.4       |

Compensation paid for injuries in 1896 was as follows:—

|                       | Insured    | Injured | £         | Average £ |
|-----------------------|------------|---------|-----------|-----------|
| Agricultural . . . .  | 11,190,000 | 54,210  | 630,000   | 12        |
| Manufacturing . . . . | 6,430,000  | 31,062  | 1,940,000 | 63        |
| Total . . . .         | 17,620,000 | 85,272  | 2,570,000 | 30        |

The average paid for injuries to agricultural labourers was low, because they were mostly slight: of 10,000 such labourers only five were killed or permanently disabled; 44 were slightly injured, the total number compensated being 49 per 10,000. The cost of management for both classes was £540,000, or sevenpence a year for each of the persons insured. Hospital and burial expenses amounted to £213,000. The number of widows and orphans receiving pensions was 86,000: a widow's pension ceases if she re-marries. As regards the insurance for old age, there were in 1894 in enjoyment of pension 329,000 persons, being nearly 4 per cent. of the number insured. These pensions summed up £2,300,000, or £7 each, to which the Government adds £5, making in all £12 a year. The company charges for each operative

8 shillings a year, from the age of 20 until 50, 4 shillings from the master, and 4 from the man: the reserve fund on hand in 1894 amounted to £5,850,000 sterling. The cost of management for this section of insurance was £220,000, or sixpence per head yearly.

The premiums are made up as follows, yearly:—

| Paid by            | Sickness £ | Accidents £ | Old Age £ | Total £    |
|--------------------|------------|-------------|-----------|------------|
| Masters . . . .    | 1,500,000  | 3,260,000   | 2,320,000 | 7,080,000  |
| Operatives . . . . | 3,740,000  | ...         | 2,320,000 | 6,060,000  |
| Total . . . .      | 5,240,000  | 3,260,000   | 4,640,000 | 13,140,000 |

Of the total amount collected yearly the masters contribute almost 55 per cent., the men a little more than 45 per cent. The masters find that the burthen on them is £13 to every £1000 paid in wages, that is, about 3 pence to the pound sterling. From this it appears that the employers in Germany pay in wages 544 millions sterling, equal to £30 per head on the number of persons insured, say 12 shillings a week, with 2 pence a week added for insurance. The Companies have, moreover, a certain income from investments of accumulated reserves, the annual receipts and expenditure of all kinds summing up as follows:—

| Class            | Receipts, £ | Outgoings, £ | Reserve, £ |
|------------------|-------------|--------------|------------|
| Sickness . . . . | 6,600,000   | 6,200,000    | 5,500,000  |
| Accident . . . . | 3,900,000   | 3,300,000    | 5,100,000  |
| Old age . . . .  | 5,000,000   | 2,500,000    | 5,900,000  |
| Total . . . .    | 15,500,000  | 12,000,000   | 16,500,000 |

The returns for the Insurance Companies of Miners in Germany during ten years ending December 31, 1894, show as follows:—

|                      | Yearly Average |             |            |
|----------------------|----------------|-------------|------------|
|                      | Collieries     | Other Mines | Total      |
| Men insured . . . .  | 238,000        | 124,000     | 362,000    |
| Wages, £ . . . .     | 10,700,000     | 4,300,000   | 15,000,000 |
| Killed . . . .       | 602            | 170         | 772        |
| Disabled . . . .     | 1,913          | 483         | 2,396      |
| Widows left . . . .  | 380            | 117         | 497        |
| Orphans left . . . . | 1,063          | 304         | 1,367      |

The compensation paid, according to the actuaries' estimates, for capitalising pensions, and including cash payments, averaged as follows:—

|                        | £     | £                     |
|------------------------|-------|-----------------------|
| Person injured . . . . | 94    | Orphan . . . . 53.1   |
| Widow . . . .          | 121.1 | Relative . . . . 90.8 |

The expenditure for such compensation averaged 26 shillings on each coal-miner, and 24 shillings on the number of miners all round. It amounted to 2.8 per cent. of the wages of all miners. The expenses were as follows, including capital of pensions:—

| For               | Yearly Average |           |               |
|-------------------|----------------|-----------|---------------|
|                   | Colliers, £    | Others, £ | All Miners, £ |
| Sickness . . . .  | 72,000         | 17,000    | 89,000        |
| Funeral . . . .   | 43,000         | 54,000    | 97,000        |
| Pensions . . . .  | 125,000        | 27,000    | 152,000       |
| Widows, &c. . . . | 70,000         | 17,000    | 87,000        |
| Total . . . .     | 310,000        | 115,000   | 425,000       |

## FRANCE

The returns are incomplete, but 19 principal companies showed in 1896 as follows (amount of fire and maritime policies estimated from sums paid for premium):—

|                    | Premiums, £ | Policies, £   | Do. Paid, £ |
|--------------------|-------------|---------------|-------------|
| Life . . . . .     | ...         | 139,000,000   | 2,100,000   |
| Fire . . . . .     | 4,040,000   | 4,440,000,000 | 2,100,000   |
| Maritime . . . . . | 800,000     | 200,000,000   | 740,000     |
| Total . . . . .    | ...         | 4,779,000,000 | ...         |

The death-rate of the life insurance offices, or rather the payments on policies of persons who died, compared with amount of policies running, was as follows:—

|                   |                |
|-------------------|----------------|
| 1886-90 . . . . . | 1.52 per cent. |
| 1891-95 . . . . . | 1.57 " "       |

Payments on losses by fire compared with amount received as premium thus:—

|                |                |
|----------------|----------------|
| 1886 . . . . . | 56.8 per cent. |
| 1890 . . . . . | 53.3 " "       |
| 1895 . . . . . | 51.8 " "       |

There is also insurance against hail-storms, premiums £130,000, payments for losses £120,000.

## AUSTRIA

In 1894 the insurance of operatives showed thus:—

| Against            | Number Insured | Premiums £ | Shillings per Head |
|--------------------|----------------|------------|--------------------|
| Sickness . . . . . | 1,940,000      | 1,200,000  | 12.4               |
| Accident . . . . . | 1,470,000      | 380,000    | 5.2                |
| Total . . . . .    | 3,410,000      | 1,580,000  | 9.3                |

The persons insured against sickness had 15,600,000 days of sickness, or 8 days each, as compared with 6½ in Germany. Those against accident had 10,900 killed or disabled, being 74 per 10,000, against 48 in Germany.

## VARIOUS COUNTRIES

The amount of life insurance in various countries in 1890 compared with 1880 as follows, excluding the policies of workmen:—

|                          | Millions £ Sterling |       |          | 1890<br>Number<br>of Policies |
|--------------------------|---------------------|-------|----------|-------------------------------|
|                          | 1880                | 1890  | Increase |                               |
| United States . . . . .  | 312                 | 636   | 324      | 2,410,000                     |
| United Kingdom . . . . . | 422                 | 442   | 20       | 1,150,000                     |
| Germany . . . . .        | 127                 | 189   | 62       | 760,000                       |
| France . . . . .         | 87                  | 122   | 35       | 290,000                       |
| Austria . . . . .        | 20                  | 34    | 14       | ...                           |
| Various . . . . .        | 22                  | 27    | 5        | ...                           |
| Total . . . . .          | 990                 | 1,450 | 460      | ...                           |

This shows an increase of 46 per cent. in 10 years. According to Bellour, in 1894 the life insurance business of the world stood thus:—

|                         | Millions £ Sterling |        | Ratio<br>of Assets |
|-------------------------|---------------------|--------|--------------------|
|                         | Policies            | Assets |                    |
| United States . . . . . | 980                 | 182    | 18.6               |
| Great Britain . . . . . | 573                 | 115    | 20.1               |
| Continent . . . . .     | 498                 | 140    | 28.1               |
| Canada . . . . .        | 31                  | 5      | 16.0               |
| Australia . . . . .     | 68                  | 20     | 29.5               |
| Total . . . . .         | 2,150               | 462    | 21.5               |

Germany had 940,000 life policies, amounting to 205

millions sterling. The amount set down for Canada was only that of policies issued by native companies.

## AUSTRALIA

The largest share of life assurance is done by the Australian Mutual Company, the business in 1895 showing:—

|                           | Mutual     | Various    | Total      |
|---------------------------|------------|------------|------------|
| No. of Policies . . . . . | 123,752    | 179,862    | 303,614    |
| Amount, £ . . . . .       | 39,940,000 | 47,840,000 | 87,780,000 |
| Premiums, £ . . . . .     | 1,310,000  | 1,620,000  | 2,930,000  |
| Assets, £ . . . . .       | 13,710,000 | 10,700,000 | 24,410,000 |

The average amount of life assurance running was £287, against £336 in Canada.

## UNITED STATES

Life insurance returns by census of 1890 compare with those of 1879 as follows:—

|                         | £ Sterling (000 omitted) |        |             |         |        |         |
|-------------------------|--------------------------|--------|-------------|---------|--------|---------|
|                         | Receipts                 |        | Liabilities |         | Assets |         |
|                         | 1879                     | 1889   | 1879        | 1889    | 1879   | 1889    |
| New York . . . . .      | 8,800                    | 23,900 | 37,000      | 74,000  | 43,800 | 85,600  |
| Connecticut . . . . .   | 3,800                    | 3,500  | 18,700      | 21,300  | 21,600 | 24,000  |
| Pennsylvania . . . . .  | 1,900                    | 700    | 3,100       | 9,300   | 3,800  | 10,800  |
| Massachusetts . . . . . | 1,000                    | 2,200  | 5,200       | 8,400   | 6,300  | 9,600   |
| Various . . . . .       | 1,800                    | 7,400  | 14,000      | 22,200  | 16,500 | 24,000  |
| The Union . . . . .     | 17,300                   | 37,700 | 78,000      | 135,200 | 92,000 | 154,000 |

Fire and transport insurance showed as follows:—

| States                | Millions £ Sterling |       |          |
|-----------------------|---------------------|-------|----------|
|                       | 1879                | 1889  | Increase |
| New England . . . . . | 402                 | 669   | 267      |
| Middle . . . . .      | 1,044               | 1,738 | 694      |
| South . . . . .       | 61                  | 92    | 31       |
| Prairie . . . . .     | 257                 | 446   | 189      |
| Pacific . . . . .     | 20                  | 86    | 66       |
| Union . . . . .       | 1,784               | 3,031 | 1,247    |
| Foreign . . . . .     | 354                 | 857   | 503      |
| Total . . . . .       | 2,138               | 3,888 | 1,750    |

The States that show largest amounts insured are:—

|                         | Millions £ |       | £ per<br>Inhab. |
|-------------------------|------------|-------|-----------------|
|                         | 1879       | 1889  |                 |
| New York . . . . .      | 628        | 1,116 | 186             |
| Pennsylvania . . . . .  | 297        | 491   | 93              |
| Connecticut . . . . .   | 173        | 301   | 401             |
| Massachusetts . . . . . | 169        | 218   | 98              |
| Illinois . . . . .      | 54         | 102   | 27              |
| Rhode Island . . . . .  | 41         | 97    | 276             |
| Ohio . . . . .          | 87         | 83    | 23              |

The general average of property insured in 1889 was £48 per inhabitant of the whole Union.

## CANADA

Fire insurance is done by native, British, and American companies, the aggregate of which shows as follows:—

|                | Premiums, £ | Losses, £ | Loss Ratio |
|----------------|-------------|-----------|------------|
| 1870 . . . . . | 380,000     | 325,000   | 84.8       |
| 1880 . . . . . | 700,000     | 330,000   | 47.9       |
| 1890 . . . . . | 1,170,000   | 650,000   | 55.0       |
| 1896 . . . . . | 1,410,000   | 830,000   | 58.7       |

The returns for 1896, compared with the average for 28 years, show thus :—

| Companies      | Premiums, £ |         | Losses, £ |         | Loss Ratio |         |
|----------------|-------------|---------|-----------|---------|------------|---------|
|                | 1896        | 1869-96 | 1896      | 1869-96 | 1896       | 1869-96 |
| Native . . .   | 210,000     | 230,000 | 140,000   | 160,000 | 67.0       | 71.5    |
| British . . .  | 1,000,000   | 580,000 | 570,000   | 400,000 | 57.0       | 68.2    |
| American . . . | 200,000     | 90,000  | 120,000   | 60,000  | 60.0       | 66.7    |
| Total . . .    | 1,410,000   | 900,000 | 830,000   | 620,000 | 58.7       | 69.0    |

Life insurance was as follows :—

| Companies      | Lives  |         | Amount, £  |            |
|----------------|--------|---------|------------|------------|
|                | 1886   | 1896    | 1886       | 1896       |
| Native . . .   | 52,601 | 121,817 | 17,600,000 | 38,500,000 |
| British . . .  | 13,454 | 17,538  | 5,500,000  | 7,000,000  |
| American . . . | 31,927 | 50,379  | 11,100,000 | 18,600,000 |
| Total . . .    | 97,982 | 189,734 | 34,200,000 | 64,100,000 |

The receipts as premiums for life insurance and the sums paid to policy holders showed as follows :—

| Year           | Premiums, £ | Payments, £ |
|----------------|-------------|-------------|
| 1890 . . . . . | 1,600,000   | 900,000     |
| 1892 . . . . . | 1,800,000   | 1,100,000   |
| 1895 . . . . . | 2,120,000   | 1,170,000   |

The increase of business is shown thus, as regards premiums :—

|                     | 1886<br>£ | 1896<br>£ |
|---------------------|-----------|-----------|
| Fire . . . . .      | 980,000   | 1,410,000 |
| Life . . . . .      | 1,040,000 | 2,120,000 |
| Marine, &c. . . . . | 180,000   | 470,000   |
| Total . . . . .     | 2,200,000 | 4,000,000 |

Life insurance in 1895 showed 3078 deaths, out of 278,000 persons insured, being at the rate of 11 per thousand.

## IRON

Production of pig iron increased 50 per cent. in 10 years, viz. :—

|                     | Tons       |            |           |
|---------------------|------------|------------|-----------|
|                     | 1885       | 1895       | Increase  |
| United States . . . | 4,040,000  | 9,450,000  | 5,410,000 |
| Great Britain . . . | 7,420,000  | 8,020,000  | 600,000   |
| Germany . . . . .   | 3,690,000  | 5,790,000  | 2,100,000 |
| France . . . . .    | 1,630,000  | 2,010,000  | 380,000   |
| Austria . . . . .   | 610,000    | 930,000    | 320,000   |
| Russia . . . . .    | 520,000    | 1,410,000  | 890,000   |
| Belgium . . . . .   | 670,000    | 830,000    | 160,000   |
| Sweden . . . . .    | 430,000    | 500,000    | 70,000    |
| Various . . . . .   | 330,000    | 360,000    | 30,000    |
| The World . . . . . | 19,340,000 | 29,300,000 | 9,960,000 |

Production of iron in the United States has been as follows :—

|                      | Tons      |           |           |
|----------------------|-----------|-----------|-----------|
|                      | 1885      | 1895      | Increase  |
| Pennsylvania . . .   | 2,180,000 | 4,700,000 | 2,520,000 |
| Southern States . .  | 620,000   | 1,690,000 | 1,070,000 |
| Western States . . . | 1,240,000 | 3,060,000 | 1,820,000 |
| Total . . . . .      | 4,040,000 | 9,450,000 | 5,410,000 |

The production of steel increased 135 per cent. in the same interval, viz. :—

|                     | Tons      |            |           |
|---------------------|-----------|------------|-----------|
|                     | 1885      | 1895       | Increase  |
| United States . . . | 1,710,000 | 6,110,000  | 4,400,000 |
| Great Britain . . . | 1,920,000 | 3,880,000  | 1,960,000 |
| Germany . . . . .   | 1,140,000 | 2,160,000  | 1,020,000 |
| France . . . . .    | 530,000   | 810,000    | 280,000   |
| Austria . . . . .   | 200,000   | 500,000    | 300,000   |
| Russia . . . . .    | 250,000   | 380,000    | 130,000   |
| Belgium . . . . .   | 160,000   | 220,000    | 60,000    |
| Sweden . . . . .    | 40,000    | 170,000    | 130,000   |
| Various . . . . .   | 250,000   | 370,000    | 120,000   |
| The World . . . . . | 6,200,000 | 14,600,000 | 8,400,000 |

The production and consumption of iron in 1896 were in English tons as follows :—

|                       | Production | Consumption |
|-----------------------|------------|-------------|
| United Kingdom . . .  | 8,660,000  | 5,010,000   |
| France . . . . .      | 2,340,000  | 2,330,000   |
| Germany . . . . .     | 6,370,000  | 5,600,000   |
| Russia . . . . .      | 1,550,000  | 1,950,000   |
| Austria . . . . .     | 1,000,000  | 1,120,000   |
| Italy . . . . .       | 200,000    | 300,000     |
| Spain . . . . .       | 200,000    | 300,000     |
| Scandinavia . . . . . | 500,000    | 450,000     |
| Belgium . . . . .     | 950,000    | 430,000     |
| United States . . . . | 9,450,000  | 9,500,000   |
| Other Countries . . . | 380,000    | 4,310,000   |
| Total . . . . .       | 31,600,000 | 31,600,000  |

## GREAT BRITAIN

The output of pig iron, and the value of iron and steel manufactures at various dates, are shown thus :—

| Year           | Iron Tons | Value, Millions £ |             |          |
|----------------|-----------|-------------------|-------------|----------|
|                |           | Manufac-<br>tures | Home<br>Use | Exported |
| 1860 . . . . . | 3,830,000 | 52                | 30          | 22       |
| 1870 . . . . . | 5,960,000 | 82                | 45          | 37       |
| 1880 . . . . . | 7,750,000 | 101               | 57          | 44       |
| 1890 . . . . . | 7,900,000 | 116               | 59          | 57       |
| 1896 . . . . . | 8,660,000 | 119               | 68          | 51       |

The average output for each blast-furnace was as follows :—

| Year           | Tons   |
|----------------|--------|
| 1870 . . . . . | 9,000  |
| 1885 . . . . . | 18,000 |
| 1894 . . . . . | 22,300 |

The details of the iron and steel industry in 1896 may be summed up thus:—

| Used as     | Tons      | Destination  | Tons      |
|-------------|-----------|--------------|-----------|
| Steel . . . | 4,130,000 | Exported . . | 3,650,000 |
| Iron . . .  | 4,530,000 | Home use . . | 5,010,000 |
| Total . .   | 8,660,000 | Total . .    | 8,660,000 |

The value was approximately as follows:—

|                             |             |
|-----------------------------|-------------|
| Iron and steel exported . . | 23,800,000  |
| Machinery . . . . .         | 16,100,000  |
| Cutlery, arms, &c. . . .    | 11,300,000  |
| Exports . . . . .           | 51,200,000  |
| Home articles . . . . .     | 67,500,000  |
| Total output, value . .     | 118,700,000 |

It needs 6 tons of pig iron to make 5 tons of steel, and 4 of iron to make 3 of railway bars. As a rule one mile of railway takes 270 tons of rails.

Although the weight of metal retained for British manufactures in 1896 was 5,010,000 tons, it appears that one-tenth of this quantity was subsequently exported as cutlery, machinery, &c., leaving for home use 4,500,000 tons. The goods manufactured herefrom, at an estimate of £15 per ton, would represent £67,500,000, or 56 per cent. of the total industry, and the home consumption of such goods is equal to 34 shillings per inhabitant. If we deduct the iron and steel exported in bars, &c., the remaining 5,000,000 tons are manufactured into goods of the approximate value of £93,000,000, or nearly £19 per ton. This shows that iron and steel goods are much cheaper here than in other countries. The official value per ton of such goods in 1892 was as follows:—

|                   |    |                   |    |
|-------------------|----|-------------------|----|
| Germany . . . . . | 34 | Austria . . . . . | 45 |
| Holland . . . . . | 36 | Italy . . . . .   | 45 |
| Sweden . . . . .  | 45 | Spain . . . . .   | 57 |

Iron and steel exports from Great Britain were as follows:—

| Year           | In Bar<br>£ | Manufactures<br>£ | Total<br>£ |
|----------------|-------------|-------------------|------------|
| 1860 . . . . . | 12,200,000  | 9,900,000         | 22,100,000 |
| 1870 . . . . . | 24,100,000  | 12,600,000        | 36,700,000 |
| 1880 . . . . . | 28,400,000  | 15,400,000        | 43,800,000 |
| 1890 . . . . . | 31,600,000  | 25,100,000        | 56,700,000 |
| 1896 . . . . . | 23,800,000  | 27,400,000        | 51,200,000 |
| 1897 . . . . . | 24,600,000  | 24,100,000        | 48,700,000 |

#### UNITED STATES

Production, imports, and consumption of pig iron show thus:—

| Year           | Tons       |          |            |
|----------------|------------|----------|------------|
|                | Product    | Imported | Consumed   |
| 1877 . . . . . | 2,070,000  | 50,000   | 2,120,000  |
| 1887 . . . . . | 5,680,000  | 420,000  | 6,100,000  |
| 1892 . . . . . | 8,280,000  | 70,000   | 8,350,000  |
| 1893 . . . . . | 9,160,000  | 40,000   | 9,200,000  |
| 1894 . . . . . | 7,120,000  | ...      | 7,120,000  |
| 1895 . . . . . | 6,660,000  | ...      | 6,660,000  |
| 1896 . . . . . | 9,450,000  | 50,000   | 9,500,000  |
| 1898 . . . . . | 11,670,000 | ...      | 12,020,000 |

In 1898 consumption exceeded production, the stock remaining from previous years having been drawn upon.

#### VARIOUS COUNTRIES

The imports of iron in the following European countries were:—

|                       | Tons    |           |
|-----------------------|---------|-----------|
|                       | 1885    | 1896      |
| Russia . . . . .      | 230,000 | 410,000   |
| Austria . . . . .     | 50,000  | 140,000   |
| Italy . . . . .       | 60,000  | 130,000   |
| Denmark . . . . .     | 50,000  | 110,000   |
| Switzerland . . . . . | 40,000  | 190,000   |
| Spain . . . . .       | 70,000  | 60,000    |
| Portugal . . . . .    | 40,000  | 40,000    |
| Norway . . . . .      | 30,000  | 30,000    |
| Total . . . . .       | 570,000 | 1,110,000 |

Exports of the principal countries were as follows:—

|                         | Tons      |           |
|-------------------------|-----------|-----------|
|                         | 1885      | 1896      |
| Great Britain . . . . . | 3,130,000 | 3,650,000 |
| Germany . . . . .       | 320,000   | 510,000   |
| Belgium . . . . .       | 340,000   | 440,000   |
| Sweden . . . . .        | 40,000    | 80,000    |
| Total . . . . .         | 3,830,000 | 4,680,000 |

So many improvements have taken place that a ton of iron is now produced with 1½ ton of coal, whereas it took 8 tons of coal in 1791. So rapid is the process in use that iron ore can be landed at Cardiff, and converted into steel-plates in 48 hours. Iron is now much used for building, as at Astor's Hotel, New York, 16 storeys, in which 10,000 tons are employed: the skeleton of an iron hotel of 13 storeys was run up at Chicago in 25 days. See *Iron*, pp. 332-37; also *Manufactures*, p. 767.

#### IRRIGATION

The quantity of water ordinarily required per acre for irrigation is:—

| Culture          | Gallons<br>per Minute | Hours<br>each Time | Tons<br>per Month |
|------------------|-----------------------|--------------------|-------------------|
| Meadow . . . . . | 150                   | 6                  | 1,100             |
| Grain . . . . .  | ...                   | ...                | 800               |
| Garden . . . . . | 12                    | ...                | 700               |

Meadow must be irrigated 4 days, grain 3 days, gardens 30 days, monthly. Irrigation for vineyards is estimated at 250 tons weekly per hectare, equal to 400 tons a month per acre. According to Messrs. Lawes and Gilbert, an acre of wheat evaporates 60 tons of water monthly.

Latest returns of irrigated areas and the annual cost per acre are as follows:—

|                         | Shillings<br>per Acre |     |
|-------------------------|-----------------------|-----|
|                         | Acres                 |     |
| India . . . . .         | 25,000,000            | 8   |
| Egypt . . . . .         | 5,100,000             | 4   |
| Italy . . . . .         | 2,800,000             | 16  |
| Spain . . . . .         | 2,000,000             | 14  |
| France . . . . .        | 600,000               | 22  |
| United States . . . . . | 5,000,000             | ... |
| Australia . . . . .     | 120,000               | ... |

The charge for irrigation in Italy is measured by the "bocca," which is a supply of 480 gallons per minute.

The Cavour canal charges 36 shillings a year for a constant supply of 12 gallons a minute all the year round: a "bocca" would, therefore, cost £72 a year and suffice to irrigate 90 acres. Irrigated lands in France produce 25 per cent. heavier crops. Works are now in progress in Upper Egypt to extend the irrigated area of the Nile valley by 200,000 acres. Messrs. Aird signed a contract in January 1898 for constructing a breakwater at Assouan, 2000 yards long, which will hold 19 billion tons of water, and permit the discharge of Nile water in excessive flood at 14,000 tons per second: to be completed in 5 years, cost £2,000,000. The area to be irrigated will add £2,300,000 to the value of agricultural products, and £400,000 to revenue yearly.

For drainage and irrigation Holland has 1,900,000 miles of canals, big and little, being an average of 420 yards of canal for each acre of farm-lands.

See *Irrigation*, page 337.

## ISLANDS

The area of the principal islands is as follows:—

|                       | Sq. Miles |                 | Sq. Miles |
|-----------------------|-----------|-----------------|-----------|
| New Guinea . . .      | 303,000   | Formosa . . .   | 15,000    |
| Borneo . . .          | 284,000   | Sicily . . .    | 9,800     |
| Madagascar . . .      | 227,000   | Jamaica . . .   | 4,200     |
| Sumatra . . .         | 162,000   | Cyprus . . .    | 3,600     |
| Great Britain . . .   | 83,700    | Corsica . . .   | 3,400     |
| Celebes . . .         | 68,800    | Crete . . .     | 2,900     |
| Java . . .            | 48,400    | Trinidad . . .  | 1,750     |
| Cuba . . .            | 45,000    | Teneriffe . . . | 1,010     |
| Newfoundland . . .    | 40,200    | Mauritius . . . | 710       |
| Iceland . . .         | 39,800    | Madeira . . .   | 510       |
| Ireland . . .         | 32,600    | Corfu . . .     | 430       |
| Hayti . . .           | 28,800    | Man . . .       | 230       |
| Tasmania . . .        | 26,200    | Malta . . .     | 100       |
| Ceylon . . .          | 24,700    | Jersey . . .    | 45        |
| Terra del Fuego . . . | 18,500    | Hong-Kong . . . | ~         |

## J

### JEWS

See page 338; also *Religion*, page 799.

### JEWELLERY

See page 338.

### JUTE

Exports of raw jute from India have more than doubled in twenty years, viz:—

| Year       | Tons    | Value, £  | £ per Ton |
|------------|---------|-----------|-----------|
| 1876 . . . | 260,000 | 2,500,000 | 9.6       |
| 1886 . . . | 390,000 | 3,300,000 | 8.5       |
| 1896 . . . | 610,000 | 5,500,000 | 9.0       |

The area under jute cultivation in 1896 was 2,250,000 acres, the ordinary crop being 900 lbs. per acre, and the product about 900,000 tons. There are in India 28 jute mills, employing 80,000 operatives, with 11,000 looms and 220,000 spindles, which consume 250,000 tons of jute per annum. Indian exports of jute manufactures rose from £800,000 in 1886 to £2,600,000 in 1896.

Jute manufacture in the United Kingdom shows:—

| Year       | Tons Jute | Output, £  | Exported, £ |
|------------|-----------|------------|-------------|
| 1884 . . . | 170,000   | 9,100,000  | 2,800,000   |
| 1890 . . . | 260,000   | 13,000,000 | 3,000,000   |
| 1896 . . . | 240,000   | 11,100,000 | 2,600,000   |

Dundee is the principal seat of this industry. The factories of jute in the United Kingdom have trebled their power since 1870, viz:—

| Year       | Spindles | Power-Looms | Operatives |
|------------|----------|-------------|------------|
| 1870 . . . | 115,000  | 4,000       | 18,000     |
| 1890 . . . | 280,000  | 14,000      | 45,000     |

France consumes 55,000 tons of raw jute yearly, producing goods worth more than £2,000,000; Austria a like quantity. The imports of raw jute into the United States from 1888 to 1896 averaged 95,000 tons yearly. The world at present consumes nearly 900,000 tons, and the goods manufactured are approximately of the value of 35 millions sterling per annum. For details of earlier years see Part I., page 339.

### KINGS

See Part I., page 340; also page 762.

## L

### LAND

The following is a record (*Times*, April 1889) of all landed estates over 30 acres sold by auction in London, situate in England and Wales, from 1781 to 1880:—

| Period          | Acres   | Rental, £ | Price, £   | £ per Acre |
|-----------------|---------|-----------|------------|------------|
| 1781-1800 . . . | 72,000  | 76,000    | 2,430,000  | 33.8       |
| 1801-1820 . . . | 136,000 | 152,000   | 4,920,000  | 36.2       |
| 1821-1840 . . . | 246,000 | 221,000   | 5,830,000  | 23.7       |
| 1841-1860 . . . | 189,000 | 261,000   | 6,880,000  | 36.4       |
| 1861-1870 . . . | 122,000 | 153,000   | 5,250,000  | 43.0       |
| 1871-1880 . . . | 109,000 | 163,000   | 5,590,000  | 51.3       |
| 100 years . . . | 874,000 | 1,026,000 | 30,900,000 | 35.1       |

A similar record was published in 1897, for 3 years ending December 1896, showing 125,500 acres sold for

£3,300,000, being at the rate of £26, 10s. per acre, a fall of 49 per cent. from the price of 1871-80.

According to a parliamentary report (1896) the productive area of the island of Great Britain was 32,580,000 acres, and the change of tenure since 1835 is shown thus:—

| Acres          | Number of Farms |         | Difference |
|----------------|-----------------|---------|------------|
|                | 1885            | 1895    |            |
| 1-5 . . .      | 135,000         | 118,000 | -17,000    |
| 5-50 . . .     | 233,000         | 235,000 | +2,000     |
| 50-100 . . .   | 65,000          | 67,000  | +2,000     |
| 100-500 . . .  | 94,000          | 94,800  | +800       |
| Over 500 . . . | 6,000           | 5,200   | -800       |
| Total . . .    | 533,000         | 520,000 | -13,000    |

| Farms                | Area, Acres |            |
|----------------------|-------------|------------|
|                      | 1885        | 1895       |
| Under 50 acres . . . | 4,800,000   | 4,900,000  |
| 50-100 acres . . .   | 4,600,000   | 4,900,000  |
| Over 100 acres . . . | 23,000,000  | 22,800,000 |
| Total . . .          | 32,400,000  | 32,600,000 |

For Ireland, see page 341.

Assessments of land in the three kingdoms compare :—

|                      | 1886<br>£  | 1896<br>£  |
|----------------------|------------|------------|
| England . . . . .    | 40,200,000 | 39,370,000 |
| Scotland . . . . .   | 5,600,000  | 6,150,000  |
| Ireland . . . . .    | 8,630,000  | 9,890,000  |
| United Kingdom . . . | 54,430,000 | 55,410,000 |

In Ireland rents have been reduced by the Commissioners 20 per cent. since 1880, the rental in 1895 standing thus :—

|                     | £ Sterling (000 omitted) |          |             |        |
|---------------------|--------------------------|----------|-------------|--------|
|                     | Old rent                 | Judicial | Un-reformed | Total  |
| Ulster . . . . .    | 1,910                    | 1,540    | 1,270       | 2,810  |
| Leinster . . . . .  | 1,620                    | 1,290    | 1,930       | 3,220  |
| Connaught . . . . . | 760                      | 600      | 680         | 1,280  |
| Munster . . . . .   | 1,690                    | 1,310    | 1,610       | 2,920  |
| Total . . . . .     | 5,980                    | 4,740    | 5,490       | 10,230 |

In the United States the census of 1890 compared with that of 1860 thus :—

|                     | 1860      | 1890      | Increase  |
|---------------------|-----------|-----------|-----------|
| Farmers . . . . .   | 1,850,000 | 5,282,000 | 3,432,000 |
| Labourers . . . . . | 1,509,000 | 3,038,000 | 1,529,000 |
| Total . . . . .     | 3,359,000 | 8,320,000 | 4,961,000 |

As to manner of holding land, the census of 1890 shows that the ratio of farms cultivated by the owner is declining, while that of tenants rapidly increases: there are two kinds of tenancy, that of a fixed money rental, and that of sharing profits on the system known in France as Metayer: the figures for 1880 and 1890 were :—

| Worked by         | Number of Farms |           | Ratio |       |
|-------------------|-----------------|-----------|-------|-------|
|                   | 1880            | 1890      | 1880  | 1890  |
| Owner . . . . .   | 2,984,000       | 3,270,000 | 74.4  | 71.5  |
| Tenant . . . . .  | 323,000         | 455,000   | 8.1   | 10.0  |
| Metayer . . . . . | 702,000         | 840,000   | 17.5  | 18.5  |
| Total . . . . .   | 4,009,000       | 4,565,000 | 100.0 | 100.0 |

The price of land in various sections of the Union shows as follows :—

| States               | \$ per Acre |      |      |
|----------------------|-------------|------|------|
|                      | 1850        | 1880 | 1890 |
| New England . . . .  | 34          | 44   | 46   |
| Middle . . . . .     | 45          | 65   | 63   |
| Southern . . . . .   | 20          | 21   | 23   |
| Prairie . . . . .    | 28          | 37   | 38   |
| Pacific . . . . .    | ...         | 25   | 48   |
| Union, average . . . | 29          | 36   | 37   |

## LAND-TENURE AND LAND-TAXES

See pages 341-352.

## LANGUAGE

See page 352.

## LAW COURTS

The total number of lawsuits in the superior and inferior courts of England and Wales, since 1859, is given by Dr. John MacDonell, Master, as follows :—

| Period            | Average Suits Yearly |           |           |
|-------------------|----------------------|-----------|-----------|
|                   | Superior             | Inferior  | Total     |
| 1859-66 . . . . . | 113,000              | 837,000   | 950,000   |
| 1867-74 . . . . . | 83,000               | 959,000   | 1,042,000 |
| 1875-82 . . . . . | 94,000               | 1,065,000 | 1,159,000 |
| 1883-90 . . . . . | 83,000               | 1,064,000 | 1,147,000 |
| 1891-92 . . . . . | 82,000               | 1,115,000 | 1,197,000 |

Taking the number of barristers, solicitors, and law-clerks at each census of England and Wales, and comparing it with lawsuits, we find the amount of work to each was as follows :—

| Period            | Lawyers | Lawsuits  | Per Lawyer |
|-------------------|---------|-----------|------------|
| 1859-66 . . . . . | 34,990  | 950,000   | 27         |
| 1867-74 . . . . . | 37,330  | 1,042,000 | 28         |
| 1875-82 . . . . . | 43,640  | 1,159,000 | 27         |
| 1883-92 . . . . . | 47,520  | 1,157,000 | 24         |

The supply of lawyers seems to exceed the demand, the average to each being now only 24 suits a year, which shows a relative fall of 11 per cent. since 30 years ago. Comparing the above figures with population, we find the number of suits and lawyers showed thus :—

| Period            | Per 100,000 Inhabitants |         |
|-------------------|-------------------------|---------|
|                   | Lawsuits                | Lawyers |
| 1859-66 . . . . . | 4,750                   | 175     |
| 1867-82 . . . . . | 4,580                   | 170     |
| 1883-92 . . . . . | 4,130                   | 170     |

This shows that the spirit of litigation, as represented by the number of lawsuits, has declined 13 per cent. in the last 30 years.

For criminal cases, see *Crime*, pages 162 and 679.

## LEAD

Production has increased 50 per cent. in eight years, viz :—

|                       | Tons    |         |          |
|-----------------------|---------|---------|----------|
|                       | 1888    | 1896    | Increase |
| United States . . . . | 160,000 | 170,000 | 10,000   |
| Spain . . . . .       | 84,000  | 170,000 | 86,000   |
| Germany . . . . .     | 92,000  | 110,000 | 18,000   |
| Great Britain . . . . | 38,000  | 30,000  | ...      |
| Various . . . . .     | 83,000  | 200,000 | 117,000  |
| Total . . . . .       | 457,000 | 680,000 | 223,000  |

In 1896 Australia produced 65,000, Mexico 50,000, tons.

The above is the weight of metallic lead produced, 100 tons of mineral giving usually 70 tons of metal. The price of pig lead has been as follows per ton :—

| Year       | £    | Year       | £    | Year       | £    |
|------------|------|------------|------|------------|------|
| 1882 . . . | 14.4 | 1888 . . . | 13.9 | 1893 . . . | 9.9  |
| 1885 . . . | 11.2 | 1890 . . . | 13.2 | 1896 . . . | 11.1 |

Great Britain imports 150,000 tons yearly, and exports 60,000. The Spanish lead mines gave as follows :—

| Year           | Tons, Ore | Value, £  |
|----------------|-----------|-----------|
| 1892 . . . . . | 310,000   | 1,050,000 |
| 1895 . . . . . | 305,000   | 1,400,000 |

## LEATHER

The production and consumption of all kinds of hides and skins (exclusive of furs), and the equivalent in leather, are approximately as follows :—

|                     | Tons Hides |             | Tons Leather Consumed |
|---------------------|------------|-------------|-----------------------|
|                     | Production | Consumption |                       |
| U. Kingdom . . .    | 102,000    | 196,000     | 118,000               |
| France . . . . .    | 105,000    | 150,000     | 90,000                |
| Germany . . . . .   | 133,000    | 220,000     | 132,000               |
| Russia . . . . .    | 237,000    | 190,000     | 114,000               |
| Austria . . . . .   | 110,000    | 133,000     | 80,000                |
| Italy . . . . .     | 37,000     | 53,000      | 32,000                |
| Other States . . .  | 150,000    | 180,000     | 107,000               |
| Europe . . . . .    | 874,000    | 1,122,000   | 673,000               |
| U. States . . . . . | 420,000    | 510,000     | 306,000               |
| Australia . . . . . | 227,000    | 120,000     | 72,000                |
| Argentina, &c. . .  | 389,000    | 158,000     | 95,000                |
| Total . . . . .     | 1,910,000  | 1,910,000   | 1,146,000             |

Production and consumption of leather manufactures show approximately thus :—

|                         | Output Millions £ | Consumption |                    |
|-------------------------|-------------------|-------------|--------------------|
|                         |                   | Millions £  | Shillings per Head |
| United Kingdom . . .    | 59                | 56          | 30                 |
| France . . . . .        | 45                | 37          | 20                 |
| Germany . . . . .       | 65                | 60          | 12                 |
| Russia . . . . .        | 57                | 57          | 10                 |
| Austria . . . . .       | 40                | 39          | 18                 |
| Italy . . . . .         | 16                | 16          | 10                 |
| Spain . . . . .         | 14                | 13          | 15                 |
| Other States . . . . .  | 39                | 39          | 16                 |
| Europe . . . . .        | 336               | 317         | 17                 |
| United States . . . . . | 106               | 108         | 30                 |
| Total . . . . .         | 442               | 425         | 19                 |

The estimate of British leather manufactures at page 354 is 10 per cent. too low as regards value.

## LEGACY AND PROBATE

See page 354; also *Death-duties*, page 689.

## LIBRARIES

See Part I., page 355.

## LIFE

The value of life in persons devoted to science is shown by the returns of Fellows of the Royal Society from 1848 to 1891, viz :—

| Term              | Average        |                 | Survivors in 1891 | Average Age |
|-------------------|----------------|-----------------|-------------------|-------------|
|                   | No. of Fellows | Age at Election |                   |             |
| 1848-57 . . . . . | 715            | 42              | 39                | 75          |
| 1858-67 . . . . . | 614            | 43              | 67                | 67          |
| 1868-77 . . . . . | 536            | 45              | 111               | 61          |
| 1878-87 . . . . . | 481            | 45              | 138               | 53          |
| 1888-91 . . . . . | 466            | 46              | 46                | 48          |
| 1848-91 . . . . . | 575            | 44              | 401               | 59          |

## FRANCE

According to Turquand, the span of life in France is now 7 years longer than it was 60 years ago :—

| Period            | Span of Life |        | Die under 20 per 1000 born |
|-------------------|--------------|--------|----------------------------|
|                   | Years        | Months |                            |
| 1821-40 . . . . . | 33           | 0      | 394                        |
| 1841-60 . . . . . | 36           | 0      | 389                        |
| 1861-76 . . . . . | 36           | 10     | 376                        |
| 1877-90 . . . . . | 40           | 2      | 370                        |

## UNITED STATES

Dr. Billings's tables of the expectation of life in the city of Baltimore (1886), compiled from the census returns of 1880, show the difference between white and coloured people at all ages as follows :—

| Age          | Years to Live |        |          |        |
|--------------|---------------|--------|----------|--------|
|              | White         |        | Coloured |        |
|              | Male          | Female | Male     | Female |
| 1 . . . . .  | 44.7          | 47.4   | 32.2     | 38.4   |
| 5 . . . . .  | 50.5          | 53.0   | 41.8     | 46.8   |
| 10 . . . . . | 48.5          | 50.8   | 40.1     | 44.8   |
| 15 . . . . . | 44.4          | 46.6   | 36.8     | 42.0   |
| 20 . . . . . | 40.4          | 42.7   | 33.8     | 39.5   |
| 25 . . . . . | 36.9          | 39.3   | 31.0     | 36.3   |
| 30 . . . . . | 33.5          | 36.0   | 27.8     | 33.5   |
| 40 . . . . . | 26.7          | 29.4   | 21.7     | 27.6   |
| 50 . . . . . | 20.0          | 22.6   | 16.3     | 21.6   |
| 60 . . . . . | 14.1          | 16.0   | 11.3     | 15.5   |
| 70 . . . . . | 10.1          | 10.4   | 7.8      | 9.9    |
| 80 . . . . . | 7.4           | 6.9    | 6.3      | 6.5    |
| 85 . . . . . | 6.2           | 5.8    | 5.9      | 5.6    |

Taking all inhabitants, without distinction of colour or sex, the expectation of life in other cities of the Union is :—

| Age          | Years to Live |              |        |         |           |
|--------------|---------------|--------------|--------|---------|-----------|
|              | New York      | Philadelphia | Boston | Chicago | St. Louis |
| 1 . . . . .  | 43.7          | 49.5         | 46.7   | 47.3    | 51.3      |
| 5 . . . . .  | 49.1          | 52.0         | 50.9   | 52.9    | 53.7      |

For other countries see page 355.

The following table of survivals for Massachusetts and New Jersey shows the number of persons, out of 1000 born, who will survive to certain ages :—

| Age      | Massachusetts |        | New Jersey |        |
|----------|---------------|--------|------------|--------|
|          | Male          | Female | Male       | Female |
| 0 . . .  | 1,000         | 1,000  | 1,000      | 1,000  |
| 1 . . .  | 858           | 880    | 868        | 892    |
| 5 . . .  | 760           | 777    | 776        | 798    |
| 10 . . . | 729           | 742    | 748        | 769    |
| 15 . . . | 717           | 728    | 737        | 757    |
| 20 . . . | 700           | 707    | 723        | 740    |
| 30 . . . | 646           | 643    | 673        | 685    |
| 40 . . . | 588           | 580    | 615        | 627    |
| 50 . . . | 523           | 517    | 544        | 563    |
| 60 . . . | 434           | 440    | 444        | 481    |
| 70 . . . | 302           | 323    | 308        | 352    |
| 80 . . . | 135           | 163    | 141        | 167    |
| 90 . . . | 24            | 37     | 30         | 35     |

In New Jersey the woman's life throughout is better than the man's, but the reverse is true in Massachusetts between 30 and 50 years of age.

### LIFE-BOATS

In 1897 those of the United Kingdom were launched 375 times, and saved 659 lives. Since 1824 they have saved 40,470 lives, or 550 yearly.

### LIFE-SPAN

According to ten years' tables, 1881-90, those persons who safely complete their fifth year usually pass their sixtieth. The mean age at death (excluding infants under five) was :—

|                |      |                     |      |
|----------------|------|---------------------|------|
| England . . .  | 62.5 | Sweden . . .        | 67.8 |
| Scotland . . . | 62.1 | Norway . . .        | 67.1 |
| Ireland . . .  | 62.8 | Denmark . . .       | 65.8 |
| France . . .   | 63.2 | Holland . . .       | 65.2 |
| Russia . . .   | 61.4 | Belgium . . .       | 64.3 |
| Bavaria . . .  | 62.2 | Switzerland . . .   | 61.8 |
| Austria . . .  | 58.1 | Massachusetts . . . | 63.2 |
| Italy . . .    | 63.8 | Japan . . .         | 60.8 |
| Spain . . .    | 58.2 | Average . . .       | 63.0 |

### LIVES OF MONARCHS

In 400 years, from 1498 to 1898, the average life of crowned heads has been as follows :—

| Sovereigns    | Number | Average Years | Sovereigns     | Number | Average Years |
|---------------|--------|---------------|----------------|--------|---------------|
| Popes . . .   | 43     | 9.3           | Denmark . . .  | 13     | 30.8          |
| Czars . . .   | 27     | 15.0          | Sweden . . .   | 24     | 16.6          |
| Austria . . . | 16     | 25.0          | Portugal . . . | 22     | 18.2          |
| Prussia . . . | 16     | 25.0          | Turkey . . .   | 27     | 15.0          |
| Spain . . .   | 16     | 25.0          | England . . .  | 17     | 24.0          |

The Popes, being usually elected at advanced age, may be omitted: the general average for the other 178 monarchs would be 20 years of reign; but despotic rulers, Czars and Sultans, had short reigns, being sometimes assassinated.

### LIGHT

The public lighting of the principal cities of Europe in 1891 was :—

|                  | Number of Lamps |        |       | Cost       |                |
|------------------|-----------------|--------|-------|------------|----------------|
|                  | Electric        | Gas    | Oil   | £ Sterling | Pence per Inh. |
| London . . .     | ...             | 74,100 | ...   | 220,000    | 12             |
| Paris . . .      | 380             | 58,400 | 400   | 230,000    | 21             |
| Berlin . . .     | 70,400          | 20,300 | 1,200 | 110,000    | 16             |
| Hamburg . . .    | 70              | 21,600 | ...   | ...        | ...            |
| Vienna . . .     | ...             | 17,200 | 300   | 50,000     | 9              |
| Dresden . . .    | ...             | 6,900  | 400   | 20,000     | 14             |
| Buda-Pesth . . . | ...             | 8,800  | 2,500 | 30,000     | 12             |
| Brussels . . .   | ...             | 5,600  | ...   | ...        | ...            |
| Bordeaux . . .   | ...             | 4,700  | ...   | 8,000      | 8              |
| Rome . . .       | 45              | 6,700  | 1,600 | 48,000     | 25             |
| Naples . . .     | 33              | 9,700  | 300   | 47,000     | 22             |
| Milan . . .      | 264             | 3,800  | ...   | 23,000     | 12             |
| Turin . . .      | 2,760           | 3,900  | 400   | 30,000     | 21             |
| Palermo . . .    | ...             | 3,000  | 1,100 | 18,000     | 16             |
| Genoa . . .      | 73              | 3,300  | ...   | 15,000     | 16             |
| Florence . . .   | 29              | 3,500  | 400   | 18,000     | 22             |

The number of electric lights, public and private, in use in the above cities in 1891 was as follows :—

|               |         |                |        |               |        |
|---------------|---------|----------------|--------|---------------|--------|
| London . . .  | 10,000  | Dresden . . .  | 10,000 | Rome . . .    | 13,000 |
| Berlin . . .  | 115,000 | Breslau . . .  | 8,000  | Naples . . .  | 4,000  |
| Vienna . . .  | 37,000  | Venice . . .   | 5,400  | Milan . . .   | 16,000 |
| Hamburg . . . | 42,000  | Florence . . . | 900    | Turin . . .   | 7,000  |
| Leipzig . . . | 22,000  | Genoa . . .    | 600    | Palermo . . . | 2,000  |

The annual consumption of gas, public and private, and the average cost per thousand feet, are shown in the following table :—

|                      | Millions of Cubic Feet |         |        | Pence per 1000 feet |
|----------------------|------------------------|---------|--------|---------------------|
|                      | Public                 | Private | Total  |                     |
| London (inner) . . . | 1,520                  | 25,200  | 26,720 | 36                  |
| Paris . . .          | 950                    | 9,450   | 10,400 | 60                  |
| Berlin . . .         | 500                    | 4,300   | 4,800  | 45                  |
| Vienna . . .         | 250                    | ...     | ...    | 48                  |
| Hamburg . . .        | 240                    | 1,200   | 1,440  | 50                  |
| Leipzig . . .        | 80                     | 550     | 630    | 50                  |
| Bordeaux . . .       | 180                    | 720     | 900    | 47                  |
| Brussels . . .       | 160                    | 800     | 960    | 28                  |
| Breslau . . .        | 105                    | 415     | 520    | 50                  |
| Dresden . . .        | 140                    | 600     | 740    | 48                  |
| Buda-Pesth . . .     | 170                    | 590     | 760    | 47                  |
| Trieste . . .        | 50                     | 150     | 200    | 54                  |
| Rome . . .           | 130                    | 390     | 520    | 64                  |
| Naples . . .         | 170                    | 180     | 350    | 72                  |
| Milan . . .          | 60                     | 480     | 540    | 55                  |
| Turin . . .          | 80                     | 700     | 780    | 40                  |
| Palermo . . .        | 60                     | 70      | 130    | 100                 |
| Genoa . . .          | 50                     | 180     | 230    | 60                  |
| Florence . . .       | 60                     | 90      | 150    | 60                  |
| Venice . . .         | 40                     | 80      | 120    | 70                  |

The average price in the above 20 cities is 54 pence per thousand feet, or 50 per cent. higher than in London. The annual consumption of gas per inhabitant is as follows :—

|                | Feet  |                  | Feet  |                | Feet  |
|----------------|-------|------------------|-------|----------------|-------|
| London . . .   | 6,400 | Brussels . . .   | 1,900 | Naples . . .   | 700   |
| Paris . . .    | 4,200 | Breslau . . .    | 1,500 | Milan . . .    | 1,200 |
| Berlin . . .   | 3,100 | Dresden . . .    | 2,200 | Turin . . .    | 2,200 |
| Hamburg . . .  | 2,400 | Buda-Pesth . . . | 1,400 | Genoa . . .    | 1,100 |
| Leipzig . . .  | 1,600 | Trieste . . .    | 1,200 | Florence . . . | 700   |
| Bordeaux . . . | 3,500 | Rome . . .       | 1,200 | Palermo . . .  | 500   |

The average consumption in the above 18 cities is 2050 cubic feet per inhabitant yearly; Paris is double, and London treble the average.

Those towns in England which are lit with gas by the municipal authorities had 192 establishments in 1894, against 148 in 1884, and showed statistics as follows :—

|            | Capital, £ | Consumers | Street Lamps | Tons Coal Consumed |
|------------|------------|-----------|--------------|--------------------|
| 1884 . . . | 17,300,000 | 917,000   | 137,000      | 2,350,000          |
| 1894 . . . | 23,600,000 | 1,226,000 | 210,000      | 4,030,000          |

The total gas returns for England and Wales in 1897 were :—

| Supply          | Millions Cubic Feet | Tons Coal  | Consumers |
|-----------------|---------------------|------------|-----------|
| Municipal . . . | 48,700              | 4,650,000  | 1,480,000 |
| Companies . . . | 84,000              | 7,950,000  | 1,540,000 |
| Total, 1897 . . | 132,700             | 12,600,000 | 3,020,000 |
| Do. 1890 . . .  | 103,000             | 10,200,000 | 2,310,000 |

This gave an average of  $4\frac{1}{2}$  tons of coal per consumer in 1890, and  $4\frac{1}{2}$  tons in 1897.

See *Gas*, page 304, and *Light*, page 357.

## LIGHTHOUSES

See page 358.

## LIVING, COST OF

The *Journal des Economistes*, 1895, estimates the annual expenditure for a workman's family in various countries thus :—

|                    | Shillings per Annum |         |         |         |       |
|--------------------|---------------------|---------|---------|---------|-------|
|                    | Great Britain       | Belgium | Germany | Austria | Italy |
| Rent . . . . .     | 188                 | 99      | 74      | 62      | 61    |
| Bread . . . . .    | 136                 | 360     | 214     | 354     | 504   |
| Meat . . . . .     | 180                 | 75      | 74      | 52      | 0     |
| Vegetables . . .   | 136                 | 180     | 60      | 128     | 298   |
| Dairy . . . . .    | 90                  | 180     | 472     | 60      | 72    |
| Groceries . . . .  | 676                 | 316     | 134     | 188     | 210   |
| Clothing . . . . . | 175                 | 256     | 120     | 79      | 112   |
| Fuel, &c. . . . .  | 115                 | 65      | 130     | 79      | 35    |
| Total . . . . .    | 1,656               | 1,531   | 1,278   | 1,002   | 1,292 |

Higgs's budgets of the working-classes in the United States show the average earnings and expenditure of 3000 families was as follows :—

|                    | American<br>£ | English<br>£ | Scotch<br>£ | Irish<br>£ |
|--------------------|---------------|--------------|-------------|------------|
| Earnings . . .     | 129           | 103          | 140         | 96         |
| Rent . . . . .     | 15.5          | 10.4         | 10.5        | 9.4        |
| Food . . . . .     | 50.7          | 46.8         | 68.7        | 44.7       |
| Clothes . . . . .  | 23.7          | 17.2         | 21.4        | 14.0       |
| Fuel . . . . .     | 6.3           | 5.7          | 4.3         | 5.7        |
| Liquor, &c. . . .  | 6.3           | 7.4          | 11.2        | 7.1        |
| Sundries . . . . . | 13.1          | 8.5          | 8.9         | 8.1        |
| Total . . . . .    | 115.6         | 96.0         | 125.0       | 89.0       |
| Surplus . . . . .  | 13.4          | 7.0          | 15.0        | 7.0        |

The estimated ratios of expenditure for American working-classes, as given by the *Amer. Econ. Ass.*, compare with the above thus :—

|                    | American | British | Continental |
|--------------------|----------|---------|-------------|
| Rent . . . . .     | 18.6     | 11.1    | 5.8         |
| Food . . . . .     | 45.3     | 65.4    | 73.0        |
| Clothing . . . . . | 18.5     | 10.3    | 11.1        |
| Fuel . . . . .     | 5.0      | 6.7     | 6.1         |
| Sundries . . . . . | 12.6     | 6.5     | 4.0         |
| Total . . . . .    | 100.0    | 100.0   | 100.0       |

The Statistical Society of Paris (1895) shows the yearly expenditure of a gentleman of £600 a year, residing in Paris, with wife, 5 children, and 2 servants, in all 9 persons, and how much goes in taxes :—

|                      | Expenditure<br>£ | Tax Included<br>£ | Tax Ratio |
|----------------------|------------------|-------------------|-----------|
| House . . . . .      | 125.0            | 36.6              | 29.5      |
| Bread, flour . . .   | 27.6             | 5.3               | 48.0      |
| Meat and fish . . .  | 87.0             | 11.2              | 12.9      |
| Dairy products . .   | 37.2             | 2.7               | 7.3       |
| Wines . . . . .      | 35.6             | 17.6              | 49.5      |
| Coffee, sugar, &c. . | 58.9             | 14.0              | 23.7      |
| Clothing . . . . .   | 79.0             | 8.5               | 10.8      |
| Fuel and light . . . | 35.5             | 9.7               | 27.3      |
| Sundries . . . . .   | 84.2             | 24.4              | 29.0      |
| Total . . . . .      | 570.0            | 130.0             | 22.8      |

It appears, therefore, that taxation, between national, communal, and municipal, is equal to 23 per cent. of the above gentleman's expenditure, and his family comprising 7 persons, the average incidence of taxation for them is almost £19 per head.

See *Living*, page 458.

## LOCAL FINANCES

### UNITED KINGDOM

Local expenditure in 1894 amounted to £88,500,000, as compared with £61,200,000 in 1880, viz. :—

|                       | £ Sterling |            |
|-----------------------|------------|------------|
|                       | 1880       | 1894       |
| Police and works . .  | 34,500,000 | 46,500,000 |
| Poor relief . . . . . | 9,900,000  | 11,800,000 |
| Schools . . . . .     | 4,900,000  | 9,700,000  |
| Harbours . . . . .    | 4,700,000  | 5,800,000  |
| Rural affairs . . . . | 7,200,000  | 14,700,000 |
| Total . . . . .       | 61,200,000 | 88,500,000 |

In 1894 the expenditure was made up as follows :—

|                    | £ (000 omitted) |          |         |                |
|--------------------|-----------------|----------|---------|----------------|
|                    | England         | Scotland | Ireland | United Kingdom |
| Urban . . . . .    | 40,220          | 4,930    | 1,410   | 46,560         |
| Poor . . . . .     | 9,670           | 960      | 1,130   | 11,760         |
| Schools . . . . .  | 7,780           | 1,910    | ...     | 9,690          |
| Harbours . . . . . | 4,030           | 1,170    | 580     | 5,780          |
| Rural . . . . .    | 11,520          | 1,400    | 1,750   | 14,670         |
| Total . . . . .    | 73,220          | 10,370   | 4,870   | 88,460         |

Only 60 per cent. of the amount necessary to meet the above expenditure was raised by rates, tolls, and income from water and gas supply, viz. :—

|                        | 1880       | 1894       |
|------------------------|------------|------------|
| Rates and tolls . . .  | 37,100,000 | 54,300,000 |
| Imperial subsidy . . . | 3,400,000  | 11,100,000 |
| Loans . . .            | 15,100,000 | 16,100,000 |
| Sundries . . .         | 5,600,000  | 7,000,000  |
| Total . . .            | 61,200,000 | 88,500,000 |

Local revenue in 1894 was made up as follows :—

|                    | £ (000 omitted) |          |         |                |
|--------------------|-----------------|----------|---------|----------------|
|                    | England         | Scotland | Ireland | United Kingdom |
| Rates, tolls . . . | 45,600          | 6,200    | 3,500   | 54,300         |
| Imp. subsidy . . . | 9,000           | 1,700    | 400     | 11,100         |
| Loans . . .        | 13,400          | 2,100    | 600     | 16,100         |
| Sundries . . .     | 6,200           | 500      | 300     | 7,000          |
| Total . . .        | 73,200          | 10,500   | 4,800   | 88,500         |

Local debt has nearly doubled since 1880, amounting at present to nearly 262 millions sterling, viz. :—

|                      | 1880<br>£   | 1897<br>£   |
|----------------------|-------------|-------------|
| England . . . . .    | 137,000,000 | 223,600,000 |
| Scotland . . . . .   | 16,300,000  | 30,900,000  |
| Ireland . . . . .    | ?           | 6,900,000   |
| U. Kingdom . . . . . | ...         | 261,400,000 |

The local debt of England showed as follows :—

|                      | 1880<br>£   | 1897<br>£   |
|----------------------|-------------|-------------|
| Urban . . . . .      | 56,700,000  | 78,100,000  |
| Docks . . . . .      | 23,200,000  | 32,000,000  |
| Schools, &c. . . . . | 57,100,000  | 113,500,000 |
| Total . . . . .      | 137,000,000 | 223,600,000 |

#### Debt of London

#### Irish Debt

|                          | £          |                       | £         |
|--------------------------|------------|-----------------------|-----------|
| County Council . . . . . | 19,100,000 | Dublin . . . . .      | 1,840,000 |
| School Board . . . . .   | 9,300,000  | Belfast . . . . .     | 1,380,000 |
| Vestries, &c. . . . .    | 10,300,000 | Harbours, &c. . . . . | 3,680,000 |
| Total . . . . .          | 38,700,000 | Total . . . . .       | 6,900,000 |

The debt of London is equal to £9 per inhabitant, with an annual burthen of £2,600,000, equal to 17 pence per pound of the valuation. The local debt of Ireland is equal to 32 shillings per inhabitant. The School Board debt of England is £20,200,000, equal to £10 per head of the children in Board schools.

In 1890, according to Sir John Lubbock, the taxation and debt of various cities gave the following averages per inhabitant :—

|                      | Rates, £ | Debt, £ |
|----------------------|----------|---------|
| London . . . . .     | 2.4      | 9.2     |
| Birmingham . . . . . | 2.8      | 10.1    |
| Paris . . . . .      | 5.2      | 23.3    |
| New York . . . . .   | 6.2      | 16.2    |
| Boston . . . . .     | 6.1      | 24.5    |

#### FRANCE

Local taxation and debt in 1895 were as follows :—

|                             | Revenue, £ | Debt, £     |
|-----------------------------|------------|-------------|
| Paris . . . . .             | 13,800,000 | 70,800,000  |
| Other Cities . . . . .      | 17,500,000 | 69,800,000  |
| Rural Departments . . . . . | 11,000,000 | 16,800,000  |
| Total . . . . .             | 42,300,000 | 157,400,000 |

The debt of Paris exceeds £28 per inhabitant. The amount of Octroi (food tax) at the principal cities was :—

|                      | £         | Shillings per Inhabitant |
|----------------------|-----------|--------------------------|
| Paris . . . . .      | 6,010,000 | 50                       |
| Lyons . . . . .      | 450,000   | 21                       |
| Marseilles . . . . . | 450,000   | 22                       |
| Bordeaux . . . . .   | 250,000   | 20                       |
| Lille . . . . .      | 190,000   | 21                       |
| Rouen . . . . .      | 150,000   | 27                       |
| 6 Cities . . . . .   | 7,500,000 | 38                       |

#### GERMANY

Local taxation is about 48 millions sterling: see page 363.

#### RUSSIA

Local taxation is about 16 millions sterling, of which 40 per cent is municipal, 60 per cent. rural. Local debts sum up 7 millions.

#### ITALY

Local taxation, 31 millions sterling; local debts, 54 millions. The Octroi of the principal cities is as follows :—

|                  | £ Sterling | Shillings per Inhabitant |
|------------------|------------|--------------------------|
| Rome . . . . .   | 700,000    | 32                       |
| Naples . . . . . | 630,000    | 24                       |
| Milan . . . . .  | 390,000    | 18                       |
| Turin . . . . .  | 400,000    | 24                       |
| Genoa . . . . .  | 380,000    | 35                       |

Local taxation in 1897 was made up of £25,800,000 communal, and £5,200,000 provincial: of the former £2,100,000 went to the State.

#### SCANDINAVIA

Local taxes are £4,200,000 in Sweden, £1,300,000 in Norway, and £2,100,000 in Denmark. Sweden has a local debt of £11,000,000.

#### UNITED STATES

Local taxation consists of State, County, Municipal, and School taxes, and these have nearly doubled since 1870, the aggregate showing as follows :—

|                         | £ Sterling |            |            |
|-------------------------|------------|------------|------------|
|                         | 1870       | 1890       | Increase   |
| New England . . . . .   | 8,000,000  | 11,000,000 | 3,000,000  |
| Middle States . . . . . | 16,000,000 | 28,700,000 | 12,700,000 |
| Southern „ . . . . .    | 7,500,000  | 11,900,000 | 4,400,000  |
| Western „ . . . . .     | 19,500,000 | 46,400,000 | 26,900,000 |
| The Union . . . . .     | 51,000,000 | 98,000,000 | 47,000,000 |

Local taxes are raised by a rate on property, varying from  $1\frac{1}{2}$  to  $2\frac{1}{2}$  per cent., viz. :—

|                     | Tax per \$100 of Property |      |
|---------------------|---------------------------|------|
|                     | 1870 .                    | 1890 |
| New England . . .   | 1.61                      | 1.48 |
| Middle . . . . .    | 1.97                      | 1.70 |
| South . . . . .     | 1.67                      | 1.40 |
| West . . . . .      | 2.42                      | 2.29 |
| Union, average. . . | 1.97                      | 1.85 |

It will be seen that although local taxation has risen 92 per cent. since 1870, the increase of wealth has been such that the collective rates are lower per 100 dollars of property in every part of the Union, being 6 per cent. less all round. As regards the local taxation of 1890, if we distribute it over the whole population, it is as follows :—

| Taxes               | £ Sterling | Pence per Inhabitant |
|---------------------|------------|----------------------|
| State . . . . .     | 10,100,000 | 38                   |
| County . . . . .    | 19,700,000 | 75                   |
| Municipal . . . . . | 42,200,000 | 161                  |
| Schools . . . . .   | 26,000,000 | 100                  |
| Total . . . . .     | 98,000,000 | 374                  |

Local debts in 1890 amounted to 237 millions sterling. The municipal debt of New York in 1897 was £47,300,000, equal to £19 per inhabitant.

*Municipal Expenditure.*—Körösi's and Bodio's latest reports show the following :—

|                     | £          |                     | £         |
|---------------------|------------|---------------------|-----------|
| Paris . . . . .     | 12,200,000 | Naples . . . . .    | 600,000   |
| Berlin . . . . .    | 2,040,000  | Milan . . . . .     | 800,000   |
| Vienna . . . . .    | 2,080,000  | Turin . . . . .     | 420,000   |
| Rome . . . . .      | 1,640,000  | Genoa . . . . .     | 700,000   |
| St. Petersburg . .  | 640,000    | Florence . . . . .  | 440,000   |
| Moscow . . . . .    | 500,000    | Palermo . . . . .   | 330,000   |
| Warsaw . . . . .    | 320,000    | Venice . . . . .    | 180,000   |
| Buda-Pesth . . . .  | 1,000,000  | Dresden . . . . .   | 400,000   |
| Stockholm . . . . . | 920,000    | Amsterdam . . . .   | 1,080,000 |
| Copenhagen . . . .  | 500,000    | Bucharest . . . . . | 570,000   |
| Prague . . . . .    | 920,000    | Lyons . . . . .     | 760,000   |
| Washington . . . .  | 930,000    | Munich . . . . .    | 1,400,000 |

Distributing the above sums according to population, we find as follows :—

| Skillings per Inhabitant |     |                      |    |
|--------------------------|-----|----------------------|----|
| Paris . . . . .          | 100 | Bucharest . . . .    | 49 |
| Prague . . . . .         | 100 | Florence . . . . .   | 45 |
| Washington . . . .       | 80  | Amsterdam . . . .    | 44 |
| Rome . . . . .           | 78  | Milan . . . . .      | 40 |
| London . . . . .         | 75  | Buda-Pesth . . . .   | 40 |
| Munich . . . . .         | 70  | Lyons . . . . .      | 33 |
| Genoa . . . . .          | 68  | Copenhagen . . . .   | 32 |
| Stockholm . . . . .      | 62  | Vienna . . . . .     | 30 |
|                          |     | Naples . . . . .     | 26 |
|                          |     | Turin . . . . .      | 26 |
|                          |     | Dresden . . . . .    | 25 |
|                          |     | Berlin . . . . .     | 24 |
|                          |     | Venice . . . . .     | 24 |
|                          |     | Palermo . . . . .    | 24 |
|                          |     | St. Petersburg . . . | 10 |
|                          |     | Moscow . . . . .     | 10 |

## M

## MAIZE

The area and product are ordinarily as follows :—

|                     | Acres       | Tons       | Bushels per Acre | Per Inhab. |
|---------------------|-------------|------------|------------------|------------|
| United States . . . | 72,200,000  | 43,500,000 | 24               | 24         |

In France and some other countries millet is included with maize.

The production of maize has increased in recent times more rapidly than that of any other grain, having risen 50 per cent. in twenty-five years. Neumann Spallart estimated the world's crop to have averaged only 38,400,000 tons yearly in the decade ending 1880. The United States produce three-fourths of the total, and use the grain largely for fattening hogs.

See *Agriculture*, page 8, and *Food*, page 714; also *Maize*, p. 365

## MANUFACTURES

The output of manufacturing industry has more than doubled since 1860, showing approximately as follows :—

|                    | Millions £ Sterling |       |       |
|--------------------|---------------------|-------|-------|
|                    | 1860                | 1888  | 1896  |
| Textiles . . . . . | 420                 | 684   | 904   |
| Hardware . . . . . | 243                 | 563   | 604   |
| Total . . . . .    | 663                 | 1,247 | 1,508 |

The above are only two of the principal branches of manufactures, the various countries showing approximately the following value of output in 1896 :—

|                      | Millions £ Sterling |          |          |       |
|----------------------|---------------------|----------|----------|-------|
|                      | Textiles            | Hardware | Sundries | Total |
| United Kingdom . .   | 191                 | 142      | 543      | 876   |
| France . . . . .     | 115                 | 47       | 434      | 596   |
| Germany . . . . .    | 108                 | 105      | 477      | 690   |
| Russia . . . . .     | 81                  | 15       | 284      | 380   |
| Austria . . . . .    | 56                  | 19       | 253      | 328   |
| Italy . . . . .      | 32                  | 4        | 154      | 190   |
| Spain . . . . .      | 19                  | 5        | 97       | 121   |
| Belgium . . . . .    | 17                  | 19       | 82       | 118   |
| Scandinavia . . . .  | 9                   | 8        | 64       | 81    |
| Various . . . . .    | 32                  | 6        | 152      | 190   |
| Europe . . . . .     | 660                 | 370      | 2,540    | 3,570 |
| United States . . .  | 188                 | 229      | 1,563    | 1,980 |
| British Colonies . . | 7                   | 5        | 148      | 160   |
| Total . . . . .      | 855                 | 604      | 4,251    | 5,710 |

The above is exclusive of India, South America, &c.

The output of textile manufactures in 1840 was valued thus:—

|                     | Value, £ (000 omitted) |          |        |        |         |
|---------------------|------------------------|----------|--------|--------|---------|
|                     | Cottons                | Woollens | Linens | Silks  | Total   |
| Great Britain . . . | 48,000                 | 24,000   | 12,000 | 9,500  | 93,500  |
| France . . .        | 20,000                 | 16,000   | 14,400 | 10,000 | 60,400  |
| Germany . . .       | 7,000                  | 17,400   | 3,000  | 3,600  | 31,000  |
| Austria . . .       | 4,500                  | 6,600    | 6,000  | 6,000  | 23,100  |
| Belgium . . .       | 3,400                  | 1,000    | 1,000  | ...    | 5,400   |
| Italy . . .         | 2,500                  | 800      | ...    | 3,000  | 6,300   |
| Russia . . .        | 2,800                  | 4,200    | 800    | 800    | 8,600   |
| Europe . . .        | 88,200                 | 70,000   | 37,200 | 32,900 | 228,300 |
| United States . . . | 9,600                  | 4,400    | ...    | ...    | 14,000  |
| Total . . .         | 97,800                 | 74,400   | 37,200 | 32,900 | 242,300 |

In comparing the output of 1840 with that of 1896, we find the value in the various countries compares with population thus:—

|                      | Millions £ |      | £ per Inhabitant |      |
|----------------------|------------|------|------------------|------|
|                      | 1840       | 1896 | 1840             | 1896 |
| United Kingdom . . . | 94         | 191  | 3.6              | 5.0  |
| France . . .         | 60         | 115  | 1.8              | 3.0  |
| Germany . . .        | 31         | 108  | 1.0              | 2.1  |
| Russia . . .         | 9          | 81   | 0.1              | 0.7  |
| Austria . . .        | 23         | 56   | 0.7              | 1.3  |
| Italy . . .          | 6          | 32   | 0.3              | 1.0  |
| Spain . . .          | 6          | 19   | 0.5              | 1.1  |
| Belgium . . .        | 5          | 17   | 1.2              | 2.7  |
| Switzerland . . .    | 2          | 12   | 1.0              | 4.0  |
| Holland, &c. . .     | 2          | 29   | 0.2              | 1.3  |
| Europe . . .         | 238        | 660  | 1.0              | 1.8  |
| United States . . .  | 14         | 188  | 0.8              | 2.7  |
| India, &c. . .       | 8          | 56   | ...              | ...  |
| The World . . .      | 260        | 904  | ...              | ...  |

The value of textile manufactures in 1896 was approximately as follows:—

|                      | Millions £ Sterling |          |             |       |
|----------------------|---------------------|----------|-------------|-------|
|                      | Cottons             | Woollens | Linens, &c. | Total |
| United Kingdom . . . | 92.1                | 61.7     | 37.4        | 191.2 |
| France . . .         | 22.4                | 44.7     | 48.0        | 115.1 |
| Germany . . .        | 35.4                | 42.2     | 30.6        | 108.2 |
| Russia . . .         | 20.4                | 29.0     | 31.6        | 81.0  |
| Austria . . .        | 18.4                | 14.5     | 22.8        | 55.7  |
| Italy . . .          | 12.0                | 5.8      | 13.4        | 32.1  |
| Spain . . .          | 8.8                 | 6.6      | 4.0         | 19.4  |
| Belgium . . .        | 5.2                 | 5.3      | 6.4         | 16.9  |
| Switzerland . . .    | 3.2                 | 1.6      | 7.0         | 11.8  |
| Holland, &c. . .     | 11.2                | 8.6      | 8.8         | 28.6  |
| Europe . . .         | 230.0               | 220.0    | 210.0       | 660.0 |
| United States . . .  | 68.0                | 72.0     | 48.0        | 188.0 |

| Various . . .        | 8.0                 | 7.0      | 5.0         | 20.0  |
| The World* . . .     | 330.0               | 301.0    | 273.0       | 904.0 |

The progress of textile manufactures since 1888 is shown approximately thus:—

|                      | Tons Fibre |           | Output Millions £ |      |
|----------------------|------------|-----------|-------------------|------|
|                      | 1888       | 1896      | 1888              | 1896 |
| United Kingdom . . . | 1,240,000  | 1,360,000 | 192               | 191  |
| France . . .         | 530,000    | 580,000   | 108               | 115  |
| Germany . . .        | 430,000    | 590,000   | 82                | 108  |
| Russia . . .         | 400,000    | 740,000   | 52                | 81   |
| Austria . . .        | 260,000    | 360,000   | 36                | 56   |
| Italy . . .          | 170,000    | 200,000   | 21                | 32   |
| Spain . . .          | 100,000    | 110,000   | 16                | 19   |
| Belgium . . .        | 130,000    | 110,000   | 16                | 17   |
| Various . . .        | 60,000     | 150,000   | 15                | 41   |
| Europe . . .         | 3,320,000  | 4,200,000 | 524               | 660  |
| United States . . .  | 840,000    | 1,210,000 | 112               | 188  |
| India, &c. . .       | 360,000    | 690,000   | 48                | 56   |
| The World . . .      | 4,520,000  | 6,100,000 | 684               | 904  |

The consumption of fibre and value of textile manufactures were approximately as follows:—

|            | Tons Fibre | Output Millions | £ per Ton Fibre |
|------------|------------|-----------------|-----------------|
|            |            |                 |                 |
| 1820 . . . | 950,000    | 158             | 106             |
| 1840 . . . | 1,440,000  | 260             | 180             |
| 1860 . . . | 2,380,000  | 420             | 175             |
| 1870 . . . | 2,970,000  | 537             | 180             |
| 1888 . . . | 4,520,000  | 684             | 152             |
| 1896 . . . | 6,100,000  | 904             | 148             |

The weight of fibre consumed has doubled since 1870, but the value of manufactures produced has only risen 66 per cent.

See *Cotton*, page 678; *Flax*, page 712; *Hemp*, page 742; *Jute*, page 759; *Silk*, page 806; *Wool*, page 820.  
The nations most largely exporting textiles show as follows:—

|                      | Exported, Millions £ Sterling |      |      |      |      |
|----------------------|-------------------------------|------|------|------|------|
|                      | 1860                          | 1870 | 1880 | 1890 | 1896 |
| United Kingdom . . . | 83                            | 119  | 117  | 121  | 108  |
| France . . .         | 28                            | 37   | 37   | 39   | 36   |
| Germany . . .        | 10                            | 14   | 27   | 36   | 32   |
| Switzerland . . .    | 6                             | 9    | 11   | 12   | 11   |
| Belgium . . .        | 4                             | 5    | 8    | 8    | 7    |
| Austria . . .        | 3                             | 4    | 4    | 4    | 4    |

*Textiles.*—The annual consumption of fibre in the factories of the world is approximately as follows:—

|                     | Tons      |           |                 |           |
|---------------------|-----------|-----------|-----------------|-----------|
|                     | Cotton    | Wool      | Flax, Jute, &c. | Total     |
| U. Kingdom . . .    | 710,000   | 230,000   | 420,000         | 1,360,000 |
| France . . . . .    | 180,000   | 210,000   | 190,000         | 580,000   |
| Germany . . . . .   | 280,000   | 200,000   | 110,000         | 590,000   |
| Russia . . . . .    | 190,000   | 110,000   | 440,000         | 740,000   |
| Austria . . . . .   | 120,000   | 60,000    | 180,000         | 360,000   |
| Italy . . . . .     | 110,000   | 20,000    | 70,000          | 200,000   |
| Spain . . . . .     | 70,000    | 25,000    | 15,000          | 110,000   |
| Belgium . . . . .   | 40,000    | 20,000    | 50,000          | 110,000   |
| Various . . . . .   | 100,000   | 25,000    | 25,000          | 150,000   |
| Europe . . . . .    | 1,800,000 | 900,000   | 1,500,000       | 4,200,000 |
| U. States . . . . . | 600,000   | 270,000   | 340,000         | 1,210,000 |
| India . . . . .     | 220,000   | 10,000    | 260,000         | 490,000   |
| Various . . . . .   | 80,000    | 20,000    | 100,000         | 200,000   |
| The World . . . .   | 2,700,000 | 1,200,000 | 2,200,000       | 6,100,000 |

The nominal consumption of wool is 1,200,000 tons, but the real does not exceed 1,100,000 tons (see *Wool*, page 820), the difference arising from the fact that woollen

yarn is included in some countries as wool, having been already counted as wool in the countries which converted it from wool into yarn. In like manner the real consumption of cotton does not exceed 2,600,000 tons.

*Hardware.*—The production of steel, lead, copper, &c., is as follows:—

|                   | Tons       |         |         |         |
|-------------------|------------|---------|---------|---------|
|                   | Steel      | Lead    | Copper  | Zinc    |
| United States . . | 6,110,000  | 170,000 | 210,000 | 70,000  |
| Great Britain . . | 3,880,000  | 30,000  | 100,000 | 70,000  |
| Germany . . . . . | 2,160,000  | 110,000 | 25,000  | 150,000 |
| France . . . . .  | 810,000    | 30,000  | 10,000  | 25,000  |
| Austria . . . . . | 500,000    | 10,000  | ...     | 6,000   |
| Russia . . . . .  | 580,000    | ...     | 5,000   | 5,000   |
| Spain . . . . .   | 40,000     | 170,000 | 60,000  | 20,000  |
| Belgium . . . . . | 420,000    | 20,000  | ...     | 110,000 |
| Various . . . . . | 200,000    | 150,000 | 80,000  | 4,000   |
| The World . . . . | 14,700,000 | 690,000 | 490,000 | 460,000 |

The principal nations that export hardware are shown thus:—

|                     | Exports, Millions £ |      |          |
|---------------------|---------------------|------|----------|
|                     | 1885                | 1895 | Increase |
| Great Britain . . . | 43                  | 55   | 12       |
| Germany . . . . .   | 11                  | 17   | 6        |
| United States . . . | 5                   | 11   | 6        |
| Belgium . . . . .   | 6                   | 9    | 3        |
| France . . . . .    | 4                   | 5    | 1        |
| Total . . . . .     | 69                  | 97   | 28       |

The hardware manufactures of nations sum up 604 millions sterling, and it appears that five-sixths are consumed in the countries where they are made, and one-sixth exported. Two of the largest factories in the world are Armstrong's at Newcastle, with 27,000, and Krupp's at Essen, with 24,000, workmen.

Birmingham is one of the centres of British hardware, turning out weekly 14 million pens, 10 tons of pins, 6000 bedsteads, 7000 guns, 4000 miles of wire, 500 tons of screw bolts, 300 million nails, 5 million coins, and 1 million buttons.

There are in Europe 45 million operatives and artisans, who produce goods worth 3570 millions sterling yearly, say £78 each; and in the United States 6 million hands produce 1980 millions sterling, or £330 each.

## MARKETS

The area of public markets compared with population in the principal cities of Europe gives the following:—

### Square Yards per 1000 Inhabitants

|                       |                        |                        |
|-----------------------|------------------------|------------------------|
| Paris . . . . . 32    | Leipzig . . . . . 28   | Rome . . . . . 204     |
| Brussels . . . . 59   | Bordeaux . . . . . 60  | Naples . . . . . 32    |
| Hamburg . . . . . 490 | Buda-Pesth . . . . 710 | Florence . . . . . 147 |

This gives an average of 196 square yards per 1000.

The meat markets of Paris in 1895 sold 166,000 tons of meat, 35,000 tons of fish, 23,000 tons of fowl and game, besides 34 million oysters, being an average of 150 lbs. meat, 33 lbs. fish, 22 lbs. fowl, and 14 oysters, per inhabitant. The meat consisted of:—

|                  | Head      | Tons Meat | Average, Lbs. |
|------------------|-----------|-----------|---------------|
| Cattle . . . . . | 477,000   | 105,000   | 496           |
| Sheep . . . . .  | 1,760,000 | 35,000    | 45            |
| Pigs . . . . .   | 286,000   | 22,000    | 162           |
| Horses . . . . . | 16,000    | 4,000     | 550           |

Poultry and game included 6,700,000 chickens, 2,100,000 pigeons, 1,700,000 ducks, geese, and turkeys, 3,300,000 rabbits, besides deer, hares, wild boars, &c.

### MARRIAGE

The following table shows, by latest census reports, the proportions of single, married, and widowed persons (divorced being included with widowed) in various countries:—

|                 | Single | Married | Widowed | Total |
|-----------------|--------|---------|---------|-------|
| England . . .   | 608    | 337     | 55      | 1,000 |
| Scotland . . .  | 647    | 296     | 57      | 1,000 |
| Ireland . . .   | 667    | 263     | 69      | 1,000 |
| United Kingdom  | 619    | 323     | 58      | 1,000 |
| France . . .    | 517    | 401     | 82      | 1,000 |
| Germany . . .   | 600    | 340     | 60      | 1,000 |
| Austria . . .   | 608    | 336     | 56      | 1,000 |
| Hungary . . .   | 529    | 408     | 63      | 1,000 |
| Switzerland . . | 611    | 321     | 68      | 1,000 |
| Italy . . .     | 569    | 365     | 66      | 1,000 |
| Spain . . .     | 546    | 384     | 70      | 1,000 |
| Sweden . . .    | 604    | 334     | 62      | 1,000 |
| Norway . . .    | 617    | 322     | 61      | 1,000 |
| Denmark . . .   | 594    | 345     | 61      | 1,000 |
| Holland . . .   | 616    | 328     | 56      | 1,000 |
| Belgium . . .   | 622    | 319     | 59      | 1,000 |
| Finland . . .   | 607    | 337     | 56      | 1,000 |
| Bulgaria . . .  | 535    | 420     | 45      | 1,000 |
| Canada . . .    | 632    | 328     | 40      | 1,000 |
| Australia . . . | 665    | 296     | 39      | 1,000 |
| Average . . .   | 599    | 342     | 59      | 1,000 |

The married ratio is highest in Bulgaria, Hungary, and France: it is lowest in Ireland, being 23 per cent. below the average of nations. The ratio of widowed persons is highest in France and Spain, lowest in Australia and Canada.

If we compare the proportion of adults, male and female, who are married in the various countries, we find thus:—

|                 | Males, per Cent. |            | Females, per Cent. |            |
|-----------------|------------------|------------|--------------------|------------|
|                 | Married          | Un-married | Married            | Un-married |
| England . . .   | 54.0             | 46.0       | 50.0               | 50.0       |
| Scotland . . .  | 49.1             | 50.9       | 44.0               | 56.0       |
| Ireland . . .   | 39.9             | 60.1       | 38.3               | 61.7       |
| U. Kingdom . .  | 51.5             | 48.5       | 47.7               | 52.3       |
| France . . .    | 55.4             | 44.6       | 54.3               | 45.7       |
| Germany . . .   | 54.0             | 46.0       | 51.0               | 49.0       |
| Austria . . .   | 52.7             | 47.3       | 50.0               | 50.0       |
| Hungary . . .   | 64.1             | 35.9       | 63.8               | 36.2       |
| Switzerland . . | 49.3             | 50.7       | 45.6               | 54.4       |
| Spain . . .     | 58.8             | 41.2       | 55.6               | 44.4       |
| Sweden . . .    | 52.7             | 47.3       | 47.9               | 52.1       |
| Norway . . .    | 53.2             | 46.8       | 47.4               | 52.6       |
| Denmark . . .   | 55.0             | 45.0       | 50.5               | 49.5       |
| Holland . . .   | 51.6             | 48.4       | 49.6               | 50.4       |
| Belgium . . .   | 48.0             | 52.0       | 47.4               | 52.6       |
| Finland . . .   | 54.2             | 45.8       | 51.3               | 48.7       |
| Bulgaria . . .  | 69.7             | 30.3       | 72.6               | 27.4       |
| Australia . . . | 35.3             | 64.7       | 60.0               | 40.0       |
| Average . . .   | 52.2             | 47.8       | 51.7               | 48.3       |

It would be a mistake to look for strict conformity between the ratio of married persons and the birth-rate of a country, which are often widely apart. Take for

example the ratio of married women and the birth-rate of the following:—

|                 | Married Women Percentage | Birth-rate per 1000 Pop. |
|-----------------|--------------------------|--------------------------|
| France . . .    | 54.3                     | 22.4                     |
| Scotland . . .  | 44.0                     | 30.7                     |
| Australia . . . | 60.0                     | 27.5                     |
| Norway . . .    | 47.4                     | 30.3                     |

Nevertheless, in most cases a high married ratio indicates a high birth-rate.

The ratios of age at marrying in various countries stand thus:—

|                  | Males    |       |       |         | Total |
|------------------|----------|-------|-------|---------|-------|
|                  | Under 20 | 20-30 | 30-40 | Over 40 |       |
| England . . .    | 21       | 734   | 158   | 87      | 1,000 |
| Scotland . . .   | 25       | 682   | 206   | 87      | 1,000 |
| Ireland . . .    | 25       | 616   | 260   | 99      | 1,000 |
| France . . .     | 19       | 669   | 223   | 89      | 1,000 |
| Germany . . .    | 1        | 695   | 218   | 86      | 1,000 |
| Russia . . .     | 320      | 519   | 98    | 63      | 1,000 |
| Austria . . .    | ...      | 645   | 220   | 135     | 1,000 |
| Hungary . . .    | ...      | 759   | 138   | 103     | 1,000 |
| Italy . . .      | 26       | 658   | 208   | 108     | 1,000 |
| Switzerland . .  | 10       | 608   | 246   | 136     | 1,000 |
| Sweden . . .     | 2        | 628   | 260   | 110     | 1,000 |
| Norway . . .     | 18       | 606   | 259   | 117     | 1,000 |
| Denmark . . .    | ...      | 642   | 261   | 97      | 1,000 |
| Holland . . .    | 30       | 632   | 228   | 110     | 1,000 |
| Belgium . . .    | 47       | 597   | 245   | 111     | 1,000 |
| Europe . . .     | 36       | 646   | 215   | 103     | 1,000 |
| Massachusetts .  | 19       | 687   | 201   | 93      | 1,000 |
| Buenos Ayres . . | 28       | 647   | 248   | 77      | 1,000 |

|                  | Females  |       |       |         | Total |
|------------------|----------|-------|-------|---------|-------|
|                  | Under 20 | 20-30 | 30-40 | Over 40 |       |
| England . . .    | 111      | 722   | 113   | 54      | 1,000 |
| Scotland . . .   | 116      | 708   | 131   | 45      | 1,000 |
| Ireland . . .    | 118      | 737   | 112   | 33      | 1,000 |
| France . . .     | 205      | 628   | 120   | 47      | 1,000 |
| Germany . . .    | 81       | 736   | 136   | 47      | 1,000 |
| Russia . . .     | 564      | 364   | 50    | 22      | 1,000 |
| Austria . . .    | 173      | 606   | 149   | 72      | 1,000 |
| Hungary . . .    | 368      | 493   | 80    | 59      | 1,000 |
| Italy . . .      | 234      | 606   | 107   | 53      | 1,000 |
| Switzerland . .  | 72       | 687   | 166   | 75      | 1,000 |
| Sweden . . .     | 64       | 675   | 201   | 60      | 1,000 |
| Norway . . .     | 79       | 677   | 183   | 61      | 1,000 |
| Denmark . . .    | 74       | 699   | 176   | 51      | 1,000 |
| Holland . . .    | 124      | 652   | 157   | 67      | 1,000 |
| Belgium . . .    | 182      | 570   | 176   | 72      | 1,000 |
| Europe . . .     | 171      | 637   | 137   | 55      | 1,000 |
| Massachusetts .  | 161      | 677   | 118   | 44      | 1,000 |
| Buenos Ayres . . | 456      | 443   | 72    | 29      | 1,000 |

### UNITED KINGDOM

The census of 1891 showed married and unmarried thus:—

#### England and Wales

|               | Number (000 omitted) |         |        | Ratio |
|---------------|----------------------|---------|--------|-------|
|               | Males                | Females | Total  |       |
| Single . . .  | 8,716                | 8,909   | 17,625 | 608   |
| Married . . . | 4,852                | 4,917   | 9,769  | 337   |
| Widowed . . . | 485                  | 1,124   | 1,609  | 55    |
| Total . . .   | 14,053               | 14,950  | 29,003 | 1,000 |

| <i>Scotland</i> |                      |         |       |       |
|-----------------|----------------------|---------|-------|-------|
|                 | Number (ooo omitted) |         |       | Ratio |
|                 | Males                | Females | Total |       |
| Single . . .    | 1,289                | 1,315   | 2,604 | 647   |
| Married . . .   | 589                  | 603     | 1,192 | 296   |
| Widowed . . .   | 64                   | 164     | 228   | 57    |
| Total . . .     | 1,942                | 2,082   | 4,024 | 1,000 |

| <i>Ireland</i> |       |       |       |       |
|----------------|-------|-------|-------|-------|
| Single . . .   | 1,614 | 1,528 | 3,142 | 667   |
| Married . . .  | 614   | 626   | 1,240 | 263   |
| Widowed . . .  | 92    | 232   | 324   | 69    |
| Total . . .    | 2,320 | 2,386 | 4,706 | 1,000 |

| <i>U. Kingdom</i> |        |        |        |       |
|-------------------|--------|--------|--------|-------|
| Single . . .      | 11,619 | 11,752 | 23,371 | 619   |
| Married . . .     | 6,055  | 6,146  | 12,201 | 323   |
| Widowed . . .     | 641    | 1,520  | 2,161  | 58    |
| Total . . .       | 18,315 | 19,418 | 37,733 | 1,000 |

The ratio of married persons in Ireland is the lowest in Europe, being 11 per cent. less than in Scotland, and 22 per cent. less than in England.

If we compare the adult population (over 15) with the numbers married we find :—

| <i>England</i>    |            |           |          |
|-------------------|------------|-----------|----------|
|                   | Population | Married   | Per cent |
| Males . . . . .   | 8,980,000  | 4,852,000 | 54.0     |
| Females . . . . . | 9,849,000  | 4,917,000 | 50.0     |
| Total . . . . .   | 18,829,000 | 9,769,000 | 52.0     |

| <i>Scotland</i>   |           |           |      |
|-------------------|-----------|-----------|------|
| Males . . . . .   | 1,218,000 | 589,000   | 49.1 |
| Females . . . . . | 1,376,000 | 603,000   | 44.0 |
| Total . . . . .   | 2,594,000 | 1,192,000 | 46.0 |

| <i>Ireland</i>    |           |           |      |
|-------------------|-----------|-----------|------|
| Males . . . . .   | 1,541,000 | 614,000   | 39.9 |
| Females . . . . . | 1,635,000 | 626,000   | 38.3 |
| Total . . . . .   | 3,176,000 | 1,240,000 | 39.0 |

| <i>U. Kingdom</i> |            |            |      |
|-------------------|------------|------------|------|
| Males . . . . .   | 11,739,000 | 6,055,000  | 51.5 |
| Females . . . . . | 12,860,000 | 6,146,000  | 47.7 |
| Total . . . . .   | 24,599,000 | 12,201,000 | 49.6 |

The following table shows the number of women between 15 and 45 in the three kingdoms, and how many married :—

|                      | Number    | Married   | Per cent. |
|----------------------|-----------|-----------|-----------|
| England . . . . .    | 6,892,000 | 3,244,000 | 47.1      |
| Scotland . . . . .   | 936,000   | 392,000   | 41.9      |
| Ireland . . . . .    | 1,068,000 | 358,000   | 33.6      |
| U. Kingdom . . . . . | 8,896,000 | 3,994,000 | 44.9      |

As the marriage ratio is so low in Ireland, the birth-rate is also extremely depressed, being 24 per cent. less than in England (see *Vital Statistics*, page 815).

The mean age of persons marrying in England and Wales showed as follows :—

|                     | 1885-88 | 1892-95 |
|---------------------|---------|---------|
| Bachelors . . . . . | 26.2    | 26.5    |
| Widowers . . . . .  | 43.7    | 44.4    |
| All men . . . . .   | 28.2    | 28.5    |
| Spinsters . . . . . | 24.7    | 25.0    |
| Widows . . . . .    | 40.2    | 40.5    |
| All women . . . . . | 25.9    | 26.2    |

The mean age in the second period is 1 per cent. higher than in the first. Marriages of minors are decreasing in ratio, viz :—

|                    | 1871-80 |       | 1886-95 |       |
|--------------------|---------|-------|---------|-------|
|                    | Men     | Women | Men     | Women |
| Under 21 . . . . . | 80      | 220   | 60      | 191   |
| Over 21 . . . . .  | 920     | 780   | 940     | 809   |
| Total . . . . .    | 1,000   | 1,000 | 1,000   | 1,000 |

The following table shows the probability of the husband's age in England for any given age of a woman at marriage :—

| Wife Aged       | Husband's Average |
|-----------------|-------------------|
| 15-20 . . . . . | 23.1              |
| 20-25 . . . . . | 25.1              |
| 25-30 . . . . . | 28.6              |
| 30-35 . . . . . | 33.8              |
| 35-40 . . . . . | 39.2              |

The religion of persons married, judging by the churches in which marriages took place, showed the following ratios, for England and Wales :—

|                             | 1856-65 | 1866-75 | 1876-85 | 1886-95 |
|-----------------------------|---------|---------|---------|---------|
| Church of England . . . . . | 860     | 761     | 720     | 697     |
| Roman Catholic . . . . .    | 46      | 42      | 43      | 42      |
| Various . . . . .           | 94      | 197     | 237     | 261     |
| Total . . . . .             | 1,000   | 1,000   | 1,000   | 1,000   |

#### GERMANY

The census of 1890 showed as follows :—

|                    | Number (ooo omitted) |         |        | Ratio |
|--------------------|----------------------|---------|--------|-------|
|                    | Males                | Females | Total  |       |
| Single . . . . .   | 15,058               | 14,592  | 29,650 | 60.0  |
| Married . . . . .  | 8,372                | 8,399   | 16,771 | 34.0  |
| Widowed . . . . .  | 775                  | 2,158   | 2,933  | 5.9   |
| Divorced . . . . . | 25                   | 50      | 75     | 0.1   |
| Total . . . . .    | 24,230               | 25,199  | 49,429 | 100.0 |

A comparison of the adult population over 15 with the number married shows :—

|                   | Population | Married    | Per Cent. |
|-------------------|------------|------------|-----------|
| Males . . . . .   | 15,517,000 | 8,372,000  | 54.0      |
| Females . . . . . | 16,511,000 | 8,399,000  | 51.0      |
| Total . . . . .   | 32,028,000 | 16,771,000 | 52.4      |

The married ratio is much higher than in the United Kingdom.

## FRANCE

The census of 1891 gave the following results :—

|                | Number (ooo omitted) |         |        | Ratio |
|----------------|----------------------|---------|--------|-------|
|                | Males                | Females | Total  |       |
| Single . . .   | 10,243               | 9,464   | 19,707 | 51.7  |
| Married . . .  | 7,640                | 7,657   | 15,297 | 40.1  |
| Widowed . . .  | 1,033                | 2,061   | 3,094  | 8.1   |
| Divorced . . . | 17                   | 20      | 37     | 0.1   |
| Total . . .    | 18,933               | 19,202  | 38,135 | 100.0 |

Comparing the adult population over 15 with the number married, we find :—

|               | Population | Married    | Per Cent. |
|---------------|------------|------------|-----------|
| Males . . .   | 13,807,000 | 7,640,000  | 55.4      |
| Females . . . | 14,101,000 | 7,657,000  | 54.3      |
| Total . . .   | 27,908,000 | 15,294,000 | 54.8      |

The married ratio is even higher here than in Germany, and yet the birth-rate is 40 per cent. less (see *Vital Statistics*, page 815).

## AUSTRIA

The census of 1890 showed as follows :—

|                | Number (ooo omitted) |         |        | Ratio |
|----------------|----------------------|---------|--------|-------|
|                | Males                | Females | Total  |       |
| Single . . .   | 7,342                | 7,180   | 14,522 | 60.8  |
| Married . . .  | 4,004                | 4,034   | 8,038  | 33.6  |
| Widowed . . .  | 336                  | 982     | 1,318  | 5.5   |
| Divorced . . . | 7                    | 10      | 17     | 0.1   |
| Total . . .    | 11,689               | 12,206  | 23,895 | 100.0 |

Comparing the adult population over 15, we find the married ratio thus :—

|               | Population | Married   | Per Cent. |
|---------------|------------|-----------|-----------|
| Males . . .   | 7,594,000  | 4,004,000 | 52.7      |
| Females . . . | 8,071,000  | 4,034,000 | 50.0      |
| Total . . .   | 15,665,000 | 8,038,000 | 51.3      |

The married ratio is lower than in France or Germany, but the birth-rate is higher.

## HUNGARY

According to the census of 1890 we find as follows :—

|                | Number (ooo omitted) |         |        | Ratio |
|----------------|----------------------|---------|--------|-------|
|                | Males                | Females | Total  |       |
| Single . . .   | 4,882                | 4,377   | 9,259  | 52.9  |
| Married . . .  | 3,528                | 3,576   | 7,104  | 40.8  |
| Widowed . . .  | 253                  | 835     | 1,088  | 6.2   |
| Divorced . . . | 5                    | 8       | 13     | 0.1   |
| Total . . .    | 8,668                | 8,796   | 17,464 | 100.0 |

Comparing the adult population with the married, we find :—

|               | Population | Married   | Per Cent. |
|---------------|------------|-----------|-----------|
| Males . . .   | 5,502,000  | 3,528,000 | 64.1      |
| Females . . . | 5,604,000  | 3,576,000 | 63.8      |
| Total . . .   | 11,106,000 | 7,104,000 | 64.0      |

The married ratio is 25 per cent. higher than in Austria, and is the highest in Europe except Bulgaria.

## ITALY

The census of 1880 showed as follows :—

|               | Number (ooo omitted) |         |        | Ratio |
|---------------|----------------------|---------|--------|-------|
|               | Males                | Females | Total  |       |
| Single . . .  | 8,544                | 7,661   | 16,205 | 56.9  |
| Married . . . | 5,150                | 5,211   | 10,361 | 36.5  |
| Widowed . . . | 571                  | 1,322   | 1,893  | 6.6   |
| Total . . .   | 14,265               | 14,194  | 28,459 | 100.0 |

## SWITZERLAND

The census of 1888 resulted as follows :—

|                | Number (ooo omitted) |         |       | Ratio |
|----------------|----------------------|---------|-------|-------|
|                | Males                | Females | Total |       |
| Single . . .   | 891                  | 892     | 1,783 | 61.1  |
| Married . . .  | 466                  | 470     | 936   | 32.1  |
| Widowed . . .  | 57                   | 131     | 188   | 6.4   |
| Divorced . . . | 4                    | 8       | 12    | 0.4   |
| Total . . .    | 1,418                | 1,501   | 2,919 | 100.0 |

Taking the adult population to compare with the married, we find :—

|               | Population | Married | Per Cent. |
|---------------|------------|---------|-----------|
| Males . . .   | 946,000    | 466,000 | 49.3      |
| Females . . . | 1,029,000  | 470,000 | 45.6      |
| Total . . .   | 1,975,000  | 936,000 | 47.4      |

The married ratio is low, especially for women. Observations during fifteen years show that of 100 marriages, the husband dies first in 56, the wife in 44 cases.

## SPAIN

According to the census of December 1887 we find :—

|               | Number (ooo omitted) |         |        | Ratio |
|---------------|----------------------|---------|--------|-------|
|               | Males                | Females | Total  |       |
| Single . . .  | 4,864                | 4,725   | 9,589  | 51.6  |
| Married . . . | 3,357                | 3,387   | 6,744  | 38.4  |
| Widowed . . . | 391                  | 842     | 1,233  | 7.0   |
| Total . . .   | 8,612                | 8,954   | 17,566 | 100.0 |

Comparing adult population with the number married, we find:—

|               | Population | Married   | Per Cent. |
|---------------|------------|-----------|-----------|
| Males . . .   | 5,710,000  | 3,357,000 | 58.8      |
| Females . . . | 6,085,000  | 3,387,000 | 55.6      |
| Total . . .   | 11,795,000 | 6,744,000 | 57.2      |

The married ratio is 10 per cent. higher than in Germany, and yet the birth-rate is less.

## SWEDEN

The census of 1890 resulted as follows:—

|                | Number (000 omitted) |         |       | Ratio |
|----------------|----------------------|---------|-------|-------|
|                | Males                | Females | Total |       |
| Single . . .   | 1,432                | 1,461   | 2,893 | 60.4  |
| Married . . .  | 795                  | 805     | 1,600 | 33.4  |
| Widowed . . .  | 89                   | 200     | 289   | 6.1   |
| Divorced . . . | 1                    | 3       | 4     | 0.1   |
| Total . . .    | 2,317                | 2,469   | 4,786 | 100.0 |

Comparing the adult population with the number married, we find:—

|               | Population | Married   | Per Cent. |
|---------------|------------|-----------|-----------|
| Males . . .   | 1,508,000  | 795,000   | 52.7      |
| Females . . . | 1,679,000  | 805,000   | 47.9      |
| Total . . .   | 3,187,000  | 1,600,000 | 50.2      |

The married ratio is lower than in Germany or England. It is ascertained in Sweden that 12 per cent. of marriages are barren.

## NORWAY

According to the census of 1890 we find:—

|               | Number (000 omitted) |         |       | Ratio |
|---------------|----------------------|---------|-------|-------|
|               | Males                | Females | Total |       |
| Single . . .  | 598                  | 630     | 1,228 | 61.7  |
| Married . . . | 315                  | 326     | 641   | 32.2  |
| Widowed . . . | 38                   | 81      | 119   | 6.1   |
| Total . . .   | 951                  | 1,037   | 1,988 | 100.0 |

The above number of married compares with adult population thus:—

|               | Population | Married | Per Cent. |
|---------------|------------|---------|-----------|
| Males . . .   | 592,000    | 315,000 | 53.2      |
| Females . . . | 688,000    | 326,000 | 47.4      |
| Total . . .   | 1,280,000  | 641,000 | 50.1      |

The married ratio is higher for males, but lower for females, than in Sweden.

## DENMARK

The census of 1890 resulted as follows:—

|                | Number (000 omitted) |         |       | Ratio |
|----------------|----------------------|---------|-------|-------|
|                | Males                | Females | Total |       |
| Single . . .   | 648                  | 648     | 1,296 | 59.4  |
| Married . . .  | 376                  | 376     | 752   | 34.5  |
| Widowed . . .  | 40                   | 91      | 131   | 6.0   |
| Divorced . . . | 1                    | 2       | 3     | 0.1   |
| Total . . .    | 1,065                | 1,117   | 2,182 | 100.0 |

Comparing adult population with the number married, we find:—

|               | Population | Married | Per Cent. |
|---------------|------------|---------|-----------|
| Males . . .   | 682,000    | 376,000 | 55.0      |
| Females . . . | 744,000    | 376,000 | 50.5      |
| Total . . .   | 1,426,000  | 752,000 | 52.8      |

The married ratio is almost the same as in Germany.

## SCANDINAVIA

If we group together the three northern kingdoms we find:—

|                | Number (000 omitted) |         |       | Ratio |
|----------------|----------------------|---------|-------|-------|
|                | Males                | Females | Total |       |
| Single . . .   | 2,678                | 2,739   | 5,417 | 60.5  |
| Married . . .  | 1,486                | 1,507   | 2,993 | 33.4  |
| Widowed . . .  | 167                  | 372     | 539   | 6.0   |
| Divorced . . . | 2                    | 5       | 7     | 0.1   |
| Total . . .    | 4,333                | 4,623   | 8,956 | 100.0 |

The adult population shows the married ratio thus:—

|               | Population | Married   | Per Cent. |
|---------------|------------|-----------|-----------|
| Males . . .   | 2,782,000  | 1,486,000 | 53.4      |
| Females . . . | 3,111,000  | 1,507,000 | 48.4      |
| Total . . .   | 5,893,000  | 2,993,000 | 50.7      |

The married rate of the three kingdoms collectively is 3 per cent. lower than in Germany, but the birth-rate is 20 per cent. lower.

## HOLLAND

The census of 1889 resulted as follows:—

|                | Number (000 omitted) |         |       | Ratio |
|----------------|----------------------|---------|-------|-------|
|                | Males                | Females | Total |       |
| Single . . .   | 1,407                | 1,375   | 2,782 | 61.6  |
| Married . . .  | 738                  | 739     | 1,477 | 32.8  |
| Widowed . . .  | 81                   | 166     | 247   | 5.5   |
| Divorced . . . | 2                    | 2       | 4     | 0.1   |
| Total . . .    | 2,228                | 2,282   | 4,510 | 100.0 |

Comparing the adult population with the number married, we find :—

|               | Population | Married   | Per Cent. |
|---------------|------------|-----------|-----------|
| Males . . .   | 1,499,000  | 738,000   | 51.6      |
| Females . . . | 1,491,000  | 739,000   | 49.6      |
| Total . . .   | 2,990,000  | 1,477,000 | 50.6      |

This is just the same married rate as in Scandinavia, but the birth-rate is 14 per cent. higher in Holland than in the northern kingdoms.

## BELGIUM

According to the census of December 1890 we find :—

|                | Number (000 omitted) |         |       | Ratio |
|----------------|----------------------|---------|-------|-------|
|                | Males                | Females | Total |       |
| Single . . .   | 1,936                | 1,845   | 3,781 | 62.2  |
| Married . . .  | 967                  | 965     | 1,932 | 31.9  |
| Widowed . . .  | 122                  | 230     | 352   | 5.8   |
| Divorced . . . | 2                    | 2       | 4     | 0.1   |
| Total . . .    | 3,027                | 3,042   | 6,069 | 100.0 |

The adult population compares with the number married thus :—

|               | Population | Married   | Per Cent. |
|---------------|------------|-----------|-----------|
| Males . . .   | 2,015,000  | 967,000   | 48.0      |
| Females . . . | 2,039,000  | 965,000   | 47.4      |
| Total . . .   | 4,054,000  | 1,932,000 | 47.7      |

The married rate is almost the same as in Switzerland, and much below the average of European countries.

## FINLAND

The census of 1890 showed as follows :—

|               | Number (000 omitted) |         |       | Ratio |
|---------------|----------------------|---------|-------|-------|
|               | Males                | Females | Total |       |
| Single . . .  | 734                  | 711     | 1,445 | 60.7  |
| Married . . . | 401                  | 402     | 803   | 33.7  |
| Widowed . . . | 36                   | 96      | 132   | 5.6   |
| Total . . .   | 1,171                | 1,209   | 2,380 | 100.0 |

The adult population compares with the number married as follows :—

|               | Population | Married | Per Cent. |
|---------------|------------|---------|-----------|
| Males . . .   | 741,000    | 401,000 | 54.2      |
| Females . . . | 783,000    | 402,000 | 51.3      |
| Total . . .   | 1,524,000  | 803,000 | 52.6      |

The married ratio is almost the same as in Denmark, but the birth-rate is 6 per cent. higher than in that kingdom.

## BULGARIA

According to the census of 1888 the results were :—

|                | Number (000 omitted) |         |       | Ratio |
|----------------|----------------------|---------|-------|-------|
|                | Males                | Females | Total |       |
| Single . . .   | 897                  | 792     | 1,689 | 53.5  |
| Married . . .  | 664                  | 660     | 1,324 | 42.0  |
| Widowed . . .  | 43                   | 96      | 139   | 4.4   |
| Divorced . . . | 1                    | 1       | 2     | 0.1   |
| Total . . .    | 1,605                | 1,549   | 3,154 | 100.0 |

Comparing adult population with the number married, we find :—

|               | Population | Married   | Per Cent. |
|---------------|------------|-----------|-----------|
| Males . . .   | 949,000    | 661,000   | 69.7      |
| Females . . . | 913,000    | 660,000   | 72.6      |
| Total . . .   | 1,862,000  | 1,324,000 | 71.2      |

The ratio of married is 40 per cent. higher than in Austria, and yet the Austrian birth-rate is higher than the Bulgarian.

## CANADA

The census of 1891 gave results as follows :—

|               | Number (000 omitted) |         |       | Ratio |
|---------------|----------------------|---------|-------|-------|
|               | Males                | Females | Total |       |
| Single . . .  | 1,601                | 1,452   | 3,053 | 63.2  |
| Married . . . | 796                  | 798     | 1,588 | 32.8  |
| Widowed . . . | 63                   | 129     | 192   | 4.0   |
| Total . . .   | 2,460                | 2,373   | 4,833 | 100.0 |

The adult population, male and female, over 15 years of age, was 3,093,000, from which it appears that the married ratio was 51½ per cent., as compared with 52 per cent. in England.

## AUSTRALIA

According to the census of 1891 the results were :—

|               | Number (000 omitted) |         |       | Ratio |
|---------------|----------------------|---------|-------|-------|
|               | Males                | Females | Total |       |
| Single . . .  | 1,417                | 1,109   | 2,526 | 66.5  |
| Married . . . | 565                  | 564     | 1,129 | 29.6  |
| Widowed . . . | 55                   | 91      | 146   | 3.9   |
| Total . . .   | 2,037                | 1,764   | 3,801 | 100.0 |

The ratios of adult population married in the several colonies were :—

|                    | Adult Pop. | Married   | Per Cent. |
|--------------------|------------|-----------|-----------|
| N. S. Wales . . .  | 701,000    | 332,000   | 47.4      |
| Victoria . . .     | 745,000    | 345,000   | 46.3      |
| N. Zealand . . .   | 377,000    | 182,000   | 48.3      |
| Queensland . . .   | 247,000    | 115,000   | 46.6      |
| S. Australia . . . | 194,000    | 97,000    | 50.0      |
| Tasmania . . .     | 90,000     | 44,000    | 48.9      |
| W. Australia . . . | 33,000     | 14,000    | 42.4      |
| Total . . .        | 2,387,000  | 1,129,000 | 47.3      |

The ratio of married people is 5 per cent. less than in the United Kingdom, and the birth-rate is 7 per cent. lower.

## MEDICINE

See Part I., page 387 ; also *Drugs*, page 691.

## METALS

The production of metals at various dates was estimated as follows :—

| Date           | Tons       |            |         |         |         |        | Total Value, £ |
|----------------|------------|------------|---------|---------|---------|--------|----------------|
|                | Iron       | Steel      | Lead    | Copper  | Zinc    | Tin    |                |
| 1806 . . . . . | 550,000    | 10,000     | 24,000  | 6,000   | 2,000   | 3,000  | 7,400,000      |
| 1838 . . . . . | 2,450,000  | 20,000     | 130,000 | 22,000  | 9,000   | 5,000  | 19,200,000     |
| 1850 . . . . . | 4,420,000  | 70,000     | 170,000 | 52,000  | 58,000  | 6,000  | 38,500,000     |
| 1870 . . . . . | 11,910,000 | 540,000    | 400,000 | 94,000  | 130,000 | 16,000 | 72,300,000     |
| 1885 . . . . . | 19,340,000 | 6,200,000  | 420,000 | 230,000 | 280,000 | 35,000 | 96,700,000     |
| 1895 . . . . . | 28,800,000 | 14,600,000 | 680,000 | 490,000 | 460,000 | 40,000 | 175,200,000    |

The prices of the above metals at the dates in question were as follows :—

| Date           | £ per Ton |       |      |        |      |     |
|----------------|-----------|-------|------|--------|------|-----|
|                | Iron      | Steel | Lead | Copper | Zinc | Tin |
| 1806 . . . . . | 8.0       | ...   | 35   | 190    | 25   | 120 |
| 1838 . . . . . | 5.1       | ...   | 22   | 90     | 17   | 90  |
| 1850 . . . . . | 5.7       | 60.0  | 17   | 86     | 21   | 78  |
| 1870 . . . . . | 3.0       | 31.5  | 20   | 75     | 19   | 125 |
| 1885 . . . . . | 2.2       | 5.1   | 11   | 48     | 13   | 95  |
| 1895 . . . . . | 2.4       | 4.6   | 11   | 46     | 14   | 64  |

See *Iron, Lead, Copper, &c.*, under their special headings. In the former table the item of steel reduplicates the value of the iron used in its production.

## METEOROLOGY

*Barometer.*—The highest reading on record is 31.63 at Barnaul, in Siberia, on December 16, 1877. It was observed the same day that the thermometer stood at 54.4 below zero, Fahr. The lowest reading of the barometer is 27.33 at Perth, Scotland, on Jan. 26, 1884.

*Thermometer.*—Six experiments were made simultaneously in balloons on November 17, 1896, with the following results, at different places, viz. :—

| Place          | Height, Feet | Fahrenheit | Place          | Height, Feet | Fahrenheit |
|----------------|--------------|------------|----------------|--------------|------------|
| Warsaw . . .   | 6,600        | -4         | Berlin . . .   | 19,700       | -14        |
| Munich . . .   | 11,500       | +20        | Strasbourg . . | 25,300       | -22        |
| St. Petersburg | 16,400       | -11        | Paris . . .    | 49,200       | -76        |

The condition of mining in 1876 and 1896 was approximately as follows :—

|                     | Miners               |           |      |      | Value, Millions £ |      | Tons per Miner |      | £ per Miner |      |
|---------------------|----------------------|-----------|------|------|-------------------|------|----------------|------|-------------|------|
|                     | Millions Tons Raised |           |      |      |                   |      |                |      |             |      |
|                     | 1876                 | 1896      | 1876 | 1896 | 1876              | 1896 | 1876           | 1896 | 1876        | 1896 |
| Great Britain . . . | 610,000              | 840,000   | 147  | 251  | 58                | 69   | 241            | 299  | 95          | 82   |
| France . . . . .    | 207,000              | 270,000   | 27   | 41   | 15                | 21   | 131            | 152  | 72          | 77   |
| Germany . . . . .   | 223,000              | 404,000   | 56   | 130  | 15                | 39   | 250            | 322  | 67          | 96   |
| Russia . . . . .    | 300,000              | 460,000   | 28   | 44   | 10                | 14   | 95             | 95   | 33          | 30   |
| Austria . . . . .   | 126,000              | 170,000   | 16   | 37   | 7                 | 13   | 56             | 77   | 55          | 77   |
| Italy . . . . .     | 36,000               | 63,000    | 2    | 4    | 2                 | 3    | 55             | 63   | 55          | 50   |
| Spain . . . . .     | 44,000               | 63,000    | 6    | 12   | 2                 | 4    | 135            | 190  | 45          | 60   |
| Sweden . . . . .    | 27,000               | 26,000    | 2    | 2    | 2                 | 2    | 70             | 70   | 75          | 75   |
| Belgium . . . . .   | 111,000              | 150,000   | 18   | 23   | 7                 | 10   | 160            | 152  | 60          | 65   |
| United States . . . | 230,000              | 526,000   | 77   | 233  | 70                | 101  | 330            | 444  | 300         | 190  |
| Canada . . . . .    | 6,000                | 18,000    | 1    | 4    | 1                 | 3    | 160            | 220  | 170         | 220  |
| Australia . . . . . | 90,000               | 110,000   | 8    | 10   | 11                | 14   | 90             | 90   | 120         | 127  |
| South Africa . . .  | 30,000               | 100,000   | ...  | 4    | 2                 | 14   | ...            | 400  | 70          | 140  |
| Total . . . . .     | 2,040,000            | 3,200,000 | 388  | 795  | 202               | 307  | 190            | 248  | 99          | 96   |

On September 16, 1898, Mr. Spencer ascended from the Crystal Palace to 27,000 feet, and found temperature minus 45 Fahr.

The greatest cold was until recently (see p. 397) believed to be a quotation at Yakutsk, Siberia, of minus 73 Fahr. in 1829, but Professor Hildebrandson, of Upsala, asserts that there has been a quotation of minus 68 Centigrade, equal to minus 90 Fahr., at Werchojansk in Siberia. The greatest cold records in Great Britain are :—

| Year           | Place               | Fahrenheit    |
|----------------|---------------------|---------------|
| 1796 . . . . . | London              | 16 below zero |
| 1879 . . . . . | Blackadder, Berwick | 18 " "        |
| 1895 . . . . . | Alford, Aberdeen    | 16 " "        |

The greatest heat recorded was 133 Fahr. in the shade at Mourzuk, India, but Professor Wrede's observation in Central Arabia is 57½ Centigrade, equal to 135½ Fahr. in the shade, while the heat in the sun was 194 Fahr.

At Liverpool in 1863 there was a hurricane which indicated 43 lbs. pressure per square foot, equal to 90 miles an hour.

See *Meteorology*, in Part I., pp. 388-398.

## MINING

The progress of this industry since 1860 is shown approximately as follows :—

| Year           | Hands Employed | Millions Tons Raised | Value, Millions £ | Tons per Miner |
|----------------|----------------|----------------------|-------------------|----------------|
| 1860 . . . . . | 1,016,000      | 183                  | 76                | 180            |
| 1876 . . . . . | 2,040,000      | 388                  | 202               | 190            |
| 1896 . . . . . | 3,200,000      | 795                  | 307               | 248            |

Each miner on an average raises 5 tons of mineral weekly, worth about 36 shillings. Wages are usually three-fourths of the value of output.

## UNITED KINGDOM

The weight of mineral has almost doubled since 1870, viz. :—

|                    | Tons        |             |
|--------------------|-------------|-------------|
|                    | 1870        | 1896        |
| Coal . . . . .     | 110,400,000 | 195,400,000 |
| Sundries . . . . . | 36,700,000  | 55,300,000  |
| Total . . . . .    | 147,100,000 | 250,700,000 |

The value rose from £46,100,000 in 1870, to £69,100,000 in 1896, including not only minerals but also the product of quarries, the figures for 1896 showing thus :—

|                    | Tons        | £ Sterling |
|--------------------|-------------|------------|
| Coal . . . . .     | 195,400,000 | 57,200,000 |
| Ores . . . . .     | 13,800,000  | 3,800,000  |
| Stone, &c. . . . . | 41,500,000  | 8,100,000  |
| Total . . . . .    | 250,700,000 | 69,100,000 |

Official returns in the *Statistical Abstract* give not the ores, but the metals obtained, and their value, while they exclude the product of quarries: thus they compare the figures for 1896 with 1886 as follows :—

|                   | Tons        |             | Value, £   |            |
|-------------------|-------------|-------------|------------|------------|
|                   | 1886        | 1896        | 1886       | 1896       |
| Coal . . . . .    | 157,500,000 | 195,400,000 | 38,100,000 | 57,200,000 |
| Iron . . . . .    | 7,010,000   | 8,660,000   | 15,900,000 | 20,700,000 |
| Lead, &c. . . . . | 60,000      | 40,000      | 1,800,000  | 800,000    |
| Total . . . . .   | 164,570,000 | 204,100,000 | 55,800,000 | 78,700,000 |

(This is a deceptive mode of estimating *mineral* products, since it even includes the value of pig iron produced from Spanish and Swedish ores.)

The real mining product and number of hands are shown thus :—

|                    | Hands   | Value, £   | £ per Hand |
|--------------------|---------|------------|------------|
| Minerals . . . . . | 726,000 | 61,000,000 | 84         |
| Quarries . . . . . | 113,000 | 8,100,000  | 72         |
| Total . . . . .    | 839,000 | 69,100,000 | 82         |

Royalties paid to the owners of coal and iron mines amount to £4,900,000 yearly, or 8 per cent. of the gross product. Loss of life averages one man killed for every million tons raised, whereas before 1870 the average was three killed per million tons. The total number of persons of this class was in 1896 as follows: under ground, 576,000; above ground, 150,000; in quarries, 114,000; total 840,000. Deaths of miners in the years 1851-55 averaged 43 per 10,000 yearly, and in 1891-95 the average had fallen to 15 per 10,000; this means a saving of 2000 lives yearly.

## FRANCE

The weight of mineral increased nearly 50 per cent. in ten years, viz. :—

|                    | Tons       |            | Value, £   |            |
|--------------------|------------|------------|------------|------------|
|                    | 1885       | 1896       | 1885       | 1896       |
| Coal . . . . .     | 19,500,000 | 28,000,000 | 9,200,000  | 12,300,000 |
| Iron ore . . . . . | 2,300,000  | 3,700,000  | 360,000    | 470,000    |
| Lead . . . . .     | 10,000     | 20,000     | 100,000    | 90,000     |
| Zinc . . . . .     | 170,000    | 320,000    | 129,000    | 300,000    |
| Salt . . . . .     | 640,000    | 870,000    | 460,000    | 480,000    |
| Peat . . . . .     | 190,000    | 130,000    | 80,000     | 70,000     |
| Total . . . . .    | 22,810,000 | 33,040,000 | 10,320,000 | 13,710,000 |

The quarries, moreover, produce  $8\frac{1}{2}$  million tons of stone and slate, valued at £6,800,000, which, added to the foregoing, makes a total output of  $20\frac{1}{2}$  millions sterling. There are 160,000 miners and 110,000 hands employed in quarries: the product of the former averages £86, of the latter £62, each.

## GERMANY

Since the formation of the Empire mining industry has more than trebled :—

|                | Tons        | Value, £   |
|----------------|-------------|------------|
| 1870 . . . . . | 39,000,000  | 12,400,000 |
| 1880 . . . . . | 68,000,000  | 17,700,000 |
| 1888 . . . . . | 95,000,000  | 23,800,000 |
| 1896 . . . . . | 131,000,000 | 39,300,000 |

This is exclusive of stone and other quarries, of which there are no returns, but of which the product may reach 10 million tons. The principal mining products were :—

|                      | 1876       | 1886       | 1896        |
|----------------------|------------|------------|-------------|
| Coal, tons . . . . . | 49,500,000 | 73,700,000 | 112,400,000 |
| Iron ore, . . . . .  | 4,700,000  | 8,500,000  | 14,200,000  |
| Zinc . . . . .       | 530,000    | 710,000    | 730,000     |
| Copper . . . . .     | 310,000    | 500,000    | 720,000     |
| Lead . . . . .       | 120,000    | 160,000    | 160,000     |
| Salt, . . . . .      | 750,000    | 1,390,000  | 2,540,000   |
| Total . . . . .      | 55,910,000 | 84,960,000 | 130,750,000 |

One-fourth of the coal is lignite or brown-coal. The best collieries are in Prussia, which produces 80 per cent. of the German total. About one-tenth of the coal raised is exported, home consumption reaching 100 million tons, or 2 tons per inhabitant. The ironstone of Silesia and Westphalia is inferior, giving only 36 per cent. of iron. The copper ore of Prussia and Saxony is likewise very poor, yielding only  $3\frac{1}{2}$  per cent. of bar copper, as compared with 18 per cent. obtained from American ore. The zinc mines of Prussia are very valuable, the ore giving 21 per cent. of metallic zinc, and producing 150,000 tons of metal, of which one-half is exported. The annual production of silver averages 400 tons, value £1,700,000, and of gold  $3\frac{1}{2}$  tons, value £500,000. In 1895 the total number of miners was 400,000, and the weight of mineral raised was 325 tons per man, against 180 tons in 1870. The number of miners killed or injured in ten years ending 1894 was in the ratio of 22 in 10,000 yearly.

## RUSSIA

Mining is chiefly confined to Siberia, where convict labour is used. The ores are very poor, for it takes 600,000 tons of quartz to produce 1 ton of gold, each ton

of quartz when crushed yielding only 5 shillings worth of gold. Production increases, viz. :—

|                   | Tons Gold<br>Yearly | Value, £  |
|-------------------|---------------------|-----------|
| 1871-80 . . . . . | 38                  | 5,300,000 |
| 1881-88 . . . . . | 35                  | 4,900,000 |
| 1890-95 . . . . . | 42                  | 5,900,000 |

The total weight of mineral raised shows as follows:—

|                   | Tons       |            |            |
|-------------------|------------|------------|------------|
|                   | 1888       | 1892       | 1895       |
| Quartz . . . . .  | 23,000,000 | 25,800,000 | 24,700,000 |
| Coal . . . . .    | 4,500,000  | 6,800,000  | 8,900,000  |
| Naphtha . . . . . | 1,900,000  | 4,500,000  | 6,900,000  |
| Salt . . . . .    | 1,200,000  | 1,400,000  | 1,500,000  |
| Ores . . . . .    | 900,000    | 1,200,000  | 1,700,000  |
| Total . . . . .   | 31,500,000 | 39,700,000 | 43,700,000 |

The value of all mineral products rose from 10 millions sterling in 1888 to 14 millions in 1895, the latter sum being equal to £31 per man: but for convict labour, it would not be possible to carry on mining for so poor a return. The total number of miners, convicts and free, is 460,000, the largest number in any country of the world except Great Britain and the United States. The weight of mineral raised per miner is only 93 tons, as compared with 285 tons in Great Britain.

## AUSTRIA

In 1860 the total mining industry of Austria-Hungary was 4 million tons, value £1,500,000. Since then it has grown ninefold, the output now exceeding 37 million tons, viz. :—

|                           | 1888       | 1895       |
|---------------------------|------------|------------|
| Coal, tons . . . . .      | 23,700,000 | 33,200,000 |
| Iron ore, " . . . . .     | 2,200,000  | 2,400,000  |
| Naphtha, " . . . . .      | 400,000    | 900,000    |
| Lead ores, &c., " . . . . | 300,000    | 300,000    |
| Salt, " . . . . .         | 400,000    | 500,000    |
| Total .. . . .            | 27,000,000 | 37,300,000 |

The shares that correspond to Austria and Hungary are shown as follows:—

|                    | Austria    |           | Hungary   |           |
|--------------------|------------|-----------|-----------|-----------|
|                    | Tons       | Value, £  | Tons      | Value, £  |
| Coal . . . . .     | 28,100,000 | 5,700,000 | 5,100,000 | 1,400,000 |
| Iron . . . . .     | 1,400,000  | 2,500,000 | 1,000,000 | 1,000,000 |
| Sundries . . . . . | 1,300,000  | 1,300,000 | 400,000   | 800,000   |
| Total . . . . .    | 30,800,000 | 9,500,000 | 6,500,000 | 3,200,000 |

Two-thirds of the coal is lignite, of which 8 million tons are exported yearly. The value of mineral products, excluding naphtha, has been as follows:—

| Year           | Austria, £ | Hungary, £ | Total, £   |
|----------------|------------|------------|------------|
| 1880 . . . . . | 4,700,000  | 1,500,000  | 6,200,000  |
| 1890 . . . . . | 7,700,000  | 2,400,000  | 10,100,000 |
| 1895 . . . . . | 8,800,000  | 3,200,000  | 12,000,000 |

There are 130,000 miners in Austria, and 40,000 in Hungary: the product averages £73 per hand in the former, £80 in the latter, country.

## ITALY

Mining is not remunerative, the average product per man being the lowest in the world except Russia. In 1895 the industry showed as follows:—

|                    | Hands  | Tons      | Value, £  | £ per Man |
|--------------------|--------|-----------|-----------|-----------|
| Sulphur . . . . .  | 22,000 | 2,400,000 | 600,000   | 27        |
| Ores, &c. . . . .  | 20,000 | 800,000   | 1,000,000 | 50        |
| Quarries . . . . . | 20,000 | 600,000   | 1,200,000 | 60        |
| Total . . . . .    | 62,000 | 3,800,000 | 2,800,000 | 45        |

## SPAIN

This branch of industry has grown tenfold since 1863, viz. :—

|                          | 1863      | 1890       | 1896       |
|--------------------------|-----------|------------|------------|
| Iron ore, tons . . . . . | 170,000   | 5,700,000  | 6,800,000  |
| Copper " " . . . . .     | 140,000   | 2,500,000  | 2,800,000  |
| Lead, &c. " " . . . . .  | 200,000   | 680,000    | 700,000    |
| Salt, " " . . . . .      | 400,000   | ...        | 350,000    |
| Coal, " " . . . . .      | 320,000   | 1,280,000  | 1,830,000  |
| Total .. . . .           | 1,230,000 | 10,160,000 | 12,480,000 |

There are 63,000 miners, and the output is valued at £4,000,000, which gives an average of £63 per miner.

## BELGIUM

Mining has increased 50 per cent. since 1870, viz. :—

|                       | 1870       | 1895       |
|-----------------------|------------|------------|
| Coal, tons . . . . .  | 13,700,000 | 20,500,000 |
| Sundries, " . . . . . | 1,900,000  | 2,700,000  |
| Total .. . . .        | 15,600,000 | 23,200,000 |

The output of coal is valued at £7,700,000, and the total mineral product at £10,000,000, including quarries, which give occupation to 32,000 hands, and the product of which reaches £1,500,000 yearly. Mines and quarries have altogether 150,000 workmen, the product averaging £67 each.

## SWEDEN

The returns of mining for 1895 compare with 1885 thus:—

|                          | 1885      | 1895      |
|--------------------------|-----------|-----------|
| Iron ore, tons . . . . . | 870,000   | 1,900,000 |
| Other ores, " . . . . .  | 90,000    | 100,000   |
| Coal, " . . . . .        | 170,000   | 220,000   |
| Total .. . . .           | 1,130,000 | 2,220,000 |

The total output is valued at £1,800,000, equal to £70 for each hand employed.

## CANADA

Mining products in 1896 compare with 1886 thus:—

|                   | Tons (short) |           | Value, £  |           |
|-------------------|--------------|-----------|-----------|-----------|
|                   | 1886         | 1896      | 1886      | 1896      |
| Coal . . . . .    | 2,400,000    | 3,700,000 | 1,060,000 | 1,450,000 |
| Ores, &c. . . . . | 270,000      | 840,000   | 420,000   | 1,700,000 |
| Naphtha . . . . . | 130,000      | 160,000   | 120,000   | 250,000   |
| Total . . . . .   | 2,800,000    | 4,700,000 | 1,600,000 | 3,400,000 |

Official returns bring up the total value to £4,500,000, but this perhaps includes metals.

## UNITED STATES

The weight of minerals raised in 1896 was four times as much as in 1870, viz:—

|                   | 1870       | 1896        |
|-------------------|------------|-------------|
| Coal, tons . . .  | 33,000,000 | 171,400,000 |
| Iron ore, " . . . | 3,200,000  | 11,000,000  |
| Quartz, &c. " . . | 20,200,000 | 50,600,000  |
| Total " . . .     | 56,400,000 | 233,000,000 |

The official value in 1870 was £66,600,000, and in 1896 rose to £129,000,000, an increase of 95 per cent., but the figures are not correct, silver being valued at 64 pence (instead of 28 pence) the ounce, and the value of pig iron substituted for that of iron ore. The real value of mineral products was as follows:—

|               | 1870<br>£  | 1890<br>£   | 1896<br>£   |
|---------------|------------|-------------|-------------|
| Coal . . .    | 20,600,000 | 36,800,000  | 40,800,000  |
| Iron ore . .  | 2,700,000  | 10,400,000  | 6,200,000   |
| Copper " . .  | 800,000    | 3,200,000   | 5,100,000   |
| Lead " . . .  | 800,000    | 1,300,000   | 1,100,000   |
| Petroleum . . | 10,000,000 | 7,300,000   | 12,200,000  |
| Gold . . .    | 10,200,000 | 6,900,000   | 11,000,000  |
| Silver . . .  | 3,200,000  | 11,000,000  | 7,000,000   |
| Sundries . .  | 11,000,000 | 29,800,000  | 17,800,000  |
| Total . . .   | 59,300,000 | 106,700,000 | 101,200,000 |

The official value of mining products in 1896 was £129,200,000, or 28 per cent. over the real value, being made up thus:—

|                | Official, £ | Real, £     |
|----------------|-------------|-------------|
| Coal . . .     | 40,800,000  | 40,800,000  |
| Iron ore . .   | 18,800,000  | 6,200,000   |
| Other ores . . | 14,000,000  | 7,400,000   |
| Petroleum . .  | 12,200,000  | 12,200,000  |
| Gold . . .     | 11,000,000  | 11,000,000  |
| Silver . . .   | 15,800,000  | 7,000,000   |
| Stone . . .    | 7,900,000   | 7,900,000   |
| Sundries . .   | 8,700,000   | 8,700,000   |
| Total . . .    | 129,200,000 | 101,200,000 |

The States which produce coal and iron are the following:—

|                    | Tons        |           |
|--------------------|-------------|-----------|
|                    | Coal        | Pig Iron  |
| Pennsylvania . . . | 92,800,000  | 4,000,000 |
| Illinois . . .     | 17,700,000  | 900,000   |
| Ohio . . .         | 11,500,000  | 1,200,000 |
| Virginia . . .     | 12,600,000  | 500,000   |
| Alabama . . .      | 5,100,000   | 900,000   |
| Various . . .      | 31,700,000  | 1,100,000 |
| The Union . . .    | 171,400,000 | 8,600,000 |

The extraction of iron, copper, and lead ore has been as follows:—

|                    | 1870      | 1889       | 1896       |
|--------------------|-----------|------------|------------|
| Iron ore, tons . . | 3,200,000 | 13,300,000 | 11,000,000 |
| Copper " . . .     | 80,000    | 600,000    | 1,200,000  |
| Lead " . . .       | 100,000   | 250,000    | 250,000    |
| Zinc " . . .       | ...       | 250,000    | 400,000    |
| Total " . . .      | 3,380,000 | 14,400,000 | 12,850,000 |

Iron ore gives 40 per cent., copper 17, lead 70, and zinc 20 per cent. of metal. The yield of petroleum increases year by year, at present reaching 61 million barrels, or a little over 12 million tons; about 60,000 wells have been sunk since 1859, of which 6000 are working, the annual yield in barrels of 42 gallons showing thus:—

| Barrels        | 1860-83   | 1881-83    | 1896       |
|----------------|-----------|------------|------------|
| Raised . . .   | 7,800,000 | 33,800,000 | 61,000,000 |
| Exported . . . | 3,600,000 | 13,200,000 | 23,000,000 |
| Home use . . . | 4,200,000 | 20,600,000 | 38,000,000 |

Home consumption averages 23 gallons, or a little over half a barrel, per inhabitant.

The extraction of gold quartz and silver ore is estimated according to the yield of those metals, a ton of the former giving usually half an ounce, and of the latter 40 ounces, of pure metal. Thus the weight of ores may be set down as follows:—

| Year       | Tons        |            | Ounces    |            |
|------------|-------------|------------|-----------|------------|
|            | Gold Quartz | Silver Ore | Gold      | Silver     |
| 1850 . . . | 4,800,000   | ...        | 2,400,000 | ...        |
| 1860 . . . | 4,400,000   | ...        | 2,200,000 | ...        |
| 1870 . . . | 4,800,000   | 300,000    | 2,400,000 | 13,000,000 |
| 1880 . . . | 3,500,000   | 750,000    | 1,750,000 | 30,000,000 |
| 1890 . . . | 3,200,000   | 1,400,000  | 1,590,000 | 55,000,000 |
| 1896 . . . | 5,000,000   | 1,500,000  | 2,570,000 | 59,000,000 |

A detailed statement of the yield of precious metals since 1850 is given at page 738. The following table shows the auriferous and argentiferous States in 1890 and 1896:—

|                  | Gold, Ounces |           | Silver, Ounces |            |
|------------------|--------------|-----------|----------------|------------|
|                  | 1890         | 1896      | 1890           | 1896       |
| California . . . | 630,000      | 650,000   | 900,000        | 600,000    |
| Colorado . . .   | 210,000      | 740,000   | 18,700,000     | 22,500,000 |
| Montana . . .    | 160,000      | 210,000   | 15,700,000     | 16,600,000 |
| Dakota . . .     | 160,000      | 250,000   | 100,000        | 200,000    |
| Utah . . .       | 30,000       | 90,000    | 7,900,000      | 8,800,000  |
| Idaho . . .      | 90,000       | 110,000   | 3,600,000      | 5,100,000  |
| Arizona . . .    | 50,000       | 130,000   | 1,000,000      | 1,800,000  |
| Nevada . . .     | 140,000      | 120,000   | 4,300,000      | 1,000,000  |
| Alaska . . .     | 40,000       | 100,000   | ...            | 100,000    |
| N. Mexico . . .  | 40,000       | 20,000    | 1,200,000      | 700,000    |
| Washington . .   | 10,000       | 20,000    | 100,000        | 300,000    |
| Various . . .    | 30,000       | 130,000   | 1,000,000      | 1,100,000  |
| The Union . . .  | 1,590,000    | 2,570,000 | 54,500,000     | 58,800,000 |

The mining for the precious metals from 1849 to 1897 may be summed up thus:—

|              | Tons Ore    | Tons Metal | Value, £    |
|--------------|-------------|------------|-------------|
| Gold . . .   | 216,000,000 | 3,080      | 431,000,000 |
| Silver . . . | 29,000,000  | 33,700     | 231,000,000 |
| Total . . .  | 245,000,000 | 36,780     | 662,000,000 |

The number of persons engaged in mining rose from 234,000 in 1880 to 505,000 in 1890.

## SOUTH AFRICA

The Kimberley diamond-fields were discovered in 1871, the Transvaal gold-fields in 1887, the quantities and value exported yearly showing as follows :—

| Years         | Diamonds  |           | Gold      |           |
|---------------|-----------|-----------|-----------|-----------|
|               | Carats    | Value, £  | Ounces    | Value, £  |
| 1881-85 . . . | ...       | 3,240,000 | 10,000    | 40,000    |
| 1886-90 . . . | 3,200,000 | 4,060,000 | 250,000   | 920,000   |
| 1891-94 . . . | 2,900,000 | 3,750,000 | 1,450,000 | 5,050,000 |
| 1895 . . .    | 3,600,000 | 4,800,000 | 2,380,000 | 8,200,000 |

In 1897 the Transvaal gold-fields produced £11,100,000. The copper-mines of Cape Colony yield about £300,000 per annum. The total mining output of South Africa is about 16 millions sterling yearly. The Kimberley diamond-fields have produced in 27 years about 62 million carats of diamonds, worth 84 millions sterling: the Transvaal gold-fields in 10 years have yielded 15,500,000 ounces, worth 52 millions sterling.

## AUSTRALIA

Official returns of mining products since 1850 are :—

|              | Yearly Product, £ |            |            | Total, £    |
|--------------|-------------------|------------|------------|-------------|
|              | 1850-88           | 1889-95    | 1896       |             |
| Gold . . .   | 8,600,000         | 7,200,000  | 9,000,000  | 388,500,000 |
| Silver . . . | 100,000           | 2,800,000  | 2,100,000  | 25,300,000  |
| Copper . . . | 700,000           | 200,000    | 400,000    | 27,700,000  |
| Tin, &c. . . | 500,000           | 400,000    | 400,000    | 21,400,000  |
| Coal . . .   | 700,000           | 1,800,000  | 1,800,000  | 40,300,000  |
| Total . . .  | 10,600,000        | 12,400,000 | 13,700,000 | 503,200,000 |

The total value for forty-six years was made up thus :—

|                       | Value, £ (000 omitted) |        |          |         |
|-----------------------|------------------------|--------|----------|---------|
|                       | Gold                   | Silver | Sundries | Total   |
| New South Wales . . . | 43,400                 | 22,400 | 44,600   | 110,400 |
| Victoria . . . . .    | 244,100                | 800    | 1,700    | 246,600 |
| New Zealand . . . .   | 52,400                 | 200    | 5,900    | 58,500  |
| Queensland . . . . .  | 39,200                 | 700    | 8,500    | 48,400  |
| South Australia . . . | 1,900                  | 100    | 21,500   | 23,500  |
| Tasmania . . . . .    | 3,400                  | 1,100  | 6,800    | 11,300  |
| West Australia . . .  | 4,100                  | ...    | 400      | 4,500   |
| Total . . . . .       | 388,500                | 25,300 | 89,400   | 503,200 |

The value of mining products in 1896 was as follows :—

|                       | £ Sterling (000 omitted) |        |       |          |        |
|-----------------------|--------------------------|--------|-------|----------|--------|
|                       | Gold                     | Silver | Coal  | Sundries | Total  |
| New South Wales . . . | 1,070                    | 1,790  | 1,130 | 360      | 4,350  |
| Victoria . . . . .    | 3,220                    | 10     | 110   | ...      | 3,340  |
| New Zealand . . . .   | 1,040                    | 10     | 430   | ...      | 1,480  |
| Queensland . . . . .  | 2,240                    | 30     | 150   | 110      | 2,530  |
| South Australia . . . | 100                      | ...    | ...   | 220      | 320    |
| Tasmania . . . . .    | 240                      | 220    | 20    | 160      | 640    |
| West Australia . . .  | 1,070                    | ...    | ...   | ...      | 1,070  |
| Total . . . . .       | 8,980                    | 2,060  | 1,840 | 850      | 13,730 |

In 1891 the number of miners was 94,000, at present it may be estimated at 110,000; the average product being £114 per annum for gold-miners, and £155 for colliers.

## OTHER COUNTRIES

India and China produce each about 400,000 ounces of gold yearly; Spanish America 800,000 ounces of gold and 2400 tons of silver. The aggregate value of these items is 14 millions sterling, which is not included in the general table of mining values already given at page 773.

## MISSIONS

The Amer. Stat. Ass. (1893) publishes the following statement as to the number of Christians in Asia and Africa :—

|                       | India     | China     | Siberia   | Japan  | Syria, &c. | Africa    | Total      |
|-----------------------|-----------|-----------|-----------|--------|------------|-----------|------------|
| Roman Catholics . . . | 1,199,000 | 1,116,000 | 70,000    | 30,000 | 663,000    | 2,660,000 | 5,738,000  |
| Protestants . . . . . | 534,000   | 88,000    | 20,000    | ...    | 20,000     | 1,740,000 | 2,402,000  |
| Greeks, &c. . . . .   | ...       | ...       | 7,000,000 | ...    | 3,660,000  | 3,000,000 | 13,660,000 |
| Total . . . . .       | 1,733,000 | 1,204,000 | 7,090,000 | 30,000 | 4,343,000  | 7,400,000 | 21,800,000 |

The item Greeks, &c., includes Copts, who number 3 millions in Africa.

## MONEY

The following table, from the United States Mint Report, shows the money now in use :—

|                    | £ Sterling (000 omitted) |         |                  |         | Gold Ratio |
|--------------------|--------------------------|---------|------------------|---------|------------|
|                    | Gold                     | Silver  | Un-covered Paper | Total   |            |
| G. Britain . . .   | 122,000                  | 25,000  | 23,300           | 170,300 | 71.8       |
| France . . . . .   | 160,600                  | 102,400 | 3,900            | 266,900 | 60.0       |
| Germany . . . . .  | 140,400                  | 43,000  | 26,200           | 209,600 | 66.8       |
| Russia . . . . .   | 101,600                  | 9,000   | 97,000           | 207,600 | 49.0       |
| Austria . . . . .  | 34,800                   | 13,500  | 42,500           | 90,800  | 38.3       |
| Italy . . . . .    | 20,900                   | 8,100   | 35,000           | 64,000  | 32.7       |
| Spain . . . . .    | 8,000                    | 10,300  | 21,400           | 39,700  | 20.2       |
| Portugal . . . . . | 1,000                    | 1,500   | 12,600           | 15,100  | 6.7        |
| Scandinavia . . .  | 6,800                    | 2,500   | 1,700            | 11,000  | 61.8       |
| Holland . . . . .  | 5,600                    | 11,700  | 6,700            | 24,000  | 23.3       |
| Belgium . . . . .  | 10,400                   | 11,900  | 15,100           | 37,400  | 27.7       |

|                     | £ Sterling (000 omitted) |         |                  |           | Gold Ratio |
|---------------------|--------------------------|---------|------------------|-----------|------------|
|                     | Gold                     | Silver  | Un-covered Paper | Total     |            |
| Switzerland . . .   | 3,300                    | 400     | 3,000            | 6,700     | 49.0       |

The following table shows, according to Mr. Fred. Atkinson, the increase of gold money during the period since 1851:—

|                     | Millions £ Sterling |       |          | Weight, Mill. Oz. |       |
|---------------------|---------------------|-------|----------|-------------------|-------|
|                     | 1851                | 1896  | Increase | 1851              | 1896  |
| U. Kingdom . . .    | 41.5                | 122.0 | 80.5     | 10.8              | 31.9  |
| France . . . . .    | 3.0                 | 160.6 | 157.6    | 0.8               | 41.8  |
| Germany . . . . .   | 3.0                 | 140.4 | 137.4    | 0.8               | 36.5  |
| Russia . . . . .    | 30.8                | 101.6 | 70.8     | 8.0               | 26.4  |
| Austria . . . . .   | 2.0                 | 34.8  | 32.8     | 0.5               | 9.0   |
| Italy . . . . .     | 2.0                 | 20.9  | 18.9     | 0.5               | 5.4   |
| Spain . . . . .     | 18.0                | 8.0   | ...      | 4.7               | 2.1   |
| Portugal . . . . .  | 3.0                 | 1.0   | ...      | 0.8               | 0.2   |
| Scandinavia . . . . | 2.0                 | 6.8   | 4.8      | 0.5               | 1.8   |
| Holland . . . . .   | 14.0                | 5.6   | ...      | 3.6               | 1.4   |
| Belgium . . . . .   | 1.0                 | 10.4  | 9.4      | 0.2               | 2.7   |
| Switzerland . . . . | 1.0                 | 3.3   | 2.3      | 0.2               | 0.8   |
| Turkey, &c. . . . . | 4.5                 | 19.0  | 14.5     | 1.2               | 5.0   |
| Europe . . . . .    | 125.8               | 634.4 | 508.6    | 32.6              | 165.0 |
| United States . . . | 15.0                | 139.8 | 124.8    | 3.9               | 36.4  |
| Japan . . . . .     | 20.0                | 16.0  | ...      | 5.2               | 4.2   |
| India, &c. . . . .  | 19.2                | 75.8  | 56.6     | 5.0               | 19.7  |
| The World . . . . . | 180.0               | 866.0 | 686.0    | 46.7              | 225.3 |

The increase of silver money in the same interval was as follows:—

|                      | Millions £ Sterling |       |          | Weight Millions Oz. |       |
|----------------------|---------------------|-------|----------|---------------------|-------|
|                      | 1851                | 1896  | Increase | 1851                | 1896  |
| United Kingdom . .   | 14.0                | 25.4  | 11.4     | 52                  | 85    |
| France . . . . .     | 100.0               | 102.5 | 2.5      | 362                 | 371   |
| Germany . . . . .    | 35.0                | 43.1  | 8.1      | 127                 | 140   |
| Russia . . . . .     | 21.2                | 9.1   | ...      | 78                  | 28    |
| Austria . . . . .    | 7.0                 | 13.5  | 6.5      | 26                  | 46    |
| Italy . . . . .      | 5.0                 | 8.1   | 3.1      | 18                  | 28    |
| Spain . . . . .      | 6.0                 | 10.3  | 4.3      | 22                  | 35    |
| Portugal . . . . .   | 3.0                 | 1.5   | ...      | 11                  | 5     |
| Scandinavia . . . .  | 9.0                 | 2.6   | ...      | 33                  | 9     |
| Holland . . . . .    | 12.0                | 11.7  | ...      | 44                  | 43    |
| Belgium . . . . .    | 3.0                 | 11.9  | 8.9      | 11                  | 43    |
| Switzerland . . . .  | 3.0                 | 0.4   | ...      | 11                  | 1     |
| Turkey, &c. . . . .  | 6.0                 | 12.6  | 6.6      | 22                  | 46    |
| Europe . . . . .     | 224.2               | 252.7 | 28.5     | 817                 | 880   |
| United States . . .  | 25.8                | 131.7 | 105.9    | 94                  | 470   |
| Japan . . . . .      | 3.0                 | 9.1   | 6.1      | 11                  | 35    |
| Other Countries . .  | 49.0                | 392.5 | 343.5    | 179                 | 1,395 |
| *The World . . . . . | 302.0               | 786.0 | 484.0    | 1,101               | 2,780 |

The item of Other Countries for 1896 includes the following:—

|                     | £ Sterling, Nom. | Ounces        |
|---------------------|------------------|---------------|
| India . . . . .     | 232,300,000      | 799,000,000   |
| China . . . . .     | 70,000,000       | 264,000,000   |
| Singapore . . . . . | 40,000,000       | 151,000,000   |
| Ceylon . . . . .    | 15,000,000       | 52,000,000    |
| Mexico . . . . .    | 20,200,000       | 76,000,000    |
| South America . . . | 9,800,000        | 36,000,000    |
| Cuba, &c. . . . .   | 5,200,000        | 17,000,000    |
| Total . . . . .     | 392,500,000      | 1,395,000,000 |

The following table compares the amount of money in

various countries with the industries of same, and also with population:—

|                     | Millions £ |       | Money Ratio to Industries Per Cent. | Shillings per Head |
|---------------------|------------|-------|-------------------------------------|--------------------|
|                     | Industries | Money |                                     |                    |
| United Kingdom . .  | 1,360      | 170   | 12.5                                | 85                 |
| France . . . . .    | 1,169      | 267   | 22.8                                | 140                |
| Germany . . . . .   | 1,288      | 210   | 16.3                                | 80                 |
| Russia . . . . .    | 1,073      | 208   | 19.4                                | 38                 |
| Austria . . . . .   | 744        | 91    | 12.2                                | 44                 |

| The World . . . . . | 1,050         | 490  | 1,540 | 11,060 | 590         | 350             | 940  | 103,400 |       |             |

It is supposed that the gold coin in use has been so far reminted that the actual amount used for coinage has been between 40 and 50 per cent. of the nominal weight. say 5400 tons, in the last fifty years. Thus in 1885 Spallart estimated the existing amount of gold coin in the world at 5925 tons, and since that date the amount minted by all nations has been 360 millions sterling, or 2600 tons. Assuming that 60 per cent. of this was new metal, the actual weight of gold coin now in use would be 6500 tons, as stated above, leaving 2660 tons uncoined. Allowing for recoinage, the amount of new silver minted since 1850 appears to be 52,000 tons, or half the nominal weight shown above. This would make the total weight of existing silver money in the world to be 97,000 tons. Spallart's estimate in 1885 was 88,100 tons, since which date the United States alone have coined 9000 tons, while other countries have done little more than remint old silver.

Gold and silver money were alike legal tender in England till 1664, when gold was demonetised, and silver only legal. In 1717 both were again made legal, till 1775, when gold was adopted, and only small debts, under £25, could be discharged in silver. Forced currency, Bank of England notes, prevailed from 1797 till 1816, when the gold standard was established, silver being legal only up to 40 shillings. In coining gold the British Government has a profit of a halfpenny in £10, or about £200 per million. In 1830 the shilling coin had nearly 11½ pence (11.3) of silver, the profit accruing to the Mint being 6 per cent., or £60,000 per million. In 1898 the shilling has only 5 pence of silver, and the profit to Government is £600,000 per million. The Mint price of gold is £3, 17s. 10½d., or 934½ pence per ounce, as fixed in 1717.

The total amount of hard money in the world, taking silver throughout at its nominal value, shows as follows:—

|                           | Millions £ Stg. |         | Shills. per Inhab. |      |
|---------------------------|-----------------|---------|--------------------|------|

| The World . . . . . | 1,540               | 686            | 854           | 940    | 484            | 456           |

The output of the British Mint since 1891 has been as follows:—

|                   | £ Sterling (ooo omitted) |        |        |        |
|-------------------|--------------------------|--------|--------|--------|
|                   | Gold                     | Silver | Bronze | Total  |
| 1891 . . . . .    | 6,720                    | 1,000  | 90     | 7,810  |
| 1892 . . . . .    | 13,910                   | 850    | 60     | 14,820 |
| 1893 . . . . .    | 9,270                    | 1,010  | 50     | 10,330 |
| 1894 . . . . .    | 5,670                    | 940    | 30     | 6,640  |
| 1895 . . . . .    | 3,810                    | 1,200  | 40     | 5,050  |
| 1896 . . . . .    | 4,810                    | 1,230  | 120    | 6,160  |
| 1897 . . . . .    | 1,820                    | 720    | ...    | 2,540  |
| 7 years . . . . . | 46,010                   | 6,950  | 390    | 53,350 |

The Treasury report for 1898 shows that light gold coin withdrawn from circulation since 1891 amounted to £34,200,000: the loss on 100 sovereigns was 246 pence, or 1.02 per cent., and on 100 half-sovereigns 216 pence, or 1.80 per cent. The loss to the Treasury in making the conversion was £540,000, being £16 per thousand, or 4 pence in the £. In the same period the Treasury withdrew from circulation old silver money to the value of £1,900,000. It appears that of the gold money withdrawn only £2,420,000 was pre-Victorian, while £31,800,000 was composed of sovereigns and half-sovereigns issued since 1837, and which had lost weight.

The activity of money, or rapidity of circulation, varies exceedingly in countries: in some it is found that money does its work over 100 times a year. Returns for five years ending December 1894 show that the number of payments effected yearly by the money employed in banks was as follows:—

#### Bank of

|                   |     |                   |     |                    |    |
|-------------------|-----|-------------------|-----|--------------------|----|
| Germany . . . . . | 167 | Belgium . . . . . | 133 | Portugal . . . . . | 25 |
| France . . . . .  | 127 | Italy . . . . .   | 30  | Spain . . . . .    | 14 |

The latest banking statement of the relative use of coin, notes, and cheques in the United Kingdom showed the following ratios:—

|                   | London | Dublin | Edinburgh | Rural |
|-------------------|--------|--------|-----------|-------|
| Coin . . . . .    | 7      | 16     | 5         | 152   |
| Notes . . . . .   | 21     | 85     | 127       | 119   |
| Cheques . . . . . | 972    | 899    | 868       | 729   |
|                   | 1,000  | 1,000  | 1,000     | 1,000 |

The ratios in the Bank of France at various dates were:—

|                   | 1841  | 1861  | 1881  | 1896  |
|-------------------|-------|-------|-------|-------|
| Coin . . . . .    | 94    | 110   | 53    | 21    |
| Notes . . . . .   | 373   | 342   | 293   | 238   |
| Cheques . . . . . | 533   | 548   | 674   | 741   |
|                   | 1,000 | 1,000 | 1,000 | 1,000 |

In Belgium the banking census puts notes and cheques together, viz.:—

|                 | 1871  | 1881  | 1891  | 1896  |
|-----------------|-------|-------|-------|-------|
| Coin . . . . .  | 76    | 63    | 49    | 37    |
| Paper . . . . . | 924   | 937   | 951   | 963   |
|                 | 1,000 | 1,000 | 1,000 | 1,000 |

The money of the United States in 1897 compared with previous dates as follows:—

|                    | Millions £ Sterling |       |       |
|--------------------|---------------------|-------|-------|
|                    | 1880                | 1887  | 1897  |
| Gold* . . . .      | 73.2                | 136.1 | 144.8 |
| Silver . . . .     | 29.8                | 73.4  | 131.4 |
| Greenbacks . . . . | 79.6                | 129.6 | 195.0 |
| Bank-notes . . . . | 71.8                | 58.1  | 47.8  |
| Total . . . .      | 254.4               | 397.2 | 519.0 |

The money of 1897 was made up thus:—

|                             | Millions £ Sterling |                |       |
|-----------------------------|---------------------|----------------|-------|
|                             | In Treasury         | In Circulation | Total |
| Gold . . . .                | 37.1                | 107.7          | 144.8 |
| Silver . . . .              | 108.4               | 23.0           | 131.4 |
| Certificates . . . .        | 4.2                 | 94.8           | 99.0  |
| United States notes . . . . | 27.4                | 68.6           | 96.0  |
| Bank-notes . . . .          | 1.0                 | 46.8           | 47.8  |
| Total . . . .               | 178.1               | 340.9          | 519.0 |

The following table compares the money of 1887 and 1897 thus:—

|                           | Hard Money, Millions £ |       |                |       |       |       |
|---------------------------|------------------------|-------|----------------|-------|-------|-------|
|                           | In Treasury            |       | In Circulation |       | Total |       |
|                           | 1887                   | 1897  | 1887           | 1897  | 1887  | 1897  |
| Gold . . . .              | 57.8                   | 37.1  | 78.3           | 107.7 | 136.1 | 144.8 |
| Silver . . . .            | 51.8                   | 108.4 | 21.6           | 23.0  | 73.4  | 131.4 |
| Total . . . .             | 109.6                  | 145.5 | 99.9           | 130.7 | 209.5 | 276.2 |
|                           | Paper Money            |       |                |       |       |       |
|                           | In Treasury            |       | In Circulation |       | Total |       |
|                           | 1887                   | 1897  | 1887           | 1897  | 1887  | 1897  |
| U. S. notes . . . .       | 6.0                    | 27.4  | 66.2           | 68.6  | 72.2  | 96.0  |
| Gold certificates . . . . | 6.3                    | 0.3   | 19.0           | 7.8   | 25.3  | 8.1   |
| Silver do. . . .          | 0.7                    | 3.9   | 31.4           | 87.0  | 32.1  | 90.9  |
| Bank-notes . . . .        | 0.5                    | 1.0   | 57.6           | 46.8  | 58.1  | 47.8  |
| Total paper . . . .       | 13.5                   | 32.6  | 174.2          | 210.2 | 187.7 | 242.8 |
| Grand total . . . .       | 123.1                  | 178.1 | 274.1          | 340.9 | 397.2 | 519.0 |

The total reduced to ratios shows as follows:—

|                     | 1887        |                |       | 1897        |                |       |
|---------------------|-------------|----------------|-------|-------------|----------------|-------|
|                     | In Treasury | In Circulation | Total | In Treasury | In Circulation | Total |
| Gold . . . .        | 14.5        | 19.7           | 34.2  | 7.1         | 20.8           | 27.9  |
| Silver . . . .      | 13.1        | 5.4            | 18.5  | 20.9        | 4.4            | 25.3  |
| U. S. notes . . . . | 3.3         | 29.4           | 32.7  | 6.1         | 31.5           | 37.6  |
| Bank-notes . . . .  | 0.1         | 14.5           | 14.6  | 0.2         | 9.0            | 9.2   |
| Total . . . .       | 31.0        | 69.0           | 100.0 | 34.3        | 65.7           | 100.0 |

\* To be read thus: Gold, £73,200,000.

The amount of money compared with population was as follows:—

|              | Millions £ Sterling |       |       | £ per Inhab. |
|--------------|---------------------|-------|-------|--------------|
|              | Metal               | Paper | Total |              |
| 1880 . . . . | 103                 | 151   | 254   | 5.1          |
| 1887 . . . . | 209                 | 188   | 397   | 6.7          |
| 1897 . . . . | 276                 | 243   | 519   | 7.1          |

In the United States it is shown by Prof. Fisher that the amount of cheques used in 1891 reached 159 milliards of dollars, equal to 33,000 millions of pounds sterling, or 80 times the sum of all money (coin and notes) then existing in that country.

See *Clearing-Houses*, page 77, and page 642.

*Gold and Silver Money*.—Guthrie's table of the coins in use in 1774 was as follows:—

|                  | Gold Coin | Value, Shillings | Silver Coin | Value, Pence |
|------------------|-----------|------------------|-------------|--------------|
| English . . . .  | Guinea    | 21               | Shilling    | 12           |
| Scotch . . . .   | "         | 24½              | "           | 10           |
| Irish . . . .    | "         | 22½              | Taken       | 10           |
| France . . . .   | Louis     | 20               | Livre       | 10           |
| Poland . . . .   | Ducat     | 9                | Florin      | 14           |
| Denmark . . . .  | "         | 8                | Crown       | 36           |
| Portugal . . . . | Moidore   | 27               | Cruzado     | 32           |
| " . . . .        | Milree    | 6                | Testoon     | 6            |
| Spain . . . .    | Ducat     | 5                | Dollar      | 43           |
| Germany . . . .  | Thaler    | 3½               | Florin      | 14           |
| Flanders . . . . | Ducat     | 9½               | "           | 18           |
| Holland . . . .  | Dollar    | 4½               | Guilder     | 21           |
| Russia . . . .   | Rouble    | 4½               | ro-kopec    | 5            |
| Italy . . . .    | Scudo     | 4½               | Florin      | 0            |
| Turkey . . . .   | Sequin    | 7½               | Piastre     | 48           |
| India . . . .    | Doubloon  | 63               | Rupce       | 30           |

In France the livre contained the value of 20 sous, and there was also an ecu of 60 sous. In Holland the guilder was worth 21 copper stivers, each one penny, and in Flanders the florin had 18 stivers. In Germany the florin had 36 groschen, of which 2½ made one penny English. In Austria the thaler, as in Germany, was worth 42 pence, but there was also a gulden worth 30 pence or 60 kreutzers. In Denmark the crown had 60 skillings, 20 of which were worth 12 pence. The Russian rouble had 100 kopecks or half-pence. The Spanish dollar had 8 reals, worth 5½ pence each.

## MORTGAGES

### ITALY

Rural mortgages rose from 198 millions sterling in 1880 to 250 millions in 1892, showing an average increase of £4,700,000 per annum.

### PRUSSIA

The average increase of rural mortgages in 1886 to 1889 was £5,700,000 per annum: from 1887 to 1895 it was £8,800,000 per annum. The increase of mortgages in Prussia from 1886 to 1895 was 311 millions sterling, or 34½ millions per annum. Berlin had new mortgages in 1895 for £28,800,000.

### SWEDEN

Rural mortgages in 1886 amounted to £51,000,000, or 25 per cent. of the value of farms in the kingdom: the average increase during 10 years was £1,400,000 per annum.

### EGYPT

In 1894 rural mortgages amounted to £20,500,000.

## RUSSIA

In 1895 there were mortgages amounting to £169,600,000 on 124 million acres, or 27 shillings per acre.

## VARIOUS COUNTRIES

Rural mortgages in 1887, according to Sbrojavacca, were approximately as follows:—

|                   | Millions £ | Per Cent. of Property |
|-------------------|------------|-----------------------|
| France . . . . .  | 402        | 13                    |
| Italy . . . . .   | 196        | 14                    |
| Holland . . . . . | 60         | 20                    |
| Austria . . . . . | 450        | 25                    |
| Germany . . . . . | 750        | 30                    |
| Ireland . . . . . | 160        | 40                    |

Mortgages registered in the United States from 1880 to 1890, were as follows:—

|                 | Number    | Millions £ | Average, £ |
|-----------------|-----------|------------|------------|
| Urban . . . . . | 4,771,000 | 1,498      | 315        |
| Rural . . . . . | 4,747,000 | 1,020      | 214        |
| Total . . . . . | 9,518,000 | 2,518      | 265        |

The total amount of existing mortgages on January 1, 1890, was only half the foregoing, viz.:—

|                 | Number    | Millions £ | Average, £ |
|-----------------|-----------|------------|------------|
| Urban . . . . . | 2,475,000 | 792        | 320        |
| Rural . . . . . | 2,303,000 | 460        | 200        |
| Total . . . . . | 4,778,000 | 1,252      | 262        |

The following table shows the amount of urban and rural mortgages, the value of city property and farms, and the ratio of mortgages to such property:—

| States          | Millions £ Sterling |       |          |       | Mortgage Ratio |       |
|-----------------|---------------------|-------|----------|-------|----------------|-------|
|                 | Mortgages           |       | Property |       |                |       |
|                 | Urban               | Rural | Urban    | Rural | Urban          | Rural |
| New England .   | 87                  | 21    | 705      | 122   | 12.3           | 17.3  |
| Middle . . . .  | 448                 | 90    | 1,962    | 549   | 22.8           | 16.4  |
| Southern . . .  | 29                  | 55    | 597      | 610   | 4.8            | 9.0   |
| Prairie . . . . | 183                 | 249   | 1,675    | 1,770 | 11.0           | 14.1  |
| Pacific . . . . | 45                  | 45    | 615      | 272   | 7.3            | 16.6  |
| The Union . .   | 792                 | 460   | 5,554    | 3,323 | 7.1            | 13.8  |

| States          | Millions £ Stg. |            | Interest, £ Yearly | Average Rate | Interest Shills. per Inhab. |
|-----------------|-----------------|------------|--------------------|--------------|-----------------------------|
|                 | Mortgages       | Properties |                    |              |                             |
| N. England .    | 108             | 827        | 6,100,000          | 5.6          | 26                          |
| Middle . . . .  | 538             | 2,511      | 29,950,000         | 5.6          | 42                          |
| South . . . .   | 84              | 1,207      | 6,700,000          | 8.0          | 7                           |
| Prairie . . . . | 32              | 3,445      | 32,400,000         | 7.5          | 29                          |
| Pacific . . . . | 90              | 887        | 7,500,000          | 8.3          | 50                          |
| The Union . .   | 1,252           | 8,877      | 82,650,000         | 6.6          | 27                          |

Rural mortgages covered 274 million acres, being an average of 119 to each mortgage: the amount was 460 millions sterling, an average of 33 shillings per acre mortgaged, and the annual interest was £33,800,000, equal to 30 pence per acre.

See *Mortgages*, in Part I., page 413.

## N

## NAMES

The following names occur among 1210 members in five Parliaments of the fourteenth, fifteenth, and sixteenth centuries:—

|                  | Date |      |      | In Five Parliaments |
|------------------|------|------|------|---------------------|
|                  | 1314 | 1450 | 1529 |                     |
| John . . . . .   | 50   | 77   | 76   | 338                 |
| William . . . .  | 34   | 52   | 47   | 188                 |
| Thomas . . . .   | 15   | 55   | 43   | 169                 |
| Robert . . . .   | 20   | 17   | 16   | 95                  |
| Richard . . . .  | 10   | 20   | 23   | 91                  |
| Henry . . . . .  | 10   | 6    | 13   | 39                  |
| Walter . . . .   | 11   | 4    | 1    | 26                  |
| Roger . . . . .  | 5    | 3    | 4    | 26                  |
| Edward . . . .   | 0    | 2    | 15   | 20                  |
| Nicholas . . . . | 7    | 1    | 0    | 18                  |
| Ralph . . . . .  | 2    | 1    | 1    | 15                  |
| Hugh . . . . .   | 3    | 4    | 3    | 14                  |
| Various . . . .  | 40   | 24   | 61   | 171                 |
| Total . . . . .  | 207  | 266  | 303  | 1,210               |

In the aggregate of the five Parliaments the following names occur the number of times expressed:—

|                 | Times |                 | Times |                 | Times |
|-----------------|-------|-----------------|-------|-----------------|-------|
| Simon . . . . . | 12    | George . . . .  | 10    | Adam . . . . .  | 8     |
| Milo . . . . .  | 10    | Geoffrey . . .  | 9     | Peter . . . . . | 8     |
| Edmund . . . .  | 10    | Gilbert . . . . | 8     | Reginald . . .  | 7     |

|                 | Times |                  | Times |                 | Times |
|-----------------|-------|------------------|-------|-----------------|-------|
| Giles . . . . . | 6     | Elias . . . . .  | 4     | Otto . . . . .  | 2     |
| James . . . . . | 5     | Philip . . . . . | 4     | Matthew . . .   | 2     |
| Alexander . . . | 5     | Stephen . . . .  | 4     | Ivo . . . . .   | 2     |
| Gerard . . . .  | 5     | Anthony . . . .  | 3     | Francis . . . . | 2     |
| Lawrence . . .  | 5     | Bartholomew .    | 3     | Everard . . . . | 2     |
| Humfrey . . . . | 5     | Christopher . .  | 3     | Bernard . . . . | 2     |
| Andrew . . . .  | 4     | Vincent . . . .  | 3     | Charles . . . . | 1     |

There is no entry of two Christian names for one person except Thomas Maria Wingfield, for Huntingdon, in 1552. Joseph does not occur in any of the five Parliaments, nor Wilfred. The following names occur once: Michael, Paul, Maurice, Jaspar, Gervase, Cuthbert, Alan, Arnold; and in the Parliament of 1554 we find once Arthur, Kenelm, Mark, Luke, Dominic, Ambrose, and a few others.

Clark's index of the Oxford Register from 1571 to 1622 contains 30,000 names, and the following Christian names occur, in this order:—

|                 | Times |                  | Times |                  | Times |
|-----------------|-------|------------------|-------|------------------|-------|
| John . . . . .  | 3,826 | Nicholas . . . . | 326   | Humphrey . . .   | 168   |
| Thomas . . . .  | 2,777 | Edmund . . . .   | 298   | Charles . . . .  | 139   |
| William . . . . | 2,546 | Anthony . . . .  | 262   | Philip . . . . . | 137   |
| Richard . . . . | 1,691 | Hugh . . . . .   | 257   | David . . . . .  | 120   |
| Robert . . . .  | 1,222 | Christopher . .  | 243   | Matthew . . . .  | 116   |
| Edward . . . .  | 957   | Samuel . . . .   | 227   | Michael . . . .  | 103   |
| Henry . . . . . | 908   | Walter . . . .   | 207   | Alexander . . .  | 98    |
| George . . . .  | 647   | Roger . . . . .  | 195   | Arthur . . . . . | 98    |
| Francis . . . . | 447   | Ralph . . . . .  | 182   | Laurence . . . . | 90    |
| James . . . . . | 424   | Peter . . . . .  | 175   | Giles . . . . .  | 88    |

See *Names*, in Part I., page 414.

## NAVY

A return of the British Admiralty in May 1898 gave the strength of the principal navies as follows:—

|                     | Battle-ships | Cruisers | Torpedo-boats, &c. | Total |
|---------------------|--------------|----------|--------------------|-------|
| Great Britain . . . | 64           | 161      | 247                | 472   |
| France . . .        | 35           | 75       | 287                | 397   |
| Russia . . .        | 22           | 22       | 244                | 288   |
| Germany . . .       | 22           | 41       | 137                | 200   |
| Italy . . .         | 17           | 24       | 162                | 203   |
| United States . . . | 13           | 27       | 71                 | 111   |
| Japan . . .         | 6            | 32       | 68                 | 106   |

The steam power of the navies in 1898 was:—

|                         |                       |                         |
|-------------------------|-----------------------|-------------------------|
| British . . . 1,560,000 | Russian . . . 450,000 | Italian . . . 300,000   |
| French . . . 730,000    | German . . . 300,000  | U. States . . . 290,000 |

The British navy may be valued as follows:—

|                        | Number | £          |
|------------------------|--------|------------|
| Battle-ships . . . . . | 64     | 35,200,000 |
| Cruisers . . . . .     | 161    | 24,200,000 |
| Sundry . . . . .       | 247    | 13,600,000 |
| Armament . . . . .     | ...    | 19,000,000 |
| Total value . . . . .  |        | 92,000,000 |

According to another classification there are 90 superior fighting ships, averaging 10,000 horse-power and a speed of 20 knots an hour, 180 second-class cruisers, 250 gunboats and transports, and 150 torpedo vessels, making a total of 670 vessels.

For naval expenditure in 1897, see *Military Expenditure*, page 638.

The age of men in the British navy (1897) is as follows:—

| Age               | Number | Ratio |
|-------------------|--------|-------|
| 15-25 . . . . .   | 44,010 | 60.6  |
| 25-35 . . . . .   | 20,610 | 28.4  |
| Over 35 . . . . . | 8,000  | 11.0  |
| Total . . . . .   | 72,620 | 100.0 |

The following statement of the navies of the world in 1890 is from *Chambers's Encyclopedia*.

|                     | Battle-ships | Inferior | Total | Men     | Guns  | Displacement in Tons |
|---------------------|--------------|----------|-------|---------|-------|----------------------|
| Great Britain . . . | 64           | 595      | 659   | 94,600  | 3,631 | 430                  |
| France . . .        | 53           | 404      | 457   | 70,600  | 1,735 | 252                  |
| Germany . . .       | 34           | 183      | 217   | 16,500  | 608   | 135                  |
| Russia . . .        | 36           | 322      | 358   | 31,000  | 710   | 124                  |
| Austria . . .       | 15           | 153      | 168   | 9,000   | 309   | 49                   |
| Italy . . .         | 22           | 245      | 267   | 23,000  | 611   | 78                   |
| Spain . . .         | 7            | 129      | 136   | 16,700  | 305   | 48                   |
| Portugal . . .      | 1            | 63       | 64    | 3,500   | 98    | ...                  |
| Sweden . . .        | 20           | 142      | 162   | 7,900   | 154   | 39                   |
| Denmark . . .       | 9            | 67       | 76    | 1,400   | 202   | 22                   |
| Holland . . .       | 24           | 116      | 140   | 10,000  | 256   | 39                   |
| Greece . . .        | 5            | 70       | 75    | 1,100   | 82    | 8                    |
| Turkey . . .        | 18           | 387      | 405   | 23,000  | 382   | 54                   |
| Europe . . .        | 308          | 2,876    | 3,184 | 308,300 | 9,083 | 1,278                |
| United States . . . | 21           | 74       | 95    | ...     | 284   | 26                   |
| Brazil . . .        | 10           | 56       | 66    | ...     | 134   | 28                   |
| Argentina . . .     | 4            | 45       | 49    | ...     | 35    | 12                   |
| Chile . . .         | 4            | 34       | 38    | ...     | 95    | 18                   |
| Japan . . .         | 6            | 76       | 82    | ...     | 212   | 17                   |
| China . . .         | 6            | 83       | 89    | ...     | 133   | 25                   |
| Total . . .         | 359          | 3,244    | 3,603 | ...     | 9,976 | 1,404                |

## O

## OATS

The area and product of this crop are shown as follows:—

|                        | Acres       | Tons       | Bush. per Acre | Per Inhab. |
|------------------------|-------------|------------|----------------|------------|
| U. Kingdom . . .       | 4,200,000   | 4,200,000  | 40             | 4          |
| France . . .           | 9,700,000   | 5,400,000  | 23             | 6          |
| Germany . . .          | 10,000,000  | 4,400,000  | 18             | 3          |
| Russia . . .           | 36,400,000  | 14,800,000 | 16             | 6          |
| Austria . . .          | 7,500,000   | 4,300,000  | 23             | 4          |
| Italy . . .            | 1,170,000   | 450,000    | 15             | ...        |
| Spain & Portugal . . . | 750,000     | 300,000    | 16             | 1          |
| Danubian States . . .  | 1,220,000   | 450,000    | 15             | 2          |
| Swed. & Norway . . .   | 2,300,000   | 1,800,000  | 32             | 10         |
| Denmark . . .          | 1,050,000   | 880,000    | 34             | 16         |
| Holland . . .          | 310,000     | 360,000    | 45             | 3          |
| Belgium . . .          | 650,000     | 660,000    | 41             | 4          |

| Australia . . .        | 700,000     | 450,000    | 25             | 4          |
| Total . . .            | 107,450,000 | 58,850,000 | 22             | 5          |

See *Agriculture*, page 613, and *Food*, page 714.

## OCCUPATIONS

In most countries the number of persons following gainful occupations is 45 per cent. of total, or 60 per cent. of those over 10 years. The census returns of 1890-91 show:—

|                     | Pop. over 10 years old | Number of Earners | Percentage    |         |
|---------------------|------------------------|-------------------|---------------|---------|
|                     |                        |                   | Agri-cultural | Various |
| England . . .       | 22,054,000             | 12,900,000        | 10.4          | 86.6    |
| Scotland . . .      | 3,046,000              | 1,780,000         | 14.0          | 86.0    |
| Ireland . . .       | 3,726,000              | 2,140,000         | 43.7          | 56.3    |
| U. Kingdom . . .    | 28,826,000             | 16,820,000        | 15.0          | 85.0    |
| France . . .        | 31,457,000             | 17,290,000        | 41.6          | 58.4    |
| Germany . . .       | 40,290,000             | 22,910,000        | 35.6          | 64.4    |
| Austria . . .       | 18,191,000             | 13,570,000        | 50.7          | 49.3    |
| Hungary . . .       | 12,882,000             | 7,390,000         | 60.5          | 39.5    |
| Italy . . .         | 22,551,000             | 16,110,000        | 38.0          | 62.0    |
| Spain . . .         | 13,539,000             | 7,010,000         | 69.2          | 30.8    |
| Sweden . . .        | 3,679,000              | 2,580,000         | 50.2          | 49.8    |
| Norway . . .        | 1,494,000              | 1,210,000         | 27.3          | 72.7    |
| Denmark . . .       | 1,652,000              | 680,000           | 32.0          | 68.0    |
| Belgium . . .       | 4,708,000              | 2,070,000         | 31.4          | 68.6    |
| Switzerland . . .   | 2,284,000              | 1,360,000         | 36.8          | 63.2    |
| Greece . . .        | 1,620,000              | 720,000           | 61.1          | 38.9    |
| United States . . . | 47,413,000             | 22,736,000        | 39.6          | 60.4    |
| Australia . . .     | 2,800,000              | 1,620,000         | 23.6          | 76.4    |
| Canada . . .        | 3,638,000              | 1,611,000         | 45.6          | 54.4    |

## OCCUPATIONS

783

## OCCUPATIONS

The total for Europe (excluding Russia and the Danubian States, for which there are no returns) will be found as follows:—

|                      | Number      | Ratio |
|----------------------|-------------|-------|
| Agriculture . . . .  | 47,960,000  | 43.0  |
| Manufactures . . . . | 30,430,000  | 33.0  |
| Commerce, &c. . . .  | 29,640,000  | 24.0  |
| Total . . . . .      | 111,030,000 | 100.0 |

## UNITED KINGDOM

The census of 1891 showed the three kingdoms as follows:—

|                     | Number (ooo omitted) |       |       |          |        |         |
|---------------------|----------------------|-------|-------|----------|--------|---------|
|                     | Eng.                 | Scot. | Ire.  | U. King. | Males  | Females |
| Agriculture . . . . | 1,340                | 250   | 940   | 2,530    | 2,350  | 180     |
| Manufacture . . . . | 7,330                | 1,030 | 660   | 9,020    | 6,640  | 2,380   |
| Commerce . . . . .  | 1,400                | 180   | 80    | 1,660    | 1,615  | 45      |
| Various . . . . .   | 2,830                | 315   | 465   | 3,610    | 1,000  | 2,610   |
| Total . . . . .     | 12,900               | 1,775 | 2,145 | 16,820   | 11,605 | 5,215   |

In the above table Agriculture includes fishing, and Manufactures mining. Details show thus:—

|                        | Number (ooo omitted) |          |         |          |
|------------------------|----------------------|----------|---------|----------|
|                        | England              | Scotland | Ireland | U. King. |
| Civil Service . . . .  | 144                  | 18       | 30      | 192      |
| Army . . . . .         | 126                  | 8        | 31      | 165      |
| Teachers . . . . .     | 201                  | 21       | 21      | 243      |
| Students . . . . .     | 147                  | 29       | 96      | 272      |
| Professions . . . . .  | 308                  | 35       | 30      | 373      |
| Professional class . . | 926                  | 111      | 208     | 1,245    |
| Farmers . . . . .      | 224                  | 54       | 417     | 695      |
| Labourers . . . . .    | 1,088                | 166      | 513     | 1,767    |

| Various . . . . .      | 3,055                | 425      | 309     | 3,789    |
| Total . . . . .        | 12,900               | 1,780    | 2,150   | 16,830   |

For previous dates see *Occupations*, page 423.

## FRANCE

The number of workers by the census of 1891 compares with that of 1881 as follows:—

|                      | Number     |            | Ratio |       |
|----------------------|------------|------------|-------|-------|
|                      | 1881       | 1891       | 1881  | 1891  |
| Agriculture . . . .  | 6,460,000  | 7,220,000  | 40.2  | 41.8  |
| Manufactures . . . . | 4,440,000  | 4,720,000  | 27.4  | 27.3  |
| Commerce . . . . .   | 1,160,000  | 1,980,000  | 7.2   | 11.4  |
| Various . . . . .    | 4,050,000  | 3,370,000  | 25.2  | 19.5  |
| Total . . . . .      | 16,110,000 | 17,290,000 | 100.0 | 100.0 |

The census of 1891 gave the following classification:—

|                       | Principals | Assistants | Total      |
|-----------------------|------------|------------|------------|
| Agriculture . . . .   | 3,570,000  | 3,650,000  | 7,220,000  |
| Manufactures . . . .  | 1,020,000  | 3,700,000  | 4,720,000  |
| Commerce . . . . .    | 880,000    | 1,100,000  | 1,980,000  |
| Transport . . . . .   | 60,000     | 410,000    | 470,000    |
| Professions . . . . . | 420,000    | 240,000    | 660,000    |
| Various . . . . .     | 1,720,000  | 520,000    | 2,240,000  |
| Total . . . . .       | 7,670,000  | 9,620,000  | 17,290,000 |

## GERMANY

The number of persons subsisting by various pursuits shows thus:—

|                      | Number     |            | Ratio |       |
|----------------------|------------|------------|-------|-------|
|                      | 1882       | 1895       | 1882  | 1895  |
| Agriculture . . . .  | 18,840,000 | 18,070,000 | 41.7  | 34.9  |
| Manufactures . . . . | 16,060,000 | 20,250,000 | 35.5  | 39.1  |
| Commerce . . . . .   | 4,530,000  | 5,970,000  | 10.0  | 11.6  |
| Professions, &c. . . | 3,550,000  | 4,150,000  | 7.9   | 8.0   |
| No occupation . . .  | 2,240,000  | 3,330,000  | 4.9   | 6.4   |
| Total . . . . .      | 45,220,000 | 51,770,000 | 100.0 | 100.0 |

The census of 1895 classifies pursuits in the principal States thus:—

|                      | Number (ooo omitted) |        |         |        |
|----------------------|----------------------|--------|---------|--------|
|                      | Agricul.             | Manuf. | Various | Total  |
| Prussia . . . . .    | 11,110               | 12,200 | 8,180   | 31,490 |
| Bavaria . . . . .    | 2,600                | 1,790  | 1,390   | 5,780  |
| Saxony . . . . .     | 540                  | 2,180  | 1,030   | 3,750  |
| Wurtemberg . . . .   | 920                  | 720    | 430     | 2,070  |
| Baden . . . . .      | 720                  | 600    | 400     | 1,720  |
| Alsace . . . . .     | 600                  | 610    | 410     | 1,620  |
| Hesse . . . . .      | 370                  | 390    | 270     | 1,030  |
| Brunswick . . . . .  | 120                  | 200    | 120     | 440    |
| Oldenburg . . . . .  | 170                  | 120    | 80      | 370    |
| Small States . . . . | 920                  | 1,440  | 1,140   | 3,500  |
| Total . . . . .      | 18,070               | 20,250 | 13,450  | 51,770 |

The census of 1895 shows that 45 per cent. of the population are workers, 55 per cent. dependents, including children, viz.:—

|                      | Workers    | Dependents | Total      |
|----------------------|------------|------------|------------|
| Agriculture . . . .  | 8,160,000  | 9,910,000  | 18,070,000 |
| Manufactures . . . . | 7,710,000  | 10,700,000 | 18,410,000 |
| Mining . . . . .     | 570,000    | 1,280,000  | 1,850,000  |
| Commerce . . . . .   | 1,210,000  | 1,730,000  | 2,940,000  |
| Transport . . . . .  | 620,000    | 1,380,000  | 2,000,000  |
| Professions, &c. . . | 4,640,000  | 3,860,000  | 8,500,000  |
| Total . . . . .      | 22,910,000 | 28,860,000 | 51,770,000 |

## AUSTRIA

The census of Austria Proper for 1890 compares with 1880 thus:—

|                      | Number     |            | Ratio |       |
|----------------------|------------|------------|-------|-------|
|                      | 1880       | 1890       | 1880  | 1890  |
| Agriculture . . . .  | 6,490,000  | 6,890,000  | 57.0  | 50.7  |
| Manufactures . . . . | 2,310,000  | 2,880,000  | 20.3  | 21.2  |
| Commerce . . . . .   | 510,000    | 810,000    | 4.4   | 6.0   |
| Various . . . . .    | 2,090,000  | 2,990,000  | 18.3  | 22.1  |
| Total . . . . .      | 11,400,000 | 13,570,000 | 100.0 | 100.0 |

## HUNGARY

The census of 1890 compares with that of 1880 thus:—

|                 | Number    |           | Ratio |       |
|-----------------|-----------|-----------|-------|-------|
|                 | 1880      | 1890      | 1880  | 1890  |
| Agriculture . . | 4,520,000 | 4,480,000 | 62.0  | 60.5  |
| Various . . .   | 2,770,000 | 2,910,000 | 38.0  | 39.5  |
| Total . .       | 7,290,000 | 7,390,000 | 100.0 | 100.0 |

## ITALY

The latest census is that of 1881, which see at page 430.

## SPAIN

The census of 1887 compares with that of 1877 as follows:—

|                  | Number    |           | Ratio |       |
|------------------|-----------|-----------|-------|-------|
|                  | 1877      | 1887      | 1877  | 1887  |
| Agriculture . .  | 2,720,000 | 4,850,000 | 47.3  | 69.2  |
| Manufactures . . | 1,170,000 | 1,070,000 | 20.3  | 15.3  |
| Commerce . . .   | 210,000   | 310,000   | 3.7   | 4.4   |
| Various . . .    | 1,640,000 | 780,000   | 28.7  | 11.1  |
| Total . .        | 5,740,000 | 7,010,000 | 100.0 | 100.0 |

The mode of taking the census was changed; the population increased only 5 per cent. from 1877 to 1887, while the number of persons occupied rose 22 per cent.

## SWEDEN

The number subsisting by various pursuits was:—

|                  | Number    |           | Ratio |       |
|------------------|-----------|-----------|-------|-------|
|                  | 1880      | 1890      | 1880  | 1890  |
| Agriculture . .  | 2,340,000 | 2,410,000 | 51.2  | 50.2  |
| Manufactures . . | 580,000   | 850,000   | 12.8  | 17.7  |
| Commerce . . .   | 220,000   | 310,000   | 4.8   | 6.5   |
| Various . . .    | 1,430,000 | 1,220,000 | 31.2  | 25.6  |
| Total . .        | 4,570,000 | 4,790,000 | 100.0 | 100.0 |

## NORWAY

The census of 1891 compares with that of 1875 thus:—

|                  | Number    |           | Ratio |       |
|------------------|-----------|-----------|-------|-------|
|                  | 1875      | 1891      | 1875  | 1891  |
| Agriculture . .  | 380,000   | 330,000   | 35.4  | 27.3  |
| Manufactures . . | 220,000   | 180,000   | 20.5  | 14.9  |
| Commerce . . .   | 160,000   | 110,000   | 15.0  | 9.1   |
| Various . . .    | 310,000   | 590,000   | 29.1  | 48.7  |
| Total . .        | 1,070,000 | 1,210,000 | 100.0 | 100.0 |

## DENMARK

The number subsisting by various pursuits was:—

|                  | Number    |           | Ratio |       |
|------------------|-----------|-----------|-------|-------|
|                  | 1880      | 1890      | 1880  | 1890  |
| Agriculture . .  | 930,000   | 880,000   | 47.0  | 40.5  |
| Manufactures . . | 460,000   | 530,000   | 23.2  | 24.4  |
| Commerce . . .   | 130,000   | 190,000   | 6.6   | 8.8   |
| Various . . .    | 460,000   | 570,000   | 23.2  | 26.3  |
| Total . .        | 1,980,000 | 2,170,000 | 100.0 | 100.0 |

## BELGIUM

The census of 1890 compares with that of 1880 thus:—

|                  | Hands     |           | Ratio |       |
|------------------|-----------|-----------|-------|-------|
|                  | 1880      | 1890      | 1880  | 1890  |
| Agriculture . .  | 980,000   | 650,000   | 35.6  | 31.4  |
| Manufactures . . | 950,000   | 770,000   | 34.6  | 37.2  |
| Commerce . . .   | 240,000   | 330,000   | 8.7   | 16.0  |
| Various . . .    | 580,000   | 320,000   | 21.1  | 15.4  |
| Total . .        | 2,750,000 | 2,070,000 | 100.0 | 100.0 |

The new classification in 1890 renders comparison fallacious.

## SWITZERLAND

The census of 1888 compares with that of 1870 as follows:—

|                  | Hands     |           | Ratio |       |
|------------------|-----------|-----------|-------|-------|
|                  | 1870      | 1888      | 1870  | 1888  |
| Agriculture . .  | 540,000   | 500,000   | 41.4  | 36.8  |
| Manufactures . . | 490,000   | 560,000   | 37.4  | 41.2  |
| Commerce . . .   | 50,000    | 160,000   | 3.7   | 11.7  |
| Various . . .    | 240,000   | 140,000   | 17.5  | 10.3  |
| Total . .        | 1,320,000 | 1,360,000 | 100.0 | 100.0 |

## GREECE

The census of 1889 compares with that of 1861 thus:—

|                  | Number  |         | Ratio |       |
|------------------|---------|---------|-------|-------|
|                  | 1861    | 1889    | 1861  | 1889  |
| Agriculture . .  | 190,000 | 440,000 | 56.6  | 61.1  |
| Manufactures . . | 50,000  | 90,000  | 15.8  | 12.5  |
| Commerce, &c. .  | 90,000  | 190,000 | 27.6  | 26.4  |
| Total . .        | 330,000 | 720,000 | 100.0 | 100.0 |

## UNITED STATES

The census of 1890 showed that one-half of the population over 10 years of age had some gainful occupation, viz.:—

|                | Males      | Females    | Total      |
|----------------|------------|------------|------------|
| Employed . . . | 18,821,000 | 3,915,000  | 22,736,000 |
| Unemployed . . | 5,532,000  | 19,146,000 | 24,678,000 |
| Total . .      | 24,353,000 | 23,061,000 | 47,414,000 |

The occupations of the American people in 1880 and 1890 stood thus:—

|                  | Number     |            | Ratio |       |
|------------------|------------|------------|-------|-------|
|                  | 1880       | 1890       | 1880  | 1890  |
| Agriculture . .  | 7,670,000  | 9,010,000  | 44.1  | 39.6  |
| Manufactures . . | 3,840,000  | 5,090,000  | 22.1  | 22.3  |
| Commerce, &c. .  | 5,880,000  | 8,630,000  | 33.8  | 38.1  |
| Total . .        | 17,390,000 | 22,730,000 | 100.0 | 100.0 |

In the above official classification Agriculture includes also fishing and mining. In the subjoined table for 1890

the same occurs, and Commerce includes also transport:—

|                  | Males      | Females   | Total      |
|------------------|------------|-----------|------------|
| Agriculture . .  | 8,330,000  | 680,000   | 9,010,000  |
| Manufactures . . | 4,060,000  | 1,030,000 | 5,090,000  |
| Commerce . . .   | 3,100,000  | 230,000   | 3,330,000  |
| Domestics . . .  | 2,690,000  | 1,670,000 | 4,360,000  |
| Professions . .  | 630,000    | 310,000   | 940,000    |
| Total . . .      | 18,810,000 | 3,920,000 | 22,730,000 |

Deducting fishermen and miners, the number of persons actually engaged in agriculture in 1890 was 8,320,000.

#### New England States

|                  | Occupations |           | Ratios |       |
|------------------|-------------|-----------|--------|-------|
|                  | 1880        | 1890      | 1880   | 1890  |
| Agriculture . .  | 301,000     | 328,000   | 19.2   | 16.4  |
| Manufactures . . | 709,000     | 885,000   | 45.0   | 44.1  |
| Trade, &c. . .   | 562,000     | 793,000   | 35.8   | 39.5  |
| Total . . .      | 1,572,000   | 2,006,000 | 100.0  | 100.0 |

#### Middle States

|                  |           |           |       |       |
|------------------|-----------|-----------|-------|-------|
| Agriculture . .  | 847,000   | 1,064,000 | 20.3  | 19.3  |
| Manufactures . . | 1,425,000 | 1,824,000 | 34.0  | 33.0  |
| Trade, &c. . .   | 1,912,000 | 2,637,000 | 45.7  | 47.7  |
| Total . . .      | 4,184,000 | 5,525,000 | 100.0 | 100.0 |

#### Southern States

|                  |           |           |       |       |
|------------------|-----------|-----------|-------|-------|
| Agriculture . .  | 3,626,000 | 3,935,000 | 69.0  | 63.5  |
| Manufactures . . | 392,000   | 591,000   | 7.4   | 9.5   |
| Trade, &c. . .   | 1,236,000 | 1,669,000 | 23.6  | 27.0  |
| Total . . .      | 5,254,000 | 6,195,000 | 100.0 | 100.0 |

#### Western States

|                  |           |           |       |       |
|------------------|-----------|-----------|-------|-------|
| Agriculture . .  | 2,897,000 | 3,686,000 | 45.4  | 41.0  |
| Manufactures . . | 1,311,000 | 1,791,000 | 20.6  | 19.9  |
| Trade, &c. . .   | 2,174,000 | 3,533,000 | 34.0  | 39.1  |
| Total . . .      | 6,382,000 | 9,010,000 | 100.0 | 100.0 |

The relative strength of the principal sections and occupations in 1890 was as follows:—

|                  | N. Eng. | Middle | South | West | Total |
|------------------|---------|--------|-------|------|-------|
| Agriculture . .  | 14      | 47     | 173   | 162  | 396   |
| Manufactures . . | 39      | 80     | 26    | 78   | 223   |
| Various . . .    | 35      | 116    | 74    | 156  | 381   |
| Total . . .      | 88      | 243    | 273   | 396  | 1,000 |

Thus it appears that the Western States represented almost 40 per cent. of the working population of the Union, the Southern about 27, the Middle or Atlantic States 24, and New England 9 per cent.

#### CANADA

The number of earners by census returns were:—

|                       | 1880      | 1890      | Increase |
|-----------------------|-----------|-----------|----------|
| Agriculture . . .     | 655,000   | 735,000   | 80,000   |
| Wood-cutters, &c. .   | 39,000    | 55,000    | 16,000   |
| Manufactures . . .    | 257,000   | 320,000   | 63,000   |
| Trade and transport . | 108,000   | 186,000   | 78,000   |
| Domestics . . .       | 75,000    | 246,000   | 171,000  |
| Professions . . .     | 53,000    | 69,000    | 16,000   |
| Total . . .           | 1,187,000 | 1,611,000 | 424,000  |

#### AUSTRALIA

The census of 1890 was not carried out in South Australia so as to specify occupations. The other colonies are shown as follows, it being premised that Agriculture includes both pastoral and tillage pursuits, and that persons unclassified are included in the column of Trade:—

|                 | N. S. Wales | Victoria | New Zealand | Queensland | Tasmania | West Australia |
|-----------------|-------------|----------|-------------|------------|----------|----------------|
| Agriculture . . | 101,000     | 101,000  | 69,000      | 54,000     | 18,000   | 7,000          |
| Mining . . .    | 31,000      | 25,000   | 17,000      | 12,000     | 4,000    | 1,000          |
| Manufact. . .   | 71,000      | 96,000   | 43,000      | 22,000     | 7,000    | 4,000          |
| Building . . .  | 38,000      | 34,000   | 13,000      | 11,000     | 5,000    | 1,000          |
| Trade . . .     | 111,000     | 133,000  | 57,000      | 41,000     | 14,000   | 5,000          |
| Transport . .   | 31,000      | 32,000   | 16,000      | 13,000     | 3,000    | 3,000          |
| Professions . . | 24,000      | 23,000   | 13,000      | 7,000      | 3,000    | 1,000          |
| Domestics . .   | 58,000      | 58,000   | 25,000      | 20,000     | 7,000    | 3,000          |
| Total . . .     | 465,000     | 502,000  | 253,000     | 180,000    | 61,000   | 25,000         |

The population of South Australia being one-twelfth of the total, we may allow a corresponding percentage for that colony in the several occupations: the total for Australasia will stand as follows:—

|                       | Number    | Ratio |
|-----------------------|-----------|-------|
| Agriculture . . .     | 382,000   | 23.6  |
| Mining . . .          | 98,000    | 6.1   |
| Manufactures . . .    | 265,000   | 16.4  |
| Building . . .        | 111,000   | 6.9   |
| Trade and transport . | 501,000   | 30.8  |
| Professions, &c. . .  | 263,000   | 16.2  |
| Total . . .           | 1,620,000 | 100.0 |

#### OIL

The production of petroleum in 1896 was as follows, in barrels of 42 gallons:—

|                   | Raised     | Exported   | Home Use   |
|-------------------|------------|------------|------------|
| United States . . | 61,000,000 | 23,000,000 | 38,000,000 |
| Russia . . .      | 36,000,000 | 5,500,000  | 30,500,000 |
| Austria . . .     | 4,700,000  | ...        | 4,700,000  |

The consumption of petroleum in the United Kingdom in 1885-87 averaged 74 million gallons yearly, and in 1895-97 no less than 184 million gallons, or 4½ per inhabitant yearly.

For further particulars see *Mining*, page 776.

With respect to olive-oil, big trees give 2 bushels of olives, which is equivalent to 3 gallons of oil. An ordinary olive-grove gives 25 gallons of oil per acre. France has 270,000 acres under olives, producing 105,000 tons of fruit, equal to 7 million gallons of oil, besides 150,000 acres under colza, producing 5 million gallons of oil. Italy in 1896 had 2,500,000 acres under olives, which produced 44 million gallons of oil, or 18 gallons per acre.

See *Oil*, page 434.

#### ORDERS

*Chambers's Encyclopædia* states that 124,000 Franciscan friars perished in attending the sick during the great plague of 1346 (see *Plagues*, page 201).

Helyot says that in 1710 there were 7000 Franciscan convents with 120,000 friars, and 900 nunneries of the same Order, with 30,000 nuns. See *Orders*, page 434.

## P

## PAPER

The latest estimates of paper manufacture are:—

|                           | Mills | Tons Paper |
|---------------------------|-------|------------|
| United Kingdom . . . . .  | 300   | 400,000    |
| France . . . . .          | 490   | 350,000    |
| Germany . . . . .         | 1,080 | 180,000    |
| Russia . . . . .          | 50    | 110,000    |
| Austria . . . . .         | 740   | 80,000     |
| Italy . . . . .           | 230   | 50,000     |
| Spain . . . . .           | 100   | 20,000     |
| Portugal . . . . .        | 16    | 8,000      |
| Scandinavia . . . . .     | 144   | 120,000    |
| Holland . . . . .         | 65    | 10,000     |
| Belgium . . . . .         | 40    | 25,000     |
| Switzerland . . . . .     | 35    | 12,000     |
| Europe . . . . .          | 3,290 | 1,365,000  |
| United States . . . . .   | 1,005 | 1,200,000  |
| Spanish America . . . . . | 85    | 55,000     |
| Total . . . . .           | 4,380 | 2,620,000  |

In 1850 the total production was estimated at 220,000 tons, or one-twelfth of what it is at present. In that year the mills of the United Kingdom produced 62,000 tons. The output in the United States rose from 200,000 tons in 1872 to 1,200,000 tons in 1890, and is now probably 1,500,000 tons. Esparto grass is much used for making paper, the mills of Europe in 1889 consuming 300,000 tons, of which two-thirds were grown in Barbary, one-third in Spain. Wood pulp is also in great demand for this industry, the exports of same from Sweden and Norway showing as follows:—

| From             | Tons Exported |         |
|------------------|---------------|---------|
|                  | 1886          | 1896    |
| Sweden . . . . . | 16,000        | 152,000 |
| Norway . . . . . | 97,000        | 248,000 |
| Total . . . . .  | 113,000       | 400,000 |

The value of paper turned out yearly by the mills of the world is about 80 millions sterling; the mills employ about 200,000 men and 400,000 women.

In 1897 Great Britain exported 46,000 tons of paper, valued at £1,350,000, against 38,000 tons in 1887, valued at £1,330,000.

## PARKS

In the following table the parks of London include those of the suburbs, such as Richmond, Hampton Court, Epping Forest, &c.:—

|                      | Park, Acres | Inhab. to an Acre of Park |
|----------------------|-------------|---------------------------|
| London . . . . .     | 19,000      | 230                       |
| Birmingham . . . . . | 350         | 1,380                     |
| Liverpool . . . . .  | 1,060       | 580                       |
| Leeds . . . . .      | 600         | 610                       |
| Sheffield . . . . .  | 290         | 1,120                     |
| Hull . . . . .       | 130         | 1,550                     |
| Brighton . . . . .   | 340         | 300                       |
| Nottingham . . . . . | 290         | 710                       |
| York . . . . .       | 800         | 90                        |
| Cheltenham . . . . . | 1,590       | 30                        |

For parks of Continental capitals, see page 438.

## PASSENGERS

In 1897 there were 283,000 passengers from Europe landed at New York, of whom 91,000 were cabin, 192,000 steerage, by ten lines of transatlantic steamers. The largest number was carried by the North German Lloyd, namely, 55,600; the next on the list being the Cunard, with 32,400.

The passenger traffic of London by omnibus, rail, &c., rose from 82 million persons in 1864 to 407 millions in 1890.

The tramways of the United Kingdom in 1898 carried 858 million passengers, or almost 2½ millions daily. The steam ferry-boats on the Seine at Paris carried last year 25,400,000 persons, say 70,000 daily. The railways of the world carry yearly about 3380 million passengers, equal to 9 millions daily.

See *Passengers*, page 438; *Railways*, page 795; *Tramways*, page 814; and *Travellers*, page 573.

## PAUPERS

The following table shows approximately the amount spent in various countries to relieve the indigent:—

|                          | £ Yearly   | Pence per Inhabitant |
|--------------------------|------------|----------------------|
| United Kingdom . . . . . | 11,800,000 | 73                   |
| France . . . . .         | 7,400,000  | 46                   |
| Austria Proper . . . . . | 710,000    | 8                    |
| Italy . . . . .          | 2,600,000  | 20                   |
| Holland . . . . .        | 500,000    | 25                   |
| United States . . . . .  | 500,000    | 2                    |
| Australia . . . . .      | 800,000    | 48                   |

## UNITED KINGDOM

The numbers and ratios of paupers in the three kingdoms have been as follows:—

|                      | Numbers |           |           | Per 1000 Pop. |      |
|----------------------|---------|-----------|-----------|---------------|------|
|                      | 1877    | 1887      | 1897      | 1877          | 1897 |
| England . . . . .    | 728,000 | 817,000   | 824,000   | 30            | 27   |
| Scotland . . . . .   | 96,000  | 100,000   | 101,000   | 27            | 24   |
| Ireland . . . . .    | 78,000  | 113,000   | 99,000    | 15            | 22   |
| U. Kingdom . . . . . | 902,000 | 1,030,000 | 1,024,000 | 27            | 26   |

Expenditure for relief of paupers has been as follows:—

|                    | Amount, £  |            | £ per Pauper |      | Pence per Inhabitant |      |
|--------------------|------------|------------|--------------|------|----------------------|------|
|                    | 1884       | 1894       | 1884         | 1894 | 1884                 | 1894 |
| England . . . . .  | 8,400,000  | 9,700,000  | 10.8         | 11.8 | 75                   | 78   |
| Scotland . . . . . | 870,000    | 960,000    | 9.0          | 10.1 | 55                   | 56   |
| Ireland . . . . .  | 1,220,000  | 1,130,000  | 11.2         | 10.9 | 59                   | 61   |
| U. King. . . . .   | 10,490,000 | 11,790,000 | 10.7         | 11.7 | 70                   | 73   |

Booth shows that 38 per cent. of all persons over 65 years of age in England are paupers: his scheme of State pensions of £13 a year for all persons over 65 would cost the Treasury £17,000,000 for England, or £23,500,000 for the United Kingdom, per annum.

## FRANCE

Levasseur shows that pauperism is declining in Paris, viz. :—

*Paupers per 1000 Inhabitants*

|                  |                 |                 |
|------------------|-----------------|-----------------|
| 1813 . . . . 165 | 1847 . . . . 79 | 1872 . . . . 54 |
| 1829 . . . . 79  | 1861 . . . . 53 | 1887 . . . . 41 |

The annual cost of maintenance of paupers in France, and the sources from which the necessary funds are derived, appear as follows :—

| For                    | £                | From                   | £                |
|------------------------|------------------|------------------------|------------------|
| Ordinary poor . . .    | 5,350,000        | Endowments . . .       | 3,020,000        |
| Insane . . . . .       | 620,000          | The State . . . .      | 300,000          |
| Orphans . . . . .      | 680,000          | City of Paris . . .    | 1,700,000        |
| Asylums . . . . .      | 710,000          | Local boards . . .     | 2,340,000        |
| <b>Total . . . . .</b> | <b>7,360,000</b> | <b>Total . . . . .</b> | <b>7,360,000</b> |

## PINS

The manufacture is said to be declining, viz. :—

|                        | Millions Weekly |            |
|------------------------|-----------------|------------|
|                        | 1887            | 1897       |
| Great Britain . . . .  | 280             | 310        |
| France . . . . .       | 120             | 180        |
| Germany, &c. . . . .   | 180             | 72         |
| <b>Total . . . . .</b> | <b>580</b>      | <b>562</b> |

In 1897 Birmingham produced 220 millions weekly, against 180 millions in 1887.

## POLICE

The police force in certain cities is as follows (1891):—

|                    | Number | Per 10,000 Pop. |                  | Number | Per 10,000 Pop. |
|--------------------|--------|-----------------|------------------|--------|-----------------|
| London . . . . .   | 16,000 | 30              | Rome . . . . .   | 520    | 12              |
| Berlin . . . . .   | 3,700  | 28              | Naples . . . . . | 670    | 13              |
| Hamburg . . . . .  | 1,300  | 22              | Turin . . . . .  | 600    | 17              |
| Bordeaux . . . . . | 400    | 15              | Genoa . . . . .  | 420    | 19              |

The above eight cities show an average of 20 policemen per 10,000 inhabitants, or 2 per thousand.

The police force of the United Kingdom was as follows :—

|                         | Number        |               |               | Per 10,000 Inhab. |           |           |
|-------------------------|---------------|---------------|---------------|-------------------|-----------|-----------|
|                         | 1876          | 1886          | 1896          | 1876              | 1886      | 1896      |
| England . . . . .       | 29,720        | 36,450        | 41,560        | 12                | 13        | 14        |
| Scotland . . . . .      | 3,170         | 3,820         | 4,600         | 9                 | 10        | 11        |
| Ireland . . . . .       | 12,370        | 13,960        | 13,140        | 23                | 28        | 29        |
| <b>U. King. . . . .</b> | <b>45,260</b> | <b>54,230</b> | <b>59,300</b> | <b>14</b>         | <b>15</b> | <b>15</b> |

The ratio of police to population is now much higher than twenty years ago, having risen 17 per cent. in England, 22 per cent. in Scotland, 27 per cent. in Ireland.

For *Police* expenditure in European capitals see page 441.

## POPULATION

The population of Europe has increased a little more than 10 per cent. in ten years, viz. :—

|                         | 1887               | 1897               | Increase          | Pop. per Sq. Mile |
|-------------------------|--------------------|--------------------|-------------------|-------------------|
| U. Kingdom . . . .      | 36,600,000         | 39,830,000         | 3,230,000         | 330               |
| France . . . . .        | 38,220,000         | 38,520,000         | 300,000           | 192               |
| Germany . . . . .       | 47,060,000         | 52,480,000         | 5,420,000         | 247               |

| Chicago . . . . .         | 1,090,000 | Lima . . . . .           | 110,000 | Prague . . . . .       | 180,000   | Zurich . . . . .           | 130,000   |

In the preceding table Liverpool includes Birkenhead, Manchester Salford, and the city of New York includes Brooklyn and suburbs. There are 28 of the above cities in the United Kingdom, 24 in India, 8 in the Colonies, making in all 60 for the British Empire; there are 26 in Germany, 26 in the United States, 16 in Russia, 12 in France, 12 in Italy, and 58 in various countries.

The population of the British Colonies, exclusive of India, is shown as follows :—

|                        | 1881       | 1895       | Increase  |
|------------------------|------------|------------|-----------|
| Canada . . . . .       | 4,500,000  | 5,300,000  | 800,000   |
| Australia . . . . .    | 2,740,000  | 4,240,000  | 1,500,000 |
| South Africa . . . . . | 1,120,000  | 2,350,000  | 1,230,000 |
| West Indies . . . . .  | 1,470,000  | 1,750,000  | 280,000   |
| Ceylon . . . . .       | 2,760,000  | 3,240,000  | 480,000   |
| Various . . . . .      | 1,440,000  | 1,710,000  | 270,000   |
| Total . . . . .        | 14,030,000 | 18,590,000 | 4,560,000 |

In this table Canada includes Newfoundland, and the

West Indies Guiana. The gross increase of the Colonies in 14 years has been equal to 32 per cent. The population of India in 1891 was 221,200,000, showing an increase from 1881 of 23 millions, or 11½ per cent.

The population of Spanish America and Brazil by latest dates as follows :—

|                     | Pop.       | Per Sq. Mile |                     | Pop.       | Per Sq. Mile |
|---------------------|------------|--------------|---------------------|------------|--------------|
| Mexico . . . . .    | 12,570,000 | 16           | Chile . . . . .     | 2,960,000  | 10           |
| Cent. Amer. . . . . | 3,150,000  | 22           | Bolivia . . . . .   | 2,020,000  | 4            |
| Colombia . . . . .  | 3,880,000  | 8            | Paraguay . . . . .  | 430,000    | 4            |
| Venezuela . . . . . | 2,320,000  | 4            | Uruguay . . . . .   | 790,000    | 11           |
| Ecuador . . . . .   | 1,270,000  | 10           | Argentina . . . . . | 3,950,000  | 2            |
| Peru . . . . .      | 2,620,000  | 6            | Brazil . . . . .    | 16,330,000 | 5            |

The continent of South America has 36,600,000 inhabitants, being at the rate of 5 to the square mile.

Urban population increased as follows between 1881 and 1891: the column of Natural Increase shows the

surplus of births over deaths, that of Immigration the net influx from rural districts or from abroad :—

|                      | Natural Increase | Immigration | Total Increase | Per Cent. on Pop. of 1881 |
|----------------------|------------------|-------------|----------------|---------------------------|
| London . . . . .     | 517,000          | ...         | 395,000        | 10.3                      |
| Paris . . . . .      | 62,000           | 123,000     | 185,000        | 8.3                       |
| Berlin . . . . .     | 139,000          | 318,000     | 457,000        | 40.8                      |
| Vienna . . . . .     | 67,000           | 45,000      | 112,000        | 16.0                      |
| Rome . . . . .       | 28,000           | 108,000     | 136,000        | 45.3                      |
| Buda-Pesth . . . . . | 18,000           | 117,000     | 135,000        | 36.5                      |
| Hamburg . . . . .    | 50,000           | 108,000     | 158,000        | 38.7                      |
| Leipzig . . . . .    | 19,000           | 123,000     | 142,000        | 95.2                      |
| Dresden . . . . .    | 25,000           | 31,000      | 56,000         | 25.5                      |
| Breslau . . . . .    | 18,000           | 44,000      | 62,000         | 22.7                      |
| Naples . . . . .     | 14,000           | 10,000      | 24,000         | 4.8                       |
| Milan . . . . .      | 13,000           | 85,000      | 98,000         | 30.7                      |
| Turin . . . . .      | 16,000           | 62,000      | 78,000         | 31.0                      |
| Genoa . . . . .      | 6,000            | 26,000      | 32,000         | 17.7                      |
| Florence . . . . .   | 15,000           | 14,000      | 29,000         | 17.2                      |
| Palermo . . . . .    | 26,000           | 1,000       | 27,000         | 11.0                      |

While all other cities showed an influx of strangers during the decade ending 1891, London actually showed a loss of 122,000 persons by emigration.

The density of population of some principal cities is:—

|                    | Acres  | Per Acre |                        | Acres  | Per Acre |
|--------------------|--------|----------|------------------------|--------|----------|
| Berlin . . . . .   | 15,800 | 94       | Manchester             | 18,000 | 41       |
| Brussels . . . . . | 2,200  | 240      | Moscow . . . . .       | 26,000 | 32       |
| Dresden . . . . .  | 7,100  | 47       | Naples . . . . .       | 5,200  | 102      |
| Dublin . . . . .   | 5,100  | 70       | New York . . . . .     | 46,400 | 55       |
| Florence . . . . . | 6,800  | 30       | Paris . . . . .        | 19,500 | 130      |
| Genoa . . . . .    | 2,200  | 100      | Philadelphia . . . . . | 84,000 | 12       |
| Glasgow . . . . .  | 7,700  | 92       | Rome . . . . .         | 3,900  | 117      |
| Hamburg . . . . .  | 7,200  | 87       | Turin . . . . .        | 2,400  | 145      |
| London . . . . .   | 78,000 | 57       | Vienna . . . . .       | 13,800 | 99       |
| Madrid . . . . .   | 4,200  | 111      | Washington . . . . .   | 6,100  | 38       |

The above 20 cities show an average of 85 inhabitants per acre.

#### UNITED KINGDOM

The progress of population since 1871 has been thus :—

|                      | Number     |            | Per Sq. Mile |      |
|----------------------|------------|------------|--------------|------|
|                      | 1871       | 1896       | 1871         | 1896 |
| England . . . . .    | 22,857,000 | 31,400,000 | 391          | 536  |
| Scotland . . . . .   | 3,360,000  | 4,250,000  | 113          | 143  |
| Ireland . . . . .    | 5,412,000  | 4,540,000  | 166          | 139  |
| U. Kingdom . . . . . | 31,629,000 | 40,190,000 | 261          | 332  |

The population of the island of Great Britain has increased since 1871 at the rate of 350,000 yearly, or almost 1000 daily. In the same interval Ireland has lost 32,000 yearly, or 90 persons daily. The increase in Great Britain has been chiefly in urban population :—

| Urban Population  |            |           |            |
|-------------------|------------|-----------|------------|
| Year              | England    | Scotland  | G. Britain |
| 1871 . . . . .    | 12,911,000 | 1,952,000 | 14,863,000 |
| 1881 . . . . .    | 15,445,000 | 2,307,000 | 17,752,000 |
| 1891 . . . . .    | 17,826,000 | 2,631,000 | 20,457,000 |
| Increase from '71 | 4,915,000  | 679,000   | 5,594,000  |

| Rural Population  |            |           |            |
|-------------------|------------|-----------|------------|
| Year              | England    | Scotland  | G. Britain |
| 1871 . . . . .    | 9,946,000  | 1,408,000 | 11,354,000 |
| 1881 . . . . .    | 10,664,000 | 1,429,000 | 12,093,000 |
| 1891 . . . . .    | 11,175,000 | 1,395,000 | 12,570,000 |
| Increase from '71 | 1,229,000  | ...       | 1,216,000  |

The population of Ireland at census of 1891 comprised 3,860,000 rural and 845,000 urban, the latter being as 18 per cent. of the population. The several provinces showed thus :—

|                     | 1871      | 1891      | Loss    |
|---------------------|-----------|-----------|---------|
| Leinster . . . . .  | 1,336,000 | 1,188,000 | 148,000 |
| Ulster . . . . .    | 1,840,000 | 1,620,000 | 220,000 |
| Connaught . . . . . | 846,000   | 725,000   | 121,000 |
| Munster . . . . .   | 1,390,000 | 1,172,000 | 218,000 |
| Total . . . . .     | 5,412,000 | 4,705,000 | 707,000 |

#### UNITED STATES

Dividing the population into four great classes, we find as follows :—

|                            | 1860       | 1880       | Increase per Cent. |
|----------------------------|------------|------------|--------------------|
| White Americans . . . . .  | 17,727,000 | 34,476,000 | 95                 |
| Coloured persons . . . . . | 4,486,000  | 7,470,000  | 66                 |
| Foreigners . . . . .       | 4,139,000  | 9,250,000  | 123                |
| Children of do. . . . .    | 5,091,000  | 11,426,000 | 124                |
| Total . . . . .            | 31,443,000 | 62,622,000 | 99                 |

In the United States it is customary to count as urban population all towns that have more than 8000 souls, and the increase of such towns has been as follows :—

| Year           | Total Pop. | Urban      | Urban Ratio |
|----------------|------------|------------|-------------|
| 1860 . . . . . | 31,440,000 | 5,070,000  | 16.1        |
| 1870 . . . . . | 38,560,000 | 8,070,000  | 20.9        |
| 1880 . . . . . | 50,155,000 | 11,320,000 | 22.6        |
| 1890 . . . . . | 62,620,000 | 18,235,000 | 29.1        |

The increase of population in towns since 1860 has been 13,165,000, that is 260 per cent., while rural population has risen only 18,015,000, or 68 per cent.

Persons of working age, 15 to 60, according to the census of 1890 summed up nearly 36 millions, distributed thus :—

| States               | Number (000 omitted) |                |            |        |
|----------------------|----------------------|----------------|------------|--------|
|                      | Americans            | Ditto Coloured | Foreigners | Total  |
| N. England . . . . . | 1,887                | 21             | 952        | 2,860  |
| Middle . . . . .     | 5,755                | 265            | 2,396      | 8,416  |
| South . . . . .      | 6,205                | 3,125          | 336        | 9,666  |
| West . . . . .       | 10,790               | 223            | 4,036      | 15,049 |
| Union . . . . .      | 24,637               | 3,634          | 7,720      | 35,991 |

The increase of population in the last ten years was 14,020,000, viz. :—

|                |            |
|----------------|------------|
| 1887 . . . . . | 58,680,000 |
| 1897 . . . . . | 72,700,000 |

The increase was apparently made up of 10,740,000 surplus of births over deaths, being 18 per cent. on the population in 1887, and 3,280,000 net immigration, the total number of immigrants in the interval having been 4,390,000, of whom one-fourth are supposed to have gone away or died.

**POST-OFFICE**

The business has increased 60 per cent. in eight years, the following table showing the total number of letters, papers, &c., handled in the several countries :—

|                           | Millions |        | Per Inhab. |      |
|---------------------------|----------|--------|------------|------|
|                           | 1888     | 1896   | 1888       | 1896 |
| United Kingdom . . . . .  | 2,363    | 3,142  | 63         | 80   |
| France . . . . .          | 1,523    | 2,094  | 39         | 54   |

There are 1480 submarine cables, in all 168,000 miles long, of which 18,000 are State property, the rest belonging to Companies. The average cost of land-lines was, according to Mr. Charles Bright, £94 a mile, and of ocean cables £300 a mile: the construction of existing lines and cables represents an outlay of £138,000,000, of which cables stand for £50,000,000. In 1897 the number of messages was just a million daily, of which 20,000 were by cable. There are at present 12 cables working between Europe and America, besides 3 that are dead: the charge between London and New York was £1 a word in 1866, and it is now only a shilling.

The progress of telegraphy in eight years is shown thus :—

|                     | Miles of Line |         | Messages Millions |      |
|---------------------|---------------|---------|-------------------|------|
|                     | 1888          | 1896    | 1888              | 1896 |

Since 1884 the production of potatoes in Europe has increased 33 per cent., and almost every country on the Continent shows a greater consumption per inhabitant than fifteen years ago. On the other hand, the consumption in the United Kingdom is one-fourth less per head than it was in 1880-84, and a decline is likewise to be observed in the United States, as well as in Canada and Australia.

The United Kingdom pays more than a million sterling yearly for imported potatoes: in five years ending 1897 the average importation was 156,000 tons, value £1,040,000.

## PRESS

### UNITED KINGDOM

The average number of new books in the years 1896-97 compares with the same in 1888-89 as follows :—

|                           | Yearly Average |         | Increase |
|---------------------------|----------------|---------|----------|
|                           | 1888-89        | 1896-97 |          |
| Economy and trade . . .   | 111            | 389     | 278      |
| History and travels . . . | 557            | 774     | 217      |
| Theology . . . . .        | 687            | 549     | 0        |
| Medicine . . . . .        | 134            | 135     | 1        |
| Poetry . . . . .          | 148            | 291     | 143      |
| Fiction . . . . .         | 985            | 1,807   | 822      |
| Sundries . . . . .        | 2,205          | 1,794   | ...      |
| New books . . . . .       | 4,827          | 5,739   | 912      |

Works on economy and trade have trebled in eight years, those of poetry and fiction have doubled, while theology has declined, and medicine is stationary. This is exclusive of 1503 reprints yearly in the first period, and 1510 in the second. The aggregate of new books and reprints in the second period shows an increase of 919 works, equal to 19 per cent., which indicates great activity in literary labours.

Among the largest sales of books are noted: Webster's Spelling-book, 55 million copies; "Uncle Tom's Cabin," 1,500,000; Longfellow's Poems, 520,000; "Pickwick Papers," 900,000. Moore's Almanac, down to 1820, had a yearly sale of 500,000 copies. Cassel says that Messrs. Routledge sell 6 million books yearly. The printing-houses of London and Edinburgh turn out more than 50 million volumes per annum, of which one-fifth are exported. Between 1842 and 1888 Messrs. Mudie bought 6 million books for their lending libraries.

In 1893 Professor Strahan estimated the issue of newspapers in the United Kingdom at 170 million copies monthly, as compared with 10 millions in 1854 (when Gladstone abolished the tax on newspapers), and at present the circulation may be estimated thus :—

|                        | Papers Monthly |
|------------------------|----------------|
| England . . . . .      | 155,000,000    |
| Scotland . . . . .     | 17,000,000     |
| Ireland . . . . .      | 14,000,000     |
| United Kingdom . . . . | 186,000,000    |

The newspapers have a gross income of £16,000,000, of which about 9 millions go in wages to printers, 3 millions for paper, and the rest in salaries to editors, writers, reporters, &c., and dividends. The number of writers and reporters at various dates shows thus :—

| Year           | Editors, &c. | Reporters | Total | Per Million Pop. |
|----------------|--------------|-----------|-------|------------------|
| 1861 . . . . . | 1,528        | 636       | 2,164 | 74               |
| 1881 . . . . . | 3,434        | 2,677     | 6,111 | 175              |
| 1891 . . . . . | 5,111        | 2,374     | 7,485 | 199              |

According to Sell's Dictionary of Publications, London papers receive £4,000,000 a year from advertisements. Some of the London papers issue over 200,000 copies daily.

As regards the American Press there were 17,760 papers in the United States and Canada in 1890, with an ordinary impression of 41,524,000 copies, some daily,

others weekly, the aggregate issue making up about 240 million copies monthly; of which, according to Bromley, the press of New York stood for 57 millions. There were 132 newspapers whose daily issue exceeded, each, 50,000 copies.

See *Press*, in Part I., pages 464-467.

## PRICES

## UNITED KINGDOM

The prices of imported articles for the period from 1861 to 1897 have been as follows:—

|                        | 1861-70 | 1871-80 | 1881-90 | 1891  | 1892  | 1893  | 1894  | 1895  | 1896  | 1897  |

The price-level of the United States has been as follows:—

|          |       |
|----------|-------|
| 1874-83. | 1,000 |
| 1884-93. | 796   |
| 1894-95. | 650   |
| 1896-97. | 638   |

This shows a fall of 36 per cent. since the decade ending 1883.

## PRICE-LEVEL

Sauerbeck's Index-numbers convey an accurate idea of the rise or fall of level of prices in England, viz.:—

| Period   | Food | Minerals | Textiles | Sundries | Gen. No. |
|----------|------|----------|----------|----------|----------|
| 1867-77. | 100  | 100      | 100      | 100      | 100      |
| 1878-88. | 83   | 73       | 71       | 80       | 79       |
| 1889.    | 75   | 75       | 70       | 68       | 72       |
| 1890.    | 73   | 80       | 66       | 69       | 72       |
| 1891.    | 77   | 76       | 59       | 69       | 72       |
| 1892.    | 73   | 71       | 57       | 67       | 68       |
| 1893.    | 72   | 68       | 59       | 68       | 68       |
| 1894.    | 66   | 64       | 53       | 64       | 63       |
| 1895.    | 64   | 62       | 52       | 65       | 62       |
| 1896.    | 62   | 63       | 54       | 63       | 61       |
| 1897.    | 65   | 66       | 51       | 62       | 62       |

The above may be inverted by taking 1897 as par, thus:—

| Period   | Food | Minerals | Textiles | Sundries | Gen. No. |
|----------|------|----------|----------|----------|----------|
| 1897.    | 100  | 100      | 100      | 100      | 100      |
| 1896.    | 95   | 95       | 106      | 102      | 98       |
| 1895.    | 98   | 94       | 102      | 105      | 100      |
| 1894.    | 102  | 97       | 104      | 103      | 102      |
| 1893.    | 111  | 103      | 116      | 110      | 110      |
| 1892.    | 112  | 108      | 112      | 108      | 110      |
| 1891.    | 118  | 115      | 116      | 111      | 116      |
| 1890.    | 112  | 121      | 130      | 111      | 116      |
| 1889.    | 115  | 114      | 138      | 110      | 116      |
| 1878-88. | 128  | 110      | 140      | 129      | 127      |
| 1867-77. | 154  | 151      | 196      | 161      | 161      |

It appears from the above that £100 now will buy as much merchandise as £127 in the period of eleven years ending 1888, or £161 in that ending 1877.

## PUBLIC WORKS

The amount outstanding of loans by the Treasury for public works in the United Kingdom in 1897 was £38,400,000, against £37,200,000 in 1887. See page 494.

## R

## RAILWAYS

The mileage and cost of construction of existing lines (1897) are as follows:—

|                | Length, Miles | Cost, Millions £ | £ per Mile | £ per Inhab. | Miles of Raily. to |              |
|----------------|---------------|------------------|------------|--------------|--------------------|--------------|
|                |               |                  |            |              | 1,000 Sq. Miles    | 100,000 Pop. |

In 1891, says the *Eisenbahnwesen*, 117,000 locomotives in the various countries ran 2325 millions of miles, or 25 times the distance of the earth from the sun, being an average of 6,600,000 miles daily.

The traffic, earnings, and expenses may be summed up thus:—

|                       | Millions   |            | Millions £ Sterling |          |
|-----------------------|------------|------------|---------------------|----------|

| Cape Colony . . .     | 2,250   | 250       | 2,500   |
| Natal . . .           | 400     | ...       | 400     |
| Australia . . .       | 13,570  | 640       | 14,210  |
| Various . . .         | 1,150   | 6,570     | 7,720   |
| The World . . .       | 101,350 | 340,850   | 442,200 |

Working expenses compared with earnings show the following percentages :—

|                     |                    |                    |
|---------------------|--------------------|--------------------|
| England . . . 56.2  | Germany . . . 56.9 | Sweden . . . 60.4  |
| Scotland . . . 51.0 | Russia . . . 63.2  | Norway . . . 67.3  |
| Ireland . . . 55.0  | Austria . . . 57.3 | Denmark . . . 75.0 |
| France . . . 54.1   | Italy . . . 70.0   | Holland . . . 83.5 |

\* There are in Italy 5400 miles of railways built by the State, but leased to joint-stock companies for 60 years; also 11,130 miles of State lines in India leased to similar companies.

|                        |                      |                      |
|------------------------|----------------------|----------------------|
| Belgium . . . 55.8     | Canada . . . 69.4    | Egypt . . . 44.4     |
| Switzerland . . . 57.8 | Argentina . . . 52.2 | Cape Colony 47.5     |
| Europe . . . 57.3      | India . . . 48.2     | Australia . . . 51.7 |
| United States 70.6     | Japan . . . 43.2     | The World . 62.0     |

The following table shows the proportion of passengers in each class, and the average number of miles to each traveller (in 1892).

|                     | In 1000 Passengers |           |           | Miles per Traveller |
|---------------------|--------------------|-----------|-----------|---------------------|
|                     | 1st Class          | 2nd Class | 3rd Class |                     |
| Great Britain . . . | 35                 | 72        | 893       | ...                 |
| France . . .        | 68                 | 273       | 659       | 21                  |
| Germany . . .       | 5                  | 102       | 893       | 15                  |
| Russia . . .        | 12                 | 62        | 926       | 65                  |
| Austria . . .       | 16                 | 135       | 849       | 20                  |
| Italy . . .         | 42                 | 249       | 709       | 28                  |
| Holland . . .       | 52                 | 207       | 741       | 16                  |
| Belgium . . .       | 35                 | 125       | 840       | 13                  |
| Switzerland . . .   | 15                 | 182       | 803       | 12                  |
| Roumania . . .      | 39                 | 156       | 805       | 42                  |
| Average . . .       | 32                 | 156       | 812       | 25                  |

The fare by ordinary train for a run of 10 miles is as follows :—

|                         | Pence per 10 Miles |           |           |
|-------------------------|--------------------|-----------|-----------|
|                         | 1st Class          | 2nd Class | 3rd Class |
| Great Britain . . . . . | 14.7               | 12.3      | 10.0      |
| France . . . . .        | 17.0               | 11.6      | 7.5       |
| Germany . . . . .       | 15.2               | 11.4      | 7.6       |
| Russia . . . . .        | 8.7                | 4.1       | 2.7       |
| Austria . . . . .       | 15.7               | 11.7      | 7.9       |
| Hungary . . . . .       | 18.2               | 13.7      | 9.1       |
| Italy . . . . .         | 17.1               | 12.0      | 7.7       |
| Switzerland . . . . .   | 15.8               | 11.0      | 7.9       |
| Holland . . . . .       | 10.1               | 12.9      | 8.0       |
| Belgium . . . . .       | 11.6               | 8.7       | 5.8       |
| Average . . . . .       | 15.0               | 11.0      | 7.5       |

Freight charge for carrying a ton 100 miles is as follows (1895):—

#### Pence per 100 Miles

|                   |                  |                  |
|-------------------|------------------|------------------|
| Great Britain 174 | France . . . 72  | Belgium . . . 68 |
| Ireland . . . 232 | Germany . . . 64 | Holland . . . 80 |
| United States 41  | Switzerland 140  | Italy . . . 160  |

The *Engineer* of January 1896 gives the maximum speed of trains as follows :—

#### Miles per Hour

|                  |                  |                  |
|------------------|------------------|------------------|
| United States 53 | France . . . 49  | Italy . . . 42   |
| Great Britain 51 | Belgium . . . 45 | Austria . . . 41 |
| Germany . . . 51 | Holland . . . 44 |                  |

The following are the quickest trains in Great Britain and United States :—

| Run                             | Miles | Hrs. Min. | Miles per Hour |
|---------------------------------|-------|-----------|----------------|
| Perth to Forfar . . . . .       | 32    | 0 32      | 60             |
| Grantham to York . . . . .      | 83    | 1 28      | 56             |
| Swindon to London . . . . .     | 77    | 1 27      | 54             |
| Carlisle to Aberdeen . . . . .  | 240   | 4 58      | 48             |
| Philadelphia to Atlantic City   | 56    | 0 48      | 69             |
| Syracuse to Rochester . . . . . | 80    | 1 20      | 60             |
| New York to Buffalo . . . . .   | 440   | 8 15      | 52             |

Gross receipts per train mile run, and expenses, are shown thus :—

|                     | Pence per Mile Run |          |        |
|---------------------|--------------------|----------|--------|
|                     | Receipts           | Expenses | Profit |
| United Kingdom . .  | 67                 | 37       | 30     |
| France . . . . .    | 52                 | 28       | 24     |
| Germany . . . . .   | 43                 | 25       | 18     |
| Russia . . . . .    | 56                 | 35       | 21     |
| Austria . . . . .   | 62                 | 36       | 26     |
| Italy . . . . .     | 52                 | 36       | 16     |
| Belgium . . . . .   | 34                 | 19       | 15     |
| Canada . . . . .    | 57                 | 40       | 17     |
| Australia . . . . . | 77                 | 45       | 32     |

## UNITED KINGDOM

Traffic of passengers and merchandise increased in 10 years as follows :—

|                    | Passengers, Mills. |      | Tons, Millions |      |
|--------------------|--------------------|------|----------------|------|
|                    | 1886               | 1896 | 1886           | 1896 |
| England . . . . .  | 642                | 860  | 216            | 300  |
| Scotland . . . . . | 65                 | 94   | 35             | 52   |
| Ireland . . . . .  | 19                 | 27   | 4              | 5    |
| United Kingdom . . | 726                | 981  | 255            | 357  |

Passenger traffic does not include season-ticket holders. Passengers showed an increase of 35 per cent., goods 40 per cent., in 10 years. Receipts, expenses, and profit in 1896 were as follows :—

|                    | Receipts,<br>£ | Expenses,<br>£ | Profit,<br>£ | Interest<br>on Cost |
|--------------------|----------------|----------------|--------------|---------------------|
| England . . . . .  | 76,600,000     | 43,150,000     | 33,450,000   | 3.97                |
| Scotland . . . . . | 10,050,000     | 5,120,000      | 4,930,000    | 3.35                |
| Ireland . . . . .  | 3,470,000      | 1,920,000      | 1,550,000    | 3.92                |
| U. Kingdom . . . . | 90,120,000     | 50,190,000     | 39,930,000   | 3.87                |

Earnings and expenses per mile showed as follows :—

|                    | Earnings, £ |       | Expenses, £ |       |
|--------------------|-------------|-------|-------------|-------|
|                    | 1886        | 1896  | 1886        | 1896  |
| England . . . . .  | 4,137       | 4,909 | 2,280       | 2,935 |
| Scotland . . . . . | 2,407       | 2,853 | 1,248       | 1,510 |
| Ireland . . . . .  | 1,046       | 1,074 | 580         | 605   |
| United Kingdom . . | 3,446       | 4,009 | 1,888       | 2,358 |

In the above table miscellaneous receipts are not included in earnings, which comprise only passenger and goods traffic; gross receipts would be 5½ per cent. higher than the above traffic earnings per mile.

Accidents on railways in the United Kingdom show the number of victims thus :—

|                    | Killed |      |      |
|--------------------|--------|------|------|
|                    | 1876   | 1886 | 1896 |
| Passengers . . . . | 38     | 8    | 50   |
| Employees . . . .  | 673    | 425  | 447  |
| Total . . . . .    | 711    | 433  | 497  |

|                    | Injured |       |       |
|--------------------|---------|-------|-------|
|                    | 1876    | 1886  | 1896  |
| Passengers . . . . | 1,279   | 615   | 388   |
| Employees . . . .  | 2,600   | 2,070 | 3,986 |
| Total . . . . .    | 3,879   | 2,625 | 4,374 |
|                    | Total   |       |       |
|                    | 1876    | 1886  | 1896  |
| Passengers . . . . | 1,317   | 623   | 438   |
| Employees . . . .  | 3,273   | 2,435 | 4,433 |
| Total . . . . .    | 4,590   | 3,058 | 4,871 |

The number of killed and wounded, as compared with 1886, has increased by 1813, or about 60 per cent., whereas passenger traffic has risen only 21, and goods traffic 40, per cent. In fact 13 persons are killed or wounded on the railways of the United Kingdom against 8 persons in 1886. At Clapham Junction 700 trains pass daily.

## FRANCE

A statement published in 1895 showed passenger traffic thus :—

| Class            | Million Passengers |      |      |
|------------------|--------------------|------|------|
|                  | 1886               | 1892 | 1894 |
| First . . . . .  | 8                  | 15   | 19   |
| Second . . . . . | 26                 | 60   | 104  |
| Third . . . . .  | 52                 | 106  | 197  |
| Total . . . . .  | 86                 | 181  | 320  |

First-class passengers show a falling ratio, being now only 6 per cent. of the total.

## UNITED STATES

Mileage and capital have been as follows :—

|                | Miles   | Millions £ | £ per Mile |
|----------------|---------|------------|------------|
| 1876 . . . . . | 76,810  | 929        | 12,100     |
| 1886 . . . . . | 133,560 | 1,682      | 12,600     |
| 1896 . . . . . | 178,550 | 2,297      | 12,700     |

The length and cost of railways in the several parts of the Union in 1896 were as follows :—

| States            | Miles   | Miles per<br>10,000 Pop. | Capital<br>Mills. £ | £ per<br>Mile |
|-------------------|---------|--------------------------|---------------------|---------------|
| New England . .   | 7,130   | 14                       | 97                  | 13,600        |
| Middle . . . . .  | 21,500  | 14                       | 545                 | 25,300        |
| South . . . . .   | 45,650  | 22                       | 403                 | 8,830         |
| Prairie . . . . . | 81,230  | 31                       | 1,015               | 12,500        |
| Pacific . . . . . | 23,040  | 53                       | 237                 | 10,300        |
| Union . . . . .   | 178,550 | 25                       | 2,297               | 12,700        |

The number of passengers carried, and the equivalent carried 100 miles, were :—

| Year           | Passengers<br>Millions | Miles<br>Millions | Average<br>Miles | Passengers<br>Millions<br>Carried<br>100 Miles |
|----------------|------------------------|-------------------|------------------|------------------------------------------------|
| 1882 . . . . . | 375                    | 10,484            | 28               | 105                                            |
| 1890 . . . . . | 520                    | 12,522            | 24               | 125                                            |
| 1896 . . . . . | 535                    | 13,055            | 25               | 131                                            |

With increase of population the average distance travelled by each passenger diminishes, being now 25 miles, against 28 miles in the year 1882.

Goods traffic shows as follows :—

| Year       | Million Tons | Miles Millions | Average Miles | Mill. Tons Carried 100 Miles |
|------------|--------------|----------------|---------------|------------------------------|
| 1882 . . . | 360          | 39,308         | 109           | 393                          |
| 1890 . . . | 691          | 79,193         | 115           | 792                          |
| 1896 . . . | 774          | 93,886         | 121           | 939                          |

The opening up of the Western States by new railways causes the average haulage of goods to increase, each ton being now carried 121 miles, against 109 miles in 1882. The average distance that merchandise was carried in 1882 was four times that of a passenger, and at present it is five times. The total mileage of passenger traffic rose 25 per cent. in 14 years, that of goods traffic 140 per cent. The latter is stimulated by the reduction of freight charges, viz. :—

|            |                                |
|------------|--------------------------------|
| 1882 . . . | 18 24 cents per ton 100 miles. |
| 1890 . . . | 93 " " "                       |
| 1896 . . . | 82 " " "                       |

This charge is less than one-fourth of the charge in Great Britain, and little more than half what is customary on the Continent of Europe. It seems that American engines are heavier than British, going up to 400 tons : thus the Pennsylvanian lines carry 1600 tons coal in one train, whereas the Midland coal train of England rarely exceeds 400 tons.

Each passenger-engine draws 66,000 passengers, and each freight-engine 40,000 tons of goods, yearly. In 1893 there were 1890 different railway companies, employing 874,000 persons, of whom 2730 were killed and 31,730 injured, that is, 3 per thousand killed. Forty companies own half the railways of the Union.

The railways in 1896 compared with area and population thus :—

| States            | Miles of Railway to |                     |
|-------------------|---------------------|---------------------|
|                   | 1000 Square Miles   | 100,000 Inhabitants |
| New England . . . | 105                 | 145                 |
| Middle . . .      | 190                 | 145                 |
| South . . .       | 56                  | 230                 |
| Prairie . . .     | 108                 | 325                 |
| Pacific . . .     | 19                  | 540                 |
| The Union . . .   | 61                  | 250                 |

#### CANADA

The progress of Canadian lines is briefly shown thus :—

| Year       | Length Miles | Miles Run  | No. of Passengers | Tons of Goods |
|------------|--------------|------------|-------------------|---------------|
| 1876 . . . | 5,160        | 18,100,000 | 5,500,000         | 6,300,000     |
| 1886 . . . | 10,700       | 30,500,000 | 9,900,000         | 15,700,000    |
| 1896 . . . | 16,270       | 44,500,000 | 14,800,000        | 24,300,000    |

In twenty years passengers have almost trebled, goods quadrupled. The gross receipts and expenses were :—

| Year       | Receipts £ | Expenses £ | Profit £  | Interest on Cost |
|------------|------------|------------|-----------|------------------|
| 1876 . . . | 4,040,000  | 3,280,000  | 760,000   | 1.27             |
| 1886 . . . | 6,950,000  | 5,040,000  | 1,910,000 | 1.54             |
| 1896 . . . | 10,510,000 | 7,280,000  | 3,230,000 | 1.73             |

This shows a steady improvement in traffic, the average earnings and expenses per mile of rail showing thus :—

| Year       | Receipts £ | Expenses £ | Profit £ | Pence Profit per Mile Run |
|------------|------------|------------|----------|---------------------------|
| 1875 . . . | 839        | 680        | 159      | 10                        |
| 1886 . . . | 646        | 470        | 176      | 15                        |
| 1896 . . . | 646        | 448        | 198      | 17                        |

The length and cost of the principal lines are shown thus :—

|                        | Miles  | Cost, £     | £ per Mile |
|------------------------|--------|-------------|------------|
| Canadian Pacific . . . | 6,220  | 66,600,000  | 10,700     |
| Grand Trunk . . .      | 3,160  | 69,600,000  | 22,100     |
| Intercolonial . . .    | 1,360  | 12,300,000  | 9,050      |
| Other lines . . .      | 5,650  | 38,700,000  | 6,850      |
| Total . . .            | 16,390 | 187,200,000 | 11,400     |

The increase of railway capital in five years is shown thus :—

|                  | 1891 £ Sterling | 1896 £ Sterling | Increase, £ |
|------------------|-----------------|-----------------|-------------|
| Shares . . .     | 71,100,000      | 77,000,000      | 5,900,000   |
| Debentures . . . | 60,800,000      | 70,000,000      | 9,200,000   |
| Subsidies . . .  | 38,100,000      | 40,200,000      | 2,100,000   |
| Total . . .      | 170,000,000     | 187,200,000     | 17,200,000  |

The subsidy by the Dominion Government amounts to £31,000,000, and those from local legislatures to £9,200,000.

The traffic on the principal lines in 1896 was as follows :—

|                     | Passengers Number | Tons Goods | Per Mile   |       |
|---------------------|-------------------|------------|------------|-------|
|                     |                   |            | Passengers | Tons  |
| Grand Trunk . . .   | 5,080,000         | 7,590,000  | 1,610      | 2,410 |
| Can. Pacific . . .  | 3,040,000         | 4,580,000  | 488        | 738   |
| Intercolonial . . . | 1,590,000         | 1,430,000  | 1,170      | 1,090 |
| Other lines . . .   | 5,100,000         | 10,670,000 | 903        | 1,880 |
| Total . . .         | 14,810,000        | 24,270,000 | 910        | 1,490 |

The goods traffic in 1896 compared with previous years as follows :—

|                    | Tons Carried |            |            |
|--------------------|--------------|------------|------------|
|                    | 1876         | 1886       | 1896       |
| Grain . . .        | 1,120,000    | 3,640,000  | 5,040,000  |
| Timber . . .       | 840,000      | 2,800,000  | 4,680,000  |
| Manufactures . . . | 150,000      | 2,260,000  | 3,420,000  |
| Sundries . . .     | 4,220,000    | 6,970,000  | 11,130,000 |
| Total . . .        | 6,330,000    | 15,670,000 | 24,270,000 |

The Grand Trunk has 30 per cent., the Canadian Pacific 20 per cent., of the goods traffic.

**RAINFALL**

The rainfall of London in 1897, and the average for eighty-two years, as well as the average rainfall of Dublin for twenty-two years to 1896, are shown as follows :—

|                   | London, Inches |         | Dublin  |
|-------------------|----------------|---------|---------|
|                   | 1897           | 1816-97 | 1875-96 |
| January . . . .   | 1.6            | 1.9     | 2.1     |
| February . . . .  | 2.4            | 1.5     | 2.1     |
| March . . . . .   | 3.4            | 1.6     | 1.9     |
| 1st Quarter . . . | 7.4            | 5.0     | 6.1     |
| April . . . . .   | 1.6            | 1.7     | 2.1     |
| May . . . . .     | 1.3            | 2.0     | 2.2     |
| June . . . . .    | 1.9            | 1.9     | 2.0     |
| 2nd Quarter . . . | 4.8            | 5.6     | 6.3     |
| July . . . . .    | 0.7            | 2.6     | 2.6     |
| August . . . . .  | 2.9            | 2.4     | 3.0     |
| September . . . . | 2.7            | 2.3     | 1.9     |
| 3rd Quarter . . . | 6.3            | 7.3     | 7.5     |
| October . . . . . | 0.5            | 2.8     | 3.0     |
| November . . . .  | 1.1            | 2.3     | 2.7     |
| December . . . .  | 2.1            | 2.0     | 2.4     |
| 4th Quarter . . . | 3.7            | 7.1     | 8.1     |
| Year . . . . .    | 22.2           | 25.0    | 28.0    |

Tables of rainfall yearly at 350 cities of the world will be found at pages 391, 392.

**REFORMATORIES**

The number of children in reformatories and industrial schools is shown thus :—

|                | G. Britain | Ireland | Total  |
|----------------|------------|---------|--------|
| 1859 . . . . . | 3,276      | 140     | 3,416  |
| 1866 . . . . . | 7,364      | 163     | 7,527  |
| 1886 . . . . . | 18,810     | 8,914   | 27,724 |
| 1897 . . . . . | 24,380     | 8,220   | 32,600 |

There are 144 industrial schools and reformatories in England, 42 in Scotland, and 76 in Ireland, in all 262, of which 138 are for boys, 124 for girls; 160 are for Protestant, 102 for Catholic, children. Since the establishment of these institutions the criminal records of England and Scotland show a great diminution of juvenile offenders (under sixteen years of age), viz. :—

|                | England | Scotland | G. Britain |
|----------------|---------|----------|------------|
| 1861 . . . . . | 8,801   | 1,212    | 10,013     |
| 1870 . . . . . | 9,998   | 1,204    | 11,202     |
| 1880 . . . . . | 5,579   | 1,188    | 6,766      |
| 1893 . . . . . | 4,036   | 741      | 4,777      |

The following table shows how many juveniles were in 1000 criminals :—

|                | England | Scotland |
|----------------|---------|----------|
| 1861 . . . . . | 79      | 65       |
| 1870 . . . . . | 63      | 42       |
| 1880 . . . . . | 34      | 23       |
| 1893 . . . . . | 25      | 14       |

The sexes were distinguished in 1897 thus :—

| <i>Reformatories</i>      |        |         |        |
|---------------------------|--------|---------|--------|
|                           | Males  | Females | Total  |
| England . . . . .         | 4,090  | 580     | 4,670  |
| Scotland . . . . .        | 780    | 130     | 910    |
| Ireland . . . . .         | 500    | 60      | 560    |
| U. Kingdom . . .          | 5,370  | 770     | 6,140  |
| <i>Industrial Schools</i> |        |         |        |
| England . . . . .         | 10,770 | 3,180   | 13,950 |
| Scotland . . . . .        | 3,480  | 1,370   | 4,850  |
| Ireland . . . . .         | 3,410  | 4,220   | 7,660  |
| U. Kingdom . . .          | 17,690 | 8,770   | 26,460 |
| <i>Total</i>              |        |         |        |
| England . . . . .         | 14,860 | 3,760   | 18,620 |
| Scotland . . . . .        | 4,260  | 1,500   | 5,760  |
| Ireland . . . . .         | 3,940  | 4,280   | 8,220  |
| U. Kingdom . . .          | 23,060 | 9,540   | 32,600 |

The number of children in reformatories per 100,000 inhabitants is 15 in England, 22 in Scotland, and 12 in Ireland.

For cost of maintenance, &c., see page 233.

**RELIGION**

Latest estimates and official returns show as follows :—

|                   | Christians  | Non-Christians | Total         |
|-------------------|-------------|----------------|---------------|
| Europe . . . . .  | 340,320,000 | 12,480,000     | 352,800,000   |
| America . . . . . | 124,740,000 | 170,000        | 124,910,000   |
| Australia . . . . | 3,800,000   | ...            | 3,800,000     |
| Asia and Africa . | 7,240,000   | 641,550,000    | 648,790,000   |
| The World . . . . | 476,100,000 | 654,200,000    | 1,130,300,000 |

The creeds of Europe, America, and Australia sum up 481,500,000 souls, of which 468,800,000 are Christians, 6,300,000 Jews, and 6,400,000 Mahometans. The Christian population is made up as follows :—

|                    | Number (000 omitted) |             |        |         |
|--------------------|----------------------|-------------|--------|---------|
|                    | Roman Catholics      | Protestants | Greeks | Total   |
| United Kingdom .   | 5,410                | 34,430      | ...    | 39,840  |

| Total . . . . .           | 3,350                | 5,500       | 29,540    | 38,390 |

See *Missions*, page 777, and *Churches*, page 656.

Roman Catholic authorities give the following particulars respecting English-speaking countries (1898):—

|                          | Bishops | Clergy | Churches | Souls      |
|--------------------------|---------|--------|----------|------------|
| Ireland . . . . .        | 28      | 3,440  | 2,760    | 3,550,000  |
| England . . . . .        | 17      | 2,700  | 1,480    | 1,500,000  |
| Scotland . . . . .       | 7       | 420    | 350      | 360,000    |
| Canada . . . . .         | 31      | 1,500  | 1,050    | 2,600,000  |
| Australia . . . . .      | 16      | 400    | 780      | 900,000    |
| India, &c. . . . .       | 42      | 1,790  | 240      | 2,590,000  |
| British Empire . . . . . | 141     | 10,250 | 6,660    | 11,500,000 |
| United States . . . . .  | 91      | 10,910 | 10,500   | 9,850,000  |
| Total . . . . .          | 232     | 21,160 | 17,160   | 21,350,000 |

In the United Kingdom there are 19 Privy Counsellors, 31 Peers, and 73 Members of Parliament who are Roman Catholics. In the United States there are 927 Catholic colleges, besides a large number of schools, attended by 828,000 children. England, Ireland, Canada, United States, and Australia, have each a cardinal. In India there are 745 European and 655 native priests, the Roman Catholic laity numbering 1,870,000 souls.

As regards Protestants in the British Empire and the United States, they sum up 103 millions of all denominations; they have various missionary societies, with an aggregate income of £2,600,000, maintaining 11,660 male and female missionaries, say £225 for each missionary, including the cost of schools, &c. For further details see *Church*, p. 115; and *Religion*, p. 512.

According to the *Statesman's Year-Book* there are one million Roman Catholics in China and 50,000 Protestants, the former having 25 bishops and a numerous clergy.

The United States *Catholic Register* gives the numbers of Roman Catholics thus:—

| Diocese                | Number  | Diocese                 | Number    |
|------------------------|---------|-------------------------|-----------|
| New York . . . . .     | 825,000 | Baltimore . . . . .     | 240,000   |
| Chicago . . . . .      | 650,000 | San Francisco . . . . . | 225,000   |
| Boston . . . . .       | 600,000 | St. Louis . . . . .     | 220,000   |
| Philadelphia . . . . . | 450,000 | St. Paul . . . . .      | 212,000   |
| New Orleans . . . . .  | 325,000 | Various . . . . .       | 5,860,000 |
| Milwaukee . . . . .    | 250,000 | Total . . . . .         | 9,857,000 |

See *Religion*, page 513; also *Churches*, pages 115 and 656; and *Missions*, page 777.

## ROADS

The value of existing streets, highways, railways, tramways, and canals in Europe is approximately:—

|                          | Millions £ Sterling |       |       |        | £ per inah. |
|--------------------------|---------------------|-------|-------|--------|-------------|
|                          | Streets             | Roads | Rails | Canals |             |
| U. Kingdom . . . . .     | 31                  | 125   | 1,044 | 35     | 1,235       |
| France . . . . .         | 14                  | 240   | 670   | 31     | 955         |
| Germany . . . . .        | 23                  | 210   | 580   | 23     | 836         |
| Russia . . . . .         | 16                  | 19    | 405   | 10     | 450         |
| Austria . . . . .        | 8                   | 73    | 370   | 17     | 468         |

| Canada . . . . .        | 300,000     | 100,000    | 13               | ...        |
| Total . . . . .         | 101,100,000 | 35,500,000 | 14               | 3.2        |

See *Agriculture*, page 8, and *Food*, page 714

### S

### SALT

The production in various countries is as follows:—

|                          | Tons      | Lbs. per Inhab. |
|--------------------------|-----------|-----------------|
| United Kingdom . . . . . | 1,950,000 | 110             |
| Germany . . . . .        | 2,540,000 | 109             |
| France . . . . .         | 870,000   | 52              |
| Russia . . . . .         | 1,500,000 | 30              |
| Austria . . . . .        | 500,000   | 25              |
| Italy . . . . .          | 480,000   | 36              |
| Spain . . . . .          | 350,000   | 45              |
| United States . . . . .  | 1,720,000 | 53              |

One-third of the salt produced in the United Kingdom is exported, but the exportation is declining, viz:—

|                   | Tons Yearly | Value, £ |
|-------------------|-------------|----------|
| 1883-87 . . . . . | 890,000     | 610,000  |
| 1893-97 . . . . . | 690,000     | 520,000  |

Consumption in the United Kingdom averages 72 lbs. per head, including what is used for manufactures.

For further particulars see page 517.

### SHIPPING

The merchant shipping of the seventeenth and eighteenth centuries was as follows:—

| Flag                   | Tons      |           | Ratio |       |
|------------------------|-----------|-----------|-------|-------|
|                        | 1676      | 1774      | 1676  | 1774  |
| Dutch . . . . .        | 900,000   | 650,000   | 45.0  | 28.3  |
| British . . . . .      | 500,000   | 650,000   | 25.0  | 28.3  |
| Scandinavian . . . . . | 150,000   | 250,000   | 7.5   | 10.9  |
| French . . . . .       | 120,000   | 240,000   | 6.0   | 10.4  |

| Italian, &c. . . . .   | 120,000   | 210,000   | 6.0   | 9.1   |
| Total . . . . .        | 2,000,000 | 2,300,000 | 100.0 | 100.0 |

Shipping increased sevenfold between 1774 and 1860, amounting in the latter year to 16,600,000 tons. Since 1860 the increase has been 50 per cent., the total now exceeding 24,000,000 tons, viz:—

| Flag                          | Tonnage, Nominal |            |            |
|-------------------------------|------------------|------------|------------|
|                               | Steam            | Sail       | Total      |
| United Kingdom . . . . .      | 6,280,000        | 2,740,000  | 9,020,000  |
| United States . . . . .       | 2,360,000        | 2,410,000  | 4,770,000  |
| Scandinavia . . . . .         | 650,000          | 1,770,000  | 2,420,000  |
| German . . . . .              | 880,000          | 620,000    | 1,500,000  |

| Argentine . . . . .           | 20,000           | 30,000     | 50,000     |
| The World . . . . .           | 13,045,000       | 11,045,000 | 24,090,000 |

In 1860 the United States merchant navy surpassed that of Great Britain both in nominal tonnage and carrying power, but in 1896 the positions were reversed, viz:—

|                        | Tonnage    |            | Carrying Power |            |
|------------------------|------------|------------|----------------|------------|
|                        | 1860       | 1896       | 1860           | 1896       |
| G. Britain . . . . .   | 4,660,000  | 9,020,000  | 6,030,000      | 27,860,000 |
| Colonies . . . . .     | 1,050,000  | 1,380,000  | 1,190,000      | 2,740,000  |
| British . . . . .      | 5,710,000  | 10,400,000 | 7,220,000      | 30,600,000 |
| U. States . . . . .    | 5,350,000  | 4,770,000  | 7,960,000      | 11,850,000 |

| Turkish . . . . .      | 180,000    | 190,000    | 200,000        | 310,000    |
| Various . . . . .      | 510,000    | 760,000    | 650,000        | 2,140,000  |
| The World . . . . .    | 16,600,000 | 24,100,000 | 21,800,000     | 63,200,000 |

The proportions of the tonnage and carrying power of various flags is shown at the above dates thus :—

| Flag           | Tonnage |       | Carrying Power |       |
|----------------|---------|-------|----------------|-------|
|                | 1880    | 1896  | 1880           | 1896  |
| United Kingdom | 28.0    | 37.5  | 27.7           | 44.1  |
| Colonial       | 6.3     | 5.7   | 5.5            | 4.4   |
| British        | 34.3    | 43.2  | 33.2           | 48.5  |
| United States  | 32.2    | 19.8  | 36.5           | 18.7  |
| Scandinavian   | 5.8     | 10.1  | 4.8            | 6.9   |
| German         | 4.2     | 6.3   | 3.9            | 6.6   |
| French         | 6.1     | 3.7   | 5.8            | 3.8   |
| Spanish        | 2.8     | 3.0   | 2.3            | 3.7   |
| Russian        | 2.4     | 3.3   | 2.4            | 2.3   |
| Italian        | 3.3     | 3.3   | 2.8            | 2.3   |
| Dutch          | 1.8     | 1.2   | 1.8            | 1.4   |
| Various        | 7.1     | 6.1   | 6.5            | 5.8   |
| Total          | 100.0   | 100.0 | 100.0          | 100.0 |

The following table shows the average nominal tonnage of each steamer and sailing vessel of the various flags, as also the total number of merchant vessels, and the average carrying power in tons to each vessel, in 1896 :—

|                | Tons, Average |      | Number of Vessels | Average Carrying Power |
|----------------|---------------|------|-------------------|------------------------|
|                | Steam         | Sail |                   |                        |
| United Kingdom | 740           | 220  | 20,800            | 1,340                  |
| United States  | 360           | 150  | 22,630            | 530                    |
| Scandinavian   | 320           | 150  | 13,620            | 320                    |
| German         | 820           | 240  | 3,590             | 1,150                  |
| French         | 410           | 28   | 15,600            | 150                    |
| Spanish        | 1,010         | 150  | 1,780             | 1,280                  |
| Canadian       | 140           | 120  | 7,260             | 230                    |
| Russian        | 290           | 150  | 5,360             | 280                    |
| Italian        | 630           | 90   | 6,510             | 220                    |
| Japanese       | 210           | 66   | 1,530             | 600                    |
| Dutch          | 1,160         | 250  | 570               | 1,510                  |
| Austrian       | 1,030         | 420  | 300               | 2,400                  |
| Greek          | 510           | 40   | 6,160             | 90                     |

The relative proportion of trade done by steamers is increasing so rapidly that it seems as if sailing ships must ultimately disappear, carrying power being shown as follows :—

|              | Steam      |            | Sail       |            |
|--------------|------------|------------|------------|------------|
|              | 1888       | 1896       | 1888       | 1896       |
| U. Kingdom   | 17,400,000 | 25,120,000 | 3,120,000  | 2,740,000  |
| Colonial     | 1,060,000  | 1,720,000  | 1,320,000  | 870,000    |
| British      | 18,460,000 | 26,840,000 | 4,440,000  | 3,610,000  |
| U. States    | 7,080,000  | 9,440,000  | 2,540,000  | 2,410,000  |
| Scandinavian | 1,420,000  | 2,600,000  | 1,950,000  | 1,770,000  |
| German       | 2,000,000  | 3,520,000  | 730,000    | 620,000    |
| French       | 2,040,000  | 2,000,000  | 450,000    | 390,000    |
| Spanish      | 1,580,000  | 2,120,000  | 200,000    | 190,000    |
| Russian      | 560,000    | 920,000    | 610,000    | 560,000    |
| Italian      | 700,000    | 880,000    | 680,000    | 560,000    |
| Various      | 2,360,000  | 3,880,000  | 1,000,000  | 940,000    |
| The World.   | 36,200,000 | 52,200,000 | 12,600,000 | 11,050,000 |

In 1888 sailing vessels stood for one-fourth of the maritime carrying power; at present they are only one-sixth. The increasing preponderance of the British flag (including Colonial) is also remarkable; in 1888 it was under 47, and in 1896 it was over 48, per cent. of the

world's total. The relative increase of carrying power in the above interval of eight years was :—

|               | Per Cent. |           | Per Cent. |
|---------------|-----------|-----------|-----------|
| British       | 33        | Russian   | 27        |
| United States | 23        | Italian   | 5         |
| Scandinavian  | 30        | Japanese  | 160       |
| German        | 52        | Dutch     | 54        |
| Spanish       | 30        | The World | 29        |

French carrying power declined 100,000 tons or 4 per cent. in the same interval, a proof of the absurdity of Navigation Bounties. France pays 150 francs or £6 per 100 tons for every French vessel per thousand miles' run during the year, if built in France, or half that premium if built abroad. These premiums averaged £300,000 per annum from 1881 to 1890.

## SHIPBUILDING

The tonnage of vessels built in ten years in all countries has been as follows :—

| Year     | U. King. | U. States | Various | Total     |
|----------|----------|-----------|---------|-----------|
| 1888     | 570,000  | 220,000   | 180,000 | 970,000   |
| 1889     | 850,000  | 230,000   | 180,000 | 1,260,000 |
| 1890     | 810,000  | 290,000   | 190,000 | 1,290,000 |
| 1891     | 810,000  | 370,000   | 190,000 | 1,370,000 |
| 1892     | 800,000  | 200,000   | 200,000 | 1,200,000 |
| 1893     | 590,000  | 210,000   | 200,000 | 1,000,000 |
| 1894     | 660,000  | 130,000   | 210,000 | 1,000,000 |
| 1895     | 650,000  | 110,000   | 210,000 | 970,000   |
| 1896     | 740,000  | 230,000   | 220,000 | 1,190,000 |
| 1897     | 700,000  | 230,000   | 290,000 | 1,220,000 |
| Average. | 720,000  | 220,000   | 210,000 | 1,150,000 |

The total of vessels built in the United Kingdom (exclusive of British war vessels) in ten years was :—

|       | Tons      |         | Tons      |
|-------|-----------|---------|-----------|
| Steam | 5,950,000 | British | 5,030,000 |
| Sail  | 1,250,000 | Foreign | 1,270,000 |
| Total | 7,200,000 | Total   | 7,200,000 |

Vessels built in ten years in the United States were as follows :—

|       | Tons      |           | Tons      |
|-------|-----------|-----------|-----------|
| Steam | 1,260,000 | Sea-going | 1,220,000 |
| Sail  | 940,000   | Lakes     | 980,000   |
| Total | 2,200,000 | Total     | 2,200,000 |

The tonnage of vessels built in ten years (1881-90), including those built in British yards for foreigners, carried the following flags :—

| Flag          | Tons       | Ratio |
|---------------|------------|-------|
| British       | 5,610,000  | 49.8  |
| United States | 2,200,000  | 19.3  |
| German        | 1,110,000  | 9.7   |
| Scandinavian  | 1,300,000  | 11.4  |
| French        | 640,000    | 5.6   |
| Italian       | 370,000    | 3.2   |
| Dutch         | 190,000    | 1.6   |
| Total         | 11,420,000 | 100.0 |

Notwithstanding the great activity in shipbuilding the nominal tonnage shows but a slow increase, owing to the

number of sailing vessels and old steamers broken up or lost, as the following table shows:—

|                              | Tons       |
|------------------------------|------------|
| Vessels afloat in 1880 . . . | 22,540,000 |
| New built, 1881-96 . . .     | 18,160,000 |
| To be accounted for . . .    | 40,700,000 |
| Afloat in 1896 . . .         | 24,100,000 |

It appears, therefore, that in 16 years the tonnage of vessels broken up or lost was 16,600,000, that is, over one million tons yearly. The loss by maritime disaster and wreck averages 3 per cent., say 700,000 tons, and hence the vessels broken up must have been 300,000 tons yearly. The difference between the tonnage of vessels afloat in 1888 and 1896 is shown as follows:—

|                       | 1888       | 1896       |
|-----------------------|------------|------------|
| Steamer, tons . . . . | 9,050,000  | 13,045,000 |
| Sailing, " . . . .    | 12,600,000 | 11,045,000 |
| Total . . . .         | 21,650,000 | 24,090,000 |

Thus steamers have had an increase of 4 million tons (equal to 16 million tons carrying power), while sailing vessels have declined more than 1½ million tons, in eight years.

The unofficial statement published yearly as to ship-building in various countries differs materially from that on preceding pages, which is net tonnage. The unofficial statement is as follows:—

| Years        | In United Kingdom | Other Countries | Total     |
|--------------|-------------------|-----------------|-----------|
| 1891 . . . . | 1,130,000         | 470,000         | 1,600,000 |
| 1892 . . . . | 1,110,000         | 557,000         | 1,667,000 |
| 1893 . . . . | 870,000           | 340,000         | 1,210,000 |
| 1894 . . . . | 1,050,000         | 274,000         | 1,324,000 |
| 1895 . . . . | 1,100,000         | 370,000         | 1,470,000 |
| 1896 . . . . | 1,450,000         | 450,000         | 1,900,000 |
| 1897 . . . . | 1,050,000         | 520,000         | 1,570,000 |
| 1898 . . . . | 1,370,000         | 520,000         | 1,890,000 |

The shipbuilding of the world in 1897 was:—

| Built in         | Steam     | Sail    | Total Tons |
|------------------|-----------|---------|------------|
| U. Kingdom . . . | 1,022,000 | 28,000  | 1,050,000  |
| U. States . . .  | 106,000   | 126,000 | 232,000    |
| Germany . . .    | 140,000   | ...     | 140,000    |
| France, &c. . .  | 105,000   | 43,000  | 148,000    |
| Total . . .      | 1,373,000 | 197,000 | 1,570,000  |

In 1898 it was as follows:—

|               | British   | Various | Total, Tons |
|---------------|-----------|---------|-------------|
| Steam . . . . | 1,366,000 | 410,000 | 1,776,000   |
| Sail . . . .  | 4,000     | 110,000 | 114,000     |
| Total . . .   | 1,370,000 | 520,000 | 1,890,000   |

In 1897 the French built three large sailing-ships, ranging from 3000 to 3500 tons.

The largest vessels launched in 1897 were:—

| In U. Kingdom   | Tons   | In Germany       | Tons   |
|-----------------|--------|------------------|--------|
| Briton . . . .  | 10,200 | Kaiser Fritz . . | 12,500 |
| Brazilian . . . | 11,100 | Pretoria . . .   | 14,000 |
| Cymric . . . .  | 12,300 | Kaiser Wilhelm . | 14,300 |

Of the steamers built in the year, as regards tonnage, 99 per cent. were of steel, 1 per cent. built of iron; of the sailing vessels, 96 per cent. were of steel, and 4 per cent. were built of wood.

British and Irish shipyards in 1897 turned out 45 war vessels, 545 steamers, and 45 sailing vessels:—

| Owners          | Tons    | Owners         | Tons      |
|-----------------|---------|----------------|-----------|
| British . . . . | 848,000 | Dutch . . . .  | 19,000    |
| Japanese . . .  | 60,000  | Russian . . .  | 16,000    |
| German . . . .  | 30,000  | French . . . . | 14,000    |
| Colonial . . .  | 23,000  | Spanish . . .  | 13,000    |
| Scandinavian .  | 27,000  | Total . . . .  | 1,050,000 |

Vessels built in our dockyards for foreign owners usually form 20 or 25 per cent. of the total.

The increase of shipping in 1897 in the world was:—

|               | Steam Tons | Sail Tons | Total     | Carrying Power |
|---------------|------------|-----------|-----------|----------------|
| Built . . . . | 1,373,000  | 197,000   | 1,570,000 | 5,690,000      |
| Lost, &c. . . | 316,000    | 396,000   | 712,000   | 1,660,000      |

This shows an increase of 860,000 tons nominal, but of 4,030,000 tons of carrying power, equal to 6½ per cent. of the carrying power of the world's shipping in 1896.

The largest merchant steamers under the British, German, and French flags are:—

| Steamer          | Feet Long | Tons   | Horse-power | Speed Knots |
|------------------|-----------|--------|-------------|-------------|
| Oceanic . . . .  | 705       | 17,000 | 45,000      | ...         |
| Kaiser Wilhelm . | 645       | 14,000 | 30,000      | 25          |
| Touraine . . . . | ...       | 9,000  | 12,000      | 22          |

The *Oceanic*, launched at Belfast in January 1899, is the largest vessel ever built.

The quickest trips by steamers in 1897 were:—

| Steamer          | Route                   | Days | Hrs. |
|------------------|-------------------------|------|------|
| Lucania . . . .  | Liverpool to New York . | 5    | 7    |
| Paris . . . .    | " " " " . . . .         | 5    | 13   |
| Kaiser Wilhelm . | Southampton " " . .     | 5    | 23   |
| Lucania . . . .  | New York to Liverpool . | 5    | 9    |
| Kaiser Wilhelm . | " Southampton " " . .   | 5    | 15   |
| Scot . . . .     | Southampton to Cape .   | 16   | 0    |
| Dunottar . . . . | " " " " " " . .         | 15   | 20   |
| Norman . . . .   | Cape to Southampton .   | 15   | 6    |
| Dunottar . . . . | " " " " " " . .         | 14   | 23   |

The *Lucania* and *Kaiser Wilhelm* averaged 22 knots an hour, the *City of Paris* 20, the *Dunottar* and *Norman* 17. The increased size and speed of vessels is shown thus:—

| Year         | Steamer        | Horse Power | Knots per Hr. |
|--------------|----------------|-------------|---------------|
| 1850 . . . . | Asia . . . .   | 1,500       | 11            |
| 1856 . . . . | Persia . . . . | 3,600       | 13            |
| 1879 . . . . | Gallia . . . . | 5,000       | 15            |
| 1883 . . . . | Alaska . . . . | 10,500      | 18            |
| 1889 . . . . | Paris . . . .  | 17,300      | 20            |
| 1893 . . . . | Campania . .   | 30,000      | 21            |

In 1898 the *Britannic* had completed 500 ocean voyages in 23 years, in all 1,750,000 miles, carrying 222,000 passengers, and consuming 510,000 tons of coal in 114,000 hours of steaming, being 4½ tons per hour.

## PORT ENTRIES

The tonnage of shipping from the high seas entered into the ports of various countries was :—

| In                      | 1885        | 1895        | Increase   |
|-------------------------|-------------|-------------|------------|
| United Kingdom          | 31,860,000  | 40,000,000  | 8,140,000  |
| France . . . .          | 12,790,000  | 13,780,000  | 990,000    |
| Germany . . . .         | 8,260,000   | 11,920,000  | 3,660,000  |
| Russia . . . .          | 5,400,000   | 8,100,000   | 2,700,000  |
| Austria . . . .         | 5,940,000   | 9,490,000   | 3,550,000  |
| Italy . . . .           | 5,900,000   | 8,260,000   | 2,360,000  |
| Spain . . . .           | 7,470,000   | 13,000,000  | 5,530,000  |
| Portugal . . . .        | 3,550,000   | 5,950,000   | 2,400,000  |
| Scandinavia . . . .     | 10,000,000  | 12,950,000  | 2,950,000  |
| Holland . . . .         | 4,140,000   | 6,770,000   | 2,630,000  |
| Belgium . . . .         | 4,070,000   | 6,860,000   | 2,790,000  |
| Europe . . . .          | 99,380,000  | 137,080,000 | 37,700,000 |
| United States . . . .   | 12,290,000  | 16,730,000  | 4,440,000  |
| Canada . . . .          | 8,240,000   | 11,760,000  | 3,520,000  |
| Australia . . . .       | 12,570,000  | 18,170,000  | 5,600,000  |
| West Indies . . . .     | 6,300,000   | 8,670,000   | 2,370,000  |
| East Indies . . . .     | 26,100,000  | 37,200,000  | 11,100,000 |
| China and Japan . . . . | 3,060,000   | 7,160,000   | 4,100,000  |
| Africa . . . .          | 3,800,000   | 8,400,000   | 4,600,000  |
| South America . . . .   | 7,860,000   | 12,130,000  | 4,270,000  |
| The World . . . .       | 179,600,000 | 257,300,000 | 77,700,000 |

Port entries in 1895, distinguished between native and foreign flags, were as follows :—

| In                    | Native     | Foreign    | Total       |
|-----------------------|------------|------------|-------------|
| United Kingdom        | 29,200,000 | 10,800,000 | 40,000,000  |
| France . . . .        | 4,110,000  | 9,670,000  | 13,780,000  |
| Germany . . . .       | 5,010,000  | 6,910,000  | 11,920,000  |
| Russia . . . .        | 610,000    | 7,490,000  | 8,100,000   |
| Austria . . . .       | 8,440,000  | 1,050,000  | 9,490,000   |
| Italy . . . .         | 1,990,000  | 6,270,000  | 8,260,000   |
| Spain . . . .         | 6,200,000  | 6,800,000  | 13,000,000  |
| Portugal . . . .      | 450,000    | 5,460,000  | 5,950,000   |
| Scandinavia . . . .   | 6,070,000  | 6,880,000  | 12,950,000  |
| Holland . . . .       | 1,810,000  | 4,960,000  | 6,770,000   |
| Belgium . . . .       | 1,300,000  | 5,560,000  | 6,860,000   |
| Europe . . . .        | 65,230,000 | 71,850,000 | 137,080,000 |
| United States . . . . | 3,680,000  | 13,050,000 | 16,730,000  |
| Total . . . .         | 68,910,000 | 84,900,000 | 153,810,000 |

The percentage of native and foreign flags in port entries was as follows :—

| In                    | 1885   |         | 1895   |         |
|-----------------------|--------|---------|--------|---------|
|                       | Native | Foreign | Native | Foreign |
| United Kingdom        | 72     | 28      | 73     | 27      |
| France . . . .        | 35     | 65      | 30     | 70      |
| Germany . . . .       | 42     | 58      | 42     | 58      |
| Russia . . . .        | 8      | 92      | 8      | 92      |
| Italy . . . .         | 25     | 75      | 24     | 76      |
| Spain . . . .         | 38     | 62      | 48     | 52      |
| Portugal . . . .      | 6      | 94      | 8      | 92      |
| Scandinavia . . . .   | 48     | 52      | 47     | 53      |
| Holland . . . .       | 31     | 69      | 27     | 73      |
| Belgium . . . .       | 16     | 84      | 19     | 81      |
| Continent . . . .     | 29     | 71      | 29     | 71      |
| United States . . . . | 22     | 78      | 22     | 78      |

The proportion of trade done by the flag of the country has fallen considerably in France and Holland, while it has risen in Spain and Belgium, other countries showing but little change, and the ratio for the European continent collectively being the same now as in 1885, while

the same is true of the United States. The increase of trade, as measured by port entries, has been much greater than that of tonnage of vessels afloat, viz :—

|                      | 1885        | 1895        | Increase    |
|----------------------|-------------|-------------|-------------|
| Vessels afloat, tons | 21,100,000  | 23,700,000  | 8 per cent. |
| Port entries, ..     | 180,000,000 | 257,000,000 | 43 .. ..    |

In 1885 each vessel made 9 voyages, in 1895 it made 11, which is explained by the substitution of steamers for sailing vessels, as appears when we compare carrying power, viz :—

| Years        | Tons       |
|--------------|------------|
| 1885 . . . . | 44,500,000 |
| 1895 . . . . | 62,400,000 |

The increase of carrying power in ten years was 40 per cent., which is nearly the same as the increase of port entries shown above.

## UNITED KINGDOM

Port entries from the high seas and coastwise (the latter with cargoes only) were :—

|              | Millions of Tons |           |       |
|--------------|------------------|-----------|-------|
|              | High Seas        | Coastwise | Total |
| 1870 . . . . | 18               | 18        | 36    |
| 1880 . . . . | 29               | 26        | 55    |
| 1890 . . . . | 37               | 29        | 66    |
| 1896 . . . . | 42               | 32        | 74    |

From this it appears that in 26 years the entries from the high seas rose 133 per cent., and coasting trade nearly 80 per cent., the whole trade of our ports having more than doubled.

Port entries for the United Kingdom in 1896 compare with 1886 thus :—

| Flag             | Tons       |            |            |
|------------------|------------|------------|------------|
|                  | 1886       | 1896       | Increase   |
| British . . . .  | 22,740,000 | 30,290,000 | 7,550,000  |
| Foreign . . . .  | 8,300,000  | 12,190,000 | 3,890,000  |
| Coasting . . . . | 27,140,000 | 31,980,000 | 4,840,000  |
| Total . . . .    | 58,180,000 | 74,460,000 | 16,280,000 |

Tonnage of entries into British and Irish ports rose 20 per cent. in 10 years, the ratio of increase with foreign vessels being 47 per cent., with British 25 per cent. Entries from the high seas, exclusive of coasting trade, were as follows :—

|                     | 1886       | 1896       | Increase   |
|---------------------|------------|------------|------------|
| London . . . .      | 6,810,000  | 8,990,000  | 2,180,000  |
| Liverpool . . . .   | 5,020,000  | 5,640,000  | 620,000    |
| Cardiff . . . .     | 2,390,000  | 3,960,000  | 1,570,000  |
| Hull . . . .        | 1,670,000  | 2,260,000  | 590,000    |
| Shields . . . .     | 890,000    | 1,790,000  | 900,000    |
| Newcastle . . . .   | 1,870,000  | 1,720,000  | ...        |
| Southampton . . . . | 840,000    | 1,560,000  | 720,000    |
| Glasgow . . . .     | 910,000    | 1,290,000  | 380,000    |
| Middlesbro' . . . . | 560,000    | 1,010,000  | 450,000    |
| Various . . . .     | 10,080,000 | 14,260,000 | 4,180,000  |
| Total . . . .       | 31,040,000 | 42,480,000 | 11,440,000 |

Clearances from British ports, excluding coast trade, were as follows:—

| Date | British    | Foreign    | Total Tons |
|------|------------|------------|------------|
| 1773 | 770,000    | 55,000     | 825,000    |
| 1803 | 1,440,000  | 570,000    | 2,010,000  |
| 1853 | 5,210,000  | 4,240,000  | 9,450,000  |
| 1873 | 15,110,000 | 7,470,000  | 22,580,000 |
| 1896 | 31,200,000 | 11,800,000 | 43,000,000 |

British vessels constituted 55 per cent. in 1853, and 72 per cent. in 1896, of the total.

## UNITED STATES

Tonnage entries in American ports were as follows:—

| Year       | American  | British    | Various   | Total      |
|------------|-----------|------------|-----------|------------|
| 1870 . . . | 2,450,000 | 2,790,000  | 1,030,000 | 6,270,000  |
| 1880 . . . | 3,140,000 | 7,930,000  | 4,180,000 | 15,250,000 |
| 1890 . . . | 3,400,000 | 8,110,000  | 3,850,000 | 15,360,000 |
| 1897 . . . | 3,610,000 | 11,290,000 | 5,100,000 | 20,000,000 |

The proportions of American trade done by American and foreign flags were:—

| Flag           | 1870  | 1880  | 1890  | 1897  |
|----------------|-------|-------|-------|-------|
| British . . .  | 44.4  | 52.0  | 53.0  | 56.5  |
| American . . . | 39.0  | 20.6  | 22.2  | 18.0  |
| Various . . .  | 16.6  | 27.4  | 24.8  | 25.5  |
| Total . . .    | 100.0 | 100.0 | 100.0 | 100.0 |

The relative decline of the share corresponding to the American flag is very remarkable, while the British stands for more than half the total. The growth of the principal ports in the last ten years is shown thus:—

|                     | 1887       | 1897       | Increase  |
|---------------------|------------|------------|-----------|
| New York . . .      | 6,090,000  | 7,270,000  | 1,180,000 |
| Boston . . .        | 1,080,000  | 1,640,000  | 560,000   |
| Philadelphia . . .  | 1,290,000  | 1,530,000  | 240,000   |
| New Orleans . . .   | 720,000    | 1,400,000  | 680,000   |
| San Francisco . . . | 970,000    | 1,260,000  | 290,000   |
| Baltimore . . .     | 690,000    | 1,250,000  | 560,000   |
| Other Ports . . .   | 2,690,000  | 5,650,000  | 2,960,000 |
| Union . . .         | 13,530,000 | 20,000,000 | 6,470,000 |

Entries from the various countries were as follows:—

| From                   | 1887       | 1897       | Increase  |
|------------------------|------------|------------|-----------|
| Great Britain . . .    | 4,050,000  | 6,530,000  | 2,480,000 |
| British Colonies . . . | 2,230,000  | 3,330,000  | 1,100,000 |
| Germany . . .          | 1,060,000  | 1,670,000  | 610,000   |
| Cuba . . .             | 1,020,000  | 1,040,000  | 20,000    |
| Brazil . . .           | 400,000    | 910,000    | 510,000   |
| Belgium . . .          | 480,000    | 660,000    | 180,000   |
| Italy . . .            | 440,000    | 510,000    | 70,000    |
| France . . .           | 590,000    | 490,000    | ...       |
| Various . . .          | 3,260,000  | 4,860,000  | 1,600,000 |
| Total . . .            | 13,530,000 | 20,000,000 | 6,470,000 |

## SHIPWRECKS

The tonnage of vessels and number of lives lost by shipwreck or disaster to vessels of the United Kingdom showed yearly averages thus:—

| Years                 | Tons    | Lives |
|-----------------------|---------|-------|
| 1881-83 . . .         | 273,000 | 2,600 |
| 1884-86 . . .         | 220,000 | 1,470 |
| 1887-89 . . .         | 187,000 | 1,620 |
| 1890-92 . . .         | 197,000 | 1,600 |
| 1893-95 . . .         | 180,000 | 1,890 |
| General average . . . | 212,000 | 1,836 |

The loss of life in the last six years has been 15 per cent. less than in the years 1881-86, that of tonnage 23 per cent. less, although the merchant shipping of the United Kingdom has grown much in the interval.

## SICKNESS

According to a report published at the Turin Exhibition in 1898, the ratios of sick and invalided men, as also the death-rate, in the principal armies and navies were as follows during twelve months:—

|                | Per 1000 Men on Rolls |           |      |       |           |      |
|----------------|-----------------------|-----------|------|-------|-----------|------|
|                | Army                  |           |      | Navy  |           |      |
|                | Sick                  | Invalided | Died | Sick  | Invalided | Died |
| British . . .  | 922                   | 30.4      | 8.5  | 1,056 | 37.5      | 9.9  |
| French . . .   | 596                   | 16.9      | 9.0  | 1,050 | ...       | 9.9  |
| German . . .   | 825                   | 28.0      | 6.5  | 1,010 | 28.5      | 5.2  |
| Russian . . .  | 857                   | 10.0      | 8.2  | 1,076 | 9.0       | 11.7 |
| Austrian . . . | 1,130                 | 16.5      | 10.4 | 1,100 | 24.5      | 10.2 |
| Italian . . .  | 902                   | 15.8      | 9.2  | 525   | 7.2       | 7.2  |
| Average . . .  | 872                   | 19.6      | 8.6  | 970   | 21.4      | 9.0  |

This shows that, as a rule, 87 per cent. of soldiers and 97 per cent. of sailors are inscribed yearly on sick-list; but, of course, this includes repetitions, where one man may be entered two or three times. About 2 per cent. of soldiers and sailors are invalided yearly. Death-rate is less than 1 per cent. in all but the Austrian armies, and in all navies except Russian and Austrian.

In 1892 Bertillon compiled tables of sickness among certain Mutual Aid Societies, including the labours of Bodio, Hubbard, Neison, Ratcliffe, Finlayson, Ansell, Oliphant, Behm, &c., viz.:—

| Age            | Number of Days of Sickness Yearly for Men |          |        |         |       |         |
|----------------|-------------------------------------------|----------|--------|---------|-------|---------|
|                | England                                   | Scotland | France | Germany | Italy | Average |
| 20-25 . . .    | 5.7                                       | 4.0      | 3.1    | 5.8     | 5.0   | 4.7     |
| 25-30 . . .    | 6.0                                       | 4.2      | 3.4    | 5.1     | 5.4   | 4.8     |
| 30-35 . . .    | 6.8                                       | 4.6      | 3.4    | 5.6     | 5.1   | 5.1     |
| 35-40 . . .    | 8.1                                       | 5.0      | 4.3    | 6.3     | 6.0   | 6.0     |
| 40-45 . . .    | 9.6                                       | 6.0      | 5.3    | 7.8     | 6.2   | 7.0     |
| 45-50 . . .    | 12.0                                      | 8.3      | 5.9    | 7.7     | 6.8   | 8.1     |
| 50-55 . . .    | 15.9                                      | 11.4     | 8.0    | 8.5     | 7.9   | 10.3    |
| 55-60 . . .    | 22.5                                      | 14.9     | 8.4    | 16.3    | 9.2   | 14.3    |
| 60-65 . . .    | 32.1                                      | 23.0     | 11.2   | 12.5    | 11.2  | 18.0    |
| 65-70 . . .    | 55.8                                      | 55.6     | 16.7   | 18.9    | 13.4  | 32.1    |
| All ages . . . | 9.5                                       | ...      | 7.8    | ...     | 6.6   | 8.0     |

Bertillon's tables of sickness among operatives at Angers for thirty years down to 1894 show the proportions as regards age thus :—

| Age           | Cases   |         | Days Sick, Ratio |         | No. of Days |
|---------------|---------|---------|------------------|---------|-------------|
|               | 1864-79 | 1880-94 | 1864-79          | 1880-94 | 1880-94     |
| 17-24 . . .   | 122     | 30      | 167              | 42      | 5.2         |
| 25-34 . . .   | 393     | 330     | 305              | 278     | 3.6         |
| 35-44 . . .   | 383     | 365     | 390              | 320     | 4.2         |
| Over 44 . . . | 102     | 275     | 138              | 360     | 9.4         |
| Total . . .   | 1,000   | 1,000   | 1,000            | 1,000   | 4.4         |

Sickness prevails more among female than male operatives, viz. —

| Age           | Days of Sickness to each Person Yearly |        |       |        |
|---------------|----------------------------------------|--------|-------|--------|
|               | France                                 |        | Italy |        |
|               | Male                                   | Female | Male  | Female |
| 20-30 . . .   | 3.2                                    | 6.9    | 5.2   | 7.9    |
| 30-40 . . .   | 3.8                                    | 7.6    | 5.5   | 8.3    |
| 40-50 . . .   | 5.6                                    | 7.9    | 6.5   | 8.8    |
| 50-60 . . .   | 8.2                                    | 10.3   | 8.6   | 9.5    |
| 60-70 . . .   | 13.9                                   | 16.5   | 11.8  | 9.1    |
| General . . . | 7.8                                    | 9.4    | 6.6   | 8.5    |

In 1895 the Friendly Societies of France, comprising 1,584,000 members, published returns of sickness for ten years to December 1894, showing the averages as follows :—

|                       | Sick Days Yearly on No. of Hands | Days to Each Sick Person |
|-----------------------|----------------------------------|--------------------------|
| Men . . . . .         | 5.1                              | 17.3                     |
| Women . . . . .       | 3.8                              | 12.5                     |
| General average . . . | 5.0                              | 16.6                     |

Death-rate for all collectively averaged 16.4 per thousand yearly.

Sutton's report for Friendly Societies (England, 1896) is as follows :—

| Period        | Men, Yearly Average |            |           |
|---------------|---------------------|------------|-----------|
|               | Number              | Days Sick  | Per Man   |
| 1856-60 . . . | 722,000             | 8,160,000  | 11.3      |
| 1861-70 . . . | 1,790,000           | 22,400,000 | 12.4      |
| 1876-80 . . . | 1,663,000           | 22,030,000 | 13.2      |
| Period        | Women               |            |           |
|               | Number              | Days Sick  | Per Woman |
| 1856-75 . . . | 139,000             | 2,280,000  | 16.4      |

The following table shows death-rate per thousand yearly, and also average days of sickness in the year, to each worker according to age :—

| Age          | Death-rate | Sick Days |
|--------------|------------|-----------|
| 40 . . . . . | 10.7       | 9.6       |
| 60 . . . . . | 34.0       | 30.2      |
| 70 . . . . . | 72.3       | 85.7      |

The above shows that each worker of 40 lost 9½ days through sickness, and a worker of 60 lost 30 days: the

mean for all persons from 15 to 65 is supposed to be 13 days of sickness yearly.

In 1897 the sickness of the British navy averaged 2,838 men daily, or 4 per cent. of the force. Days of sickness during the year were 1,040,000, or 14 days to each man. The number invalided was 1987, or 27 per thousand.

Bodio's table as regards Italy (1881-85) is as follows :—

|                     | Days of Sickness Yearly According to Age |       |       |
|---------------------|------------------------------------------|-------|-------|
|                     | 15-30                                    | 30-45 | 45-60 |
| Booksellers . . .   | 3.2                                      | 4.0   | 4.5   |
| Clergy . . . . .    | 2.9                                      | 3.6   | 5.0   |
| Tailors . . . . .   | 3.1                                      | 4.1   | 7.0   |
| Butchers . . . . .  | 3.6                                      | 4.9   | 7.3   |
| Shoemakers . . .    | 5.7                                      | 5.6   | 7.4   |
| Carpenters . . .    | 5.6                                      | 5.8   | 8.0   |
| Painters . . . . .  | 8.1                                      | 5.5   | 8.0   |
| Bakers . . . . .    | 5.3                                      | 6.3   | 8.1   |
| Blacksmiths . . .   | 6.1                                      | 6.2   | 8.2   |
| Gardeners . . . .   | 5.9                                      | 6.1   | 8.3   |
| Servants . . . . .  | 5.1                                      | 5.6   | 8.5   |
| Cab-drivers . . .   | 4.0                                      | 6.1   | 8.6   |
| Chimney-sweepers .  | 6.6                                      | 7.8   | 8.7   |
| Masons . . . . .    | 4.8                                      | 6.2   | 8.9   |
| Millers . . . . .   | 4.1                                      | 4.5   | 9.2   |
| Street porters . .  | 6.9                                      | 9.4   | 9.3   |
| General average . . | 5.1                                      | 5.8   | 7.8   |

## SILK

China and Japan produce about 28 million pounds, say 12,500 tons, yearly, but no less than 60 per cent. is retained for native manufacture, and hence it is usual in estimating the world's crop to count in the case of China and Japan only the surplus available for exportation. An estimate of silk production published in 1890 was as follows :—

| Year           | Crop, Tons |                   | Crop of 1890 Tons |
|----------------|------------|-------------------|-------------------|
| 1886 . . . . . | 11,554     | China . . . . .   | 3,963             |
| 1887 . . . . . | 11,888     | Japan . . . . .   | 2,018             |
| 1888 . . . . . | 11,588     | Italy . . . . .   | 3,443             |
| 1889 . . . . . | 11,382     | Various . . . . . | 2,016             |
| 1890 . . . . . | 11,440     | Total . . . . .   | 11,440            |

An ounce of eggs produced 39,000 silkworms, which consume yearly one ton of mulberry leaves, and give 132 pounds of cocoons or 13 pounds of silk, worth £8 sterling.

The countries which export silk manufactures are as follows :—

|                   | Tons   |        | Value, £   |            |
|-------------------|--------|--------|------------|------------|
|                   | 1885   | 1895   | 1885       | 1895       |
| France . . . . .  | 6,000  | 7,000  | 8,900,000  | 10,800,000 |
| Germany . . . . . | 4,900  | 4,900  | 7,400,000  | 6,400,000  |
| Switzerland . . . | 2,800  | 3,350  | 4,400,000  | 5,300,000  |
| Italy . . . . .   | 200    | 450    | 600,000    | 1,200,000  |
| Total . . . . .   | 13,900 | 15,700 | 21,300,000 | 23,700,000 |

The production and consumption of silk manufactures in various countries is:—

|                          | Output<br>Millions £ | Consumption |                       |
|--------------------------|----------------------|-------------|-----------------------|
|                          |                      | Millions £  | Shillings<br>per Head |
| United Kingdom . . . . . | 6.0                  | 19.0        | 10.0                  |
| France . . . . .         | 28.2                 | 20.0        | 10.5                  |
| Germany . . . . .        | 16.5                 | 10.2        | 4.0                   |
| Switzerland . . . . .    | 6.4                  | 1.3         | 8.5                   |
| Italy . . . . .          | 4.2                  | 3.0         | 2.0                   |
| Austria . . . . .        | 4.5                  | 4.0         | 2.0                   |
| Russia, &c. . . . .      | 5.2                  | 7.5         | 1.0                   |
| Europe . . . . .         | 71.0                 | 65.0        | 3.5                   |
| United States . . . . .  | 19.0                 | 23.0        | 6.5                   |
| Total . . . . .          | 90.0                 | 88.0        | 4.0                   |

For further details see Part I., page 536.  
Silk manufacture has declined in Great Britain since 1870, viz:—

|                | Spindles  | Power-Looms | Operatives |
|----------------|-----------|-------------|------------|
| 1870 . . . . . | 1,130,000 | 12,400      | 48,100     |
| 1890 . . . . . | 1,030,000 | 11,400      | 41,300     |

There is a fall of 9 per cent. in spindles and 14 per cent. in the number of hands.

### SLAVES

Women slaves were sold at Cairo in September 1894 at prices averaging £18 per head.

For *Slave-trade* in various countries see page 540.

### SOUND

The following instances of sound travelling great distances are recorded:—

| Cannon at          | Heard at               | Miles | Date |
|--------------------|------------------------|-------|------|
| Waterloo . . . . . | Dover . . . . .        | 180   | 1815 |
| Cepeda . . . . .   | Buenos Ayres . . . . . | 160   | 1859 |
| Spithead . . . . . | Bridgwater . . . . .   | 100   | 1897 |

Mr. Glaisher in a balloon two miles from the earth heard a musket-shot and a dog's bark, and at four miles a railway train.

### SQUATTERS

There are 19,000 in Australia, who hold 690 million acres of Crown lands at one penny per acre, and 10,800 in South Africa, who hold 60 million acres: the former are sheep-farmers, whose average run is 36,000 acres, rent £150. African squatters' runs average 5500 acres.

### STATUES

Those of Babylon were valued at £21,000,000 sterling, that of Belus being worth £3,500,000.

### STEAM

The increase of steam-power\* since 1870 has been

\* The economic value of steam-power was thus set forth by the *Quarterly Review* in 1826: "Steam-power now enables a man to do as much work as 120 could fifty years ago. One bushel of coal, value threepence, will raise 20,000 gallons of water from a depth of 350 feet in a few minutes, which would take 20 men 10 hours to raise with a pump, at a cost of 40 shillings. Steam does for £1 what would cost £160 by hand."

more than 250 per cent., the various nations showing approximately as follows:—

|                         | Horse-Power |            |            |
|-------------------------|-------------|------------|------------|
|                         | 1870        | 1880       | 1896       |
| U. Kingdom . . . . .    | 4,040,000   | 7,600,000  | 13,700,000 |
| France . . . . .        | 1,850,000   | 3,340,000  | 5,920,000  |
| Germany . . . . .       | 2,480,000   | 5,120,000  | 8,080,000  |
| Russia . . . . .        | 920,000     | 1,740,000  | 3,100,000  |
| Austria . . . . .       | 800,000     | 1,560,000  | 2,520,000  |
| Italy . . . . .         | 330,000     | 500,000    | 1,520,000  |
| Spain . . . . .         | 210,000     | 470,000    | 1,180,000  |
| Portugal . . . . .      | 30,000      | 60,000     | 170,000    |
| Sweden . . . . .        | 100,000     | 220,000    | 510,000    |
| Norway . . . . .        | 40,000      | 90,000     | 410,000    |
| Denmark . . . . .       | 30,000      | 90,000     | 260,000    |
| Holland . . . . .       | 130,000     | 250,000    | 600,000    |
| Belgium . . . . .       | 350,000     | 610,000    | 1,180,000  |
| Switzerland . . . . .   | 140,000     | 230,000    | 580,000    |
| Roumania, &c. . . . .   | 120,000     | 320,000    | 570,000    |
| Europe . . . . .        | 11,570,000  | 22,200,000 | 40,300,000 |
| United States . . . . . | 5,590,000   | 9,110,000  | 18,060,000 |
| Colonies, &c. . . . .   | 1,300,000   | 3,040,000  | 7,740,000  |
| The World . . . . .     | 18,460,000  | 34,350,000 | 66,100,000 |

The respective shares of fixed, of railway, and of steam-boat engines were:—

|                      | 1870       | 1880       | 1896       |
|----------------------|------------|------------|------------|
| Fixed . . . . .      | 4,100,000  | 7,670,000  | 12,470,000 |
| Locomotive . . . . . | 11,740,000 | 21,440,000 | 40,420,000 |
| Steamer . . . . .    | 2,620,000  | 5,240,000  | 13,210,000 |
| Total . . . . .      | 18,460,000 | 34,350,000 | 66,100,000 |

The steam-power of war-vessels is omitted as regards all nations. It will be found at page 782.

The total in 1896 was made up approximately as follows:—

|                       | Horse-Power |            |            | Total      |
|-----------------------|-------------|------------|------------|------------|
|                       | Fixed       | Locom.     | Steamer    |            |
| U. Kingdom . . . . .  | 2,300,000   | 5,100,000  | 6,300,000  | 13,700,000 |
| France . . . . .      | 1,130,000   | 4,200,000  | 590,000    | 5,920,000  |
| Germany . . . . .     | 2,400,000   | 4,800,000  | 880,000    | 8,080,000  |
| Russia . . . . .      | 430,000     | 2,440,000  | 230,000    | 3,100,000  |
| Austria . . . . .     | 480,000     | 1,890,000  | 150,000    | 2,520,000  |
| Italy . . . . .       | 180,000     | 1,100,000  | 240,000    | 1,520,000  |
| Spain . . . . .       | 50,000      | 600,000    | 530,000    | 1,180,000  |
| Portugal . . . . .    | 10,000      | 120,000    | 40,000     | 170,000    |
| Sweden . . . . .      | 30,000      | 300,000    | 180,000    | 510,000    |
| Norway . . . . .      | 10,000      | 80,000     | 320,000    | 410,000    |
| Denmark . . . . .     | 10,000      | 100,000    | 150,000    | 260,000    |
| Holland . . . . .     | 80,000      | 330,000    | 190,000    | 600,000    |
| Belgium . . . . .     | 390,000     | 700,000    | 90,000     | 1,180,000  |
| Switzerland . . . . . | 90,000      | 480,000    | 10,000     | 580,000    |
| Roumania, &c. . . . . | 20,000      | 400,000    | 150,000    | 570,000    |
| Europe . . . . .      | 7,610,000   | 22,640,000 | 10,050,000 | 40,300,000 |
| U. States . . . . .   | 3,940,000   | 11,760,000 | 2,360,000  | 18,060,000 |
| Canada . . . . .      | 320,000     | 820,000    | 250,000    | 1,390,000  |

| Various . . . . .     | 340,000     | 4,800,000  | 370,000    | 5,510,000  |
| The World . . . . .   | 12,470,000  | 40,420,000 | 13,210,000 | 66,100,000 |

See *Steam*, page 545.

## STREETS

The annual sum spent on maintenance and cleaning of streets in European cities is as follows :—

|              | Sum<br>£ | Pence<br>per<br>Sq. Yd. |              | Sum<br>£ | Pence<br>per<br>Sq. Yd. |
|--------------|----------|-------------------------|--------------|----------|-------------------------|
| Paris . . .  | 800,000  | 9.2                     | Dresden . .  | 48,000   | 2.0                     |
| Berlin . . . | 123,000  | 1.7                     | Buda-Pesth . | 46,000   | 1.6                     |
| Rome . . .   | 60,000   | 3.4                     | Naples . . . | 46,000   | 4.8                     |
| Vienna . . . | 85,000   | 2.2                     | Brussels . . | 24,000   | 1.1                     |
| Hamburg . .  | 86,000   | 2.2                     | Milan . . .  | 30,000   | 3.4                     |

The mean expenditure for the ten cities was about 3½ pence (3.6) per square yard. Some of them, however, include only cleaning and watering expenses.

The street area, compared with population, is as follows :—

|               | Sq. Yds.<br>(000 omitted) | Sq. Yds.<br>per Inhab. |               | Sq. Yds.<br>(000 omitted) | Sq. Yds.<br>per Inhab. |
|---------------|---------------------------|------------------------|---------------|---------------------------|------------------------|
| London . . .  | 52,000                    | 12.0                   | Brussels . .  | 5,200                     | 10.0                   |
| Paris . . .   | 20,300                    | 8.0                    | Breslau . . . | 5,900                     | 16.0                   |
| Berlin . . .  | 17,300                    | 10.5                   | Rome . . .    | 4,200                     | 9.2                    |
| Vienna . . .  | 9,300                     | 7.0                    | Naples . . .  | 2,300                     | 4.4                    |
| Hamburg . .   | 9,500                     | 15.0                   | Milan . . .   | 2,200                     | 5.0                    |
| Dresden . .   | 5,800                     | 17.5                   | Genoa . . .   | 900                       | 4.0                    |
| Leipzig . . . | 3,000                     | 7.5                    | Florence . .  | 2,000                     | 10.0                   |
| Bordeaux . .  | 3,500                     | 13.5                   | Turin . . .   | 3,000                     | 8.6                    |

The above sixteen cities give an average of 10 yards of street per inhabitant. Paris has 4600 acres under streets and squares, or one-fourth of its area.

## STRIKES

## UNITED KINGDOM

The number of days lost in strikes and lock-outs has been :—

| Year       | No. of Days | Year        | No. of Days |
|------------|-------------|-------------|-------------|
| 1893 . . . | 30,800,000  | 1896 . . .  | 3,700,000   |
| 1894 . . . | 9,100,000   | 1897 . . .  | 10,400,000  |
| 1895 . . . | 5,500,000   | Average . . | 11,900,000  |

Thus the average for five years is the same as 119,000 men idle for 100 days. From 1890 to 1895 the number of strikes yearly averaged 878, with 392,000 hands on strike.

In 1897 there were 864 strikes in the United Kingdom, by 230,000 operatives, viz. :—

| Cause           | Numbers               |
|-----------------|-----------------------|
| Wages . . .     | 106,300               |
| Shorter hours . | 52,800                |
| Various . . .   | 71,900                |
| Total . . .     | 230,300               |
|                 | Men . . . 189,800     |
|                 | Women . . . 24,400    |
|                 | Children . . . 10,100 |
| Total . . .     | 230,300               |

The loss of labour amounted to 10,000,000 days, averaging 43 days per striker; whereas in 1893 the loss was 31,200,000 days, by 690,000 strikers, an average of 45 days each. The engineers' strike in 1897-98, by 47,500 men, caused a loss of 6,850,000 days, an average of 144 days each.

## UNITED STATES

In fourteen years, ending 1894, there were 14,390 strikes, involving 3,714,000 operatives, and causing a loss of £59,300,000 sterling. In 44 per cent. of strikes the operatives succeeded, at a loss of £39,500,000: the masters' loss was £19,800,000. The loss to each workman on strike averaged £10, 5s.: each strike cost £1,400 to masters.

In an interval of seven and a half years, ending June 1894, the aggregate of strikes and lock-outs in four principal cities was as follows :—

|                | Hands (000 omitted) |           |       | Loss, £ (000 omitted) |         |        |
|----------------|---------------------|-----------|-------|-----------------------|---------|--------|
|                | Strikes             | Lock-outs | Total | To Hands              | Masters | Total  |
| N. York . . .  | 248                 | 22        | 270   | 1,840                 | 910     | 2,750  |
| Chicago . . .  | 283                 | 49        | 332   | 3,080                 | 3,580   | 6,660  |
| Pittsburg . .  | 101                 | 12        | 113   | 2,810                 | 720     | 3,530  |
| Philadelphia . | 60                  | 9         | 69    | 560                   | 300     | 860    |
| 4 Cities . . . | 692                 | 92        | 784   | 8,290                 | 5,510   | 13,800 |

The annual average for the four cities collectively was 104,000 hands on strike, and a loss of £1,840,000 sterling.

## FRANCE

The number of strikes and of operatives engaged in them were :—

| Year       | Strikes | Hands   | Average |
|------------|---------|---------|---------|
| 1874 . . . | 22      | 2,730   | 124     |
| 1884 . . . | 91      | 23,700  | 260     |
| 1890 . . . | 313     | 118,900 | 380     |
| 1893 . . . | 634     | 170,100 | 270     |
| 1894 . . . | 391     | 54,600  | 140     |

The strikes of 1893 showed as follows :—

| At            | Number | Days Lost |
|---------------|--------|-----------|
| Mines . . .   | 22     | 1,510,000 |
| Factories . . | 612    | 1,664,000 |
| Total . . .   | 634    | 3,174,000 |

Each hand on strike (170,000) lost 18 days of work. The workmen gained their purpose in 57 per cent. of the strikes.

## AUSTRIA

Dr. Juraschek's tables contain the following :—

| Year       | Strikes | Hands  | Days lost |
|------------|---------|--------|-----------|
| 1891 . . . | 104     | 14,030 | 247,000   |
| 1894 . . . | 159     | 44,080 | 566,000   |

The average for four years was 134 strikes, with 25,000 hands on strike, and a loss of 370,000 days, equal to 15 days per hand.

## ITALY

Official returns are as follows :—

| Years        | Annual Average |        | 1896                 |
|--------------|----------------|--------|----------------------|
|              | Strikes        | Men    | Men                  |
| 1881-85. . . | 67             | 17,100 | Hatters . . 41,600   |
| 1886-90. . . | 104            | 26,400 | Miners . . . 31,000  |
| 1891-95. . . | 124            | 28,600 | Various . . . 23,500 |
| 1896. . .    | 210            | 96,100 | Total . . . 96,100   |

The loss of days was as follows :—

| <i>Annual Average</i> |         |                 |           |
|-----------------------|---------|-----------------|-----------|
| 1881-85 . . . .       | 124,000 | 1891-95 . . . . | 230,000   |
| 1886-90 . . . .       | 170,000 | 1896 . . . . .  | 1,150,000 |

See *Trade Unions*, p. 570.

### SUBSIDIES

Annual subsidies are given yearly in various countries for agriculture and technical schools, viz. :—

|                 | Agricul.<br>£ | Technical<br>£ | Total<br>£ | Pence<br>per<br>Inhab. |
|-----------------|---------------|----------------|------------|------------------------|
| France . . . .  | 1,870,000     | 1,070,000      | 2,940,000  | 19                     |
| Prussia . . . . | 680,000       | 560,000        | 1,240,000  | 9                      |
| Bavaria . . . . | 90,000        | 50,000         | 140,000    | 6                      |
| Wurtemberg . .  | 70,000        | 60,000         | 130,000    | 15                     |
| Denmark . . . . | 110,000       | 20,000         | 130,000    | 14                     |
| Holland . . . . | 60,000        | 50,000         | 110,000    | 6                      |
| Belgium . . . . | 110,000       | 40,000         | 150,000    | 6                      |
| Switzerland . . | 150,000       | 1,570,000      | 1,720,000  | 135                    |
| Austria . . . . | 950,000       | 600,000        | 1,550,000  | 16                     |
| Hungary . . . . | 1,700,000     | 1,800,000      | 3,500,000  | 46                     |
| Italy . . . . . | 320,000       | 280,000        | 600,000    | 5                      |
| United States . | 2,200,000     | ...            | ...        | ...                    |

### SUGAR

The world's crop of sugar has doubled since 1880, viz. :—

| Year         | Cane<br>Tons | Beet<br>Tons | Total     | Beet<br>Ratio<br>per cent. |
|--------------|--------------|--------------|-----------|----------------------------|
| 1880 . . . . | 1,860,000    | 1,810,000    | 3,670,000 | 49                         |
| 1894 . . . . | 3,200,000    | 3,790,000    | 7,050,000 | 54                         |
| 1895 . . . . | 3,140,000    | 4,690,000    | 7,830,000 | 60                         |
| 1896 . . . . | 2,560,000    | 4,330,000    | 6,890,000 | 63                         |
| 1897 . . . . | 2,430,000    | 4,780,000    | 7,210,000 | 66                         |
| 1898 . . . . | 2,850,000    | 4,650,000    | 7,500,000 | 62                         |

There are five principal countries that produce beet-sugar, viz. :—

|                  | Tons      |           |           |
|------------------|-----------|-----------|-----------|
|                  | 1876      | 1886      | 1897      |
| Germany . . . .  | 360,000   | 810,000   | 1,840,000 |
| Austria . . . .  | 200,000   | 430,000   | 930,000   |
| France . . . . . | 400,000   | 300,000   | 700,000   |
| Russia . . . . . | 160,000   | 350,000   | 700,000   |
| Belgium . . . .  | 70,000    | 70,000    | 280,000   |
| Various . . . .  | 40,000    | 80,000    | 330,000   |
| Total . . . .    | 1,230,000 | 2,040,000 | 4,780,000 |

Official returns for Germany show that a ton of roots gave the following percentage of beet-sugar at various dates :—

| Year           | Per cent. | Year           | Per cent. |
|----------------|-----------|----------------|-----------|
| 1850 . . . . . | 7.2       | 1880 . . . . . | 8.6       |
| 1860 . . . . . | 8.6       | 1890 . . . . . | 12.8      |
| 1870 . . . . . | 8.6       | 1896 . . . . . | 12.2      |

The average yield in Russia was 8 per cent. of sugar in 1885, and 11 per cent. in 1890-95. The production,

consumption, and export of beet-sugar in 1896 were estimated as follows :—

|                  | Tons       |             |           |
|------------------|------------|-------------|-----------|
|                  | Production | Consumption | Export    |
| Germany . . . .  | 1,620,000  | 720,000     | 900,000   |
| Austria . . . .  | 790,000    | 350,000     | 440,000   |
| Russia . . . . . | 780,000    | 680,000     | 100,000   |
| France . . . . . | 690,000    | 480,000     | 210,000   |
| Belgium . . . .  | 230,000    | 80,000      | 150,000   |
| Holland, &c. . . | 220,000    | 220,000     | ...       |
| Total . . . .    | 4,330,000  | 2,530,000   | 1,800,000 |

The consumption of sugar of all kinds in various countries per inhabitant is :—

|                 | <i>Pounds</i> |                  | <i>Pounds</i> |                  | <i>Pounds</i> |
|-----------------|---------------|------------------|---------------|------------------|---------------|
| U. Kingdom . 88 |               | Austria . . . 17 |               | Belgium . . . 27 |               |
| France . . . 28 |               | Russia . . . 15  |               | Canada . . . 80  |               |
| Germany . . 31  |               | Denmark . . 20   |               | U. States . . 63 |               |

Consumption has increased very notably in the United Kingdom and the United States, viz. :—

| Year         | Tons           |               | Pounds per head |               |
|--------------|----------------|---------------|-----------------|---------------|
|              | United Kingdom | United States | United Kingdom  | United States |
| 1875 . . . . | 940,000        | 880,000       | 63              | 44            |
| 1885 . . . . | 1,200,000      | 1,300,000     | 75              | 52            |
| 1895 . . . . | 1,540,000      | 1,950,000     | 88              | 63            |

The exports of sugar from the British Colonies averaged :

|                     | Tons Yearly |         |         |         |
|---------------------|-------------|---------|---------|---------|
|                     | 1881-85     | 1886-90 | 1891-94 | 1895    |
| Mauritius . . . .   | 115,000     | 120,000 | 110,000 | 115,000 |
| Guiana . . . . .    | 110,000     | 115,000 | 110,000 | 100,000 |
| W. Indian Islands . | 175,000     | 165,000 | 160,000 | 135,000 |
| Australia . . . .   | 20,000      | 40,000  | 55,000  | 75,000  |
| India, &c. . . . .  | 70,000      | 70,000  | 55,000  | 55,000  |
| Total . . . .       | 490,000     | 510,000 | 490,000 | 480,000 |

See *Sugar*, page 549.

### SUIOCIDE

Mayr's tables show an alarming increase of suicide in most countries during the last twenty years, viz. :—

|                   | Suicides Yearly per Million Inhabitants |         |         |          |
|-------------------|-----------------------------------------|---------|---------|----------|
|                   | 1871-77                                 | 1881-85 | 1886-93 | Increase |
| England . . . .   | 67                                      | 74      | 82      | 15       |
| Scotland . . . .  | 40                                      | 53      | 58      | 18       |
| Ireland . . . . . | 17                                      | 22      | 25      | 8        |
| France . . . . .  | 157                                     | 195     | 224     | 67       |
| Germany . . . .   | 143                                     | 209     | 205     | 62       |
| Russia . . . . .  | 30                                      | 31      | 29      | ...      |
| Austria . . . .   | 122                                     | 162     | 161     | 39       |
| Hungary . . . .   | ...                                     | 88      | 115     | 27       |
| Italy . . . . .   | 37                                      | 49      | 52      | 15       |
| Spain . . . . .   | 14                                      | 25      | 20      | 6        |
| Sweden . . . .    | 81                                      | 97      | 125     | 44       |
| Norway . . . .    | 73                                      | 69      | 65      | ...      |
| Denmark . . . .   | 258                                     | 249     | 256     | ...      |
| Holland . . . .   | 36                                      | 53      | 58      | 22       |
| Belgium . . . .   | 67                                      | 107     | 124     | 57       |
| Finland . . . .   | ...                                     | 39      | 43      | 4        |
| Servia . . . . .  | ...                                     | 38      | 37      | ...      |
| Switzerland . .   | 202                                     | 234     | 220     | 18       |
| Australia . . .   | 86                                      | 109     | 110     | 24       |

In all countries suicide is much more frequent among men than women, viz. :—

*Female Suicides among 100.*

|                  |                  |                        |
|------------------|------------------|------------------------|
| England . . . 26 | Italy . . . 20   | Holland . . . 16       |
| France . . . 21  | Spain . . . 29   | Belgium . . . 15       |
| Germany . . . 20 | Sweden . . . 23  | Switzerland . . . 12   |
| Russia . . . 21  | Norway . . . 24  | United States . . . 28 |
| Austria . . . 18 | Denmark . . . 23 | Average . . . 21       |

Bodio's tables for 1887-91 give the number of suicides yearly per million inhabitants for various countries as follows :—

|                   |                   |                       |
|-------------------|-------------------|-----------------------|
| England . . . 80  | Germany . . . 246 | Switzerland . . . 216 |
| Scotland . . . 56 | Prussia . . . 197 | Belgium . . . 122     |
| Ireland . . . 24  | Austria . . . 158 | Holland . . . 58      |
| France . . . 218  | Italy . . . 52    | Sweden . . . 119      |

The above rate for Germany is for urban population.

In a period of ten years down to 1897, in Prussia, 407 children (under 15 years of age) committed suicide, 331 being boys and 76 girls.

**UNITED KINGDOM**

The rates of suicide in various professions of persons aged between 25 and 65 years are :—

*Suicides Yearly of 1000 Males who Die*

|                      |                    |                         |
|----------------------|--------------------|-------------------------|
| Miner . . . 5        | Fisherman . . . 13 | Carpenter . . . 17      |
| Draper . . . 5       | Mason . . . 14     | Painter . . . 21        |
| Printer . . . 8      | Cabdriver . . . 16 | Butcher . . . 23        |
| Ploughman . . . 9    | Tailor . . . 16    | Baker . . . 26          |
| Gardener . . . 11    | Farmer . . . 17    | Publican . . . 26       |
| Blacksmith . . . 11  | Grocer . . . 17    | Com. traveller . . . 31 |
| Stonecutter . . . 11 | Shoemaker . . . 17 | Costermonger . . . 44   |

The average is 14; that is to say, of 1000 males who die between 25 and 65 years of age in England 14

commit suicide; but the rate is two or three times as heavy as regards publicans, commercial travellers, and costermongers.

**ITALY**

In the years 1894-96 the average was 1870 suicides, equal to 60 per million inhabitants. In the old kingdom of Naples the ratio is only 31, in Sicily 41, in Venetia 58, per million, whereas in Genoa it is 101, and in Rome 108. The total number of suicides in 1896 gives the following ratios :—

|                          | Males      | Females    | Total        |
|--------------------------|------------|------------|--------------|
| Single . . . . .         | 380        | 78         | 458          |
| Married . . . . .        | 325        | 95         | 420          |
| Widowed . . . . .        | 92         | 30         | 122          |
| <b>Total . . . . .</b>   | <b>797</b> | <b>203</b> | <b>1,000</b> |
| Under 20 years . . . . . | 53         | 18         | 71           |
| 20-40 . . . . .          | 313        | 87         | 400          |
| 40-60 . . . . .          | 270        | 63         | 333          |
| 60-80 . . . . .          | 152        | 31         | 183          |
| Over 80 . . . . .        | 9          | 4          | 13           |
| <b>Total . . . . .</b>   | <b>797</b> | <b>203</b> | <b>1,000</b> |

The seasons had the following ratios: spring 28, summer 31, autumn 20, and winter 21, per cent. of the total.

**UNITED STATES**

The ratios of age in suicides were :—

|                        |               |
|------------------------|---------------|
| Under 15 . . . . .     | 66            |
| 15-30 . . . . .        | 1,995         |
| 31-50 . . . . .        | 3,740         |
| 51-60 . . . . .        | 1,984         |
| Over 60 . . . . .      | 2,215         |
| <b>Total . . . . .</b> | <b>10,000</b> |

**T**

**TALLOW**

In 1897 Great Britain imported 100,000 tons, value £1,900,000.

See *Tallow*, Part I., page 550.

**TAXES**

In the section of Finances it will be seen (page 700) that 71 per cent. of the revenue of nations is raised by taxes, 14 per cent. is produced by State railways, and 15 per cent. arises from post-office, crown lands, and other public properties. Local taxation has also to be considered, and the subjoined table shows both approximately, and the ratio per head :—

|                   | National<br>£ | Local<br>£ | Total<br>£  | £ per<br>Head |
|-------------------|---------------|------------|-------------|---------------|
| U. Kingdom . . .  | 98,000,000    | 61,300,000 | 159,300,000 | 4.0           |
| France . . . . .  | 117,800,000   | 42,300,000 | 160,100,000 | 4.2           |
| Germany . . . . . | 84,500,000    | 48,000,000 | 132,500,000 | 2.5           |
| Russia . . . . .  | 98,000,000    | 16,400,000 | 114,400,000 | 1.0           |

|                         | National<br>£      | Local<br>£         | Total<br>£           | £ per<br>Head |
|-------------------------|--------------------|--------------------|----------------------|---------------|
| Austria . . . . .       | 68,000,000         | 16,500,000         | 84,500,000           | 2.0           |

| Total . .     | 169,000         | 246,000 | 151,000  | 88,000 | 66,000   | 720,000 |

In the above table Property-tax includes taxes on properties or individuals, whether in the form of income-tax, poll-tax, trade-licenses, or death-duties. See *Finances*, page 700, and *Taxes on Alcohol*, page 635.

The incidence of taxation compared with the earnings of nations gives the following result:—

|                    | Millions £ Sterling |          | Tax per Cent. |
|--------------------|---------------------|----------|---------------|
|                    | Earnings            | Taxation |               |
| United Kingdom . . | 1,421               | 159      | 11.2          |
| France . . . .     | 1,205               | 160      | 13.3          |
| Germany . . . .    | 1,285               | 133      | 10.4          |
| Russia . . . .     | 1,004               | 114      | 11.4          |
| Austria . . . .    | 707                 | 85       | 12.0          |
| Italy . . . .      | 436                 | 89       | 20.4          |
| Spain . . . .      | 277                 | 40       | 14.4          |
| Portugal . . . .   | 61                  | 13       | 21.0          |
| Sweden . . . .     | 102                 | 9        | 9.8           |
| Norway . . . .     | 40                  | 4        | 9.5           |
| Denmark . . . .    | 58                  | 5        | 8.3           |
| Holland . . . .    | 109                 | 20       | 18.0          |
| Belgium . . . .    | 169                 | 13       | 7.7           |
| Switzerland . . .  | 66                  | 6        | 9.1           |
| Roumania . . . .   | 75                  | 9        | 11.5          |
| Servia . . . .     | 28                  | 2        | 8.5           |
| Bulgaria . . . .   | 37                  | 4        | 10.4          |
| Greece . . . .     | 28                  | 4        | 14.5          |
| Europe . . . .     | 7,108               | 869      | 12.1          |
| United States . .  | 3,178               | 170      | 5.4           |
| Canada . . . .     | 186                 | 9        | 5.0           |
| Australia . . . .  | 213                 | 16       | 7.4           |
| Total . . . .      | 10,685              | 1,062    | 10.0          |

It appears from the above that 10 per cent. of the earnings of mankind are necessary for taxation, but this ratio is surpassed in most European countries, especially in Portugal and Italy, where it is over 20 per cent. The average of taxation on 455 million inhabitants of the above countries is 44 shillings per head, as compared with 125 shillings for food (see *Food*, page 715): every inhabitant of Europe, big or little, pays on an average

1½ pence daily in taxes, but the ratio in the United Kingdom is almost 3 pence daily.

It is shown by M. Yves Guyot that indirect taxation presses more heavily on the poor than on the rich, and that, nevertheless, the tendency of the age is to augment this kind of taxation. The table of M. Block for 1872 compares with later dates as follows:—

|                    | Percentage of Indirect Taxation |      |      |
|--------------------|---------------------------------|------|------|
|                    | 1872                            | 1889 | 1894 |
| United Kingdom . . | 85                              | 79   | 83   |
| France . . . .     | 75                              | 82   | 84   |
| Germany . . . .    | 66                              | 81   | 73   |
| Russia . . . .     | 80                              | 87   | 81   |
| Austria . . . .    | 54                              | 76   | 74   |
| Italy . . . .      | 49                              | 70   | 66   |
| Spain . . . .      | 56                              | 61   | 60   |
| Portugal . . . .   | 70                              | 85   | 73   |
| Sweden . . . .     | 76                              | 83   | 87   |
| Denmark . . . .    | 72                              | 80   | 82   |
| Holland . . . .    | 67                              | 73   | 70   |
| Belgium . . . .    | 69                              | 69   | 67   |

The excuse that is made by financiers for the increase of indirect taxation is that it is levied much more easily than direct. It is, nevertheless, most unequal in its incidence, because falling mostly on articles of consumption viz.:—

|                    | Ratios of Indirect Taxation |          |       |
|--------------------|-----------------------------|----------|-------|
|                    | Articles of Consum.         | Sundries | Total |
| United Kingdom . . | 68.5                        | 31.5     | 100.0 |
| France . . . .     | 61.0                        | 39.0     | 100.0 |
| Germany . . . .    | 76.3                        | 23.7     | 100.0 |
| Russia . . . .     | 68.0                        | 32.0     | 100.0 |
| Austria . . . .    | 67.5                        | 32.5     | 100.0 |
| Italy . . . .      | 62.0                        | 38.0     | 100.0 |
| Spain . . . .      | 78.0                        | 22.0     | 100.0 |
| Portugal . . . .   | 77.0                        | 23.0     | 100.0 |
| Sweden . . . .     | 78.0                        | 22.0     | 100.0 |

In order to have the burthen fairly adjusted between rich and poor, taxation should be 50 per cent. direct, 50 per cent. indirect.

#### UNITED KINGDOM

The amount of Government taxes levied in the United Kingdom, as already shown, is £98,000,000, but of this amount about 10 millions is handed over to the local authorities. The total burthen of national and local taxes stands approximately thus:—

|                  | National, £ | Local, £   | Total, £    |
|------------------|-------------|------------|-------------|
| England . . . .  | 72,000,000  | 58,500,000 | 130,500,000 |
| Scotland . . . . | 9,000,000   | 8,400,000  | 17,400,000  |
| Ireland . . . .  | 7,000,000   | 4,400,000  | 11,400,000  |
| United Kingdom   | 88,000,000  | 71,300,000 | 159,300,000 |

Comparing taxation with earnings, we find as follows:—

|                    | Millions £ Sterling |       | Ratio of Taxes |
|--------------------|---------------------|-------|----------------|
|                    | Income              | Taxes |                |
| England . . . .    | 1,144               | 130.5 | 11.4 p.c.      |
| Scotland . . . .   | 187                 | 17.4  | 9.3 "          |
| Ireland . . . .    | 90                  | 11.4  | 12.7 "         |
| United Kingdom . . | 1,421               | 159.3 | 11.2 "         |

This shows that the incidence of taxation is 36 per cent. heavier in Ireland than in Scotland, and 12 per cent. heavier than in England. If we compare taxation with wealth, the account stands thus:—

|                    | Millions £ Sterling |          | Taxes on<br>£1000<br>of Wealth |
|--------------------|---------------------|----------|--------------------------------|
|                    | Wealth              | Taxation |                                |
| England . . . .    | 10,062              | 130.5    | 26 shillings                   |
| Scotland . . . .   | 1,094               | 17.4     | 32 "                           |
| Ireland . . . .    | 650                 | 11.4     | 35 "                           |
| United Kingdom . . | 11,806              | 159.3    | 27 "                           |

According to this basis the tax incidence in Ireland is 35 per cent. more than in England, 9 per cent. more than in Scotland.

#### UNITED STATES

The total of taxes, national and local, is 170 millions sterling, equal to 5½ per cent. of the earnings of the nation, the incidence being heaviest in the south, viz.:—

|                   | Millions £ |          | Tax<br>Ratio |
|-------------------|------------|----------|--------------|
|                   | Earnings   | Taxation |              |
| New England . . . | 363        | 17       | 4.7          |
| Middle . . . .    | 976        | 45       | 4.6          |
| South . . . .     | 454        | 34       | 7.5          |
| West . . . .      | 1,385      | 74       | 5.3          |
| The Union . . . . | 3,178      | 170      | 5.4          |

#### TEA

The consumption in various countries was as follows:—

|                      | Million Lbs.<br>Yearly |         | Lbs. per<br>Inhabitant |         |
|----------------------|------------------------|---------|------------------------|---------|
|                      | 1880-84                | 1890-92 | 1880-84                | 1890-92 |
| United Kingdom . .   | 171                    | 201     | 4.7                    | 5.3     |
| United States . . .  | 71                     | 85      | 1.4                    | 1.3     |
| Russia . . . .       | 62                     | 71      | 0.7                    | 0.7     |
| Australia . . . .    | 23                     | 28      | 8.0                    | 7.0     |
| Canada . . . .       | 17                     | 20      | 3.7                    | 3.9     |
| Holland . . . .      | 5                      | 6       | 1.2                    | 1.3     |
| Germany . . . .      | 3                      | 5       | 0.7                    | 1.0     |
| Other Countries . .  | 8                      | 9       | ...                    | ...     |
| Total . . . .        | 360                    | 425     | ...                    | ...     |
| British Indian . . . | 53                     | 171     | ...                    | ...     |
| Chinese . . . .      | 307                    | 254     | ...                    | ...     |

#### TELEPHONES

The growth of telephones between 1883 and 1888 was as follows:—

|                   | Towns |       | Telephones |         |
|-------------------|-------|-------|------------|---------|
|                   | 1883  | 1888  | 1883       | 1888    |
| Europe . . . .    | 161   | 804   | 30,100     | 119,000 |
| America . . . .   | 126   | 739   | 47,200     | ...     |
| Australia . . . . | 5     | 23    | 900        | 3,300   |
| Asia, &c. . . .   | 11    | 101   | 700        | 2,000   |
| The World . . . . | 303   | 1,667 | 78,900     | ...     |

In 1895 the United States had 397,000 miles of telephones, worked by 11,000 officials, and counting 244,000

subscribers. The number in use in Europe in 1891 was as follows:—

|                |        |                |       |                 |       |
|----------------|--------|----------------|-------|-----------------|-------|
| Berlin . . . . | 15,300 | Rome . . . .   | 2,800 | Buda-Pesth . .  | 1,900 |
| Paris . . . .  | 6,200  | Leipzig . . .  | 2,100 | Breslau . . . . | 1,400 |
| Hamburg . . .  | 5,000  | Brussels . . . | 2,000 | Naples . . . .  | 1,000 |
| Vienna . . . . | 3,700  | Dresden . . .  | 2,000 | Genoa . . . .   | 1,000 |

The number in London is not known: the public generally make use of telephone stations belonging to companies, which charge threepence. In the Continental cities the annual charge for a telephone in a house ranges from £6 to £8 sterling.

#### CONTINENT

In 1895 the use of telephones was as follows:—

|                 | Towns | Miles  | Telephones | Messages    |
|-----------------|-------|--------|------------|-------------|
| France . . . .  | 415   | 26,000 | 63,400     | 75,600,000  |
| Germany . . . . | 397   | 97,000 | 184,400    | 425,000,000 |
| Italy . . . .   | 56    | ...    | 11,600     | ...         |
| Switzerland . . | 225   | 5,100  | 20,600     | 14,800,000  |

Receipts in France averaged one penny, and in Switzerland twopence, per message.

#### UNITED KINGDOM

In 1895 the National Telephone Company served the following number of towns and subscribers:—

|                    | Towns | Subscribers |
|--------------------|-------|-------------|
| England . . . .    | 537   | 57,400      |
| Scotland . . . .   | 17    | 12,700      |
| Ireland . . . .    | 5     | 3,300       |
| United Kingdom . . | 559   | 73,400      |

The number of messages conveyed was 280 millions, or about 9 millions daily (excluding Sundays) at an average cost of a halfpenny per dozen words. Average subscription, £9 a year.

#### TEMPLES

The following table shows the dimensions of the greatest Pagan temples of antiquity, and the number of persons they could hold:—

| Dedicated to    | At              | Length<br>Feet | Width<br>Feet | Capacity<br>Persons |
|-----------------|-----------------|----------------|---------------|---------------------|
| Diana . . . .   | Ephesus . . .   | 425            | 220           | 27,000              |
| Jupiter . . . . | Girgenti . . .  | 369            | 182           | 20,000              |
| Juno . . . .    | Samos . . . .   | 346            | 189           | 19,000              |
| ...             | Selinus . . . . | 330            | 160           | 16,000              |
| Apollo . . . .  | Miletus . . . . | 303            | 164           | 15,000              |
| Sun . . . .     | Baalbec . . . . | 290            | 160           | 14,000              |
| Venus . . . .   | Rome . . . .    | 350            | 116           | 12,000              |
| Jupiter . . . . | Athens . . . .  | 259            | 96            | 7,500               |
| Parthenon . . . | Athens . . . .  | 228            | 100           | 7,000               |
| Jupiter . . . . | Olympia . . .   | 230            | 95            | 7,000               |
| Neptune . . . . | Paestum . . .   | 195            | 79            | 4,600               |
| Sun . . . .     | Palmyra . . .   | 180            | 95            | 5,000               |

The temple of Diana at Ephesus could hold 1000 persons more than St. Paul's of London, and covered exactly half the superficial area of St. Peter's at Rome. The temple of Jupiter at Girgenti had the same capacity as Notre Dame at Paris, and the Madeleine in the latter city has precisely the capacity of the great temple of the Sun at Baalbec.

#### TENACITY

The tenacity of materials in pounds on square inch is:

|                 |        |                   |         |
|-----------------|--------|-------------------|---------|
| Pine . . . .    | 13,000 | Sheet copper . .  | 30,000  |
| Ash . . . .     | 17,000 | Bronze . . . .    | 36,000  |
| Oak . . . .     | 18,000 | Boiler plates . . | 50,000  |
| Cast iron . . . | 17,000 | Steel . . . .     | 100,000 |

See also Part I., page 335.

## THEATRES

The number of inhabitants to each theatre in the principal cities of Europe is as follows :—

|                      |         |                    |         |
|----------------------|---------|--------------------|---------|
| London . . . . .     | 115,000 | Dresden . . . . .  | 74,000  |
| Paris . . . . .      | 32,000  | Hamburg . . . . .  | 115,000 |
| Berlin . . . . .     | 81,000  | Bordeaux . . . . . | 84,000  |
| Vienna . . . . .     | 138,000 | Naples . . . . .   | 37,000  |
| Rome . . . . .       | 31,000  | Genoa . . . . .    | 26,000  |
| Buda-Pesth . . . . . | 86,000  | Florence . . . . . | 15,000  |

This gives an average of one theatre for 70,000 inhabitants, from which it appears that London, Vienna, and Hamburg, are ill supplied. London, in 1890, had 25 theatres, with 28,600 seats, that is, one seat for 150 inhabitants, the receipts nightly averaging £6000, that is, £1,860,000 a year, or 8 shillings per inhabitant. The receipts of the theatres in Paris were :—

| Year           | £ Sterling | Pence p. Inhab. |
|----------------|------------|-----------------|
| 1850 . . . . . | 330,000    | 80              |
| 1860 . . . . . | 580,000    | 80              |
| 1866 . . . . . | 680,000    | 95              |
| 1876 . . . . . | 860,000    | 105             |
| 1886 . . . . . | 1,000,000  | 103             |
| 1896 . . . . . | 1,200,000  | 115             |

The receipts of 1896 were as follows :—

|                    |           |                         |          |
|--------------------|-----------|-------------------------|----------|
| Opera . . . . .    | £ 130,000 | Opera Comique . . . . . | £ 60,000 |
| Français . . . . . | 80,000    | Various . . . . .       | 930,000  |

The average expenditure in Paris per inhabitant, on theatres, is 20 per cent. more than in London.

## TIN

The production of this metal has been approximately as follows :—

|                | Tons   |                | Tons   |
|----------------|--------|----------------|--------|
| 1860 . . . . . | 10,000 | 1882 . . . . . | 35,000 |
| 1870 . . . . . | 16,000 | 1892 . . . . . | 40,000 |

The production in 1882 and 1892 was as follows :—

|                         | Tons   |        |
|-------------------------|--------|--------|
|                         | 1882   | 1892   |
| Great Britain . . . . . | 9,200  | 9,000  |
| Australia . . . . .     | 14,500 | 9,000  |
| Java . . . . .          | 9,000  | 11,000 |
| Various . . . . .       | 2,300  | 11,000 |
| Total . . . . .         | 35,000 | 40,000 |

Great Britain imports 25,000 tons yearly.

## TITHES

The value of tithe rent-charge is shown thus :—

|                |         |                |        |                |        |
|----------------|---------|----------------|--------|----------------|--------|
| 1836 . . . . . | £ 100.0 | 1894 . . . . . | £ 74.2 | 1898 . . . . . | £ 68.7 |
| 1892 . . . . . | 75.9    | 1896 . . . . . | 71.5   | 1899 . . . . . | 68.1   |

Showing a fall of 10½ per cent. since 1892.

## TOBACCO

Production in 1884 and 1894 was estimated thus :—

|                     | Tons    |         |
|---------------------|---------|---------|
|                     | 1884    | 1894    |
| U. States . . . . . | 240,000 | 180,000 |
| India . . . . .     | 150,000 | 280,000 |
| Russia . . . . .    | 75,000  | 50,000  |
| Austria . . . . .   | 65,000  | 60,000  |
| Java . . . . .      | 40,000  | 28,000  |
| Brazil . . . . .    | 38,000  | 40,000  |
| Germany . . . . .   | 32,000  | 40,000  |
| France . . . . .    | 15,000  | 20,000  |
| Japan . . . . .     | 40,000  | 20,000  |
| Various . . . . .   | 69,000  | 62,000  |
| The World . . . . . | 770,000 | 780,000 |

## UNITED STATES

The crops during ten years averaged as follows :—

|                        | Million Lbs. | Acres   | Lbs. Per Acre |
|------------------------|--------------|---------|---------------|
| Kentucky . . . . .     | 180          | 250,000 | 720           |
| Virginia . . . . .     | 100          | 120,000 | 830           |
| N. Carolina . . . . .  | 45           | 80,000  | 560           |
| Tennessee . . . . .    | 33           | 50,000  | 660           |
| Maryland . . . . .     | 20           | 30,000  | 670           |
| Other States . . . . . | 102          | 140,000 | 730           |
| Union . . . . .        | 480          | 670,000 | 720           |

Consumption is as follows (1896) :—

|                      | Tons   | Oz. Per Head |
|----------------------|--------|--------------|
| U. Kingdom . . . . . | 30,500 | 28           |
| France . . . . .     | 40,000 | 37           |
| Germany . . . . .    | 85,000 | 56           |
| Russia . . . . .     | 90,000 | 32           |
| Austria . . . . .    | 55,000 | 45           |

Neumann Spallart estimated consumption (1885) in other countries thus : Italy 24, Scandinavia 45, Switzerland 80, Belgium 88, Holland 98, United States 106, ounces yearly per inhabitant.

## TRACTION

The same force that moves 1 ton on a smooth high-road will move 8 tons on a railway or 32 tons on a canal. The force that moves 1 ton on a canal at the speed of 8 miles an hour will move :—

|                              |
|------------------------------|
| 2½ tons at 5 miles per hour, |
| 5 " " 3½ " " "               |
| 10 " " 2½ " " "              |

See *Resistance and Gradients* (under *Railways*), at page 499.

## TRADE UNIONS

The progress of Trade Unions in the United Kingdom in thirty years may be seen by comparing the number of members whose deputies assisted at successive Trade Union Congresses, viz. :—

|                |         |                |           |
|----------------|---------|----------------|-----------|
| 1868 . . . . . | 118,000 | 1888 . . . . . | 675,000   |
| 1873 . . . . . | 256,000 | 1897 . . . . . | 1,093,000 |

The principal guilds are the following :—

| Members          |         | Members         |        |
|------------------|---------|-----------------|--------|
| Miners . . . .   | 250,000 | Carpenters . .  | 52,000 |
| Engineers . . .  | 94,000  | Shoemakers . .  | 41,000 |
| Weavers . . . .  | 81,000  | Ironfounders .  | 32,000 |
| Railwaymen . .   | 66,000  | Printers . . .  | 25,000 |
| Shipbuilders . . | 57,000  | Tailors . . . . | 22,000 |

The numbers for 1887 will be found at page 570.

The ratios of hands employed and unemployed were :—

| Year           | Per Cent. |            |
|----------------|-----------|------------|
|                | Employed  | Unemployed |
| 1893 . . . . . | 92.5      | 7.5        |
| 1894 . . . . . | 93.1      | 6.9        |
| 1895 . . . . . | 94.2      | 5.8        |
| 1896 . . . . . | 96.6      | 3.4        |

See *Friendly Societies*, page 737; *Strikes*, page 808.

#### FRANCE

The law permitting Trade Unions was passed in 1884 : the associations increased as follows :—

| Unions of       | 1884 | 1888  | 1891  |
|-----------------|------|-------|-------|
| Employers . . . | 101  | 859   | 1,127 |
| Workmen . . .   | 69   | 803   | 1,376 |
| Farmers . . . . | 5    | 461   | 750   |

See also *Trade Unions*, in Part I., page 570.

#### TRAMWAYS

In 1896 the length of lines in traffic was as follows :—

|                   | Miles |       |          |        |
|-------------------|-------|-------|----------|--------|
|                   | Horse | Steam | Electric | Total  |
| United Kingdom .  | 710   | 230   | 70       | 1,010  |
| France . . . . .  | 750   | 560   | 110      | 1,420  |
| Germany . . . . . | 940   | 240   | 410      | 1,590  |
| Russia . . . . .  | 270   | 20    | 20       | 310    |
| Austria . . . . . | 260   | 110   | 90       | 460    |
| Italy . . . . .   | 240   | 1,830 | 30       | 2,100  |
| Spain . . . . .   | 170   | 40    | 10       | 220    |
| Portugal . . . .  | 80    | 10    | 10       | 100    |
| Holland . . . . . | 450   | 330   | 10       | 790    |
| Belgium . . . . . | 100   | 740   | 30       | 870    |
| Switzerland . . . | 20    | 160   | 30       | 210    |
| Scandinavia . . . | 80    | ...   | 10       | 90     |
| Roumania, &c. . . | 90    | ...   | 10       | 100    |
| Europe . . . . .  | 4,160 | 4,270 | 840      | 9,270  |
| United States . . | 2,650 | 1,120 | 12,130   | 15,900 |
| Total . . . . .   | 6,810 | 5,390 | 12,970   | 25,170 |

#### UNITED KINGDOM

Mileage and traffic have advanced in ten years :—

|                    | Miles |       | Passengers Millions |      |
|--------------------|-------|-------|---------------------|------|
|                    | 1886  | 1896  | 1886                | 1896 |
| England . . . . .  | 706   | 792   | 303                 | 585  |
| Scotland . . . . . | 73    | 96    | 60                  | 128  |
| Ireland . . . . .  | 86    | 122   | 22                  | 46   |
| United Kingdom .   | 865   | 1,010 | 385                 | 759  |

At present the traffic averages yearly 800,000 passengers per mile, against 445,000 in 1886. Earnings and expenses in 1896 showed as follows :—

|                 | Receipts<br>£ | Expenses<br>£ | Profit, £ | Interest<br>on Cost |
|-----------------|---------------|---------------|-----------|---------------------|
| England . . . . | 3,320,000     | 2,490,000     | 830,000   | 7.4                 |
| Scotland . . .  | 545,000       | 400,000       | 145,000   | 9.6                 |
| Ireland . . . . | 285,000       | 215,000       | 70,000    | 4.8                 |
| U. Kingdom . .  | 4,150,000     | 3,105,000     | 1,045,000 | 7.4                 |

The average receipts for every 100 passengers carried were : 102 pence in Scotland, 136 in England, and 149 in Ireland.

In 1898 the tramways of the United Kingdom had 1064 miles in length (450 miles municipal property), representing a capital cost of £15,900,000, or £15,000 per mile. They had 590 locomotives, 39,000 horses, 5300 cars, and carried 859 million passengers in the year. Receipts, £4,560,000; expenses, £3,510,000; net profit, £1,050,000, or 7 per cent. on capital.

#### FRANCE

The returns of French tramways in 1895 were :—

|                 | Paris     | Provinces | Total      |
|-----------------|-----------|-----------|------------|
| Miles . . . . . | 210       | 1,100     | 1,310      |
| Cost, £ . . . . | 3,270,000 | 7,010,000 | 10,280,000 |
| Receipts, £ . . | 1,020,000 | 1,064,000 | 2,084,000  |
| Expenses, £ . . | 940,000   | 826,000   | 1,766,000  |
| Profit, £ . . . | 80,000    | 238,000   | 318,000    |

The tramway traffic of five cities in 1895 was as follows :—

|                  | Million<br>Passengers | Trips per<br>Inhabitant |
|------------------|-----------------------|-------------------------|
| Paris . . . . .  | 160                   | 66                      |
| Marseilles . . . | 27                    | 67                      |
| Lyons . . . . .  | 24                    | 54                      |
| Bordeaux . . . . | 15                    | 60                      |
| Lille . . . . .  | 10                    | 50                      |
| Total . . . . .  | 236                   | 60                      |

#### HOLLAND

In 1896 the trams carried 44 million passengers for £440,000, being at the rate of 2½ pence each.

#### ARGENTINA

Buenos Ayres trams carried 45 million passengers in 1898.

#### UNITED STATES

The following table shows the cost of construction :—

|                  | £           | Miles  | £ per<br>Mile |
|------------------|-------------|--------|---------------|
| Horse . . . . .  | 18,300,000  | 1,220  | 15,000        |
| Cable . . . . .  | 81,800,000  | 1,120  | 73,000        |
| Electric . . . . | 186,100,000 | 12,130 | 15,300        |
| Total . . . . .  | 286,000,000 | 14,470 | 19,800        |

The rolling stock, cost of working, and average fare per passenger in 1896 were:—

|                | No. of Cars | Working Expenses Cts. p. Mile | Fare, Cents per Passenger |
|----------------|-------------|-------------------------------|---------------------------|
| Horse . . .    | 5,380       | 18.2                          | 3.7                       |
| Cable . . .    | 7,820       | 14.1                          | 3.2                       |
| Electric . . . | 35,000      | 13.2                          | 3.8                       |

The cost of working is highest on horse lines, but the average fare is highest on electric lines.

The census of 1890 showed that the tramway traffic in that year for the Union was equivalent to 350,000 passengers per mile yearly, or about 1000 daily. At this rate the traffic in 1896 must have been 14½ million passengers daily, or 100 millions a week, against 15 millions a week in the United Kingdom. Thus each inhabitant of the United States makes 70 trips yearly, and of the United Kingdom only 17 trips yearly.

## V

## VITAL STATISTICS

Mayr shows that the general rates for Europe were:—

| Period             | Per 10,000 Inhabitants Yearly |        |                |
|--------------------|-------------------------------|--------|----------------|
|                    | Births                        | Deaths | Surplus Births |
| 1821-40 . . . . .  | 351                           | 307    | 44             |
| 1841-60 . . . . .  | 334                           | 304    | 30             |
| 1861-80 . . . . .  | 341                           | 297    | 44             |
| 1881-90 . . . . .  | 330                           | 277    | 53             |
| 70 years . . . . . | 340                           | 299    | 41             |

The following table shows the average number of births, marriages, and deaths in the last five recorded years, and the rate per 1000 inhabitants:—

|                 | Num. (000 omitted) |           |        | Per 1000 Pop. |           |        |
|-----------------|--------------------|-----------|--------|---------------|-----------|--------|

| Sweden . . .    | 133                | 28        | 82     | 27.5          | 5.8       | 17.0   |
| Norway . . .    | 61                 | 13        | 34     | 30.3          | 6.5       | 16.8   |
| Denmark . . .   | 68                 | 16        | 42     | 30.3          | 6.9       | 18.5   |
| Finland . . .   | 77                 | 16        | 50     | 32.0          | 6.7       | 20.8   |
| Holland . . .   | 155                | 34        | 92     | 33.0          | 7.2       | 19.2   |
| Belgium . . .   | 181                | 47        | 126    | 29.2          | 7.6       | 19.9   |
| Switzerland . . | 84                 | 22        | 60     | 28.2          | 7.4       | 20.2   |
| Greece . . .    | 64                 | 16        | 44     | 34.5          | 9.0       | 25.0   |
| Roumania . . .  | 226                | 45        | 171    | 39.0          | 7.8       | 29.5   |
| Servia . . .    | 97                 | 23        | 65     | 44.1          | 10.4      | 29.5   |
| Bulgaria . . .  | 118                | 27        | 82     | 36.4          | 8.2       | 25.2   |
| Europe . . .    | 12,748             | 2,723     | 9,320  | 38.2          | 8.1       | 28.0   |
| Australia . . . | 126                | 26        | 51     | 31.4          | 6.5       | 12.7   |
| Canada . . .    | 125                | 31        | 64     | 25.0          | 6.2       | 12.8   |
| Japan . . .     | 1,186              | 350       | 874    | 28.6          | 8.4       | 21.1   |

In the preceding table it will be seen that the rates for

\* Returns for the Greek Church only, comprising 73 million inhabitants, or 70 per cent. of the population, including Poland, but not Finland and the Caucasus.

Russia are much higher than for other countries. If Russia be excluded, the rates for the rest of Europe are:

|                     | Number    | Per 1000 Pop. |
|---------------------|-----------|---------------|
| Births . . . . .    | 8,669,000 | 32.1          |
| Marriages . . . . . | 2,018,000 | 7.4           |
| Deaths . . . . .    | 6,298,000 | 23.3          |

The surplus of births over deaths yearly in Europe, exclusive of Russia, is 2,371,000, equal to 8.8 per 1000 of the population, but if Russia be included it is 3,428,000, or 10.2 per 1000 yearly.

## AUSTRALIA

Returns for five years ending December 1895 give:—

|                      | Births  | Marriages | Deaths | Surplus Births |
|----------------------|---------|-----------|--------|----------------|
| New South Wales . .  | 39,600  | 8,000     | 15,400 | 24,200         |
| Victoria . . . . .   | 36,200  | 7,520     | 16,400 | 19,800         |
| New Zealand . . . .  | 18,300  | 4,040     | 6,700  | 11,600         |
| Queensland . . . . . | 14,600  | 2,700     | 5,300  | 9,300          |
| S. Australia . . . . | 10,600  | 2,140     | 4,100  | 6,500          |
| Tasmania . . . . .   | 4,900   | 900       | 2,000  | 2,900          |
| W. Australia . . . . | 2,100   | 470       | 1,100  | 1,000          |
| Total . . . . .      | 126,300 | 25,770    | 51,000 | 75,300         |

Births and deaths compared with population gave:—

|                       | Per 1000 Population |        |                  |
|-----------------------|---------------------|--------|------------------|
|                       | Births              | Deaths | Natural Increase |
| New South Wales . . . | 32.8                | 12.8   | 20.0             |
| Victoria . . . . .    | 31.0                | 14.1   | 16.9             |
| New Zealand . . . . . | 27.7                | 10.2   | 17.5             |
| Queensland . . . . .  | 34.1                | 12.5   | 21.6             |
| South Australia . . . | 31.5                | 12.2   | 19.3             |
| Tasmania . . . . .    | 32.2                | 13.2   | 19.0             |
| West Australia . . .  | 31.2                | 16.1   | 15.1             |
| Average . . . . .     | 31.3                | 12.7   | 18.6             |

## CANADA

The census of 1891 gave the following rates:—

|                        | Per 1000 Population |        |                |
|------------------------|---------------------|--------|----------------|
|                        | Births              | Deaths | Surplus Births |
| Ontario . . . . .      | 24.5                | 11.3   | 13.2           |
| Quebec . . . . .       | 36.9                | 18.9   | 18.0           |
| Nova Scotia . . . . .  | 25.4                | 14.6   | 10.8           |
| Prince Edward Island . | 24.5                | 12.3   | 12.2           |
| New Brunswick . . .    | 27.7                | 13.4   | 14.3           |
| Manitoba . . . . .     | 32.5                | 19.4   | 13.1           |
| British Columbia . .   | 23.2                | 13.9   | 9.3            |
| All Canada . . . . .   | 28.5                | 14.5   | 14.0           |

## NATURAL INCREASE

The following table shows the natural increase, *i.e.* the surplus of births over deaths in various countries, and the number of years in which this would suffice to double a population if there were no emigration:—

|                          | Natural Increase | Rate Per 1000 Pop. | Years to Double |
|--------------------------|------------------|--------------------|-----------------|
| England . . . . .        | 363,000          | 12.1               | 58              |
| Scotland . . . . .       | 50,000           | 12.1               | 58              |
| Ireland . . . . .        | 23,000           | 5.0                | 140             |
| United Kingdom . . . . . | 436,000          | 11.3               | 62              |
| France . . . . .         | ...              | ...                | ...             |
| Germany . . . . .        | 660,000          | 13.0               | 54              |
| Russia . . . . .         | 1,057,000        | 14.5               | 48              |
| Austria . . . . .        | 232,000          | 9.7                | 72              |
| Hungary . . . . .        | 175,000          | 9.7                | 72              |
| Italy . . . . .          | 326,000          | 10.6               | 66              |
| Spain . . . . .          | 75,000           | 4.2                | 167             |
| Portugal . . . . .       | 52,000           | 10.4               | 67              |
| Sweden . . . . .         | 51,000           | 10.5               | 67              |
| Norway . . . . .         | 27,000           | 13.5               | 52              |
| Denmark . . . . .        | 26,000           | 11.8               | 59              |
| Finland . . . . .        | 27,000           | 11.2               | 62              |
| Holland . . . . .        | 63,000           | 13.4               | 52              |
| Belgium . . . . .        | 55,000           | 8.9                | 78              |
| Switzerland . . . . .    | 24,000           | 8.0                | 88              |
| Greece . . . . .         | 20,000           | 9.5                | 73              |
| Roumania . . . . .       | 55,000           | 9.5                | 73              |
| Servia . . . . .         | 32,000           | 14.6               | 48              |
| Bulgaria . . . . .       | 36,000           | 11.2               | 62              |
| Japan . . . . .          | 312,000          | 7.5                | 93              |
| Australia . . . . .      | 75,000           | 18.5               | 38              |
| United States . . . . .  | 1,440,000        | 20.0               | 35              |
| Canada . . . . .         | 61,000           | 12.2               | 57              |

The natural increase is highest in Servia and Russia. There is no increase in France, the deaths of the last five years having equalled the births.

The following table shows the average rates of birth and death, and the natural increase, in various cities for ten years ending December 1891:—

|                      | Per 1000 Inhabitants Yearly |        |            |
|----------------------|-----------------------------|--------|------------|
|                      | Births                      | Deaths | Nat. Incr. |
| London . . . . .     | 33.0                        | 20.4   | 9.6        |
| Paris . . . . .      | 26.3                        | 23.8   | 2.5        |
| Berlin . . . . .     | 33.4                        | 23.1   | 10.3       |
| Vienna . . . . .     | 28.6                        | 21.5   | 7.1        |
| Rome . . . . .       | 29.5                        | 25.6   | 3.9        |
| Buda-Pesth . . . . . | 36.0                        | 30.9   | 5.1        |
| Brussels . . . . .   | 31.0                        | 24.4   | 6.6        |
| Hamburg . . . . .    | 35.1                        | 24.8   | 10.3       |
| Leipzig . . . . .    | 27.0                        | 17.2   | 9.8        |
| Dresden . . . . .    | 31.1                        | 21.9   | 9.2        |
| Breslau . . . . .    | 35.2                        | 29.2   | 6.0        |
| Bordeaux . . . . .   | 22.8                        | 24.0   | ...        |
| Naples . . . . .     | 33.6                        | 30.1   | 3.5        |
| Milan . . . . .      | 32.7                        | 28.1   | 4.6        |
| Turin . . . . .      | 29.5                        | 26.2   | 3.3        |
| Genoa . . . . .      | 28.2                        | 25.6   | 2.6        |
| Florence . . . . .   | 26.1                        | 26.5   | ...        |
| Palermo . . . . .    | 35.2                        | 25.3   | 9.9        |
| Venice . . . . .     | 30.1                        | 30.9   | ...        |
| Trieste . . . . .    | 34.1                        | 31.2   | 2.9        |
| Average . . . . .    | 30.9                        | 25.5   | 5.4        |

## UNITED STATES

Deaths recorded in the census year 1890 were 875,520, being 14 per thousand inhabitants. Birth-rate is shown by Dr. Billings (1886), on the basis of the previous census, to be 34 per thousand, so that the natural increase on a population of 72 millions is 1,440,000 yearly.

## MORTALITY

The following table (1881-90) shows the number of deaths yearly among 10,000 inhabitants:—

| Age               | England | France | Prussia | Italy | Sweden | Denmark | Holland | Belgium | Switzer. | Average |
|-------------------|---------|--------|---------|-------|--------|---------|---------|---------|----------|---------|
| 0-5 . . . . .     | 69      | 79     | 104     | 127   | 53     | 60      | 82      | 74      | 68       | 80      |
| 5-15 . . . . .    | 9       | 11     | 13      | 17    | 12     | 13      | 10      | 9       | 9        | 11      |
| 15-25 . . . . .   | 8       | 12     | 10      | 12    | 9      | 10      | 10      | 10      | 10       | 10      |
| 25-35 . . . . .   | 10      | 13     | 12      | 11    | 9      | 10      | 10      | 11      | 12       | 11      |
| 35-45 . . . . .   | 13      | 12     | 13      | 11    | 9      | 10      | 11      | 12      | 13       | 12      |
| 45-55 . . . . .   | 17      | 15     | 17      | 14    | 11     | 12      | 13      | 14      | 16       | 14      |
| 55-65 . . . . .   | 25      | 23     | 27      | 24    | 18     | 20      | 21      | 22      | 28       | 23      |
| 65-75 . . . . .   | 31      | 30     | 33      | 32    | 22     | 25      | 27      | 28      | 35       | 29      |
| Over 75 . . . . . | 28      | 26     | 31      | 34    | 25     | 23      | 27      | 29      | 32       | 28      |
| Total . . . . .   | 210     | 221    | 260     | 282   | 168    | 183     | 211     | 209     | 223      | 218     |

Infant mortality, during ten years ending 1893, showed the number of deaths yearly per thousand of each age:—

|                    | 0-1 | 1-2 | 2-3 | 3-4 |
|--------------------|-----|-----|-----|-----|
| England . . . . .  | 146 | 54  | 22  | 14  |
| Scotland . . . . . | 122 | 53  | 24  | 15  |
| Ireland . . . . .  | 96  | 36  | 19  | 12  |
| France . . . . .   | 168 | 48  | 25  | 17  |
| Prussia . . . . .  | 208 | 62  | 31  | 21  |
| Russia . . . . .   | 269 | 98  | 59  | 40  |
| Austria . . . . .  | 247 | 76  | 41  | 28  |
| Hungary . . . . .  | 256 | 94  | 61  | 46  |
| Italy . . . . .    | 190 | 96  | 47  | 29  |
| Spain . . . . .    | 192 | 127 | 89  | 44  |
| Sweden . . . . .   | 107 | 32  | 20  | 15  |
| Norway . . . . .   | 96  | 33  | 20  | 15  |
| Holland . . . . .  | 175 | 54  | 23  | 15  |
| Belgium . . . . .  | 163 | 51  | 25  | 16  |
| Roumania . . . . . | 198 | 83  | 55  | 40  |
| Japan . . . . .    | 132 | 45  | 29  | 20  |

Deaths from alcohol, in seven years ending 1893, averaged yearly per million inhabitants as follows:—

|                    |    |                   |    |
|--------------------|----|-------------------|----|
| England . . . . .  | 63 | Prussia . . . . . | 23 |
| Scotland . . . . . | 54 | Belgium . . . . . | 53 |
| Ireland . . . . .  | 30 | Sweden . . . . .  | 21 |

See *Births*, page 645, and *Deaths*, page 683.

*Longevity*.—The number of persons over 70 years of age in various countries is as follows:—

|                         | Number (000 omitted) |         |       | Per 1000 Pop. |
|-------------------------|----------------------|---------|-------|---------------|
|                         | Males                | Females | Total |               |
| England . . . . .       | 347                  | 454     | 801   | 28            |
| Scotland . . . . .      | 49                   | 75      | 124   | 31            |
| Ireland . . . . .       | 103                  | 111     | 214   | 45            |
| France . . . . .        | 895                  | 1,015   | 1,910 | 50            |
| Germany . . . . .       | 619                  | 757     | 1,376 | 28            |
| Austria . . . . .       | 304                  | 333     | 637   | 27            |
| Hungary . . . . .       | 195                  | 204     | 399   | 22            |
| Switzerland . . . . .   | 41                   | 47      | 88    | 30            |
| Spain . . . . .         | 227                  | 256     | 483   | 27            |
| Scandinavia . . . . .   | 168                  | 220     | 388   | 43            |
| Holland . . . . .       | 67                   | 84      | 151   | 33            |
| Belgium . . . . .       | 103                  | 123     | 226   | 37            |
| United States . . . . . | 811                  | 756     | 1,567 | 25            |
| Australia . . . . .     | 36                   | 25      | 61    | 16            |

Longevity is most frequent in countries of low birth-rate, such as France and Ireland. The *Journal des Debats* (November 1898) published the following statement of centenarians living in Europe:—

|                   |     |                   |     |                    |    |
|-------------------|-----|-------------------|-----|--------------------|----|
| Ireland . . . . . | 578 | France . . . . .  | 243 | Germany . . . . .  | 75 |
| Spain . . . . .   | 401 | England . . . . . | 146 | Scotland . . . . . | 46 |

See tables of *Longevity*, pages 355-357.

## W

## WAGES

Tables of wages in various countries from 1836 to 1886 will be found in Part I., pages 579-586. The Board of Trade returns (by Giffen) in 1891 gave the summary for Great Britain thus:—

| Working in           | Wages, Shillings Weekly |       |      |       |
|----------------------|-------------------------|-------|------|-------|
|                      | Men                     | Women | Boys | Girls |
| Collieries . . .     | 22.9                    | 8.2   | 10.7 | 5.6   |
| Iron mines . . .     | 16.5                    | 5.8   | 7.0  | 4.7   |
| Slate quarries . . . | 22.1                    | ...   | 8.0  | ...   |
| Cotton mills . . .   | 25.3                    | 15.3  | 9.3  | 6.8   |
| Woollen „ . . .      | 23.2                    | 13.3  | 8.5  | 7.4   |
| Linen „ . . .        | 19.7                    | 8.9   | 6.3  | 4.9   |
| Hemp „ . . .         | 23.5                    | 9.7   | 6.0  | 5.1   |
| Silk „ . . .         | 22.3                    | 10.1  | 7.2  | 5.7   |
| Carpet „ . . .       | 26.6                    | 11.4  | 8.3  | 6.9   |
| Hosiery „ . . .      | 24.4                    | 11.5  | 9.5  | 8.3   |
| Hair „ . . .         | 25.0                    | 9.8   | 7.4  | 5.9   |
| Average . . .        | 21.0                    | 9.4   | 7.3  | 5.5   |

In 1895 Mr. Bowley published a comparative table of wages since 1860 thus:—

| Employed in        | 1860 | 1874 | 1880 | 1883 | 1886 | 1891 |
|--------------------|------|------|------|------|------|------|
| Agriculture . . .  | 100  | 130  | 122  | 117  | 111  | 118  |
| Building . . .     | 100  | 126  | 125  | 125  | 126  | 128  |

## UNITED STATES

Mr. Carroll Wright, Director of Statistical Department, shows that wages rose 67 per cent. between 1860 and 1891, viz.:—

| Employment      | 1860  | 1880  | 1891  |
|-----------------|-------|-------|-------|
| Brewery . . .   | 100   | 176   | 225   |
| Carpen'er . . . | 100   | 143   | 173   |
| Leather . . .   | 100   | 131   | 138   |
| Lumber . . .    | 100   | 173   | 178   |
| Metals . . .    | 100   | 134   | 149   |
| Paper . . .     | 100   | 159   | 182   |
| Printer . . .   | 100   | 141   | 149   |
| Railroad . . .  | 100   | 144   | 146   |
| Stone . . .     | 100   | 129   | 165   |
| Textiles . . .  | 100   | 140   | 165   |
| Total . . .     | 1,000 | 1,470 | 1,670 |

The census of 1890, compared with previous ones, showed wages thus:—

| Year       | Wages, £    | Hands     | £ per Hand |
|------------|-------------|-----------|------------|
| 1850 . . . | 49,200,000  | 957,000   | 51         |
| 1860 . . . | 78,800,000  | 1,311,000 | 60         |
| 1870 . . . | 129,000,000 | 2,054,000 | 63         |
| 1880 . . . | 197,200,000 | 2,733,000 | 72         |
| 1890 . . . | 474,800,000 | 4,713,000 | 101        |

Comparing 1890 with 1860, we find the average earnings rose 67 per cent., precisely as Carroll Wright stated above. In 1897 he published a report on Wages, from which the following figures are taken:—

## Weekly Earnings, Shillings

|                   | Man | Woman |                  | Man | Woman |
|-------------------|-----|-------|------------------|-----|-------|
| Book-keeper . . . | 84  | 42    | Salesman . . .   | 46  | 42    |
| Carder . . .      | 30  | 23    | Shirtmaker . . . | 42  | 38    |
| Cigar-maker . . . | 46  | 41    | Shoemaker . . .  | 30  | 21    |
| Cook . . .        | 25  | 23    | Spinner . . .    | 32  | 25    |
| Paper-maker . . . | 56  | 21    | Tailor . . .     | 86  | 81    |
| Printer . . .     | 63  | 60    | Weaver . . .     | 29  | 25    |

## ITALY

Bodio's table, reduced to English money, is as follows:—

| Employment       | Pence Daily |      |      |      |      |
|------------------|-------------|------|------|------|------|
|                  | 1871        | 1881 | 1886 | 1891 | 1897 |
| Dyer . . .       | 17          | 21   | 21   | 20   | 20   |
| Engineer . . .   | 33          | 42   | 32   | 28   | 30   |
| Mason . . .      | 33          | 43   | 38   | 36   | 38   |
| Miner . . .      | 24          | 29   | 24   | 23   | 26   |
| Papermaker . . . | 13          | 17   | 19   | 24   | 25   |
| „ woman . . .    | 9           | 11   | 11   | 18   | 18   |
| Spinner . . .    | 8           | 9    | 10   | 12   | 12   |
| Waggoner . . .   | 19          | 21   | 24   | 24   | 20   |
| Weaver . . .     | 27          | 47   | 47   | 40   | 40   |
| „ woman . . .    | 14          | 16   | 17   | 15   | 15   |
| Average . . .    | 20          | 26   | 24   | 24   | 24   |

The mean wages in seven branches of industry for a working day of 10½ hours, and the number of days' labour equal to a ton of wheat, were as follows:—

| Year       | Wage, Pence Daily | Wheat, Shill. per Ton | Day's Wage to a Ton |
|------------|-------------------|-----------------------|---------------------|
| 1871 . . . | 17                | 250                   | 15                  |
| 1876 . . . | 20                | 236                   | 12                  |
| 1881 . . . | 22                | 218                   | 10                  |
| 1886 . . . | 24                | 176                   | 7                   |
| 1891 . . . | 25                | 202                   | 8                   |
| 1896 . . . | 25                | 180                   | 7                   |

It appears that in 1896 an operative could earn the price of a ton of wheat in half the time necessary in 1871.

## WAR

The campaigns against Bonaparte, 1793-1815, showed an annual death-rate in the British army of 57 per thousand, of whom only 7 per thousand were killed in action. Subsequent campaigns, being of shorter duration, show necessarily a higher annual death-rate, viz. :—

| Date    | War in    | Army     | Per 1000 Yearly |
|---------|-----------|----------|-----------------|
| 1855    | Crimea    | British  | 120             |
|         |           | French   | 103             |
| 1859    | Italy     | Austrian | 47              |
|         |           | French   | 56              |
|         |           | Italian  | 55              |
| 1864    | Schleswig | Prussian | 33              |
|         |           | Austrian | 40              |
| 1866    | Germany   | Prussian | 34              |
|         |           | Austrian | 56              |
|         |           | Bavarian | 51              |
| 1870-71 | France    | German   | 50              |

In the Franco-German war the German army had a medium strength of 888,000 men in the field, of whom 44,750 died, including 26,900 killed in action: the mortality among officers was much higher than among men, viz. :—

|          | Killed | Died | Total per Thousand |
|----------|--------|------|--------------------|
| Officers | 81     | 8    | 89                 |
| Men      | 31     | 14   | 45                 |

The British loss in the Crimea was very severe, the mortality in two years reaching one-fourth of the army in the field. For details see page 587.

## WATER

According to latest information the daily supply of water to the principal cities and the average charge per gallon are as follows :—

|            | Gallons     | Gall. per Inhab. | Pence Yearly |
|------------|-------------|------------------|--------------|
| London     | 183,000,000 | 40               | 2.5          |
| Paris      | 123,000,000 | 48               | 5.0          |
| Vienna     | 120,000,000 | 90               | 3.6          |
| Buda-Pesth | 176,000,000 | 300              | 2.0          |
| Rome       | 52,000,000  | 128              | 2.0          |
| Genoa      | 23,000,000  | 105              | 2.0          |
| Hamburg    | 26,000,000  | 42               | 2.5          |
| Berlin     | 21,500,000  | 13               | 2.5          |
| Bordeaux   | 12,300,000  | 48               | 2.4          |
| Palermo    | 9,500,000   | 33               | 1.8          |
| Naples     | 6,400,000   | 12               | 1.8          |
| Brussels   | 6,000,000   | 12               | 1.2          |

The volume of water discharged at Niagara is now computed at 1,500,000 tons, or 340 million gallons per minute, representing a force of 16 million horse power, which is equal to the energy contained in all the coal produced daily in the world, say 1,600,000 tons.

The water supply of London is provided by companies, whose shares and debentures sum up £22,300,000, but the market value in 1897 was £48,350,000, equal to a premium of 117 per cent. There is a project to bring a supply of 215 million gallons daily from Wales (162 miles) at a cost of £32,800,000.

See *Aqueducts*, page 636, and *Water*, page 582.

## WEALTH

The methods for estimating the wealth of nations are laid down at length in my book on *Industries and Wealth of Nations* (Longmans, London, 1896), from which the following tables are taken :—

|               | Millions £ Sterling |          |        |             |          |
|---------------|---------------------|----------|--------|-------------|----------|
|               | Farms               | Railways | Houses | Merchandise | Sundries |
| England       | 1,452               | 812      | 2,196  | 609         | 4,973    |
| Scotland      | 234                 | 134      | 232    | 114         | 380      |
| Ireland       | 391                 | 39       | 64     | 62          | 94       |
| U. Kingdom    | 2,077               | 985      | 2,492  | 805         | 5,447    |
| France        | 3,093               | 663      | 2,159  | 601         | 3,174    |
| Germany       | 2,508               | 555      | 1,755  | 677         | 2,557    |
| Russia        | 2,710               | 349      | 1,019  | 515         | 1,832    |
| Austria       | 1,797               | 371      | 719    | 367         | 1,258    |
| Italy         | 1,399               | 184      | 503    | 223         | 851      |
| Spain         | 1,212               | 108      | 280    | 148         | 632      |
| Portugal      | 164                 | 23       | 77     | 32          | 115      |
| Scandinavia   | 532                 | 54       | 221    | 117         | 372      |
| Holland       | 295                 | 46       | 178    | 104         | 257      |
| Belgium       | 354                 | 75       | 175    | 118         | 266      |
| Switzerland   | 172                 | 44       | 91     | 49          | 136      |
| Danub. States | 508                 | 36       | 136    | 83          | 263      |
| Greece        | 109                 | 6        | 31     | 15          | 61       |
| Europe        | 16,930              | 3,499    | 9,834  | 3,854       | 17,223   |
| U. States     | 4,142               | 2,260    | 4,446  | 1,593       | 3,939    |
| Canada        | 311                 | 186      | 145    | 103         | 264      |
| Australia     | 392                 | 139      | 174    | 88          | 283      |
| Argentina     | 198                 | 88       | 107    | 53          | 170      |
| Total         | 21,973              | 6,172    | 14,706 | 5,661       | 21,879   |

The following table shows the distribution of wealth among the whole population of each country; rural wealth, for example, is the ratio of same which would correspond not to the rural population but to all the inhabitants, and urban in like manner, viz. :—

|                   | £ Sterling per Inhabitant |       |       |      |          |
|-------------------|---------------------------|-------|-------|------|----------|
|                   | Rural                     | Urban | Total | Real | Personal |
| United Kingdom    | 53                        | 249   | 302   | 106  | 196      |
| France            | 80                        | 172   | 252   | 123  | 129      |
| Germany           | 48                        | 108   | 156   | 72   | 84       |
| Russia            | 26                        | 35    | 61    | 30   | 31       |
| Austria           | 41                        | 63    | 104   | 51   | 53       |
| Italy             | 45                        | 56    | 101   | 53   | 48       |
| Spain             | 69                        | 66    | 135   | 76   | 59       |
| Portugal          | 35                        | 52    | 87    | 46   | 41       |
| Sweden and Norway | 40                        | 74    | 114   | 53   | 61       |
| Denmark           | 115                       | 115   | 230   | 124  | 106      |
| Holland           | 61                        | 122   | 183   | 87   | 96       |
| Belgium           | 56                        | 98    | 154   | 75   | 79       |
| Switzerland       | 57                        | 107   | 164   | 76   | 88       |
| Danubian States   | 44                        | 46    | 90    | 49   | 41       |
| Greece            | 50                        | 51    | 101   | 57   | 44       |
| Europe            | 45                        | 94    | 139   | 64   | 75       |
| United States     | 59                        | 175   | 234   | 111  | 123      |
| Canada            | 60                        | 136   | 196   | 73   | 123      |
| Australia         | 93                        | 163   | 256   | 97   | 159      |
| Argentina         | 49                        | 105   | 154   | 58   | 96       |
| General average   | 48                        | 107   | 155   | 71   | 84       |

## GERMANY

The wealth of the principal States stands thus:—

|                   | Millions £ Sterling |         |        |            |         |
|-------------------|---------------------|---------|--------|------------|---------|
|                   | Prussia             | Bavaria | Saxony | Wurtemberg | Various |
| Farms . . .       | 1,583               | 341     | 72     | 130        | 382     |
| Railways . . .    | 348                 | 65      | 36     | 20         | 86      |
| Houses . . .      | 1,048               | 179     | 132    | 77         | 319     |
| Merchandise . . . | 403                 | 76      | 55     | 28         | 115     |
| Sundries . . .    | 1,558               | 288     | 161    | 115        | 435     |
| Total . . .       | 4,940               | 949     | 456    | 370        | 1,337   |
|                   |                     |         |        |            | 8,052   |

In two years (1896-98) *real estate* in Prussia increased 88 millions sterling. Molinari estimates that the wealth of Germany (real and personal) increased 600 millions sterling between 1893 and 1897, or 150 millions yearly.

## AUSTRIA

The shares that correspond to the two nations of the monarchy are as follows:—

|                   | Millions £ Sterling |         |       |
|-------------------|---------------------|---------|-------|
|                   | Austria             | Hungary | Total |
| Farms . . .       | 972                 | 825     | 1,797 |
| Railways . . .    | 217                 | 154     | 371   |
| Houses . . .      | 520                 | 199     | 719   |
| Merchandise . . . | 198                 | 169     | 367   |
| Sundries . . .    | 799                 | 459     | 1,258 |
| Total . . .       | 2,706               | 1,806   | 4,512 |

## SCANDINAVIA

The wealth of the three northern kingdoms shows as follows:—

|                   | Millions £ Sterling |        |      |       |
|-------------------|---------------------|--------|------|-------|
|                   | Sweden              | Norway | Den. | Total |
| Farms . . .       | 201                 | 77     | 254  | 532   |
| Railways . . .    | 33                  | 7      | 14   | 54    |
| Houses . . .      | 111                 | 41     | 69   | 221   |
| Merchandise . . . | 58                  | 22     | 37   | 117   |
| Sundries . . .    | 167                 | 73     | 132  | 372   |
| Total . . .       | 570                 | 220    | 506  | 1,296 |

## DANUBIAN STATES

The wealth of these States stands thus:—

|                   | Millions £ Sterling |        |          |       |
|-------------------|---------------------|--------|----------|-------|
|                   | Roumania            | Servia | Bulgaria | Total |
| Farms . . .       | 244                 | 110    | 154      | 508   |
| Railways . . .    | 26                  | 4      | 6        | 36    |
| Houses . . .      | 69                  | 28     | 39       | 136   |
| Merchandise . . . | 46                  | 15     | 22       | 83    |
| Sundries . . .    | 134                 | 54     | 75       | 263   |
| Total . . .       | 519                 | 211    | 296      | 1,026 |

## UNITED STATES

The various parts of the Union are represented approximately as regards wealth in the manner shown in the following table (houses including also public buildings):—

| States            | Millions £ Sterling |          |        |             |          |
|-------------------|---------------------|----------|--------|-------------|----------|
|                   | Farms               | Railways | Houses | Merchandise | Sundries |
| New England . . . | 142                 | 90       | 595    | 187         | 273      |
| Middle . . .      | 646                 | 310      | 1,967  | 480         | 994      |
| Southern . . .    | 713                 | 556      | 591    | 214         | 396      |
| Western . . .     | 2,641               | 1,304    | 2,182  | 681         | 1,388    |
| Union . . .       | 4,142               | 2,260    | 5,335  | 1,562       | 3,051    |
|                   |                     |          |        |             | 16,350   |

## AUSTRALIA

The several colonies stand as regards wealth (public works including railways, waterworks, telegraphs, &c.) thus:—

|                    | Millions £ Sterling |              |        |             |          |
|--------------------|---------------------|--------------|--------|-------------|----------|
|                    | Farms               | Public Works | Houses | Merchandise | Sundries |
| N. S. Wales . . .  | 131                 | 71           | 68     | 31          | 69       |
| Victoria . . .     | 77                  | 76           | 53     | 31          | 46       |
| New Zealand . . .  | 69                  | 29           | 25     | 18          | 25       |
| Queensland . . .   | 57                  | 22           | 8      | 11          | 16       |
| S. Australia . . . | 39                  | 19           | 12     | 7           | 18       |
| Tasmania . . .     | 12                  | 5            | 6      | 2           | 6        |
| W. Australia . . . | 7                   | 3            | 2      | 2           | 2        |
| Total . . .        | 392                 | 225          | 174    | 103         | 182      |
|                    |                     |              |        |             | 1,076    |

## CANADA

The distribution of wealth is approximately as follows:—

|                  | Millions £ Sterling |          |        |             |          |
|------------------|---------------------|----------|--------|-------------|----------|
|                  | Farms               | Railways | Houses | Merchandise | Sundries |
| Ontario . . .    | 186                 | 75       | 75     | 51          | 135      |
| Quebec . . .     | 67                  | 36       | 41     | 28          | 66       |
| Acadia . . .     | 32                  | 29       | 16     | 13          | 31       |
| North-West . . . | 26                  | 46       | 13     | 11          | 32       |
| Total . . .      | 311                 | 186      | 145    | 103         | 264      |
|                  |                     |          |        |             | 1,009    |

Acadia includes Nova Scotia and the other Atlantic provinces.

## WEIGHTS AND MEASURES

See pages 595-597.

## WHEAT

Canadian wheat crops were in tons as follows:—

|                      | 1896    | 1897      | 1898      |
|----------------------|---------|-----------|-----------|
| Ontario . . . . .    | 460,000 | 720,000   | 800,000   |
| Manitoba . . . . .   | 360,000 | 460,000   | 640,000   |
| North-West . . . . . | 40,000  | 40,000    | 60,000    |
| Quebec . . . . .     | 100,000 | 130,000   | 150,000   |
| Total . . . . .      | 960,000 | 1,350,000 | 1,650,000 |

In 1898 Argentina had 5,800,000 acres under wheat, probable crop 1,200,000 tons, one-half for export. Buenos Ayres had 1,100,000 acres, Santa Fé 2,650,000, Cordoba 1,240,000, Entre Rios 600,000, other provinces 210,000.

See *Agriculture*, page 613; *Food*, page 713; *Wheat*, page 597.

## WOOL

Production in 1894 was estimated as follows:—

|                       | Mil. Lbs.          | Mil. Lbs.             | Mil. Lbs.            |
|-----------------------|--------------------|-----------------------|----------------------|
| Australia . . . . .   | 670                | U. Kingdom 144        | Germany . . . . . 55 |
| River Plate . . . . . | 380                | France . . . . . 104  | Austria . . . . . 52 |
| United States 298     | South Africa 90    | India . . . . . 72    |                      |
| Russia . . . . . 262  | Spain . . . . . 66 | Various . . . . . 197 |                      |

Making a total of 2390 million pounds, or 1,070,000 tons. Consumption in the factories of the United States was as follows:—

| Year           | Million Pounds |          |       |
|----------------|----------------|----------|-------|
|                | Native         | Imported | Total |
| 1840 . . . . . | 36             | 10       | 46    |
| 1850 . . . . . | 53             | 18       | 71    |
| 1860 . . . . . | 60             | 25       | 85    |
| 1870 . . . . . | 162            | 47       | 209   |
| 1880 . . . . . | 233            | 124      | 357   |
| 1890 . . . . . | 276            | 102      | 378   |
| 1897 . . . . . | 259            | 342      | 601   |

Consumption in the United Kingdom has been as follows:—

| Year           | Million Pounds |         |       |
|----------------|----------------|---------|-------|
|                | British        | Foreign | Total |
| 1873 . . . . . | 158            | 195     | 353   |
| 1883 . . . . . | 109            | 219     | 328   |
| 1896 . . . . . | 125            | 385     | 510   |

Sir J. Behrens, Bradford, summed up the consumption during twenty years thus:—

| Year              | Million Pounds Yearly |          |       |
|-------------------|-----------------------|----------|-------|
|                   | British               | Imported | Total |
| 1860-64 . . . . . | 135                   | 126      | 261   |
| 1865-74 . . . . . | 144                   | 181      | 325   |
| 1875-84 . . . . . | 132                   | 235      | 367   |
| 1884 . . . . .    | 114                   | 280      | 394   |

He estimated the yearly output (1884) of woollen and worsted goods at £60,400,000, of which home consumption took £33,000,000, and exports were £27,400,000. The clip of British flocks averages 150 million lbs., of which one-fourth is exported.

The following table shows the average yearly production of wool from 1887 to 1894, and the equivalent in washed wool:—

|                         | Million Pounds |        | Yield Per Cent. |
|-------------------------|----------------|--------|-----------------|
|                         | Unwashed       | Washed |                 |
| Europe . . . . .        | 735            | 440    | 60              |
| Australia . . . . .     | 570            | 310    | 55              |
| River Plate . . . . .   | 345            | 120    | 35              |
| United States . . . . . | 290            | 220    | 75              |
| South Africa . . . . .  | 95             | 70     | 75              |
| Various . . . . .       | 215            | 130    | 60              |
| The World . . . . .     | 1,960          | 1,290  | 66              |

The countries which export woollen (and worsted) manufactures are:—

|                         | Millions £ Sterling |      |      |
|-------------------------|---------------------|------|------|
|                         | 1885                | 1890 | 1896 |
| Great Britain . . . . . | 24.4                | 25.7 | 26.9 |
| France . . . . .        | 14.6                | 15.8 | 14.2 |
| Germany . . . . .       | 9.7                 | 11.0 | 10.5 |
| Total . . . . .         | 48.7                | 52.5 | 51.6 |

Production and consumption of woollen goods are as follows:—

|                           | Output Millions £ | Consumption |                    |
|---------------------------|-------------------|-------------|--------------------|
|                           |                   | Millions £  | Shillings Per Head |
| United Kingdom . . . . .  | 61.7              | 45.0        | 23                 |
| France . . . . .          | 44.7              | 36.0        | 19                 |
| Germany . . . . .         | 42.2              | 39.8        | 15                 |
| Russia . . . . .          | 29.0              | 29.4        | 6                  |
| Austria . . . . .         | 14.5              | 14.1        | 7                  |
| Italy . . . . .           | 5.8               | 7.1         | 5                  |
| Spain . . . . .           | 6.6               | 6.9         | 8                  |
| Scandinavia . . . . .     | 4.2               | 6.2         | 14                 |
| Belgium . . . . .         | 5.3               | 5.5         | 17                 |
| Other Countries . . . . . | 9.0               | 12.0        | 8                  |
| Europe . . . . .          | 223.0             | 202.0       | 11                 |

Woollen manufacture in the United Kingdom has increased as follows:—

|                | Spindles  | Power-looms | Operatives |
|----------------|-----------|-------------|------------|
| 1870 . . . . . | 4,950,000 | 115,000     | 240,000    |
| 1890 . . . . . | 6,580,000 | 132,000     | 302,000    |

See *Wool*, page 701.

## Y

## YACHTS

According to Lloyd's List there are nearly 7000 yachts, of which 60 per cent. are owned in Great Britain, 40 per cent. abroad, viz. :—

|                                  | No.   | Tons    | Average Tons |
|----------------------------------|-------|---------|--------------|
| British . . . . .                | 4,104 | 155,000 | 38           |
| Foreign . . . . .                | 2,643 | 110,000 | 42           |
| Total . . . . .                  | 6,747 | 265,000 | 40           |
| Steam . . . . .                  | 1,436 | 172,000 | 120          |
| Sail . . . . .                   | 5,311 | 93,000  | 18           |
| Built in Great Britain . . . . . | 4,603 | 214,000 | 45           |
| Built abroad . . . . .           | 2,144 | 51,000  | 25           |

The yachts owned in the United Kingdom are as follows :—

|                 | No.   | Tons    | Average |
|-----------------|-------|---------|---------|
| Steam . . . . . | 898   | 94,000  | 105     |

| Spain and Port. . . . . | 2             | 12           | 14    | 2      | 11           | 13    |
| Roumania, &c. . . . .   | 13            | ...          | 13    | 17     | ...          | 17    |
| Total . . . . .         | 358           | 83           | 441   | 367    | 103          | 470   |

Austria exports 18 million lbs. of linen yarn, Belgium 62 million lbs. of linen and woollen yarns, Switzerland 20 million lbs. of all kinds.

## Z

## ZINC

Production of ores and of metal show approximately :—

|                         | Ore, Tons |           | Zinc, Tons |         |
|-------------------------|-----------|-----------|------------|---------|
|                         | 1888      | 1896      | 1888       | 1896    |
| Germany . . . . .       | 670,000   | 710,000   | 130,000    | 150,000 |
| Belgium . . . . .       | 20,000    | 20,000    | 90,000     | 110,000 |
| Great Britain . . . . . | 40,000    | 30,000    | 30,000     | 70,000  |
| United States . . . . . | 200,000   | 280,000   | 50,000     | 70,000  |
| Sweden . . . . .        | 50,000    | 30,000    | 20,000     | 40,000  |
| Spain . . . . .         | 40,000    | 50,000    |            |         |
| Austria . . . . .       | 30,000    | 30,000    |            |         |
| Italy, &c. . . . .      | 130,000   | 180,000   |            |         |
| France . . . . .        | 20,000    | 70,000    | 10,000     | 20,000  |
| Total . . . . .         | 1,200,000 | 1,400,000 | 330,000    | 460,000 |

The production of metallic zinc has doubled since 1880. The richest mines are in Prussia, the ores giving 21 per cent. of metal. Large quantities of metallic zinc are produced in Belgium and Great Britain, mostly from imported ores.

The total production of metallic zinc in 1880 was only 230,000 tons.

The price of this metal has been as follows per ton :—

|                | £    | £              | £    |
|----------------|------|----------------|------|
| 1882 . . . . . | 14.7 | 1888 . . . . . | 15.7 |
| 1885 . . . . . | 13.3 | 1890 . . . . . | 19.8 |
|                |      | 1893 . . . . . | 16.3 |
|                |      | 1897 . . . . . | 15.7 |

In 1897 Great Britain imported 70,000 tons of crude zinc, in cakes, value £1,200,000, besides 20,000 tons of zinc manufactures, value £440,000. Exports of zinc were only 8000 tons.

# INDUSTRIES AND WEALTH OF NATIONS

450 pp., crown 8vo. With Thirty-two Full-page Diagrams

LONGMANS, GREEN, AND CO.

LONDON, NEW YORK, AND BOMBAY

1896

## OPINIONS OF THE PRESS

### *Scotsman* (Dec. 12, 1896).

"Mr. Mulhall modestly maintains that there is nothing original in his 'Industries and Wealth of Nations,' but that he has simply brought into narrow compass the results of the labours of hundreds of able writers whose works are not accessible to the general public. Such an estimate of its value fails entirely to do justice to the originality which is involved in presenting these results in such a way as to bring out their lessons and invest dull figures with an interest which few people can find without a guide. Than Mr. Mulhall they could not have a more competent guide, or one more fitted to elicit from statistics their true lessons. . . . The book is one which can be read with interest from beginning to end, a fact which in itself bears eloquent witness to Mr. Mulhall's skill in marshalling his figures. Its chief value will, however, probably be as a work of reference, and as such it should prove invaluable."

### *Leeds Mercury* (Dec. 21, 1896).

"Every one who is acquainted with the 'Dictionary of Statistics' will know what to expect from Mr. Mulhall in the way of unwearied research and the gift of explicit statement. . . . The author brings into luminous bird's-eye survey the industrial movement and wealth of the nations. The plth of a library of Blue-books and the like is in this volume, and is in it, moreover, in such a fashion that even those who are dull of comprehension cannot miss the significance of such an outlook on labour and capital. It has always been a matter of surprise to us that in these days, when social honours are freely dispensed, no recognition has been made of Mr. Mulhall's unique and remarkable labours."

### *Aberdeen Free Press* (Dec. 28, 1896).

"One feature of the book is the extensive use made in it of diagrams showing visually the comparative position of each country in relation to such matters as wealth per inhabitant, rural and urban population, occupations, steam-power, agriculture (several diagrams), manufactures, minerals, shipping, railways, earnings, taxes, and diet. . . . It would be difficult to find a book within the boards of which so many important facts are compressed."

### *Banking and Insurance* (Jan. 1, 1897).

"The book will . . . deservedly become one of our standard authorities. It well deserves careful study."

### *Investors' Review*.

"From one point of view Mr. Mulhall is candour itself, and in his introduction the reader will find the plan on which he proceeds pretty fully set out. The book is a sort of statistical Liebig's extract, manufactured by a process of which Mr. Mulhall owns the patent."

### *Birmingham Gazette* (Dec. 23, 1896).

"Perhaps those only whose duty it is to struggle with the intricacies of Blue-books and similar official records are qualified to adequately estimate the great service rendered to writers, speakers, and students of political and social economy by such a work as this. . . . Mr. Mulhall has done a great work well."

### *Dundee Advertiser* (Dec. 17, 1896).

"In the present work the author does not allow himself the luxury of theorising. His function has been rather to collect authentic statistics regarding the population, industries, and comparative wealth of the different nations in the world, leaving the application of these figures to writers on special subjects. . . . Mr. Mulhall's volume will prove of great value to the student of political economy and of the comparative history of the industries of the world."

### *Sheffield Telegraph* (Jan. 27, 1897).

"The author of 'The Dictionary of Statistics' has compressed into the present volume an amount of statistical information on the world's wealth, and the industries employed in its production and distribution, which is alike surprising and invaluable. . . . It is a very thorough and conscientious piece of work."

### *British Review* (Dec. 19, 1896).

"To the politician, the economist, the sociologist, and to the merely curious reader, the best advice we can offer is to buy Mr. Mulhall's book; and if they do not care to read it through, to keep it by them for reference."

### *Review of Reviews* (Jan. 15, 1897).

"Probably the most notable book of the month is one which will have the fewest readers. Statistics do not appeal to the majority of mankind. Nevertheless, Mr. Mulhall's 'Industries and Wealth of Nations' is a book which every one who is interested in the progress of the world should read and take to heart. Mr. Mulhall has taken an infinite amount of labour in compiling and classifying the information he has collected, and enables us to form some idea of the immense revolution which has been wrought within the last sixty years."

### *New Saturday Review* (Jan. 30, 1897).

"When Mr. Mulhall's name figures on a title-page the reader needs no further guarantee for what is contained in the book. Not to mention the author's 'Progress of the World' and 'History of Prices since 1850,' there is his 'Dictionary of Statistics,' which is unique in literature. In the volume under notice the author apologises for not having been 'deterred from taking it in hand' by 'the conviction that this task could have been better accomplished by some one else.' That 'some one else,' we venture to believe, has yet to be discovered."

### *New Ireland Review* (Jan. 1897).

"Pythagoras maintained that the ultimate constituent elements of all things were numbers. To be a statistician in the true sense of the word one must share, in some measure, the faith of the philosopher of Crotona. Mr. Michael Mulhall has this qualification, and his devotion to figures has something of a religious enthusiasm. . . . The 'Industries and Wealth of Nations' is an extended inquiry, a monument of patient labour, and a treasure-house of knowledge which has now become indispensable."

### *Liverpool Post* (Dec. 26, 1896).

"This work is a vast storehouse of information carefully and systematically classified. Its great value is that it presents a picture not of one country only, but of all, and not in one department of national industry and commerce only, but in every one of them, and this, too, in a manner that brings out the degree of comparative as well as of actual progress."

### *Economic Review* (July 1897).

"The indefatigable Mr. Mulhall has again supplied us with an excellent book of reference, which is, as we should expect, a monument of patient research and discreet skill in compiling statistics and expounding them in terse and clear language. It possesses a wealth of information that is not only interesting for the general reader, but should also prove instructive for the practical man of affairs."
